SEC. 302. Section 22(a) of the Asian Development Bank Act, as amended (22 U.S.C. 285s), is further amended by striking "That any subscription to additional shares shall be made only after the amount required for such subscription has been appropriated." and inserting in lieu thereof "That any subscription to additional shares shall be effective only to such extent or in such amounts as are provided in advance in appropriations Acts.".

TITLE IV—INTER-AMERICAN DEVELOPMENT BANK AND ASIAN DEVELOPMENT BANK

SEC. 401. The Inter-American Development Bank Act, as amended (22 U.S.C. 283 et seq.), is further amended by adding at the end thereof the following new section:

"SEC. 30. (a) The United States Governor of the Bank is authorized on behalf of the United States to contribute to the Fund for Special Operations $70,000,000: *Provided, however,* That any commitment to make such contribution shall be made subject to obtaining the necessary appropriations.

"(b) In order to pay for a portion of the increase in the United States subscription to the capital stock of the Bank provided for in section 29(a) and for the United States contribution to the Fund for Special Operations provided for in this section, there are authorized to be appropriated, without fiscal year limitation, for payment by the Secretary of the Treasury (1) $274,920,799 for the United States subscription and (2) $70,000,000 for the United States contribution to the Fund for Special Operations.".

SEC. 402. The Asian Development Bank Act, as amended (22 U.S.C. 285 et seq.), is further amended by adding at the end thereof the following new section:

"SEC. 24. (a) The United States Governor of the Bank is authorized to contribute on behalf of the United States $66,750,000 to the Asian Development Fund, a special fund of the Bank: *Provided, however,* That any commitment to make such contribution shall be made subject to obtaining the necessary appropriations.

"(b) In order to pay for the United States contribution to the Asian Development Fund provided for in this section, there are authorized to be appropriated, without fiscal year limitation, $66,750,000 for payment by the Secretary of the Treasury.".

TITLE V—EFFECTIVE DATE AND AVAILABILITY OF FUNDS

SEC. 501. This Act shall take effect upon enactment, except that funds authorized to be appropriated by any provision contained in Title IV are not available for use or obligation prior to October 1, 1981.

SUMMARY

INTERNATIONAL DEVELOPMENT ASSOCIATION

Title I of the bill authorizes the United States Governor of the International Development Association (IDA) to agree to pay to the Association $3.24 billion as the United States contribution to the Sixth Replenishment of the resources of the Association. The bill requires any commitment to contribute these funds to be made subject to obtaining the necessary appropriations. The bill also authorizes the appropriation of $3.24 billion for payment by the Secretary of the Treasury.

The provisions of the bill are necessary because Section 5 of the International Development Association Act (P.L. 86–565, as amended) provides that authorization from the Congress must be obtained for the United States Governor to agree to provide financing for the Association. Moreover, legislation is required in order to authorize the appropriation of the necessary amounts to enable the United States to contribute to IDA.

The International Development Association is a member of the World Bank Group with membership similar to that of the World Bank. IDA was established in 1960 at the initiative of the United States to provide development financing on highly concessional terms to the poorest of the less developed countries. These countries confront enormous development problems and, in addition, have been hard hit by inflation, rising energy costs, and the economic slowdown in developed countries. IDA loans go only to countries with per capita incomes of less than $680; moreover, almost 90 percent of those loans go to countries with incomes of less than $350 per capita. Over 80 percent of IDA's total lending has been to countries in South Asia and in Africa south of the Sahara, the poorest and most disadvantaged regions of the world.

As of June 30, 1980, IDA had committed approximately $20.7 billion in development credits. About half of these commitments are in agriculture and rural development with the remainder distributed among other sectors such as energy, transportation, urbanization, and water supply and sewerage. IDA's lending activities are concentrated on projects which, in addition to contributing to economic growth and development, also, to the maximum extent possible, directly assist the poor to become more productive, and to assure an equitable distribution of basic services to them. This two-pronged approach has been encouraged and supported strongly by the United States.

The Association began discussions in June 1978 on the Sixth Replenishment of IDA resources to finance IDA operations beyond June 1980 when it was anticipated that resources from IDA's Fifth Replenishment would be fully committed. The issue of the overall size of the Replenishment was intensively reviewed at several IDA VI negotiating sessions. Although the Association's management initially recommended an IDA VI of $15 billion, many donor countries—including the United States—emphasized the need for a more realistic balance between the many critical development requirements of IDA recipients and the budgetary constraints of donor countries and other considerations.

An agreement was reached in December 1979 among 33 donor countries to recommend to the Executive Directors a $12 billion Replenishment for a three year period. On the basis of current expectations regarding global inflation, the $12 billion replenishment level will permit IDA to continue lending at roughly the same real rate as in recent years. In mid-January 1980, IDA's Executive Directors recommended approval of the Replenishment to the Board of Governors. The Resolution enabling IDA to accept the resources under the replenishment was approved by the Governors in March 1980. However, the ability of the United States to participate—which is necessary to bring the replenishment into effect—depends on prior Congressional action authorizing and appropriating funds for that participation.

The proposed United States contribution is 27 percent of the total or $3.24 billion. It represents a decline in the United States share from 42 percent at the inception of IDA and 31 percent in the Fifth Replenishment. Other developed countries will provide over $7.7 billion with substantial increases in the German and Japanese shares.

The United States contribution to IDA VI would be made in three equal annual installments of $1,080 million each, starting in FY 81, although the replenishment resolution permits stair-stepping of the contribution with a minimum first installment of the United States of $940 million. Outlays would be spread over a ten-to-twelve year period. Assuming timely Congressional approval of the required appropriations, the outlay effect is expected to be about $20 million in FY 81 and $100 million in FY 82.

A draft bill which included provision for United States participation in IDA VI was transmitted to Congress early in 1980. The Senate passed the bill (S. 2422) in June. Although favorably reported by the House Banking, Finance and Urban Affairs Committee, the legislation was not considered on the House floor before adjournment of the 96th Congress.

Under the IDA VI replenishment arrangements, the replenishment cannot become effective without U.S. participation. With IDA V funds already committed and the implementation of IDA VI delayed, all new IDA lending had to be suspended last summer for lack of funds. As an interim arrangement, a limited amount of new lending is now being approved financed by $1,519 million in advance contributions from 14 donors. However, the temporary financing from this "bridging" arrangement is scheduled to expire in February 1981 with IDA lending operations once again likely to be suspended. The possibility of additional advance contributions appears remote in the absence of progress on the proposed legislation by the United States.

IDA is the principal source of external assistance for the poorest countries in the world. Many of its borrowers are located in sub-Saharan Africa and South Asia and include countries such as Kenya, Sudan, Pakistan, and Sri Lanka. A cessation of IDA lending on March 1 would have serious implications for the economies of those countries. Such a development would also have serious consequences for U.S. foreign policy. It would disrupt the North-South dialogue and damage our relations with other key donors who are our allies. Not making our contribution to IDA IV as agreed would necessarily extend that damage to other areas of our relations with the allies.

For these reasons, continuation of U.S. support for IDA is essential. Prompt Congressional action is critically important since, as stated above, IDA VI cannot become effective without U.S. participation.

A Special Report of the National Advisory Council on International Monetary and Financial Policies on the Sixth Replenishment of the resources of IDA will be transmitted to the Congress separately.

AFRICAN DEVELOPMENT BANK

Title II of the bill authorizes the President to accept U.S. membership in the African Development Bank.

The African Development Bank (AFDB) was established in 1964 to make loans on near market terms for the economic and social development of its fifty African members individually and through regional cooperation. To meet the challenge of Africa's poverty, loans are provided primarily to strengthen the agricultural sector and to finance critically needed infrastructure projects. The Bank's lending activities, like those of the World Bank and the other regional development banks, are financed primarily through the paid-in capital subscriptions of member countries and borrowings in international capital markets.

While the United States and other non-regional countries are members of the AFDB's concessional loan affiliate, the African Development Fund, membership in the Bank has to date been restricted to African nations. The limited resources of its African members have severely restricted the Bank's access to the private capital markets and limited its lending program. As a result, in May 1979, the Governors of the Bank invited non-regional countries to join their institution. At that time, resolutions were submitted to the African members of the Bank which would amend the agreement establishing the Bank to enable non-African countries to become members, provide for an increase in the Bank's capital, and set forth general rules for admission of non-regional countries. Most non-regional countries are expected to be in a position to join the AFDB at the Bank's next annual meeting in May 1981.

Non-regional membership will broaden the capital base of the Bank and increase its access to financial resources. The presence of non-regional countries will enable the Bank to borrow greater amounts of private capital on more favorable terms, thereby permitting the Bank to contribute more effectively to Africa's development by expanding its lending program to a level more commensurate with Africa's needs.

In conjunction with non-regional membership, the capital of the Bank would be increased to $6.3 billion from $1.5 billion, with non-regional countries providing $2.1 billion. The overall increase would be expected to sustain the Bank's lending program for the next five years.

The attached bill authorizes the President to accept membership for the United States in the African Development Bank, and to agree to subscribe 29,820 shares of the capital stock of the Bank. The bill provides that such subscription shall be effective only to such extent or in such amounts as are provided in advance in appropriations acts. The bill also authorizes the appropriation, without fiscal year limitation, of $359.7 million for such subscription. The bill provides that the President, by and with the advice and consent of the Senate, shall appoint a governor and an alternate governor of the Bank and the governor, on the instructions of the President, shall cast the votes of the United States for the director to represent the United States in the Bank.

The proposed U.S. subscription, totaling $359.7 million, would represent 5.68 percent of the Bank's total capital and 17.04 percent of the $2.1 billion non-regional subscription. A U.S. share of non-regional capital of this magnitude is roughly equivalent to its share of the current replenishment of the African Development Fund and balances our interest in cost-sharing with the increased importance of Africa in U.S. foreign policy. Twenty-five percent of capital subscriptions would be paid-in with the balance being callable capital. Thus, over the next five years, out of the total proposed U.S. subscription of $359.7 million, $89.9 million would be for paid-in capital, which would result in budgetary outlays, and $269.8 million would be for callable capital, which we propose be provided through program limitations in appropriations acts.

U.S. membership in the Bank would be a tangible contribution to the cause of African development. It would also represent highly visible U.S. support for a regional institution which is expected to play a larger role in future years. It would signal our increased political, economic and strategic interests in Africa and our concern for the security and well-being of its countries.

A Special Report of the National Advisory Council on International Monetary and Financial Policies on United States membership in the African Development Bank will be transmitted to the Congress separately.

CALLABLE CAPITAL

Title III of the bill amends provisions of the Bretton Woods Agreements Act and the Asian Development Bank Act which require that appropriations be obtained prior to U.S. subscriptions to the 1977 Selective Capital Increase of the International Bank for Reconstruction and Development (IBRD) and the Second Capital Increase of the Asian Development Bank (ADB). Under these provisions, as they now stand, subscriptions to callable capital stock must be preceded by appropriations. Callable capital is guarantee authority for bank borrowings in private capital markets. The U.S. liability in respect to callable capital stock is highly contingent. None of the multilateral development banks has ever made a call on its callable capital, and any such calls are highly unlikely in the future. Congress has already appropriated $11 billion in callable capital, none of which has ever resulted in an outlay of U.S. funds.

In recognition of the contingent nature of the U.S. subscription to callable capital of the IBRD and ADB, it is intended that future subscriptions to IBRD and ADB callable capital be made after program limitations on, rather than appropriations for, those subscriptions are enacted in Foreign Assistance and Related Programs Appropriations Acts.

The amendments provide that subscriptions to capital stock shall be effective "only to such extent or in such amounts as are provided in advance in appropriation acts." Under these amendments, subscriptions to IBRD and ADB callable capital stock can be made after program limitations on the subscriptions are enacted in Foreign Assistance and Related Programs Appropriations Acts. (It is intended to continue to seek appropriations for subscriptions to IBRD and ADB paid-in capital stock.)

The proposed amendments would bring the statutory terms under which U.S. subscriptions to IBRD and ADB callable capital stock can be made into line with those provided in legislation enacted in 1980 (Public Law 96–259) authorizing U.S. subscriptions under the Fifth Replenishment of the Inter-American Development Bank and with those provided in Title II of this bill for the initial subscriptions to the capital stock of the AFDB. In continuing resolutions approved twice by the 96th Congress for FY 1981 appropriations, it was decided to provide for this budgetary treatment of U.S. callable capital subscriptions to these institutions. The proposed amendments are essential to allow implementation of the President's FY 1982 Budget which proposes enactment of program limitations in the FY 1982 Foreign Assistance Appropriations Act for U.S. subscriptions to callable capital stock in the multilateral development banks, including the IBRD and ADB.

INTER-AMERICAN DEVELOPMENT BANK AND DEVELOPMENT FUND

Title IV of the bill authorizes the appropriation of $274,920,799 in United States subscriptions to the capital stock of the Inter-American Development Bank (IDB). It also authorizes the United States Governor of the IDB to contribute on behalf of the United States $70,000,000 to the Fund for Special Operations (FSO), and authorizes the appropriation of this $70,000,000 contribution. Title IV also authorizes the United States Governor of the Asian Development Bank (ADB) to contribute on behalf of the United States $66,750,000 to the Asian Development Fund (ADF), a special fund administered by the ADB, and authorizes the appropriation of this $66,750,000 contribution.

The proposed legislation would complete the authorization for United States participation in the Fifth Replenishment of the resources of the IDB and the Second Replenishment of the Asian Development Fund. The first stage of the authorizing legislation was enacted in June 1980 (P.L. 96–259).

The Fifth Replenishment increased IDB capital resources by $7,969 million (exclusive of unassigned shares) of which $598 million (7.5 percent) was paid-in capital. The share of this increase allocated to the United States was $2,749 million—34.5 percent of the total—comprised of $2,543 million of callable capital and $206 million of paid-in capital. For the FSO, the increase amounted to $1,750 million of which the United States' share is 40 percent of the total ($700 million). The increase in IDB resources was characterized by three important advances—increased cost-sharing by the non-regional and advanced developing member countries, a further shift in lending emphasis from concessional FSO to capital resources, and agreement to direct 50 percent of total lending to low income groups in recipient countries.

Public Law 96–259 enacted on June 3, 1980, authorized United States subscriptions to 227,896 shares of IDB capital stock (the number of shares provided for the United States under the Replenishment) but authorized the appropriation of only $2,474,287,189 instead of $2,749,207,988 to pay for the United States subscriptions. Contributions to the FSO in an amount of $630 million were also authorized. This resulted in a shortfall of $274,920,799 in the amounts negotiated for the United States subscription to IDB capital and $70,000,000 for the United States contribution to the FSO. President Carter and Secretary Miller undertook to seek authorizing legislation from the 97th Congress for these amounts. (President Carter's letter to Congressman Cavanaugh (D-Nebr.) is annexed to this summary.)

The IDB Board of Executive Directors expressed its grave concern with regard to the situation and its hope that the legislation could be obtained by October 31, 1981. At a special meeting of Governors in August 1980, the participants also voiced serious concern over the U.S. action and emphasized the importance of countries being able to participate in the replenishments as negotiated.

The IDB plays an important role in the economic and social development of Latin America and the Caribbean. Its largest borrowers include countries like Brazil and Mexico which have important commercial ties to the United States. The Bank is also a critical source of support for the smaller economies of Central America and the Caribbean. Prompt Congressional consideration and approval of this legislation would be a concrete commitment to overall United States political, economic, and strategic interests in this critical region. It would also avoid what could be a contentious renegotiation of the Fifth Replenishment. A renego-

tiation could result in the loss of the important achievements the U.S. negotiated under the terms of the replenishment and in a further disruption in the Bank's lending operations. Favorable action on this legislation is required as soon as possible.

Public Law 96-259 enacted on June 3, 1980, authorized a United States contribution of $378,250,000 to the ADF, but left a shortfall of $66,750,000 in the United States contribution of $445 million which had been negotiated for the Replenishment.

The proposed bill for a U.S. contribution of $66,750,000 to the ADF will, therefore, complete authorization for United States participation in the Second Replenishment of resources of the ADF. The size of the basic replenishment agreed to in a July 24, 1978 resolution adopted by the ADB Board of Governors is $2.0 billion, of wnich the U.S. share was $445 million. However, the replenishment resolution allows donor countries to make supplementary contributions, over and above their basic contributions, in order to facilitate a concessional lending program of $2.15 billion over the four-year period 1979-82. Certain donor countries (Australia, Austria, Germany, Japan, Switzerland and the United Kingdom) have made such additional pledges to raise the total of basic and supplementary contributions to $2.15 billion. The U.S. share of this larger amount is 20.7 percent, which compares with Japan's 36.8 percent share.

The United States, in replenishment negotiations, successfully pursued several concerns that had been expressed by the Congress. There has been increased cost-sharing on the part of other donor countries. There have also been significant increases in the flow of resources to the poorest and least developed member countries in Asia and the Pacific, and an increased emphasis on lending for projects intended to meet the needs of the poorest peoples in these countries. Among the countries assisted are Pakistan, Thailand and the Philippines.

After enactment of the legislation authorizing U.S. participation in the Replenishment at a level lower than had been anticipated, the ADB convened a meeting of the contributor countries to the ADF to consider how to deal with the situation in light of the exhaustion of ADF resources and the inability of the United States to make its contribution in accordance with the terms negotiated. Strong sentiment was expressed by other donors that there should not be a reallocation of the cost sharing arrangements. Questions were raised whether other donors should insist on reducing their shares or whether a way could be found that would be less damaging to the lending program of the Bank.

The key to resolving the impasse was the United States commitment to seek authorization for the $66,750,000 shortfall as soon as possible. However, other donors also agreed that if the authorization was not obtained by the end of 1981, the other donors would review the situation and consult on the release of their contributions.

The lending operations of the ADF are an effective way for both spurring development in the poorest countries of Asia and supporting basic United States foreign policy interests in the region. Each dollar of the U.S. contribution is matched by almost four dollars from other donor countries, and when the resources contributed by co-financing and mobilized from the domestic savings of the developing countries are included, the U.S. contribution is leveraged ten-fold. This is a fine example of multilateral cost-sharing which is applied to well-conceived and well-executed development projects. Speedy Congressional authorization is important to avoid further disruptions in ADF lending and to enable the United States to contribute a fair share of the financial resources required for a realistic and successful Bank program.

A Special Report of the National Advisory Council on International Monetary and Financial Policies on the Fifth Replenishment of the resources of the IDB and the Second Replenishment of the Asian Development Fund will be transmitted to the Congress separately.

AVAILABILITY OF FUNDS

Title V of the bill provides, in accordance with the procedural requirements of Section 402(a) of the Congressional Budget and Impoundment Control Act of 1974, that funds authorized to be appropriated in the bill for the Inter-American Development Bank and the Asian Development Fund cannot be used or obligated before October 1, 1981. Because it is important that contributions to IDA and subscriptions to AFDB be made in fiscal year 1981, a waiver of the requirements of Section 402(a) would have to be sought with regard to Titles I and II.

CONCLUSION

The multilateral development banks are widely recognized as proven instruments for promoting economic growth with equity in developing countries. They are well-managed and efficient, with lending operations based on the application of economic and financial criteria designed to insure that each project is justified in terms of producing tangible benefits. In recent years, these lending operations have been focused on particularly critical sectors such as energy and food production.

U.S. participation in the multilateral development banks is cost-effective. We share the costs for providing economic assistance with other donor countries. For each dollar which the United States pays into the banks, other countries provide three dollars. In addition, the banks raise more than 90 percent of their conventional lending resources from borrowings in private capital markets, thus reducing budgetary costs for the United States and other member countries to a fraction of total lending programs. In the case of the World Bank, each dollar paid in by the United States has resulted in bank lending of more than $50.

U.S. participation in the multilateral development banks also provides substantial benefits for the U.S. economy. In a recent two-year period, it was estimated that for each dollar paid into the banks by the United States, our Gross National Product increased by three dollars as a direct result of bank-financed activity.

The indirect economic benefits are even greater because the banks, by encouraging economic growth in less developed countries, help expand overseas markets for U.S. goods and services. Less developed countries now comprise the largest and most rapidly expanding export market for our goods and services. They take nearly thirty percent of our total exports, including substantial amounts of agricultural products, and provide critically needed raw materials such as chrome, bauxite and manganese. In helping less developed countries continue to grow and in making a material contribution to international economic stability, the multilateral development banks directly support the most fundamental of U.S. economic self-interests. It is essential that we take action to maintain our international credibility and continue our participation in these important programs.

[From the Congressional Record, May 21, 1980]

THE WHITE HOUSE,
Washington, May 20, 1980.

Hon. JOHN CAVANAUGH,
House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN CAVANAUGH: Thank you for your letter regarding the Multilateral Development Bank legislation. I appreciate your concern that the Administration's acceptance of any reduction in the negotiated replenishments for the regional banks would create a very bad precedent. However, I do not believe that a two-step replenishment authorization process, in which the Administration would ask the next Congress to fill the initial shortfall, constitutes diminished American support for these institutions; nor do I accept this as a precedent for World Bank and IMP legislation. We will do our utmost to assure that the full U.S. shares in IDA VI and the IMF quota increase are authorized.

As you know, a further rejection by the House of the U.S. subscriptions to the regional banks would be disastrous. Both Secretary Miller and I understand the risks involved with the Conference Report, but after wide consultation, we believe it is the best approach possible. Therefore, I believe that the Conference Report deserves support as the best of the options available at this time.

I hope that ultimately you will be able to support the Conference Report with the explicit understanding that we are not accepting less than full funding for our negotiated replenishments and that we will do everything possible to help you and other bank supporters in seeking full funding for IDA VI and the IMF.

If you cannot support the Conference Report, then I hope you will not actively oppose it, because failure of the Conference Report this week will almost certainly mean no regional bank bill or IDA VI legislation this year. Although we may not agree on the best way to approach the problem, I think we would both agree that a result of no legislation this year would be the worst possible outcome.

Sincerely,

JIMMY CARTER.

John, you have been a staunch & courageous ally in this fight, & I need you in these closing rounds.

Thanks.

J.

THE SECRETARY OF THE TREASURY,
Washington, March 10, 1981.

Hon. GEORGE BUSH,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: On January 17, two draft bills were transmitted to the Congress "To provide for continuing participation by the United States in the International Bank for Reconstruction and Development, and for other purposes" and "To provide for continuing participation by the United States in the International Development Association, to provide for United States participation in the African Development Bank, and for other purposes."

The Administration has reviewed this draft legislation within the context of projected foreign aid budget levels. The need for a tightly disciplined national budget and the importance of the multilateral development banks both to the international economic system and to overall U.S. interests were carefully assessed.

As a result of the review, the Administration is requesting prompt and favorable Congressional action on the two draft authorizing bills. The bills are a high priority element of the Administration's foreign economic assistance program. They are an integral part of our efforts to establish a strong and coherent foreign policy in partnership with our allies. Authorization of the full amounts requested is essential to this effort. It will demonstrate the intention to reassert U.S. leadership in our international relations. In the case of the International Development Association, authorization of the full U.S. contribution is required before the Sixth Replenishment agreement can become effective. It would therefore be appreciated if you could undertake the necessary steps to assure that this proposed legislation receives prompt consideration by the House.

While the overall amounts of the authorization requests for the banks have not been changed, U.S. funding for the multilateral banks has not been exempted from the President's budget reduction program. The Administration is recommending that contributions and subscriptions on the major elements of the authorization requests be made over a longer period of time than was envisioned in the budget submitted by the previous Administration. Specifically, the Administration is requesting funding for U.S. subscriptions to the General Capital Increase of the World Bank over six years (FY 1982–1987) instead of seeking funding for the full subscription in FY 1982. We are also seeking graduated appropriations ($540 million, $850 million and $1,850 million in FY 1981–83 respectively) for the U.S. contribution to the Sixth Replenishment of the International Development Association instead of $1,080 million in each of those years.

The funding adjustments recommended by the Administration will cause programming problems for the banks. These adjustments are necessary, however, to enable the United States to carry out internationally negotiated agreements at the lowest possible cost.

The Office of Management and Budget has advised that the enactment of these legislative proposals would be in accord with the program of the President.

Sincerely,

R. T. McNAMAR,
Acting Secretary.●

By Mr. KENNEDY:

S. 787. A bill to amend the Internal Revenue Code of 1954 to provide nonrefundable tax credits for investments in qualified industrial energy efficiency and fuel conversion projects, and for other purposes; to the Committee on Finance.

REFUNDABLE ENERGY CONSERVATION TAX INCENTIVE PROGRAM FOR BUSINESS

Mr. KENNEDY. Mr. President, earlier today I had the honor of joining with my colleagues Senator WALLOP, Senator BOREN, Senator PERCY, and six other Senators in cosponsoring the Industrial Energy Security Tax Incentive Act of 1981. I am also introducing today legislation entitled "The Energy Productivity Act of 1981." This legislation is basically the same legislation I cosponsored this morning along with Senator WALLOP. It differs in one important aspect. In this legislation I have made the special investment tax credit for energy conservation refundable.

I have long believed that investment tax credits should be refundable because I believe that all firms, regardless of their status as taxpayers, should have Federal incentives available to them. Especially in an area such as energy conservation, it is just as important to the Nation that companies that are not making profits save oil as it is that profitmaking companies save oil. In fact, those companies that are not making profits are probably less likely to be investing money in energy conservation improvements than those who are making profits.

By Mr. MITCHELL:

S. 788. A bill to provide unemployment insurance coverage for certain U.S. workers; to the Committee on Finance.

UNEMPLOYMENT INSURANCE COVERAGE FOR AMERICAN WORKERS AT ROOSEVELT-CAMPOBELLO INTERNATIONAL PARK

● Mr. MITCHELL. Mr. President, I am introducting a bill to extend unemployment insurance coverage to the American workers at the Roosevelt-Campobello International Park.

The International Park was established in 1964 to preserve the summer home of President Franklin Delano Roosevelt. The park is jointly administered by the United States and Canada, Campobello Island being Canadian territory. Pursuant to the basic agreement that established the park, both Canadian and U.S. workers are employed by the Park Commission.

The American employees of the Commission pay Federal income taxes and payroll taxes. They are eligible for old age, survivors, and disability insurance benefits under the social security system. In all respects except one, they are treated as any other workers employed in U.S. territory.

The bill I am introducing today would adjust that one minor anomaly by treating work for the Park Commission as "covered employment" for the purposes of the Federal Unemployment Tax Act. Passage of this bill would permit the State of Maine to extend unemployment insurance coverage to these workers.

The situation that now exists has been the subject of extensive discussions between our Treasury Department and the Canadian Government. This proposed legislation is the Treasury Department's suggested solution to the problem. It will entail no additional Federal spending and places no added regulatory burden on any U.S. enterprise or business.

It would have the effect of making certain that the Canadian and U.S. citizens employed by the Park Commission are treated alike by their respective governments.

I urge prompt consideration of this measure.●

By Mr. D'AMATO:

S. 789. A bill to amend the Federal Water Pollution Control Act to provide that the limitation on the use of grants for publicly owned treatment works for treatment, storage, or conveyance of flows of industrial users shall not take effect until November 15, 1984; to the Committee on Environment and Public Works.

PROPOSED LEGISLATION TO AMEND CLEAN WATER ACT INDUSTRIAL COST EXCLUSION PROVISIONS

● Mr. D'AMATO. Mr. President, today I am pleased to introduce legislation which amends the Federal Water Pollution Control Act to provide that the limitation on the use of grants for publicly owned treatment works for treatment, storage, conveyance of flows of industrial users shall not take effect until November 15, 1984.

In October of last year, Congress amended the Clean Water Act, changing the funding formula through which municipalities receive appropriations for the construction grants program. This change, which was mandated by Public Law 96–483, poses a great threat to the goals set forth in the Clean Water Act, to rid our Nation's water of harmful pollutants through the prohibition of industrial discharges into our lakes, rivers, and streams. It also poses tremendous difficulties for many of our municipalities and communities.

The new authorization formula, industrial cost exclusion (ICE), rules out the Federal Government's 75-percent share of the costs of publicly owned treatment works for the portion of industrial users that contribute more than 50,000 gallons per day of sanitary waste. As a result, it leaves municipalities with funding and completing the enormous task of fulfilling the Federal mandates of the Clean Water Act. However, because doubts existed with the passage of this legislation, the amendment also authorized a study by the Environmental Protection Agency (EPA) to determine the effects of industrial cost exclusion. This report was delivered to Congress on March 15, 1981.

EPA REPORT ON ICE

The EPA report concludes that ICE will be harmful to great numbers of municipalities and industries. Apparently, ICE could cause industries either to close permanently or move to other municipalities which have suitable publicly owned treatment works (POTW's). The loss of industries would have serious effects on the unemployment problem of many of our communities.

In addition to increased unemployment rates in these communities, residents and industries remaining in these cities would have to contribute to the construction and maintenance of the POTW through increased property taxes. While some more prosperous and larger communities will be able to fund this added burden, most municipalities cannot afford these costs, and will see their industries move away, tax base decrease, and unemployment rise. Two such communities adversely affected by ICE are Gloversville and Johnstown in New York State.

The city of Gloversville-Johnstown Treatment Facility has a population of approximately 18,000 persons and the city of Johnstown has a population of approximately 9,000 persons. Fulton County, within which they are located, has a total population of approximately 50,000 persons within the area of 533 square miles. The economic base of Fulton County is almost entirely dependent on the manufacturing jobs located within the two cities and has been declining for many years.

There are no significant State or Federal installations and no large institutional employers. More than half of the manufacturing jobs are in the leather industry, and these are primarily tanneries. There are also textile dyeing and finishing plants and miscellaneous individual factories producing adhesives, phonograph records, refrigration equipment, and marine hardware. Present records indicate that most of the 30 factories would exceed the 50,000 gallons per day sanitary waste equivalent cut-

off. In fact, the primary reason for these firms to be located in Fulton County is the excellent quality and quantity of water available for industrial use.

The Gloversville-Johnstown Joint Wastewater Treatment Facility is currently involved in an upgrading and expansion under the 201 program. To understand the magnitude of the impact on these communities it is necessary to compare the Federal share before and after the passage of Public Law 96-483. The cities' consulting engineers made a preliminary cost estimate of $25.000.000 in the first quarter of 1979. A Federal share at 75 percent of the total would be $18,750.000. If just the 17.7 percent of domestic use is funded at 75 percent, the Federal share would be only $3,318,750, a difference of $15,431.250.

According to the mayor of Gloversville, Louis Nicolella, the increased cost to the city is an intolerable burden. In a letter to me, he states:

What we have in our community is a potential crisis of overwhelming proportions. Could we expect small family-owned corporations to commit themselves to waste-treatment allocations of greater dollar value than their own physical plant and equipment? Yet we would be forced by National Pollutant Discharge Elimination System (NPDES) enforcement to drive them away if we chose not to upgrade. Gloversville and Johnstown's combined sewer budgets exceed $2 million for 1981. Bonding all the non-Federal costs of upgrading at current interest rates of 9% or more will double these budgets. We would be particularly likely to have a domino effect. If one firm left, the costs to the remaining would increase. Gradually at first and accelerating with time the costs would climb beyond the resources of even the strongest firms.

COSTS AND IMPACT

Of course, this is just one example in New York State. But it is illustrative of many of the problems ICE is posing for communities throughout the country, as the EPA report makes clear. Instead of saving money, ICE will cause additional funds to be spent because it requires communities with major industries to seek alternative financing for the capacity assigned to industrial users having flows greater than 50,000 gallons per day of equivalent sanitary waste. The time necessary to work out these arrangements will impose the costs of delay upon affected projects. These costs of delay include inflation, increased finance charges, and higher administrative costs.

As inflation persists, the absolute cost of a project, both the Federal and non-Federal share increase. Localities must pay greater financing charges on the larger sums they borrow to pay for their portion of the project. In addition, the administrative cost of exploring ways to finance the affected industrial portion and of negotiating new agreements with industries will mean an added cost for the municipalities.

What are some of the potential impacts of ICE on POTW's? If the construction cost to pay for the industrial share is subsidized by the local community, there may be an inability to borrow funds or high debt service costs. Should the industry decide to self-treat the wastewater, the advantages of economy of scale would be lost. And it is obvious that if industry shuts down or decreases production, there will be a concomitant loss of jobs and a decline in the community's tax base.

There are other problems which the EPA report also addresses. Over 70 percent of the affected projects are in communities smaller than 50,000 persons. These figures suggest a rural and small city bias in the ICE.

A number of municipalities feel that application of existing deadlines for industrial flow eligibility would create inequities between communities with some ability to offer low cost treatment of industry while others could not. This is a particular concern to communities which feel that they would miss the deadline for eligibility because of slow processing of facility plan approvals by EPA or State offices.

The 50,000-gallon-per-day cutoff would affect communities unequally. For example, under the ICE provision, a community with many small industries, each with flow under 50,000 gallons per day, could receive funding for all of its industrial flow, while another community with only one industry, but above the 50,000-gallons-per-day limit, would not receive funding for its industrial flow, even though the total industrial flow in the second community was smaller.

Communities are also concerned that the 50,000-gallon-per-day limit would require them to treat their industrial users inequitably. They feel that they might be faced with charging industrial users widely different rates when the only difference between them was amount of flow. Other communities are concerned that some industries would have relatively low rates because they would use previously completed facilities while newer industries in "development" areas would be facing higher rates or self-treatment costs.

EFFECTS OF POSTPONING ICE

This bill does not offer a solution to the problems of funding the construction grants program. There seems to be no end in sight to this program which has already received authorizations of $44 billion, the largest nonmilitary public works program since the Interstate Highway System. Rather, this proposed legislation gives our communities the opportunity to plan properly for the future, without having to change their course in midstream because the Federal Government has decided to change the rules in the middle of the game.

I do not advocate a return to industrial cost recovery permanently, as this approach has its drawbacks as well. I also point out that this bill does not call for increased funding for the construction grants program. But, I believe that we must make the authorizing process a fair one. Finally, it provides Congress with the opportunity to reauthorize the construction grants program later this year in order to arrive at an adequate program for the future. As the EPA report demonstrates, industrial cost exclusion is not the proper response at this time to the problem of funding the construction grants program provided for in the Clean Water Act.●

By Mr. RIEGLE:

S. 790. A bill to amend section 44 of the Internal Revenue Code of 1954 to allow a credit against tax for the purchase of certain new principal residences, and for other purposes; to the Committee on Finance.

EMERGENCY HOME PURCHASE AND INVENTORY REDUCTION ACT OF 1981

● Mr. RIEGLE. Mr. President, I am introducing today a bill that would provide desperately needed relief to some of the Nation's most hard-pressed homebuilders.

The bill would provide a 5-percent tax credit on the purchase price of a qualifying new home up to a maximum of $5,000.

Qualifying new homes would be those that have remained unsold in the housing inventory for more than 1 year.

The bill would immediately help clear the unsold housing inventory, which in large regions of the country has remained at untolerably high levels.

It would ease the burden of financing this inventory at extremely high interest rates—a burden that is rapidly driving large numbers of homebuilders toward bankruptcy.

The bill would target assistance on homebuilders and homebuyers who, through no fault of their own, were caught by the sudden and unforeseeable rise in interest rates. Many of the qualifying homes were built for prospective buyers who subsequently found that Federal tight money policies had forced the mortgage payments beyond their ability to pay.

As a result, many homebuilders in States like my own State of Michigan stand to lose businesses that they had built with years of hard work. The recession in our State has reduced the number of prospective homebuyers. The continuing high interest rates are draining capital from the firms at an extraordinary rate.

Mr. President, study after study has found that the boom and bust housing cycles do lasting harm to our home construction industry and ultimately drive up the cost of housing for all Americans. Many homebuilders are now facing a crisis that is worse than any they have seen in the past. This bill will provide modest but real relief.

This bill draws on the precedent of section 208 of the Tax Reduction Act of 1975, which was successful in easing the housing crisis of 1974 and 1975. Expert analysis indicates that the cost would be modest in comparison to the benefits. About 55,000 units would qualify, and the cost is estimated to be less than $180 million nationwide.

Since some new construction activity would be generated and the operating losses of many homebuilders would be reduced, there would be significant offsetting revenue gains to the Treasury.

Mr. President, I ask unanimous consent that the text of my bill and a copy of a section-by-section analysis be printed in the RECORD at the conclusion of my remarks.

There being no objection, the bill and analysis were ordered to be printed in the RECORD, as follows:

S. 790

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Emergency Home Purchase and Inventory Reduction Act of 1981".

SEC. 2. CREDIT FOR PURCHASE OF NEW PRINCIPAL RESIDENCE.

Section 44 of the Internal Revenue Code of 1954 (relating to credit for purchase of new principal residence) is amended to read as follows:

"SEC. 44. PURCHASE OF NEW PRINCIPAL RESIDENCE.

"(a) GENERAL RULE.—In the case of an individual there is allowed, as a credit against the tax imposed by this chapter for the taxable year, an amount equal to 5 percent of the purchase price of a new principal residence purchased by the taxpayer.

"(b) LIMITATIONS.—

"(1) MAXIMUM CREDIT.—The credit allowed under subsection (a) may not exceed $5,000.

"(2) LIMITATION TO ONE RESIDENCE.—The credit under this section shall be allowed with respect to only one residence of the taxpayer.

"(3) MARRIED INDIVIDUALS.—In the case of a husband and wife who file a joint return under section 6013, the amount specified under paragraph (1) shall apply to the joint return. In the case of a married individual filing a separate return, paragraph (1) shall be applied by substituting '$2,500' for '$5,000'.

"(4) CERTAIN OTHER TAXPAYERS.—In the case of individuals to whom paragraph (3) does not apply who together purchase the same new principal residence for use as their principal residence, the amount of the credit allowed under subsection (a) shall be allocated among such individuals as prescribed by the Secretary, but the sum of the amounts allowed to such individuals shall not exceed $5,000 with respect to that residence.

"(5) APPLICATION WITH OTHER CREDITS.—The credit allowed by subsection (a) shall not exceed the amount of the tax imposed by this chapter for the taxable year, reduced by the sum of the credits allowable under sections 33, 37, 38, 40, 41, and 42.

"(c) DEFINITIONS.—For purposes of this section—

"(1) NEW PRINCIPAL RESIDENCE.—The term 'new principal residence' means a principal residence (within the meaning of section 1034), the original use of which commences with the taxpayer, and includes, without being limited to, a single family structure and a residential unit in a condominium or cooperative housing project.

"(2) PURCHASE PRICE.—The term 'purchase price' means the total contract price of the new principal residence which is set forth in the contract for purchase on the date of the acquisition thereof.

"(3) PURCHASE.—The term 'purchase' means any acquisition of property, but only if—

"(A) the property is not acquired from a person whose relationship to the person acquiring it would result in the disallowance of losses under section 267 or 707(b) (but, in applying section 267 (b) and (c) for purposes of this section, paragraph (4) of section 267(c) shall be treated as providing that the family of an individual shall include only his spouse, ancestors, and lineal descendants), and

"(B) the basis of the property in the hands of the person acquiring it is not determined—

"(i) in whole or in part by reference to the adjusted basis of such property in the hands of the person from whom acquired, or

"(ii) under section 1014(a) (relating to property acquired from a decedent).

"(d) RECAPTURE FOR CERTAIN DISPOSITIONS.—

"(1) IN GENERAL.—Except as provided in paragraphs (2) and (3), if the taxpayer disposes of property with respect to the purchase of which a credit was allowed under subsection (a) at any time within 36 months after the date on which he acquired it as his principal residence, then the tax imposed under this chapter for the taxable year in which the replacement period under paragraph (2) with respect to the disposition terminates is increased by an amount equal to the amount allowed as a credit for the purchase of such property.

"(2) ACQUISITION OF NEW RESIDENCE.—If, in connection with a disposition described in paragraph (1) and within the applicable period prescribed in section 1034, the taxpayer purchases a new principal residence, then the provisions of paragraph (1) shall not apply and the tax imposed by this chapter for the taxable year following the taxable year during which disposition occurs is increased by an amount which bears the same ratio to the amount allowed as a credit for the purchase of the old residence as (A) the adjusted sales price of the old residence (within the meaning of section 1034), reduced (but not below zero) by the taxpayer's cost of purchasing the new residence (within the meaning of such section) bears to (B) the adjusted sales price of the old residence.

"(3) DEATH OF OWNER; CASUALTY LOSS; INVOLUNTARY CONVERSION; ETC.—The provisions of paragraph (1) shall not apply to—

"(A) a disposition of a residence made on account of the death of any individual having a legal or equitable interest therein occurring during the 36-month period to which reference is made under such paragraph,

"(B) a disposition of the old residence if it is substantially or completely destroyed by a casualty described in section 165(c)(3) or compulsorily and involuntarily converted (within the meaning of section 1033(a)), or

"(C) a disposition pursuant to a settlement in a divorce or legal separation proceeding where the other spouse retains the residence as principal residence.

"(a) PROPERTY TO WHICH SECTION APPLIES.—

"(1) IN GENERAL.—The provisions of this section shall apply to a new principal residence—

"(A) the construction of which began before February 15, 1980,

"(B) which is acquired and occupied by the taxpayer after February 15, 1981, and before January 1, 1983, and

"(C) which was acquired by the taxpayer under a binding contract entered into by the taxpayer before January 1, 1982.

"(2) BINDING CONTRACT.—For purposes of this subsection, a contract for the purchase of a residence which is conditioned upon the purchaser's obtaining a loan for the purchase of the residence (including conditions as to the amount or interest rate of such loan) is not considered nonbinding on account of that condition.

"(3) CERTIFICATION MUST BE ATTACHED TO RETURN.—This section does not apply to any residence unless there is attached to the return of tax on which the credit is claimed a written certification (which may be in any form) signed by the seller of such residence that—

"(A) construction of the residence began before February 15, 1980, and

"(B) the purchase price of the residence is the lowest price at which the residence was offered for sale after January 1, 1980.

For purposes of this paragraph, a written certification filed by a taxpayer is sufficient whether or not it is on a form prescribed by the Secretary so long as such certification is signed by the seller and contains the information required under this paragraph.".

SECTION-BY-SECTION ANALYSIS OF S. 790

THE EMERGENCY HOME PURCHASE AND INVENTORY REDUCTION ACT OF 1981

The bill is similar to section 208 of Public Law 94–12, the Tax Reduction Act of 1975, which was codified as section 11 of the Internal Revenue Code. Section 44 allowed a credit against Federal income taxes in an amount equal to five percent of the purchase price of a new principal residence purchased or constructed by a taxpayer if it was acquired and occupied between March 12, 1975 and January 1, 1977.

Section 1 of the bill declares that it may be cited as the "Emergency Home Purchase and Inventory Reduction Act of 1981."

Section 2 of the bill would amend section 44 of the Internal Revenue Code. Subsection (a) of the bill would provide for a credit against Federal income taxes in an amount equal to five percent of the purchase price of a new principal residence purchased by the taxpayer. Unlike Public Law 94–12, this bill would not allow the credit for residences constructed by the taxpayer.

Subsection (b) would limit the maximum credit to $5,000. The credit would only be allowed for one residence of the taxpayer, and married couples would be limited to a $5,000 credit per couple. If the couple filed separate returns, only a $2,500 credit could be taken on each return. If unmarried individuals jointly purchased a principal residence, the Internal Revenue Service would be authorized to prescribe regulations as to how the $5,000 credit would be allowed per residence. The credit would not be refundable, and it would be applied against income tax liability after the foreign tax credit, the tax credit for the elderly, the investment tax credit, the work incentive credit, the political contributions credit, and the section 42 general tax credit (which ceased to apply to tax years after 1978).

Subsection (c) would establish the following definitions. First, "new principal residence" would mean a principal residence (within the meaning of Code section 1034) that had never been used until the taxpayer occupied it. The definition would include, without being limited to, single family structures and residential units in condominiums or cooperative housing projects.

Second, "purchase price" would mean the total contract price of the new principal residence which is set forth in the contract for purchase on the date of acquisition. Third, the definition of "purchase" is written to prohibit use of the credit by taxpayers who acquire their principal residence from certain related persons (including spouses, ancestors, lineal descendants, certain corporations, certain trusts, and certain partnerships) and by taxpayers who acquire their principal residence by gift or inheritance.

Subsection (d) of the bill would provide for recapture of the credit if the taxpayer disposes of the home within three years after the date of acquisition. This means that the amount of the credit would be added to income in the year of disposition (sale). There are two exceptions to this rule. First, the recapture rule would not apply if the taxpayer purchased a new principal residence within 18 months of the disposition of the home on which the credit was allowed, providing that the second new principal residence cost more than the first was sold for. If the second principal residence was less expensive than the sales price of the first, then part of the credit would be recaptured. Second, the recapture rule would not apply if one of the following occurred: death of

one of the owners; destruction of the home as a result of a casualty such as fire, storm, etc.; condemnation; or divorce where one spouse retains the home as a principal residence.

Subsection (e) would require that the principal residence be constructed before February 15, 1980. The taxpayer must acquire and occupy the residence after February 15, 1981, and before January 1, 1983, and the taxpayer must enter a "binding contract" to purchase before January 1, 1982. A contract conditioned upon the purchaser's obtaining financing would not be considered nonbinding for that reason.

In order to qualify for the credit, the taxpayer would have to furnish a certification signed by the seller stating that construction of the residence began before February 15, 1980 and the purchase price of the residence was the lowest price at which the residence had been offered for sale since January 1, 1980. The form of the certificate is unimportant providing it is signed by the seller and contains the required information.●

By Mr. MITCHELL (for himself, Mr. MATHIAS, and Mr. HEFLIN):

S. 791. A bill to amend the Internal Revenue Code of 1954 to exclude certain service performed on fishing boats from coverage for purposes of unemployment compensation; to the Committee on Finance.

LEGISLATION RELATING TO UNEMPLOYMENT TAX FOR MAINE FISHERMEN

Mr. MITCHELL. Mr. President, I am today introducing a bill which, if enacted, would solve a problem that Maine fishermen are having with the unemployment tax.

The current Federal Unemployment Tax Act (FUTA) recognizes that crew members on many fishing boats cannot easily be classified as "employees" for the purposes of FUTA. FUTA exempts all workers on fishing boats except: Workers on halibut and salmon commercial fishing boats and workers on vessels over 10 net tons. Often, commercial fishing ventures resemble joint ventures more than employer-employee situations. The crews are frequently "pick up" crews or are family members and relatives.

Since the United States adopted the 200-mile limit, many fishermen in Maine and other States have found it more economical to move to larger boats. Some boats have exceeded the 10-ton limit and are consequently facing greater financial and administrative burdens due to the FUTA tax liability, even though the program is not well-suited for their situation. Even though the boat owners are paying the tax, crew members tend not to collect the benefits.

The proposed solution is to exempt crew members from FUTA if they are self-employed, as defined for the social security tax and for income tax withholding purposes The criteria for self-employment require that the worker receive only a share of the catch or a share of the proceeds from the sale of the catch, and that the crew of the boat be fewer than 10 workers. Under current law, if crew members meet those conditions, boat owners do not have to withhold income or social security taxes. Under the bill, if the crew members met these conditions, the boat owner would not have to pay FUTA taxes. The bill would not repeal the two existing criteria; rather, it would add a new exception to FUTA that fishing vessels could use. This is done to avoid inadvertently denying some other fishing vessels the use of the current exception.

The measure I am introducing today has two advantages. First, it lifts what is clearly an inappropriate unemployment tax burden from the fishing vessel owner or operators in Maine and other States. Second, it promotes uniformity by applying the same criteria for self-employment for FUTA, social security, and income tax withholding.

By Mr. MELCHER (for himself, Mr. BURDICK, Mr. HATFIELD, Mr. INOUYE, Mr. GOLDWATER, Mr. MATSUNAGA, Mr. BAUCUS, Mr. DOMENICI, and Mr. DECONCINI):

S. 792. To promote the development of native American culture and art; to the Select Committee on Indian Affairs.

NATIVE AMERICAN CULTURE AND ART DEVELOPMENT

● Mr. MELCHER. Mr. President, during the 96th Congress, I introduced S. 2166, a bill for the preservation and development of native American art and culture. The Select Committee on Indian Affairs held several hearings on that legislation, including a field hearing in Santa Fe, N. Mex. The hearings brought to light a number of issues which required clarification before the committee could act on the bill. However, due to the committee's busy agenda, final action on S. 2166 was postponed.

Today, I am introducing another version of the native American art and culture bill. This legislation incorporates many of the suggestions made by Indian as well as non-Indian witnesses during the committee hearings in 1980, and provides for the establishment of a national institute through which Indian art and culture will be preserved, revitalized and disseminated.

Mr. President, the artistic and cultural heritage of this Nation has been influenced by many societies, peoples, and countries. Yet, the United States has only one genuinely native art form and cultural heritage and that is derived from the Indian people. For many years the cultural and artistic expression of Indian people has been eroded to both their detriment and that of the entire Nation. Such erosion must stop.

The unique aspects of American Indian culture and artistic contributions must be treated with great concern and sensitivity. To do otherwise would threaten the very existence of many Indian institutions and diminish greatly the artistic and cultural richness of our Nation. I believe the legislation I am introducing demonstrates the Nation's sensitivity to the cultural, artistic, and humanistic expression by its native peoples.

Mr. President, current Federal initiatives in the area of Indian art and culture are fragmented and inadequate. By establishing a national cultural and artistic institution capable of serving the entire Indian community and the Nation, we will be creating not only a focal point for the recognition of Indian art and culture, but also a vehicle through which Indian people can communicate and share their feelings and perceptions with each other and with non-Indians. The resulting enhancement and preservation of this Nation's native art and culture will have a fundamental influence in raising the level of self-realization of the American people.

The establishment of an institute encompassing the art and culture of Indian people is not a new concept but, I believe, it is one whose time has come. The Senate Special Subcommittee on Indian Education in its 1969 report, "Indian Education: A National Tragedy—A National Challenge," recommended the creation of such an institute and emphasized that—

> The information such an institute could disseminate, as well as the research which it would conduct, would greatly increase public knowledge and understanding of the American Indian (Senate Report 91-501, p. 126.)

Twelve years have passed since the Senate received that recommendation. With the introduction of this bill, the Senate will finally have the opportunity to consider this proposal.

Mr. President, the Institute of Native American Art and Culture Development is described in the bill I am introducing today in relatively broad terms. The legislation is primarily designed to establish a structure through which the Federal Government can support, foster, and encourage the development of Indian art and culture. I am hopeful that extensive hearings on the bill will provide a clearer focus of the Institute's direction and long-term objectives.

Mr. President, I ask unanimous consent that the text of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 792

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Native American Culture and Art Development Act".

FINDINGS

SEC. 2. The Congress finds and declares that—

(1) American Indian art and culture has contributed greatly to the artistic and cultural richness of the Nation;

(2) American Indian art and culture occupies a unique position in American history as being our only native art form and cultural heritage;

(3) the enhancement and preservation of this Nation's native art and culture has a fundamental influence on the American people;

(4) although the encouragement and support of Indian arts and crafts are primarily a matter for private, local, and Indian initiative, it is also an appropriate matter of concern to the Federal Government;

(5) it is appropriate and necessary for the Federal Government to support research and scholarship in Indian art and culture and to complement programs for the advancement of Indian art and culture by tribal, private, and public agencies and organizations;

(6) current Federal initiatives in the area of Indian art and culture are fragmented and inadequate; and

(7) in order to coordinate to the Federal Government's effort to preserve, support, revitalize, the disseminate Indian art

and culture, it is desirable to establish a national institute of Native American Culture and Arts Development.

DEFINITIONS

SEC. 3. As used in this Act—

(1) The term "Indian art and culture" includes, but is not limited to, the traditional and contemporary expressions of Native American language, history, customs, belief, music, architecture, drama, dance, rituals, and crafts.

(2) The term "Institute" means the Institute of Native American Culture and Arts Development established by this Act.

(3) The term "Indian for Native American" means any person who is a member of an Indian tribe or is a Native Hawaiian.

(4) The term "Indian tribe" means any tribe, band, nation, or other organized group or community of Indians, including any Alaska Native village pursuant to the Alaska Native Claims Settlement Act, which is recognized as eligible for special programs and services provided by the United States to Indians because of their status as Indians.

(5) The term "Native Hawaiian" means any descendant of a person who, prior to 1778, was a native of the Hawaiian Islands.

(6) The term "Secretary" means the Secretary of the Interior.

ESTABLISHMENT OF INSTITUTE

SEC. 4. There is established the Institute of Native American Culture and Arts Development, which shall be under the direction and control of a Board of Trustees (hereinafter referred to in this Act as the "Board") established in accordance with section 5.

BOARD OF TRUSTEES

SEC. 5(a) The Board shall be composed of 18 members as follows:

(1) twelve members appointed by the President of the United States from among individuals from private life who are Native Americans widely recognized in the field of Indian art and culture;

(2) Secretary of the Interior (or his designee);

(3) Secretary of Education (or his designee);

(4) Secretary of the Smithsonian Institution (or his designee);

(5) Chairman, National Endowment of the Arts (or his designee);

(6) Chairman, National Endowment of the Humanities (or his designee); and

(7) Librarian of Congress (or his designee).

The President of the Institute shall serve as an ex officio member of the Board.

(b) In making appointments pursuant to paragraph (1) of subsection (a), the President of the United States shall—

(1) consult with the Indian tribes and the various organizations of Native Americans; and

(2) give due consideration to the appointment of individuals who will provide appropriate regional and tribal representation on the Board.

(c) The term of office of each member of the Board appointed pursuant to paragraph (1) of subsection (a) shall be six years, except that of such members first appointed, four shall serve for a term of two years, four for a term of four years, and four for a term of six years, as designated by the President as of the time of appointment. Any member of the Board appointed to fill a vacancy occurring prior to the expiration of the term to which his predecessor was appointed shall be appointed for the remainder of the term. No member of the Board appointed pursuant to paragraph (1) of subsection (a) shall be eligible to serve in excess of two consecutive terms, but may continue to serve until his successor is appointed.

(d) The President of the United States shall designate the initial Chairman and Vice Chairman of the Board from among the members of the Board appointed pursuant to paragraph (1) of subsection (a). Such Chairman and Vice Chairman so designated shall serve for twelve calendar months. The Chairman and Vice Chairman shall thereafter be elected by the members of the Board appointed pursuant to paragraph (1) of subsection (a) and shall serve for terms of two years. In the case of a vacancy in the office of Chairman or Vice Chairman, such vacancy shall be filled by the members of the Board appointed pursuant to paragraph (1) of subsection (a) and the member filling such vacancy shall serve for the remainder of the unexpired term.

(e) Unless otherwise provided by the bylaws of the Institute, a majority of the members of the Board shall constitute a quorum.

(f) The Board is authorized—

(1) to formulate the policy of the Institute;

(2) to make such bylaws, rules, and regulations as it deems necessary for the administration of its functions under this Act, including the organization and procedure of the Board;

(3) to obtain the services of experts and consultants in accordance with the provisions of section 3109 of title 5, United States Code, and to accept and utilize the services of voluntary and noncompensated personnel and reimburse them for travel expenses, including per diem, as authorized by section 5703 of title 5, United States Code;

(4) to solicit, accept, and dispose of gifts, bequests, devises of money, securities, and other properties of whatever character, for the benefit of the Institute;

(5) to receive grants from, and enter into contracts and other arrangements with, Federal, State, or local governments, public and private agencies, organizations, and institutions, and individuals;

(6) to acquire, hold, maintain, use, operate, and dispose of such real property, including improvements thereon, personal property, equipment, and other items, as may be necessary to enable the Board to carry out the purposes of this Act; and

(7) notwithstanding section 3618 of the Revised Statutes (31 U.S.C. 487), or any similar provision of law, to use any funds or property received by the Institute to carry out the purposes of this Act.

(g) Members of the Board appointed pursuant to paragraph (1) of subsection (a) of this section shall, for each day they are engaged in the performance of the duties under this Act, receive compensation at the rate of $125 per day, including traveltime. All members of the Board, while so serving away from their homes or regular places of business, shall be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5, United States Code, for persons in Government service employed intermittently.

PRESIDENT; EMPLOYEES

SEC. 6. (a) The Board shall appoint a President of the Institute. The President of the Institute shall serve as the chief executive officer of the Institute. Subject to the direction of the Board and the general supervision of the Chairman, the President of the Institute shall have the responsibility for carrying out the policies and functions of the Institute, and shall have authority over all personnel and activities of the Institute.

(b) The President of the Institute shall be compensated at an annual rate not to exceed that prescribed for GS-18 of the General Schedule under section 5332 of title 5, United States Code.

(c) The President of the Institute, with the approval of the Board, shall have the authority to appoint and fix the compensation and duties of such officers and employees as may be necessary for the efficient administration of the Institute. Such appointments and compensation may be made without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and chapter 51 and subchapter III of chapter 53 of title 5, United States Code.

FUNCTIONS OF THE INSTITUTE

SEC. 7. (a) There shall be established within the Institute—

(1) a Center for Culture and Art Studies to be administered by a director (appointed by the President of the Institute, with the approval of the Board), which shall include, but not be limited to, Departments of Arts and Sciences, Visual Arts, Performing Arts, Language, and Literature;

(2) a Center for Native American Scholars to be administered by a director (appointed by the President of the Institute, with the approval of the Board), which shall include, but not be limited to, research programs, fellowship programs, and publications;

(3) a Center for Cultural Exchange, administered by a director (appointed by the President of the Institute, with the approval of the Board), which shall include an inter-American Indian program, marketing and promotion of Indian crafts, promotion of Indian art, exhibits and shows; and

(4) a Museum of Indian Arts, administered by a director (appointed by the President of the Institute, with the approval of the Board), which shall include, but not be limited to, the acquisition of Indian art and the curation and exhibition of Indian art.

(b) In addition to the centers and programs described in subsection (a), the Institute shall develop such programs and centers as the Board determines are necessary to—

(1) foster research and scholarship in Indian art and culture;

(2) complement existing tribal programs for the advancement of Indian art and culture; and

(3) coordinate efforts to preserve, support, revitalize and disseminate Indian art and culture.

(c) The Institute shall catalog the items relating to Indian art and culture which are available in museums, archives, libraries and other collections within the United States.

TRANSFER OF FUNCTIONS

SEC. 8. (a) There are transferred to the Institute and the Institute shall perform the functions of—

(1) the Institute of American Indian Arts established by the Secretary of the Interior in 1962; and

(2) the Indian Arts and Crafts Board established by the Act entitled "An Act to promote the development of Indian arts and crafts and to create a board to assist therein, and for other purposes", approved August 27, 1935 (49 Stat. 891).

(b) (1) All personnel, liabilities, contracts, personal property, and records as are determined by the Director of the Office of Management and Budget to be employed, held, or used primarily in connection with any function transferred under the provisions of this Act, are transferred to the Institute.

(2) Personnel engaged in functions transferred by this Act shall be transferred in accordance with applicable laws and regulations relating to the transfer of functions, except that such transfer shall be without reduction in classification or compensation for one year after such transfer.

(c) All laws and regulations relating to the Institute of American Indian Arts and the Indian Arts and Crafts Board transferred to the Institute by this Act shall, insofar as such laws and regulations are applicable, remain in full force and effect. With respect to such transfers, reference in any other Federal law to the Institute of American Indian Arts and the Indian Arts and Crafts Board, or any officer so transferred in connection therewith, shall be deemed to mean the Institute.

ANNUAL REPORT

SEC. 9. The President of the Institute shall submit an annual report to the Congress and to the Board concerning the status of the Institute during the twelve calendar months preceding the date of the report. Such report shall include, among other matters, a detailed statement of all private and public funds, gifts, and other items of a monetary value received by the Institute during such twelve-month period and the disposition thereof as well as any recommendations for improving the Institute.

HEADQUARTERS

SEC. 10. After a period of consultation with the Indian tribes and various organizations of Native Americans, the Board, in conjunction with the Secretary, shall designate an existing facility which is under the jurisdiction of the Secretary as the headquarters of the Institute. The Secretary is authorized to transfer the real property and any improvements thereon which comprise such facility to the Institute.

ADVISORY COMMITTEE

SEC. 11. (a) The President of the Institute shall establish an Advisory Committee which shall make recommendations to the Board on any matters relating to the Institute.

(b)(1) The Advisory Committee shall be composed of students of the Institute and parents of such students appointed by the President of the Institute.

(2) The number of members of the Advisory Committee and the terms of service of such members shall be determined by the President of the Institute.

(3) In making appointments to the Advisory Committee, the President of the Institute shall consider individuals who will provide appropriate representation of the students of the Institute and the parents of such students.

(c) The Advisory Committee shall elect a Chairman and shall have the authority to make any necessary rules regarding the procedures of the Advisory Committee.

COMPLIANCE WITH OTHER ACTS

SEC. 12. The Institute shall comply with the provisions of the American Indian Religious Freedom Act (92 Stat. 469) and the Archeological Resources Protection Act (93 Stat. 721).

AUTHORIZATION

SEC. 13. There are authorized to be appropriated, for the fiscal year beginning October 1, 1981, the sum of $4,000,000 to carry out the purposes of this Act, and for each fiscal year thereafter, such sum as may be necessary to carry out the purposes of this Act.●

By Mr. DOMENICI:

S. 793. A bill to facilitate collection of defaulted loans under the U.S. Government direct and guaranteed loan programs to individuals, and for other purposes; to the Committee on Governmental Affairs.

DEBT COLLECTION AND MANAGEMENT

● Mr. DOMENICI. Mr. President, the most glaring sign of fiscal irresponsibility is laxity in collecting and managing debts. The Federal Government is guilty of this form of mismanagement.

The Boston Herald American in a recent article elucidated the magnitude of the problem. I ask unanimous consent that the article "Deadbeats Among Us" be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

DEADBEATS AMONG US

Because the federal government has an apparently never-ending source of money from taxes, and borrowing, or printing, it seems no more concerned over defaulted debts owed the US Treasury than it is over an average multi-billion-dollar deficit. Little effort is being made to collect billions of dollars owed to Uncle Sam by all too many citizens who have no conscience when it comes to repaying the government.

As the Reagan administration takes a bead on reducing the deficit, the waste, and the needless spending, it should lose no time in going after delinquent debtors. For example, the General Accounting Office recently discovered 14,000 audit reports gathering dust that showed at least $4 billion due and recoverable from contractors and grantees who misspent government funds.

According to the Office of Management and Budget, a staggering $175 billion is owed the government, of which $47 billion is currently due, and $25 billion is long overdue. A recent OMB report estimates debt losses as high as $9 billion. The losses from defaulted loans would pay all the operating costs of the Justice and State Department, the Congress and still leave $500 million left over.

Surprisingly, the Internal Revenue Service, which most taxpayers regard as the ravaging tiger of all bill collectors, is owed almost $16 billion. Of this huge sum, the IRS is actively seeking recovery of less than $4 billion.

The Department of Housing and Urban Development has 55,000 delinquencies in its loan programs. The GAO recently found 58 percent of those whom the Veterans Administration had written off as bad debts were, in fact, sufficiently affluent to have paid in full. Myriad farm and student loan programs are awash with uncollected receivables.

Washington is so careless as a lender that many of its loan programs have come to be outright giveaways.

With the national debt standing at almost one trillion dollars, it is preposterous for Washington to lend out money at very low interest rates that it must first borrow at very high interest rates and then carelessly forget about collections. The little-noticed rip-off of taxpayers from bad debts has gone on far too long and, we repeat, should become one of the first orders of business for the Reagan administration.

Mr. DOMENICI. Mr. President, while I understand that debts owed the Federal Government may represent a gold mine with no gold, in that these debts are largely uncollectable, the perception that the Government is not concerned with collecting its debts only engenders individuals to avoid payment of these obligations.

The legislation I introduce today does three things to require good sound business procedure be used by the Government in managing its debts. First it would require that various agencies report to the Budget Committee debts outstanding to the United States including uncollected balances and payments 90 days or more in arrears. This will provide the Congress with an accurate accounting of debts due. It will also allow for the orderly writing off of debts determined to be uncollectable and establish a track record for agencies as to which, if any, are making loans, and what percentages are being defaulted on.

Second, it would require the Federal Government to disclose to consumer reporting agencies those individuals who have defaulted on Federal loans. Individuals will then have their overall credit rating reflect their obligations to the Federal Government. Today an individual can have a strong credit rating yet be in default to the Government.

The last portion of this bill would allow the head of a Federal agency to collect moneys in default on a Federal obligation from a Federal employee by deduction from his pay of installment payments.

Mr. President, the time has come when the Federal Government must act responsibly in not only spending money, but also in collecting debts.●

ADDITIONAL COSPONSORS

S. 20

At the request of Mr. SASSER, the Senator from Wyoming (Mr. SIMPSON), was added as a cosponsor of S. 20, a bill to amend title 18 of the United States Code to prohibit the robbery of a controlled substance from a pharmacy.

S. 46

At the request of Mr. THURMOND, the Senator from Nevada (Mr. CANNON), was added as a cosponsor of S. 46, a bill to amend title 5 of the United States Code to permit present and former civilian employees of the Government to receive civil service annuity credit for retirement purposes for periods of military service to the United States as was covered by social security, regardless of eligibility for social security benefits.

S. 144

At the request of Mr. HEINZ, the Senator from California (Mr. HAYAKAWA) was added as a cosponsor of S. 144, a bill to encourage exports by facilitating the formation and operation of export trading companies, export trade associations, and the expansion of export trade services generally.

S. 186

At the request of Mr. DOLE, the Senator from Florida (Mr. CHILES), was added as a cosponsor of S. 186, a bill to provide financial assistance to the States to undertake comprehensive criminal justice construction programs to improve the criminal justice system of the States, to provide that the Secretary of the Treasury is authorized to make interest subsidy payments on criminal justice facility construction bonds, and for other purposes.

S. 307

At the request of Mr. COCHRAN, the Senator from Vermont (Mr. LEAHY) was added as a cosponsor of S. 307, a bill to amend the Internal Revenue Code of 1954 to exempt from the windfall profit tax oil produced from interests held by or for residential child care agencies.

S. 388

At the request of Mr. HATCH, the Senator from Texas (Mr. BENTSEN) was added as a cosponsor of S. 388, a bill to reinstate the tax treatment with respect to annuity contracts with reserves based on a segregated asset account as they existed prior to issuance of Revenue Ruling 77-85.

S. 432

As the request of Mr. MATHIAS, the Senator from Washington (Mr. GORTON), the Senator from Illinois (Mr. DIXON), and the Senator from Hawaii (Mr. INOUYE) were added as cosponsors of S. 432, a bill to establish a Commission on the International Application of Antitrust Laws.

S. 725

At the request of Mr. WALLOP, the Senator from Utah (Mr. HATCH) was added as a cosponsor of S. 725, a bill to amend the Internal Revenue Code of 1954 with respect to the treatment of certain shale property for the purposes of the energy investment credit.

S. 750

At the request of Mr. WALLOP, the Senator from Arizona (Mr. GOLDWATER) and the Senator from Wisconsin (Mr. KASTEN) were added as cosponsors of S. 750, a bill to amend the Internal Revenue Code of 1954 to provide nonrefundable tax credits for investments in qualified industrial energy efficiency and fuel conversion projects, and for other purposes.

S. 756

At the request of Mr. HOLLINGS, the Senator from West Virginia (Mr. RANDOLPH) was added as a cosponsor of S. 756, a bill to amend Military Selective Service Act to provide for the reinstitution of the registration and classification of persons under such act and to reinstate the authority of the President to induct persons involuntarily into the Armed Forces, and for other purposes.

SENATE JOINT RESOLUTION 29

At the request of Mr. HEINZ, the Senator from Delaware (Mr. ROTH), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Montana (Mr. BAUCUS), and the Senator from Utah (Mr. HATCH) were added as cosponsors of Senate Joint Resolution 29, a joint resolution to authorize and request the President to issue a proclamation designating the calendar week beginning with the first Sunday in June of each year as "National Garden Week."

SENATE JOINT RESOLUTION 31

At the request of Mr. GOLDWATER, the Senator from South Carolina (Mr. THURMOND), the Senator from New Mexico (Mr. SCHMITT), the Senator from Arizona (Mr. DECONCINI), and the Senator from Kansas (Mr. DOLE) were added as cosponsors of Senate Joint Resolution 31, a joint resolution to establish procedures regarding the termination of, or withdrawal from, treaties of military alliance, defense, or national security by the United States, and for other purposes.

SENATE RESOLUTION 17

At the request of Mr. SASSER, the Senator from Nebraska (Mr. ZORINSKY) was added as a cosponsor of Senate Resolution 17, a resolution concerning revision of the monetary policies of the Board of Governors of the Federal Reserve System.

SENATE RESOLUTION 87

At the request of Mr. HEINZ, the Senator from Arkansas (Mr. BUMPERS) was added as a cosponsor of Senate Resolution 87, a resolution expressing the sense of the Senate that the Congress not enact legislation to tax social security benefits, and for other purposes.

NOTICES OF HEARINGS

SUBCOMMITTEE ON AGRICULTURE, RURAL DEVELOPMENT, AND RELATED AGENCIES

Mr. COCHRAN. The Subcommittee on Agriculture, Rural Development, and Related Agencies of the Committee on Appropriations will be holding hearings with nondepartmental and congressional witnesses on Monday, March 30, and Wednesday, April 1, 1981, from 1:30 p.m. until 4:30 p.m. At that time we shall receive testimony on matters pertaining to the fiscal year 1982 Agriculture appropriations bill.

Recommendations pertaining to budgetary priorities or expenditure reductions are welcome. They may be provided in writing or by testifying at the hearings.

Those who wish to testify may contact Ms. Irma Hanneman of the subcommittee staff on 224–7240 to arrange for the time.

COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY

Mr. HELMS. Mr. President, I advise the Senate that the Committee on Agriculture, Nutrition, and Forestry has scheduled confirmation hearings on Seeley Lodwick, John B. Crowell, Jr., and William Lesher, all of whom have been nominated for positions at the U.S. Department of Agriculture. The hearings will be held on Tuesday, March 31, at 9 a.m. in room 324, Russell Building.

Mr. Lodwick has been nominated for the position of Under Secretary for International Affairs and Commodity Programs; Mr. Crowell for the position of Assistant Secretary for Natural Resources and Environment; and Mr. Lesher for the position of Assistant Secretary for Economics.

Anyone wishing further information should contact John McCarthy or Denise Alexander of the Agriculture Committee staff at 224–2035.

SUBCOMMITTEE ON ENERGY AND MINERAL RESOURCES

Mr. WARNER. Mr. President, I would like to announce for the information of the Senate and the public, that the oversight hearing on the strategic minerals and materials policy of the United States originally scheduled for Tuesday, March 31, has been changed to Wednesday, April 1 at 9:30 a.m. in room 3110 of the Dirksen Senate Office Building.

Testimony will be received from the Secretary of the Interior.

For further information regarding this hearing, you may wish to contact Mr. Bob Terrell at 224–3086.

SUBCOMMITTEE ON ENERGY REGULATION

Mr. HUMPHREY. Mr. President, I would like to announce for the information of the Senate and the public, the scheduling of a public hearing before the Subcommittee on Energy Regulation.

The hearing is scheduled for Thursday, April 2, 1981, beginning at 9 a.m. in room 3110 of the Dirksen Senate Office Building. The subject of the hearing is the Department of Energy authorization for fiscal year 1982 for the Federal Energy Regulatory Commission, the Office of Conservation and Solar Energy (building energy performance standards and appliance standards programs) and the Economic Regulatory Administration.

Testimony will be received from administration witnesses.

For further information regarding the hearing, you may wish to contact Mr. Howard Useem or Marilyn Burkhardt at 224–5205.

SUBCOMMITTEE ON ENERGY REGULATION

Mr. HUMPHREY. Mr. President, I would like to announce for the information of the Senate and the public, the scheduling of public hearings before the Subcommittee on Energy Regulation.

The hearings are scheduled for Wednesday, April 22 and Thursday, April 23, 1981, beginning at 10 a.m. in room 3110 of the Dirksen Senate Office Building to consider amendments to the Powerplant and Industrial Fuel Use Act.

Those wishing to testify or who wish to submit written statements for the hearing record should write to the Committee on Energy and Natural Resources, Subcommittee on Energy Regulation, room 3104, Dirksen Senate Office Building, Washington, D.C. 20510.

For further information regarding the hearings, you may wish to contact Mr. Howard Useem or Ms. Marilyn Burkhardt at 224–5205.

ADDITIONAL STATEMENTS

A NATIONAL OUTRAGE: DRUNKEN DRIVERS KILL 26,000 EACH YEAR

● Mr. PELL. Mr. President, I would like to share with my colleagues an excellent article which appeared in the Washington Post on Sunday, March 22. The article, entitled, "A National Outrage: Drunken Drivers Kill 26,000 Each Year," is a grim reminder of the loss of human life which occurs on our Nation's highways each and every day. Until we decide to act, drinking and driving will continue to be an accepted part of our daily lives.

I believe that we are not powerless to stop the needless slaughter on our highways, and have introduced legislation (S. 671) to attack the drunk driver problem through uniform, mandatory criminal sanctions. Drunk driving is a problem that is truly national in scope, and deserves the attention of every Member of Congress.

I urge my colleagues to take a moment and examine the tragic extent of this problem, as vividly described in the Washington Post article, and consider the need for a sensible solution. Mr. Presi-

dent, I ask that the text of the Washington Post article be printed in the RECORD.

The article follows:

"A NATIONAL OUTRAGE"—DRUNKEN DRIVERS KILL 26,000 EACH YEAR

(By Joseph D. Whitaker)

It's been three years now since Carol and Doug Weiger received the visit that haunts them to this day. Your son, the police officer said, has been hit by a car.

Half an hour later, their son was dead. A year later, the Weigers learned that the man who killed him had pleaded guilty to a drunken driving charge—and had been fined $600.

Today the Weigers are angry—angry at the sentence that they assail as obscenely lenient and angry that what happened to 16-year-old Peter Lewis Weiger has happened to so many thousands of America's sons and daughters.

Nearly 70 persons a day—about 1 every 23 minutes—are killed in drunken crashes—the nation's single greatest killer of people under 34, according to the National Highway Traffic Safety Administration.

Nearly 26,000 persons die in the United States each year in drunken driving incidents—the nation's leading cause of highway deaths.

Over the last decade, more than 250,000 Americans have died because of drunken drivers on U.S. highways, more than four times the number of Americans killed during a decade of fighting in the Vietnam War.

The more than 1 million crippling and other serious injuries attributable to drunken driving cause economic losses estimated at more than $5 billion a year in this country.

One of every two Americans will be involved in an alcohol-related auto crash in his or her lifetime.

On a Saturday night, one in 10 drivers on America's streets and highways will be legally drunk.

While only one out of every 2,000 drunken drivers will be arrested—and far fewer will ever receive stiff punishment for their crime—an estimated one out of every 100 babies born this year will die in a crash with a drunken driver.

"The drunk-driving problem in this country has reached epidemic proportions," said John Moulden, a research psychologist with the National Highway Traffic Safety Administration. "It's a national outrage that even when thousands of people are being killed each year by drunk drivers, our society continues to accept drinking and driving as a normal part of daily life."

Peter Weiger, a popular sophomore at Thomas J. Wootton Senior High School in Rockville, Md., was walking down a winding country road on the night of Oct. 8, 1977, when a neighbor in a pickup truck ran over him and kept going. The driver of a car following the truck copied the tag number and the driver was promptly arrested.

The Weigers rushed to Suburban Hospital in Bethesda, expecting to find their son badly injured, but alive. Instead, a doctor told them Peter had died of massive head injuries shortly after he reached the hospital. His battered body had already been taken to the hospital morgue.

Now, every time a fire engine or ambulance passes their home, the Weigers—who have a 13-year-old daughter and a 21-year-old son—say they relive the night of Peter's death.

"We think about Peter and we look around for the other kids just to be sure they're safe," said Carol Weiger. "We couldn't bear to lose another child."

"He really was a great kid," Douglas Weiger said. "He loved people. He enjoyed loud music, parties and girls. He was a 4-H Club member and a Boy Scout. It makes me angry every time I think that someone took my child's life."

What has left the Weigers even more bitter and distressed, they say, is the sentence meted out to the driver, their former neighbor Edgar Garfield Rogers.

The outcome: According to court records, Rogers pleaded guilty in Montgomery County District Court to driving while impaired by alcohol and to hit and run, and was fined a total of $610.

"There were 1.3 million drunk-driving arrests in the United States last year," said Moulden of the national highway agency. "The few statistics available show that not many drunk drivers ever receive serious punishment for their crime.

"A lot of prosecutors, judges and jurors put a low priority on drunk-driving cases," he said. "When they see a drunk driver, in a lot of ways they tend to see themselves and take the philosophical view that, 'But for the grace of God, there go I.'"

Last year, 950 drivers were arrested on drunken-driving charges in Montgomery County. A total of 1,001 cases—including 41 cases unresolved in 1979—went to court.

In court, 574 drivers were found guilty. Judges gave 189 drivers "probation before judgment," a device in Maryland state law that permits judges to place a person on probation and erase all records of the original charge. Sixty-six drivers were tried by jury and 42 of these were found guilty. The state's attorney dismissed 130 cases.

"I'm dissatisfied with the sentences judges hand out in general," said Montgomery County State's Attorney Andrew Sonner. "But I think overcrowded jails have given judges a legitimate reason to lock up fewer drunk drivers. Five years ago, 100 percent of our convicted armed robbers were sent to state prisons. Now at least 40 percent of them must be sent to the county detention center."

Judge Robert S. Heise of Anne Arundel County District Court said penalties placed on drunken drivers often are too harsh, and that he rarely finds it necessary to impose jail terms in such cases.

"The philosophy of some people is that you have to make the punishment fit the crime," he said. "But that's the wrong way to look at drunk drivers. These are social drinkers who went a little overboard. They're not alcoholics or criminals. Most of the time they've done nothing dangerous, but have merely violated a law."

Judge Heise said there is not much evidence that a jail term is appropriate punishment for a drunken driver, even for alcohol-related fatalities.

"I just feel that some of these people [convicted of drunken-driving deaths] have already suffered more than I could impose on them," Heise said. "Besides that, the state prison system has told me they're overcrowded and that I shouldn't send them anyone else. When I have to choose between sending an armed bank robber or a drunk driver to jail, I think it's more important to send the robber."

Barbara Gilman, 18, was driving home from a church picnic on Aug. 19, 1979, when her car was hit on a curve near her Upper Marlboro home and forced off the road. She died instantly. The other driver was not injured.

Just a month before her death, Gilman—the youngest of 12 children—had been at a family reunion with her parents. Shortly before that, she had participated in an older sister's wedding.

"Barbara loved sports. She enjoyed music and played the French horn," remembers her mother, Emily Gilman. "Her death has left a big vacuum in our lives. It's tough to adjust to what's happened.

"I am not bitter or angry. You have to try to accept the will of God," she said. "But it seems like the drunk drivers get off so easily. They just go back out and hurt somebody else."

The outcome: According to court records, the police found beer cans in the other driver's car and charged him with driving under the influence of alcohol, passing in a no-passing lane and automobile manslaughter. As is his right, the driver refused to take tests that would have established the alcohol content in his blood. He was acquitted of drunken driving and the charge of illegal passing, but was convicted of vehicular manslaughter and was sentenced to three years in prison—18 months of which were suspended, according to the court records.

The District of Columbia—distinguished as the capital of the United States—also has the dubious distinction of having the second highest level of liquor consumption in the country.

In 1979, Washingtonians and their guests drank 5.95 gallons of alcohol for every man, woman and child in the city, according to the Distilled Spirits Council of the United States. That was second only to Nevada's rate of 6.25 gallons per person.

District police arrested 3,439 drivers on drunken-driving charges last year, and there were 46 alcohol-related traffic deaths in the city, which has one of the nation's toughest law enforcement programs against drunken driving.

The D.C. corporation counsel took 3,395 cases to court. Of that number, 411 drivers pleaded guilty to driving while under the influence of alcohol. Fifty-four went to trial on drunken-driving charges. Thirty-five of those were convicted and 19 were acquitted. In 477 cases, all charges were dismissed.

In about 1,500 cases, those charged with driving under the influence of alcohol were allowed to plead guilty to the less serious charge of reckless driving.

Of eight negligent homicide cases—most of them alcohol-related—handled by the U.S. Attorney's Office in the District last year, two were found guilty by jury, two cases are awaiting trial and four drivers pleaded guilty.

Among the drivers who have pleaded guilty to negligent homicide in D.C. is Lester Lee Mackey Jr., a former Marine charged in the death on Dec. 22, 1979, of 63-year-old Earl S. Mathews.

Mackey, 36, said he remembers driving down 11th Street NW. near Rhode Island Avenue when he saw a man several blocks away step off the curb and start to cross the street at an angle.

"I had decided to speed up and hurry on by the man when all of a sudden he turned and ran straight into my lane of traffic," Mackey said. "When he ran to my side of the street, I knew I would have to hit him. There was no way I could stop."

Mathews, a resident of Northwest Washington, was killed immediately.

"I had drank a little whiskey and a few beers, but I wasn't drunk," said Mackey, a Vietnam veteran, who added that he was disabled in 1978 when a stranger shot him in the back and injured his spine. "I feel within myself there was nothing I could have done to avoid the accident except not be there.

"I try not to think about [the fatal accident] that much," said Mackey, who works part time as a hair stylist. "I've seen a lot of people die in Vietnam and even on the streets of Washington. All I can say is God forgive me."

The outcome: Mackey, who said he lobbed the can of beer he'd been drinking out of the car seconds before police arrived at the scene, was originally charged with involuntary manslaughter. He pleaded guilty on Jan. 11, 1980, to the lesser charge of negligent homicide. He was sentenced to six months in jail. The jail term was suspended and Mackey was placed on two years' probation.

Charles and Irma Jacobsen of Arlington, Va., had celebrated George Washington's birthday last month by going on an early morning shopping trip. When they returned home that afternoon, she begun preparing dinner while he disappeared into the basement.

Moments later, a car careened across the Jacobsen's front lawn, mowed down a row of azaleas, uprooted a pine tree, knocked down a brick wall before coming to rest on top of the Jacobsens' car.

"I heard an awful crash. I ran to the window and saw the man's car had knocked down the brick wall," said Irma Jacobsen, a native of Italy who married her husband there seven years ago. "I started calling my husband. I thought he was still in the basement. I wanted him to come up and help me call an ambulance because I thought the driver may have been hurt."

She was still looking for her husband when she went outside where neighbors had gathered on her driveway.

"Someone shouted, 'Mrs. Jacobsen, your husband is over here.' I thought my husband was behind the car helping an injured person," she said. "I took a look and saw that he had been crushed in the accident."

Six hours later, Charles P. Jacobsen IV, 33, died at the hospital from internal bleeding.

The outcome: According to Arlington County court records, the driver, Walter John Anholt, has pleaded guilty to driving while intoxicated and is awaiting an April 6 trial on a charge of involuntary manslaughter.

Arlington County recorded 1,965 drunken-driving arrests and three alcohol-related deaths last year. A conviction rate of more than 80 percent was achieved primarily by reducing drunken-driving charges to lesser offenses.

The Fairfax County General District Court processed 4,725 drunken-driving cases in 1980. About 200 of those were dismissed, and 4,527 defendants were convicted on guilty pleas or jury verdicts. Jail terms—although largely suspended in most cases—were meted out in 1,368 cases.

Both Fairfax and Arlington counties resolve most of their drunken-driving cases by allowing most of the offending drivers to enroll in the Alcohol Safety Action Program (ASAP), an eight-month program of treatment and education. After the driver successfully completes the program, the drunken-driving charge is automatically reduced to the less serious reckless-driving charge.

Fairfax County Commonwealth's Attorney Robert F. Horan said ideally he would like to see drunken drivers who kill someone with their automobile convicted of manslaughter. "But it is almost impossible for us to get a manslaughter conviction when the incident involves alcohol," Horan said. "We must convince a jury that the driver's behavior exemplified a willful, wanton and reckless disregard for human life. And it's rare that we are successful with that approach to the prosecution."

Most often, Horan said, alcohol-related cases that otherwise would be considered manslaughters—carrying a penalty of one month to five years in state prison—are reduced to reckless driving, a charge that carries a lesser penalty. That penalty, Horan said, can range up to one year in county jail, but judges rarely impose the maximum.

John R. Pierce, a former employe of The Washington Post, and his wife and daughter were driving home from a New Year's Eve party in upper Northwest Washington during the early morning hours of last Jan. 1. At one moment, Pierce was making a left turn from Wisconsin Avenue onto Woodley Road. Seconds later, he was scrambling from the wreckage of his mangled automobile. His daughter Barbara, had been seriously injured. His wife, Jean, a Washington Post employe, had been killed almost instantly.

A 16-year-old driver—who was also returning from a party—had sped through a red light and struck the Pierces' car broadside. The youth escaped injury in the crash.

"I'd seen the headlights coming a block away," said Pierce, 71, of Northwest Washington. "My natural instinct was that [the on-coming driver] would stop. Someone in the car said, 'He's coming awfully fast.' Next thing I knew, we'd been hit."

It was particularly ironic, Pierce said, that his wife was killed by an automobile. "Over the years, a number of our friends had been killed in automobile accidents, [and] Jean had developed a real fear of the automobile as an instrument of destruction. When we used to walk down the street, she would be afraid to step off the curb to cross the street. She'd ask me, 'How do you know the cars are going to stop?'

"I would jokingly tell her, 'You can't stand on the corner all of your life,' and we would cross the street together."

The outcome: The youth was originally charged with drunken driving, speeding and running a red light. The drunken-driving charge was dismissed after blood alcohol tests showed he had a .08 blood-alcohol level—two points below the city's legal limit of .10.

D.C. Superior Court sources said negligent homicide charges against the youth were were reduced in juvenile court to reckless driving, to which the youth pleaded guilty. He was placed on probation. The speeding and red light charges are both civil charges that can be resolved with the payment of a fine.

In all but two states, a person is considered legally drunk when his or her blood-alcohol content registers .10 percent. To achieve this limit, a 150-pound man would have to consume four one-ounce shots of 100-proof liquor or drink four 12-ounce beers in one hour, according to the Distilled Spirits Council of the United States. This level, local medical officials said, is sufficiently high to eliminate social drinkers.

Laws in Maryland and Mississippi allow a blood-alcohol content of .15 percent, which amounts to six shots of liquor or six 12-ounce beers in on hour for a man who weighs 150 pounds.

Revisions in the drunken-driving laws under consideration by Maryland legislators would lower the legally permissible blood-alcohol level to .10.

Legislation introduced recently on the federal level by Sen. Claiborne Pell (D-R.I.), and Rep. Michael D. Barnes (D-Md.), would make a 10-day jail term mandatory for drunken drivers convicted of the offense two or more times within five years. A repeat offender would also lose his or her driver's license for a mandatory one year.

Last July 12 had been an exciting day of fishing in the Chesapeake Bay for Tommy Sexton, 15, and two other youths. As Sexton drove home with his neighbors and their father, a car swerved across the center line and collided with theirs. The driver at fault was not hurt. The two youths and their father escaped with only minor injuries. But Tommy Sexton was killed.

"You feel a lot of outrage when something like this happens. You wish there was some way you could strike back," said his father, Thomas Sexton. "He was such a kind kid. He loved to go fishing. But he didn't have the heart to kill the fish. He'd always throw them back."

"We consider that our son died as the result of a senseless crime," added Dottie Sexton. The Sextons also have a daughter, 12, and a son, 7. "In this instance, we do not feel that the criminal has been fairly punished for what he did."

The outcome: A month after his son's death, Thomas Sexton, who lives in Bowie, Md., sat in Calvert County District Court and watched a judge pronounce sentence on two men in two separate cases.

The first man, charged with stealing a pickup truck, was sentenced to two years in the county jail.

The second was David William Watkins, Jr., who hit the car in which Tommy Sexton was riding. He pleaded guilty to a charge of homicide by motor vehicle while intoxicated. Watkins was sentenced to two years in prison, with all the jail time suspended. The judge then ordered Watkins to pay a $1,000 fine, of which $800 was suspended.

Watkins paid the $200 and was placed on two years' probation, court records show.

"I think the biggest outrage is that the courts seem to place a much higher priority on a loss of personal property than they do on the loss of human life when it comes to drunk-driving cases," said Dottie Sexton, fighting back the tears as she talks.

"We still cry when we think about what's happened to our son. We look at his school pictures often. One of the hardest things to accept is that his [picture] will never change. We haven't touched his room—but we know he won't be back."●

ARE WE WASTING BRAINS?

● Mr. CRANSTON. Mr. President, how can the Nation make best use of the talents and experience of Government officials after they leave public office?

How can we continue to benefit from their thinking and from the knowledge they have accumulated through years of public service?

How can we, at the same time, honor these outstanding men and women for their contributions to our Republic?

Flora Lewis, in a column in the March 13, 1981, issue of the New York Times, proposes an "Academy for National Policy, to which a fixed number, say 40 or 50, of the most eminent former public servants would be named for life."

They would receive no pay and have no authority beyond that of acknowledged intellect, but membership itself would be a high award. It would give a kind of American Nobel status, but a non-monetary prize of great distinction.

Ms. Lewis has fleshed out in some detail an idea that someone puts forward in more general terms every now and then. It happens to be a concept that I have personally been mulling over, and discussing with others, through the recent winter. I do not know if the formula Flora Lewis suggests is the most feasible. But her proposals—and the concept generally—deserve widespread attention and serious consideration.

For that reason, I ask that Ms. Lewis' article be reprinted at the conclusion of my remarks.

I hope my colleagues will give me their reactions and suggestions. I also plan to seek the views of some eminent Americans, among them some who might well qualify for such an "Academy for National Policy."

We need a constant influx of fresh faces and new ideas in Government. But we cut the links to the wisdom and experience of the past at our Nation's peril.

For good government, we need a balance of both the new and the old, the pioneer and the pragmatist, people with ideas and people who have learned how to transform ideas into practical, effective action.

Ms. Lewis' column makes stimulating reading.

The article follows:

AN ECONOMY OF BRAINS

(By Flora Lewis)

The reshuffling of tenants in Government offices is nearly completed now, until the next time. The former Washington ins are out.

Now that it's accomplished, a moment has come to reflect on the extravagant human wastage. Many years of experience and expertise gained in the only possible way, learning from mistakes, are shut off and virtually thrown away.

Some of the people whom the voters have pushed aside go into business and the dense Washington set of lawyers and lobbyists, a reminder that the American system has scarcely any way of conferring high honor outside of power or money. Others go into academia and think tanks, a reminder that we have no other forum in which to tap the insights of the outs.

Most other countries get better service from their elder and not-so-old but former statesmen. There really should be a way of avoiding this brain disposal process. Of course, the U.S. cannot imitate Britain's House of Lords with its powers and titles, nor would it suit to copy France's Academy.

But an American manner of recognizing especially valued service could be combined with an American system of conserving wisdom, and the time to establish it is at the start of a new administration.

A lot more people in high positions are aware of the problem than is generally known. Quietly, behind scenes, at least a few of the top Reagan team have been calling up predecessors for advice. They don't necessarily take it, but they ask because the smart ones know there are always booby traps in a new job that can be avoided with foreknowledge.

It would be perfectly feasible to set up an institution to use discarded experience and to honor outstanding merit at the same time. An idea that appeals to me is the foundation of an Academy for National Policy, to which a fixed number, say 40 or 50, of the most eminent former public servants would be named for life.

They would receive no pay and have no authority beyond that of acknowledged intellect, but membership itself would be a high award. It would give a kind of American Nobel status, but a non-monetary prize of great distinction.

And it would provide a platform for debate and discussion of the gravest issues, with both total independence and assured attention. Members would have no constituency but their own conscience. So they would be under no pressure to sway with fashionable notions and emotions. The function is largely performed now by TV and press commentators. But ours is a different kind of experience and we really aren't the best placed for the role.

The sole responsibility of academy members would be to live up to their recognized standing. To achieve the dignity it needs, this academy should be a public, not a private group, with no outside ties. That means establishment and support from Congress.

Members should be nominated by the President and elected by Congress, which would also appropriate the minimal funds needed to provide meeting rooms and a small administrative staff.

Since the academy would be a public institution but extra-official, shielded from the pressures of power, members who return to Government would be expected to resign so as not to compromise its status. It would be up to them to organize their meetings and decide what they should consider.

Nobody would have to accept their views, but they would constitute a pool of respected people who could be called upon to take part in special commissions of overwhelming national importance, such as the Warren Commission after the assassination of President Kennedy or the commission that investigated the Pearl Harbor disaster in World War II.

In a way, it was this felt need to provide some institutional tempering of the passions released by democracy that led the founding fathers to establish the Senate in its current form. In those days senators were elected indirectly, not by popular vote, and its very substantial powers made that change wise and necessary.

Still, its absorption into practical politics has left a vacuum of the authority of pure reflection. The search for moral intellectual guidance is a compulsive human urge, rising tangibly again in this country. Such an academy would not displace any of the other founts of thought, the pulpits, the universities, the research centers, but it could give a point of reference for the swirling arguments that dizzy us.

It isn't hard to think of people who deserve to be in it. Nor would it matter how many agree with those who are chosen. They should provide a broad spectrum of opinion, from both major parties and nonpartisans.

How useful it might be to hear Henry Kissinger and George Ball and William Fulbright and Harold Brown and Clark Clifford and, yes, Gen. William Westmoreland, and former Ambassador Anne Armstrong arguing among themselves but in front of the rest of us on how to face the questions of El Salvador, the Americas and East-West relations. They no longer owe anything to anyone, but they've learned a lot about how and why things go wrong.

Information comes in floods now, but we haven't installed a way to use the brains with the capacity to filter and distill it.●

PRELIMINARY NOTIFICATION PROPOSED ARMS SALES

● Mr. PERCY. Mr. President, section 36 (b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $25 million or, in the case of major defense equipment as defined in the act, those in excess of $7 million. Upon receipt of such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulates that, in the Senate, the notification of a proposed sale shall be sent to the chairman of the Foreign Relations Committee.

Pursuant to an informal understanding, the Department of Defense has agreed to provide the committee with a preliminary notification 20 days before transmittal of the official notification. I ask that the official notification will be printed in the RECORD in accordance with previous practice.

I wish to inform Members of the Senate that such notifications have been received—one on March 11 and three on March 12, 1981.

Interested Senators may inquire as to the details of this preliminary notification at the office of the Committee on Foreign Relations, room 4229, Dirksen Building.

The notification follows:

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., March 11, 1981.

Dr. HANS BINNENDIJK,
Professional Staff Member, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR DR. BINNENDIJK: By letter dated 18 February 1976, the Director, Defense Security Assistance Agency, indicated that you would be advised of possible transmittals to Congress of information as required by Section 36(b) of the Arms Export Control Act. At the instruction of the Department of State, I wish to provide the following advance notification.

The Department of State is considering an offer to a NATO country tentatively estimated to cost in excess of $25 million.

Sincerely,

ERNEST GRAVES,
Lieutenant General, USA, Director.

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., March 12, 1981.

Dr. HANS BINNENDIJK,
Professional Staff Member, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR DR. BINNENDIJK: By letter dated 18 February 1976, the Director, Defense Security Assistance Agency, indicated that you would be advised of possible transmittals to Congress of information as required by Section 36(b) of the Arms Export Control Act. At the instruction of the Department of State, I wish to provide the following advance notification.

The Department of State is considering an offer to a Middle Eastern country tentatively estimated to cost in excess of $25 million.

Sincerely,

ERNEST GRAVES,
Lieutenant General, USA, Director.

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., March 12, 1981.

Dr. HANS BINNENDIJK,
Professional Staff Member, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR DR. BINNENDIJK: By letter dated 18 February 1976, the Director, Defense Security Assistance Agency, indicated that you would be advised of possible transmittals to Congress of information as required by Section 36(b) of the Arms Export Control Act. At the instruction of the Department of State, I wish to provide the following advance notification.

The Department of State is considering an offer to a NATO country for major defense equipment tentatively estimated to cost in excess of $7 million.

Sincerely,

ERNEST GRAVES,
Lieutenant General, USA, Director.

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., March 12, 1981.

Dr. HANS BINNENDIJK,
Professional Staff Member, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR DR. BINNENDIJK: By letter dated 18 February 1976, the Director, Defense Security Assistance Agency, indicated that you would be advised of possible transmittals to Congress of information as required by Section 36(b) of the Arms Export Control Act. At the instruction of the Department of State, I wish to provide the following advance notification.

The Department of State is considering an offer to an American Republic tentatively estimated to cost in excess of $25 million.

Sincerely,

ERNEST GRAVES,
Lieutenant General, USA, Director.●

PROPOSED ARMS SALES

● Mr. PERCY. Mr. President, section 36 (b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $25 million or, in the case of major defense equipment as defined in the act, those in excess of $7 million. Upon such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulates that, in the Senate, the notification of a proposed sale shall be sent to the chairman of the Foreign Relations Committee.

In keeping with my intention to see that such information is available to the full Senate, I ask to have printed in the RECORD at this point the notifications which I have received.

The notifications follow:

DEFENSE SECURITY
ASSISTANCE AGENCY,
Washington, D.C., March 6, 1981.

Hon. CHARLES H. PERCY,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act we are forwarding herewith Transmittal No. 81–27, concerning the Department of the Air Force's proposed Letter of Offer to Turkey for defense articles and services estimated to cost $33 million. Shortly after this letter is delivered to your office, we plan to notify the news media.

You will also find attached a certification as required by Section 620C(d) of the Foreign Assistance Act of 1961, as amended, that this action is consistent with Section 620C (b) of that statute.

Sincerely,

ERICH F. VON MARBOD,
Acting Director.

[Transmittal No. 81–27]

NOTICE OF PROPOSED ISSUANCE OF LETTER OF OFFER PURSUANT TO SECTION 36(b) OF THE ARMS EXPORT CONTROL ACT

(i) Prospective purchaser: Turkey.

(ii) Total estimated value:

	(*Millions*)
Major Defense Equipment*----------	$ 0
Other ----------	33
Total ----------	33

*As included in the U.S. Munitions List, a part of the International Traffic in Arms Regulations (ITAR).

(iii) Description of articles or services offered:

Cooperative logistics supply support for follow-on spares and supplies in support of C–130H, F–4E, F/RF–5A, F–100C/D/F, F/RF–104G, T–33, T–37C, and T–38 aircraft, and other systems and subsystems of U.S. manufacture.

(iv) Military department: Air Force (KBG).

(v) Sales commission, fee, etc., paid, offered or agreed to be paid: None.

(vi) Sensitivity of technology contained in the defense articles or defense services proposed to be sold: None.

(vii) Section 28 report: Included in report for quarter ending 31 December 1980.

(viii) Date report delivered to Congress: March 3, 1981.

POLICY JUSTIFICATION

Turkey—cooperative logistics supply support arrangement:

The Government of Turkey has requested the purchase of follow-on spares and supplies in support of its U.S. origin aircraft and other systems and subsystems of U.S. manufacture at an estimated value of $33 million.

This sale will contribute to the foreign policy and national security objectives of the United States by improving the military capabilities of Turkey; furthering NATO rationalization, standardization, and interoperability; and enhancing the defenses of the Western Alliance.

This cooperative logistics supply support arrangement is necessary to maintain the flow of spare parts to support U.S. origin aircraft and other systems and subsystems. It will not affect the regional military balance.

Procurement of these items and services will be from the many contractors who provide similar items and services to the U.S. forces.

Implementation of this sale will not require the assignment of any additional U.S. Government or contractor personnel to Turkey.

There will be no adverse impact on U.S. defense readiness as a result of this sale.

UNDER SECRETARY OF STATE
FOR POLITICAL AFFAIRS,
Washington, D.C.

Pursuant to Section 620C(d) of the Foreign Assistance Act of 1961, as amended, and the authority vested in me by section 1(a) (1) of the Department of State Delegation of Authority No. 145, I hereby certify that the provision of spare parts for military aircraft to the Government of Turkey is consistent with the principles contained in Section 620C(b) of the Foreign Assistance Act of 1961, as amended.

This certification will be made part of the certification of the Congress under section 36(b) of the Arms Export Control Act regarding the proposed sale of the above-named articles and is based on the justification accompanying said certification, and of which such justification constitutes a full explanation.

DAVID D. NEWSOM.●

DEPARTMENT OF DEFENSE ANNUAL REPORT ON CHEMICAL WARFARE AND BIOLOGICAL RESEARCH PROGRAMS

● Mr. TOWER. Mr. President, as required by law, the Department of Defense has submitted to the Senate a report on funds obligated in the chemical warfare and biological defense research programs during fiscal year 1980.

The length of this particular report is such that, in order to save the expense of printing, I will not ask that the full report be placed into the RECORD. Rather, it is available for review in the offices of the Committee on Armed Services, and those interested in seeing the report may do so by contacting the committee staff.●

URBAN DEVELOPMENT ACTION GRANT PROGRAM

● Mr. WILLIAMS. Mr. President, the urban development action grant program is one of the most innovative and successful urban programs the Federal Government has made available to distressed communities. Its concept is simple—to provide the funds necessary to make private investment attractive in economically troubled areas. In embodying this concept, the program takes a most conservative approach. It relies heavily on the private sector. It requires that the private funds committed to a project go to work before the Federal contribution is drawn down. It targets its benefits on the neediest of communities and neighborhoods. It accords wide leeway to localities to fashion their own UDAG programs.

The program has compiled an extraordinary record. Up to January 1981, UDAG has awarded about 1,000 projects in large and small distressed communities, created or retained 470,000 jobs, and generated over $11.5 billion in private investment. A number of studies and reviews, such as those conducted by the Urban Land Institute, the House Appropriations Committee surveys and investigations staff, and the Princeton Urban and Regional Research Center have attested to the program's value, and the public's vigorous opposition to the President's recommendation to reduce, revise, and ultimately eliminate the program reveals the program's wide popularity.

In my home State of New Jersey, I have seen firsthand how the program has provided new hope to communities faced with the steady loss of jobs and the erosion of tax bases. From neighborhood rehabilitation projects in Newark and Bayonne, to major commercial and industrial expansion in New Brunswick, Perth Amboy, and Morristown, the program has worked. It has pumped the lifeblood of private investment into dying neighborhoods and downtown areas, stimulating an economic revival that these areas had once thought impossible.

Mr. President, since the administration first announced its intention to cut back the program's funds and fold it into the community development block grant program, I have received numerous telephone calls and letters of protest from local officials and others. They cannot understand why a program of such obvious merit, a program that works so well, would be marched off to the chopping block. Frankly, I cannot understand it, either. If the budget reduction exercise in which the Congress is now engaged is designed in part to foster more efficient, effective government, the attack on UDAG hardly advances that purpose.

Mr. President, I ask that several newspaper editorials along with several communications I have received urging support for the UDAG program be printed at this point in the RECORD.

The material follows:

[From the Princeton Weekly Bulletin]

PROFESSOR STUDIES UDAG EFFECTIVENESS

The Urban Development Action Grant Program seems to have been spared the Reagan administration's budget axe so far because of pressure brought to bear by big-city mayors, says Assistant Professor of Politics and Public Affairs Jerry A. Webman, who recently completed a study on the program.

The UDAG program has channeled federal money designed to encourage private investment to the cities that need it most, Web-

man concluded in his study, which is contained in a report published by the Princeton Urban and Regional Research Center. The report, entitled The Urban Development Action Grant Program: Papers and Conference Proceedings on its First Two Years of Operation, was edited by Webman and Richard P. Nathan, director of the center.

In addition to Webman's paper, the PURRC report also contains a statistical profile of the UDAG program in its first two years and a transcript of a national conference on UDAG held here in November 1979. The conference brought together officials from the U.S. Department of Housing and Urban Development (which administers UDAG), and state and local governments, as well as public policy researchers and representatives of the private investment community.

The UDAG program was designed to provide funds to local governments for public improvements that are necessary before private development projects can go forward, and for subsidies to private investors.

Enacted in October 1977, six months before President Carter announced his proposals for a national urban policy, the program had an annual budget of $400 million in 1978 and 1979. The striking differences between the UDAG program and the earlier urban renewal program, terminated in 1974, are pointed out in Webman's report. Instead of clearing land and hoping private developers would bid to use it, Webman explains, UDAG funds projects that investors have already agreed to develop once physical or financial obstacles have been cleared away with government help.

Using data supplied by HUD, Webman found that "the more distressed cities win more grants, and their grants tend to be as large as less distressed cities. The combined effect is that UDAG funds are concentrated to a significant degree on the nation's most severely distressed cities."

Nathan commented that UDAG is "one of the nation's most valuable programs for helping cities revitalize their local economies." The program has been administered by a small group of "results-oriented managers," Nathan added, and is "tough, tight and effective."

Webman referred to case studies of eight UDAG projects in five New Jersey cities in examining the question of whether the help provided by UDAG grants was enough to steer private investment to places where it might otherwise not have occurred. He concluded:

"The kinds of places where commercial and industrial UDAG projects are locating are very similar to the kinds of places where commercial and industrial firms are making unsubsidized investments. But this fact does not mean that businesses benefitting from UDAG aid are getting windfalls for doing what they would have done anyway. Instead, what seems to be happening is that action grants may influence the location of investments, but will do so within the bounds of dominant nationwide patterns of economic development."

UDAG is not big enough to reverse the trends that have seen a decline in manufacturing in many older central cities, especially those in the Northeast and Midwest, Webman observes. But, he adds, it has helped many cities to build on their continued strengths in the commercial and professional sectors of their economies.

"UDAG worked for two reasons," says Webman. "One, because it was centrally administered by people in Washington who knew what they were doing and could select among potential projects. Two, because the money was concentrated, going to projects that needed it most rather than being spread around." The program will almost certainly be reorganized, Webman adds, and its future success will depend on how faithful it remains to its original concept of channeling funds where they will do the most good.

"It appears now that UDAG may be combined with the Community Development Block Grant Program, with probably some reduction in funding," Webman predicts. "Something like UDAG is going to continue, although it might have a different name and be administered slightly differently. If they really run the program very differently," he states, "they might as well not run it at all."

IRVINGTON, N.J.,
February 9, 1981.

Hon. HARRISON WILLIAMS,
U.S. Senator, Russell Senate Office Building, Washington, D.C.

DEAR SENATOR: Attached is a copy of a letter I sent to the President of the United States, Mr. Martin Anderson and Mr. David Stockman relative to the Urban Development Action Grant Program.

I would appreciate it very much if you too would use your influence so that Irvington, New Jersey would be one of the recipients of "full funding," for 1981 and 1982.

Sincerely yours,
ROBERT H. MILLER,
Mayor.

HOBOKEN, N.J.,
February 6, 1981.

Hon. HARRISON WILLIAMS,
U.S. Senate, Russell Senate Office Building, Washington, D.C.

DEAR SENATOR WILLIAMS: Enclosed is a draft copy of a telegram sent to President Ronald Reagan, Domestic Affairs Assistant Martin Anderson, and OMB Director David Stockman urging the continued funding of the Urban Development Action Grant Program at current fiscal levels. As Mayor of a distressed industrial city, I cannot emphasize enough the importance of the UDAG program to the City's economic revitalization.

For Hoboken, a $300,000 UDAG grant for the Universal Folding Box Company has resulted in the retention and creation of nearly 200 permanent private industrial jobs and in the investment of more than $1.8 million in private capital. A second UDAG grant, recently awarded to the City, has also raised hopes in a downtrodden neighborhood for the rehabilitation of at least 30 homes and 12 commercial enterprises.

Without the full continuation of the UDAG program, I fear that Hoboken and the other urban areas of New Jersey will suffer irreparable damage to their economic viability. As Mayor, I am fully aware of your prior record of commitment and assistance to the cities of New Jersey and the Nation and your support for the UDAG program is crucial at this time.

If there is any way in which I or my staff can be of assistance to you in the struggle to keep critical urban programs like the UDAG program intact, please do not hesitate to call upon me.

Sincerely yours,
STEVE CAPPIELLO,
Mayor.

CITY OF TRENTON,
Trenton, N.J., February 19, 1981.

Hon. HARRISON A. WILLIAMS, Jr.,
Russell Senate Office Building, Washington, D.C.

DEAR SENATOR WILLLIAMS: It is our understanding that the Administration is proposing to cut off funding for the Urban Development Action Grant Program for the balance of this fiscal year. Such an abrupt funding cutoff would prevent a very important, long planned project in Trenton from coming to fruition. This project, called the Chambersburg Shopping Center, includes the construction of an Acme Supermarket and a K-Mart store on a site which had been declared blighted by the City.

The blight designation of the City was later challenged in Court. The City was successful, however, in fighting this legal challenge. Now, after considerable expense and much delay, the City is anxious to proceed with implementation of the project which will only be possible with the Urban Development Action Grant. We had anticipated announcement of the Grant in April of this year.

The City had also submitted an Urban Development Action Grant application to lower interest costs to homeowners borrowing funds from private lending institutions for energy saving improvements. This proposal will also be put in jeopardy if UDAG funds are cut off at this time.

We had hoped that the UDAG Program, with its emphasis on private sector development and job creation would have enjoyed the support of the new Administration. It also happens to be one of the least bureaucratic federal programs, and very little of program funds are used to administer the program either federally or locally.

We would hope that you would carefully review the merits of the UDAG program and, out of special consideration for important pending projects in Trenton, support the continuation of the program to at least allow for funding of projects in the current fiscal year.

Very truly yours,
Eugene E. Kalinowski, President; Carmen J. Armenti, Councilman at Large; Anthony P. Carabelli, East Ward Councilman; James E. Mitchell, North Ward Councilman; Gerard S. Naples, Councilman at Large, Jennye W. Stubblefield, West Ward Councilwoman; Joseph F. Yuhas, South Ward Councilman.

FEBRUARY 6, 1981.

Hon. RONALD W. REAGAN,
President of the United States, White House, Washington, D.C.

DEAR MR. PRESIDENT: As Mayor of an older industrial city, I strongly recommend full funding of the Urban Development Action Grant Program at current fiscal levels for both fiscal 1981 and 1982.

In my community, UDAG has been crucial in enabling private industrial expansion and retention efforts by manufacturing firms. These efforts have resulted in new permanent private sector jobs and a strengthened industrial production capacity in Irvington. Without UDAG, which offers unique practical incentive for private investment, there would be a substantial threat to my city's economic and industrial base.

Respectfully,
ROBERT H. MILLER,
Mayor.

NEWARK ECONOMIC
DEVELOPMENT CORPORATION,
Newark, N.J., February 11, 1981.

Hon. HARRISON A. WILLIAMS, Jr.,
U.S. Senate, Dirksen Senate Office Building, Washington, D.C.

DEAR SENATOR WILLIAMS: Enclosed please find a summary of U.D.A.G. projects in Newark and a copy of a telegram that was sent to President Reagan.

The program is an important adjunct to the City of Newark's revitalization and any assistance that you can give us in retaining this program will be greatly appreciated.

Sincerely yours,
ALFRED L. FAIELLA,
Executive Director.

(Telegram)

President RONALD W. REAGAN,
White House, Pennsylvania Avenue, Washington, D.C.

PRESIDENT RONALD W. REAGAN: I would like to encourage you to retain the Urban Development Action Grant Program as part of your economic recovery plan for the nation.

U.D.A.G. participation has been crucial garnering private sector investments for Newark. Without that help, none of the ten funded U.D.A.G. projects in our City could have been possible. We view the continuation of the U.D.A.G. program as vital to our developing the necessary base for Newark's economic recovery.

It is my recommendation that U.D.A.G. be continued in its present form and at the current funded levels.

Sincerely,

KENNETH A. GIBSON,
Mayor, City of Newark.

NEWARK ECONOMIC DEVELOPMENT CORPORATION,
Newark, N.J., February 6, 1980.

Felise, Murphy and Company (B–79–AA–34–0130): A U.D.A.G. of $107,000 enabled the making of a twenty year, 3% subordinated loan for the rennovation and rehabilitation of 100,000 s.f. of light industrial space. Prior to the rehabilitation, this building was vacant for over ten years.

The project received a private commitment of $327,000 and generated 80 construction jobs. It is expected that upon full occupancy, 220 new permanent jobs will be created and $10,000 in new taxes.

RAR developers (B–79–AA–34–0129): U.D.A.G. contributed $1,000,000 for the acquisition of 1,200,000 s.f. of floor space for the creation of an industrial park. With this help, the Developers secured an additional private commitment of $4,800,000 thereby successfully rehabilitating 519,000 s.f. of space and the creation of at least 57,000 s.f. of new construction.

Alling Street (B–79–AA–34–0126): Receiving $438,974 from U.D.A.G., $2,100,000 of private financing was leveraged in the conversion and rehabilitation of 49,500 s.f. of vacant industrial space into a first class modern office building in Newark's Central Business District.

This project created 31 construction jobs, 228 new permanent jobs and will generate $40,176 annually as new taxes to the City. The building has also become an attractive addition to the City.

New community corporation (B–79–AA–34–0135): $200,000 of U.D.A.G. assistance brought $900,000 in private commitments and an 18,500 s.f. day care center and office building for the management company of nearby housing projects.

Actual project costs are near $2,000,000 and has to date created 35 construction jobs. It is anticipated that 49 new permanent jobs will be created as well as $5,000 in new taxes. The project will also house valuable community services to an area in the midst of a recovery from outright devestation.

One Washington Park (B–80–AA–34–0124): This project will be Newark's first major office building constructed in nearly a decade. The building will be 418,000 s.f. and will be built at an estimated $36,000,000 including $10,000,000 of U.D.A.G. assistance.

New Permanent employment is expected to result in 665 jobs and the development will bring the City $557,327 in new taxes. The project will be a big step in Newark's meeting the rising demand for prime office space in the City.

University Shopping Plaza (B–79–AA–34–0136): U.D.A.G. will contribute $450,000 to a private commitment of $1,900,000 for the construction of a 50,000 s.f. shopping center in Newark's Central Ward.

As a result of this injection, a 35,000 s.f. supermarket will service a neighborhood in dire need of these services. The project will also create 60 new permanent jobs and $36,000 in new taxes annually.

Snyfax (B–79–AA–34–0136): $290,000 from U.D.A.G. will allow an existing firm to expand its operations in a modern 37,500 s.f. light manufacturing plant in Newark's Meadowlands. The project was carried out at a cost in excess of $2,100,000.

As a result, 50 construction jobs were created and an estimated 45 new permanent jobs will also be generated. The development will mean $29,600 in new taxes to the City as well.

Schnoll (B–78–AA–34–1015): Neighboring Synfax, Schnoll benefitted from $296,000 U.D.A.G. used for acquisition of property and a construction loan. Combined with private commitments of $2,000,000, this chicken packaging firm will be able to move into a modern and attractive light manufacturing building to meet its expanding needs.

The building will be approximately 32,000 s.f. and should bring to the City 70 new permanent jobs and $29,600 in new taxes.

Neighborhood improvement program I (B–78–AA–34–0108): This program combined $1,000,000 from U.D.A.G. and $4,000,000 of private investments to assist 521 families with their housing needs.

The rehabilitation of existing housing allowed residents to maintain their present residences, stabilize their neighborhood and reverse the neighborhood's trend of decline. The majority of the benefit from the program benefits low and moderate income families. Also a benefit received were the 257 construction jobs generated.

Neighborhood improvement program II (B–80–AA–34–0133): This phase will further the successful work accomplished in NIP I with the help of $2,235,194 from U.D.A.G. and a private commitment of $10,000,0000. It is estimated that this phase will bring Newark $1,600,000 in annual new taxes.

PRESTON K. MEARS,
Chatham, N.J., February 7, 1981.

Hon. HARRISON WILLIAMS,
U.S. Senate,
Washington, D.C.

DEAR SENATOR WILLIAMS: According to the newspapers one of Mr. Stockman's targets for elimination is the Urban Development Action Grants program of H.U.D. We feel that this proposed elimination is a terrible mistake and hope you will do all that you can to protect the program.

All of us are against sin and waste but this particular program is highly virtuous and particularly free of waste and extravagance. To the contrary it is one of the most productive and cost effective programs ever devised in the Federal Government.

As you know, under this program a relatively small Federal grant triggers private sector investment many, many times greater. The results are substantial private capital investment, immediate increased construction trades employment, establishment of new or expanded business enterprises, with more permanent local employment—all with the concomitant benefits associated with productive private enterprise. And at the same time recovering blighted urban areas!

We know that most, if not all, of the targets for proposed cuts will have their own strong defenders and that reductions in Federal expenditures having been promised by Mr. Reagan will ensue. We just want you to know that we feel the UDAG program is one of the very best to have ever come out of Washington and should be strengthened—not weakened. We do hope you agree and will work for its continued success.

UDAG is not a give-away—it is a get-going!

Sincerely yours,

MARION AND PRESTON MEARS.

MAYORS AGREE THAT UDAG MUST REMAIN

(By Lee Alexander and Richard Carver)

The Times editorial of Feb. 5, "Are Urban Action Grants Expendable?" makes assumptions that are misguided and dangerous for cities.

First, your distinction between the Urban Development Action Grant program and "direct help for distressed people and distressed cities" is false.

UDAG directly provides jobs for people and tax dollars for cities. It is probably more efficient at doing that than any other single Federal program. Since April 1978, when the program began, $1.9 billion in action grants have directly created $11.6 billion in private investment commitments, have generated or retained 463,218 jobs, including 286,887 new permanent jobs, and have added $324 million a year in new property or other local tax revenues.

Second, substituting community development block grant funds for UDAG funds to trigger private investment is not, under current regulations, as easy as you suggest.

Even if the regulations are changed, the money would be spread so thinly across the country under the block grant formula that it would be difficult to put together in any one city enough funds to attract significant private investment. We would also have to spend almost a fifth of our community development funds, already committed to other efforts, to make up for the loss of the UDAG appropriation. This would inevitably mean sacrifices in housing, neighborhood development and other essential projects that would be as destructive to our cities as UDAG has been beneficial.

Third, your suggestion that action grants be "exchanged" for enterprise zones is ill-considered.

Action grants could play a critical role in making the enterprise zone concept work, because they provide actual capital, not just incentives, to stimulate investment in cities. The two ideas belong together. In addition, it will be some time before a workable enterprise zone plan is presented to Congress by the Administration, and even more before one is passed. To kill UDAG in the meantime would cripple public-private investment partnerships in cities around the country and turn back the momentum of economic development which is our only real hope for the future.

Fourth, your inference that in cutting the budget we must choose among action grants, general revenue sharing and food stamps is disturbing.

There are differences between Democratic and Republican mayors on some urban aid programs. But action grants, revenue sharing and a tightly administered food stamp program are among those on which there is a bipartisan, cross-country consensus. None of them should be candidates for elimination. We must bear the cost of fighting inflation, but we need not dismantle the productive resources of our cities nor strike blows at the truly needy among us. UDAG is important because it provides incentives for inner-city private commercial development—a major goal of the Reagan Administration.

[From the Baltimore (Md.) News American, Feb. 5, 1981]

URBAN ACTION GRANTS: THE CRUELEST CUT OF ALL

One of the Reagan administration's early surprises is budget director David Stockman's plan to eliminate an urban development program that has pumped $1.9 billion into distressed cities across the country and has helped Baltimore become the renascent city it is today. It is no surprise that Mr. Stockman is looking to achieve the tax cuts Ronald Reagan promised during his campaign, but it is a surprise that the four-year-old Urban Development Action Grant (UDAG) program could be getting the ax.

UDAG, one of the most successful urban programs of the Carter presidency, has generated $7 in private investment for every $1 that the federal government has awarded. UDAG funds, by the way, usually are paid back to the government, with interest.

Baltimore is a good case of UDAG's success. An investment of $47.4 million here has stimulated nearly half a billion dollars from private sources, and that does not count the ripple effect UDAG money creates. For example, construction of the Hyatt Regency Hotel in the Inner Harbor was financed in part by $10 million in UDAG money. That hotel alone is a substantial boon to the city, but the other development it has spawned isn't even addressed by federal statisticians. "Who knows how much construction of the Hyatt had to do with Rouse's decision to build Harborplace?" says David Cordish, the Baltimorean who has run UDAG for several years.

The program's record has prompted some officials in Washington to wonder aloud why this of all programs has been earmarked for extinction. "What's shocking is that UDAG is very conservative," Mr. Cordish says. "It's such a Republican-type program. It requires a lot of private investment.

UDAG is certainly in line with the kind of stimulation President Reagan has endorsed for ailing urban areas; indeed, it squares nicely with his notion of establishing urban "enterprise zones" where the federal government would encourage private investment. The bipartisan support UDAG has received in Congress has been little less than phenomenal—as it should be, considering the $12 billion in private investment it has garnered nationwide, and during a recessionary period, too.

So why is it being cut? The administration's answer is misleading. Mr. Stockman argues that benefits under UDAG would not be lost in any case, because its funds would be distributed through Community Development Block Grants (CDBG). Word in Washington, however, is that Mr. Stockman favors cutting that program as well—and by as much as 10 to 25 percent. And as good as the CDBG program is, even with its current budget it would only have provided Baltimore with an extra $3 to $4 million—instead of the $17.4 million it got—had the UDAG program been merged with it from the start.

Yet there is reason for optimism. Because UDAG funds were authorized by Congress for the current fiscal year as well as the next, the Reagan administration must go back to Capitol Hill if it hopes to eliminate the program. Unless everyone on the Hill is crazy with budget-cutting fever—and we do mean crazy—our guess is that UDAG will survive.●

JAMES DOWNEY'S ARTICLES IN THE IRISH TIMES ON NORTHERN IRELAND

● Mr. KENNEDY. Mr. President, in a series of four articles last month in the Irish Times of Dublin, Mr. James Downey, deputy editor of the newspaper, analyzed some of the most important aspects of the conflict in Northern Ireland and the implications of the recent meeting in Dublin between Prime Minister Haughey of Ireland and Prime Minister Thatcher of Great Britain.

In these articles, entitled "A View From the Summit," Mr. Downey discusses the meeting between the Prime Minister and subsequent developments, including the Irish Government's role, British attitudes toward Ireland, the question of Irish neutrality, and the role of the Protestant community in Northern Ireland.

Mr. President, I believe that all of us who are concerned about the cause of peace and an end to the violence in Northern Ireland will find these articles of interest, and I ask that they be printed in the RECORD.

The articles follow:

[From the Irish Times, Feb. 23, 1981]

THE ANGLO-IRISH DIMENSION

(By James Downey)

For the British Government in the latter part of 1980, Mr. Charles Haughey was the right man in the right place at the right time.

The British, in their attitudes towards Ireland, tend to oscillate between cynicism and self-delusion. One of their milder and briefer phases of self-delusion was ending; they were ready to take a new course which, if not exactly cynical, would be based on a cool and hard-headed appraisal of their own interests and of what was possible of achievement. And Mr. Haughey, as they knew, was more than prepared for them.

Again and again during the '70's, the British had attempted, with varying degrees of effort, sincerity and imagination, to bring about an "internal settlement" in Northern Ireland. The major initiatives—there were minor ones as well—were the suppression of the Stormont Parliament by Mr. Edward Heath; the Sunningdale conference and its creation, the power-sharing Executive; and Mr. Merlyn Rees's Constitutional Convention. In 1980 the Humphrey Atkins initiative made a fourth.

UNIONIST REFUSAL

Like all the others, the Atkins proposals perished on the rock of Unionist refusal to allow Catholics a share in government. But unlike several of the others—notably the collapse of the Executive and the failure of the Constitutional Convention—they were not followed by a period of dismay and inaction. This time there was something to put in their place.

For several years the British had been urged (by people ranging from Mr. John Hume to Sir John Peck, the former Ambassador in Dublin, to important figures in the establishment in London) to change and widen the context in which a Northern Ireland settlement was being considered: to move it out of the artificial and stultifying Procrustean bed of the six counties.

OTHER WAYS

The commonest proposal for a changing of the context was that they should withdraw the guarantee to the Unionists that Northern Ireland could not cease to be a part of the United Kingdom without the consent of a majority within Northern Ireland. But there were other ways in which the problem could be approached. One was to take the interests, sometimes common, sometimes divergent, of the two islands—or, as the British preferred, of the Governments of the United Kingdom and the Irish Republic. Another was to consider the implications (again involving interests which were sometimes common and sometimes divergent) of our common membership since 1973 of the European Community.

Merely to restate the question in such terms carried large implications. What stood in the way of better and more profitable relations between the Governments and peoples of the two islands? The answer, for the Unionists, had to be stark.

If there was no majority leader in the North with whom the British could do business, what of Dublin? Mr. Haughey's accession to power at the end of 1979 had caused misgivings in London, where a more "republican" line was feared. These misgivings revived a few months later during the "Donlon affair," when Mr. Haughey unsuccessfully tried to move the Ambassador in Washington to the United Nations. It was not so much that the British saw the move as an attempt to change policy as that they viewed it as a clumsy piece of mishandling. But by then Anglo-Irish relations had already gained a new footing, firm enough for the Donlon affair to cause little more than a hiccup.

CLEAR IDEA

Much, though by no means all, of the credit for that situation belongs to Mr. Haughey. If you are lucky in your timing, and have a reasonably clear idea of where you are going and how you mean to set about it, a great deal can be achieved in politics. The new Taoiseach had both the luck and the clear idea.

The timing could hardly have been better. Mr. Haughey had made clear his view that Northern Ireland was finished as an entity, but he had done nothing to impede the Atkins initiative. By the time the British had taken the Rev. Ian Paisley "up the mountain" and found he was not prepared to pay the price they asked for the "kingdoms and cities" they showed him, Mr. Haughey had his proposals ready for a change in the context.

He had also prepared his ground in two important ways. When he came to office, the British had feared a slackening in co-operation between their security forces and ours. The fear was groundless. For the most obvious reasons, no Taoiseach can afford to diminish Border security co-operation. Besides, under both the Cosgrave and Lynch Governments, liaison—for example, at the personal and technological levels—had been so developed and made so intimate that by December 1979 the process would have been all but impossible to reverse. Nevertheless, the British were both delighted and surprised when they found that co-operation was being not only maintained but improved; and in the event, liaison and good relations have not been damaged even in the face of the worst border murder campaign that has been seen during the present troubles.

NOT SOULMATES

Secondly, the Taoiseach took pains to study the character and convictions of the British Prime Minister so as to set about establishing a good personal and political relationship with her. In this he succeeded, though the relationship is by no means as warm and close as is sometimes thought. Mr. Haughey and Mrs. Thatcher are not soulmates, nor do they share a common philosophy on Ireland or very much else. They are tough politicians who believe they can work together for their joint benefit. They are not free of suspicion of each other, and their good relations do not preclude the possibility of serious misunderstandings. But they are good enough to have survived a great deal of threat and strain in the last few weeks.

Thus armed, Mr. Haughey was able to approach the Dublin Castle meeting on December 8th with confidence. He left the Castle, it is not too much to say, in triumph. It has been said that had it not been for the exaggerated reaction of Mr. Paisley—and to a lesser extent of other Unionist personalities—the meeting and its outcome would have been seen as matters of much less importance than the Taoiseach would have wished. The terms of the communiqué do not bear out that view.

Certainly some parts of the communiqué are obscure, perhaps even worrying. The much-debated—and much misunderstood—phrase, "institutional structures", is a good example. It is known that Irish and British officials studied in advance the terms of the institutional arrangements that exist for close Franco-German cooperation and consultation. But France and West Germany are, roughly speaking, equals; Ireland and Britain are very far from equal. It is easy enough to imagine Anglo-Irish institutional arrangements which would be dominated by Britain.

But the key phrase was "totality of relationships within the two islands". It is not a phrase which admits much room for argument, much nicety of interpretation. The word "totality"—inserted, it is said, by the British and not the Irish side—was in itself a major success for Mr. Haughey.

Taking the terms of the communiqué along with the weight of the British delegation in Dublin, and the British abandonment of any further attempts at an "internal settlement" in the North, it would be perverse to interpret the Dublin Castle meeting as anything but a significant new departure. The context had been changed, and with a vengeance.

WHAT HOPES?

When Mr. Haughey met Mrs. Thatcher in Dublin Castle—and when their respective officials met both previously and subsequently—what did each side hope to gain from the talks? And how clear was each side about the objectives?

At one level, things were fairly straightforward. The desirability of better, friendlier, more relaxed and normal relations between the Irish and British Governments and peoples is self-evident. Improving trade and economic cooperation between Ireland and Britain and between North and South is equally so. (If Northern Ireland, regardless of its constitutional status, were a peaceful area, attracting investment and generating wealth, Britain would save money and the Republic would make profits.) That British citizens living in the Republic may not vote in general elections, unlike their Irish counterparts in Britain, is unjust and absurd—though some of the problems stem from the difficulty of finding out who is or is not a British citizen.

JOINT POLICIES

As to security cooperation, the general satisfaction being proclaimed with the present position cannot hide the fact that massive long-term problems remain, which must sooner or later be discussed between the two Governments.

At another level, it makes excellent sense for the two Governments to work together on the difficulties and opportunities presented by our common EEC membership: to devise joint policies where the two countries' interests are seen as convergent, to ease the difficulties where they manifestly are not, as is notoriously the case with the Common Agriculture Policy.

But what are the ultimate objectives of the process that includes the Prime Ministerial meetings, and the joint studies by officials from the two sides? And to what extent is there agreement on what these should be?

The answer is easy where Mr. Haughey is concerned—and where the officials of the Taoiseach's Department and the Department of Foreign Affairs are concerned. The objective is a united, or more precisely a federal, Ireland. Of this, more hereafter; meanwhile, the Taoiseach is gratified at what he sees as his success in raising discussion to the "higher plane" about which the greater part of the Dublin political and official world—including highly-placed sympathisers of his own—were extremely skeptical only a few months ago.

[From the Irish Times, Feb. 24, 1981]

BRITAIN WANTS OUT—BUT NOT SO FAST

(By James Downey)

On the British side, matters are a little more complete than in Dublin, for reasons that have much to do with the personality of Mrs. Thatcher herself.

By now there can hardly be much doubt in the minds of objective onlookers that the majority view (or the majority amorphous feeling) of the public, and far more important, of the establishment, is in favour of disengagement and eventually of some form of united Ireland. This has been stated time and again by Dr. Garret FitzGerald who, both as Foreign Minister and as leader of Fine Gael, has probably been given more and stronger indications of the feeling than any other Irish politician. The view—coupled nowadays with expressions of the regard in which Mr. Haughey is held—is constantly made obvious to anyone who has dealings with British politicians and officials. It emerges from a perusal of such organs of the establishment as the Economist and the Financial Times. It has probably been strengthened by the recent showings of Irish history programmes on television.

There are important exceptions. Although the last two Labour Prime Ministers were in favour of Irish unity—Mr. James Callaghan much more equivocally than Sir Harold Wilson—some Irish officials are deeply suspicious of the Labour Party.

Support for the Irish cause has been stronger on the right and left wings of the Labour Party than in the centre. The left, under Mr. Tony Benn, have come out in favour of troop withdrawal—but Mr. Benn is not well liked or understood in Ireland. The right, or social democrats—sometimes denounced by Mr. Merlyn Rees as "Gladstonian" or "Asquithian" Liberals—favour unity but not dramatic unilateral action. If they split from the party and succeed in making an alliance with the Liberal Party, they will be much cultivated by the Irish.

THE CENTRE

The centre arouse deep suspicions in the Republic. Their alliance with the Unionists in the last parliament—promoted by the then Prime Minister, Mr. Callaghan, and the present party leader, Mr. Michael Foot—still rankles. Both Mr. Rees and Mr. Roy Mason, during their terms as Northern Ireland Secretary, were considered much too pro-Unionist; and Mr. Rees caused offence by making it clear to Irish politicians that he did not believe them to be serious about unity (though his view is shared by a good many people in Ireland). Some of their colleagues are felt not to be entirely free from a tinge of old-fashioned anti-Catholicism.

On the Conservative side, support for Irish unity has been gaining ground ever since the Heath Government in the early '70s reversed its original policies and accepted Dublin as a partner in the search for a Northern Ireland settlement. The historical links between the Conservatives and the Unionists have been enormously weakened, though not yet entirely broken. Powerful members of the present Cabinet have let it be known that they view a united Ireland as the desirable, if not the only, ultimate solution.

But there is still a Unionist wing in the Tory Party. It may not consist of the most prominent or articulate people, and the quixotic Unionism of the Catholic MP Mr. John Biggs-Davison is the exception, not the rule; but there is a gut-feeling which may have to be reckoned with.

STRAIGHT LINES

None of this is a problem at all comparable to that of Mrs. Thatcher's own personal attachment to the Union. It is real, and her assurances to Mr. Paisley and others on the constitutional status of Northern Ireland are perfectly genuine. In Merrion Street a feeling exists that her intelligence is not matched by her imagination; that she thinks too much in straight lines.

Partly because of Mrs. Thatcher's Unionism, partly because a demand for the abrogation of the constitutional guarantee is not at present seen as practical politics, it is accepted in Dublin that the footwork must be exceptionally neat. Accordingly, the view is presented that the "higher plane"—the removal of the problem from the six-county to the Anglo-Irish context, represents not an abrogation but (as one highly-placed source puts it) "a supersession" of the guarantee.

In official quarters in London, one easily finds people who share that view. Where they disagree with Dublin, it is likelier to be on the timescale than the substance. In Merrion Street the word is "full steam ahead," but in Whitehall people talk of the work of a generation. One comment, characteristic enough, was: "If the Provisional IRA just went away quietly—but unfortunately they won't—and if everybody in Dublin sang dumb, you could have a united Ireland by the end of the century."

DONE ENOUGH

And another: "Haughey doesn't have to achieve unity or anything close to it, does he? He's started this thing going, it's under way now. To be the man who started the final push, that's enough to give him his place in history."

That, of course, is not how Mr. Haughey sees things. He is a man with great faith in himself (and very little in other Irish politicians). He wants the talks to achieve a lot, and quite soon. He also wants to be re-elected, and he hopes they will help him to win a general election. He will not want to play as long a game as the British would like.

But in any case the reaction of the Rev. Ian Paisley could have the effect of taking the timescale out of both his and Mrs. Thatcher's hands, and drastically shortening it.

BRITISH BETRAYAL

The theme of British betrayal is no new tune for Loyalist politicians. It has been heard a good many times in history, and in recent times it has often been played by Mr. Paisley himself. Self-reliance, the God of our Fathers, keeping our powder dry, acceptance of the verdict of the British people if they wish to expel Northern Ireland from the United Kingdom; we have heard it all before.

But the Dublin Castle talks gave it a new plausibility, greatly reinforced by Mrs. Thatcher's refusal to make a statement in the House of Commons. That refusal was eagerly seized on by Mr. Paisley, with a batch of headline-grabbing consequences: the new Covenant, the marches and rallies, the drilling on the Antrim hillside, the suspension from Parliament.

The reasons for his tactics and timing are obvious, not to say blatant. Mr. Paisley wants to become the undisputed Unionist and Protestant leader. He is already half way there. A success in the local elections in May will bring him even closer to the goal. The Unionists are disunited and badly led. They

are split between devolutionists and integrationists, and with devolution effectively off the agenda they look likely to be pushed more and more into the integration corner. That would leave them in a hopeless position, even if Mr. Paisley were not around to keep things on the boil.

And keeping things on the boil is just what he is best at. He has every interest in raising the political heat, in maintaining and deepening the Unionist divisions. Without him the local elections would be, like all Northern elections, a referendum on the union, he plans to make them, instead, a referendum on who is to lead the Protestants.

OPPORTUNITY

We shall hear more, much more, of Mr. Paisley. But first the question must be asked: "Why did the British present him with such an opportunity, which they must have known he would seize?"

Several reasons have been advanced to explain why Mrs. Thatcher refused a House of Commons statement. One is the passion on the Irish side for confidentiality—understandable in view of the way previous Irish leaders, notably Mr. Jack Lynch, suffered from British "leaks". Another is the distrust in which Mr. Michael Foot is held, for widely differing reasons, on both sides. The Irish dislike him for his dealings with the Unionists in the last Parliament, while Mrs. Thatcher is said to regard him as "a raving Bolshie". It may appear strange if she cannot tell the difference between this venerable parliamentarian and the wilder fringes of the Labour left, but after all she has said as much about Mrs. Shirley Williams, no less.

Are these sufficient explanations for Mrs. Thatcher's coyness? They seem feeble enough. It is not surprising that Mr. Paisley should conclude that people are keeping quiet because they have something to hide.

Of course, in the immortal words of Ms. Mandy Rice-Davies, "he would, wouldn't he?" But is he right?

SECRECY

One does not have to accept the terms in which Mr. Paisley poses the argument: to suspect betrayals, sellouts, dishonourable secret dealings. There are, however, matters of direct import, as well as long-term implication, involved in the talks which both Governments would naturally wish to keep confidential.

For one thing, the phrase "totality of relationships" surely has to mean that the constitutional future of Northern Ireland can at some stage be open for discussion. However genuine Mrs. Thatcher may be in her assurances on the guarantee to the Unionists, one can readily understand why she would not wish to be drawn too far on this point.

More specifically, there are two areas which have been the subject of constant speculation both before and since the Dublin Castle meeting, and which, if they contain any substance, would claim the highest possible priority for secrecy.

The first concerns the shape of future relationships between Ireland—the whole or the parts—and the United Kingdom. The joint study groups are considering Anglo-Irish "institutional structures". What does that mean?

JOINT BODIES

What it does not mean, Dublin insists with greatest firmness, is the reintegration of the United Kingdom, or Ireland's rejoining the Commonwealth, or a Confederation of the British Isles with (as has been proposed under one scheme) the capital on the Isle of Man. What it could mean, and is certainly up for discussion, is the creation of joint governmental and/or official bodies to oversee important areas of common interest, of which the most crucial and sensitive is security. If agreement were reached on this point, some people would see the creation of an Anglo-Irish Council, to oversee not just that but all matters of common concern, as a logical step.

The second question is that of the possibility of a defence pact between Ireland and Britain. This is inseparable from the general question of Irish neutrality, and the argument about defence pacts in recent weeks has reopened the general debate on neutrality. It is a topic full of confusion and misapprehensions.

[NOTE: Following the meeting between the Taoiseach and the British Prime Minister Mrs. Margaret Thatcher in Dublin on December 8th 1980, a communique was released. That part of the communique's text dealing with Anglo-Irish relations is restated below.

"4. The Taoiseach and the Prime Minister agreed that the economic, social and political interests of the people of the United Kingdom of Great Britain and Northern Ireland and the Republic are inextricably linked, but that the full development of these links has been put under strain by division and dissent in Northern Ireland. In that context, they accepted the need to bring forward policies and proposals to achieve peace, reconciliation and stability; and to improve relations between the people of the two countries.

5. They considered that the best prospects of attaining these objectives was the further development of the unique relationship between the two countries.

6. They accordingly decided to devote their next meeting in London during the coming year to special consideration of the totality of relationships within these islands. For this purpose they have commissioned joint studies covering a range of issues including possible new institutional structures, citizenship rights, security matters, economic cooperation and measures to encourage mutual understanding.

7. The Taoiseach and Prime Minister recalled the statements issued on behalf of their Governments on December 4th about the situation in the H-Blocks, and reiterated the hope that the statement made by the Secretary of State for Northern Ireland on December 4th would provide the basis on which the issues could be resolved.

8. The discussions were regarded by both sides as extremely constructive and significant."]

[From the Irish Times, Feb. 25, 1981]

A BENEVOLENT NEUTRALITY

(By James Downey)

Ireland, to state the case bluntly, is not a neutral country. The Government still pays some lip service to our refusal to join NATO because of Britain's presence in the North, but neither it nor its neutralist opponents see that factor as having much relevance nowadays.

What does have relevance is the ghastliness of nuclear war and its consequences. Is Ireland to allow itself, or any part of it, to be involved directly or indirectly in such a war, or are we to use our influence in Europe in the interest of lowering East-West tension generally, and particularly in the interest of lowering troop and armament levels?

Public opinion, and the political parties, are deeply divided on how we should approach the question. There is a clear majority against the stationing of nuclear weapons—or nuclear installations of any kind—on Irish soil; but there the consensus begins and ends.

On the left, there is a small minority in favour of our abandoning all contact with the Western Alliance, leaving the EEC and joining the Non-aligned Movement. Mr. Sean MacBride—who supported Common Market entry—does not go as far as that. He believes that we should use, not the European Community but the Council of Europe as the vehicle for pushing for a European line in favour of disarmament and independence from the power blocs. In recent years he has unsuccessfully urged the Department of Foreign Affairs to support initiatives pressed by European countries, like Switzerland and Austria, which are not members of any alliance but equally not members of the Non-aligned Movement.

INDEPENDENT ATTITUDE

Fine Gael, by contrast, see the European Community (in which we have a voice on the Commission, in the Council of Ministers and in the European Parliament) as the vehicle for such action. They believe that Ireland can give a lead to the other small members of the EEC which would encourage them to press the French and Germans towards a more independent attitude and oppose the bellicosity and excessively pro-American stance of the British. A smiliar line, roughly speaking, would be favoured by the Labour leadership.

Fianna Fail's view is altogether more hardnosed—and more pessimistic. Mr. Brian Lenihan (vox Lenihan, vox Haughey) has lately restated policy as follows: we would take action if the territory of a fellow-member of the Community were attacked, we would be prepared to join a military alliance in the event of European union. This, said Mr. Lenihan, was a hypothetical case.

That was an understatement. Multilateral defence alliances simply do not arise at present. The attitude of the Fianna Fail Government to Irish political policy in Europe is more to the point. And the present Government see nothing to be gained by the approach of either Mr. MacBride or Dr. Garret FitzGerald. They thing realpolitik will prevail, and that there is little Ireland can do about it.

This summary of party attitudes, however, has not taken into account the important divisions which exist in all the main parties on the subject. The Labour Left, for example, would like Ireland to leave the EEC and join the Non-aligned Movement. In Fianna Fail there is a considerable pro-neutrality faction, whose opposition to defence alliances is based on idealistic grounds; opposition to nuclear weapons, or maintenance of the historical de Valera-Aiken line, or both.

But it is Fine Gael who are the most interesting case. This party probably contains the highest proportion of people who favour the total abandonment of neutrality and joining the Western Alliance (a view also held by some powerful members of the extraparliamentary establishment in Dublin). But it also contains passionate traditional nationalists and neutralists, of whom the most notable is perhaps Mr. Ritchie Ryan.

For some time, Mr. Ryan has been unhappy about what a number of people see as evidence that Ireland has been drawn increasingly into some form of unofficial participation in the Western Alliance. To support them, there have been a great many straws in the wind. Although Ireland is the only EEC country which is not a member of NATO, our representatives take part in EEC political co-operation. The Government supported the ineffective Olympics boycott and sanctions against Iran. Ireland has been consulted about NATO decisions.

Over a period, the neutralists had seen what they believed to be signs that Irish officials now regarded us as members of the Western Alliance in all but name. The issue came into the open when Mr. Ryan was chided by an Irish diplomat for stating what he understood to be the traditional and accepted neutralist view—and reacted angrily.

The incident helped to revive the neutrality debate. It also helped to unite Fine

Gael, publicly at least in a way favourable to the neutralists. Matters were much accelerated when rumours became current of the possibility of an Anglo-Irish defence pact arising out of the Haughey-Thatcher meetings in Dublin Castle and previously in London, or out of the joint studies. By condemning "secret deals", Dr. FitzGerald appears to be taking a more neutralist position than Fianna Fail, the party that invented neutrality.

Defence arrangements, bilateral and multilateral, are still in the melting-pot. But if there is substance in the speculation about a bilateral pact there is certainly a compelling reason for Mr. Haughy and Mrs. Thatcher to keep their discussions confidential for the time being.

MORAL QUESTION

Neutrality is a moral, as well as a practical, question. In the nuclear age and for a country as relatively small and powerless as Ireland it is more a moral than a practical question.

A bilateral pact, on the other hand, has more to do with tactics than principle. And it also belongs more in the context of an ultimate Anglo-Irish settlement than in that of an Irish approach to European and world affairs—though the two cannot be separated.

CONCESSIONS

Although the subject has been little analysed, it has long been taken for granted that as part of the creation of a united or federal Ireland—involving a transfer of sovereignty—far-reaching concessions must be made to the Unionists. There has been even less discussion of what concessions might have to be made to the British, but at the very least they would have to be assured that whatever new constitutional arrangements were made in Ireland could pose no threat to them in the context of defence.

The possible form of the guarantee is obscure. There would be intense opposition in Ireland to the siting of nuclear missiles in the North, even while it remains part of the United Kingdom. There would be grave unease, to put it no more strongly, about the prospect of the stationing of foreign armed forces on Irish soil. But it is fairly safe to say that a substantial majority of the Fianna Fail and Fine Gael parties (though not of the Labour Party) would see no ideological objection to entering into a bilateral defence agreement if Britain demanded it as part of an acceptable settlement.

Is this now, or it is likely to be later, a British demand? And is it an important card in the Irish pack? The British are themselves far from unanimous on Ireland's strategic value. One defence expert in London dismissed the whole question, bilateral and multilateral, as "irrelevent". He took the hypothetical case not of a nuclear war but of a situation of greatly heightened tension in Central Europe brought about by a Russian invasion of Poland—or, very much worse, Yugoslavia. In that case, he said, what would matter would not be the Western Approaches but the position "at the sharp end", in Germany. And in any case, the Irish, whether or not they were members of any alliance, would simply have to do as they were told. (It would have been enjoyable to hear de Valera's response to comments like these.)

A very different view was advanced by Mr. Michael Mates in an interview on RTE: he considered the Anglo-Irish defence question very important indeed. And Mr. Mates, although he is only a back-bencher, is one of the best-informed and most influential Tory MPs where Ireland is concerned—more so, probably, than most Cabinet Ministers. It is likely that his opinion is much closer to Mrs. Thatcher's than that of the defence expert quoted above.

The obvious conclusion is that there is a significant Irish card to play. But in the last few weeks rumours reached Fine Gael—rumours which were current in some knowledgeable quarters outside the Dail—that the card was being played, not at the end of the game but at the beginning: that the question of a bilateral pact had already been raised, and not by the British but by the Irish side.

BELLICOSE STANCE

Since Mrs. Thatcher is famed for her interest in defence—or, to put it more bluntly, for her bellicose pro-American and anti-Russian stance—they concluded that Mr. Haughey must have counted on the defence issue to attract her. If so, they believe that he made a tactical error, in that a defence agreement should come, if at all, at the very end of the long process towards an Anglo-Irish and North-South settlement, and not before.

They may well be right in this belief. They are, however, almost certainly wrong in thinking that they can turn the argument to domestic political advantage. It is hard to assess to what extent "the national question" can sway the next general election, but it is certainly going to be a factor, and a factor highly advantageous to Fianna Fail. It is very much to be doubted whether the onslaught on Fianna Fail on the "secret deal" line can offset that advantage greatly, if at all.

Meanwhile, a question which bears some relation to that of defence and neutrality, but is even more germane to the problem of a stable and satisfactory settlement, is not being debated at all in public—though it is one of the major issues on the agenda of the Anglo-Irish joint studies. This is the issue of internal security.

ACCEPTABLE LEVEL

Before the recent increase in the rate of murders and attempted murders, the British might be said to have achieved what the late Reginald Maulding, in a notorious phrase, called "an acceptable level of violence" (amended by one British official to "an accepted level of violence"). But in spite of some internal Northern security successes, and the improvement in cross-border cooperation which so gratifies the British, only the most complacent or callous could call the situation satisfactory.

It may be tolerable for the British. It is not tolerable for the harassed and intimidated Catholics in the North's ghettoes. It is not tolerable for the Border Protestants who live in daily and nightly fear of their lives. It is not tolerable for the Republic, which spends far too much on security and still sees policemen shot.

All this is bad enough. What of a situation in which the British had withdrawn their troops and handed over responsibility to some other authority?

AMNESTY

Whether that authority resided in Dublin or Belfast, it is beyond question that the existing security forces in the island would not be sufficient. Few doubt that an independent North, or even an attempt at an independent North, would come rapidly to catastrophe. Twenty-Six County Governments have done much, and the Government of a united or federal Ireland could do very much more, to put down IRA violence. In the best case, the Provisional IRA could be faced with a simple choice: to fold their tents and steal quietly away (in which case the British and the Unionists would have to be persuaded to reintroduce the word "amnesty" into their vocabulary) or to be suppressed with considerable ruthlessness. But the biggest problem now, as historically, is not IRA violence. It is the threat, or imminent possibility, of Protestant violence.

SECURITY FORCES

Since 1969—when the RUC were temporarily disarmed, the "B" Specials abolished, and the Ulster Defence Regiment set up—very little serious and effective consideration has been given to the question of the future shape of security forces in the North. The UDR are little more efficient and no more acceptable to the Catholics than the "B" Specials were. The RUC have made progress, but not enough. Some brave souls in the SDLP (the source of most serious political thinking in Northern Ireland) are prepared to murmur another naughty word, "militia"; but experience is discouraging. And in the context of a change of sovereignty, the problem would necessarily be far more acute.

Yet the problem must be faced—or rather, not merely faced but solved. After Unionist intransigence, the difficulty of effective security arrangements is the greatest obstacle in the way of a settlement. One could put it another way: If Unionist obduracy creates the security problem (and if the Unionist position rests ultimately on the threat of Protestant violence) both must be settled together.

An Anglo-Irish council, whether it confined itself to security or took in other topics as well, could usefully tackle this tangled question.

[From the Irish Times, Feb. 26, 1981]

A PROTESTANT PARLIAMENT FOR A CATHOLIC PEOPLE

(By James Downey)

Supposing—and it is a very large supposition—that the two Governments can agree on the constituents of the Anglo-Irish and North-South problem, and from there go on to proposals for political and security arrangements consonant with their individual and common interests, what of the people most closely involved? What of the interests of the "double minority", the Northern Protestants and the Northern Catholics? And is Mr. Paisley's increasing power a help, or a hindrance, to a settlement?

For several years—and not merely since his success in the Euro-election of 1979—many politicians in the North and the Republic have been convinced that Mr. Paisley must emerge as what he himself claims to be, the undisputed leader of the Northern Protestants.

Some may deplore his success, and sigh for a few more John Robbs, another Brian Faulkner, or a lead from the trade union movement. But they know this is wishful thinking.

Others greet the prospect of Mr. Paisley's rise to pre-eminence with equanimity. These include, most significantly, Mr. Haughey and Mr. John Hume.

REACTION

The Anglo-Irish talks have already, as planned, changed the context in which a settlement of the Northern question has to be attempted. Mr. Paisley's violent reaction changes it even more dramatically. If he really is convinced, and can convince his followers, that a British betrayal is in prospect—and if he emerges the winner of the May local elections—the conditions, in this view, will exist for a North-South rapprochement in which the long-condemned constitutional guarantee will be, to all intents and purposes, irrelevant.

But the SDLP, at any rate, know that the situation contains as much danger as opportunity.

Mr. Paisley is a consummately skillful politician. His followers regard him as a model of consistency, although he has in fact shifted his ground several times in his career. (At various times, for example, he has flirted with the ideas of integration with Britain and of "voluntary", power-sharing.)

The logic of his present position—claiming that the Prostestants are being pushed out of the United Kingdom, but will have nothing to do with the Republic—is that he must go for independence for Northern Ireland. But he is by no means fully committed to independence. He has tried to leave himself room for manoeuvre—a sidestep back towards Britain, or perhaps a sidestep towards the Republic?

PRIVATE ARMIES

He is not a man to hide his light under a bushel. He loses no opportunity to emphasise the "muscle" at his command: his power, for instance, to subvert the security forces. And part of his tactics lately has been to frighten his adversaries by threatening violence, and demonstrating that he has Protestant private armies at his disposal.

That power should not be underestimated. His 500 hillside men, brandishing their firearms certificates, may have seemed more comic than menacing. They are not the ones who matter.

There is already a pro-independence political party in Northern Ireland, and a pro-independence armed force; and they are one and the same. No matter that the people who do the talking call themselves the New Ulster Political Research Group, and the people who do the killing call themselves the Ulster Freedom Fighters. They are both "wholly owned subsidiaries" of the Ulster Defence Association.

The position of the UDA is full of paradoxes. Its leaders (though not the rank-and-file or sympathisers) tend to dislike and distrust Mr. Paisley. In their independent Ulster, they offer elaborate guarantees—but not power sharing—to the Catholics. More, they envisage a coming together of their State and the Republic in some sort of confederation "in a generation or two" (a timescale that finds a curious echo in some SDLP quarters).

They say they have nothing against Catholics in general, and they manifestly enjoy talking to Southerners. Unlike Mr. Paisley, they favour closer North-South co-operation, and they see nothing sinister in the Anglo-Irish talks.

Yet they also say privately that if "Big Ian" achieves the position he seeks as the unchallenged Protestant leader, they can envisage themselves being obliged to provide the physical force to establish him as Prime Minister of "their" independent Ulster. In other words, they can envisage outright civil war, with themselves as the Protestant storm-troopers.

Can Mr. Paisley, the UDA, and others, be prevented from setting out on this road to nowhere? Mr. Haughey and the SDLP are optimistic; they believe that, instead, Mr. Paisley can be involved at an appropriate time in the process of peaceful settlement. But here all parties, and especially Mr. Haughey, face an acute problem of timing.

The Taoiseach may wish—does wish—to proceed very much faster than the British, with their "work of a generation" view. But with Mr. Paisley setting the pace, events could soon move much too fast for comfort.

Eventually an Irish Government must get down to negotiations with, and offers to, the Unionists. Mr. Haughey, of course, would like that government to be led by himself. But he might have liked the joint studies to be considerably advanced before making a firm approach. He must also take into account the dates of his own general election, and of his next meeting with Mrs. Thatcher (probably in mid-summer).

Now, however, he must consider making a direct approach to Mr. Paisley if the latter enjoys his expected success in the May elections. He could do this privately—though it is a delicate business, in which he would be hampered by a severe shortage of lines of communication—or he could consider making a public offer to the Unionist population and their leaders which, in addition to an invitation to talks, might include making clear, in more specific terms than hitherto, what is "on the table" for them in a federal Ireland.

COWARDLY

For a federal Ireland is definitely what is in question. Many in the Republic—and not a few in the North, including some Protestants—regret that. To them the federal option is too much like a cowardly "cop-out", too much like a proposal for two sectarian States, too open to "Irish solutions to Irish problems."

Federalism would, they believe, very largely be a negation of real Republicanism, which aims at the creation of an open, pluralist, united Ireland in which the best of the differing traditions on the island would mingle; in which diversity would be a source of strength.

But it is accepted, albeit often reluctantly, by most Dublin politicians who have studied the question, that in practical terms Dublin's offer to the Unionists would have to include their own local assembly and administration, disposing of very substantial powers.

Assuming that such an offer were made and accepted, where would that leave the Northern Catholics? An Anglo-Irish Council, as well as overseeing satisfactory security arrangements, could also act as guarantor of civil liberties for both Protestants and Catholics. But how could the SDLP—who have hitherto insisted on full power-sharing for Catholics at the top level—accept what looks so much like a return to Protestant domination in the six-county area?

Some prominent SDLP members have considered the question, have come up with an answer that could be regarded as extremely bleak, or amazingly generous, or both.

They say that in return for a tranfer of sovereignty, they would consider a federal system in which the North remained under Protestant domination "for a generation or more."

Their argument runs something like this: With the British presence removed, the IRA would be deprived of their raison d'etre, and the Protestants would gradually lose their fears of their Catholic neighbours and of the South. Besides, the Protestants, in addition to enjoying their own local assembly and administration, would participate in all-Ireland institutions, and over a period their notorious "siege mentality", having nothing to feed on, would disappear.

The way would then be open for a much closer coming-together of the two parts of the island, based on openness and equality and free of suspicion and misunderstanding. Eventually a truly united and pluralist Ireland would replace the federal system.

That scenario sounds not merely generous, but over-optimistic and even quixotic. The average Northern Catholic might feel that he has little enough to gain by it. And how would the average Northern Protestant take to it? Would bigotry based on fear really wither away, even in two generations?

As to the Protestants, how long would they take to learn generosity, even in circumstances that permitted them to be generous? As to the Catholics, is it enough to say that they would have gained what a majority of the Irish people wish: first unity of a sort, later a genuine unity?

Perhaps not. But magnanimity on the part of the Catholics—who have come through the fire, and who are in some ways closer to their Protestant neighbours than they are to the rest of us—could set an example that might catch on. They might act as a bridge between the former Unionists and the rest of the island.

It has often been held that the ex-Unionists would run the united Ireland of the future. That idea was disputed several years ago by Mr. Austin Currie of the SDLP. It was the Northern Catholics, he said, who would do the running. He just might be right.●

THE ANNIVERSARY OF ARCHBISHOP ROMERO'S DEATH

● Mr. KENNEDY. Mr. President, it is a moment of great sadness in which we remember the assassination a year ago today of Archbishop Oscar A. Romero of San Salvador. As we review the ensuing year since Archbishop Romero was brutally murdered while offering Mass in a hospital chapel, we have witnessed even more senseless killing in El Salvador, and even more calculated terror and brutality against those dedicated to principles of justice and equality.

Only a few months ago, American religious missionaries and labor leaders were murdered in El Salvador. These tragedies have been compounded by the absence of a thorough and complete investigation of their deaths and definitive steps to bring those responsible to justice.

Thousands of other killings have taken place in El Salvador, killings of men and women guilty of nothing more than legitimate aspirations for life, liberty, and the pursuit of happiness denied them by an oligarchy and its henchmen seeking to maintain an unjust social order.

Churches in El Salvador have paid with the blood of priests and ministers, sisters and lay workers for standing up for the people and for their basic human rights.

What was apparent a year ago is even clearer today: That American policy toward El Salvador is tragically mistaken in its provision of unconditioned military assistance to that country. Outside military intervention from any quarter is not going to redress the fundamental problems of El Salvador. As Archbishop Romero prophetically foresaw, outside arms supplies only make the situation worse. When Archbishop Romero wrote President Carter on February 17, 1980, to protest the possibility of military assistance to the junta, he also was protesting the possibility of U.S. advisers training the Salvadoran army. Thirteen months later, we are confronted with the provisions of grenades, ammunition, rifles, mortars, machine guns, and helicopters, as well as advisers, to that same army.

Archbishop Romero knew that he might be killed for his courageous stand in defense of his people. The threats against him had come all too frequently. Yet he believed that no other course was available to him as a bishop of the church and as a citizen of El Salvador. Before he was murdered, Archibishop Romero said:

As a Salvadoran, I am obliged by divine law to give my life for those I love, for the entire Salvadoran people, including those Salvadorans who threaten to assassinate me. If they should go so far as to carry out their threats, I want you to know that I now offer my blood to God for justice and the resurrection of El Salvador.

As we commemorate Archbishop Romero's life and his witness for his people, all Americans should ponder deeply the present course of the American policy toward El Salvador. Let us heed his authentic voice crying out for an end to the killing. Let us join in working for peace and reconciliation in a country too long torn by violence and destruction.●

THE RECEIPT OF THE THIRD ANNUAL REPORT ON THE FAIR DEBT COLLECTION PRACTICES ACT, MARCH 24, 1981

Mr. THURMOND. Mr. President, as the President pro tempore of the Senate, I have received the third annual report on section 815 of the Fair Debt Collection Practices Act of 1977. This report, which has been submitted by the Federal Trade Commission, is available in my office for review by my colleagues.

U.N. UNIT ERRED IN REPORT ON PALESTINIAN BODIES

● Mr. HEINZ. Mr. President, I wish to bring to my colleagues' attention a recent Associated Press report stating that the United Nations unit apparently erred in reporting that Israeli forces had blown up the bodies of five dead Palestinian guerrillas. I am pleased that this matter has been clarified, for despite the many problems that exist in the Middle East, this kind of activity certainly does not accurately characterize the Israelis in any way.

So I was particularly pleased when this article appeared, and want to express my appreciation to Mr. Arthur Baer of Coatesville, Pa., who has brought this article to my attention. Mr. President, I ask that the article appear at this point in the RECORD.

The article follows:

WALDHEIM SAYS U.N. UNIT ERRED IN REPORT ON PALESTINIAN BODIES

UNITED NATIONS.—U.N. Secretary-General Kurt Waldheim admitted yesterday that Dutch U.N. peacekeeping troops had erred in reporting that Israeli forces had blown up the bodies of five Palestinian guerrillas killed in southern Lebanon on Christmas Day.

Waldheim said in a statement issued here that a three-man military board of inquiry he appointed last month had "not found evidence to support the account" given to the press by the U.N. Interim Force in Lebanon (UNIFIL).

The secretary-general, who arrived in New Delhi, India, yesterday to attend a conference of the nonaligned movement, said the board had unanimously agreed that "UNIFIL soldiers had no intention of deliberately making incorrect statements."

Waldheim added a note of censure, saying he "deeply regrets that UNIFIL issued a press bulletin (on Dec. 31) containing an incorrect statement of the facts and wishes the record to be corrected, in keeping with the standards of integrity and objectivity that must characterize the peacekeeping efforts of the United Nations."

The Israeli mission to the United Nations issued a statement saying it was pleased to note that, in the U.N. report of inquiry, "Israeli's position has been fully vindicated."

The UNIFIL report of the incident was issued after an Israeli raid into southern Lebanon, and the allegations were denied by the Israeli army.

Israel's U.N. Ambassador Yehuda Z. Blum previously had sent Waldheim what was described as a "sharp" written protest of the "false information given by UNIFIL." To the Israelis, the Dutch report appeared as further evidence of what they consider a pro-Palestinian bias by the United Nations and its peacekeeping forces.

In extenuation of the original UNIFIL report, Waldheim said the board of inquiry believed that "distance, angle of observation, smoke resulting from the explosions when the (Israel) soldiers blew up the ammunition and equipment of the Palestinian armed elements, and the prevailing tension all contributed to the Dutch soldiers of UNIFIL reporting what they thought they had seen, rather than what actually occurred."

The secretary-general faulted the Dutch battalion and UNIFIL headquarters at Naqoura, in Southern Lebanon, for accepting the report of the alleged incident "without taking adequate measures to verify the details." ●

ALTERNATE TAX PROPOSALS

● Mr. PELL. Mr. President, the distinguished senior Senator from Ohio, Senator GLENN, in an article published in today's New York Times, has presented a thoughtful and persuasive critique of the tax reduction proposals submitted to the Congress by President Reagan. In the article, Senator GLENN offers constructive proposals for alternate tax cuts designed to increase investment, production, and productivity.

Mr. President, I commend Senator GLENN's article to my colleagues and ask that it be printed in the RECORD.

The article follows:

ALTERNATE TAX PROPOSALS

(By JOHN GLENN)

WASHINGTON.—Although I share President Reagan's determination to resuscitate our economy, I am increasingly doubtful that his tax proposals will do the job.

America faces an acute shortage of investment capital—a shortage that may well be the greatest single inhibitor of industrial productivity, modernization, and new-job creation. Generating an average industrial job now requires a $55,000 to $60,000 investment. In high-technology industries, even greater investment soon will be required simply to maintain existing employment levels, let alone increase the number of new jobs available. In more-mature industries, a large-scale capital infusion is mandatory. To modernize and regain its competitiveness in world markets, the steel industry needs $30 billion in investments over the next five years; the auto industry requires an eye-popping $80 billion. Small business, which provides 55 percent of all private-sector employment, is faced with imminent capital starvation.

If our problems are largely on the supply side, it is puzzling why the Administration has proposed an economic program in which the Federal budget deficit will remain in excess of $50 billion in fiscal 1981 (thus continuing to crowd an already tight money market) and in which only 20 percent of the total tax cut is earmarked for direct supply-side support. The White House argues that since its cuts, unlike previous Administrations', are skewed in favor of taxpayers in middle- and upper-income brackets, more money will go into investment than consumption. Indeed, Administration spokesmen have said that they assume that 50 to 70 percent of the individual tax cuts will wind up being invested.

That is a mighty big assumption, particularly since only 20 to 30 percent of all previous personal tax cuts were transformed into investment dollars. Moreover, except for the wealthy, increased Social Security taxes will all but neutralize the benefit of decreased marginal tax rates: After the new withholdings are factored into the equation, a family of four earning $25,000 comes out ahead by $23. The same family earning $50,000 will save $91. How many industrial bonds or stock certificates will $91 buy?

What happens if we fall short of the Administration's 50 to 70 percent investment target? What if, as many economists predict, a 10 percent tax cut for individuals results in a $60 billion increase in aggregate demand—a sum larger than the proposed budget cuts and business tax reductions combined? Quite simply, our economy could easily be in far worse shape than it is today. In the President's words, "too many dollars chasing too few goods" would ignite an explosive new round of inflation. Insufficient capital investment would leave our industries uncompetitive, create fewer new jobs, and provide lower tax revenues with which to balance the Federal budget.

Why must we gamble that personal cuts will eventually spill over into investment? Why not provide a more modest tax cut for individuals, and target what is truly required directly to the supply side? Assuming that we can formulate adequate safeguards to ensure that businesses use the extra capital for productive, job-promoting investment (rather than for, say, the acquisition of other companies), we might consider the following:

Amending the proposed 10-year, 5-year, 3-year depreciation schedule to 10–5–3–1, adding a one-year write-off for expenses incurred for pollution control.

Providing greater tax incentives for industrial research and development, perhaps even a bottom-line tax credit for certain kinds of research.

Structuring even-faster depreciation schedules for high-technology industries that must be given the opportunity to write off their equipment in less than five years.

Offering investment tax credits, or even refundable tax credits, for industries willing to invest on-site in economically distressed areas. Such inducements might prevent further deterioration and community dislocation in major urban areas.

Giving more immediate effect to the proposed cuts in capital-gains taxes. Such cuts would be particularly helpful to small business.

Reducing the rate at which interest income is taxed. To encourage small savers as well as large, we could even exclude from taxation the first several thousand dollars of such income.

These suggestions are not comprehensive but they do provide a foundation for discussion, and clearly address the problems of capital formation and job creation head-on. Obviously, the ogres of inflation and unemployment cannot be slain through tax cuts alone. Budgetary restraint, regulatory reform, reduced dependence on foreign energy sources, and greater cooperation among industry, labor, and government must all be part of our long-term economic program. But for now, whatever happened to supply-side economics? ●

BILINGUAL EDUCATION

Mr. HAYAKAWA. Mr. President, Americans have become emotional, vocal, and politically active about English as the primary language in the schools. President Carter fueled these fires with his proposed ruling last year to force local schools to teach non-English-speaking students in their native language.

I am pleased to report that the Reagan administration rescinded the Carter ruling. As Sheldon Steinbeck, counsel for the American Council for Education says:

The Federal Government can provide guidance and assistance for bilingual education, but not a heavy-handed mandate. Local school boards need flexibility in implementing a national policy.

Well said, Mr. Steinbeck.

We must not forget, however, that the supporters of this ruling have not vanished. We must be aware of their views on this explosive subject.

On my left, we see immigrants, mostly Hispanics, who define bilingual education as a more or less permanent two-track educational system—involving the maintenance of a second culture and an emphasis on ethnic heritage, I must add that we are dealing with many refugee, immigrant and entrant groups. The most vocal and politically active, however, are the Hispanics. They supported the Carter ruling.

On my right, we see local school officials and State administrators, who, for the most part, define bilingual education as the teaching of English to new immigrants. They prefer a loose Federal definition which allows them to formulate their own programs, according to local needs. The Carter ruling ignored their definition, and required special teaching in English along with transitional instruction of other subjects in a student's first language.

The State of Virginia retaliated last December and decided that its schools would not obey the Carter ruling. The State approved Fairfax County schools' English-as-a-second-language program, which used English only, in teaching immigrants.

Surprisingly, the Feds accepted the all-English program. The Department of Education concluded that "achievement test scores of students in the program showed they had made consistent and significant progress through intensive English classes and concluded that the system's teaching methods were an acceptable alternative to Federal rules requiring school districts to provide special classes in foreign languages to students who do not speak English as a primary language."

Virginia scored a substantial victory. First, the Department of Education admitted that its mandates had room for improvement. Second, it raises the possibility of every county in the country, including Los Angeles and San Francisco, going all English in their bilingual programs.

Mr. President, I ask that Charles McCabe's two-part series of articles from the March 9 and 10 San Francisco Chronicle be printed in the RECORD. Mr. McCabe explains in more detail the politics and problems affecting bilingual education in the United States.

REAGAN AND TWO TONGUES

(By Charles McCabe)

I shall use as a touchstone for the early Reagan administration the way it and its leader are handling the problem of bilingual teaching in our educational establishment. Since our educational system is heavily under federal subsidy, the problem is the president's, as is bilingualism's parent problem, the immigration crisis.

The core of the problem is Spanish-speaking children and whether they should be taught in their own language or in English. This is a matter that has become, by indecisiveness on the part of previous administrations, emotion-ridden and politically explosive.

There have been several interesting developments since the last time I wrote on the subject. For one thing, public opinion has become very vocal about English as first language in the schools.

This year, if President Carter had not been defeated, a rule by the new U.S. Department of Education making bilingual education mandatory would have gone into effect. Under it, local public schools would be forced to educate non-English-speaking students in their mother tongue.

That proposed rule had many local school officials up in arms because it would require special teaching in English along with transitional instruction of other subjects in a student's first language. Cost of program: As much as $591 million, with Washington picking up one-third of the nut. It would affect an estimated 3.5 million children.

Early last December the state of Virginia decided it would have none of the U.S. Department of Education program. The Virginia education department decided that Fairfax County schools need not teach foreign-speaking students in their native language. This action was the resolution of a five-year fight between public officials and the county, with the government threatening to withhold up to $18 million in funds.

The feds, unexpectedly, accepted the all-English program. The USDE, in a letter to Fairfax County school authorities, said it was much impressed with the results of the county's $2 million program to teach English to foreign-speaking students.

The letter said, according to UPI, "achievement test scores of students in the program showed they had made 'consistent and significant progress' through intensive English classes, and concluded the system's teaching methods were an acceptable alternative to federal rules requiring school districts to provide special classes in foreign languages to students who do not speak English as a primary language."

The importance of the Virginia initiative can hardly be overestimated. First, it got USDE to agree that its August 1980 guidelines were far from infallible. Second, and perhaps more important, it demonstrated that if one county in Virginia could go all-English, there is no reason why every county in the country, including San Francisco and Los Angeles, could not do the same thing.

Effort and the support of the federal government are all that is required. That, and a brisk handling of the politicians, Chicano and otherwise, who stand to gain most from introducing this immense boondoggle into the public schools.

And finally, President Reagan, who reportedly wants to abolish the USDE, has lent a receptive ear to the Virginia action. The decision to go all-English is much more easily made by a president of the U.S. than by a governor of California, where a Chicano cabal appears intent on setting up a huge Spanish-speaking enclave in this state. They would do this in the name of civil rights, whereas such a program as proposed by USDE would almost certainly, with the help of the politicians, result in illiteracy in two languages.

REAGAN AND TWO TONGUES—PART 2

A true story. This chap is a former Middle School Spanish teacher in San Francisco. He is a native Spanish speaker who was graduated from a South American high school before earning a B.A. at Cal, with a minor in Spanish and a major in Math.

Recently this man took the written test given to applicants in his school district for a job in the local bilingual program. He flunked the test!

I am reliably informed that last year's test contained no questions dealing with Spanish or Central or South American culture, customs or literature. There WERE questions about the current leadership in the Chicano community, their identity and role and achievements, matters that were of no interest to our former Spanish teacher.

Bilingual teaching in California has been politicized to a fare-thee-well. Under rules that now prevail, community activists and their friends are given jobs as teachers and the district is conned by Chicano politicians into arranging temporary credentials from the state.

It is even rumored that there are a number of persons on the bilingual payroll who are neither in the classroom nor actually doing anything connected with the program.

The number of those needing bilingual education is regularly inflated. This results in an English-speaking program, using Spanish as the first language, that mostly produces, in the words of one bitter critic "third class education from third class teachers."

Under our system, it is notorious that Johnny can't read. What about Juanito?

The monstrous educational boondoggle, proposed by President Carter's Dept. of Education, would have forced local public schools to educate non-English-speaking students in their mother tongue, and at a cost of $591 million. Early last month President Reagan's new secretary of education, T. H. Bell, revoked Carter's proposed regulations and reinstated 1975 guidelines that do not have the force of law.

The wretched thing about the new brand of "mother tongue" educational program is that it is wholly legal. The U.S. Supreme Court in 1974 cited the Civil Rights Act of 10 years earlier in ruling that students are discriminated against, because of national origin, if schools fail to provide special help in teaching English. Two years ago the Carter government signed an agreement in a federal court case, agreeing to issue the regulations.

I happen to think the Supreme Court was wrong. So does nearly every school administrator in the country. And it is entirely possible to "provide special help in teaching English" without making the "mother tongue" the first medium of instruction. Go back to the old system of assimilation that made so many immigrants fluent in the language of their adopted country.

There are, it must be admitted, some Spanish-speaking students who need a limited, repeat, limited exposure to an English as a second language program.

Some of that $591 million, with the Feds picking up a third, could be used to strengthen this ESL program when it is indisputably needed. Many of our child immigrants from Mexico are illiterate in Spanish.

Secretary Bell called President Carter's federal rules on bilingual education "harsh, inflexible, burdensome, unworkable and incredibly costly." Further, "the rules are fiercely opposed by many, supported by few."

Says Sheldon Steinback, counsel for the American Council on Education and a member of Reagan's "transition team:" "The federal government can provide guidance and assistance for bilingual education, but not a heavy-handed mandate. Local schools boards need flexibility in implementing a national policy." The "mother tongue" idea needed killing. Good riddance.●

THE POOR: PROFILE OF FAMILIES IN POVERTY

● Mr. MOYNIHAN. Mr. President, if the administration spokesmen are accurately reflecting the administration's social policy decisions, we are being presented with an extraordinary change in the purposes of public assistance.

I refer to the March 19 statement of Mr. Edwin L. Dale, Jr., spokesman for the Office of Management and Budget, as quoted in the New York Times of March 20, 1981, that—

> The policy decision is that welfare is a safety net and not an income-supplement program.

Mr. Dale was commenting on a new report by the Center for the Study of Welfare Policy of the University of Chicago, entitled "The Poor: Profiles of Families in Poverty," which analyzes the impact on low-income families of certain of the administration's proposed budget reductions and program changes. The study examined the aggregate impact of changes in six Federal programs (aid to families with dependent children, medicaid, food stamps, low-income energy assistance, public housing, and comprehensive employment and training) on families in 10 States. Several of its findings merit attention, among them the conclusion that the administration's proposals would narrow—and in some cases eliminate—the income gap between welfare recipients who work and those who do not work, thereby reducing—and in some cases perhaps eliminating—the incentive to work.

The policy is whether a welfare recipient who works should be better off than one who does not. If there is no economic gain from working, there is no economic reason—although there may be other reasons—to do so.

For 14 years, the program we know as aid to families with dependent children has embodied the principle that welfare recipients who are able to work should have an incentive to work. The Social Security Amendments of 1967 established what is known as the "$30 and a third earned income disregard." This means that a welfare recipient who works can "keep" the first $30 of each month's earnings, plus one-third of all additional earnings, plus whatever is required to pay for work-related expenses and children's day care. The welfare check is reduced by the amount of earnings in excess of those disregarded under this formula.

In New York State, for example, an AFDC family of four (mother and three children) with no outside earnings receives $373 a month in cash assistance plus $150 in food stamps. Should the family head take a part-time job paying $396 a month (and assuming monthly work expenses, including day care, of $200 a month), the family's net cash income would be $667, plus $40 in food stamps. Thus the family as a whole would be $191 beter off each month as a consequence of the mother's employment than it would be if she stayed at home.

The result is that a significant number of welfare recipients do work. In 1977, some 21.8 percent of all AFDC families in the Nation had income other than their welfare benefit. That represents a population of 763,000 families (65,000 of them in New York) who are both economically better off as a consequence of working and in which the children are growing up with the awareness that one who works is better off than one who does not.

The administration proposes changes that would all but eliminate this incentive. In the 10 States sampled by the University of Chicago, the average difference in monthly incomes between welfare recipients who work and those who do not is $126. Under the administration's proposals, this would shrink to $29. In New York, the average monthly income of AFDC recipients who work would fall from $704 to $533, just $15 more than the average income of nonworking families. In Louisiana, the difference would vanish entirely. In California the difference would shrink from $188 to $15.

This is ironic, to say the least, for this is an administration that in other pronouncements appears committed to the proposition that welfare recipients must work. Indeed, another of the "reforms" that has been proposed would reinstitute the practice (which has been on the Federal statute books since 1964 but has been "suspended" since 1968) of requiring welfare recipients (except those with very young children) to engage in community service in return for their monthly check.

All this bespeaks a politically fashionable but fundamentally inaccurate view of public assistance. The program we know as aid to families with dependent children is first and foremost a program to aid dependent children. Of the 10.3 million individuals receiving AFDC benefits in 1979, only 3.1 million were adults; 7.2 million were children, 4.2 million of them under the age of 10.

The typical AFDC recipient is a child living in a fatherless home. Fatherless for any of a number of reasons: Death, desertion, divorce, illegitimacy. But as a child, nevertheless.

The number of such children is growing. According to data that I published in the spring issue of the Journal of the Institute for Socioeconomic Studies, approximately one-third of the children being born this year will live in a female-headed household that receives AFDC benefits at some time before their 18th birthday. One child in three. That makes AFDC second only to public education as the Government program with the widest impact on American children.

Recent history is not encouraging. Only 7 percent of the children born in 1940 could expect to spend a portion of their minority in a female-headed family receiving AFDC benefits; 17 percent of those born in 1950; 22 percent of those born in 1960.

These are dependent children. And AFDC exists in order to keep roofs over their heads, food in their mouths, and clothes on their backs. It embodies the response of society to the elemental needs of dependent youngsters.

It is not a lavish program. In New York State, for example, the average monthly cash benefit today for a family of four is $373. Other than a slight increase in the "shelter allowance," this is the same benefit as was provided in 1974. That means its purchasing power has been eroded 64 percent by inflation in the 7 years since it was established at its present level.

But for all its inadequacies, it is first and foremost a program for children. And changes in it should be evaluated in terms of their impact on dependent children. That is why one grows weary of debates about "welfare policy" that are couched in terms of the behavior of adults. It is not a program for adults. That some adults are also supported by it—96 percent of them husbandless women with children—is a consequence of the fact that most dependent children live with one parent.

Of course some of those adults can work. This is amply demonstrated by the fact that more than one in five of them does work. That we would like all who can work to work is attested to by the existence (since 1967) of the work incentive program, which requires adult recipients to register for work and, when jobs are available, to take them. Taking away the economic incentive to work will not reduce dependency. To the contrary. Does it not risk consigning AFDC recipients to permanent dependency? Does it not reverse two decades of progress in American social policy? It should be resisted. I, for one, will resist it.●

THE EQUAL ACCESS TO COMMUNICATIONS ACT OF 1981

● Mr. WEICKER. Mr. President, I am pleased to cosponsor S. 615 and S. 616, introduced by my distinguished colleague from Vermont (Mr. LEAHY). I congratulate him on his concern for the deaf citizens of the United States and will work with him again this year for enactment of this important legislation.

The Equal Access to Communications Act of 1981, S. 616, promises to make the telephone a useful communicative tool for hearing-impaired Americans. It would do so by establishing a matching grant program for the installation for teletypewriters in local, State, and Federal governments. The teletypewriter, or TTY, allows the hearing- or speech-impaired individual to "talk" over regular telephone lines. After attaching a telephone headset to the TTY, the individual can type a message that is simultaneously printed by a TTY at the other end of the telephone connection.

Mr. LEAHY's bill would also require five key Federal agencies to install TTY's in their main and regional headquarters and would provide Members of Congress with a TTY in their Washington offices. These terminals would register urgent inquiries, complaints, and other messages from deaf persons who could not otherwise contact these offices by phone.

Another feature of this legislation that would benefit the deaf community is its proposed tax deductions and credits for

installation, servicing and other costs associated with the purchase and use of TTY's.

Some of these devices retail for up to $1,700, a hefty investment many deaf people cannot afford. And, since TTY's require about twice the time to convey their typewritten message as does the human voice, long-distance calls on TTY's place a further financial burden on those who need to use them.

The second bill, S. 615, which I am also happy to cosponsor would provide a tax credit toward the costs of buying and using television captioning equipment, equipment that would transform a deaf person's television from a silent screen to a subtitled source of information and entertainment. Taken together, these bills address the special needs of our hearing-impaired constitutents, some 14 million people.

Mr. President, in October of 1977, my offices in Hartford and Bridgeport were the first congressional offices anywhere to install teletypewriters. For 3 years now, hearing-impaired Connecticut residents have had ready access to members of my staff. Alternatives—forcing deaf persons to rely on letters or third-person callers—often delay action on urgent problems and all too frequently the deaf person simply gives up and drops out of the democratic process. I submit that this result has tragic ramifications not only for that individual but also for our political system. Government needs the ideas and participation of the physically handicapped. We can encourage rather than discourage their involvement by enacting legislation that will help the hearing-impaired to be heard. I, therefore, urge my colleagues to support the Equal Access to Communication Act of 1981.●

REPORT BY SENATOR CARL LEVIN ON A TRIP TO THE MIDDLE EAST/PERSIAN GULF, DECEMBER 13–22, 1980, UNDER THE AUSPICES OF THE SENATE COMMITTEE ON ARMED SERVICES

● Mr. LEVIN. Mr. President, late last year I traveled to the Middle East/Persian Gulf under the auspicies of the Senate Committee on Armed Services. I did so to study firsthand the complex issues involving that region which have such important ramifications for our own national security.

I would like to take this opportunity to share with my colleagues my main conclusions and reflections from that trip, which took me to Saudi Arabia, Oman, Jordan, Israel, Lebanon, and Egypt.

In doing so, I would note that this report reflects the situation in that region as it existed last December. Events have occurred since then which alter slightly certain specifics regarding some of the issues I address. Even in these instances, I believe the thrust of my remarks remain current.

My report follows:

REPORT BY SENATOR CARL LEVIN

As a member of the Senate Committee on Armed Services, I recently returned from a 9-day Committee-sponsored trip to six nations in the Middle East/Persian Gulf area. This report contains my reflections on the lessons of that trip and on U.S. policies toward that crisis-prone region.

I was privileged to meet during my journey with, among others: Prince Abdullah, Second Deputy Prime Minister and Commander of the National Guard of Saudi Arabia; Colonel (Prince) Fahd-Bin Abdullah, Director of Operations of the Royal Saudi Air Force; Oman's Foreign Minister Qais Abdul Munim Zawawi; Deputy Foreign Minister Yusuf al-Alawi; Wing Commander Harry Guile, Air Member Joint Staff, Omani Ministry of Defense. Also Jordan's King Hussein; Foreign Minister Marwin al-Kasim; Army Commander-in-Chief, Lt. General Zeid Bin Shakir; and Minister of Information Adnan Abu Odeh;

Prime Minister Menachem Begin, and his possible successor in that office, Shimon Peres of Israel; Foreign Minister Yitzhak Shamir; and Maj. General Natan Sharoni, Chief of Plans, Israeli Defense Force;

Lebanon's President Elias Sarkis; Defense Minister Joseph Skaff; Military Chief of Staff (Maj. Gen) Munir Tarabay; and former Prime Minister Salim al-Hoss.

Egypt's President Anwar El-Sadat; Deputy Prime Minister and Foreign Minister Kamal Hassan Ali; and the then Defense Minister, the late General Ahmed Badawi.

I had extensive discussions with our Ambassadors and teams of experts in each of our embassies in these nations, as well as with American businessmen in Saudi Arabia and an official of ARAMCO, the major oil producer there.

For the first time in many years, a U.S. Senator visited Lebanon—a tragic microcosm of all the conflicts of the Middle East. In addition to meeting with the civilian and military officials listed above, I flew to the headquarters of the United Nations Interim Force in Lebanon (UNIFIL) in Naqurah, Southern Lebanon. There, I talked with the force's Deputy Commander, Norwegian Brigadier General Odegaard, and to American Army officers assigned to his staff.

I was able to land aboard one of our two aircraft carriers on station in the mouth of the Persian Gulf—USS Ranger (CV–61)—observe the launch and recovery of her full range of combat aircraft, and talk with her officers and men. In Riyadh, Saudi Arabia we observed the operations of our Airborne Warning and Control (AWACS) aircraft and talked to the officers and enlisted men and women sent to that nation to help it defend its oil resources from hostile air strikes.

I flew to the Musandam Peninsula at the Strait of Hormuz, the very tap on the Persian Gulf oil keg which contains more than half the world's petroleum resources. And lastly, I flew over much of Israel by helicopter to observe that nation's strategic defenses. I was able to land on the west bank of the Jordan River, on the Golan Heights, at an Israeli Air Force fighter base, and also to fly over the existing air bases in the Sinai Desert and the new facilities being constructed in the Negev Desert by the United States for Israel.

These are my principal reflections from these endeavors:

First, the United States has traveled a long way since December, 1979, when the brutal Soviet invasion of Afghanistan underscored the need to improve our military capabilities in the Middle East/Persian Gulf. But these efforts to improve our military capabilities must be accelerated, for we still have a long way to go. Most importantly, there needs to be an immediate renewal of the U.S. commitment to defend our vital interests in the region by whatever means necessary, including force.

That commitment, a proper one in my view, was undercut when many of President Carter's critics contended we lacked the military muscle to keep it. I disagreed with those crticisms then, and my trip further convinced me we have that capability now, although we clearly must improve it further.

Nevertheless, the statements by trumpeteers of doom have created misperceptions about our commitment. Wherever I went on my trip, with whomever I spoke, there was agreement that the Soviet Bear thirsts for Persian Gulf oil, and that only one great power can stand in her way—the United States. There is certainty that a Soviet seizure of Persian Gulf oil would threaten our security, and that of the rest of the Free World, as much as any direct military move Russia might make against us elsewhere.

From my investigations before and after my trip, and from my observations while in the region, there is, at worst, no clear certainty regarding the outcome of any Russian thrust into the Persian Gulf area. U.S. military forces, projected into the region to halt a Russian advance, may, by themselves, be capable of defeating the threat. Moreover, the Russians must consider the role that regional powers, particularly Turkey and Israel, might play.

The sailors, Marines and soldiers—officers and enlisted personnel—that we have on duty in the region at present, and those we could deploy to the area in a crisis—possess significant and powerful military capabilities.

Special mention must be made of the Navy men of the carrier RANGER, in the Arabian Sea, and of the Air Force men and women of the 552nd Airborne Warning and Control Wing (Tinker AFB, Okla.) operating our sophisticated AWACs aircraft out of Saudi Arabia.

The RANGER was a tight, well-run ship, with high morale and a dedicated crew. The 552nd AWCW showed equally high professionalism. The confidence that these Navy and Air Force personnel displayed in their abilities to successfully accomplish their defense mission was impressive.

Since these and our other forces have been operating in the region, these abilities have been enhanced as important operational lessons have been learned, especially in the areas of tactical coordination and command, control, and communications (C^3), according to those military professionals with whom I spoke.

It must furthermore be pointed out that our allies have deployed major naval forces to the region, and that together with our ships, the naval combat capabilities these forces embody outweigh—qualitatively and quantitatively—those of the Soviet naval presence in the area.

That our present military capabilities in the region need improvement is not in question, but there should be no miscalculation and no misunderstanding by the Soviets that America (and her allies) can go to war tomorrow in the region and face them with an imposing array of forces. Campaign rhetoric about supposed American military weaknesses must be put aside and the commitment President Carter made in his State of the Union message a year ago renewed. That commitment, and what it means for the Free World, should transcend politics.

Second, the basic thrust of our current military efforts to address the Persian Gulf/Middle East threats both from external and regional sources appears to be the correct one, although there are certain programs which we should explore, and certain improvements we should consider, to accelerate our near-term posture.

Acceleration of our planning and implementation of the Rapid Deployment Force initiatives is required to give this commitment greater meaning. Programs to better organize, train, equip, and make ready the Rapid Deployment Force should receive high priority. Military construction to improve the utility of our naval/air installation at Diego

Garcia and of the facilities in Oman, Somalia, and Kenya to which we have been granted access should proceed as rapidly as possible.

"Facilities use" agreements, rather than establishment of "permanent bases," seem to be the most acceptable and effective arrangements at this time.

This is especially so in Egypt, where I believe at this time that Congressional insistence on a formal, signed agreement between ourselves and that nation about facilities does not secure any real benefits, and if pressed, ultimately could be self-defeating.

We should accept President Sadat's offer to use airfield and port facilities at Ras Banas (on the Red Sea) for prepositioning equipment and for emergency operations, and we should promptly begin upgrading those facilities.

However, President Sadat told me he would be "crippled" if we seek to make Ras Banas a regular base or insist on a written agreement embodying our limited access.

There is little doubt in my mind that President Sadat is correct—such is the bitter legacy of colonialism in Egypt and elsewhere in the region. We might as well accept that, and the Executive Branch should undertake a renewed, special effort to articulate this more effectively to those in Congress who have insisted on such a written agreement before approving use of funds to upgrade Ras Banas.

U.S. law should be changed, if necessary, so as not to require such an agreement before Congress appropriates money to improve our rapid deployment capabilities overseas. To protect our taxpayers from premature investment of large sums of money, we might consider phasing the military construction program differently.

The new Administration must hammer home the point to Congress that, by dickering about a written agreement for Ras Banas, we already have delayed too long beginning the military construction required to effectively support projection of American military power into the Persian Gulf.

In addition, there were many of us in Congress and the Executive Branch who had harbored hopes or plans that, instead of Ras Banas, we might use for our RDF, Etzion, the existing Israeli air base in the Sinai Desert, which will be returned to Egypt.

President Sadat rejects such use of Etzion, because he wants Egyptian sovereignty in the Sinai uncluttered when that authority is finally reestablished by 1983.

President Sadat says "no" firmly enough, and he has said it often enough, that we should accept his decision and use the next best alternatives instead of pursuing rejected options.

President Sadat also suggests that the Saudis need our presence so much—to protect their Moslem state and monarchical form of government against Soviet threats—that we should be able to insist successfully on at least pre-positioning equipment in Saudi Arabia. The Saudis told me strongly that they will not permit this at the present time, but the new Administration should be sensitive to President Sadat's advice and encourage such an option for the future.

We also should investigate the possibilities of home-porting an additional U.S. Navy aircraft carrier closer to the region.

We should proceed with our near-term pre-positioning program aboard naval vessels and at certain port/airfield locations as fast as possible.

We should renew our investigation of more alternative sites for such pre-positioning and for increased access rights and overflight rights—both in nations currently being considered, but in others as well. These could include Djibouti, Turkey, Pakistan, Bahrain, Israel and Egypt.

Third, we must also revamp our command structure in the Persian Gulf region.

Our Pacific and European Commands (CINCPAC and CINCEUR) presently divide the responsibility for operating forces in the region.

The dividing line is the Iran-Afghanistan border on land and the Strait of Hormuz at sea.

Our Middle East forces needs one military commander—not two. That area is more critical to our security than most areas of the world. We need one command to study and plan for its defense. We need one command to coordinate the operation of our forces. That single command should take responsibility for all of the lands and waters in the Near East, i.e., Persian Gulf, Middle East, Southwest Asia, and the Horn of Africa.

Currently, we have five ships inside the Strait of Hormuz, i.e., in the Persian Gulf itself, controlled by the Commander-in-Chief, U.S. Forces, Europe, CINCEUR, while the two aircraft carrier battle groups a short distance away, just outside the Strait in the Arabian Sea, are operationally controlled by the Commander-in-Chief, U.S. Forces, Pacific, CINCPAC. This is an invitation to confusion at a critical moment when close coordination could decide the outcome. If another example be needed, our four AWACS aircraft in Saudi Arabia are under the operational control of CINCEUR, while on the carriers a few hundred miles away, the tactical aircraft that might respond to the threats which the AWACS' aircraft sensors perceive, are controlled by CINCPAC.

There is no excuse for less than total organizational clarity of command of forces on the same mission in a single interrelated area of such vital importance to the national security of the United States.

The present deliberations by the Joint Chiefs of Staff about the command structure are late in coming, but welcome at last, although inter-service rivalries threaten the decision process.

We should take one other preventative action in the Gulf. Because one of the most effective ways to close the Strait of Hormuz to oil tanker traffic is to mine it (sinking a ship or two won't do it—it is 26 miles wide), we should expand our own efforts to improve our mine countermeasures capabilities and our collaboration with other nations which already are well-established in this field. Serious consideration should be given to accelerating our building a new class of mine countermeasures ships and to taking other measures to counter the threat.

Fourth, our top civilian defense and military leaders should improve their dialogue with their counterparts in that region and with our allies who already are supporting us in this regard, in an effort to better coordinate planning, programming and operations for the defense of the Persian Gulf.

As both a symbol of Free World determination to help the nations of the region protect themselves and as a real mechanism to increase military effectiveness, senior civilian defense officials and military personnel of all these nations should meet regularly to discuss cooperative initiatives.

If possible, the conduct of multi-national military exercises also ought to be considered to augment the lessons learned from past, and to be learned from future, bilateral joint operations. This latter point was stressed by several leaders of nations in the area.

Fifth, as a demonstration of our continued high level commitment to defend our vital interests in the Persian Gulf, we should dispatch the Secretary of Defense and Secretary of State to consult with their counterparts in the Gulf States.

During the Carter Administration, the Secretary of Defense and the Chairman of the Joint Chiefs of Staff both visited the region, and such missions by their successors would provide important symbolic and substantive continuity to our Persian Gulf policies. A complaint I heard during my journey was that no American Secretary of State had visited the region recently, and we should remove this irritation.

Sixth, turning to the prospects for a lasting peace in the Middle East. Because the United States has perhaps the best chance to encourage a settlement between Israel and her Arab neighbors, the President must involve himself deeply in the peace process. American leadership is an essential ingredient in crafting an acceptable, durable peace settlement in this region.

Our historic commitment to Israel, a commitment firmly rooted in the recognition of the vital role she plays as the only democratic state and as our strongest ally in the region, should not be altered in that process. Clearly, Camp David taught us that peace can be achieved by strengthening our friendship with Arab nations without weakening our relationships with Israel.

Camp David taught us more than that. It taught us that peace is possible and that miracles still can take place. The first miracle was breaking the circle of hostility surrounding Israel since its inception in 1948. The agreement between Israel and Egypt has tended to be overshadowed by the difficulties in implementing the accords. But those difficulties cannot be allowed to diminish the significance of the agreement itself. It is precisely that significance which gives us some hope for a second miracle—a framework for resolving the Palestinian issue.

In this context, the difficulties are clearly reflected in the four "principles" for a Palestinian solution supported by many Arab leaders:

1. Withdrawal of Israel from "occupied territories."

2. "Self-determination" for the Palestinians.

3. Recognition of the Palestine Liberation Organization (PLO) as the spokesman for the Palestinians.

4. Secure borders for all the states in the area (presumably including Israel—but that is left to implication).

The internal contradiction of these principles creates problems for Israel's security, and some already have sought to suggest one possible way of dealing with them: direct talks between Jordan and Israel. This approach would, in effect, take the baton away from the Camp David marathoners and pass it to a new combination of runners seeking the finish line of peace. I do not believe such an approach will work at this time no matter how desirable it may ultimately be.

King Hussein will neither join the Camp David process now nor negotiate with Israel. He told me strongly that Camp David is a "dead horse" whose very mention creates a negative reaction in the Arab World. Nor will he bargain separately with Israel. He believes that Sadat's "sin" was recognizing the reality of Israel. Hussein believes that, when Sadat agreed to a separate peace between Israel and Egypt, he removed the real pressure point which could have forced Israel to agree to an "acceptable" solution to the Palestinian problem. Additionally, Hussein is vehement when he claims that no other Arab state will make a separate peace with Israel and that the Palestinians, represented by the Palestinian Liberation Organization, must be a participant in any regional peace process.

It would be ironic indeed if Camp David, which split Arab unity on the fundamental issue of Israel's existence, produced greater

unity among the remaining Arab states relative to a solution of the Palestinian dilemma.

There may be a way to "end run" the problem of how to proceed. While we continue to try to move ahead with the Camp David process between Israel and Egypt, I believe it would be desirable if we shift our Jordanian focus from attempts to involve them in the process to an attempt to try to involve them in defining the shape of a final product or agreement.

King Hussein told me that a few years ago he and the Palestinians discussed what form of government might emerge from a peace seettlement. I found this comment striking since it is at variance with his oft-repeated public position that his interest is solely in securing a process of pure self-determination and not in what that process produces. His discussions with Palestinians included "product," not just "process."

I asked him if he was going to continue such discussions. His response was neither negative nor positive. It is an issue we should explore with him, and I hope the President will arrange such a meeting as soon as possible.

My hypothesis is this: Hussein's exploration of the ultimate shape of an agreement, when combined with previous indications that he favors a confederation with Jordan as the "best" solution to the Palestinian problem, as opposed to an independent West Bank state, suggests a possible approach which might help by-pass some of the sticky "process" issues. We may be able to leap-frog the critical unresolved concern with "how" to negotiate and get right to the act of negotiating. If such an act led to a general agreement on the shape of a Palestinian solution—and agreement between Jordan and the Palestinians and Israel even though they never sat down to discuss it—then the pressure for implementing such a consensus solution might create an environment in which the process problems were less severe and more manageable.

I do not know if this approach will work. But I do know that no approach will work without the active involvement of the United States. Every leader with whom I spoke—including Hussein, Begin and Sadat—agreed that, without the deep involvement of the United States: 1) There would be no second "miracle" and 2) the United States can only be involved effectively if the President personally is involved in the process.

The political and personal risks we are asking the leaders of these nations to take is credible only if the President of the United States is willing to match those risks himself.

The search for the next step to peace will be elusive. It will be like—in the words of one Jordanian leader—looking for a soft spot on a porcupine. (One of the graphic symbols of the political complexity is that Jordan's official maps of the region either leave a blank space where Israel is or call Israel "occupied Palestine.")

But the President must take the risk. The road to peace goes through Washington before it can reach Amman and ultimately to all the nations involved. Only the Russians benefit when the caldron keeps boiling in the Middle East.

My seventh recommendation deals with the complex issue of arms sales to nations in the Middle East and Persian Gulf. My principal impression is that American security assistance programs in the Middle East will continue, for the foreseeable future, to be plagued by conflicting objectives. The military capabilities of key Arab nations (Egypt, Saudi Arabia, Jordan, and Lebanon) need to be enhanced to increase their own self-defense capabilities, particularly against real threats from Soviet surrogates. Yet, we must be concerned about not upsetting the military balance between Israel and her Arab neighbors and about escalating arms inventories in the region.

We seek, through our arms sales, to strengthen our allies without upsetting any regional military balance. Often those who request such sales do so as much from a need to seek physical symbols of our support as from a realistic need for the arms themselves. Our decisions in this delicate area must be based on our goals and not on the psychological (as opposed to real) needs of other nations. Those psychological needs can be satisfied in other ways; our primary need for strength and stability can only be achieved through rational and restricted arms sales. The situations in Saudi Arabia, Lebanon and Jordan may help illustrate my point.

In 1978, the Congress approved the sale of 60 F–15's to the Saudis, after explicit commitments to the Congress that such planes would not be enhanced with offensive equipment so as to present a threat to Israel.

Such offensive equipment included bomb racks and specifically fitted fuel tanks for long-range capability. The Saudis are now requesting the enhancement equipment despite those clear commitments made in 1978.

Sixty-eight members of the Senate, including many who voted for the 1978 sale, signed a letter to President Carter urging him to deny the request for enhanced equipment. President Carter, during the campaign, vowed not to approve any equipment for the F–15's which would give the aircraft "offensive" capability. President Reagan clearly implied the same position during his own campaign.

The threats to the Saudis (and their oil) are many. First and foremost are internal threats from Muslim fundamentalists such as those who took over the Mosque in Mecca, and from some of the Palestinians who work in the oil fields and who are now placated by public statements of support (and money) from the Saudis for the PLO. Offensive armaments for the F–15's will not be useful against such internal threats.

The second most serious threat is an external, commando-like raid against the oil fields.

The fact, re-emphasized to me on my visit to Saudi Arabia, is how difficult it is to protect key points in the oil pipelines running to the tanker ports on the Saudi coast. These are the difficulties which make the Saudis vulnerable to a commando-like assault against which the F–15's are of little value.

A third possible threat is an invasion by Iraq or Iran.

The F–15's, if given greater offensive capability, may be of some greater value as a deterrent to such an invasion. But the deterrent effect of retaliatory air capability was of limited value in preventing an invasion of Iran by Iraq, and Iran's revolutionary madness apparently is not affected by such retaliatory threats, as seen by the hostage seizure and by Khomeni's attempts to stir up the Shia in Iraq and Saudi Arabia to overthrow their "evil" governments.

Giving the Saudis F–15's offensive capability also would threaten Israel and require additional defensive measures on her part to meet the additional threat. Only if one discounts the continuing avowed threats to Israel by Saudi leaders and their continued major financial support of the PLO and its terrorist activities against Israel, and the fact that the Saudis have participated (albeit often late and weakly) in the three Arab wars against Israel, can one be sanguine about the potential use of offensively-capable F–15's against Israel.

The Congress obviously was concerned about that threat in 1978. (The Saudi military argued to me that the 1978 commitments never should have been made in the first place).

The Saudis need our protection as much as we need their oil. Their sheltered way of life, their religious orthodoxy and their monarchy with its billions of dollars of investments abroad can't survive under the domination of Russia or her surrogates.

(This observation also applies to the Strategic Petroleum Reserve. We should get on with filling it. It represents no real competitive threat to the Saudis—it would contain but a few months supply. What it does provide is some limited security for the U.S. against an interruption in supply, and therefore it renders us less of a hostage to those who would interrupt that supply.)

The oil weapon threat must be put in its place. The Saudis must know that we know they need our protection and if they cut off oil to us in response to our filling our Strategic Petroleum Reserve, or in retaliation against us for some other American action of which they do not approve, we would have that much less incentive to protect them against the threatening world they face.

The military sales picture in Lebanon is even more complex. The always precarious balance between Muslim and Christian communities in Lebanon has been upset, perhaps permanently. Lebanon is bleeding to death. The hemorrhaging is caused by the "occupation" and control of parts of Lebanon by the Palestinians, the Syrians, the Christian militias, and Major Haddad, all of whom are more powerful in their areas than the Lebanese Army. The United Nations peacekeeping force is there by the sufferance of those armed elements, and it operates under constraints so narrow as to make it impossible for it to carry out its mandate—to disarm armed elements and keep the peace in the area of their activity.

The future is bleak in Lebanon. There will be no military solution without a political solution to the Palestinian problem, and then only "maybe". The Syrians will have to leave also, as part of any solution.

The Lebanese will be asking for a huge increase in U.S. military assistance. Could such arms sales, for instance of tanks, win back control of Lebanon for the army of the central government? The consensus of the people I spoke with is "no". The most a gradual build-up will provide is an army ready to fill the vacuum in case a political settlement is reached.

We must build up the Lebanese army sensibly, and we must continue to press for a political settlement. But we must recognize how difficult it will be to make even slow progress.

The life of this beautiful nation, a microcosm of the Middle East's problems, is literally at stake. We have neglected Lebanon. Its peoples' sufferings are as obvious as the Syrian tanks which fortify Syrian checkpoints all over the roads.

The UN role and position in Lebanon must be strengthened and the U.S. should initiate discussions in the UN Security Council to determine the possibilities for accomplishing this.

In Jordan, the issue of U.S. arms aid also occupied much of my discussions, and complaints about the late delivery of equipment already agreed-upon by both nations echoed those heard earlier in Oman, and later in Lebanon. Another particularly sensitive issue with the Jordanians is the upgrading of their armored forces with American sub-components and new tanks.

I came away from such discussions frustrated that it has relatively little effect to respond to complaints of late deliveries by explaining the limitations of the U.S. defense industrial base and the fact that even our own forces must wait too long for delivery of needed equipment. There is little understanding of the justified American reluctance to divert needed weapons from our own military inventories to send overseas in foreign military assistance.

There also is the concern expressed in Israel, that sale of additional sophisticated tanks to Jordan could contribute to altering the ground balance of military power between these two nations, and between Israel and the rest of the Arab world.

The complexity of the arms sales issues in Saudi Arabia, Lebanon and Jordan illustrates the competing claims that can be offered both for and against such sales. But those arguments can best be analyzed if we keep in mind that a sale of arms does not inherently enhance American military interests, nor does a denial of arms inherently negate the political relationship that a nation has with the United States. There are other ways to serve the political and military needs of nations; ways which do not involve a threat to the military balance which the United States has a vested interest in preserving in this troubled region of the world.

One major form of such relatively nonthreatening military assistance is the U.S.'s International Military Education and Training Program (IMET). This is perhaps the most cost effective, and least costly, form of U.S. security assistance available. Not only does it *not* entail transfer of more threatening, lethal equipment which might upset a regional military balance, but the exposure to American military and societal values experienced by the foreign students broadens their understanding of our nation and its form of democracy.

Therefore, in considering revisions to the U.S. security assistance budget for fiscal 1982 and the future, we should expand the IMET program for Oman, Jordan, Egypt and Lebanon.

These, then, are the principle recommendations which I have developed from my trip. There are, in addition, several concerns which my experiences in this region lead me to believe should be better explained to the American people.

We must understand the strategic position and external threats to our friends from their perspective. For instance, Oman, "guarding" the Strait of Hormuz to her north has no economic need to keep it open—her oil is shipped from ports located below the Strait. But she is threatened to her west by South Yemen, supported by Russia and Cuba. Another example: Egypt is not pre-occupied with threats from Israel—she is very much concerned about her mortal enemy Libya, which has a power-mad dictator and oil riches to arm herself with Soviet weapons to threaten stability in the region, in general, and in Sudan. Chad and Egypt in particular. Sudan contains a great stretch of the Nile River, before that waterway reaches Egypt. And Egypt considers herself dependent on the Nile for her very life's blood, since her population lives almost exclusively along its banks (the other 98 percent of Egypt is desert).

We must understand the internal dynamics of our allies. The future of Camp David is less likely to be determined in the short run by negotiations between the parties as it will be by Israeli elections (where Begin may try to paint Peres as a supporter of an independent Palestinian state on the West Bank, and Peres will try to paint Begin as someone who, because of an inflexible manner, received too little credit for Israel while giving away much at Camp David). I have already alluded to internal dynamics in Saudi Arabia and Egypt regarding U.S. permanent bases and access rights.

We must unshackle ourselves from some self-imposed restrictions in light of the threat to our interests in the Middle East. For instance, Oman wants our help training its internal security personnel and police. Our domestic law prohibits us from providing such training, although we are allowed to help train its army. I would hope our law could be changed so justifiable exceptions could be allowed, on a case-by-case basis and upon notice to the Congress.

We must seek to avoid sterotypes. For instance, Arab states are much more different from each other than many Americans realize. The totally closed society of Saudi Arabia, fearful of even the slightest "western" influence and dominated by religious orthodoxy, is as different from Jordan as Canada is from Mexico. Another example: stereotypes about the Palestinians place them huddled in refugee camps, and while there are too many of those, other Palestinians have become economically powerful in many Arab lands to which they have emigrated. They are a potent economic force as well as a political lightening rod in the Middle East.

Persian Gulf/Middle East security problems are more complex than many in public and the Congress realize. They extend far beyond the "U.S. vs. U.S.S.R." and "Arabs vs. Israel" to include:

Arab vs. Arab
Religious factions
Modernization strains
Islamic fundamentalism
Resentment still to former colonialism
Palestinians—not only vis-a-vis Israel, but within many nations in region.

Our solutions have to be evaluated from these perspectives as well as the popularly recognized ones.

We have to consider expanding aid in the non-military areas, and coordinate this and diplomatic efforts better with our major European allies and Japan.

Military programs, alone, will not ensure the stability of the Persian Gulf/Middle East. In fact, alone, if not well considered, they can exacerbate the problems.

The basic aspirations of most people involve housing, food and survival. The Strait of Hormuz and Rapid Deployment Forces mean little to the masses of Egypt or to the desperate Lebanese. They are struggling against more immediate threats, and we should help their governments in their efforts to cope with them while we seek their assistance to deal with common problems.

Increased "economic supporting assistance" as part of the FMS program, could help improve the economic development and transportation networks of these nations. There are important to military capability also. Our allies must be encouraged to provide more aid in these non-military areas, along with more direct defense efforts.

Some nations of the region must do more to distribute their oil wealth among their populations, as well as better reconcile the competing desires of their peoples for more democracy with the desires of the rulers to maintain their more monarchical forms of government.

Lastly, we have to recognize that even if we solve some of the many problems plaguing this part of the world, the others, individually or in combination, could well defeat our efforts to promote regional stability.

The complexity of the problems in this region encourage such a pessimistic assessment.●

THE IMPACT OF OIL DECONTROL ON CONSUMER PRICES

● Mr. PELL. Mr. President, the latest Consumer Price Index presents clear evidence the decision to immediately decontrol oil was a huge miscalculation by the administration. The statistics show that energy price increases following decontrol caused another sharp spurt in the inflationary spiral.

Mr. President, according to the Bureau of Labor Standards data released today, the Consumer Price Index (CPI) was 11.3 percent higher than in February 1980. The CPI for all urban consumers rose by 1 percent in February 1981 and data provided by the Bureau of Labor Standards (BLS) indicates that the rising cost of energy—gasoline. motor oil, fuel oil, nautral gas, and electricity, accounts for 60 percent of the increase in the February CPI. In two of the key sections measured by BLS, housing and transportation, the energy factor accounts for the largest percentage of the increase. Unquestionably in the other key area, food costs, the rising energy cost was the biggest factor in any increase.

Mr. President, shortly after President Reagan's decontrol order, the New England Congressional Caucus estimated that immediate decontrol would cost the average New England household an additional $75 prior to October 1 of this year. More recent estimates by several consumer groups, including the Citizen Labor Energy Coalition, have indicated that immediate decontrol will cost the average family an additional $100 to $200 for heat and gasoline this year.

In Rhode Island, Mr. President, the impact of immediate decontrol over the past 8 weeks has been quite clear. Since the administration's decision to decontrol crude oil and gasoline, Rhode Island families have been hard hit with dramatic increases in the cost of both heating oil and gasoline. Where the average price in January for home heating oil, prior to decontrol, was just over $1.20 a gallon, and $1.29 for a gallon of regular gasoline, it is now $1.29 a gallon for heating oil and $1.39 for a gallon of gasoline.

Electric rates are another area contributing to the spiraling cost of energy. Rhode Island electric rates are approximately 160 percent above the national average. It is also my understanding that the rates consumers pay for electricity in Rhode Island are currently the highest in the Nation.

Mr. President, the decision by President Reagan to decontrol oil immediately was unnecessary and has resulted in a heavy burden for many families whose budgets are already stretched to the limit. The latest inflation statistics are ample proof that the President's decontrol of oil has added greatly to the burden of inflation.●

WHAT IS GOING ON AT VIRGINIA MILITARY INSTITUTE

● Mr. SYMMS. Mr. President, with the need for upgrading the military status of our Nation, it is essential that the future leadership of that military be America's best. Some of that leadership will come from military academies such as the Virginia Military Institute (VMI).

Unfortunately, a proposed superintendent of VMI would not lead to the future combat military officers we direly need. Fortunately, for my colleagues in the Senate, I have obtained an advance copy of a magazine article dealing with the background of this proposed superintendent. The article will be contained in the April 1 issue of the Review of the News. under the title, "Military Politics," by Susan L. M. Huck, Ph. D. It deals with the proposed superintendent, Josiah O. Bunting.

As I write this introduction, Mr. Bunting is under fire. He should be. So that my colleagues and those in touch with VMI graduates may know the true story of Josiah Bunting, I earnestly entreat all to read this background and pass the word.

A more likely candidate would be Gen. George S. Patton III, whose father attended both West Point and VMI.

I submit the article for printing in the RECORD.

The article follows:

MILITARY POLITICS

(By Susan L. M. Huck)

Suppose you had sunk a fortune into a ball club loaded with expensive star players and it kept losing. Would you accept the explanation of your expensive coaches and managers that "Times are changing"? Not likely. But if you were to accept that explanation for 30-odd consecutive years, you would surely deserve to be flat broke.

Losing performances have been turned in by our lavishly funded Department of Defense ever since it took that name. The players on the field have changed many times over, but the management team has always been of the same school. So it seems fair enough to cast a critical eye upon that situation.

Readers will be spared a review of my earlier work on the extent to which members of the Eastern "Liberal" Establishment use the Council on Foreign Relations to play musical chairs with top command policy-making positions in the Department of Defense. For details see my articles in *American Opinion* for October 1977 and July-August 1980.

It is important to note that C.F.R members also try to manipulate our military and defense thinking. They do this by placing one member after another in charge of the United States Military Academy, dominating the Social Science Division of the Academy, and trying to have their people in command of the war colleges grouped under Defense University. Besides this, C.F.R. members staff and direct the research institute symbiotically attached to DoD.

Now, just as the country is regaining its Conservative balance, the "Liberal" blight may be spreading to the non-federal military colleges. As we go to press it seems that Virginia Military Institute might soon have a veteran Council on Foreign Relations member (1975–1979) named Josiah O. Bunting III as its new Superintendent. Another candidate for the post, General Sam Walker, was a C.F.R. "military fellow." Under this program, the federal government actually sends high-ranking officers to the headquarters of this private "Liberal" club and then pays the club tuition to learn the thinking of Council members.

As you see, this is a very special private club.

Josiah Bunting is an alumnus of V.M.I. who graduated as first captain and won a Rhodes Scholarship. He makes a favorable impressive appearance. But examination of subsequent glitter reveals a good deal of tinsel, as we shall see.

First let us note that V.M.I., like The Citadel of South Carolina, is in a class with the better-known service academies in the production of top quality officers for our Armed Forces. Not being federally control'ed, they have not yet been strong-armed into going coed, their honor systems have held up better under the waves of propaganda, and in general they have been better able to maintain standards and traditions they consider desirable. We need such schools as V.M.I. because we need good officers, and they are hard to find.

So it is a matter of more than parochial concern when the distinguished general officers available for the Superintendency of V.M.I. are apt to lose out to a man who made his biggest splash in life by feeding the "anti-military" propagandists supporting the Vietcong back in 1972.

Since then, two overlapping networks have taken care of him, wafting Josiah Bunting of Philadelphia from one comfortable and prestigious position to another. One is the Rhodes Scholar network, and the other heavily overlapping the first, is the aforementioned Council on Foreign Relations. How else would college presidencies continue to rain down upon a man with only a Master's degree and but four years of teaching experience?

On the basis of his fine record as a V.M.I. student, Josiah Bunting III received a Rhodes Scholarship, and spent the years between 1963 and 1966 earning a Master's degree from Oxford at what can only be called a very languid pace—and, alas, becoming quite a snob, as is all too evident from his books. Thus did Oxford ruin a good officer.

Those in and out of the Establishment who are alert to manifestations of the tremendous high level effort to create an elitist New World Order know the purpose of the Rhodes Scholarship program. Cecil Rhodes, a key architect of the British Empire, stated openly that the purpose of his program was to groom and indoctrinate non-British citizens so that his One World schemes could, through them, be promoted around the globe. Rhodes Scholars are encouraged to think of themselves as an elite especially qualified to run the world, and they know that their careers will be boosted along by those already in high places.

Heady stuff for a young man. Small wonder that when it came time to go on active duty Bunting found his fellow officers to be crashing bores, uncultured and uncouth, unimaginative, sycophantic, conformist, and so forth.

Bunting's one-year tour of duty in Vietnam would seem enviably privileged to others. He was a company commander for about half the time, and was then promoted to major and became an operations officer at divisional headquarters. It was here that he must have received a massive wound to the ego, because he has been nursing it ever since, at the expense of the Army as a whole.

Not every major can look forward to three years as a West Point professor, but that's the sort of thing which does happen to Rhodes Scholars. As a further sign of high-level favor, Bunting was picked up by the radical Aspen Institute for Humanistic Studies in 1970. A study by the Freeman Institute, drawn from publications of the Aspen Institute, establishes beyond question that this organization feels privileged not only to design the political structure but even the religion for a World Government. One need hardly add that those who propose such things also expect to run the system.

While teaching history at West Point, Bunting was also writing his first "novel," The Lionheads. In common with his later book, The Advent Of Frederick Giles, Bunting's fictional efforts are so autobiographical that you have to wonder which parts are not. (That includes the coarser episodes, too.)

The Ninth Division becomes the Twelfth Division, with the same locaton and misson at the same time as the real-life Ninth, and one can only conclude that Bunting's own objective was to smear some real-life people, particularly his commanding general. This sort of thing is not well received in the Army, so Bunting resigned to become a "Liberal" hero and was duly hailed in Life magazine as a brilliant "man of Letters" who couldn't bear those bloodthirsty clods, his fellow officer, a minute longer.

If one believes the critics and the jacket blurbs, Bunting is saying that his Private First Class Everyman died because the general seeking favor in Washington, moved his unit into place by boat instead of helicopter. When you read the book you discover that the hapless private's misfortune had nothing to do with his means of arrival: Curious.

And here is Bunting feeding lilies to the "anti-military" Leftist book critics by having one otherwise normal officer say that "the nice thing" about some automatic weapons is its slow rate of fire, which ensures that "they can feel each bullet going in." The "Liberal" reviewers loved that, thrilling to its nuances, instead of cynically inquiring as to why the sicko did not use a semi-automatic weapon.

The year 1972 was one of major transition for Bunting—soldier to civilian, to publicly acclaimed intellectual and man of letters, and of course the darling of many people whose hearts belonged to Hanoi.

But not enough of those received the word. On campus after campus where refusal to hire an avowed Communist would lead to vast uproars about academic freedom, Bunting's application for professorial or administrative work was doomed by the Liberal Communist united front that was showing thumbs-down on *all* American officers. Bunting told *Life* magazine,

"It's grotesque. Up here at West Point I'm a running dog commie, and down there I'm a fascist pig."

The "down there" to which Bunting particularly referred was Washington College, in Maryland. The president of Washington College at the time was Charles Merdinger, who had been contacted to help Bunting and was trying to create the position of "assistant to the president" in order to hire him.

Here's how it works. Rhodes Scholar and Council on Foreign Relations member Colonel Amos Jordan, who had spent nearly all his Army years teaching at West Point, and who was retired in 1972 with the rank of brigadier general, put out the word through the network. Merdinger, Rhodes Scholar and retired Navy captain, tried to create suitable employment for distressed Scholar Bunting.

Charles Merdinger declares that prejudice against military officers prevented him from doing so, although he also says that the faculty feared Bunting because "he could have taken any of their jobs."

Since neither the Navy captain nor the Army major were prepared to fight to guarantee former American officers the same rights as Communists, they were routed by half a dozen V.C. sympathizers and their deluded student rabble. But it all worked out for the best, Merdinger says, because Rhodes Scholar and Council on Foreign Relations man Stansfield Turner came through. Vice Admiral Turner was then president of the Naval War College at Newport, Rhode Island.

Despite the written objections of many top officers at the Naval War College—objections which seem to have been read by Bunting, despite having been addressed to Turner—Josiah Bunting was granted "a full chair in history." Discussing the matter with a sympathetic interviewer, Bunting described what protesting officers "saw to be my various sins against the country and the Army." Nevertheless, although "they think I'm the antichrist up there," Bunting was ensconsed at the Naval War College. Naturally he did not tell anyone how it was arranged through the Rhodes Scholar network.

In 1973 the certifiably "Liberal" Bunting was made president of Briarcliff College, a girls' school outside New York City . . . suggest that it was the network again. Bunting kept in the public eye by being interviewed by Bill Moyers (C.F.R.) on public broadcasting, by having Mayor John Lindsay (C.F.R.) grace the campus, by being named

a "contributing editor" of Harper's magazine on the basis of one (1) article, and so forth. He was admitted to the Council on Foreign Relations in 1975.

When under his care Briarcliff went bankrupt in 1977 and was purchased by Pace University, Bunting moved on to the presidency of Hampden-Sydney, a small all-male college in Virginia.

One caution about Bunting is that he has never stayed put very long. He represents an investment to the "Liberal" networks which have been moving him along, and they may decide, for example, that he would do them more good on the political scene.

What would Josiah Bunting do to V.M.I. if afforded the post of Superintendent? Quaintly, Charles Merdinger reminisced about how he had himself wanted to transform Washington College into a little Oxford, and suggested that Bunting shared his dream. Nothing came of it, in that case, but it's a thing to watch. In both his books and public statements, Bunting keeps jumping up and down on the subject of bringing culture to the officer corps.

Now culture is a very good thing, unless what is really meant is typical "Liberal" snobbery. We have mentioned Bunting's snobbery. His second book, *The Advent Of Frederick Giles*, contains a treasure house of examples. For instance, we discover that nobody worth a fig ever came from Oklahoma, Kansas, South Dakota, or even suburban Chicago.

When Bunting wishes to create a "Middle American," his acute powers of observation flit and hang in a closet, bat-like, until he is finished. Bunting uses his straw-man's American flag tie-clasp like a bell, tinkling it to get "Liberal" glands salivating in anticipation of the great intellectual slaughter Bunting is about to wreak upon its wearer.

The wearer of the American flag tie-clasp, who also doesn't like Commies and says so in mixed company, is *exposed* by author Bunting, you see, as a *poseur* who fakes his familiarity with literature and philosophy. Bunting catches him mouthing a comment off the *dust jacket* of a book, and discovers that he engages in premeditated vocabulary building.

But what have we here?

When Bunting is being a music snob, he can tell me anything. I only know that *obbligato* looks better with two B's. That's minor compared to the fact that, in Bunting's books, invitations are "wrangled," opinions "live," and women even carry "pockabooks"! Well, well, who is the ignorant oaf now? The first compassionate reaction is to ask why the entire editorial and proofreading staffs of a major publishing house were out to lunch when those bloopers went by. A compassionate follow-on thought is that perhaps they were not out to lunch at all, but lying on the floor exhausted after catching countless other fluffs.

It is the *level* of the bloopers that is most appalling. Can you imagine the president of Briarcliff College thinking that women carry *pockabooks*? So much for the flawed foundation of Bunting snobbery.

Aside from that, a reading of his written output leads to the conclusion that he has been playing "Liberal" chopsticks for the past 10 years, hitting the same few notes with the same two fingers. Too bad. If he hadn't been carried off to Oxford, he might have remained an officer and a gentleman and made a very fine Superintendent of the great Virginia Military Institute. ●

RECESS UNTIL 9:30 A.M. TOMORROW

Mr. BAKER. Mr. President, I know of no further business to come before the Senate. I move, in accordance with the order previously entered, that the Senate stand in recess until the hour of 9:30 a.m. tomorrow morning.

The motion was agreed to and, at 7:13 p.m., the Senate recessed until tomorrow, Wednesday, March 25, 1981, at 9:30 a.m.

EXTENSIONS OF REMARKS

IN SUPPORT OF AN APRIL ADJUSTMENT

HON. STEVE GUNDERSON
OF WISCONSIN
IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 24, 1981

● Mr. GUNDERSON. Mr. Speaker, on Thursday of this week the House will consider H.R. 2594 to eliminate the April adjustment in dairy price supports. I am gravely concerned that consideration of the adjustment alone without concurrent consideration of all other factors that influence the dairy industry may lead the Congress into making a hasty decision which it will regret in the not too distant future.

I would, therefore, like to bring all of the relevant economic factors to the attention of the House so they may see why the elimination of the April price adjustment is unwise and, yes, unwarranted.

Mr. Speaker, we are today at the crossroads of our country's economic future. In recent years our fiscal policy has promoted excessive Government spending and has led to skyrocketing inflation. Our monetary policy has promoted high interest rates. The American people and their economic systems cannot long endure this duel pressure.

I sense a strong commitment on the part of the American people to change our current economic situation. Yet, if we are, in fact, to realize a new beginning for our country, the farmer must be the cornerstone of our efforts.

Have we ever really considered how fortunate we are to live in a country with efficient, productive farmers? The productivity of the American agricultural community has helped the American consumer in his battle against inflation by providing a sufficient supply of wholesome agricultural commodities at a reasonable price. Additionally, any extra production has assisted our balance of trade in a time when foreign imports far exceed American exports.

Because of the crucial role the farmer plays in the American economy, it is important that the Congress does not enact legislation that would restrict, inhibit, or discourage the agricultural sector.

But that is exactly what H.R. 2594 will do if it, indeed, becomes law—discourage the young and beginning farmer from entering or continuing in the farming industry. This would be particularly devastating to the dairy farming community since the average age of dairy farmers is now 55 years old.

This point was exemplified in a March 20 front page article of the Wall Street Journal which stated:

> Farmers have been getting out of dairying in droves. There are currently about 170,000 U.S. dairy farmers, down 35 percent since 1969, and a proposal by the Reagan Administration to hold down dairy price supports could hasten the departure of more dairymen.

Nevertheless, the administration insists that the elimination of the April price adjustment is necessary to cut down on the cost of the dairy price support program and to limit the overproduction which has resulted in Government stockpiles of dairy products.

It is a simple economic fact that the proposed elimination of the April price adjustment will not accomplish what it is advertised to do. Further, any action, such as the elimination of the April price adjustment, that might cause a major shift in U.S. dairy production could also have a very negative impact on consumer prices in this country in the future.

Dairymen and economists both agree that maintaining the present price support level or, for that matter, lowering the current price level will not decrease production in the short run—8 to 12 months—as predicted by the USDA. Bred dairy animals simply do have a financial viable alternate use. They will freshen and be milked. Additionally, overhead costs continue.

Simply stated, production will increase in the short run so as to recover the decreased commodity profit over a greater amount of production. Needless to say, this will negate a good portion of the projected savings to the Federal budget in the immediate future.

This can only spell further trouble for the dairy price support program. When the arbitrary stopgap measure proposed by H.R. 2594 fails to accomplish its intended purposes of cutting dairy production and Federal spending, the next proposal will probably be a reduction in dairy price supports to 60 or 65 percent of parity.

In short, those of us who seek to preserve a fair price support program, of benefit to the farmer and consumer alike, are being thwarted by those who are unwilling to consider all of the issues that affect the dairy farmer as a package.

Mr. Speaker, there is a way in which we can reduce the present Government stockpiles of dairy products and the Federal cost of the dairy price support program without injuring the productivity of the American farmer or discouraging the young and beginning farmer from entering the farming industry.

First, the April price adjustment must not be eliminated. Rather, the entire price support system must be considered as a package with, not separate from, the following points.

Second, immediate action should be taken to stop the unrestricted importation of casein for human consumption. The use of casein as a substitute for dairy products has a direct effect on the cost of the dairy price support program and the current Government stockpile of dairy products.

Third, greater attempts must be made by the Federal Government to promote and export American dairy products. A recent trade mission to Mexico and Central America by Wisconsin Secretary of Agriculture Rhode indicated that a potential market exists for nonfat dry milk in this area because of the changing world supply situation. Such exports of American dairy products could occur with a very limited subsidy. Needless to say, such exports would greatly diminish present Government stockpiles and prevent such stockpiles from occurring in the future.

Fourth, the buy-back level for dairy commodities should be increased. In today's current economic and high interest rates, it is unrealistic for the Federal Government to sell commodities back to the manufacturer at 105 percent of the purchase price. The amount should be increased to at least 110 percent. This will encourage more products to be in private hands as well as greater sales efforts of those products. Government costs will also be reduced accordingly.

Fifth, the request for a hearing on proposed changes in the Federal milk marketing orders as they relate to reconstituted milk should be denied. There is already a sufficient option to the consumer with the fast-mixing powder which is widely available in the regular food distribution chain presently.

Finally, it is important to emphasize that the dairy price support program has worked for the purpose it was intended. It has guaranteed an adequate supply of wholesome dairy products to the consumer. It has further guaranteed that the price of dairy products is reasonable and free of wide shifts in price which often occur with commodities. One only needs to look at the market for peanut butter and citrus fruits this year to realize how important it is to the consumer's interest to avoid wide shifts in price.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

Therefore, I urge the House not to take any action on dairy price supports and, particularly, the April price adjustment without completely considering all of the points I have raised as an entire package. They are, indeed, all interrelated.●

THE CHILDREN OF ATLANTA

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 24, 1981

● Mr. MAZZOLI. Mr. Speaker, today, the American people are confronted with an unfortunate human tragedy; 23 black children linked by brutal murder or disappearance are the center of national concern. However, this is not solely a black problem; it is a national problem.

There is little or no evidence leading to the murder or murderers of these children. Thus, young children and families in Atlanta and throughout the Nation are held hostage to their fears and apprehensions.

I would add that these brutal murders come during a period where violence against minorities has increased dramatically. This violence has taken an emotional and psychological toll on the minority communities affected.

We do not know whether the killings in Atlanta are racially motivated. But we do know that they are tragic, regardless of the color of the victims or the murderers. We also know that these murders must be stopped.

I commend the administration or President Ronald Reagan for increasing Federal activity in conducting the investigation of the deaths of the children in Atlanta and for providing needed financial assistance.

Following, is a brief speech delivered by 9-year-old Erika Lomax of Keene Elementary School in Northeast Washington, D.C., at a memorial service for the slain children.

It is only fitting that the words of a child could bring us closer to the meaning and impact of the deaths of these children.

The speech follows:

COMMENTS OF ERIKA LOMAX AT THE MEMORIAL SERVICE FOR THE SLAIN AND MISSING ATLANTA CHILDREN

Distinguished Guests, Families, and Friends, I am truly honored that I have been given the opportunity to speak to you today.

I am only sad that we are not here for a joyous occasion, but one that has shocked the Nation and filled our hearts with grief.

But in my own way, I feel that I must speak out to say only what is in my heart.

I am a child, special in my own way, as unique as each star that shines in the heavens.

I look forward in my life to growing up. I will someday graduate from school, go to college, have a career, a marriage, and children. A cycle that must go on, for this is the way of the world. But stop for a moment, and think of the children of Atlanta the harmless children, who have died a cruel death at the hands of some unfeeling monster. That someone who to this very day roams free to kill children, that someone who has made us all afraid. Afraid of the stranger who walks behind us on the way from school, who brings fear when we are alone for a moment away from the protecting eyes of our families.

I think about those children who have died in Atlanta. I know that they will never graduate from school, go to their first dance, to college, have a career, a marriage, or families. I say to myself, Dear Lord, who has the right to take away the joys of childhood? And isn't it a shame that this killer haunts us like a shadow in the night? That killer will teach us many things, like how to be afraid, how not to trust, and how to hate, because we don't understand why someone would kill. We are taught that bad people die, does that mean that those little children were bad? I don't think so.

Never forget the children of Atlanta, they were just like me, they were your son's, your daughter's, your brother's, your sister's, the little kid next door, the playmate on a rainy day, someone you could tell your secrets to, or argue with, about any little thing. They were children who could laugh, cry, dance, and above all, Love.

Never forget that most of the things that children want from life, are the simple things.

We just want to learn, have fun, make friends, and have people love us, and most of all, we want to grow up!

I would like to close by saying this to the children that have died in Atlanta.

We shall not forget you, we shall forever mourn your loss, perhaps you have gone on to a better world, for you are, and forever shall be children of God.

No one will hurt you now, no one will cause you tears, for I know deep in my heart that you rest in the arms of the Lord, and there you will be children again.

Play in the skys of heaven, dance in the clouds and the wind, let the angels be your playmates, and know you are forever loved.●

MASSACHUSETTS STATE SENATE ADOPTS RESOLUTION ON EL SALVADOR

HON. BARNEY FRANK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 24, 1981

● Mr. FRANK. Mr. Speaker, people around the country are questioning the wisdom of the administration's policy of military support for the junta in El Salvador. If we review the magnitude of the violence during the last year, and the role of the military and paramilitary forces in perpetrating that violence, it is not hard to understand why U.S. support for the regime should be curtailed. U.S. support for the Government of El Salvador is tantamount to U.S. endorsement of the regime's abhorrent human rights record. Besides this important moral factor, support for the existing regime strengthens that arm of the Government over which the President has the least control—the military. Do we really wish to condone the continuing violence of the military that we can expect with this flow of arms?

The people of Massachusetts, by means of a resolution adopted by the State senate, has called on the Congress "to withdraw further United States support to the military junta in El Salvador, and to cease any military intervention by arms or other support . . ." I commend the resolution's author, Senator Jack H. Backman, and urge my colleagues to consider this compelling statement. The resolution follows:

RESOLUTION MEMORIALIZING THE PRESIDENT AND THE CONGRESS OF THE UNITED STATES TO WITHDRAW MILITARY AND OTHER ASSISTANCE FROM THE PRESENT GOVERNMENT OF EL SALVADOR

Whereas, eight United States citizens, and over eight thousand civilians, including the archbishop of San Salvador have been killed in El Salvador in the past year; and

Whereas, many of those killed were the victims of the military and paramilitary forces of the military junta which has taken control of the Government of El Salvador; and

Whereas, Archbishop Romero, before he was assassinated, made a special plea to the United States Government to cease its support of the military junta of El Salvador; and

Whereas, direct and indirect United States intervention will lead to serious regional warfare, increasing the already acute suffering of the majority of the citizens of that embattled nation; and

Whereas, the present military junta in El Salvador is not supported by a majority of the population, but relies for its survival on the strength of the military forces; now therefore be it

Resolved, that the Massachusetts Senate requests the President of the United States and the Congress of the United States to withdraw further United States support to the military junta in El Salvador, and to cease any military intervention by arms or other support; and be it further

Resolved, that the Massachusetts Senate appeals for a cessation of further violence and for establishment of full respect of human rights in El Salvador; and be it further

Resolved, that copies of these resolutions be transmitted forthwith by the clerk of the Senate to the President of the United States, the members of the congressional delegation from the Commonwealth and the Secretary of State.●

GENESEE CHAPTER DAR PRESENTS ITS GOOD CITIZEN AWARDS

HON. DALE E. KILDEE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 24, 1981

● Mr. KILDEE. Mr. Speaker, each year the National Society of the Daughters of the American Revolution presents its Good Citizen Award

to outstanding high school students. The Genesee Chapter DAR, located in Genesee County, Mich., recently presented its awards to 25 area high school students led by Ernane Jung of Carman High School, the State winner. I offer my congratulations to these young Americans who have been honored by the Genesee Chapter DAR. The other winners, and their high schools, are: Beth Boyer, Swartz Creek; Cheri Cain, Hamady; Duane Chizmadia, LakeVille; Catherine Collins, Capac; Rhonda Councilor, Our Lady of the Lakes; Kimberly K. Dean, Flushing; Mary Desrochers, Flint Central; Shelly Edgerly, Kearsley; Jeanne Fowler, Flint Northern; Beth Heinrich, Ainsworth; Curtis Jablonski, Mt. Morris; Deidre Lentz, Bendle; Eileen Merrell, Bentley; Cathleen Miller, Genesee; Maureen Miller, Atherton; Julie Ann Nasser, Clio; Cindy Reinhart, Hill-McCloy; Tenee Smith, Flint Northwestern; Gwen Athene Tarbox, Flint Academy; Regina Watson, Powers; Monica Wooley, Beecher; Theresa Ann Worrell, Michigan School for the Deaf; Carolyn Yurko, Yale; and Judy Kay Zurakowski, Richmond.●

INTRODUCTION OF FAMILY PLANNING LEGISLATION

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 24, 1981

● Mr. WAXMAN. Mr. Speaker, today I am introducing a bill to reauthorize the family planning, adolescent pregnancy, and genetic disease programs. These programs are exceptionally important because they focus on the education and counseling of young people to avoid unwanted dangerous pregnancies and to assure healthy babies when pregnancy occurs.

The sections dealing with the family planning program (title X of the Public Health Service Act—PHS Act—make no changes in the statute, simply reauthorizing funds for fiscal years 1982 through 1985. I have reduced the authorization from approximately $408 million in fiscal year 1981 to $281 million in fiscal year 1982, a reduction of 31 percent. In these times of budgetary constraints, it is important that we authorize no more that is necessary for the efficient operation of the programs. The prohibition on the use of title X funds for abortion is continued.

Family planning is an important program and is cost effective both in human and monetary terms. It is estimated that there would be an additional 900,000 pregnancies a year were it not for this program. This would mean many more unwanted children, a larger number of people on the medicaid rolls, and more abortions—none of which are desirable or indeed acceptable.

I believe it is also necessary that family planning remain a Federal rather that State program. Is is mainly an education and counseling program, rather that one providing treatment. These fuctions should not be performed haphazardly. There should be a uniform Federal policy. It is unlikely that the program will be self-supporting: the population the program services is generally without discretionary income; they need to be encouraged to understand and seek services rather than face financial barriers to receiving them.

Further, the data base must be national for us to determine the effectiveness of the program and the need, if any, for continuing it past 1985.

Section 2 of this bill deals with the Genetic Diseases Act. It authorizes funds for fiscal years 1982 through 1985, without substantive change. The 1981 authorization of $35.5 million reduced to $18 million, a decrease of 49 percent. This section also makes clear that Congress considers sudden infant death syndrome to be included in the definition of genetic diseases.

The genetic diseases provides testing, counseling, and treatment for individuals. Through this program, we are learning more about the factors which may cause a child to inherit a particular disease, which diseases may be genetically related, and how to treat and ultimately prevent such diseases. An important part of this program is testing and counseling for pregnant women. Discovering the presence of or potential for a particular disease while a fetus is in the womb can allow a physician to treat the fetus or to send the prospective mother to the proper medical facility when she gives birth. The child will have a much better chance of survival and leading a productive life if the necessary specialists and equipment are available at the time of delivery.

The genetic diseases program also allows parents to receive prenatal counseling so that they will be better prepared to deal with any abnormalities found at birth and any that might be expected to develop later on. Also, for some parents, the advance information that their child will be born with a horrible and incapacitating defect may mean that they will be able to consider the option of terminating the pregnancy. We all have heard heartbreaking stories of the mother waiting to be told she has a healthy baby only to find the baby has a condition which could have been treated before birth or immediately thereafter. Instead, the parents and child may suffer life-long agony needlessly or the child may die. There are few things more tragic or harder to accept than those which could have been prevented, and the resulting feeling of dispair and guilt must be unbearable. It is unacceptable that people should suffer in this way when we may have the means to prevent it.

Section 3 transfers the adolescent pregnancy program from title VI of the health services and centers amendments of 1978 to title X of the Public Health Service Act, where it logically belongs. A number of technical changes were included, although no requirements were changed. We did, however, delete section 601, the findings and purposes, because if needed at all, it belongs in the report language to clarify congressional intent rather than in the statute.

As in the other programs, we have reduced the authorization for adolescent pregnancy significantly. The 1981 authorization of $75 million is decreased to $14 million for fiscal year 1982, a reduction of 81 percent. The prohibition on the use of these funds for abortions is continued.

The adolescent pregnancy program focuses on assisting communities to provide counseling and treatment to pregnant adolescents in the hope of assuring healthy babies. The program also provides counseling to adolescent parents and parents-to-be to help prepare them for parenting, referral to appropriate educational and vocational services, adoption counseling and referral, and referral to appropriate pediatric care. Supplemental services of child care to enable the adolescent parent to continue her education or work, consumer education and homemaking, counseling for family members—such as the parents of adolescent parents—and transportation are also included in the program. Provision of these services will result in healthier children, prepare adolescents to be better parents, and assist in keeping them off the welfare rolls.

I strongly believe the programs contained in this bill to be both valuable and cost effective. These programs have been consistently supported by Members on both sides of the aisle. I hope and expect that support will continue.●

LEGISLATION TO RAISE THE SOCIAL SECURITY RETIREMENT AGE

HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 24, 1981

● Mr. GREEN. Mr. Speaker, today I am introducing the Retirement Age Reform Act of 1981, which has the support of five of my colleagues. It is apparent that the social security system will be experiencing serious financial problems as we move into the next century, and I believe it is neces-

sary to make proposals which will remedy the long-run situation without hurting today's senior citizens. I believe my bill, which would gradually raise the retirement age from 65 to 68, is a reasonable and necessary solution to the financial problems which the system will be facing in the coming decades, and will make the system sound for the retirees of the next century.

Demographic changes in the makeup of our Nation have created a need for a thorough examination of the social security system. When the system was first created in 1935, there were 11 workers paying into the system for every 1 drawing out. Today, there are three workers paying for every one. By the year 2030, when the children of the post-World War II baby boom will have passed the age of 65, there will be 1½ workers supporting each retiree. Our system is destined to collapse unless some action is taken to offset the changes which are expected to take place in the nature of our population.

The legislation I am introducing proposes to raise the minimum age at which an individual may collect maximum social security benefits by 3 months every year for a period of 12 years, beginning in the year 2000. In this way, the increase would not affect anyone who is currently retired or is contemplating retirement within the next few years. At the same time, it recognizes that individuals live longer, healthier lives than they did when the system was first created. This proposal would shorten the number of years which an individual spends as a retiree by postponing the year at which an individual may collect benefits. In this way, it shortens the number of years for which the system is currently obliged to pay. Earlier retirement after age 62 would continue to be available with actuarily reduced benefits.

This change also recognizes that in the future, relatively few people would otherwise be paying into the system, and a relatively great number taking out. I think it makes sense to work a bit longer and be secure with the knowledge that benefits will not be cut, nor will taxes be increased. I urge my colleagues today to consider my legislation carefully, as I feel it seeks to make the social security system sound and secure for retirees of the next century.●

THE INSTITUTE OF INTERNATIONAL EDUCATION

HON. BILL ARCHER

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 24, 1981

● Mr. ARCHER. Mr. Speaker, on the occasion of their annual national council meeting in Washington on April 26-28, 1981, I would like to call to the attention of the House the Institute of International Education. The IIE is an example of an organization which provides an extremely valuable service to the Nation and it is particularly appropriate to make new Members aware during this period of transition of the value of such organizations in building a positive U.S. image abroad. At a time when the Soviet Union spends twice as much as we do on programs of educational exchange and public diplomacy, the efforts of private organizations such as IIE to build productive U.S. relations with other countries should be actively encouraged. Its activities are coordinated by the institute's national headquarters in New York City and carried out by U.S. regional offices in Atlanta, Chicago, Denver, Houston, San Francisco, and Washington, D.C., and by overseas offices in Latin America and Asia.

IIE was founded in 1919 in the aftermath of World War I. Its assigned task was the promotion of international understanding through international educational exchange. Today IIE carries out this mission through the exchange of students and scholars, knowledge, and skills between the United States and 130 countries.

IIE is perhaps best known for its administration of the U.S. International Communication Agency's mutual educational exchange program, the Fulbright fellowships for U.S. and foreign students at the predoctoral level. Year after year IIE is successful in attracting hundreds of thousands of dollars of support for this program from universities, corporations, and other nongovernmental sources, a remarkable record of public and private sector cooperation for the public good.

The Institute of International Education also conducts some 200 additional programs for other U.S. Government agencies, foreign governments, international organizations, foundations, corporations, and educational institutions. Altogether IIE assisted some 8,500 American and foreign students, distinguished international visitors, and research professionals on technical assistance projects overseas during the 1980 academic year—a notable record for a private nonprofit agency and a major contribution to the development of international understanding.

In addition to its role in the mutual educational exchange program of the U.S. International Communication Agency, IIE administers a portion of USICA's international visitors program, which brings distinguished foreign visitors to the United States from over 100 nations each year. The intent of the program is to increase the knowledge of the United States of influential citizens of other lands. Alumni of the program have occupied hundreds of cabinet positions around the world.

IIE offices in Washington, D.C., Denver, and Houston are particularly active in support of the USICA international visitors program which relies on community agencies to organize the local contracts of its participants. These three offices each year assist over 2,000 distinguished visitors from other lands. They insure a positive exposure to U.S. communities as well as a productive professional experience for distinguished foreign government officials, university professors, journalists, labor leaders, and representatives of many other walks of life. There efforts significantly affect the U.S. image in over 100 countries.

IIE assists the "Green Revolution" centers, the international agricultural research centers around the world that have developed the miracle grains which hold the best hope of adequate food supplies for the less-developed nations. The institute administers many projects for the Ford Foundation, and is active as well on behalf of the Agency for International Development, the Rockefeller Foundation, and numerous other supporters of educational cooperation and of developmental assistance.

By administering programs for such sponsors, IIE is able to make a major impact on international relations through cultural diplomacy. Its programs expose both the current and the next generation of leaders of other nations to the values of American society, and offer training other countries need to build their own societies. Research conducted through IIE-related projects is having a major impact on increasing the world's food supply.

IIE also serves the public and American higher education through its educational services—public service activities supported through contributions. Through educational services, IIE brings information and counseling to some 200,000 American and foreign students each year and provides over 50,000 copies of its many publications to students, educational institutions, counseling centers, and libraries all over the world.

IIE's educational services include conference programs, scholarship programs, and many other activities that bring needed assistance to organizations and individuals concerned with international educational exchange. As the central clearinghouse for information about exchange in the United States, the Institute of International Education plays an important role in making productive educational relationships a reality.

IIE has a special relationship with American colleges and universities, some 500 of which are affiliated with the institute as IIE Educational Asso-

ciates. IIE assists American higher education in many ways.

The institute's overseas offices in Latin America and Asia provide on-the-scene assistance in interviewing and screening applicants overseas for American colleges and universities, and dispense information on U.S. higher education to tens of thousands of foreign students each year. They offer orientation programs, testing facilities, libraries, and catalog collections, and in general act as overseas ambassadors for American higher education.

IIE's regional offices in the United States function strongly as service agencies in international affairs for the areas in which they are located. Originally these offices were founded to link IIE more closely with the colleges and universities throughout the United States that are the institute's partners in educational exchange, and to bring together local citizens and international students in activities that would give these students a better knowledge of this country and improve Americans' understanding of other cultures.

The growing need in today's world to increase all citizens' awareness of international affairs has broadened the focus of IIE's regional offices. Seminars and conferences, programs for schools and rural communities, exhibits, presentations are among the citizen education programs of IIE's regional offices. This is in addition to the ongoing assistance to colleges and universities. Regional offices advise and consult about international education; work closely with campus study-abroad advisers, foreign student advisers, admissions officers, and the individual student, and make available the full range of IIE publications and information services.

The Institute of International Education, its staff in the United States and around the world, and the thousands of volunteers who give of their time and energy on behalf of international cooperation together form a significant national asset.

It gives me special pleasure to salute the Institute of International Education and to express the hope that this fine organization will continue its tradition of effective service to the Nation and the world for many years to come.●

A CITATION WELL DESERVED TO VIRGINIA T. TORELLI

HON. GEORGE C. WORTLEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 24, 1981

● Mr. WORTLEY. Mr. Speaker, in these times of global strain and stress, it is well to note individuals, especially praiseworthy, whose efforts ease tensions, educate young minds, provide comfort, break down barriers of ignorance, allay problems with resolve and hope, and exemplify the brotherhood of man.

Such a person is Virginia T. Torelli of Manlius, N.Y. She is the director of the international student office at Syracuse University and, I am proud to say, a constituent of mine.

Her work is the principal reason, perhaps, the only reason, for the successful program for foreign students at the university.

In a manner which is at once tender and firm, Mrs. Torelli has been a friend and counselor to foreign students during traumatic moments. She has been to them a source of strength through episodes of fear and duress, and to the community she has been an intelligent adviser and an effective administrator.

She does her work quietly, calling no attention to herself. It is fitting that we Members of Congress recognize her eminent example and excellent achievements and that Syracuse will soon award her a citation for distinguished service. The honor is indeed deserved.●

ELIMINATING AN ADJUSTMENT WILL NOT DIMINISH PRODUCTION

HON. STEVE GUNDERSON

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 24, 1981

● Mr. GUNDERSON. Mr. Speaker, yesterday I attended a field hearing of the Livestock, Dairy, and Poultry Subcommittee of the House Committee on Agriculture in Dubuque, Iowa. At that time testimony was received from Mr. Corliss J. Hendrickson of Beldenville, Wis., as to the effect of the elimination of the April price adjustment on the average dairy farmer in Wisconsin.

Mr. Hendrickson pointed out that, according to a report in the December 29, 1980, U.S. News & World Report, the price of whole milk increased 6.9 percent during 1980. Needless to say, much of this increase went to wholesalers and retailers rather than the dairy farmer.

Mr. Hendrickson then noted the following changes in the cost of production of his dairy farm from March 1980 to March 1981 based upon prices at the Farmers Union Cooperative in Ellsworth, Wis.:

ELLSWORTH FARMERS UNION COOPERATIVE RETAIL PRICE COMPARISON

Product	March 1980	March 1981	Percent increase
Superlube 518 oil 30 gallon drum	$104.20	$118.59	13.8
Regular gas	1.19	1.32	10.9
Diesel fuel	1.03	1.20	16.5
18.3–34 rear tractor tire	381.05	402.80	5.7
Thimet insecticide (lb)	0.72	0.87	20.8
Aatrex 80 W herbicide (lb)	1.81	2.17	19.9
Sutan plus herbicide (gal)	16.75	20.20	20.6
Drinking cups (ea)	20.95	26.43	26.2
TBZ	14.49	16.60	14.6
Combiotic penicillin	6.25	7.20	15.2
Super 721 alfalfa seed (lb)	2.10	2.35	11.9
Ladino clover (lb)	2.40	3.50	45.8
0–0–60 fertilizer (ton)	128.00	140.00	9.4

The proponents of the elimination of the April adjustment in dairy price supports insist that dairy production will go down as a result of their efforts. Such an assumption ignores the obvious.

With skyrocketing costs of production, such as those experienced by Mr. Hendrickson, the dairy farmer will have no choice in the shortrun but to increase production so as to recover the diminished commodity profit over a greater amount of production. This will, of course, only add to the current Government stockpiles of dairy products.

In short, the elimination of the April price adjustment will have just the opposite effect of its intended purpose.●

FREEDOM OF INFORMATION ACT

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 24, 1981

● Mr. MAZZOLI. Mr. Speaker, I commend to the attention of my colleagues the following article by Jack Valenti which appeared in the March 13, 1981, Washington Star, entitled "Too Free With Our Information."

Mr. Valenti makes valid points about problems caused by the Freedom of Information Act to the Nation's intelligence agencies.

The Freedom of Information Act needs to be amended and hearings on this issue, supplementing those held last year, will be conducted in the weeks ahead by the House Intelligence Committee.

The article follows:

TOO FREE WITH OUR INFORMATION

I spent some time recently in Western Europe chatting with key European officials, including several in the intelligence services of Great Britain and France. They seem persistently nonplussed by peculiarities in the American spirit, centered mostly on our Freedom of Information (FOI) Act and the porous quality it confers on the FBI and the CIA.

As one foreign official put it to me, "I daresay none of my colleagues today would pass on to the Americans sensitive data about the work of our operatives on the Continent—or even hint at anything which

would identify agents we have in the field. It would be suicide for our people. It is already deadly to your own."

Another said, "How on earth can you possibly collect and hold intelligence which may slip into foul hands simply because someone you do not know writes in and asks for information? How you can have an intelligence organization that routinely gives away its files passes my understanding."

It isn't enough, they complain, that material extracted from the FBI and CIA with Freedom of Information requests is put through a sifter that supposedly culls out secret material. They point out that people are processing so many requests that human error makes it literally impossible to expunge all that is not designed to be made public. Slippage is inevitable—and when it happens, the irretrievable occurs.

The intent of the FOI Act is laudable. Light thrown on dark crannies of the government usually illuminates a good many practices that should be corrected. But a balance is required, say these Europeans.

CASUAL MADNESS

It is one thing, they point out, to probe the Department of Labor or Transportation for information, but to uncork the files of the FBI and the CIA is a kind of casual, and they hope momentary, madness.

The FBI received some 18,800 requests for information in 1979, and the CIA recorded some 14,000 requests since 1975. No one can be certain how many of the CIA requests come from foreign governments operating through cover names. And there is a difference between sending along a file of newspaper clippings, and parceling out documents with lines blacked out, with no one in the Agency quite certain that all that should be excised has been.

Most people would acknowledge that criminals, both organized and unorganized, are filing requests by the long ton to the FBI to learn what the feds may have on them that might be embarrassing or damaging—and to act on what they learn. Fragments of information are as valuable as the complete dossier.

Unhappily, some past events have convinced a good many people that the FBI and the CIA skulk about doing rude acts not countenanced by our own laws. Public suspicion about two enterprises, without whose vigilance we might be more anxious than we are now about our future security, stirs our unease.

In the war against terrorism in Europe, the intelligence services of the West Europeans find it necessary to foresee violent designs before they are hatched. The only known method to do that is to collect information so that if a design is forming it may be thwarted before it occurs—or at the very least to pick up the spoor of those sponsoring the skulduggery before they kill somebody.

AN INSTITUTIONALIZED LEAK

What the public doesn't know, and probably cannot know until it is too late, is how well our police and intelligence services are prepared to act before some violent deed is done. We have so institutionalized the "leak" in this country that nothing is truly safe from prying eyes. Granted that we may too often stamp Top Secret on a formula for dried milk; granted also that much of what is delivered to someone asking for information is valueless. But it is nonetheless true that in handling literally thousands of requests, brief lapses in scrutiny run throughout the whole costly process.

It is not the cost of handling these requests that should cause us concern. It is the disposition of crucial material, often collected at great risk from sources who believe it is sacrosanct, who suddenly discover to their horror and fear that it is not. All of which causes our colleagues in Europe to shake their heads.

This unease among our friends is not evidence of paranoia. As William Burroughs put it, "A paranoid is a man in possession of all the facts."

The work of the FBI and the CIA is by nature shadowy. But they labor to ensure the security of the nation. Most Americans assume that work is going forward with dispatch, skill and diligence. But many European friends of this country are queasy not so much about the quality of the labor, but of the impermanence of its safety.

One can only pray that the Congress and its oversight committees can figure out some common-sense balance which places off-limits sensitive information which is now leaked or routinely given away. There is legitimacy in the phrase "national security information."●

DEBORAH HEART AND LUNG CENTER SIGNS AGREEMENT TO AID POLISH CHILDREN

HON. EDWIN B. FORSYTHE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 24, 1981

● Mr. FORSYTHE. Mr. Speaker, today in Philadelphia an historic event will take place. The Deborah Heart and Lung Center, which I am proud to have in my congressional district in Browns Mills, N.J., and the Government of Poland will sign an agreement inaugurating a program for the care of Polish children.

The Deborah Heart and Lung Center will provide pediatric cardiac surgical treatment to Polish children in need of this treatment. A great many Polish children suffer from cardiac disorders and are unable to obtain the medical care they need because Poland has a shortage of physicians trained in pediatric cardiac surgery. In an additional effort to help correct this problem, Polish physicians and medical personnel will also be able to observe the techniques and procedures used by the medical staff at the Deborah Heart and Lung Center.

I am proud that this program with Poland is made possible through the generosity of private contributions to the Deborah Hospital Foundation, which has been serving the New Jersey area for 58 years. Happily, the free care provided our children is now being extended to Poland's needy children.

The joy healthy children bring to their family and friends is universal. So, too, is the heartbreak that is suffered by those same families and friends when the child is ill. Today, as the agreement is signed for the pediatric cardiac surgical program, the Polish people will be continuing their internal struggle to create a society in which they can live freely and safely. These brave people have troubles enough without adding to them the anguish caused by knowing an ill child cannot be cured because of lack of medical facilities and personnel. While we cannot fight the Polish peoples' internal political battle, we can at least hope that their children will return from the Deborah Heart and Lung Center healthier and happier and that their families and friends will be strengthened and encouraged by these children.●

TRANSPORTATION ISSUES IN THE 96TH CONGRESS

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 24, 1981

● Mr. WEISS. Mr. Speaker, I am submitting today for the RECORD my summary of transportation issues in the 96th Congress:

The 96th Congress produced a disappointing record on transportation issues of greatest concern to New Yorkers and other urban residents. Enactment of well-publicized bills to deregulate railroads and the trucking industry could not obscure the failure to provide a fairer formula for funding mass transit, require at least some form of passive safety restraint in automobiles, and halt the spending of billions for wasteful projects such as the Tennessee-Tombigbee Waterway.

Off the floor of Congress, the battle over the proposed Westway highway continued, and General Accounting Office staff began a probe—at my request—of New York City's purchase of new Grumman buses under an $89 million federal grant. The buses were withdrawn from service after discovery of widespread structural defects, and the extent of repairs to be paid for by the manufacturer remained unclear at the end of 1980.

One of the great disappointments of the Congressional session involved the failure to enact the Surface Transportation Act of 1980, which would have significantly increased mass transit funding for all major urban areas. New York City's share of all federal mass transit subsidies would have grown from 15 to 20 percent, up $87.8 million a year.

The new formula was based on miles of rail and bus service an area provides, not on population, as under current law. The change would have brought 72 cents per vehicle mile of mass transit to every major city in the nation, except New York—which would have received 58 cents per mile. That share per mile was smaller due to a limit on the federal assistance any one city could be provided. But the formula still represented a great improvement, one that may not be possible in the new Congress.

Both the House and Senate has passed bills with this new funding formula. But in spite of the outstanding efforts of Rep. James Howard (D-NJ), Chairman of the Surface Transportation Subcommittee, too little time remained to reconcile other dif-

ferences between the two bills, and the legislation died as time ran out on the 96th Congress.

The measure's most controversial section dealt with requirements for access to public transportation for handicapped persons. I opposed an amendment by Rep. James Cleveland (R-NH) which would have removed the obligation of localities under existing law to provide service for the handicapped. That amendment was defeated, and a compromise substitute passed that preserved the basic assurance of service, and required that prompt alternative services be provided. At the same time, the substitute amendment would have made today's stringent federal requirements flexible enough that local governments could provide service while planning for the most cost-effective means of access in the future.

Efforts to require use of air bags as passive safety restraints in new automobiles before 1983 failed on several occasions in the 96th Congress. But the bill which finally became law still requires installation of air bags by 1983 in at least one line of small cars sold by each manufacturer in the U.S. market, as an option for the car buyer.

Congressional approval of accelerated funding for the $3 billion Tennessee-Tombigbee Waterway came despite evidence that the project will only subsidize barge companies and duplicate an existing transportation network on water and rail. Indeed, the majority of companies claimed by the U.S. Army Corps of Engineers to benefit from the project either do not exist, or have stated they would not use the canal. Stopping the project now would save the American people many times more dollars than the several hundred million already spent.

Deregulation of both trucking and railroad industries passed Congress during the summer of 1980. These landmark bills represent steps toward removing government regulation from areas of commerce where efficiency, and lower prices, were thought best promoted by less restraint. Regulation is retained in areas where possible monopolistic practices pose significant dangers to the consumer's interests.

Hearings were held at my request in New York City by both the U.S. Department of Transportation (DOT) and a Congressional Subcommittee on my legislation to halt proposed federal regulations that would allow transport of nuclear waste through major cities. Local officials and community activists joined me in urging the DOT to withdraw its proposals. If implemented, the regulations would once again allow transport of lethal nuclear waste through the heart of our city across the Queensborough Bridge, up Third Avenue, over to Amsterdam Avenue, on to the Cross-Bronx Expressway, and across the George Washington Bridge to New Jersey.

A General Accounting Office study of the purchase and testing of 837 Grumman Flexible buses by New York City is underway at the request of myself and Rep. John L. Burton (D-Cal.), chairman of the House Subcommittee on Government Activities and Transportation. Investigators will determine whether tests before delivery should have detected the structural defects that forced the city to remove the entire fleet of new vehicles from service. In addition, the GAO will examine warranties obtained by bus purchases in New York and other cities to find whether the public is being adequately protected in cases where the product proves to have serious deficiencies.

I asked for the GAO study in August after the small openable windows included on the buses failed to provide adequate ventilation when air conditioning broke down. As a result, many buses were idled during the summer. Yet testing of the window design—installed after City Councilwoman Carol Greitzer and myself had objected to the totally sealed windows originally proposed—had not been completed when the buses were delivered.

The GAO team will examine the U.S. Urban Mass Transit Administration's requirements that mandate sealed windows and other items on buses, regardless of local conditions, to see whether different procedures for testing and selection of optional features are warranted.

The movement against Westway continued strongly, as 22 elected officials in New York joined me in asking the U.S. Army Corps of Engineers to deny a permit needed for construction of the extravagant roadway. Three U.S. agencies—the Fish and Wildlife Service, Environmental Protection Agency, and National Marine Fisheries Service—also took a stand against the permit, which is necessary to allow dredging and filling of a 2.8 mile-long section in the Hudson River along the West Side of Manhattan that Westway's design would require.

A tour of the proposed Westway corridor was sponsored by myself and 34 other elected officials in October, 1980, along with 47 community leaders and activists and representatives from 40 local and national organizations. The tour took note of the valuable businesses and neighborhoods Westway would destroy or adversely affect.

The future of Westway under the new Reagan administration is uncertain. Advisors to the new President have recommended a review of segments of the Interstate highway system which remain unbuilt to determine their cost effectiveness. Westway is the most expensive of all those projects. The highway is now estimated at more than $2 billion, or over $8,700 an inch—the most expensive highway ever proposed. I have argued that the trade-in of those highway monies for mass transit purposes makes the most sense. Finally, the EPA took a courageous step last summer when it proposed disapproval of New York State's plan to fight air pollution in the metropolitan area. EPA correctly criticized the state for failing to seek out funding for mass transit from all possible sources. Such funding is critical to air quality: improved mass transit should induce drivers to leave the road, reducing pollution caused by automobiles. As of this writing, no solution has been agreed to and no final action has been taken.●

RETIRING AMBASSADOR REPORTS FAVORABLE TRENDS IN ITALIAN PUBLIC OPINION

HON. CLEMENT J. ZABLOCKI

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 24, 1981

● Mr. ZABLOCKI. Mr. Speaker, in a Los Angeles Times interview on the eve of his departure last month, retiring U.S. Ambassador Richard N. Gardner offered some interesting, and hopeful, comments about recent political developments in Italy.

According to Ambassador Gardner, there has been a definite shift in Italian public opinion over the past 4 years away from the Marxist-Leninist concepts of the Communist Party and in favor of the values shared by the United States and other Western European nations. The Italian Communist Party (PCI) has, in fact, suffered some significant reverses during this period, despite severe economic difficulties, the continuing plague of domestic terrorism, and the devastation caused by a major earthquake.

This encouraging trend, I believe, results in large measure from the prudent and realistic approach to Italian-American relations, which was consistently followed by the previous administration, despite some intermittent criticism, and which I hope will be adhered to by Secretary Haig and his colleagues in the years ahead. Simply stated, this involves, in the Ambassador's words, "a policy of noninterference in the internal affairs of allies, but of stating openly its preference that Communists not participate in the governments of allies."

While contacts have been broadened to some extent between American diplomats and Communist Party officials, the distinction between enhanced communication and approval has been made consistently and effectively—with apparently quite positive results.

Mr. Speaker, I include in the RECORD at this time the full text of the final interview with Ambassador Gardner and commend it to the attention of my colleagues, as well as to those in the Reagan administration who reportedly are engaged in a comprehensive review of U.S. relations with our European allies.

The article follows:

[From the Los Angeles Times, Feb. 11, 1981]

ITALY TURNING AWAY FROM COMMUNISTS, RETIRING U.S. AMBASSADOR SAYS

(By Louis B. Fleming)

ROME.—There has been a fundamental shift in Italy over the last four years, away from the Marxist-Leninist concepts of the Communist Party and in favor of the values shared by the United States and other Western nations, according to U.S. Ambassador Richard N. Gardner.

"This is the most satisfying thing I have seen happen in these four years," Gardner said, discussing his term as ambassador here.

He is leaving Feb. 27 and returning to the academic world. His replacement has not been named.

"Four years ago I was distressed to find how much Marxist-Leninist thinking had penetrated the high schools, universities, the intellectual press, the arts and culture here," he said in a farewell interview. "The penetration was greater than with any other ally."

He noted that he was referring to Marxist-Leninist concepts in order to draw a sharp distinction with the Marxism still ostensibly practiced by the Italian Socialist Party, regarded by the United States as a constructive partner in the new Italian government.

A new corner is being turned, Gardner went on. "The near hegemony of Marxist-Leninist thought is being broken. There is a resurgence of non-Marxist liberal thought."

Looking at the political situation itself, he called attention particularly to Communist Party electoral losses over the last four years.

"The Communists are on the defensive for the first time, and I hope they stay that way," he said.

The shift has been accompanied by increased interest in and respect for the values of freedom and liberty associated with the United States, he said.

"There is no country in the world where the common man retains greater affection for the United States and what it stands for than Italy," he said.

Gardner, who has made a priority of gaining greater respect and recognition for Italy among American policy makers, expressed his personal gratification at the way the new Administration in Washington has dealt with Italy. He noted that one of President Reagan's first phone calls following inauguration was to the Italian prime minister, Arnaldo Forlani, and Reagan's first meeting with a high Western European official will be Thursday with Italian Foreign Minister Emilio Colombo.

"It is gratifying that the new Administration is signaling its recognition of the very great importance of Italy in the Atlantic alliance," Gardner said. "Whether measured in terms of its geopolitical position, its political and economic importance or its real contribution to the alliance, Italy deserves to be in the inner circle of the alliance."

He singled out for special recognition the decision of Italy in 1979 to accept missiles under the North Atlantic Treaty Organization's new theater nuclear forces plan. Chancellor Helmut Schmidt of West Germany had made his acceptance of the missiles conditional on the acceptance by another European continental nation and Italy provided that.

"Furthermore, the 6th Fleet could not operate effectively without the home port facilities in Italy," Gardner said.

But he acknowledged that Italy remains vulnerable to communism, to terrorism, to its dependence on energy imports—more than any other Western nation—to its economic difficulties and the everpresent earthquake problem.

"On balance I would say Italy is somewhat less vulnerable than it was four years ago," the ambassador said. "Some of the dangers of four years ago have receded, temporarily at least, but I do not mean that we can be complacent or that the fundamental problems have been solved."

The ambassador expressed satisfaction with the political reverses of the Italian Communist Party, which has had declining support since it polled a record 34.4% in the national elections of 1976.

"In the 1979 elections they lost one out of nine voters and those results were confirmed in the elections of 1980," he said. "Equally important, these elections showed for the first time that the Communists were doing less well with the 18-to-25-year-old group than with other voters."

Gardner broadened contacts between American diplomats and Communist Party officials, a process that began under President Gerald R. Ford, but he continued to exclude high party officers from official embassy functions.

Gardner became the first American ambassador to meet Communist Party Secretary Enrico Berlinguer.

They had a five-minute coversation over coffee at a dinner given by President Sandro Pertini for then-President Jimmy Carter last summer.

Gardner also accepted, for the first time, invitations to attend dinners and receptions where he came in direct contact with senior Communists. Previously the contacts had been handled by other embassy staff members. And he entertained some Communist intellectuals, including the historian-journalist Giuseppe Boffa, as part of an energetic program of entertaining many segments of Italian society.

"A cautious dialogue with the Communist Party clearly serves the national interests of the United States so long as it is always made clear that communication does not mean approval," Gardner said.

"This enables the United States to understand better what is going on inside the party and it gives an opportunity to try to influence them over the long term in directions favorable to us."

Beginning in 1977, the United States has followed a policy of pledging non-interference in the internal affairs of allies but of stating openly its preference that the Communists not participate in governments of allies.

The policy was articulated by then-President Carter following controversy over allegations that the U.S. Embassy here had played a direct political role in earlier years.

Gardner said he saw only a remote possibility that the Communists would change on the fundamental questions of accepting true Western concepts of democracy and in living up to full obligations of NATO membership.

"Many American scholars make the mistake of thinking of the Communist Party as an individual who can change his mind quickly," Gardner said. "It is an institution, with a complex bureaucracy, deeply conditioned by its past and profoundly resistant to change."

He was critical of Communist Party opposition to American and NATO operations in Italy, including the stationing of Pershing II missiles under the theater nuclear forces accord. That is one of the issues likely to come up during Foreign Minister Colombo's visit to Washington. Italy has yet to designate the missile sites, a decision likely to stir fresh parliamentary debate.

Gardner and his wife, Danielle, will fly to Washington Feb. 27, then return to Italy in April, when Gardner will begin a two-month visiting professorship at the European University sponsored by the 10 Common Market nations in Florence. He will lead seminars at the Aspen Institute in August and return in September to his post as Henry Moses professor of international law and organizations at Columbia University.●

U.S. TRADE WITH THE MIDDLE EAST, 1978–80

HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 24, 1981

● Mr. FINDLEY. Mr. Speaker, the Commerce Department has released figures on U.S. trade with the Middle East in 1978, 1979, and 1980. This trade was as follows:

U.S. TRADE WITH THE MIDDLE EAST 1978–80

[Dollars in millions]

	Exports (including reexports)			Imports		
	1980	1979	1978	1980	1979	1978
Arab countries	$13,502.7	$11,053.5	$9,412.1	+$30,270	+$22,368	+$15,681.6
Percent of world	6.12	6.09	6.56	12.6	10.84	9.12
Algeria	$541.8	$404.1	$374.0	$6,576.8	$4,940.2	$3,481.6
Bahrain	$196.7	$159.5	$157.1	$15.5	$10.6	$28.8
Djibouti	$11.6	$8.0	$4.0	(1)	(1)	(1)
Egypt	$1,873.6	$1,432.9	$1,134.1	$458.4	$381.0	$105.0
Iraq	$724.3	$441.6	$316.6	$352.3	$618.4	$243.4
Jordan	$407.3	$333.7	$235.0	$2.5	$4.1	$0.6
Kuwait	$886.1	$764.7	$744.8	$471.9	$86.8	$49.6
Lebanon	$303.0	$227.4	$142.2	$32.6	$14.6	$14.8
Libya	$508.8	$468.1	$425.0	$7,124.0	$5,256.0	$3,799.3
Mauritania	$20.1	$7.0	$8.0	$0.4	(1)	$1.0
Morocco	$344.4	$271.3	$406.4	$35.3	$39.9	$43.5
Oman	$94.9	$87.9	$65.1	$344.3	$316.7	$354.0
Qatar	$128.8	$138.3	$76.7	$236.6	$279.1	$318.0
Saudi Arabia	$5,768.5	$4,875.0	$4,369.9	$12,508.8	$7,983.4	$5,307.1
Somalia	$55.8	$32.0	$21.0	$0.4	(1)	(1)
Sudan	$142.5	$103.0	$157.0	$17.3	$16.0	$14.0
Syria	$239.2	$229.3	$142.5	$25.9	$165.2	$36.8
Tunisia	$173.5	$175.1	$83.0	$59.9	$95.4	$21.1
UAE	$997.9	$666.8	$493.2	$1,987.8	$2,155.1	$1,857.9

World total	$220,548.7	$181,637.0	$143,577.0	$240,834.3	$206,326.0	$171,978.0
Middle East percent of world	7.4	8.0	10.8	13.2	12.7	11.38

[1] Less than $50,000.

Source: U.S. Department of Commerce, Bureau of the Census, Washington, Feb. 4, 1981.

Although the value of U.S. exports to this region were up significantly in 1980 over 1978, going from $9.4 billion to $13 billion, the value of U.S. imports almost doubled in the same period, going from $15.7 billion in 1978

to $30.3 billion in 1980. This latter fact, of course, is largely because of the rising cost of oil.

This table of trade figures demonstrates just how important it is to the United States to expand its exports to this region to diminish the great trade imbalance we are now suffering.

An important step to improving our trade competitiveness in the Middle East and elsewhere is the removal of U.S. tax law disincentives to exports. The American Businessmen's Group of Riyadh prepared, in 1980, a position paper on "America's Loss of Business in the Middle East." This paper focuses on several trade disincentives which place U.S. businessmen at a disadvantage compared with European, Japanese, and other competitors. Foremost among these trade disincentives according to this paper, are U.S. tax laws affecting Americans working overseas.

Since exports mean jobs for U.S. workers and a strong U.S. economy, it is critical for the Congress and the Reagan administration to work together to make reform of U.S. tax law disincentives to trade a top priority of our 1981 agenda.

Excerpts follow from the American Businessmen's Group of Riyadh paper which demonstrates why this task is so urgent:

AMERICA'S LOSS OF BUSINESS IN THE MIDDLE EAST

U.S. COMPANIES OPERATING IN THE MIDDLE EAST ARE AT A COMPETITIVE DISADVANTAGE WITH EUROPEAN AND ASIAN FIRMS BECAUSE OF U.S. LEGISLATION AND EXECUTIVE ACTION WHICH RESTRICTS AND IS OFTEN PUNITIVE AS COMPARED TO GOVERNMENTAL SUPPORT BY OTHER NATIONS FOR THEIR COMPANIES OVERSEAS

We call on the United States Congress to recognize this situation and to enact immediate legislation which would—

Eliminate taxes on American expatriates which force U.S. firms to hire foreigners or price themselves out of the market:

Provide financing for American firms which would put them on a competitive footing with foreign firms; and

Rationalize anti-trust, anti-boycott, anti-corruption and other laws which penalize U.S. firms abroad without advancing any significant policy objectives.

The Kingdom of Saudi Arabia is in the world's largest single market for construction and other contracted services, for the related consulting and design fields, and for the attendant materials and equipment. As such it is also the most competitive single market for these labor and production intensive services in the world. It is likely to remain so for at least the decade of the 80's.

U.S. firms are losing ground rapidly in Saudi Arabia. While fully 9 percent of all construction projects in the Kingdom were awarded to U.S. contractors in 1975, our share dropped to 6 percent in 1978 and continues to decline with only 3 percent of construction going to U.S. firms in 1979.

Even the civil and military construction contracts let by the U.S. Army Corps of Engineers on behalf of the Saudis are going substantially to foreign firms. In fact, the U.S. share of such work has plummetted dramatically from 35 percent in 1975, to 5 percent in 1978 and then to 2 percent in 1979.

As a result, the total U.S. exports to Saudi Arabia show no real dollar growth, 1979's $4.9 billion being, in fact, a decline from 1978's $4.4 billion when adjusted for a 12-percent inflation rate. Moreover, the U.S. portion of the Kingdom's enormous import bill, averaging 22 percent over the period 1975–79 is beginning to show a noticeable decline.

The health of this market affects all Americans, because U.S. firms buy American products. According to the Associated General Contractors of America, 90 percent of the material and equipment used by U.S. contractors are U.S. products. The U.S. Department of Labor estimates that every billion dollars in exports generates 30,000 domestic jobs. The U.S. Commerce Department puts the figure at 40,000 jobs per billion dollars of exports, and a study conducted by Aramco shows 53,000 U.S. jobs created by the same one billion dollars. Thus, the Saudi Arabian market is responsible for between 145 and 260 thousand domestic U.S. jobs.

U.S. firms are not losing ground in Saudi Arabia due to attitudinal hindrances on the part of either ourselves or our hosts, as some assert. The Saudis still desire American goods and services; they are simply no longer willing to pay the ever-growing premiums for buying American over European or Asian. Certainly the very existence of our group attests that U.S. firms are interested in this market; sufficiently interested to dedicate their full efforts and resources to working here in the Kingdom.

The fact is that we can no longer successfully compete with foreign firms who receive support from their respective governments. This support ranges from effective subsidies to outright ownership, control and supply of labor. The policies of most foreign governments with respect to assistance to their own firms in foreign markets renders U.S. legislation highly disincentive by comparison. If the U.S. wishes to reverse the current trend, to regain lost foreign sales and the resultant income and tax revenues, to improve our enormous trade deficits, and to return to a leading position in the world marketplace, U.S. firms operating overseas must be allowed to confront foreign competitors on a more equal footing.

The single item most often cited by U.S. firms operating overseas and by independent investigators as a cause for the dwindling U.S. share of international business is the current text and interpretation of the individual foreign earned income legislation, Sections 911 and 913 of the Internal Revenue Code. No other industrial nation taxes the overseas earning of its citizens as rigorously and no other major industrial power taxes such earnings at all. It is more than a coincidence that it is just these same powers—South Korea, West Germany, the U.K., Japan, Italy, Canada and France—to whom U.S. firms are losing work at present.

The direct effects of the present legislation are two-fold. First, bids tendered by U.S. firms are inflated by the projected excess cost of maintaining taxed American personnel and are thus unsuccessful. A study made by the Associated General Contractors of America of an actual bid shows that the projected cost of using American staff was nearly twice that of using comparable British staff. 75 percent of that difference was found to be the result of taxing the American individuals' foreign earned income. This resulted in a total bid 3 percent higher for the American-staffed U.S. firm. A 2.3-percent spread in offers prevailed at the time and the U.S. firm did not receive the work. Zero work means zero income for the U.S. economy and zero tax revenues.

Second, these taxes are forcing U.S. firms to replace American staff with British, Irish and other English speaking expatriates who are not taxed on income earned abroad. Mr. Abdullah T. Dabbagh, Commercial Counselor at the Embassy of Saudi Arabia in Washington states that the proportion of U.S. citizens employed by U.S. firms in the Kingdom declined from 65 percent in 1976 to 35 percent in 1980 due to the 1976 tax law. The findings of the Middle East Marketing Research Bureau Ltd. investigating U.S. firms in Riyadh, showed a 10-percent drop in U.S. citizen employees of U.S. firms over the period 1977–78 with heavier losses in the numerous mid-sized firms. This corroborates a report by Chase Econometrics Associates, which estimates a further 10 percent drop for 1980.

Beyond the obvious loss of income and revenues attendant to declines in the hiring of U.S. citizens to work abroad, there is also the fact that people tend to direct business to their countries of origin due to familiarity with home specifications and products as well as to a modicum of nationalism. In Saudi Arabia, where nearly everything is imported, this phenomenon is most pronounced. Over the past five years, the character of importing to the kingdom has changed drastically. While at one time, items were usually imported for a specific project, local dealers and vendors now preimport vast quantities of materials and equipment for sale on the local market. Our collective experience has shown us that, given this ever increasing local availability, people will procure the products of their countries of origin whenever possible. A very telling example of this is the fact that export of U.S. heavy equipment to Saudi Arabia fell 5.5 percent from $200 million in 1978 to $189 million in 1979.

Further, our experience shows conclusively that the days when only U.S. products could met U.S. firms needs and U.S. or U.S. based specifications are sadly, over. Both Japan and Korea produce many items to American standards, and much of Europe produces substitutes acceptable even to the Corps of Engineers.

With respect to taxing U.S. corporations' foreign income we direct attention to the benefits given to our competitors by their respective governments.

Italy and Japan do not tax the overseas earnings of their firms at all. The Republic of Korea affords its contractors a 50-percent exemption on income from abroad. France, West Germany and the U.K. allow their corporations partial exemptions and/or tax payment deferrals to bolster operations.

We must point out that operating in a developing country such as Saudi Arabia is inherently different from operating in, say, Western Europe. Most Saudi Arabian government regulations are complex, time-consuming and variable. Even in the capital and other major cities, employees cannot reasonably be expected to enter the local housing market and must be provided for. Outside of the cities, food and often water must also be provided. Communication, both internal and international, utterly necessary for the direction of business to the U.S., is extraordinarily expensive. Thus operating costs and overheads are enormous and require large quantities of cash to be constantly available. In consideration of this and the fact that the vast majority of con-

tracts in the Kingdom are multi-year in term, we request the U.S. Government allow job-based accounting methods to calculate corporate tax due, scaled for percentage of completion to be utilized. Such a plan would facilitate use of capital without significantly altering the ultimate liability incurred. Without such a minimal concession as this, our totally exempt foreign competitors will continue to benefit at our expense.●

EXIMBANK SUPPORTS JOBS

HON. LES AuCOIN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 24, 1981

● Mr. AuCOIN. Mr. Speaker, while hacking away at the Export-Import Bank's lending authority, opponents of the Bank have glossed over one of the most important contributions that it makes to our economy: jobs. The administration is trying to sell unilateral trade disarmament under the guise that export assistance only helps "profitable corporations" and "business must do its part" in sacrificing along with the rest of the country. Even if we were to accept the premise that American business needs no assistance in meeting predatory financing in the international marketplace, even if we ignore the continuing decline of American products in world competitiveness, we cannot forget that the companies that export employ American workers. Simply, exports mean jobs. Recent figures show that one in nine manufacturing jobs in the United States are export dependent. And in my own State of Oregon, over 10 percent of the manufacturing workers are paid by exports.

Before my colleagues accept the argument that it is American business that is sacrificing through cuts in Eximbank, I would remind them once again that Eximbank means jobs, productive jobs. I know of few Members who would knowingly and willingly sacrifice the livelihoods of their constituents and the long-term economic health of the country on the basis of such rhetoric.

That is why, Mr. Speaker, I call to my colleagues' attention figures which show the amount of exports Exim supported in each State over the last 3 fiscal years.

More important, however, the figures also show the estimated number of job-related Eximbank activity. I commend this information to the Members' attention and hope they will consider it carefully before deciding the fate of Exim and the fate of workers in their districts.

The table follows:

U.S. EXPORTS FINANCED BY EXPORT-IMPORT BANK BY STATE AND ESTIMATED JOBS ASSOCIATED THEREWITH, FISCAL YEARS 1978–79

Notes.—The above figures reflect the degree of detail included in Eximbank's records. However, because subcontractors, and even separate manufacturing sites in the case of a nationwide supplier, are not usually broken out in the information supplied to Eximbank at time of authorization, some States actually have higher values than shown above; and some have lower values.

The "Unallocable by State" totals above include transactions for which a U.S. bank or other institution is shown as "exporter of record" (primarily discount loans and insurance) but which cover a number of U.S. suppliers who are not specifically identified to Eximbank.●

IN PRAISE OF CETA BUDGET CUTS

HON. TOM CORCORAN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 24, 1981

● Mr. CORCORAN. Mr. Speaker, I would like to bring to the attention of my colleagues a letter I recently received from a resident in my district praising President Reagan's proposed budget cuts. It is worthy of special attention because it is written by someone whose program is scheduled for drastic budget rescissions. I am speaking of the CETA program, one which has recklessly expanded, as has much of the Federal bureaucracy, and has lost sight of the reason for which it was created—to train the chronically unemployed for jobs in private industry. CETA was never intended to create permanent public service jobs, but subsequent additions to the original program do just that. The two areas which will be phased out are those which provide public service jobs with no future purpose. They do not contribute to the long-range benefits of the workers or our economy, while elimination of them will help return CETA to its primary function and save millions of taxpayers' dollars. I commend Mr. Hauser and am pleased to insert his letter in the RECORD:

KANE COUNTY CETA SERVICES,
Geneva, Ill., March 11, 1981.

Congressman TOM CORCORAN,
Longworth House Office Building,
Washington, D.C.

DEAR CONGRESSMAN CORCORAN: I have been the Fiscal Manager for the Kane County CETA program for the past six years. I wrote you in August 1978 concerning the reauthorization of the CETA Act and my opinions. My views have not changed since that time.

As of this writing President Reagan has submitted a proposal to phase-out the II-D and VI Public Service Employment (PSE) programs of the CETA Act by September 30, 1981.

I strongly support this action and urge you to vote in agreement with President Reagan.

CETA must return to its original purpose as a training program for the purpose of placing the hard-core unemployed into private sector jobs. PSE does not accomplish this purpose so it must be phased-out now.

If the CETA Act is to be re-authorized during F/Y-1982, it must be re-enacted as a training program for the truly needy so they might have lasting and permanent jobs.

Thank you for your time and consideration. May the Lord Jesus bless you and guide you as you serve in Washington.

Sincerely,

JAMES W. HAUSER,
Fiscal Manager.●

FEDERAL GOVERNMENT SERVICE TASK FORCE

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 24, 1981

● Mr. BARNES. Mr. Speaker, several weeks ago I sent my colleagues a letter inviting them to join the Federal Government Sevice task force, an organization of House and Senate Members working to develop a greater understanding of Federal employee issues. As task force chairman, I am pleased to report that a number of our ablest colleagues from both sides of the aisle and representing every region of the country have joined in the effort to insure the kind of Federal workforce the American people expect and want.

As Members consider participating in the task force, I hope they will review the variety of services the task force offers. As an information conduit working to supplement the efforts of the authorizing committees with timely data and analysis, the task force can provide information and responses to constituent problems and inquiries that otherwise would have required significant staff time. For example, in connection with its work on the President's hiring freeze, executive pay, cost of living adjustments, and proposed reductions in-force, the task force has already aided Members offices with memoranda prepared upon request and sample constituent correspondence.

Because Members may also be interested in figures reflecting the combined total of Federal employees and retirees by State, the task force staff has prepared a table providing such information. No fewer than 16 States have more than 100,000 citizens who either work or have worked in the Federal Government. California, Maryland, New York, Texas, Virginia,

and the District of Columbia have a quarter million or more Federal employees and retirees.

I insert the table for Members' information:

TOTAL NUMBER OF FEDERAL EMPLOYEES AND RETIREES BY STATE

Alabama	107,038
Alaska	29,122
Arizona	61,588
Arkansas	30,399
California	501,974
Colorado	85,820
Connecuticut	30,420
Delaware	8,195
District of Columbia	378,316
Florida	131,998
Georgia	135,448
Hawaii	47,578
Idaho	17,896
Illinois	156,363
Indiana	63,051
Iowa	27,798
Kansas	37,307
Kentucky	60,114
Louisiana	52,176
Maine	14,372
Maryland	240,302
Massachusetts	89,226
Michigan	81,446
Minnesota	44,314
Mississippi	45,347
Missouri	111,010
Montana	21,872
Nebraska	24,539
Nevada	15,963
New Hampshire	25,148
New Jersey	108,143
New Mexico	48,699
New York	243,511
North Carolina	68,907
North Dakota	14,407
Ohio	146,069
Oklahoma	84,746
Oregon	45,608
Pennsylvania	212,584
Rhode Island	15,639
South Carolina	55,094
South Dakota	17,541
Tennessee	100,657
Texas	257,091
Utah	65,772
Vermont	6,614
Virginia	268,733
Washington	104,268
West Virginia	25,141
Wisconsin	38,251
Wyoming	10,953
Grand total	4,743,751

Mr. Speaker, the millions of Americans who make up a Federal work force have just as great a stake and just as powerful a commitment to the Nation as the people they serve. That in recent years their efforts have not been well received reflects a record for which this body must bear some responsibility.

One senior civil servant, who happens to be a constituent of mine, wrote to President Reagan on March 6, to express bitterness and frustration that is spreading throughout all ranks of Government. David S. Pollen had a fine career in the private sector, when he saw "an opportunity to help this country improve itself," and entered the Federal Government. Seventeen years later Mr. Pollen found himself one of a "group which is the butt of every conceivable kind of disparaging remark from those who hold office." I submit Mr. Pollen's letter for the RECORD.

Also, I would like to call to the attention of Members who have not yet had a chance to seriously consider joining the task force two articles about the organization which appeared recently in the Washington Post and the Federal Times. I invite Members wishing further information about the task force to contact our offices at 225-9120.

The letter from David Pollen and the two articles follow:

ROCKVILLE, MD.,
March 6, 1981.

The PRESIDENT OF THE UNITED STATES,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: As a senior career civil servant with more than 17 years of civil and military service, I harbor bitter thoughts about my decision to devote my professional life to the cause of better government.

I am not one of those who was promoted up the civil service ladder on the basis of length of service. I had a fine career in the private sector which I gave up to enter the Federal government at the supergrade level because I saw an opportunity to help this country improve itself.

Before entering Federal service I had made an enormous investment in education and experience. That investment included time, money, and a great deal of hard work. For the past 17 years I have capitalized on that investment to produce results for my employer, the people of this country.

What is my return on this investment and effort? (1) economic strangulation which has reduced my purchasing power to below the point at which it stood when I first entered government in 1965 (every other group in the country has received some adjustment for performance and inflation over this same period of time); and (2) membership in a group of a few thousand executives upon which this government depends for reliable operation, day after day, a group which is the butt of every conceivable kind of disparaging remark from those who hold office

Mr. President, please take the time to read the list of specific job titles of those in the senior civil service. You will find there the most crucial, complex, and demanding type of job assignments imaginable: air force target selector, nuclear safety officer, social security actuary, research laboratory director, etc. We cannot be replaced with safety by the trained, experienced people necessary for good job performance unless salaries are brought into line, i.e. raised to the market level of those kinds of skills. The country can fool itself only so long before it pays the penalty of a dry-rotted civil service which cannot do the job. If we do not care, we rot.

We are economic men as much as everyone else in the country. We are dying on the vine; so are our functions, and so will the government.

Sincerely,

DAVID S. POLLEN.

[From the Federal Times, Mar. 16, 1981]

NEW HILL CAUCUS SCANS FEDERAL WORK PROBLEMS

(By Keith A. Sinzinger)

A bipartisan congressional task force on federal employee issues has become operational this year under the leadership of Rep. Michael D. Barnes, D-Md.

It is the first caucus to focus on legislation and executive action affecting federal workers and job installations.

Barnes, who convened the Federal Government Service Task Force late in the 96th Congress, said it will serve as an information clearinghouse and a link between federal groups and Capitol Hill.

It will follow and supplement, but not duplicate, the work of congressional authorizing committees, he said.

The task force, which attracted 35 members last year and 33 so far in the 97th Congress, has an open membership. But it is concentrating its recruiting efforts on congressmen with high concentrations of federal employees in their districts and has a goal of 70 members this year.

Staff director Robert Honig said there are 78 House members with 20,000 or more federal constituents—not including retirees, postal workers or the military. More than 150 representatives have federal constituencies of 10,000 or more, he said. "They are a sizable and knowledgeable voting bloc," he added.

Among issues on the task force agenda are the administration's hiring freeze and proposed staff reductions, proposed cost-of-living cuts for retirees, civil service and Hatch Act reforms, universal social security coverage and affirmative action.

Guiding the group with Barnes are vice chairmen Stan Parris, R-Va., and Vic Fazio, D-Cal., and executive board members James Howard, D-N.J., Tom Lantos, D-Cal., Harold Washington, D-Ill., and Fortney (Pete) Stark, D-Cal. Parris will serve as the task force liaison with the Office of Management and Budget and other administration officials.

An aide to Parris said the group hopes to persuade the administration that federal workers will be its best allies in the fight against waste in the bureaucracy.

Staff director Honig, formerly with the Senate Labor Committee, and Jerry Anderson, who worked with ACTION and state government in Ohio, will lead the efforts of a small staff that includes volunteers and student interns.

The caucus will be funded by member dues ($125) and clerical contributions, plus donations.

Honig said the task force has had "very open and extensive" contract with federal union and professional groups and is "extending its reach" to the research community.

Its main activity so far has involved briefing members on federal issues—such as the hiring freeze—through short memos, Honig said.

Originally formed as a House organization, the group recently amended its bylaws to include senators. Sen. John Warner, R-Va., has joined the caucus and other key senators have expressed interest in doing so, Honig said.

In a statement, Barnes said he initiated the task force last year because "it had become very apparent that government would have to re-examine its role and its functions.

"It seemed imperative to us that Congress maintain a balanced approach to reform by reasserting a commitment to the men and women who, as much as anyone, desire to serve the public and achieve public confidence."

As one of its first public activities, the task force will publish a four-page newslet-

ter on a trial basis. It will be available to outside parties by subscription at a yet-undetermined price. Tentative plans call for 20 issues a year.

[From the Washington Post, Mar. 6, 1981]

NEW HILL TASK FORCE FOR FEDERAL EMPLOYES

(By Mike Causey)

Members of Congress representing 1.2 million jittery taxpayer-voters (who get their paychecks from Uncle Sam) are forming a task force to monitor the Reagan administration's plans to cut back federal programs and whack jobs.

Coalition members come in all racial, ethnic, regional and political hues. But they have a couple of things in common. They are politicians who would like to keep getting reelected, and they represent people who make up 42 percent of the federal work force from states and congressional districts where feds are a major political force. Legislators are most anxious that their constituents, who pump millions of dollars into hometown economies, don't wind up on welfare or in unemployment lines.

Object of the Federal Government Service Task Force: To serve as an information net work on issues—jobs, retirement, reorganization—of interest to U.S. workers, and to advise key members of Congress that they represent lots of federal and postal employes. Staff director Robert Honig says at least 75 House members come from districts with 20,000 or more federal workers. The typical congressional district has 500,000 people—men, women and children—so a voting bloc of 20,000 or more is something to consider every other November.

Rep. Mike Barnes (D-Md.) chairs the group, which includes Reps. Vic Fazio (D-Calif.), Barbara Mikulski (D-Md.), Stan Parris and Frank Wolf (R-Va.), Tom Lantos (D-Calif.), Morris Udall (D-Ariz.), William H. Gray (D-Pa.), Roy Dyson (D-Md.), Robert Matsui (D-Calif.), Norman Dicks (D-Wash.), Robert Roe (D-N.J.), Julian Dixon (D-Calif.), Glenn Anderson (D-Calif.), Edward J. Derwinski (R-Ill.), Benjamin Gilman (R-N.Y.), Thomas Bliley (R-Va.), Marjorie Holt (R-Md.), William Whitehurst (R-Va.), and Tony Coelho (D-Calif.). Other members are D.C. delegate Walter Fauntroy, and resident commissioners A. B. Won Pat of Guam and Baltasar Corrada of Puerto Rico.

The Task Force will begin a Senate recruiting drive today. (Sen. John Warner (R-Va.) is the only member so far.) Pamphlets explaining the importance of the federal-postal-retiree population in each state will go to the 99 nonmembers in the Senate, and they should open some eyes. Consider some numbers:

Alabama has 60,000 federal workers and 25,000 civilian federal retirees . . . California, more than 290,000 federal workers and 138,000 government retirees . . . Florida, 80,000 feds and 86,000 retirees . . . Illinois, 101,000 U.S. workers and 35,000 retirees . . . Maryland, 131,000 workers and 50,000 retirees . . . Virginia, 144,000 workers, 66,000 retirees . . . District of Columbia, 207,000 workers, 42,500 U.S. retirees . . . Michigan, 54,000 and 13,000 . . . Missouri, 64,000 workers, 25,000 retirees . . . New York, 157,000 feds and 63,000 retirees . . . New Jersey, 68,700 feds and 30,000 retirees . . . Washington State, 61,000 U.S. employes and 33,000 retirees . . . West Virginia, 15,800 feds and 6,400 retirees . . . Pennsylvania, 126,000 U.S. workers and 44,000 retirees . . . Massachusetts, 56,000 feds and 30,000 retirees, and Texas, 148,000 federal workers, and 66,400 retirees.

Task Force members hope to come up with proposals that would spare the twice-yearly cost-of-living raises that federal, postal and military retireees get. President Reagan has proposed cutting retirees back to one inflation adjustment each year. They plan to work closely with the Senate Governmental Affairs Committee and the House Post Office-Civil Service Committee, which have jurisdiction over most federal-postal employe matters.

Staff director Honig says the task force hopes to convince Congress that it doesn't make sense to beat bureaucrats on the head and then expect them to go joyfully about their important business. Politicians sometimes forget that feds are people too, that they have the same dislike of red tape and waste as other taxpayers! ●

FEDERAL BANKING REGULATIONS

HON. ED BETHUNE

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 24, 1981

● Mr. BETHUNE. Mr. Speaker, I was pleased to note that my colleague on the Banking Committee, Congressman DAVE EVANS, and others introduced a resolution recently to require Federal banking regulators to take a look at capital adequacy requirements for small versus large commercial banks. I hope the regulators will take heed of our concern that financial institutions be given a fair shake in terms of banking regulations in these highly competitive times.

Data from a recent study indicate that banks in my State of Arkansas are subject to different capital requirements. In fact, the study shows that Arkansas banks under $100 million maintain an average capital-to-asset ratio of 8.20, while larger banks have a significantly lower average. I understand that these requirements affect the pricing of a banks services and can put a banker at a competitive disadvantage.

In that this is a national issue, affecting our entire banking structure, I once again commend the gentleman from Indiana for the introduction of House Concurrent Resolution 82, and hope that it will inspire banking regulators to review this important issue.●

SOUTH BAY POLICE AND FIRE MEDAL OF VALOR RECIPIENTS FOR 1981

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 24, 1981

● Mr. DORNAN of California. Mr. Speaker, on Thursday March 26, 1981, the seventh annual South Bay Police and Fire Medal of Valor luncheon will be held in Westchester, Calif. The luncheon honors all police and fire departments from nine South Bay area cities. But it will especially single out two outstanding individuals who have distinguished themselves by risking their lives in the performance of their duties: 1981 Medal of Valor recipients Newland Hingley, El Segundo police officer, and Thomas Kiesewetter, Redondo Beach firefighter.

Officer Hingley is being honored for his persistence in pursuit of three burglary suspects. On March 26, 1980, Hingley was writing a speeding ticket when he heard a man call out that someone had broken into his house. He reported the burglary over his radio and then noticed a suspicious vehicle turning onto the street from an alley. With sirens wailing, Hingley pursued the car on his motorcycle. The driver sped through the neighborhood with Hingley close behind.

At one point the car suddenly stopped as if in response to the siren. Before Hingley could park his motorcycle, the driver slammed the car into reverse. Hingley was struck and thrown to the ground, breaking his wrist.

The driver of the car then raced off as Hingley chased him on foot. The car went out of control and crashed into a parked car. Hingley confronted the driver and two passengers as they got out of the car and ordered them to freeze. One of the men reached behind his back as if to draw a weapon. Hingley fired one shot at the suspect and the three immediately surrendered. They were taken into custody on suspicion of burglary.

The firefighter's Medal of Valor will be awarded to Redondo Beach fireman Thomas Kiesewetter for his quick thinking in the rescue of two potential drowning victims.

On February 2, 1980, Kiesewetter and two paramedics were called to the breakwater in Redondo Beach's King Harbor. On the scene, he was told that two people had fallen from the seawall, and the harbor patrol officer suggested that it would take 15 minutes to get a patrol boat on the scene.

After scaling the seawall, Kiesewetter saw two figures struggling in the 57-degree water. Immediately, he dove into the water toward the drowning pair. He successfully pulled to shore both a 24-year-old man and a 10-year-old boy, who were exhausted and suffering from exposure.

Kiesewetter's quick reaction saved the two from almost certain death as five people have been severely injured, and one killed, under similar circumstances.

Mr. Speaker, the heroic acts of these brave men are representative of the selfless dedication and devotion to duty of their entire departments. I am extremely proud of the courageous

force of individuals who make up the South Bay fire and police departments.●

WARNINGS ON EL SALVADOR

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 24, 1981

● Mr. LaFALCE. Mr. Speaker, the administration's new policy initiatives toward El Salvador have produced a great deal of controversy both at home and abroad. Critics are fearful that these initiatives are giving the wrong signals to right-wing dictatorships throughout the world, by encouraging internal repression and discouraging social and economic reforms.

While there is abundant evidence that external assistance is being provided to the anti-junta forces, the roots of the civil war lie in decades of exploitation by the ruling class. Therefore, the only true long-term solution to the civil war is real social and ecomomic reforms; and that realization appears to be missing in the administration's statements on El Salvador. Without those reforms, which President Duarte of El Salvador has publicy supported, military assistance would be counterproductive and ineffective.

In two thought-provoking editorials in its March 15 and 16 editions, the Niagara Gazette has explored some of the aspect of the new policy on El Salvador. The first, entitled "El Salvador Role Viewed Dimly," emphasizes the hostile response which this new policy has encountered in foreign circles. The second, entitled "Robert White's Warnings," details what happened to a member of the foreign service when he courageously refused to adopt the new line on El Salvador. I hope that my colleagues will heed the warnings expressed in both of these editorials.

The editorials follow:

EL SALVADOR ROLE VIEWED DIMLY

The Reagan administration's support of the ruling junta in El Salvador came in for strong criticism in leftist and liberal European newspapers last week. Many expressed fears of another Vietnam war; some disputed the American charges that the Soviet Union and its allies were responsible for the fighting in the little Central American country.

In West Germany, the left-leaning Westfaelische Rundschau of Dortmund dismissed assurances from Secretary of State Alexander Haig that the United States would not get involved in another Vietnam. "The beginning of the escalation in Indochina was also marked by the arrival of American advisers," the paper pointed out.

Denmark's B.T., and independent-Conservative tabloid, said "President Reagan's accusations of foreign arms deliveries to the guerrillas are precisely like the Soviet leaders last year excused the invasion of Afghanistan by claiming that the rebels were getting weapons from the United States and China. What is the difference?"

Other comment gathered by the Associated Press:

West Germany—Essen Westdeutsche Allgemeine, liberal: "It was not the communist countries that created the revolutionary situation in El Salvador. Rather, it evolved as a result of social structures to which Washington contributed in maintaining."

Britain—The Guardian, liberal: A second Vietnam-type war is "not likely and inherently improbable," and a threat to détente is "not on the cards since the Russians have no desire to be involved," but President Reagan's handling of the situation "has significantly alarmed America's friends and allies. What, for example, will happen when there is a crisis which more directly affects the interests of western Europe?"

France—Le Monde, independent: President Reagan appears to be testing the members of the North Atlantic Treaty Organization and the Latin Americans as well as Soviet President Leonid Brezhnev.

Norway—Arbeiderbladet, leftist: "There is widespread fear that El Salvador could become another Vietnam. The conflict cannot be solved by military means, only by political means."

Denmark—Ekstra Bladet, independent-Liberal: "A comparison between El Salvador and Vietnam is almost too natural. That Reagan and Gaig deny every comparison is no surprise, but their political actions contradict these denials."

Politiken, independent-liberal: "The United States has a clear right to put a stop to Cuban influence by . . . halting weapons supplies to the guerrilla front. But it is also the United States' duty to force the junta to stop its repressive policies and to open the way for far-reaching economic and social reforms."

In Thailand, the conservative, English-language Bangkok Post also attacked the Reagan administration, saying America's friends and allies were dismayed because it was paying "not a flicker of attention to other trouble spots" and was "pouring good money to prop up what the democrats have called a corrupt and ruthless junta."

ROBERT WHITE'S WARNINGS

Governments, especially those headed by people who have all the answers, don't like to hear criticism from within of what has been stated as official government policy. Criticism can lead to questioning of that policy and that can lead to the impression that the government may not have all the answers it claims to have.

So people in government who criticize the policies of superiors don't stay in government very long. Ways are found to silence the critics and one simple way is to fire them. Government employees worry about job security just like anyone else and so, aware of the consequences, those same employees tend to keep their mouths shut.

Robert White is an exception. He has, in no uncertain terms, told the Reagan administration that it is pursuing a dangerous course in El Salvador. He has also dared to criticize the government of his host country for covering up a murder plot. So Robert White, a man in a position to know what's going on and a man in a position to know how to shape U.S. government policy, has been fired as ambassador to El Salvador. More than that, he has been ousted from the foreign service, ending a 25-year career.

White told a House committee the other day that he was fired for two reasons: his disagreement with the Reagan administration's "ready-made doctrine" on El Salvador and his challenge of the administration's statement that the Latin American country was investigating the murder of three American nuns and a church worker last December. On the latter issue, he said "If the price of keeping a job is to participate in the continuing cover-up of those responsible for this barbaric act, that price is too high for me to pay."

White said his firing is a clear signal to career foreign service employees: "Do not send in reports that conflict with preconceived theories, and tailor your recommendations to what Washington policymakers want to hear."

His firing is also a clear indication of the change in direction of U.S. foreign policy—a shift from emphasizing the importance of human rights to an emphasis on combatting terrorism. The former policy does not require allegiance from or to the left or the right. The latter forces one to choose sides, and the choice is not always clear.●

HIGHER LEARNING

HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 24, 1981

● Mr. HUBBARD. Mr. Speaker, I am sure you agree that we must balance the need for national fiscal responsibility with the importance that higher education has for our American system. As the House deals with matters affecting higher education, I would like my colleagues to take note of the views of my constituent, Leslie Ann Freels of Cadiz, Ky. Mr. Speaker, I submit the following:

As a student of senior standing in a Kentucky institution of higher learning, I am becoming increasingly alarmed at the financial status of our nation's colleges and universities. I realize the nation's economic crisis and give all my support to the reformation of this crisis. However, I would like to express my concern about any adverse affects that efforts to relieve our present economic situation might have upon education.

I urge you to consider the importance of educated Americans in reviving our present economy and furthering the American cause. I also encourage you to vote favourable concerning any issue that supports our American educational system.

Sincerely,

LESLIE ANN FREELS.●

ECONOMICS OR POLITICS?

HON. JOE MOAKLEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 24, 1981

● Mr. MOAKLEY. Mr. Speaker, the Congress is presently in the midst of a painful but very necessary process of reducing the Federal budget. No message has come across any clearer from last year's election than that the growth of the Federal budget must

slow down, and the economy must improve.

Unfortunately, the distinction that seems to have disappeared under the cloak of that mandate is the distinction between what is economics and what is purely political. There certainly are economic reasons for cutting the Federal budget, but most of the decisions as to where the cuts should come are very political decisions.

And, in keeping with long Republican tradition, the cuts are coming at the exclusive expense of the bulk of American citizens—middle- to low-income people—while those privileged few in the upper-income brackets are left untouched. Not only will they suffer virtually no cuts in Federal programs that benefit them, but they will also be the major beneficiaries of the administration's proposed tax cuts.

Worse yet, for all the sacrifices they are being asked to make, it does not look as though the American people will even get the one thing they said in November that they wanted—an economy in control. Instead, what is being proposed is a program that even Peter G. Peterson, Secretary of Commerce in the Nixon administration and now chairman of Lehman Brothers Kuhn Loeb calls "too much of an all-or-nothing gamble, too much of a high-wire act." Mr. Peterson also warned that if even a few of the administration's assumptions about unemployment, inflation and interest rates are wrong, the deficit for the fiscal year 1982 could readily climb to $100 billion, the largest in history.

The Democratic House does not wish to be obstructionist, Mr. Speaker, but neither will we stand idly by while social and economic progress that has been achieved slowly and painfully over the last half century is swept aside on the whim of a few millionaire members of Mr. Reagan's "kitchen cabinet," and of assorted other young administration gurus who may be bright but who have little conception of the responsibility of government.

No less a conservative commentator than George Will observed sometime ago that:

> It is politically difficult and morally questionable to "reform" laws, rules, incentives and disincentives to which powerful interests and vulnerable lives have conformed, and on which they depend. A large state is rendered conservative in the sense that it must face the fact that society is not a Tinkertoy that can be tinkered with casually.

Finally, Mr. Speaker, I would like to share with my colleagues an excellent article by Anthony Lewis of the New York Times, March 19, 1981, which spells out the need for Congress to critically review the Reagan budget proposals before us:

ECONOMICS OR POLITICS?

(By Anthony Lewis)

BOSTON, March 18.—When challenged on the human impact of his proposed budget cuts, President Reagan defends them as economically essential. He and his aides argue that only by cutting across the board can they get the budget under control and open the way for economic growth. Every interest has to share the burden, they say. The only exception is the "truly needy."

Those are the arguments. The facts, as they have begun to emerge in Congressional hearings, are different. It is clear now that the Reagan cuts would hurt people who by any definition are needy—and would spare juicy targets among the better-off. And the decisions on what to cut were not so much economic as political.

Consider this amazing fact: The United States Government now spends about $1 billion a year on health payments to elderly persons who have annual incomes of more than $30,000. Is the Reagan Administration proposing any cuts in or ceiling on those payments to the non-poor? No. The figures on Medicare recipients and their incomes appeared in a fascinating story by David E. Rosenbaum in The New York Times. About 1 million Americans over 65 have incomes above $30,000, he wrote. On average they get $1,000 a year in Medicare payments. Of course many rely on that money. But in a world of financial limits they are not "truly needy."

The same story told about a husband and wife, both disabled, who have seven children and survive on public assistance. Richard Schweiker, the Secretary of Health and Human Services, was asked on a television program what would happen to them under the Reagan program. They "wouldn't have to worry about being cut," he replied, because they were "a classic case of . . . the truly needy."

But Administration budget experts said the family would lose at least $6 a week for each child in school, under Reagan proposals to cut food stamps for children getting free school lunches. Assuming four children in school, the family would lose $24 a week in food stamps: a painfully significant amount for people who scrimp to get along on beans and macaroni.

That family, and others like it, would lose not only food stamps. The Reagan budget proposes cuts in fuel assistance for the poor, grants to the states for welfare, Medicaid and other programs. Administrative spokesmen fence with the figures, but there can no longer be any doubt that some truly desperate Americans will be worse off.

Public assistance programs are not sacrosanct. But there is a striking contrast between those budget cuts and ones that President Reagan chose not to make—a contrast in both equity and amount.

For example, there is widespread, nonpartisan concern about the growing cost of adjusting Social Security and Federal pension payments annually to reflect increases in the Consumer Price Index. This week Republican senators proposed that the payments be pegged instead to prevailing wage rates. That change would save $3.8 billion a year—more than twice the $1.8 billion the Administration wants to cut from food stamps.

When the senators took the idea to the President, he rejected it out of hand. He had made a campaign promise, he explained, not to change the cost-of-living increases. The reason, in short, was political.

When Reagan campaigned, he did not talk about cutting food stamps or making most of the other substantive reductions he has now proposed. He spoke of saving what had to be saved by ending "waste." In office he decided he had to make real domestic cuts to allow for a huge rise in defense spending. And he naturally avoided targets among those likely to be part of his constituency.

His budget proposed a 20 percent tax on fuel for private and corporate airplanes, which would have cut down on an enormous subsidy. But when the owners and pilots screamed, the proposal was withdrawn. They were Reagan voters.

None of this is surprising. Ronald Reagan and David Stockman can say, fairly enough, that they have no political hope of changing the budget if they take on the pilots and the Medicare recipients and the pensioners. But it is sad if a fiscally reformist Administration loses a chance for reform in outrageous subsidies and in programs that are really out of control.

It would be nice, anyway, if Stockman & Co. were less pious about the budget they hammered together in a few weeks. They sound sometimes as though they thought it had been handed down from Mount Sinai. It is a human effort, and a highly political one.

The realities of the Reagan program, as they become clear, also caution against rushed Congressional action. Under the guise of economic theory, the Administration is trying to push through a good deal of ideology: not just in cutting this budget or that but in eliminating whole programs repeatedly authorized by Congress, such as legal services for the poor.

Senator Daniel Patrick Moynihan warned the other day that the budget process was being perverted. "We're changing 30 years of social legislation," he said, "in three days of budget markups."●

DEATH OF A VA HOSPITAL

HON. FRANK J. GUARINI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 24, 1981

● Mr. GUARINI. Mr. Speaker, we are all aware of the need to make government more efficient. Many of us have preached that waste must be eliminated, and that the only way for government to survive and prosper is for each level, local, county, State, and Federal, to work together to insure that each dollar is properly spent.

Under the old definitions a project was judged by the need for the project and the proven cost effectiveness of the solution proposed. However, now, under the guise of economic austerity, we have a movement to end some projects even though they meet the strictest tests of need and cost effectiveness.

One such project is the proposed VA hospital in Camden, N.J. The Reagan administration is asking Congress to rescind the fiscal year 1981 appropriated money that would make the Veterans' Administration hospital in Camden a reality. In the next 2 months I hope that you will listen carefully to my New Jersey colleagues about why approval of this rescission would be a vote for waste and inefficient government.

For several years now the New Jersey delegation has worked with the Veterans' Administration to bring a geriatric medical center to south Jersey. Most recently, this work has been advanced by my colleague JIM FLORIO of Camden. The Veterans' Administration found that there were 300,000 veterans in south Jersey and 700,000 veterans in the south Jersey-Philadelphia metropolitan region. Demographic studies show that the number of veterans over the age of 65 will double in the next 10 years, and that by the year 1990 veterans will comprise 60 percent of the U.S. male population over 65.

As you can see, the planning for this hospital was not done in a vacuum. The Veterans' Administration had long come to realize that with the aging of the veterans population there would have to be a shift in the types of care provided. With congressional support the VA began a program to designate national geriatric research and education centers, of which Camden was one.

But now if President Reagan and the OMB have their say there will be no geriatric hospital in south Jersey to serve veterans. In a small but important hearing conducted by Congressman FLORIO the Veterans' Administration stated that the need is still there for this hospital. They also stated that there were no studies showing this approach to be anything but necessary for the future. In fact, the VA did not learn about the cancellation of the project until after OMB informed Congressman FLORIO.

What we must make fellow Members of Congress understand before they vote on this rescission of funds is what will be lost if this project is not completed. The Federal Government has already spent $7 million of the $75 million appropriated for this project. The lack of a geriatric hospital serving the needs of veterans will force expansion of current facilities that will run far greater than the $75 million cost of the specialist Camden unit.

But the loss of Government funds does not stop there. The loss of the Camden VA facility will mean the loss of 10 years of planning the urban redevelopment of Camden around the health care industry. The Federal Government will now have to step in and provide urban redevelopment funds instead of stimulating private sector initiatives to urban renewal. For you see, Mr. Speaker, against the promises of the VA hospital various private and public agencies have become involved in an ever-expanding program to serve the health care needs of New Jersey and revitalize the area. To quote from a review of the Camden VA Geriatric Medical Center, "Since 1972 the private sector and public sector in New Jersey has acted decisively and in good faith on repeated assurance that the Federal Government would deliver its piece of this innovative partnership plan."

Working with the VA in pursuit of this plan, the State of New Jersey appropriated $9 million for a new medical education building in Camden and Cooper Medical Center rebuilt and reequipped its building at a cost of $45 million. The State medical school and the Cooper Medical Center were to stand with the Veterans' Administration Hospital as a triad in the research and care of the geriatric veteran.

This project is urgently needed. The veterans of Pennsylvania and New Jersey need it, the national research community on geriatrics needs it, the business community of South Jersey needs it, the health firms which have spent millions of dollars preparing for the center need it, and all of us who have spoken against waste and the need for efficient government need it as an example of what government at all levels can do in conjunction with private enterprise.

Do not defeat this showcase of government promise. The life of more than a hospital hangs with the rescission vote, we are voting on the health of a community and our veteran population.●

CHIEF WILLIAM TOBIN HONORED FOR SERVICE

HON. HAROLD C. HOLLENBECK

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 24, 1981

● Mr. HOLLENBECK. Mr. Speaker, Chief William Tobin, who has compiled 35 years of distinguished service with the Dumont Police Department, is retiring from his position. I wish to join the members of his force and his law enforcement colleagues in recognizing the achievements of his distinguished career.

Chief Tobin, a lifelong resident of Dumont, joined the department in 1946 and rose through the ranks to his present position in 1974. He is a recognized authority in forensic investigation and the laws of search and seizure and rules of arrest.

In addition to fulfilling his responsibilities for the safety of the citizens of his community, Chief Tobin has maintained active involvement in the Bergen County Chiefs Association Executive Board, the New Jersey Chiefs, and the International Chiefs Association. He is a member of the New Jersey State Identification Officers Organization and of Police Benevolent Association Local No. 83. For many years, Chief Tobin has instructed young officers in law enforcement procedures at the Bergen County Police Academy.

For his commitment to the community of Dumont and to the enhancement of the quality of his profession, he has earned our deep respect and sincere gratitude.

I am proud to extend to Chief Tobin my congratulations on a job well done and my very best wishes for happiness and good health in retirement.●

IN HONOR OF CALIFORNIA'S COUNTY AGRICULTURAL COMMISSIONERS

HON. VIC FAZIO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 24, 1981

● Mr. FAZIO. Mr. Speaker, agriculture is California's No. 1 industry. In 1979, the fertile soils of California supported over 200 different crops, which were valued at over $14 billion and shipped throughout the United States and foreign countries. Weather, water, and good farmers are some of the major factors contributing to California's bountiful crops. One other prime factor in California's agricultural success has been the presence of California agricultural commissioners.

California County Agricultural Commissioners will celebrate their first 100 years during their annual convention to be held in May 1981 in Santa Cruz, Calif. No other State in the United States has the agricultural commissioners system, which has been in existence in California since 1881. It is fitting that the California agricultural commissioners be recognized and honored for their contributions to the well-being of California and our Nation.

As prescribed by State law, the county agricultural commissioner is responsible for the local administration of statewide enforcement programs which promote and protect the agricultural industry of the State and protect the public health, safety, and welfare. In fulfilling this responsibility, the objectives of the county agricultural commissioner are:

To serve the citizens of their respective counties and of the State of California by protecting and promoting the agricultural industry in the interests of health, safety, and welfare; and to maintain a viable system of production and delivery of an abundant supply of wholesome food and fiber to domestic and export consumers.

In order to achieve these objectives and to maintain the integrity of the purpose of the country agricultural commissioner's office, it is the policy of each agricultural commissioner to:

1. Protect the agricultural resources and the environment of California in a manner that will result in the greatest longterm benefit to all;

2. Preserve local determination in administering statewide laws and regulations, and insure that all interagency and joint policies

provide adequate flexibility to accommodate overriding local concerns and resources;

3. Protect the agricultural industry, the public, and the environment through enforcement of existing laws and regulations and the support of new legislation only when existing laws are inadequate;

4. Protect the agricultural industry and the environment from the introduction and spread of damaging pests by the judicious use of regulatory authority;

5. Abate pest infestations based on statutory authority when it is in the public interest and welfare;

6. Encourage and promote the suppression of pests by biological, cultural, mechanical, chemical or any combination of these methods and use regulatory authority to suppress pests by the interruption of biological cycles;

7. Protect people, animals, property and the environment from exposure to harmful pesticides by the enforcement of all laws and regulations which provide for the appropriate, safe and efficient use of essential pesticides;

8. Protect consumers from fraud and deception and assure equality of competition between producers and shippers in the marketing of fruits, nuts, vegetables, eggs and honey by the uniform enforcement of minimum standards of quality, packaging and labeling established for these commodities;

9. Encourage development of alternate disposal methods for substandard commodities which will prevent waste of these resources;

10. Publish an annual report of each county's agricultural production and production facilities to establish a basis for the logistical support of the agricultural industry and compile special reports to other agencies when required; and

11. Provide without political bias, effective, uniform and objective administration of the responsibilities and functions over which the County Agricultural Commissioner has jurisdiction.

The agricultural commissioners are today enforcing legislation of the basic quarantine sections that have stood for over 90 years. It has been the enforcement of these quarantine laws that has helped to keep California agriculture free from most of the major insect and plant diseases found in other parts of the world.

The work of the agricultural commissioners is to be commended as their presence, dedication, knowledge, professionalism, and hard work has insured an adequate food supply for millions of people and a healthy economy for the State of California. Our Nation's residents as well as citizens of other nations are the beneficiaries of an amazing supply of agricultural products grown throughout the year in California. California, her farmers, and agricultural commissioners can be proud of the first 100 years of service.●

STATEMENT BY THE AFL-CIO EXECUTIVE COUNCIL ON POLAND

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 24, 1981

● Mr. DERWINSKI. Mr. Speaker, the Executive Council of the American Federation of Labor & Congress of Industrial Organizations (AFL-CIO), during its mid-winter meeting in Bal Harbour, Fla., adopted the following resolution on Poland. I enter it in the RECORD for the information of the Members.

STATEMENT BY THE AFL-CIO EXECUTIVE COUNCIL ON POLAND, FEBRUARY 17, 1981, BAL HARBOUR, FLA.

The historic achievement of the Polish Workers in creating and sustaining the first free and independent trade union movement in the communist world has excited the deep admiration of free trade unionists everywhere.

Since its birth in the strikes of last August, Solidarity's membership has rapidly swollen to ten million—three times the membership of the Polish Communist Party. With the collapse of the old official "unions," abandoned by the workers, Solidarity now incontestably represents the workers of Poland. This triumph is a tribute to the courage, skill and discipline of Lech Walesa and the Solidarity leadership, and the valiant working people of Poland.

The AFL-CIO salutes the brave men and women of Solidarity, and pledges full support of their cause in whatever ways they deem useful.

The Executive Council is proud to note that the Polish Workers Aid Fund, established by the General Board last September, has raised over $200,000, which is being used, in accordance with Solidarity's wishes, for the purchase of much-needed office equipment and supplies. This Fund, built from contributions from every level of our trade union movement, demonstrates the strong solidarity of American workers with the struggle of their Polish brothers and sisters.

The Polish government continues to throw up obstacles to Solidarity. The government has still not lived up to its side of the 21-point agreement signed in Gdansk on August 31, 1980. Media censorship has not been eliminated; Solidarity has been denied the means of publishing a weekly magazine; provincial chapters of Solidarity have been harassed by authorities; the government has refused to publish trade union legislation; members of KOR (the Social Self-Defense Committee, allied with Solidarity) are being persecuted; the government has dragged its feet in implementing the agreement on free Saturdays and a 40-hour workweek.

These actions can only fuel worker unrest. The Polish Communist Party appears intent either on provoking a confrontation or on undermining Solidarity's position.

Adding to the tension, the Soviet Union and its Warsaw allies have conducted a relentless campaign of intimidation aimed at frightening the Polish workers. Some 20 Soviet divisions have been amassed along the Polish border, while the Soviet propaganda apparatus fires verbal threats, attacks on Solidarity's leadership, and denunciations of "subversive, anti-socialist forces" in the Polish unions.

In recent months the Soviet Union and its satellites have launched a massive and slanderous propaganda attack on the AFL-CIO because of its assistance to the Polish workers. We will be no more intimidated by these predictable tactics than the Polish workers have been.

The Polish economy is on the verge of bankruptcy, the result of mismanagement by the Polish government and the inefficiencies inherent in the Soviet-imposed economic system. Yet, Poland's economic troubles are cited to counter Solidarity's demands for a 40-hour week, better wages and lower prices.

Because we share the aspirations of Poland's workers for a better life and for an economic climate more conducive to Solidarity's success, the AFL-CIO is prepared to support an extension of Western credits to Poland, but only under conditions that safeguard the rights and interests of the workers.

Poland's debt to the West already amounts to more than $20 billion, the largest of the East bloc countries. To ensure repayment, the international banking community has in the past pressured the Polish government into policies of austerity, which have been borne by the workers in higher prices and longer work weeks. The extension of credits or rescheduling of Poland's debt could intensify the exploitation of Polish workers and threaten their hard-won gains.

The AFL-CIO will support additional U.S. aid to Poland only if it is conditioned on the adherence of the Polish government to the 21 points of the Gdansk Agreement. Only then can we be assured that Polish workers, through their free unions, will be in a position to defend their gains and to struggle for a fair share of the benefits of Western aid.●

UNITED STATES GIVES THE EDGE TO FOREIGN FIRMS

HON. GEORGE C. WORTLEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 24, 1981

● Mr. WORTLEY. Mr. Speaker, as the Congress considers American industry and foreign competition, we must examine not only the theory but also the reality of present circumstances and future action.

Chris J. Witting has studied the problem and proposed a solution. He is the chairman and chief executive officer of Crouse-Hinds Co. in Syracuse, N.Y., and is a constituent of mine.

Mr. Witting recently made his argument and recommendation in a commentary, which follows:

[From the Washington Star, Mar. 4, 1981]

U.S. GIVES THE EDGE TO FOREIGN FIRMS

(By Chris J. Witting)

Like most American businessmen I am a staunch supporter of free trade. But I am also disturbed by the glut of foreign goods that has invaded our shores. Sixteen per cent of the bicycles, 23 per cent of the cars, 88 per cent of the black and white TV sets and 99 per cent of the radios bought by

Americans last year were made in foreign factories.

This happened because we have the lowest tariff barriers in the world; because production costs, including labor, are often far lower overseas; and because other governments zealously protect, favor and subsidize their industries—while the U.S. government takes a perverse pleasure in making life as costly as possible for its businessmen.

Our government appears to have only the dimmest perception of the realities of international trade. It continues to act out of a bias that may have been admirable in the trust-busting days of Teddy Roosevelt, but is totally out of place today. In its obsession with monopolistic practices, it burdens American industry with costly rules and regulations, while our overseas competitors encourage the creation of trading companies and cartels.

FTC STEPS IN

The current attempts of the Federal Trade Commission to regulate the way in which American industry sets its standards serve as a crucial case in point. Under our capitalistic system most industry standards are set by voluntary groups free of government control. In the electrical industry, for example, Underwriter's Laboratory and the National Protection Association, both nonprofit organizations, generate standards that govern the design, production and installation of products.

It is because of those standards that (from an electrical standpoint) the federal government appears to have only the dimmest perception of the realities of international trade. American residential, commercial and industrial buildings are the safest in the world. But here comes the FTC with proposed rules that would govern the way standardmaking bodies go about their task. In addition to being costly and complex, most of the proposed FTC rules would be counter-productive. If adopted, they would stifle innovation and result in a decrease in the output of new standards.

The FTC says it is afraid voluntary standard-making bodies behave in an arbitrary way that serves vested interests and restrains domestic trade. In short, it wants to make sure that the giants of industry do not run roughshod over small and moderate sized firms by controlling the standard-making process.

But as the chief executive of a moderate-sized electrical manufacturing company, I am not in the least concerned about my larger competitors seizing the standard-making regulations to the detriment of my company. But I am seriously concerned about the erosion of American standards in my industry to the point where foreign competitors can flood the domestic market with cheap and inferior goods.

Right now American standards that govern everything from circuit breakers to chicken coops are under attack in the name of free trade. A few years ago the 85 nations who are signatories to the General Agreement on Tariff and Trade (GATT) agreed in principle to eliminate standards that serve as barriers to trade. Early last year Congress passed the Trade Agreement Act of 1979, which (among other things) includes the GATT code on standards, and the president signed it.

This law says that wherever appropriate, governments and the private sector must abide by international standards—which now supersede domestic ones.

EUROPEAN RULES

At the moment nobody knows exactly what "international standards" means. But it is a fact that many of the international standards now in existence reflect European practices. Under the GATT code, then, American manufacturers are being asked to abide by standards familiar to our competitors and foreign to us.

To be sure, there is that "wherever appropriate" escape clause. For example, we don't have to abide by international standards if they undermine national security, threaten health and safety, contribute to deceptive practices, or affect the climate or geographical conditions. But we all know that exceptions are the sugar coating that makes it easier to swallow the pill. The plain fact is that those exceptions can be interpreted as loosely or as stringently as officials under fire desire.

RETALIATION

It doesn't take much imagination to foresee our trading partners clamoring for the right to bid on public projects in this country on the basis of international code. They surely would not hesitate to remind our government that it agreed to enforce GATT. And they will suggest that if the American government doesn't live up that treaty, then they will be forced to take retaliatory steps by raising additional tariff and nontariff barriers of their own.

All GATT signatories share one point in common. They're all interested in the lucrative market that reaches from the Atlantic to the Pacific Oceans and runs from the Great Lakes to the Gulf of Mexico. It's the richest market in the world, as rich as all the European markets combined. Anything they can do that will make it easier for them to penetrate this market—without unduly abandoning their own protectionist policies—they're bound to do.

American industry need not stand by helplessly and watch its hardearned standards wither away. We can buttress our own codes, enforce them, improve them and introduce new ones as technologies emerge.

What's more, we have it in our power to raise international standards to our sights and expectations. But to do that we need at the very least the understanding and cooperation of officials in Washington. Instead of trying to subvert our voluntary standard-making process, they ought to be taking steps to support and strengthen it.●

ELIMINATE FEDERAL UNEMPLOYMENT-PENSION OFFSET

HON. JAMES WEAVER

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 24, 1981

● Mr. WEAVER. Mr. Speaker, I am today introducing legislation that would completely eliminate the Federal unemployment-pension offset. The controversial full unemployment-pension offset was modified by Public Law 96-364. Unfortunately, these changes did not go far enough. Most UI claimants receiving social security benefits will still be subject to the pension offset because of the base-year employer contribution provisions.

The National Commission on Unemployment Compensation has recommended complete repeal of the offset. They reason that UI and pensions both compensate for services rendered at an earlier date; risks covered are not duplicative and protection is appropriate for each. The offset is not consistent with the changes in mandatory retirement law. The modified offset will be extremely difficult for the States to administer. Offset legislation would be best left to the individual States. In fact, the complete offset of the prior law was conformed to by only 14 States—8 of which were conditional on the Federal legislation.

In my home State we are confronted with a unique problem. The Oregon Legislature only meets biennially, and our constitution prohibits State statute predicated on Federal law. Thus our retired-unemployed are still subject to the full offset provisions of the old Federal statute. Should Congress delay until next year—when the enforcement complications and inequities of the modified offset become too obvious to ignore—the further modification or repeal of the unemployment-pension offset Oregonians would again suffer unnecessarily.

The original pension-unemployment offset was formulated to eliminate a perceived abuse of the UI program. It was found that some persons were unemployed and pensioned by the same firm and were not available or willing to work—they were truly retired. These persons should be disqualified from benefits by the State UI division because they are not available and willing to work. A blanket provision that penalizes older workers who work from necessity and are subjected to involuntary unemployment—nearly 5,000 in my State alone—is a poor method to penalize those few who abuse the system.●

THE FLOOD OF ILLEGAL ALIENS MUST BE CONTROLLED

HON. ROBIN L. BEARD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 24, 1981

● Mr. BEARD. Mr. Speaker, today I am introducing, along with Mr. COELHO, the Immigration and National Security Act of 1981, a bill which offers a comprehensive approach to one of this country's most serious problems: the increasing flood of illegal aliens into America.

It is now estimated that there are anywhere from 5 to 10 million illegal aliens living in America, many holding jobs. In the last several years the Border Patrol has apprehended over a million illegal aliens per year attempting to enter the country. Since those apprehended usually represent only a fraction of those actually entering, the

enormity of the problem is easily discerned.

What are the implications of this silent invasion? The problem can be broken down into several areas:

In the economic area, illegal immigration clearly exacerbates unemployment, especially among America's poor. The presence of millions of illegal aliens who will work cheap and work scared is a temptation to many employers who would rather hire illegals than Americans. I reject the argument that American citizens will not accept the jobs illegal aliens will. If there were no illegal alien labor force, working conditions and wages would have to be attractive enough to draw American citizens. Moreover, I believe the huge unemployment rate among America's poor youth is directly related to their inability to find entry-level jobs because of competition from millions of illegal aliens.

Illegal aliens do not just hold agricultural sector or entry-level jobs. They are increasingly found in highly paid construction and manufacturing positions. In fact, former Secretary of Labor Ray Marshall states that if the millions of illegal aliens were removed from the work force, the American unemployment rate would drop to 4 percent immediately. Why should American workers have to compete with the world's poor millions for jobs in their own country?

That illustrates another cost of illegal immigration. Every percentage point of unemployment costs the taxpayers billions of dollars in unemployment compensation, food stamps, and other payments. We have also learned recently that illegal aliens increasingly are receiving Government benefits, such as public housing and medical care.

In the environmental area, our rate of illegal immigration gives our country the highest rate of population growth of any industrialized nation. We will never have environmental stability in this country as long as our population grows that fast, because the demands on our dwindling supply of open land and natural resources are intensified.

Uncontrolled immigration is also a threat to the national security of this country. When Fidel Castro can decide to dump with impunity tens of thousands of undesirables on us, our national sovereignty is violated. Secure borders are an integral part of sovereignty. No other industrialized country in the world allows its borders to be violated on such a massive scale as the United States. Nor do I accept the argument that we in America must act as a safety valve for those countries which cannot—or will not—moderate their population growth. As long as foreign nations can use America in that fashion, they have no incentive to secure control of their population. And the American taxpayer and unemployed should not have to be the victims of other countries' population explosions.

My bill, which is identical to one being introduced by Senator HUDDLESTON, would do four things essentially: it would increase enforcement of the immigration laws, prohibit the knowing employment of illegal aliens, place a ceiling on the total amount of legal immigration, and offer amnesty to certain aliens with sufficient community ties and residence.

I want to emphasize that no unfair burden is being placed on employers to serve as enforcers of the law. When the act is fully in effect, the responsibility of employers will be no more than is currently required to check out the validity of a credit card via telephone call-in.

Nor does the act establish some form of national identity card system. It merely seeks to use the social security number as a means for employment. The act also does not affect any present or future bracero type of program for those sectors of the economy where such a program is needed.

Following is a section-by-section summary of the bill and an article by William Raspberry of the Washington Post on the harmful effects of illegal immigration on America's poor and jobless—entitled "Their Tired, Their Poor—Our Jobs."

The bill and article follow:

THE IMMIGRATION AND NATIONAL SECURITY ACT OF 1981

SECTION 1

This section entitles the legislation as the Immigration and National Security Act of 1981.

SECTION 2

Provides a preamble to the Immigration and Nationality Act for the guidance of courts and others in interpreting the act's provisions. The preamble recognizes the need for a generous immigration policy, but emphasizes also the need for controlled and limited immigration.

SECTION 3: STRENGTHENING OF BORDER PATROL

Requires expansion of the Border Patrol to at least 6,000 officers, and provides for the procurement and use of the most modern equipment and support available. It also provides the authorization for a new, more secure alien identification card. The effect of this section would be to increase the resources available to enforce the immigration laws.

SECTION 4: NUMERICAL LIMITATIONS

Establishes a flexible ceiling on legal immigration admissions. The ceiling is set at 350,000, including all immigrants. In an emergency, and only after consulting with Congress, the President may "borrow" admissions from the next year in case of emergency, and/or may disregard internal statutory limits below the overall ceiling.

The President must report to Congress each year the projected number of admissions, and the Secretary of Labor must report an opinion to Congress on whether that level of admissions will affect the U.S. workforce. The effect of this section will be to limit legal immigration to the target set by Congress in 1975, and exceeds average immigration for the past 70 years. This level also exceeds the total immigration for permanent residence of all other countries in the world combined.

SECTION 5: ASYLUM

This section provides first that an applicant for asylum show that the qualifying persecution or fear of persecution is due to conditions prior to departure from his or her homeland, and not due to the actual fact of departure alone. This section also defines the "entry" into the U.S. of an applicant for asylum, as a means of returning the level of procedural rights afforded an asylum seeker to the same level as is used in other civil immigration proceedings. And third, this section requires the drafting of contingency plans to handle future large groups of asylum seekers, including the establishment of reception centers outside the U.S.

The effect of this language will be to make asylum more difficult for some aliens to achieve, but will reduce the adjudication burden on the government and the support costs for local and state governments from asylum procedures, such as those now being experienced in Florida.

SECTION 6: PAROLE LIMITATION

The Attorney General's parole authority was originally intended to be used in individual emergency situations when it was necessary to bring an alien into the United States temporarily. However, this authority has been distorted by prior attorney generals who have admitted large groups of aliens. This provision would restore the original intent of the authority.

SECTION 7: RECORD OF ADMISSION

Under specified circumstances, those illegal aliens who qualify would be permitted to obtain permanent resident status. This would be accomplished by amending an existing section which granted the same status to illegal aliens who had entered the country prior to June 30, 1948.

The requirements would include continuous residence since January 1, 1978, registration within six months of the implementation of a secure Social Security card system, financial sponsorship similar to that required of applicants for legal immigration, a showing of undue hardship if forced to leave the U.S. and admissibility in accordance with Section 212(a).

SECTION 8: FAIR HIRING PROCEDURES

This section would prohibit the knowing employment of illegal aliens. It would provide graduated civil and criminal penalties for violations. Authority would be given to the Attorney General, Secretary of Labor and Secretary of HHS to implement a gradually phased-in program.

In the first phase, an applicant for employment would be required to sign an affirmation that he or she is eligible to work in the United States. The affidavit could be made part of the already existing W-4 withholding form each employee must already fill out. This easily and rapidly initiated procedure, along with increased enforcement procedures envisioned by Sec. 3, would provide immediate relief from the flood of illegal alien labor while the more extensive national fair hiring procedures in Phases Two and Three are implemented.

Phase Two would be an institution of a verification system to improve the security of the social security numbers now required to be used by all applicants for employment.

Such a system would include the initial cross-checking of the existing social security data for obvious errors, such as that of several employees having identical numbers.

Further, there would be a check of social security numbers submitted by new employees for fraudulent or erroneous numbers. This latter verification could be accomplished through a system whereby an employer could simply call in a prospective employee's social security number and receive almost instant verification. Initially, this would possibly have to be done on a random basis. If the number were found to be invalid, the prospective employee would be required to correct the problem before his employment would be confirmed.

If the Employment Security Administration of the Department of Labor, with 2,600 offices nationwide, were incorporated into the system, the verification and correction process probably would be expedited. When a social security number was valid, the employer would receive a transaction or authorization code, showing that the number was valid and that the employer reported as required.

Phase three would involve the issuance of a new and more secure social security card which would be based on positive proof that the individual is a citizen or legal resident. The new card would have some type of unique identifying element, such as a serial number or photograph. The data from these cards would again be submitted for verification when an individual applied for a new job. However, there should be adequate facilities by this time to verify immediately every new applicant for employment.

SECTION 9: FEES AND CHARGES

This section would clearly establish the authority of the Attorney General to prescribe a uniform schedule of fees and charges for immigration related procedures, which would help defray the cost of the new enforcement procedures.

[From the Washington Post, July 4, 1980]

THEIR TIRED, THEIR POOR—OUR JOBS

(By William Raspberry)

MIAMI.—Black Americans are suffering a severe case of mixed emotions with regard to the tidal wave of Cuban refugees that threatens to inundate this south Florida city.

On the one hand, there is bitter resentment over the fact that the Cubans have been treated much better than Haitian refugees who also want to come to America. On the other, refugees of all sorts and colors are viewed as unfair—potentially disastrous—competition to America's own struggling blacks.

Margaret Bush Wilson, chairman of the board of the NAACP, played both these themes in her Monday night keynote address to open the organization's 71st annual convention here.

She questioned the logic, accuracy and fairness of classifying the fleeing Cubans as "political refugees" (as though economic hardship were no part of their motivation) and fleeing Haitians as "economic refugees" (as though political repression were no part of theirs).

But the racial overtones of U.S. immigration policy go far beyond the Caribbean.

"There are eight million refugees in the world, three million of them on the African continent," Wilson told convention delegates. "But while America is outreaching to Asia and to Europe to invite refugees to receive the benefits and economic support for new life in this nation, we are suddenly made to face the harsh but subtle reality of racism in international relief and refugee assistance.

"The United States is not only paying for European and Russian refugees to come to the United States, but paying the cost of their immigration to Israel and to other Middle East and European countries. It is ironic that in the midst of the concern about the cost of the recent incoming of Cuban refugees, one suggestion was that $10 million of the already paltry aid to the countries of the African continent, where more than one-third of all refugees are to be found, would be devoted to Cubans."

But while Wilson, a St. Louis attorney, was calling for equitable treatment among refugees, she also expressed her fear that the influx of all refugees will excerbate the already dire employment problems of black Americans.

The recent riots here, she said, were a warning that "if an accommodation is not soon made between refugee accommodation and domestic unemployment, there is going to be increased tension and trouble.

"While we say, 'Give us your tired, your poor,' to those outside," she said, "we say also: give jobs to those inside so that they will receive the refugees as fellow humans and brothers and sisters, rather than as competitors for scarce jobs in a shrinking employment economy.

"We need an immigration and refugee policy which can control the flow of immigrants so as to better match the demand for labor and avoid unnecessary competition for entry-level jobs that are so desperately needed by our youth."

If there is one overriding theme to this convention, it is the desperate economic plight of the bottom-of-the-barrel black Americans. And their situation is growing worse as the result of entry-level competition of Cubans, Southeast Asians, Haitians and Mexicans—including the uncounted hordes of illegal aliens.

And even while NAACP officials are agonizing over the problem, other Americans are calling for blanket amnesty for the "undocumented workers"; already here—often on the ground that they are willing to take the dirty, demeaning and low-paid jobs that the American home-grown poor are unwilling to take.

Roger Conner, executive director of the Federation for American Immigration Reform (FAIR) has met that argument with two key points. First, a lot of Americans are working at those jobs, which means that the illegal aliens represent unfair competition, particularly since they are frequently willing to work at less than legal wages.

Second, by no means are all the aliens employed at sub-par jobs. "Illegal aliens have been found working as painters on the Statue of Liberty, earning union wages, and as construction workers on the District of Columbia's subway, earning a minimum of $16,000 annual salary," Conner told the Select Commission on Immigration and Refugee Policy meeting last December in San Antonio.

"I know of no one who argues that American workers should have to compete with the world's labor force for jobs in their own country."

But while Conner discusses the problem in terms of legal equity, Benjamin L. Hooks, NAACP executive director, talks about it in terms of its explosive potential, a warning that takes on special urgency in this city so recently torn by racial strife.●

A REAL SUPPLY-SIDE TAX CUT

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 24, 1981

● Mr. LaFALCE. Mr. Speaker, one of the most disreputable aspects of the U.S. tax code is the marriage penalty tax on married working couples. This penalty imposes an inequitably higher tax burden on married working couples than on single taxpayers, which means that families are being penalized for their married fidelity.

The elimination of this penalty would not only serve the interests of fairness, but it would also have an immediate and substantial impact on the supply side of the economy. Married working couples are the most likely to plow tax relief back into investments and savings, because they are the households with a long tradition of saving for the proverbial rainy day.

Yet, this real supply-side tax cut has been relegated to the amorphous second tax cut bill by the administration, while it proceeds with its Keynesian across-the-board tax cut.

Nancy S. Barrett, an economist with CAB, has written an excellent case for an immediate end to the marriage tax penalty in an article for the Washington Post in its March 19 edition, entitled "Working Couples Could Use the Break." I hope that all of my colleagues will remember her arguments as we approach the omnibus tax bill later this year.

The article follows:

WORKING COUPLES COULD USE THE BREAK

In view of the Reagan administration's strong commitment to the supply-side philosophy of tax reduction, it is curious that its 1982 budget proposal passes up a potentially powerful supply-side opportunity: lowering the marginal income tax rate for a married couple's second earner. Also known as the "marriage penalty," taxation on the basis of a couple's joint income imposes a much higher marginal (and average) rate of tax on the second earner than if the tax were computed on the basis of that person's individual income. Lowering this tax would provide a much stronger impetus for supply-side growth than across-the-board tax cuts, adding both to saving and to work effort.

According to supply-side theory, a tax cut can actually reduce inflation as it increases real growth if it provides an incentive for increased work effort and saving. First, regarding work effort, common sense—not to mention a myriad of statistical studies—suggests that second earners have far more discretion than single earners in the choice of whether or not to work and for how many hours per week. If a reduction in marginal tax rates is to have any impact on work effort at all, it is likely to have a far greater effect on second earners than on any other group. Yet these individuals, under the current system, have the highest marginal tax rates of any group.

It is noteworthy that the labor force participation rate of Swedish women increased by roughly 10 percentage points following a

change from joint to individual taxation. In Sweden, however, the majority of these married women work part-time, suggesting that the supply-side effect was to increase work effort while permitting wives to combine paid employment with child care and other family responsibilities.

Turning to the impact on saving, again there is overwhelming evidence that many households can afford to save only if there is a second earner. Median earnings of two-earner married couples are about $25,600, compared with $18,100 for single-earner couples. The only way most families have been able to keep up with inflation since the early 1970s has been increasing labor force participation and hours worked of second earners. Declining productivity combined with the oil drain (as skyrocketing prices of imported oil have transferred income to OPEC nations) would have meant a huge drop in family living standards had this supply-side response not occurred.

When incomes fail to keep up with inflation, most people attempt to maintain living standards by reducing savings and even going into debt. Obligations such as a mortgage and car payments must be met. And families who have not responded to inflation by having a second earner at work will save less than two-earner families. Thus, a tax policy that encourages a supply-side response by families burdened with inflation will mean greater overall savings, as fewer families need to dip into bank accounts or go into debt to meet their needs.

Clearly, the Reagan administration wants to minimize the tax loss associated with any supply-side policy. (Alternatively, of course, the aim could be simply to relieve excessive tax burdens on everyone—probably a very sound policy.) But for real supply-side bang for the buck, tax cuts should be targeted where they are most likely to encourage saving and added work effort. Reducing taxes on second earners is clearly such a policy.

And there are alternative ways to accomplish it: either a tax credit against part of the second (lower) income, as proposed in the Carter budget, or optional individual filings for two-earner married couples, as suggested by Rep. Millicent Fenwick. Neither proposal would increase taxes for single-earner families. And such a tax reduction would avoid costly windfalls to individuals whose supply-side response is likely to be negligible.●

CHESTER MUTRYN'S INDUCTION INTO XAVIER UNIVERSITY ATHLETIC HALL OF FAME

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 24, 1981

● Ms. OAKAR. Mr. Speaker, on February 28, 1981, Chester Mutryn, former all-football pro from Cleveland, Ohio, was inducted as an original charter member into the Xavier University athletic hall of fame. Out of the thousands of Xavier students who have attended Xavier since the turn of this century, Chester Mutryn was among the first elected to Xavier's hall of fame—quite an honor.

Chet Mutryn earned a name for himself in football when he played at Cleveland Cathedral Latin High School and won the title of all-scholastic quarterback. While at Xavier, the Toledo Touchdown Club named him as the most outstanding player in Ohio. In 1941, Mutryn led the State in scoring and took the Xavier football team to a 9-1 record. Cincinnati football fans will always remember Mutryn as an exciting player who gained all-American honors for 2 consecutive years before he left Xavier.

After serving in the Armed Forces for 2 years, Chet Mutryn began his pro football career in 1946 when the Cleveland Browns signed him and sent him to play in Buffalo, where he stayed 4 years. Mutryn earned all-American Football Conference honors in 1948 and 1949 and missed only one game in 5 years. When Mutryn retired from pro football in 1950, he ranked fourth among all the pros of the 1946-59 era in average yards gained per carry.

Chester Mutryn now owns a real estate business in Garfield Heights, Ohio, which community I am proud to represent. He has been active in the affairs of many civic groups and is currently vice president of the Cleveland Society of Poles, an organization made up of professionals and businessmen of Polish descent.

I wish to congratulate Chester Mutryn and his wife, Isabelle, and two daughters, Barbara and Deborah, on his induction into the Xavier University Athletic Hall of Fame. All of Cleveland and Ohio is proud of you, Chet.●

A SHIPBUILDING SUCCESS STORY

HON. DAVID F. EMERY

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 24, 1981

● Mr. EMERY. Mr. Speaker, I believe I would be quite accurate in stating that the American maritime industry, like its sister industries, the U.S. automotive industry and the U.S. housing industry, has been engulfed in a severely depressed state of affairs for the past several years.

During this time, new ship construction orders, both Navy and commercial, have been extremely low, further exacerbating the perilous state of our naval forces and the dwindling capabilities of our Merchant Marine.

The Reagan administration's program for rebuilding our Navy is a positive step which I believe should be supported by the Congress. I am confident that the new administration will work equally hard to reestablish our Merchant Marine over the next 4 years. However, the ills that currently plague our shipbuilding industry cannot be cured overnight. Nor can they be corrected by a simple projected shipbuilding plan or a promise to take definitive action. The industry will need time to recover from its difficulties.

Yet, through all the black clouds looming ominously over the shipbuilding industry, I am happy to report that there is at least one bright star which is demonstrating what a healthy industry can do for this Nation and its economy. That star is the Bath Iron Works.

Situated on the southern coast of Maine adjacent to the Kennebec River, the Bath Iron Works shipyard, with its current team of aggressive, highly capable, and farsighted managers, and its labor force of some 6,000 dedicated and highly skilled shipbuilders, has achieved construction milestones unprecedented in modern shipbuilding history.

Taking a shipyard with a backlog of $125 million in "unfavorable" contracts in 1975, the BIW management team, headed by Mr. John Sullivan, chairman of the board and chief executive officer of Bath Iron Works, and supported by the aggressive and long-ranged policies of Mr. Byron Radaker, chairman of the board and chief executive officer and Mr. Eddy Nicholson, president and chief operating officer of the Congoleum Corp., turned the shipyard into a highly successful operation with a backlog of nearly $800 million worth of contracts today.

Having been awarded the lead ship contract for the FFG-7 class guided-missile frigate, and subsequently 17 additional frigate contracts, Bath Iron Works has responded by delivering its first 6 ships an average of 16 weeks ahead of contracted schedules and at a projected savings to the Navy, and the American taxpayer, of nearly $30 million.

Mr. Speaker, no other shipyard at this time can boast of such a tremendous performance record. In fact, so noticible has the success story at Bath been lately, that I am happy to share with my colleagues the following article which appeared in the March 6 edition of the Journal of Commerce.

Despite the problems of our maritime industry, the Congress and the American people can take heart with the performance of the Bath Iron Works. I believe the mangement and work force at the Shipyard deserve a hardy round of applause for a job thus far well done.

BATH IRON WORKS: A SUCCESS STORY

BATH, MAINE.—The chairman of Bath Iron Works Corp. says three things are responsible for the firm's turnaround from an ailing shipyard with a backlog of $125 million in "unprofitable" contracts in 1975 to a money-making operation with a $767 million backlog today.

The factors are modern management, extensive planning and a good work force, said John F. Sullivan Jr., a former chemical en-

gineer who became president and chief executive officer of the Gongoleum Corp. subsidiary in June, 1975 and chairman earlier this year.

In a wide-ranging interview at his office this week, Mr. Sullivan also voiced optimism on the future of the American shipbuilding industry under the Reagan administration, warned that abolition of federal ship-construction differential subsidies could "destroy" the industry, and predicted the U.S. Navy will divide contracts for six new guided-missile frigates between Bath Iron Works and Todd Shipyards Corp.

The backlog of ship orders at the Bath yard is the largest the 97-year-old shipbuilder has had since World War II and in dollar terms, possibly its largest ever, company officials said. But six years ago, it was a different situation.

At that time, Mr. Sullivan said, the yard's backlog consisted of contracts that lacked proper cost-escalation clauses and thus were costing the yard money. Bath's work force numbered about 2,500. Productivity was minimal. The absenteeism rate was high.

Then Mr. Sullivan, the executive vice president of operations at Hayes-Albion, a manufacturer of automotive products was named president of Bath.

STRONG MANAGMENT

"The thrust of what I did was build a strong management team, develop modern management practices and implement them," Mr. Sullivan said.

That included the use of management by objectives, a system in which top executives and their subordinates talk together, set individual and specific objectives each year, then monitor performance against them. Mr. Sullivan said he took the system a step further, monitoring performance on a monthly basis and adding additional objectives.

He also stressed long-range planning, including a 10-year plan for facilities and a 10-year marketing plan. It takes five to seven years for a Navy ship, for example, to move from the inception stage to final planning stages, he said, and it is "better not to wait till the sixth year" to begin gearing up a shipyard.

Mr. Sullivan said he also encouraged communication "up and down, and it had a profound effect." A cost-reduction program, in which employees receive awards for suggestions that save money, was begun. An energy management program and a strong apprenticeship program were established. Heavy use was made of industrial engineers for the design of greatly expanded facilities.

MASS PRODUCTION

Emphasis was put on a smooth "mass production" style flow of work. The yard builds ships in individual modules that contain some 70 percent of the needed equipment, rather than building and launching a shell of a ship first.

The results included an eight-fold increase in productivity and a drop in absenteeism. The work force grew to about 6,000 and applications still pour in—some 3,500 since Jan. 26 alone, according to company officials. And the bottom line came not only in productivity, but in a performance record that is the yard's proudest boast.

"Since that time (1975), we have not been late on any ship, Navy or commercial," Mr. Sullivan said.

Nor, he added, has the yard gone over budget. Three merchant ships were built and delivered a total of 37 weeks early. The yard's first five guided-missile frigate—FFGs—were delivered a total of 62 weeks early and a total of more than $28 million under contract.

Bath Iron Works has 12 more of the FFGs to deliver, the chairman said, "We're targeting delivering them 17 weeks early—each," he said.

Mr. Sullivan, a native of Pasco, Wash., gives a great deal of credit to his Maine work force.

"This is a shipbuilding and shipping community and there's a great deal of pride, he said. "When the ships go down the (adjacent Kennebec) river, there's a great deal of pride, and this makes a great difference."

The yard has been heavily oriented to Navy construction in the last few years, but company spokemen said the sought-for mix is half-and-half Navy and, merchant marine. In the backlog now are two tankers, a dredge ship and a 643-foot, ocean-going barge.

Contracts soon will be let on six more of the FFGs, however, and Mr. Sullivan said he hopes the yard gets its "fair share." New York-based Todd Shipyards in recent weeks has called for a fair share for its Los Angeles and Seattle yards, too, warning that a move by the Navy to let the contracts on the basis of price alone could badly damage Todd.

The warnings underline a difference brought out in the independent Kaitz report issued a year ago, Mr. Sullivan said: Bath produced FFGs for about $53 million each, while Todd produced them for about $68 million each.

But, he said, "I doubt very much if (the Navy) would award all of them to one yard. If they did it strictly on price, yes. But it's probable the Navy will want yards on both coasts."

He admitted, however, that "as a taxpayer, I think we should buy ships where we get the best buy for our money."

The Bath chief said he is optimistic at the future for both his yard and the American shipbuilding industry in general.

"I think the Reagan administration means what it says. I think they are going to increase the size of the Navy, increase the size of the merchant fleet, and encourage (shipbuilding) rather than discourage it, as the previous administration did," he said.

The future of federal construction differential subsidies, which help make up the cost difference between building ships in American yards and in cheaper yards overseas, is not in doubt "from what I've heard," Mr. Sullivan said.●

TRIBUTE TO WES UNSELD

HON. WALTER E. FAUNTROY

OF THE DISTRICT OF COLUMBIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 24, 1981

● Mr. FAUNTROY. Mr. Speaker, I am very proud to bring to the attention of my colleagues that one of America's outstanding athletes is being saluted and honored for his distinguished contributions to professional basketball and the communities where he lives and works. I speak of Wes Unseld, who recently announced his retirement as a player for the Washington Bullets basketball team. He will remain with the organization as a vice president, an achievement of special significance. Only one other black person, Wayne Embry of the Milwaukee Bucks, has become a vice president of a National Basketball Association team.

While Wes Unseld successfully completed his career as a player and prepares to reach new successes as a management official, he also maintains his commitment to contributing his time and energies to help others.

For his work in Baltimore, and in our Nation's Capital, on behalf of the sick and the needy, the United Black Fund will honor Wes Unseld on Wednesday, March 25 at the Capital Center.

And on Sunday, March 29, in the final home game of the season for the Bullets, which has been designated as "Wes Unseld Appreciation Night," a portion of the proceeds from that night will go to two of the concerned people programs to which Wes Unseld gives his service in love—Baltimore's Kernan Hospital and Children's Hospital in Washington.

I want to join the United Black Fund and the many organizations and individuals in paying tribute to Wes Unseld, an extraordinary disciplined athlete who is also an extraordinary man of dedicated devotion to the well-being of his fellow human beings.

I have attached information regarding Wes Unseld's career and the comments of the Bullet organization in announcing his retirement. I know you will join me in wishing Wes Unseld and his family God's blessings and much success in the years ahead.

WES UNSELD ANNOUNCES RETIREMENT

Wes Unseld, a man whose name has become synonomous with Bullets' basketball, announced he will retire at the end of the 1980–81 season.

"It's time to quit," Unseld said explaining his decision. "I've had problems with both of my knees this year. Even with the offseason, I don't know if I could play next season or not."

The man who everyone equates with bone-jarring picks and fullcourt outlet passes, has missed 14 games this year because of knee problems. He had major surgery on his left knee during the 1973–74 season and played in just 56 games that year. Unseld's right knee has bothered him this season and forced him to miss three of the last seven contests.

"Wes has been the heart and soul of the Bullets' franchise from the first day he stepped onto the court in 1968," Bullets' President Abe Pollin said. "He has truly been a credit to the game of basketball. I've never known a finer human being in my life."

The 6-7 Unseld was chosen by the Bullets on the first round of the 1968 NBA draft, the second player selected overall, after twice earning All-American honors at the University of Louisville.

He was an instant success! In his initial NBA season, Unseld was chosen both Rookie-of-the-Year and the League's Most Valuable Player. He and Wilt Chamberlain are the only players to have won both the same season. Unseld was also selected to the NBA All-Star Game, his first of four ap-

pearances. The Bullets did well too, improving their record from 36-46 the previous year to 57-25.

The Bullets, who had never experienced a winning season before he arrived, have recorded 10 plus-.500 seasons since. Unseld has been a major force in sending the Bullets to 12 consecutive playoff appearances. He was voted the Most Valuable Player of the 1978 NBA Championship series that brought Washington its first sports title in 36 years.

In his 13-year NBA career, Unseld has achieved numerous accomplishments. He ranks sixth all-time in rebounding; is one of only a handful of players who have both scored 10,000 points and pulled down 10,000 rebounds; ranks third all-time among playoff leaders in rebounds and is the Bullets' all-time leader in games played, rebounds, minutes played and assists.

Although he's a man who doesn't discuss such things, Unseld's achievements off the court are monumental also. In 1975, he was the first recipient of the Walter Kennedy Citizenship Award, given annually to the NBA player or coach making the greatest civic contribution to his community. A past Vice-President of the NBA Players' Association, he began working as a volunteer at Kernan Hospital soon after joining the Bullets and has continued that association through the years. Recently, Unseld was named to the Mt. St. Mary's College Board of Trustees. Much of his free time is devoted to assisting his wife, Connie, at the Unseld's Developmental Center for Children which she opened last winter.

WES UNSELD

Sixth all-time in rebounding.

Third all-time in playoff rebounding.

One of only two players to have won Rookie-of-the-Year honors and the NBA Most Valuable Player the same season.

Played in 12 playoffs; the second highest number of any center in NBA history.

Played in four All-Star Games.

The Bullets' recordholder in games, minutes played, rebounding and assists.●

LATIN AMERICA

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 24, 1981

● Mr. GARCIA. Mr. Speaker, I would like to enter into the CONGRESSIONAL RECORD an article I recently wrote for El Diario-La Prensa, a New York Spanish language daily, on March 24, 1981.

LATIN AMERICA

The presence of American military advisers in Central America does not reflect what I consider to be a perceptible response to Latin American realities.

Supposition, innuendo, and an avalanche of contrary evidence have confused and muddied the issues at hand. Simply stated, what have we to gain, besides an escalation in rethoric and violence, by increasing our military commitment to El Salvador; furthermore, what are the implications for our future involvement throughout Latin America? The American people I believe, are being asked to gamble on the conflicting judgments of military dictators, leftist guerrillas, CIA counter-intelligence agents, presidential advisers, and a plethora of lesser noble figures, each intent upon maintaining a partisan image—be it the threat of Communist insurgency or the banner of a nationalist revolution.

My reservations should not be misconstrued as the misgivings of a post-Vietnam isolationist, quite the contrary. I whole heartedly believe the United States must have a fundamental role in world affairs, but a fundamental role in what direction, and to whose benefits? By what criteria do we say "nay or yea" to a regime seeking aid of our arms? I'm not satisfied with the answers I have received, more importantly, I'm not satisfied with the information forth coming from this Administration. In the absence of hard facts, facts incontrovertibly free of partisan viewpoints, the American public is being treated to a fractured vision of Latin America.

How, I wonder, is it possible to pursue an aggressive foreign policy in Latin America, with any degree of understanding, when we have yet to understand and confront the problems facing the over 19 million Hispanics presently living in the United States? In the United States the average income of most Hispanics is one-third to one-half that of their non-Hispanic counterparts, while the percentage of Hispanic families living below poverty level is nearly four times the national average. In terms of unemployment, the number of unemployed Hispanics is nearly double the national average. How can this Administration presume to understand the complex problems facing Latin Americans in El Salvador, when they have yet to comprehend the problems facing Hispanics here at home?

By the 1990's, the U.S. Census Bureau estimates Hispanics will be the second largest minority in the United States. Reverend Mario Vicaino, head of the Roman Catholic Church's Southeastern regional office for Hispanics in Miami brings home the point of the size of the Hispanic population in this country in an unconventional way. He argues that the U.S. is the fifth largest Hispanic country in the world, in terms of population after Mexico, Spain, Argentina and Colombia.

Our priorities for dealing with the world are skewed and fundamentally flawed. Where is the logic in providing military assistance to a repressive and corrupt Salvadoran military junta, when at home Hispanics are disenfranchised, ostracized, and generally shut-out by an ignorant and frequently belligerent Anglo world?

Foreign and domestic policy must be constructed in a manner that reflects the interests of the people it is affecting; a long-term perspective is not only imperative it is an obligation the Reagan Administration owes to this and future generations. The commitment to democracy, I believe, must begin at home, not in our neighbor's backyard, and certainly not at the point of the gun.

The winning of "hearts and minds" is an important goal, a goal that needs to be pursued both here and abroad. The question is, can we afford to aggressively confront an increasingly volatile Latin America while we passively ignore the festering problems of America's growing Hispanic community?●

THE KEYNESIAN ATTACK ON PRESIDENT REAGAN'S TAX STRATEGY AND DR. CRAIG ROBERTS DEVASTATING RESPONSE

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 24, 1981

● Mr. KEMP. Mr. Speaker, one of the finest minds among the neoclassical critics of Keynesian theory belongs to Dr. Paul Craig Roberts, Assistant Secretary of the Treasury for Tax Policy. Recently in the Wall Street Journal, Dr. Roberts outlined the fundamental flaws of the Keynesian theory—on which the Keynesian critique of President Reagan's economic program is based.

Roberts shows why the Keynesian criticism falls because the Keynesians have failed to answer President Reagan's deceptively simple question: "Why is it inflationary when you spend what you earn, but not inflationary when the Government spends what you earn?" A change in tax rates does not change the amount of money in the economy, and does not change aggregate demand. Therefore, the notion that President Reagan's cut in marginal tax rates could be "inflationary" is nonsense.

Moreover, the classical economists have shown how tax cuts do work—only by changing people's incentives. Cutting marginal tax rates, the only kind of tax which people face in the real world, increases the incentives to work and invest. Tax cuts which do not lower marginal rates have no effect but to produce a deficit.

This is not the first time this critique has been leveled against the Keynesians. But it is remarkable that no Keynesian theorist, to my knowledge, has publicly answered this devastating critique, much less refuted it. Until the Keynesians turn themselves to this flaw in their theory, their arguments, exemplified by the editorials of the New York Times and the Washington Post, amount to so much hot air.

I commend Dr. Roberts' excellent article to my colleagues.

[From the Wall Street Journal, Mar. 19, 1981]

THE KEYNESIAN ATTACK ON MR. REAGAN'S PLAN

(By Paul Craig Roberts)

Every morning when I pick up my New York Times I expect to read in Steven Rattner's reports that I have abandoned supply-side economics. After all, he even reported that Jack Kemp himself had abandoned his own bill in disagreement over an inconsequential detail.

Mr. Rattner has established himself as leader of a corps of reporters trying to drive permanent wedges into any crack of disagreement that policy discussion inevitably

generates. The object is to isolate the supply-siders. Last week Hobart Rowen, a Washington Post commentator long identified with the liberal Keynesians, said it wouldn't be long before supply-side economics is back on the shelf. Critics sense that if they can blunt and deflect the intellectual cutting edge of the Reagan program, the rest of it can gradually be chopped up with the familiar interest-group and income-redistribution arguments.

But in spite of all the journalistic smoke, the supply-siders still have on their side the Office of Management and Budget, Treasury, and the President—not exactly what you would call a hunkered-down position. And the Reagan tax bill is still very much alive. The problem isn't in controlling the policy but in controlling the explanation of it.

While supply-siders have been busy making the policy, stalwart representatives of the status quo like Walter Heller and other leftover economists from a bygone era have been busy explaining the policy in Keynesian terms. When you hear supply-side economics interpreted by a demand-side economist, it sounds scary indeed.

EXPLAINING INFLATION

The policy will be "actively inflationary," warns Otto Eckstein of Data Resources Inc., an economic consulting firm. Supply-side analysis, chimes in Mr. Heller, is a "fairly tale." The true story, he charges, is that supply-siders are unleashing the wolf of inflation to devour the country. Because both these demand-siders have been so thoroughly associated with the policies that have inundated us with inflation, people think they must be inflation experts.

It is nevertheless a fact that neither Mr. Eckstein nor Mr. Heller has ever been able to explain why it is inflationary when people spend their own money, but not when the government spends it for them. Yet it is easy enough to understand why supply-side tax cuts aren't inflationary. All you have to do is to stop thinking like a Keynesian.

The administration wants to cut personal income tax rates, not in order to give people more money to spend, but in order to increase incentives to earn more taxable income. Today people are taxed at unprecedented high rates on any additional income that they earn, either from work effort, saving or upgrading their skills. The inevitable results of little reward for extra effort are worsening work attitudes, high absenteeism rates, reluctance to work overtime and to assume risks, and the lowest personal saving rate in anyone's memory.

For the supply-side policy to work, taxpayers don't have to respond to lower marginal tax rates by giving up vacations, going on a double-shift and saving all of their income. When you have a work force of more than 100 million people, small individual responses result in a large aggregate effect. If the average number of hours worked per week rises from 35 to 35.5, GNP rises by $24 billion. If the absentee rate declines by one-half percentage point, GNP rises by about $10 billion. If the personal savings rate rises from about 5.5% to about 7.5%, as it did after the Kennedy tax rate reductions, private savings increase by $42 billion annually at current income levels. The increased savings together with the revenue "reflows" and the budget cuts more than pay for the tax cuts, thus making possible "crowding in," or increased capital formation.

If you are a Keynesian, however, you don't think about any of this, because in the Keynesian model tax cuts have only a single purpose—to increase demand. Therefore, Keynesians focus only on the question: What are people going to do with the tax refunds that they get back on their existing earnings? The answer is that what they do with them is much less important than how they respond to the changed incentives. If savings, investment and work effort do not respond to higher after-tax rewards, then the policy will have no effect on the economy, and the downside risk is simply: no change.

Keynesians, however, should have their question answered, even if it is irrelevant. Polls indicate that people plan to use more than half the tax refund to build savings and pay off debts. But suppose they spend it all. Keynesians would say that total spending has increased and, therefore, the tax cuts are inflationary. But the government is spending less, so how has total spending increased?

At this point the critics claim that Congress will cut taxes, but not spending. Surely then the tax cut would be inflationary. No, not unless the Federal Reserve prints more money.

A tax cut without a spending cut can result in a budget deficit, but a deficit is not inflationary unless the Fed monetizes it. If the Treasury finances the deficit by selling bonds to the public, it recovers by borrowing what it handed back in tax refunds, and total spending does not change. That's why supply-siders insist that it is not necessary to offset a tax cut with a budget cut in order to avoid inflation. The supply-side rationale for the budget cut is to prevent the increase in private savings from being used up financing the growth in government spending. Supply-siders want the increased savings to go into private capital formation and not into government bonds.

Tax cuts are associated in people's minds with higher demand and inflation because that is the way it works in the Keynesian policy to which they are accustomed. In the Keynesian policy the purpose of a tax cut is not to alter incentives but to create a budget deficit. The Fed is than pressured to monetize the deficit in order to increase aggregate demand. But since the Reagan administration is not cutting taxes in order to stimulate demand, it will apply no pressure on the Fed to monetize debt.

Indeed, it is applying the opposite pressure, which has confused some of the Keynesians in the Fed. Your policy will have no effect a tall, they say. The fiscal stimulus you are providing with the tax cut will be offset by the tight monetary policy you are urging on us, and the policy will be a wash. We hope the Fed catches on sooner rather than later that we are not trying to provide a fiscal stimulus.

PERSONAL VS. BUSINESS

Once people catch on to the supply-side, they will realize that the old categories of personal versus business tax cuts don't make any sense. The proposed reduction in the personal income tax rates is a business tax cut too. It automatically reduces the maximum capital gains tax from the present 28%. It increases the rate of return to investment income across the board. It lowers the tax rates on partnerships and unincorporated business income. It increases savings. It improves work attitudes, lowers wage demands and contributes to better labor productivity. What "business tax cut" does more?

People will learn also that supply-side economics doesn't have a "Phillips Curve"—the idea that you can't have higher economic growth without higher inflation. To get a "Phillips Curve" you have to mix together demand stimulus and supply disincentives like high marginal tax rates and inadequate capital cost recovery. Thus when The Washington Post charges that President Reagan's "scenario lies far beyond the limits of any past experience in this country or any other industrial democracy" it is wrong for two reasons. It ignores the policy context of the past experience in this country, and it overlooks Japan. In 1974 the Japanese had a real economic growth rate of −0.2% and an inflation rate of 24.5%. Five years later real growth was 6.1% and inflation was 3.6%.

Now that's what I would call a real rosy scenario. President Reagan's is a piker by comparison. Do the "prestige press" and congressional Democrats really believe that the U.S. economy can't perform even half as well as the Japanese? Supply-siders see nothing to be gained from writing off America at the start.●

REFUGEE CRISIS IN EAST AFRICA

HON. HOWARD WOLPE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 24, 1981

● Mr. WOLPE. Mr. Speaker, on March 19, 1981, the Foreign Affairs Subcommittee's on Africa and Human Rights and International Organizations jointly sponsored a thorough and comprehensive hearing on the African refugee crisis. The problem of African refugees is a most serious and shocking one which has received very little attention by our public officials and the media. In light of the magnitude of the refugee crisis I would like to draw to the attention of my colleagues my opening remarks before the Foreign Affairs African Refugee hearing:

OPENING STATEMENT OF HON. HOWARD WOLPE, CHAIRMAN, SUBCOMMITTEE ON AFRICA

Today, the Foreign Affairs Subcommittee's on Africa and Human Rights and International Organizations are jointly holding a hearing on the refugee crisis in Africa. This represents the first of the Africa subcommittee's hearings on the Administration's Fiscal Year 1982 Foreign Assistance request.

During the past year, public officials and the media have focused an enormous amount of attention on the plight of the Indo-Chinese refugees, the Haitian boat people and, more recently, the Afghan refugees in the Near East. Very little attention, however, has been devoted to what has become the world's most serious and shocking refugee problem—the problem of African refugees.

Today, Africa has the largest refugee population of any continent in the world. According to the United Nations High Commissioner for Refugees (UNHCR), Africa has just under half of all the world's refugee population. Moreover, the number of African refugees has jumped sharply over the past four years and continues to increase at an alarming and uncontrollable

rate. In December of 1977, the UNHCR reported that the number of African refugees residing outside of their own countries was approximately 828,000. By December of 1978, the figure had more than doubled to nearly two million. And today, non-UN observers estimate the number of African refugees at four million—again, the figure has doubled in just over a two year period.

The principal cause for the large number of African refugees continue to be civil strife in various parts of Africa. Currently, there are no less than five wars raging throughout Africa; in Namibia, the Western Sahara, Chad, the Ogaden and Eritria. All of these conflicts have produced large flows of refugees into neighboring countries. In the past year, fighting in Chad has produced over 100,000 new African refugees. Continuing instability in Uganda following the elections in that country has produced a large number of refugee who have fled into the southern Sudan and Zaire. If the Namibian conflict is not resolved soon, the number of Africans fleeing the northern part of that country will swell.

However, most dramatic has been the number of refugees fleeing the country of Ethiopia as a result of the conflict in the Ogaden. Three years ago, the number of Ethiopian refugees in Somalia was less than 80,000. Today, the number of refugees in Somalia is estimated at 1.5 million and, according to a senior official at Oxfam, as many as 3,000 refugees enter the Somali refugee camps on a daily basis. Although the situation in Somalia is most critical, it certainly is not atypical of patterns to be found throughout Africa.

Despite the magnitude of the Africa refugee problem, the U.S. Government has not responded to the African problem in the way it has to those in the Near East and Indo-China. Although it is difficult to obtain a breakdown of the amount the United States spends per capita on the refugees it assists in other regions of the world, it would appear that refugees outside of Africa fare much better than those on the continent. In fiscal year 1981, the U.S. Government requested $54 million for African refugees and $324 million to Asian refugees. On a per capita basis, this is approximately $28 per African refugee and in excess of $300 for Asian refugees on a per capita basis. While it certainly could be argued that the requirements and needs of refugees in different regions of the world vary, this great disparity greatly concerns the Subcommittee and cannot and should not continue.

Moreover, even though the number of African refugees has nearly doubled in the past two years, the overall funding levels for African refugees has lagged far behind the assistance for refugee programs for other regions. It is in the context that the Subcommittee will review the figures presented by the Administration for Fiscal Year 1982. I understand the amount proposed for African refugee programs if $77 million. In light of the magnitude of the refugee crisis in Africa, and the upcoming refugee pledging conference in Geneva, I hope that we can begin today the process of assessing the adequacy of the Fiscal Year 1982 request for African refugees. Additionally, I am hopeful that the Administration will address itself to the question of the US representation at the Geneva Conference. The members of the Subcommittee on Africa feel very strongly that the Administration send the highest level delegation possible. This is particularly important since the American representation at the 1980 Geneva Conference on Indo-Chinese refugees was led by former Vice President Mondale. Consequently, representation at any lower level would be viewed by many African and United Nations officials as an indication that we in the United States are not really concerned about African refugees.

I want to take this opportunity to commend the Subcommittee, and its most able leader during the 96th Congress, my good friend and colleagues Steve Solarz, for its successful efforts to secure increased assistance for African refugees. As long as the problems remains as critical as we find it today, the Subcommittee will continue to fight for increased US funding levels for the African continent. Traditionally, the US has been one of the principal supporters of humanitarian refugee assistance worldwide. That tradition of assistance should not stop short of Africa's door. We have all witnessed the success of the international relief effort in Kampuchea. I am confident that if the same amount of attention can be focused on the situation in Somalia, we can avert what could easily become a great human tragedy.●

MUNICIPAL CAPITAL ASSISTANCE ACT OF 1981

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 24, 1981

● Ms. OAKAR. Mr. Speaker, today, I am reintroducing a bill that I submitted to the House during the last Congress. Except for some modification due to our economic condition today, the Municipal Capital Assistance Act of 1981 is, in essence, the same legislation with the same goals and objectives that my 1979-80 proposal intended to accomplish.

Basically, the Municipal Capital Assistance Act of 1981 is a bill designed to tackle the very serious problem of dealing with the dangerous deterioration of the basic infrastructure—the underlying capital stock of our cities and towns while, at the same time, recognizing the legitimate budgetary constraints due to the overall economic realities we are faced with today.

Mr. Speaker, many of our older cities are on the brink of physical disaster because local authorities have put off attending to the problem of deteriorating infrastructure because there were and continue to be other urgent needs. Admittedly, restoration is a very expensive proposition. However, it is clearly cost effective in the sense that complete replacement will cost much more in the future. Furthermore, our cities and towns can no longer afford to delay in coming to grips with this serious situation.

My own city of Cleveland is plagued by a water system that is in dire need of repair; by bridges, approximately one-fifth of which are in such poor condition that they qualify for Federal bridge replacement funds, and by a sewer system that frequently overflows. Pittsburgh has a serious problem with its crumbling bridges. In Boston, it is the disappearance of a large fraction of its water supply, and in New York, street maintenance is so far behind that it would take 150 years in its present replacement cycle to get the streets all restored.

Mr. Speaker, I could go on and on with other examples. But, the important thing is that now is the time for a solution. Let me emphasize that I believe that restoration of basic infrastructure is primarily a job for local governments, themselves. But, the cost is prohibitive at present and the Federal Government must be willing to lend a helping hand. Moreover, to underscore my belief that local governments must help themselves, an underlying premise behind my legislation is that the municipal bond market is functioning well and the cities and towns that would qualify for a Federal grant under my bill must be creditworthy.

I believe, Mr. Speaker, that my bill provides a way to tackle a most serious problem without a major or intolerable strain on either local or Federal budgets or on the Nation's capital markets.

Specifically, the Municipal Capital Assistance Act of 1981 establishes a financing device known as a debt-service grant which is a contract by the Federal Government to pay a stated portion of the total principal and interest of specific bond issues to finance specific restoration work on basic infrastructures. The Federal payments would be spread over the life of the bonds with a maximum of 20 years and a minimum of 10. My bill specifies debt-service grants of 25 percent of the total interest and principal on these bonds. The bond issues would be normal tax exempt local debt with no Federal guarantee—only a pledge to make annual payments amounting to 25 percent of the total debt service. My bill would authorize debt-service grants on $25 billion principal amount of bond issues over 5 years or $5 billion a year.

The total Federal payment amounting to $12 to $13 billion would be spread over 25 years. This is the proper way to pay for such capital expenditures.

Mr. Speaker, as stated earlier, restoration of basic infrastructure is a costly business and while there are limits on our resources, we cannot be paralyzed by current budgetary constraints that may spell doom for the future of cities and towns throughout our country. I urge my colleagues to have vision and support the Municipal Capital Assistance Act of 1981.●

VETERANS EDUCATION AND TRAINING ACT OF 1981

HON. DAVID F. EMERY

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 24, 1981

● Mr. EMERY. Mr. Speaker, I am introducing legislation today to provide a new "veterans education and training" (VET) program for servicemembers and veterans of our Nation's Armed Forces.

This program will provide education and training opportunities to persons who enlist and reenlist in the Armed forces. It also provides a limited assistance program to help career servicemembers provide for the education of dependents. It allows members of the Armed forces to take a leave of absence to complete their education and then return to service without loss of tenure or other penalty.

I am introducing this legislation to Benefit the veteran, to improve recruiting and retention in the Armed Forces and to benefit the Nation.

You may ask how one bill can accomplish all these things and I will tell you that history provides the answer. Several studies have shown that the veteran is better educated and earns more than his nonveteran counterpart. A 1975 Army study found 25 percent of all persons who entered the Army were specifically motivated by the GI bill. The same study found that 24 percent would not join without a GI bill. Subsequent research shows that recruiting would improve if the GI bill was returned. Finally, the United States will always benefit from higher public education among its citizens, but in this case, the U.S. Treasury concedes that a veteran who trains under the GI bill returns more than the cost of training to the Treasury in taxes on higher earnings made possible by a GI bill education.

The vet program is fairly simple to understand. Any person who enlists or reenlists in the Armed Forces and serves honorably for 2 years will receive a basic education benefit of 18 months. If the person serves for 4 years, the number of months of educations payments will increase to 36 months. The amount of payments will be the same as that provided to Vietnam era veterans training under the old GI bill, $342 per month.

The second part of my bill creates a savings program for career servicemembers who wish to provide for their dependent's education. This, too, is a simple program which allows servicemembers to contribute $25 to $100 per month to an education fund. The service will, after the servicemember has completed 10 years of service, add $2 for every $1 the member has contributed to the fund. The maximum contribution from the member is $6,000, making the maximum service contribution $12,000. I estimate the cost of this program to be in the $45 million per year range; far less than the mutibillion dollar cost potential of a directly transferable education benefit.

Finally, the bill includes a leave of absence program. This will allow service members to take time, the time necessary to complete college without having to leave the service or lose their tenure. I believe that this provison will greatly enhance the retention of highly motivated and highly qualified individuals whose only option at the present time is to leave the service and attend school.

Mr. Speaker, this bill is the product of a great amount of thought and research. A large portion of the work was done by the Noncommissioned Officers Association of the U.S.A. (NCOA) and I extend to them my gratitude. I also want to thank my staff and others on the Hill who have contributed to the research and drafting of this bill.

This bill is the companion measure to S. 742 that was introduced in the Senate last week by my colleague from Maine, Senator BILL COHEN. I am most pleased to sponsor this bill in the House of Representatives.

As a member of the House Armed Services Committee, I have repeatedly heard testimony that the armed services sorely need a return to a program for educational benefits to attract and retain individuals who can fill critical high skill positions. This type of GI bill program is essential if this Nation does not want to return to a draft. It is a priority that must be addressed this year, and not postponed while studies and evaluations demonstrate what we already clearly know.

This bill is a thoughtful, realistic and fair approach to alleviating some of the manpower problems that plague our Armed Forces. It demonstrates our commitment to provide for those who serve their Nation, while at the same time not diminishing the role played by the Vietnam era veteran. In my opinion, no other contribution to this Nation is more valuable than that given by the patriotic young men and women who voluntarily give a portion of their youth to the defense and readiness of this Nation.

As a body, Congress has been remiss in rewarding their contribution in recent years. Accordingly, I urge my colleagues to join me in support of this GI bill program, "The Veterans Education and Training Program Act of 1981 (VET)." Its swift consideration and passage will answer a great need and reflect our rededication to providing for the servicemember and veteran who serve this great Nation.●

CALL TO CONSCIENCE

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 24, 1981

● Mr. PHILIP M. CRANE. Mr. Speaker, Herschel Auerbach, an outstanding American, a personal friend, and a constituent, is a long-time supporter of the ideals for which this great Nation stands. He is an advocate of America's exportation of those ideals. He recognizes that the United Nations was established to espouse those same ideals, in the interest of positively influencing the world's nations to promote peace and freedom. Mr. Auerbach, however, shares the concern many of us hold, that the United Nations is no longer the champion of freedom its charter declares. More and more frequently, the United Nations has failed to represent an approach to global problems which encourages peaceful solutions. Actions taken in and accepted by the General Assembly that endorse violence are contrary to the U.N.'s Charter and only serve to make more painful the efforts of conflicting parties to resolve their differences. Endorsement of the PLO and resolutions which brand Zionism as racist are appalling examples of what is happening to the international body to whom most nations turn for mediation. Such actions are disgusting.

Mr. Auerbach's concern for the direction the United Nations is heading has lead him to become instrumental in organizing the Committee for U.N. Integrity. On February 2, 1981, the committee bought a half page in the Chicago Tribune to enumerate its alarm for the future of the United Nations. That article is reprinted here for the benefit of my colleagues, and I commend it to your attention:

[Advertisement from the Chicago Tribune, Feb. 2, 1981]

CALL TO CONSCIENCE

We are representatives of the international academic, arts and science communities who voice alarm at the growing danger to world peace resulting from the erosion of the United Nations.

The United Nations was established 35 years ago in the wake of the devastation of World War II to promote peace among the nations and the well-being of all their peoples. It came into being with a mandate to oppose violence and to prevent war, to fight hunger and disease, to explore and advance the human condition.

But the United Nations is no longer the guardian of social justice, human rights and equality among nations. Indeed, perverted by irrelevant political machinations, it is in danger of becoming a force against peace itself.

Nowhere is the failure of the United Nations more tragic than in the Middle East. The Soviet invasion of Afghanistan, the war between Iran and Iraq, the prolonged incarceration of American Hostages in Teheran, grave crises in Indochina and elsewhere are

inadequately challenged while the United Nations pursues a course of action destined to undermine the principles on which the organization was founded.

We bear witness to the assaults orchestrated by the Soviet and Arab blocs in their campaign to isolate and discredit Israel. The United Nations condemns the historic Egyptian-Israeli peace treaty and exalts PLO terrorists. Those who vow to eliminate the State of Israel and refuse to make peace are permitted to sit in the councils of the peacemakers, while Israel, a member state created in fidelity to the principles of the United Nations, is slandered and faced with the threat of delegitimization.

The United Nations resolution which branded Zionism, the national liberation movement of the Jewish people, with the false label of racism must bear some reponsibility for the scourge of anti-Semitism now reappearing in many parts of the world.

In its preoccupation with Palestinian rights, the United Nations neglects the plight of millions of men, women and children in other parts of the world who are in immediate danger of death from famine, disease and war.

The manipulation of the world forum has reached beyond the halls of the General Assembly and has politicized—and thereby crippled—many of the United Nations' specialized agencies. The campaign to ostracize Israel has obstructed the efforts of the International Labor Organization, the World Health Organization, the United Nations Educational, Scientific and Cultural Organization, among others, all dedicated to promoting higher standards of living, social and economic progress, international cultural and educational cooperation. It has made an international charade of their labors to extend freedom of speech and press, to help the working man and woman, to meet the needs of children, to achieve equality for women.

In devotion to the fulfillment of the United Nations' humanitarian and peaceful goals, we cannot remain silent while forces which incite hatred and foment war betray our hopes for world peace and progress. We call upon the United Nations—and each member nation—to embrace once again the ideals of the United Nations Charter and to restore the promise that the United Nations can achieve a better world for all humanity.

BUDGET CUTS WILL DENY VETERANS HOSPITAL AND MEDICARE CARE

HON. JIM MATTOX

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 24, 1981

● Mr. MATTOX. Mr. Speaker, as reported in the Washington Post of Thursday, March 19, 1981, Mr. Art Fellwock, commander in chief of the Veterans of Foreign Wars, has accused the Reagan administration of "balancing the Veterans' Administration budget on the breaking backs of the veteran, his widow, and orphan."

This is more important than everyday press-release rhetoric. what makes it so significant is that the VFW is the organization which last year broke with 80 years of precedent by endorsing a Presidential candidate—Ronald Reagan. Now Mr. Fellwock says the President's budget proposals, which would eliminate more than 7,000 medi-

cal personnel from the fiscal 1981 and 1982 budgets, will deny medical and hospital care to veterans in need.

I applaud Mr. Fellwock's courage in pointing out so forcefully the yawning gulf that exists between the President's statements of last summer and his budget proposals of this spring. The President's flip-flop on veterans' issues is an excellent example of how dangerous it can be to blindly accept his scenarios without question, as we have been asked to do. As the VFW and other veterans' organizations can attest, some of the President's rosiest scenarios can be subject to radical change.

It behooves us all, as participants in the constitutional process, to reflect carefully on this issue as a highly illustrative aspect of the current economic debate. I recently chaired a hearing of the Budget Committee's Task Force on National Security and Veterans, at which one of my colleagues made an excellent point: "If the administration can be so radically wrong on this one particular area. I think it mandates us who are on the Budget Committee to look very closely at some other programs."

At that hearing, spokemen from the major national veterans' groups roundly denounced the President's proposals. Insofar as it elaborated on Mr. Fellwock's basic premise, the VFW's statement was of particular interest, and I submit it for the RECORD so that I can share it with my colleagues.

STATEMENT OF DONALD H. SCHWAB OF THE VFW

Mr. Chairman and Members of the task force: Thank you for the privilege of appearing before this distinguished forum to present the views of the Veterans of Foreign Wars of the United States. This is for me an auspicious occasion for it is the first time to my knowledge that the various veterans' organizations have been permitted to appear before the Budget Committee.

My name is Donald H. Schwab and it is my privilege to serve the more than 1.9 million men and women of the Veterans of Foreign Wars as their National Legislative Director.

Mr. Chairman, the basic fiscal year 1982 budget submitted by the Carter Administration was probably the most realistic one in several years in that it provided $24.9 billion in budget authority and $24.4 billion in outlays for the Veterans Administration. That is not to say there were not several areas which concerned us deeply.

We now have, I believe, the Reagan Administration's proposed amendments to the Carter Administration's fiscal years 1981 and 1982 budgets for the Veterans Administration. Briefly, Mr. Chairman, the present Administration would reduce the fiscal year 1981 budget by more than $200 million and $831 million in fiscal year 1982 for a cut of more than one billion dollars for the two years. Personnel reductions (FTEE'S) amount to 1,837 in fiscal year 1981 and 7,995 in fiscal year 1982 for a total loss of 9,832 personnel.

As previously promised by the new Administration, and to its credit, there is to be no change contemplated in the basic entitlement to either compensation payable to veterans with service-connected disabilities or in the pension program for veterans in need due to their non-service-connected disabilities and their survivors. There is however, a projected decrease in the cost-of-living increase to be effective October 1, 1981 for those in receipt of compensation from 12.3 percent to 11.2 percent for a savings of some $96 million. In all fairness, we cannot take exception to the proposed compensation increase at this point in time since we do not know what the inflation rate will be when enacting legislation clears Congress. Our primary concern in this area is that this benefit not be eroded by inflation and that the increase granted is proportionate to that reflected by the Consumer Price Index.

The pension program is, of course, indexed to the CPI and increased proportionately and concurrently with the social security benefit increase each July. As is a matter of record, the V.F.W. has never been happy with the new pension program established by Public Law 95-588 since, in our opinion, the assured income levels are too stringent. Presently a veteran alone is assured an annual income of $4,460 including all other income from all sources, including social security benefits which is a mere $69 per annum above the Orshasky update of the poverty line of $4,391 for a single person alone.

With respect to educational benefits for Vietnam veterans under the GI Bill, it is intended by this Administration to completely eliminate both correspondence training and flight training and retain the present 10 year delimiting date for completion of GI Bill benefits. Although we have opposed the elimination of flight training and correspondence training, the latter in particular for Vietnam veterans who are housebound and have no other means to advance their education, the complaints we have received with respect to reduction or termination of these benefits have been almost without exception from those who operate the schools.

Most disturbing is the fact that the Administration proposes to reduce outpatient medical visits by veterans in need with non-service-connected disabilities by 1.7 million and, in addition, to apply a $5 deductible payment by the veteran for beneficiary travel while seeking needed medical attention. Although the original intent was to charge a $10 deductible fee, we are, again, hurting those most who are in real financial need. These provisions will greatly reduce access to VA medical care to veterans and increase the number who must seek community care and, to our shame, line-up with welfare recipients, aliens and yes, even draft dodgers and unwed mothers.

Alarming, Mr. Chairman, is that the Administration has canceled construction of the 400 bed acute care hospital at Baltimore, Maryland and the 242 bed intermediate care hospital at Camden, New Jersey consisting of 120 nursing care beds and 122 extended care beds of which four were to have been intensive care beds. The need for the Baltimore hospital of 400 beds consisting of 200 internal medicine, 120 surgical and 60 psychiatric beds has been fully justified. The Camden hospital originally consisting of 480 beds, 300 of which would have been medical, surgical and neurological, 60 acute psychiatric beds and a 120 bed nursing home was also fully justified. Figures available at the time indicated that the national average of VA beds per 1,000 veteran population was 3.2 beds. The ratio in the Philadelphia/South New Jersey area was 0.7 beds per 1,000 veteran population. Financial constraints reduced that facility to 242 beds as previously described. In addition, there are nine other construction deferrals as follows:

1. Denver, Colorado—one-year deferral of addition to existing facility.
2. New Orleans, Louisiana—two-year deferral of addition to existing facility.
3. Washington, D.C.—two-year deferral of a nursing home and parking facility.
4. Long Beach, California—two-year deferral of addition of research and education.
5. Palo Alto, California—two-year deferral of addition of surgical and related functions.
6. East Orange, New Jersey—two-year deferral of renovation project.
7. St. Albans, New York—two-year deferral of laundry facility.
8. Gainesville, Florida—two-year deferral of expansion for research and education.
9. Chillicothe, Ohio—two-year deferral of a clinical addition and modernization.

The one- and two-year deferrals of these other construction projects with on-going double digit inflation will make them even more costly. Quite frankly, we fear the eventual cancellation of these projects also.

Coupled with the above, Mr. Chairman, there is a planned revision of personnel ceilings and an announced reduction in VA personnel (FTEE's) of 11,704 through 1986 of which 6,767 will be cut from indirect medical care predicated upon 1980 base figures.

Needless to say, Mr. Chairman, we of the V.F.W. are shocked almost to disbelief with the cancellation of the Baltimore and Camden facilities and the deferral of other construction projects.

While campaigning last August, President Reagan addressed our national convention in Chicago, Illinois and stated among other things ". . . to me, it is unconscionable that veterans in need are denied hospital and medical care because of inadequate funding which has closed hospital beds and cut health-care personnel within the VA." Amplifying this commitment the Republican party platform reads in part:

"We will maintain the integrity of the Veterans Administration. We will seek to keep it separate and distinct from other federal agencies as the single agency for the administration of all veterans' programs. In particular we feel it is of vital importance to continue and expand the health programs provided to veterans through the Veterans Administration hospitals. Here we see the need for increased access to care, especially for older veterans.

"We further advocate continued and expanded health-care for our Vietnam veterans and consider it vital for the Veterans Administration to continue this program for the rehabilitating of the disabled as well as its job training efforts."

Adding greatly to our concern is the planned reduction through fiscal year 1986 in the Veterans Administration's Department of Medicine and Surgery of 6,767 indirect medical care personnel which can only lead to one thing, and that is the closing of additional hospital beds, more wards or even entire hospitals. Hospitals and beds cannot be operated by hands-on medical personnel alone, but only with the support of a full compliment of indirect medical care personnel. The planned reduction of the VA system to 78,900 operating beds in fiscal year 1982 approaches the figure many believe will make the system not cost effective and surely not a viable back-up for the Department of Defense hospital system. In addition, we understand new personnel reduc-

tions will require the closing of approximately 60 wards and reducing the daily hospital census from a little over 67,000 to 64,000. As a matter of fact, one highly placed and knowledgeable VA official stated entire hospital closings are inevitable.

Mr. Chairman, we have stated for years that one of the primary objectives of the Office of Management and Budget is to close up the VA hospital system by letting facilities deteriorate and starving it with inadequate funding and personnel, just exactly what happened to the Public Service Hospitals. Our assertion has been denied and even ridiculed by the Office of Management and Budget. However, that this is in fact the case is unquestionably confirmed by a memorandum which has come into my possession bearing the heading "Executive Office of the President—Office of Management and Budget—March 5, 1981," the appropriate portion of which is herein quoted: "However, in current economic conditions, some delays can be in the hospital construction program can be accommodated without significant shortrun damage to the VA medical system. The ones chosen here do not have imminent hazards in existing structures and do not affect bed levels significantly. In addition, the existence of excess medical care capacity in many areas of the United States make questionable the need for a separate VA medical system. (Underscoring supplied.) This Administration will conduct a complete review of alternative methods for providing readily available, quality medical care for eligible veterans. The continuation of currently planned construction in overbedded areas may add to the excess and prove to be a wasteful Federal expenditure."

Obviously, Mr. Chairman, and most unfortunately, the Reagan Administration has fallen into the trap laid by the social welfare planners in the National Academy of Sciences and the Heritage Foundation who recommended eliminating the VA hospital and medical care system and, also, a proposed resolution of the American Medical Association to mainstream veterans healthcare by treating those with service-connected disabilities in community hospitals and those with non-service connected disabilities on a welfare basis.

Mr. Chairman, and let me make this abundantly clear, the Veterans of Foreign Wars of the United States will fight this proposed dismantling of the VA hospital and medical care system with every resource at our disposal. We will fight this outrage in every county, parish, district and precinct across this nation. We will fight this betrayal of our nation's wartime veterans at the polls in 1982 if that is what it takes. Make no mistake about our dedication to this end. We who have fought battles in the past are well prepared and quite able to fight this battle, too.

As our Commander-in-Chief testified before the full Committee earlier this month, that although we applaud the President's goal to reestablish a stable economy, the Veterans Administration has already sustained disproportionate budgetary and personnel cuts. Operating hospital beds have been slashed from 121,000 in the 1940's when there were only 15 million veterans to a planned 78,900 in fiscal year 1982 with a veteran population of over 30 million and a reduction in daily patient census in VA hospitals from the current level of 67,000 to less than 64,000.

The Reagan Administration also plans to reorganize the Department of Veterans Benefits by consolidation of claims processing and loan guaranty function into a centralized operation, whatever that is. Along with this action is a projected reduction of 4,697 personnel between now and 1986. To us this would indicate that not many years hence, there will no longer be 58 Veterans Administration Regional Offices, but merely satellite or contact offices in the 10 Federal regions with all adjudication of claims accomplished by VA Central Office personnel.

Other proposed insidious actions to destroy our veterans' hospital and medical care system and veterans' benefits include, but are not limited to the following:

1. To cap the special and incentive pay of VA physicians and dentists authorized by Public Law 96-330, passed by both houses over the veto of the President, by paying no more than 12 percent of the total funding appropriated.

2. Failure to include in the budget not one cent to fund the scholarship program for VA health-care professionals also authorized by Public Law 96-330, which could reduce or eradicate the shortage of physicians, dentists and nurses.

3. The closing of all 91 outreach facilities to assist Vietnam veterans with psychological, drug or alcohol related problems as authorized by Public Law 96-22.

Mr. Chairman, the V.F.W. will not sit idly by and watch this attack on nearly the entire spectrum of veterans' benefits without a fight, the like of which you may have never witnessed. We look to this Committee, the Veterans' Affairs Committee and the Appropriations Committee to be our champions in dealing with the President's Office of Management and Budget and in the halls of Congress and save our veterans' hospital and medical care system.

As our National Commander-in-Chief, Arthur Fellwock, stated in testimony before both Senate and Hosue Veterans' Affairs Committees earlier this month, "We must never forget, nor permit the nation to forget, that those of us who served during periods of war and hostility have rendered a very special service to our great nation. We have given years of our lives, we have given years from our families and we have given years from our personal endeavors, if not also our physical and mental health."

A quote in the current edition of the Readers Digest by Jose Narosky states the case most eloquently: "In war, there are no unwounded soldiers."

Again, Mr. Chairman, permit me to reiterate the appreciation of the V.F.W. for the privilege of appearing for the first time before this forum to present our views on this most crucial matter of the Veterans Administration budget.

Thank you.●

MONTHLY STATEMENT OF EXPENSES AND FUND BALANCE OF CONGRESSIONAL STEEL CAUCUS FOR THE FOURTH QUARTER OF 1980

HON. BARBARA A. MIKULSKI

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 24, 1981

● Ms. MIKULSKI. Mr. Speaker, I am submitting for the RECORD the monthly statement of expenses and fund balance of the Congressional Steel Caucus for the fourth quarter of 1980:

MONTHLY REPORT, STATEMENT OF EXPENSES AND FUND BALANCE STATEMENT, U.S. HOUSE OF REPRESENTATIVES, CONGRESSIONAL STEEL CAUCUS

Statement of Expenses, October 1980

Salaries	$5,122.48
Travel	
Stationery: Donation, Mr. Bevill	72.11
Postage	
Telephone	59.68
Publications	
Equipment	163.35
Printing	
Miscellaneous	26.70
Total expenses for October 1980	5,444.32

Fund Balance Statement, October 1980

Balance forward (as of Sept. 30, 1980)	433.92
Total revenue (clerk hire and donations)	5,194.59
Total	5,628.51
Less expenses: October 1980	5,444.32
Balance of revenue	184.19
Plus interest deposit	28.31
Balance	212.50

Statement of Expenses, November 1980

Salaries	2,521.51
Travel	
Stationery	
Postage

Equipment	165.00
Printing	
Miscellaneous	
Total expenses for November 1980	2,739.32

Fund Balance Statement, November 1980

Balance forward (as of Oct. 31, 1980)	212.50
Total revenues (clerk hire)	2,521.51
Total	2,734.01
Less expenses: November 1980	2,739.32
Balance	5.31●

MINORITY VIEWS OF HON. BILL FRENZEL, HON. WILLIAM L. DICKINSON, HON. ROBERT E. BADHAM, HON. NEWT GINGRICH, HON. WILLIAM M. THOMAS, HON. GARY A. LEE, HON. JAMES K. COYNE, AND HON. LYNN MARTIN

HON. BILL FRENZEL

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 24, 1981

● Mr. FRENZEL. Mr. Speaker, the following minority report of House Administration Republicans will be a handy reference for debate on committee budgets:

MINORITY VIEWS OF HON. BILL FRENZEL, HON. WM. L. DICKINSON, HON. ROBERT E. BADHAM, HON. NEWT GINGRICH, HON. WILLIAM M. THOMAS, HON. GARY A. LEE, HON. JAMES K. COYNE, AND HON. LYNN MARTIN

During the past decade, the total authorization for committee budgets in the House

of Representatives increased astronomically. Standing committee budgets rose from approximately $6.3 million in 1970 to $30.7 million in 1980; budgets for the various select committees climbed from $1.2 million in 1970 to $3.4 million, 10 years later. Despite this phenomenal growth, these budgets have, for the most part, been routinely approved.

1981, however, represents a marked contrast. Committee budgets rather than being accorded a perfunctory review, have been subjected to intense scrutiny. What was once perceived as a mundane "housekeeping" matter, has been the focus of legislative concern since the opening days of the 97th Congress.

With the results of last November's mandate still fresh, with the public demanding reductions in government spending, with a new administration striving for significant economies, it would be expected that the House of Representatives would direct close attention to the costs of its internal operations. To that end, the *Minority on House Administration—seriously concerned over the ever-escalating committee costs—established a goal of reducing committee budgets overall to a level 10 percent below the expenditures incurred in 1980.*

We expect that committees of the House would recognize the pressing need for fiscal restraint during these times of austerity. It was with understandable shock and dismay that we witnessed committees submit "business-as-usual" budgets to House Administration—budgets which topped $37.8 million, an astounding $7.6 million or 25 percent over last year's expenditures.

SENATE EXPERIENCE

Ironically, while the budgets of House committees displayed an insatiable desire for more money, the Senate assumed a radically different posture. Last December, the Senate Republican Conference adopted a resolution with the purpose of achieving at least a 10 percent reduction in committee budgets.

We watched with admiration the actions of our counterpart Committee in the Senate—Rules and Administration—in pruning committee requests to achieve its 10 percent reduction target, an action which the full Senate ratified on March 3. This contrasted vividly with the profligate reality of the House where budgets pleaded for more staff, more travel, more equipment, more of everything purchaseable.

Although the Senate effort serves as a model, dissimilarities in the funding process as well as the distinctive needs of the two chambers necessitate an alternative approach. While the Senate sought a 10 percent decrease from last year's authorizations, we seek a more stringent reduction—10 percent from last year's expenditures. In large measure this reflects the fact that a significant portion of committee staff costs (those for salaries of so-called "statutory" personnel, for which $27 million has been appropriated to date in fiscal 1981) are not subject to review in the funding process. With such a sizable amount of committee costs unaccountable, more severe reductions are necessary in the budgets presented to the House.

AUTHORIZATION LEVELS

Even though we sought an overall 10 percent cut in expenditures, the reductions were not universally applied. One panel—the Committee on Armed Services—presented a compelling justification for a budget increase; we therefore supported the amount recommended by the Subcommittee on Accounts. Likewise, we were in accord with the Majority Members of the Committee in providing Standards of Official Conduct with the authorization level requested. The Committee on Public Works and Transportation has demonstrated yeoman efforts at holding costs down over the last several years; as a result we recommended an authorization level which reflected no cut from last year's expenditures.

The Subcommittee on Accounts was able to trim $4 million off of the bloated committee requests, and an additional half million from House Information Systems. Initially, the Subcommittee seemed likely to adhere to a formula which would have ensured hefty increases in committee budgets; however, once the genuine concern of Republican Members about the spiraling costs of committee budgets was recognized, the formula was discarded and more rigid standards applied.

In particular, the Minority would like to commend the new Chairman of the Subcommittee on Accounts, Rep. Frank Annunzio, for his successful efforts to hold the line on committee costs, and for his pledge to carry out a vigorous oversight program so the Subcommittee will have better information for next year's budget assessment.

Nevertheless, the Minority Members believe that the cuts made, although representing a good first step, are still insufficient. We urge that an additional $6.5 million be cut from the budget totals recommended by the Committee on House Administration, thereby establishing an overall budget level of $27,363,322 for House committees. The HIS budget should also be reduced by more than one million. We offered amendments to this effect in committee. Regrettably, these were rejected on party line votes. The following table illustrates our recommended authorizations on a committee-by-committee basis.

TABLE A.—BUDGET RESOLUTIONS APPROVED BY THE COMMITTEE ON HOUSE ADMINISTRATION

Committee	Authorization 1980	Expenditures 1980	Request 1981	10 percent cut in 1980 authorization (Senate model) [1]	House Administration recommendation	Percent increase/decrease		Proposal of GOP members House Administration
						1980 authorization	1980 expenditure	
Aging	1,233,000.00	1,153,838	1,322,000	1,109,700	1,233,000	0	+6.9	865,382

Total (including HIS)	[3] 43,602,118.00	[3] 39,971,551	47,394,476	39,241,906	42,886,562	−1.6	+7.3	34,511,572 (35,338,322)

[1] The Senate achieved a 10-percent cut in overall authorizations; the percentage cuts, however, varied on a committee-by-committee basis. This column illustrates how a 10-percent cut in authorization would appear if applied equally to all HOuse committees.

[2] Although the subcommittee requested separate funding for its study of pension plans, the Committee on House Administration consolidated the subcommittee request within the budget of the subcommittee's parent committee—Education and Labor.

[3] The totals do not include authorizations or expenditures for 2 select committees which expired in early 1980: OCS and Committee on Committees. Authorization for OCS was $116,000; for Committee on Committees, $287,857. Combined expenditures were over $300,000.

[4] The amount of $7,148,250 was recommended in subcommittee and represents a 25-percent reduction from the original request of $9,531,000. The amount of $7,975,000 was offered in full committee and represents a deletion of funds for all new proposed activities, and will be recommended on the floor.

Our efforts to reduce committee budgets should not be interpreted solely in terms of dollar savings to the American taxpayer. The ever-increasing infusion of cash to House committees also bears negative consequences from an institutional standpoint. The increase in committee budgets has spawned the growth of innumerable subcommittees which breed their own staff bureaucracies and fragment the coherent consideration of policy issues. There is a real danger that our staff is growing so rapidly in size and influence that it may soon, like the Senate staff, be making policy for us.

The increase in committee budgets has fed the demands for more and more staff. In 1970, less than 400 staff members were hired by moneys provided in standing committee funding resolutions. By 1980, nearly 1,000 committee staff were hired pursuant to these resolutions. Although select committees demonstrated only a moderate climb from 70 staff in 1970 to just over 100 in 1980; House Information Systems (which did not exist in 1970) added another 198 personnel to the congressional staff population.

The advantages of committee staff assistance has diminished as the increase in staff has been too fast, too large, and too inefficiently distributed. The bulk of the moneys in funding resolutions represent staff salaries; these resolutions therefore, provide a means to manage and limit staff expansion.

TRANSFERABILITY

At the early stages of the Committee's deliberations, we advanced amendments to impose a limit on the amount of money which could be expended on salaries in each resolution.

Presently, committees are authorized a lump sum amount in the funding resolution and, with certain exceptions (specialized training, procurement of consultants, reimbursement of computers and related services from the House Information Systems), there is no restriction on the transfer of funds from one committee account to another.

The salary limitation amendment encompassed a twofold purpose. First, it would eliminate the possibility of transferring money from non-salary items such as travel or equipment for use in hiring additional staff. Second, and more significantly, it would establish some rough line-item differentiation between salary and non-salary items—thereby imposing greater accountability and rationality on the committee budget process.

These amendments similarly were rejected on party line votes.

MINORITY STAFFING

We also proposed amendments to the funding resolutions which would have provided the minority with one-third of the funds allocated for staff salaries. Such amendments, however, were not offered to those Committees with unitary or nonpartisan staffs—Armed Services, Intelligence, and Standards of Official Conduct.

Although a one-third standard applies to "statutory" staff, no such guidelines apply to staff hired pursuant to funding resolutions. As a consequence, only about 15 percent of the staff hired pursuant to funding resolutions are assigned to the minority. Even if statutory staff are incorporated in the ratio, the total minority share hovers at a low 20 percent. This ratio is manifestly inequitable for a body in which Republicans constitute 44 percent of the membership.

We have been amazed at the disparity in investigative staff ratios for many of the committees which have appeared before the Subcommittee on Accounts. On the Committee on Rules, for example, only 1 of 17 investigative staff was allocated to the minority; on the Committee on Foreign Affairs, only 3 of 55; and on the Committee on Energy and Commerce, only 15 of 135. Improvements in staff ratios, as contemplated in the proposed budgets, appear to be only minimal.

The Senate in 1977 adopted a rule to provide the minority with one-third of the committee staff positions. During the recent transition, this standard was retained. Twice in the past decade, in 1970 and 1974, the House adopted amendments stipulating that the minority be earmarked a one-third share of committee funding resolutions allocated for staff hire. Regrettably, in each case, the Democratic Caucus subsequently nullified the minority staffing provision.

Understandably, House Members, in the wake of the staff explosion during the 1970's and its attendant cost, are reluctant to approve any provision which might fuel any further expansion of staff. Yet the issue of staff growth and the issue of establishing standards for minority/majority staff allocations are uniquely separable items. Equitable minority treatment does not presume any escalation in staff growth. Rather it would be a beneficial complement not only to the capabilities of the minority party, but more importantly to the institution as a whole. For the staff disadvantage now evident is simply counterproductive. It shortchanges the minority, it shortchanges the legislative process.

COMMITTEE REVIEW

Of the 25 funding resolutions considered by the Committee on House Administration only 3—Standards of Official Conduct, Armed Services, and House Administration—received the unanimous endorsement of the full Committee.

Of particular relevance is the budget presented by the Committee on House Administration. The Committee requested—and was granted—an authorization of $1,219,000. This represents a decrease of not only 30.1 percent from last year's authorization, but more remarkably, a decrease of 19.4 percent from last year's expenditures. We congratulate our Chairman for substantially reducing costs and pledge our continued support to that end. However, it is regrettable that the Committee's budget was not a model, but rather an obvious exception, to this year's funding process.

Several of the committee budgets raised issues apart from cost which deserve some attention.

Committee on Rules.—In 1975, the Committee on Rules operated with a funding resolution of $30,000, and with the able assistance of 18 staff members. By 1981, the Committee had amassed 45 staff members—and if this resolution is adopted, will be granted a budget authorization of $530,738.

It might be argued that some restraint has been displayed since this year's authorization is modestly lower than the one adopted in 1980. However, this ignores the fact that the 1981 authorization level represents a 16-percent increase over 1980 expenditures.

An amendment was offerd during full committee consideration on February 25, to reduce the authorization by the amount of annual compensation for individuals designated as "associate committee staff". Currently, the Committee on Rules sets aside a portion of staff slots to allow Members to personally appoint an individual to assist with committee work. This is an inappropriate and unnecessary use of staff, particularly for an exclusive committee whose Members have but that one assignment. The amendment, which would have lowered the authorization by 34 percent from last year's expenses, was rejected.

Committee on Post Office and Civil Service.—By far, this was the most controversial resolution considered by the Committee on House Administration. The key point of contention involved a proposed $200,000 (plus an additional $116,000 in salaries) for a Redistricting Data Center to provide Members with information and consultation regarding reapportionment. As redistricting is a state responsibility, not a Congressional one, the value of such a center operated by a congressional panel appeared dubious; its purpose—illegal.

After rejecting amendments to prohibit this service, the Committee ultimately reconsidered its action on the resolution, and then deleted the $200,000 in funding for the Center, adding language to the resolution prohibiting use of funds for that purpose.

Unfortunately, the Committee did not delete the $116,000 for personnel to manage the service, so the Post Office Committee gets a free gift of unneeded staff. It had previously been given another free gift of unneeded staff when it requested extra positions for its Franking Commission duties.

Select committees.—Funding for three Select Committees—Aging, Narcotics Abuse and Control, and Intelligence—was reviewed by House Administration. We acknowledge that special circumstances often require the creation of select committees; yet we are concerned that, unless due care is exercised, such committees may interfere with the effectiveness of the standing committee system.

We suggested greater spending cuts for Aging and Narcotics Abuse and Control because of their lack of legislative jurisdiction. It is our intent to attentively examine the monthly activities reports of the select committees to ensure that they are a complement to, and not a duplication of, the standing committees which exercises legislative authority in the relevant areas.

House information systems.—No more perplexing budget was received than that of HIS. For two months the HIS budget proposal was scrutinized by the Policy Group on Information and Computers. A bewildering array of statistics was presented; supplementary materials provided appeared more likely to obfuscate than enlighten. Indeed, on the day before the HIS budget was to be considered by the Subcommittee on Accounts, a new budget was delivered which evidenced little correlation with the previously supplied material.

The minority's only recourse was to offer various amendments, all defeated, reducing the authorization. Our goal was to prevent beginning new programs costing over $1 million until our Committee understood what HIS was doing with its existing programs. We acknowledge that HIS has been of considerable benefit to the House, inspiring and promoting technological advances which have strengthened our resource capabilities. However, HIS has also displayed a penchant for pursuing programs of questionable value and limited applicability. It is our view that to embark on new programs, before any thorough review is undertaken, would be unwise.

Beginning last year, committees were required to reimburse HIS for services provided. Although there remain some difficul-

ties in the implementation of the reimbursement policy, we believe this is a good step, and one which should be extended in the future.

PARLIAMENTARY IMBROGLIO

In the past, the House has considered each committee's funding resolution separately on the floor. Although rarely was it permissible to offer amendments, there was always the opportunity to debate the merits of each funding resolution and vote on each one individually.

Now we are confronted with a new procedure designed to prevent careful Congressional scrutiny of each Committee's budget. All the funding resolutions have been conveniently grouped into one omnibus resolution. No longer will there be separate consideration and a separate vote. Whatever debate time will be provided will be limited at best. The intent is to make the whole package carry the big-spending Committee budgets—Rules, Post Office and Civil Service, Energy and Commerce—each of which might fail in an isolated vote.

This procedure is another form of "gag-rule", ill-suited to careful deliberation. It only hampers the responsible exercise of our legislative duties. We hope and expect that the House would reject this departure from traditional practice.

CONCLUSION

Committee Republicans believe that the committee funding process is one which cries out for greater accountability, equity, and fiscal control. Granting that progress has been made this year, we strongly urge the following improvements:

Elimination of the distinction between statutory and investigative staff, requiring that all staff costs be incorporated in the funding resolutions;

Integration of the Appropriations Committee and the Budget Committee into the committee budget review and oversight process;

Continued reductions in committee spending, to stem the previously uncontrolled growth in committee budgets;

Incorporating a one-third minority staffing provision in the funding resolutions, to establish a fair share allocation of staff resources;

Elimination of "associate committee staff" (now utilized by Rules, Appropriations and Budget);

Review of Rule XI, clause 5(d) which requires fractionalized subcommittee staffs.

Another goal, newly added to the list, is to restore the traditional practice of considering committee funding resolutions separately and on their own merits—and not as an indistinguishable part of an omnibus resolution.

On the single Resolution reported by the Committee on House Administration, we will ask the House to amend it to meet our target of a total 10-percent reduction under last year's expenses. If that amendment is not adopted, we urge defeat of the resolution.

In the week ahead, the House will have an opportunity to address the heretofore uncontrollable cost of its own committee structure. We believe that the House must demonstrate that it also is ready to participate in the sacrifice it is seeking of all Americans. We will be measured by our example.●

ELEANOR PRECH'S RETIREMENT

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 24, 1981

● Ms. OAKAR. Mr. Speaker, on February 13, 1981, the citizens of the Greater Cleveland community marked the retirement of a beloved and respected journalist—Eleanor Prech, who retired as nationalities writer for the Cleveland Press. Eleanor Prech leaves behind 44 years of distinguished journalistic writing for the Press, where she served at different times as editor of a "Round the World" in Cleveland column, editor of "War Zone Department" during the Second World War, editor of the "Women's Pages," and then nationalities writer upon the retirement of Mr. Theodore Andrica in 1973.

Before joining the Press in 1937, Eleanor attended Miami University in Oxford, Ohio, Cleveland College of Western Reserve University, and Columbia University. In 1956, Eleanor received a special honor by winning a $5,000 grant from the former New York Herald Tribune to study in Europe for 1 year, where she gained a firsthand knowledge of the lives of European women.

Once she had become nationalities writer in 1973, Eleanor devoted virtually all of her time and efforts in reporting the activities of Cleveland's 64 nationality groups. By her interest and involvement in these activities and by her desire to communicate in a colorful and descriptive style the customs of Cleveland's nationality groups, Eleanor helped to build better community understanding among all Greater Clevelanders in a direct and personal way.

Eleanor's nationalities column always brightened the pages of the Press and brought smiles to the faces of countless readers. I will miss reading her column, but I am grateful to Eleanor Prech for having expanded my horizon in understanding other peoples and cultures.●

REAGAN'S BUDGET CUTS: DEVASTATING IMPACT ON THE POOR

HON. FREDERICK W. RICHMOND

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 24, 1981

● Mr. RICHMOND. Mr. Speaker, I know my colleagues will be interested in an excellent study of the impact upon the poor of President Reagan's proposed budget cuts. The study was prepared by Tom Joe, Cheryl Rogers, and Rick Weissbourd of the Center for the Study of Welfare Policy of the University of Chicago, which is widely known and respected for its authoritative, accurate, and nonpartisan social welfare research and analyses.

The most alarming finding of this study is that the administration's proposed cuts in Federal spending will reduce the income level of the poor—in some cases to less than 50 percent of the poverty standard—and those hit hardest of all will be the working poor. The President claims that he has left a safety net for low-income Americans, but this study clearly and convincingly demonstrates that this is not so.

Mr. Speaker, this study dramatically underscores the need for Congress to develop alternative budget cutting proposals that will not harm the poor, the elderly, mothers with children, and others in our society who are least able to withstand a loss in services and benefits. For the information of my colleagues, the executive summary of the study "The Poor: Profiles of Families in Poverty" follows:

THE POOR: PROFILES OF FAMILIES IN POVERTY

(By Tom Joe, Cherly Rogers, and Rick Weissbourd)

EXECUTIVE SUMMARY

The Administration's proposed reductions in federal spending will exact a high price from low-income Americans. Substantial cutbacks are slated for the means-tested programs that provide the primary lines of defense for the poor against destitution: Aid to Families with Dependent Children (AFDC), food stamps, Medicaid, energy assistance, public housing and the Comprehensive Employment and Training Act (CETA). In some cases, the combined impact of the Administration's budget proposals will reduce the income level of the poor to less than 50 percent of the poverty standard.

Although the merits of combatting inflation by reducing federal spending are debatable, this report does not address this issue and is in fact premised on the inevitability of spending reductions. The following analysis, instead, serves to underscore the need for alternative budget cuts. This paper provides no such alternatives; it serves a prior purpose in portraying the alarming consequences of the Administration's recommendations on the poor.

President Reagan's proposals to reduce federal spending for these public assistance programs have two critical flaws: they strip low-income families of their already meager resources while inflation continues to erode the value of their incomes, and they shift significant fiscal burdens onto states and localities whose budgets are already in the red. In order to show the stark effects of the cuts on the poor, we have presented a number of profiles of typical low-income families under the current system and under the proposed changes in the six programs listed above. The following provides a brief synopsis of our findings.

Over half of the states provide combined income from AFDC and food stamps below 75 percent of the poverty standard, and in few states does the combined income equal the poverty level. On top of these already low benefit levels, the Administration's proposals regarding AFDC and food stamps will result in several additional hardships for

the poor. First, the monthly disposable income of all AFDC and food stamp recipients will be reduced. Non-earners will drop several percentage points while earners fall an average of 21.5 percentage points in the states selected for study. Secondly, the proposals will discourage work by making it less profitable to maintain earnings. In one state, a working AFDC mother earning average wages will receive the same monthly disposable income as a nonworking AFDC mother. In all states, the difference between the total income of an earner and nonearner decreases dramatically under the Administration's proposals. A third effect will be to subvert the positive value of work through a punitive workfare program that does little to lessen dependency.

The average annual Medicaid expenditures for an AFDC family of three in FY 1978 was $1,140. The President has proposed $100 million in savings in 1981 and a cap of 5 percent on 1982 expenditures. Although no specifics have been made public, it is likely that Medicaid recipients who lose some or all of their Medicaid benefits will not have the income necessary to cover losses up to $1,140.

Low-income energy assistance payments, which in FY 1981 already failed to meet the average increased cost of heating fuel, will be cut by 25 percent. Average annual payments in nine states would decrease from $158 to $114 while energy prices continue to escalate.

For low-income persons living in federally subsidized housing, the Administration proposals will further reduce their income by 5 percent over the next 5 years. The national average monthly contribution per tenant in Section 8 housing in FY 1979 was $92.43. Under the Administration proposals, this will rise to $108.70 in FY 1986. Although the difference between these numbers appears small, it represents an 18 percent payment increase for a low-income family whose budget is well below the poverty standard. For low-income families whose incomes are already being diminished by other assistance cuts, increased rental payments only magnify the economic hardship they are likely to face.

On top of these income and service reductions, employment opportunities through Public Service Employment (PSE) programs are being eliminated. Of the more than 300,000 people to be affected by this, many can be expected to return to public assistance rolls or unemployment insurance, thereby increasing the burden on government in terms of rising benefit payments and a reduction in tax revenues.

The cumulative effect of these budget cuts on low-income families threatens to severely undermine their already weak purchasing power. As a result, states and localities will be forced to assume increasing responsibility for low-income persons. This is likely to cause serious political, administrative and financial problems for state and local governments. Politically, they will be forced to limit eligibility or reduce services for one group over another if they cannot raise local revenues. Administratively, they will be faced with several new technical problems such as those associated with establishing and operating mandatory work programs and administering multiple programs through block grants. States and localities will also be forced to assume an additional cost burden as many current recipients in federal-state matching programs will have to be covered by General Assistance and served in county hospitals which are funded entirely through state and local revenues.

Alternative budget cuts must be developed that require sacrifices from segments of the population that can sustain a loss in services and benefits. The poor, it needs to be known, cannot.●

SENATE—*Wednesday, March 25, 1981*

(Legislative day of Monday, February 16, 1981)

The Senate met at 9:30 a.m., on the expiration of the recess, and was called to order by the Honorable FRANK H. MURKOWSKI, a Senator from the State of Alaska.

PRAYER

The Chaplain, the Reverend Richard C. Halverson, LL.D., offered the following prayer:

Bless the Lord, O my soul; and all that is within me, bless His holy name! Bless the Lord, O my soul, and forget not all His benefits, who forgives all your inequity, who heals all your diseases, who redeems your life from the pit, who crowns you with steadfast love and mercy, who satisfies you with good as long as you live. Psalms 103: 1–5 (R.S.V.)

Gracious, loving God, forgive the indifference with which we receive life's common blessings Thou dost lavish upon us daily. We enjoy love of family while many families are broken by persecution and oppression. We have more than we need to eat while millions never have enough and thousands starve to death each day. We live in warm, comfortable homes while millions languish in refugee camps.

Father in heaven, receive our inexpressible gratitude and fill us with compassion for the poor, the oppressed, the homeless, and the hungry.

We ask this in the name of Him whose love and care includes all. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. THURMOND).

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., March 25, 1981.

To the Senate:

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable FRANK H. MURKOWSKI, a Senator from the State of Alaska, to perform the duties of the Chair.

STROM THURMOND,
President pro tempore.

Mr. MURKOWSKI thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF THE MAJORITY LEADER

The ACTING PRESIDENT pro tempore. Under the previous order, the majority leader is recognized.

Mr. BAKER. I thank the Chair.

THE JOURNAL

Mr. BAKER. Mr. President, I ask unanimous consent that the Journal of the proceedings of the Senate be approved to date.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, in a few moments, we will begin a sequence of special orders in favor of 26 Senators. Before we do that, I have two matters I should like to address.

First, I ask unanimous consent that the order for the special orders be modified so that the distinguished Senator from Missouri (Mr. EAGLETON) may receive the first special order.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BAKER. Mr. President, if the Senator from Missouri will withhold for just a moment and if the distinguished minority leader will permit me, I will shortly send to the desk a resolution and ask for its immediate consideration, in respect to a change in rule XXV paragraph 3, of the Standing Rules of the Senate, with respect to the Small Business Committee. I believe it has been cleared on both sides.

SENATE RESOLUTION 101—CHANGING STATUS OF COMMITTEE ON SMALL BUSINESS TO THAT OF A STANDING COMMITTEE

Mr. BAKER. Mr. President, I send to the desk a resolution in respect to a rules change and ask for its immediate consideration.

The ACTING PRESIDENT pro tempore. The resolution will be stated by title.

The legislative clerk read as follows:

A resolution (S. Res. 101) to change the status of the Committee on Small Business to that of a standing committee, and for other purposes.

Mr. BAKER. Mr. President, I ask unanimous consent that reading of the resolution be dispensed with.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Is there objection to the present consideration of the resolution?

Mr. ROBERT C. BYRD. I have no objection.

Mr. WEICKER. Mr. President, as chairman of the Small Business Committee, I rise in support of this resolution. I would like to thank the joint leadership for their support and cooperation in this effort to change the status of the Small Business Committee.

Although the Small Business Committee has had all of the powers and authority of a standing committee of the Senate since it acquired legislative authority in 1976, it has continued to be labeled a "select" committee. By taking this action today, the Senate is sending a clear signal to the American people that the problems of small business are not to be ignored or forgotten, but that small business and its advocate, the Small Business Committee, are here to stay.

This resolution in no way alters the committee's current authority or jurisdiction, and will have no impact on the ability of any committee member to serve on this, or any other committee in the Senate.

Today, as the Small Business Committee takes its rightful place among the standing committees of the Senate, is a truly significant and long-awaited day for small businesses across this Nation.

HISTORY OF THE SMALL BUSINESS COMMITTEE

The Senate Small Business Committee was created as a select committee during the 81st Congress to study and survey "by means of research and investigation all problems of American small business enterprises, and to obtain all facts possible in relation thereto which would not only be of public interest, but which would aid the Congress in enacting remedial legislation."

The committee was empowered from time to time to report to the Senate, by bill or otherwise, its recommendations on matters referred to the committee or otherwise within its jurisdiction. At the time of its creation, the committee was not granted legislative authority, nor was a termination date specified. Despite this lack of legislative authority, the Small Business Committee throughout these earlier years continued to reflect the needs of small business through its legislative mandate.

On April 29, 1976, the Senate passed Senate Resolution 104, which gave the Select Committee on Small Business legislative authority over the Small Business Administration, to take effect when Congress reconvened in January, 1977. The committee continues to have and exercise that authority.

Mr. President, today's action by this Senate is particularly ironic when you consider that in 1979, a serious attempt was made to abolish this committee entirely.

That today we are not only reaffirming our faith in this committee, but are further recognizing its ongoing importance by making it a permanent, standing committee shows clearly the progress small business has made.

Giving the committee permanent status as an advocate for small business is the culmination of a growing appreciation and recognition of the contributions small business has made and will continue to make, and of the clout the small business community has come to have.

Further proof of this clout is in the growing interest in having membership on this committee. Originally set at 9 members, the committee size nearly doubled to 17 at the beginning of the 96th Congress, when Senators, recognizing the breadth of the small business constituency, showed increased desire to sit on the committee.

SMALL BUSINESS IN THE AMERICAN ECONOMY

The importance of small business in our economy is clear. The facts speak for themselves. Small businesses account for 43 percent of the gross national product, 58 percent of private employment, and 75 percent of all new jobs. Finally, after many years of neglect, these economic facts are being translated into political clout.

I might add it is about time. And not a moment too soon. We are witnessing a growing concentration of economic power. If our free enterprise system is to survive, a reversal in Federal tax and regulatory policies must occur.

The top Fortune 100 firms now control the same share of manufacturing assets that the top 200 did 30 years ago. Put simply, this means that today the same amount of the Nation's assets are concentrated in half as many hands. The top 200 firms now control 61 percent of the Nation's manufacturing and mining assets, which is the same percentage share owned by the top 1,000 enterprises at the start of World War II. Meanwhile, small- and medium-sized businesses today control less than 27 percent of this country's corporate assets, whereas they owned nearly twice as much in 1960.

This increased economic power in the hands of a few of our Nation's largest businesses has not come about due to efficient operations. Instead, it has come about due to the purchase of small businesses by larger businesses. Nearly 74 percent of those businesses acquired by merger or acquisition in 1976 had assets of less than $1 million, while almost half of the acquiring companies had assets in excess of $100 million.

Clearly, small businesses are being swallowed up. At a certain point in their growth, small business owners have found it more attractive to sell out than to continue to try to exist as a private independent interest. Taking into account existing economic structures, it is understandable. Small businesses are finding it increasingly difficult to survive. Fifty-five percent of all businesses in the United States fail in the first 5 years. With interest rates for short-term borrowings hovering around 20 percent, a growing number of small firms are being forced into bankruptcy.

As chairman of the Small Business Committee, I believe we have an important role to play as an advocate for the small business community. A large part of that role is to see that this kind of trend toward failure and surrender does not continue. I intend that this committee act as a legislative watchdog, reviewing bills from the small business perspective, and assessing their impact on this diverse and important business sector.

In this advocacy role, I introduced, earlier this year, S. 360, the Omnibus Small Business Capital Formation Act. This comprehensive legislation, cosponsored by Senators LURENBERGER, NUNN and 19 others, was offered so as to insure that the questions of small business tax relief will be seriously considered at the earliest stages of deliberation on tax cut legislation. I intend to bird dog the progress of this bill every step of the way in an effort to obtain fair and equitable tax treatment for small businesses.

Members of the Small Business Committee know well the seriousness of the problems facing small businessmen and women. Their advocacy role has been ongoing; it does not just start now.

In addition to the tax reform legislation I mentioned a moment ago, this committee has begun active oversight of the SBA, with a number of hearings on programs and policies already planned.

Yesterday we held a confirmation hearing on Michael Cardenas, the President's choice for Administrator of the SBA, and just this afternoon we completed deliberations on that nomination by approving Mr. Cardenas for that weighty and highly demanding job.

We intend to work closely with Mr. Cardenas in the months ahead as we continue our oversight activities with regard to the SBA, something I, as chairman, set as one of our top priorities at the beginning of this year.

We are also committed to seeing that the Regulatory Flexibility Act, the Equal Access to Justice Act and the Patent Reform Act—all important laws enacted last year—are fully implemented and administered effectively. We will likely be holding hearings in the coming weeks and months to fulfill that aim.

We have been and we will continue to be advocates for small business. As advocates, we appreciate the support the Senate has given us today and the message they have sent to the country. Small business is here to stay, and as of today, so is this committee.

Mr. NUNN. Mr. President, I support the resolution amending the Standing Rules of the Senate to elevate the status of the Select Committee on Small Business to a full standing committee.

Since the creation of the Small Business Committee on February 20, 1950, it has played a significant role in the jurisdiction on par with other standing legislation of interest, need, and concern to the small business community.

However, it was not until the passage of Senate Resolution 104 in April 1976 that the committee received legislative jurisdiction on par with other standing committees of the Senate.

The Senate's action today will merely clarify the fact that the Small Business Committee, like its sister permanent committees in the Senate, is a full standing committee.

The resolution makes no change in the jurisdiction of this, or any other committee.

The resolution makes no change in the ability of present members to serve on the Small Business Committee, and does not impact service on any other committee.

The resolution creates no new committee in the Senate.

The resolution requires no additional expenditures by the Senate.

Simply, the resolution has the effect of eliminating the appearance that the Senate is relegating the important issues of small business to some kind of subordinate Senate committee.

In 1950, Congress firmly addressed the importance of creating a strong and healthy environment in which small business could be created and flourish.

But we also saw the structural barriers in our society that stifled that environment. The creation of the Select Committee on Small Business was the vehicle designed to identify those limitations and recommend solutions to them.

In 1953, Congress established the Small Business Administration as an independent agency of the executive branch. Originally, the SBA was created to help small businesses meet the needs for interim financing.

It has performed that job well, so that, to date, it has made over $25 billion in direct and guaranteed loan assistance to the independent entrepreneur, at minimal cost to the Government. During the past 28 years, Congress and the executive branch have broadened the agency's mission and responsibilities beyond that financing role. Through the most decentralized and diversified field structure in the Federal Government, the Small Business Administration:

Administers emergency disaster assistance for homeowners and businesses;

Utilizes private sector resources to foster equity capital for businesses through small business investment companies;

Provides procurement assistance and access to contracts for small and small disadvantaged businesses that might otherwise be foreclosed in the normal procurement process; and

Has one of the most successful advocacy programs on behalf of their constituents.

These programs have been created, reviewed, and refined by the work of the Senate Select Committee on Small Business during the past quarter century—in cooperation with other standing committees. That cooperation will continue to exist.

This resolution signals to the small business community, the executive branch, and the public, that the con-

tinued vitality of small business is a matter of continuing priority for the U.S. Senate. The resolution is the next logical step for us in its recognition of small business.

Mr. President, I urge adoption of this resolution.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the resolution.

The resolution was agreed to.

The resolution (S. Res. 101), submitted by Mr. BAKER for himself, Mr. ROBERT C. BYRD, Mr. WEICKER, Mr. NUNN, Mr. HATCH, Mr. HAYAKAWA, Mr. GORTON, Mr. RUDMAN, Mr. D'AMATO, Mr. BAUCUS, Mr. LEVIN, Mr. DIXON, Mr. BUMPERS, Mr. HUDDLESTON, Mr. SASSER, and Mr. BOSCHWITZ, reads as follows:

S. RES. 101

Resolved, That Rule XXV, paragraph 3 (b), is amended by striking:

"Small Business..... 17".

SEC. 2. Rule XXV, paragraph 3(a), is amended by striking the period at the end and adding in lieu thereof:

"Small Business..... 17.".

SEC. 3. Paragraph 1 of Rule XXV is amended by—

(a) redesignating subparagraph (o) as subparagraph (p); and

(b) inserting after subparagraph (n) the following new subparagraph:

"(o) (1) Committee on Small Business, to which committee shall be referred all proposed legislation, messages, petitions, memorials, and other matters relating to the Small Business Administration.

"(2) Any proposed legislation reported by such committee which relates to matters other than the functions of the Small Business Administration shall, at the request of the chairman of any standing committee having jurisdiction over the subject matter extraneous to the functions of the Small Business Administration, be considered and reported by such standing committee prior to its consideration by the Senate; and likewise measures reported by other committees directly relating to the Small Business Administration shall, at the request of the chairman of the committee on Small Business, be referred to the Committee on Small Business for its consideration of any portions of the measure dealing with the Small Business Administration, and be reported by this committee prior to its consideration by the Senate."

"(3) Such committee shall also study and survey by means of research and investigation all problems of American small business enterprises, and report thereon from time to time."

SEC. 4. Senate Resolution 58, agreed to February 20, 1950 is repealed.

SEC. 5. Senate Resolution 272, agreed to May 26, 1950 is repealed.

SEC. 6. Senate Resolution 104, agreed to April 29, 1976 is repealed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. WEICKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I have no further need for my time under the standing order, and I am prepared to yield it to the distinguished minority leader or any other Senator.

Mr. ROBERT C. BYRD. I thank the distinguished majority leader. I will accept the time.

ORDER OF PROCEDURE

Mr. ROBERT C. BYRD. Mr. President, I yield to Mr. PROXMIRE such time as he may desire.

Mr. PROXMIRE. I thank the minority leader.

UNITED NATIONS REPORT ON GENOCIDE IN CAMBODIA

Mr. PROXMIRE. Mr. President, many people feel that a genocide treaty is no longer necessary because the horror that occurred in Hitler's Europe in World War II will never recur. The fact is that genocide is something that has happened over and over again and is happening right now.

No lesser an authority than the United Nations has asserted just recently that genocide committed by the Pol Pot regime lies at the root of Cambodia's current, serious problems.

The study, sponsored by the U.N. Human Right's Commission, describes events in Cambodia as "without precedent in our century, except for the horror of Nazism."

The barbaric genocide of the Khmer Rouge left millions dead and maimed. Conservative estimates put the percentage of Cambodians destroyed at over one-seventh of the population. Those who survived will bear deep psychological scars for the rest of their lives. The atrocities of the Pol Pot regime during 1958 were committed in the name of self determination and Marxist rule. Yet the price was a calculated, systematic elimination of entire segments of the national population. The study emphasizes that the memory of this genocide must never be forgotten.

This report, issued on January 19 of this year, led to the recent U.N. Human Rights Resolution 29, which cites the extreme violations of human rights in Cambodia in recent times, and calls for the parties of the present conflict to negotiate a settlement, and begin to improve the terrible conditions the population now faces.

Mr. President, that the Cambodian people have suffered famine, torture, and persecution in the past decade is not news. Reports of this sort serve to confirm our worst fears, by revising our estimates of killing and destruction constantly upward. But to a generation that has seen death camps, political torture, and widespread repression, additional horrors seem almost commonplace—inevitable products of the dark side of human nature. This acceptance is both frightening and intolerable.

Somewhere the terror must stop; sometime a declaration must be made against the madness we almost helplessly accept. There now exists a declaration that condemns the insanity of mass murder, and makes this most grotesque violation of human rights and international crime. The United States has not joined in this declaration.

We, the United States, submitted the Genocide Convention. President Truman submitted the Genocide Convention for Senate ratification in 1949. We were successful in gaining its adoption by the United Nations first. We led the way. Thirty-two years later, the Senate remains uncommitted on this issue. We have not voted on a treaty that asserts the most basic right to live, that has been supported by every President since Truman, including the current incumbent President, President Reagan, and the Secretary of State, Alexander Haig. Of course, this would greatly strengthen our credibility when speaking out against oppression and persecution throughout the world.

Only the John Birch Society and a few other far, far right groups oppose this. The American Bar Association, every religious group has spoken out strongly in favor of our ratifying the convention, and yet this body somehow has not found the will or the courage to act as we certainly should.

Few, if any of us would be unwilling to express outrage over the crime of genocide. Now it is time to stand together and be counted. There is no reasonable defense against the treaty's ratification, and our inaction in these Chambers only serve to embarrass us in the eyes of the world.

We must ratify the Genocide Convention.

Mr. President, I yield the floor.

Mr. ROBERT C. BYRD. Mr. President, I yield the remainder of my time to Mr. EAGLETON if he needs it.

RECOGNITION OF SENATOR EAGLETON

The ACTING PRESIDENT pro tempore. The Chair recognizes Mr. EAGLETON.

Mr. EAGLETON. I thank the President and I thank both the distinguished majority leader and the distinguished minority leader for their courtesy.

THE REAGAN ADMINISTRATION AND HUMAN RIGHTS: A DISTURBING SHIFT

Mr. EAGLETON. Mr. President, during his Presidential campaign, President Reagan pledged to change the direction of the country in both domestic and foreign affairs and his impressive electoral mandate obviously gives him the right to enunciate and pursue new policies.

Nevertheless, I express my concern over one of those policy shifts, namely, the decision to deemphasize, if not abandon, the human rights element of the Carter administration's foreign policy.

While I applaud the administration's

resolve to mount a major effort to combat international terrorism, I believe that this new policy should be looked on as an extension of, and not a substitute for, our commitment to human rights. Fundamentally, there is little difference between the violent tactics of terrorist groups and the systematic brutality of some governments. Both are exercises in power from the barrel of a gun. Both rely on the instruments of fear and repression to achieve their ends. Both are abhorrent to the values of freedom and human dignity this Nation always has represented.

I am a realist and recognize that we live in an imperfect world. At times, our national interest requires that we cooperate with and assist regimes whose domestic policies we find repugnant. It is the choice of the lesser evil.

However, such exigencies should not be allowed to obscure our more lasting purpose of promoting human rights throughout the world. This involves a delicate diplomatic balance, which sometimes depends as much on how we undertake an action as the action itself.

That brings me to the point of my remarks today, which is to register my dismay at the warmth with which this administration has embraced a succession of questionable regimes around the world. I cite the following events which have taken place since the November election.

In the administration's first public statement of policy toward South Africa, President Reagan stunned the frontline South African nations by proclaiming support for the government of Prime Minister P. W. Botha, thus undermining the collective settlement project in Namibia which the United States, Britain, Germany, and Canada have pressed since 1978. There are reports that the administration is considering inviting Mr. Botha to become the first South African head of state ever to visit the United States. In one of the most shocking examples of official deceit I have witnessed in many years, the State Department has backtracked on earlier denials and now confirms that the highest ranking South African military intelligence officer met secretly with U.N. Ambassador Jeane Kirkpatrick last week. Just a few days before, the Department vigorously denied that the visit had any official sanction. In fact, it was said to have occurred without official knowledge. Now the truth comes out, and we find that not only did the visit have official blessing, but this military representative of the most openly racist society on Earth had a private meeting with a member of the Reagan Cabinet.

Next point: As President-elect, Mr. Reagan met with Imelda Marcos—wife of Philippine President Ferdinand Marcos. Reportedly, he gave assurances that the new administration would be less judgmental toward the Philippine Government, which was characterized as a major ally. Those assurances tended to relieve President Marcos of the pressure on him to ease repressive conditions in the island nation.

In February, President Reagan received President Chun Doo Hwan of South Korea at the White House. He was the second head of state to be officially welcomed since the inauguration. By embracing President Chun, President Reagan diluted the criticism this Government has continued to express over South Korea's violent takeover of the government by the military.

Next item: Secretary of State Alexander Haig received Argentine President-designate, Lt. Gen. Roberto Viola, and signaled an apparent willingness to lift the 3-year ban on arms sales to Argentina imposed by the Carter administration for violations of human rights. He also indicated a willingness to act favorably on Argentina's desire to purchase about 100 million worth of arms.

Next: The new administration has indicated a willingness to ask Congress to repeal legislation that effectively prohibits U.S. military intervention in Angola. Coming so quickly on the heels of our escalating involvement in El Salvador, this is particularly disturbing.

Next: Reports have circulated concerning the prospect of renewed and extensive American arms sales to Pakistan—in particular, the sale of two squadrons of F–15 fighters, a request the Carter administration would not even consider.

Next: The State Department announced resumption of Export-Import Bank financing for American exports to Chile and also invited Chile to participate in military exercises with the navies of the United States and Argentina.

Next: Members of the administration have proposed selling C–130 Hercules military transport planes to the revolutionary government of Algeria, thus reversing a longstanding policy barring military sales to that Soviet-supplied militant government.

Adding to the burden of these developments, the administration has seen fit to nominate a once outspoken opponent of human rights statutes to head up the State Department office responsible for administering those very laws. Rightly or wrongly, the nomination of Ernest Lefever to that critical post will be taken by a watching world as an abandonment of our past commitment.

The unfortunate message these events convey to the world, I am afraid, is that we no longer care what outrages a government commits against its own people so long as it can be useful to us in containing the spread of guerrilla terrorism. I hope that this is not the administration's intent, for it would have serious practical as well as moral implications for U.S. foreign policy.

Our identification with the aspirations of oppressed people throughout the world has given our country a real edge in competing for influence in the Third World. Nothing has so confounded the Soviets in recent years as the fundamental contrast between governments founded on the basis of respect for human rights, and the Communist system. Even the nonalined movement has become a source of consternation for the Soviets.

A rational case can be made that the Carter administration went a bit overboard in its human rights policy. Certainly, it can be argued that the policy was applied in an inconsistent way. I can well understand an effort to correct those admitted problems. What concerns me is that this administration appears to be going too far in the opposite direction, publicly courting governments with human rights records almost as deplorable as that of the Soviet Union itself. In many cases, these countries are either not vital to our interests or have their own motives for staying distant from the Soviet Union.

This cannot be an encouraging development to those countries which have responded to our leadership in the human rights area, and which have influenced organizations such as the OAS and the OAU to incorporate the basic tenets of freedom in their respective charters. Do we throw away these advantages simply because we did not like the inconsistencies of the last administration? Does it not make better sense to correct the inconsistencies, but maintain the policy which has served us so well in the world?

Mr. President, it is not the administration's new foreign policy initiatives that so much concern me. It is the seeming abandonment of the old and enduring values of our past approach to the world. I question whether it is necessary, even in the pursuit of a united effort against terrorism, to display such warmth and respect to regimes whose values are so repugnant to our own.

Mr. President, I yield back the remainder of my time.

Mr. GOLDWATER. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The bill clerk proceeded to call the roll.

The PRESIDING OFFICER (Mr. D'AMATO). The Senator from Arizona.

Mr. GOLDWATER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GOLDWATER addressed the Chair.

RECOGNITION OF SENATOR GOLDWATER

The PRESIDING OFFICER. The Senator from Arizona is recognized.

PRESIDENT REAGAN'S ECONOMIC RECOVERY PLAN

Mr. GOLDWATER. Mr. President, I rise this morning to support President Reagan's economic recovery plan, and I would like to start off by observing that

it contains basically six elemental and essential ingredients.

First, this will make major reductions in the growth of Federal spending.

Second, there will be sizable tax cuts to reward work and encourage savings.

Third, there will be a reversal of overall regulation.

Fourth, we will weed out waste and fraud.

Fifth, we will cut the Federal bureaucracy as much as it can be cut and still allow services to be given to the American people.

Sixth, we will work to control the money supply.

Now, Mr. President, I would like to discuss these various ingredients one by one.

First, President Reagan has identified ways the Federal budget can be reduced by $56 billion in fiscal year 1982. This includes $49 billion of on-budget savings and an additional $5 billion of off-budget outlay savings, and changes in user fees that will eliminate $2 billion of subsidies.

Mr. President, during the 1981–84 fiscal years the President's budget plan will bring down the rate of growth of Federal spending to 5.5 percent annually compared to the 16-percent trend of the last 3 years. Thus the growth of Federal spending will be held below the increase in the gross national product.

I do not think the President went as far as he could have in all areas of budget savings. For example, the proposed reduction of unemployment payments could have been beefed up. The administration properly calls for new legislation stopping unemployment insurance payments to people who will not take other jobs at the minimum wage after drawing benefits for 3 months. But the administration has not recommended a change that would result in even greater savings, and that is imposing a Federal restriction on payments to strikers and, Mr. President, I do not think there is an American who believes that we should make Federal payments to people who voluntarily leave their jobs to go on strike.

In fact, I ask the question why should the taxpayers have to bear the costs of subsidizing people who voluntarily stay off the job while they are on strike? There is no Federal requirement, Mr. President, in this area at the present time, and there should be.

On the other hand, there are places in the budget where the administration's zeal for immediate savings might be excessive. I am very skeptical, for example, of the wisdom in reducing the long-term lending authority of the Export-Import Bank. Unfortunately, our major trade competitors are engaged in serious credit warfare primarily directed against our growth industries, and I do not see how we can negotiate an elimination of Government export credits by making unilateral concessions.

But, even so, I am prepared to support the President's overall program and to applaud his efforts to finally get control over the budget and restore the value of the dollar.

On the second point, Mr. President, tax reductions, the administration has proposed personal tax rate reductions of 10 percent each year for 3 years beginning in July. Now, these cuts will barely compensate taxpayers for the price of rising into higher tax brackets as their salaries keep even with inflation, and they are the minimum reductions individuals are entitled to.

Also the President has recommended accelerated capital costs recovery depreciation so that business firms will be encouraged to make the investments in the new plant and equipment that are needed to modernize our industries and restore competitiveness and increased productivity.

Mr. President, I cannot emphasize this particular point too much because I think it is the whole meat and substance, you might say the nut, of the Reagan proposal to get this country back on its fiscal feet.

I used to argue with President Eisenhower that we were not reinvesting enough of our gross profits when we were reaching a sum of over 3½ percent and approaching 4.

In my business, when I was in business, I used to invest over 4 percent each year, and I have always felt that if we could go for a period and see a general investment of around 5 percent we would see the type of business growth that this country has enjoyed ever since the industrial revolution of the late 1800's.

Mr. President, what we have been going through and what I think is a major source of our industrial problem is harassment by the Government and by the Internal Revenue Service, caused by excessive Federal tax rates and rulings, on the American business structure, whether that structure is corporate, private business, or professional business.

Businesses have to grow if people are going to have jobs and if the oncoming generations of young people are going to find jobs. Even though we now have over 90 million people employed in this country, I think within the next 5 years we could easily increase that by 14 million if we gave the corporations and businesses of this country real incentives to invest more of their gross profit in new equipment, new buildings, and new ideas so that we can continue to grow economically as we have always grown up until recent years.

If I may point out, Mr. President, how important I feel this is, I happen to serve on the Armed Services Committee and I am chairman of the Tactical Warfare subcommittee. In that position I have to listen to the needs of the military, and I sit there day after day after day asking myself a rather unusual question but, nevertheless, it has to be asked: Do we have the industrial capacity in the United States to build up our defense potential or build up our military?

I have grave doubts, Mr. President, that we do have this. I hope I am wrong, but we are going to see the industry of this country challenged, and challenged immediately, as we begin to authorize new airplanes, new ships, new tanks and so forth, for the military.

Then, you add to that problem the problem that we import into this country every metal we have to have to build equipment, like bauxite, cobalt, and so forth. We have not been bringing these in because our industry has not been able to afford to stockpile it. We now find ourselves looking at lead times of up to 3 years to replace a little thing like the landing strut on a fighter plane because it is made of titanium, and we do not have that much titanium in this country.

I mention those two things because they are directly connected with the problem of getting American industry back on its feet, working as it should, and producing the things that we need, not just to build aircraft and tanks and so forth, but to provide the butter end, as we call it, for the American people.

I happen to be cosponsoring each of these needed tax changes, but I would personally like to see even greater incentives added for savings, such as a total exemption of a thousand dollars or more for interest earned and dividends.

Also, our Nation's manufacturers, as I have discussed, who are being crushed under the burden of compliance with Government mandated environmental and safety rules, need some form of tax relief from these capital investment costs that make absolutely no contribution to productivity.

I would just cite one example. My State of Arizona produces 65 percent of all the copper produced in the United States and yet the environmentalists are demanding that the smelters in the copper industry relieve their smoke-producing smelters 100 percent.

Well, it is scientifically and technically impossible to do that. Nevertheless, these well-intentioned people are trying to do it. And they are causing many of our copper people to feel: Why stay in this business that is not too profitable to begin with? Why not depend on foreign countries for our copper like we depend on foreign countries for every other metal that we have to have?

So I am hopeful that we can let off a bit in this desire that all of us have to see cleaner air and cleaner water in the interest of production for our country.

Then, Mr. President, we get to the subject of deregulation.

President Reagan has seized control of the regulatory process. Only 9 days after his inauguration, the President froze all "midnight" regulations of the Carter administration that had been issued, but were not yet effective. Then on February 17, the President issued an Executive order giving the Office of Management and Budget a review and rewrite power over new executive branch regulations. The rules subject to OMB's veto have in the past accounted for up to 70 percent of the costs imposed on the private sector by regulation. I applaud the President for taking these initiatives and hope, in turn, we can have his support for the legislative veto, which would allow either House of Congress to overturn, or at least delay, major proposed

rules without Presidential signature. In this way, both the White House and Congress would have an immediate veto power over excessive regulation.

And let me remind you, Mr. President, and remind my colleagues that we create these agencies in the Congress. But we do not tell those agencies how far they can go. We do not build a fence around what their responsibilities are.

Consequently, somebody is hired, usually somebody who does not know one end from the other about what he is going to undertake, then he and the people he hires write the regulations. And, frankly, in case after case after case, they are regulations written by people who have never been near the problem.

Now, because the Congress has been derelict in doing this, I think the Congress should have given to them the right to veto any regulation that is written by any agency to govern the lives of the American people.

The reduction in regulations under the administration's present plan will result in savings of $500 million in Government administrative expenses in 1981 and reduce the compliance costs of regulations, which add up to $100 billion per year to the price of goods and services.

Also, it is my understanding the administration will change the criteria for issuing regulations—from the old policy of imposing rules unless a firm can prove the cost is so great it will go out of business, to a new standard under which Government intrusion is permitted only if it produces benefits that outweigh the costs and if the regulation allows compliance by the least expensive method.

And then there is waste and fraud. The administration will announce tomorrow, Thursday, details of a major effort to control program waste and fraud. And I do not think we can just laugh this off and say it cannot happen in the Federal Government. I remember one director of, I believe it was, Health, Education, and Welfare, who admitted that $7 billion had been stolen the year before. I would not want to guess as to how much of the taxpayers' money has been stolen by people who work or have worked for the Government or have received Government payments.

Now even the Defense Department is not exempt from charges to eliminate wasteful practices. I have personally suggested specific contract procurement changes, such as multiyear contract and increased competitive bidding, that will save $3 to $4 billion annually. I am confident many of these measures will be adopted by Secretary Weinberger.

I might point out, Mr. President, just one incident. We have been buying one airplane for three services in this country for the last 5 or 6 years without any bidding at all. You and I can walk into any salesroom that sells that aircraft and buy it for the same price the Federal Government pays for it, when, if we had bidding, we could have saved some money on it.

In fact, they do not even tell us in the Armed Services Committee of the Senate that they are going to buy more. They only tell the House because they know I am going to raise all kinds of cain about it and they do not want to have that kind of trouble until we get into conference.

The next point is reducing the Federal bureaucracy. One of the first actions by President Reagan was to place a complete freeze on Federal hiring. As a successor to this policy, the President is proposing steep, annual reductions in Government employment that will bring Federal payrolls down by at least 7 percent in 1986.

For nondefense agencies, civilian employment will be reduced to a level that would have been achieved if the total freeze on hiring remained in effect through 1981. Even allowing for planned increases at the Department of Defense, civilian employment will fall by 43,000 positions in 1982.

I might point out that this is serious, because we are now being required to take men and women in uniform and place them into jobs that normally are done by civilians under contract.

The last point I will discuss is money supply. Although monetary policy is by law the responsibility of the Federal Reserve System, the administration anticipates that the rate of money and credit growth will be reduced gradually, but steadily. Easy money, high interest rate policies must become a thing of the past. The administration's 4-year plan to eliminate deficit spending should cut inflation in half by the 1986 fiscal year and enable the Federal Reserve System to dramatically reduce the growth in the money supply.

Mr. President, to sum up, I would like to express my feelings about this. I did so yesterday in a letter to my Republican colleagues, which I offered to them from an older man who has been around here a while, who has no great ambitions in the political field. I have had about all I can. We are going to have to forget the demands of our constituents in many cases. I think we are going to have to ask ourselves an important question: What is the most important—my being reelected or saving this country?

Mr. President, I do not like to sound like an alarmist, but I have been concerned on this ever since I went into national politics over 30 years ago. Our country is not going to exist long if we continue the policies that we have been following for nearly 40 years: fiscal irresponsibility, over regulation of the people, a disregard for the Constitution's call for freedom, and a disregard for our regulations with other countries.

So I have pleaded with my Republican colleagues, and I merely offer this as a suggestion to all Members of the Senate, that when it comes time to vote for a decrease in spending that might affect a certain group of our constituents, I think we have to weigh that by saying, Will it hurt the constituents more than it will hurt the country? If it will do the country more good, I think the time has come when we have to tell our constituents, "No, I am going to vote the way the President has suggested because in the long run it will be better for you and it will be better for your children, your grandchildren, and I honestly believe it can do more to insure the continued existence of America than any one thing."

I am very, very fearful about the dollar, which is now worth only about 10 cents of the dollar that we looked at years ago, a dollar continuing to decrease in value, which will continue to decrease in value. This country cannot go bankrupt as long as we can print money, but as somebody once told me, we would not be bankrupt but we would be mightly unstable. Having been in business, that means the same thing to me as bankruptcy.

I send that out as a thought for all of my colleagues to consider—what is best for the United States, not what is best to get reelected.

Mr. President, I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. GOLDWATER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GOLDWATER. Mr. President, on behalf of the majority leader, I ask unanimous consent that the special orders for today occur not necessarily in the sequence given.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GOLDWATER. Thank you, Mr. President. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. D'AMATO. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. GOLDWATER). Without objection, it is so ordered.

PRESIDENT REAGAN'S ECONOMIC PACKAGE

Mr. D'AMATO. Mr. President, I rise today in support of President Reagan's economic package. In the days ahead we will hear from many well intentioned people who will want to insure that their special program remains intact. However, as I have pointed out in a series of articles that were recently published "it will take courage for Congress to resist the importunings of so many special interest groups."

President Reagan has sent us a sweeping fiscal package that is deserving of the support of both sides of the aisle. The President deserves the help of Democrats in both Houses in a manner similar to the bipartisan support that was given Presidents Franklin Roosevelt and John Kennedy during previous times of economic peril. I certainly hope that colleagues in the Senate will put aside partisan politics and support President Reagan's economic initiative.

When Franklin Roosevelt, in the first 100 days of his administration, proposed an emergency banking bill, House mi-

nority leader Bertrand H. Snell told his colleagues:

> The house is burning down, and the President of the United States says this is the way to put out the fire.

He asked his fellow Republicans to support that unprecedented bill, and they did.

When John Kennedy in 1963 proposed the Nation's first massive tax cut not preceded by a recession, a budget surplus or an equal reduction in expenditures, my party called it "the biggest gamble in history." But most Republicans supported that unprecedented bill, and the gamble paid off.

Now in 1981 Ronald Reagan has proposed a sweeping fiscal package that is also unprecedented in its approach. He, too, is accused of gambling with our economy and breaking with the past. He, too, seeks the support of both parties and the backing of all citizens. He deserves it.

Congress, to be sure, must examine the Reagan package with care, making certain that its burdens and benefits are equally shared. No group, region, or economic interest should be exempt from the pain of its budget reductions, and no group, region, or economic interest should be excluded from the boon of its tax reductions. Responsible objections should be heard. Hardship cases should be studied. Constructive amendments should be offered.

But let us not pick the Reagan package to pieces or delay its passage unto death. Let us not fiddle while the fires of inflation burn and the clouds of yet another recession darken the horizon. Let us not place our regional requirements or our partisan prejudices ahead of the national interest. Let us give Ronald Reagan a chance.

His economic program will not produce miracles in the battle against inflation. After all, it cannot dismantle OPEC, improve the weather, or curb the demands of those seeking ever-higher payments for their products or services. But his program will introduce discipline in a Federal budget now running amok. It will substitute sacrifice for a pattern of barely concealed fiscal self-indulgence. It will lower the ordinary citizen's expectations of what his government will do for him and increase his expectations of what his savings will buy for him.

It took courage for Reagan to call for the pruning of so many sacred groves. It will take equal courage for Congress to resist the importunings of so many special interest groups, at least one of which stands behind every item in the budget. And it will take still greater courage for the American voter to recognize that the greater good of the Nation, possibly the fate of the next generation, requires from him today a willingness to accept the paring of some cherished Federal program on which he had come to rely.

I believe that courage is there. I believe that my Democratic friends will heed the same call to fight the Nation's inflation as the Republicans did in 1933. I believe they will give the Reagan taxcut gamble the same opportunity to prove itself that the Republicans gave to the Kennedy taxcut gamble in 1963. And I believe that Americans everywhere, regardless of party, will respond to our President's call for sacrifice and bold action.

President Reagan has prescribed some strong medicine for an ailing nation. But no other equally far-reaching remedy is on the shelf. We have tried Keynes, controls, committees, and guidelines galore. None of them has worked. Let us give our President a chance to do what must be done for our Nation.

THE PRESIDENT'S ECONOMIC RECOVERY PROGRAM

Mrs. HAWKINS. Mr. President, I rise today in support of Senate Concurrent Resolution 9. No Member should underestimate the importance of the process of reconciliation that we are now undertaking. This resolution will be the first clear signal to the American people that Congress intends to impose the same budgetary discipline on itself that our individual constituents have found indispensable in these challenging times. And it will further signal that Congress recognizes that the time for such discipline is now—not next summer, and certainly not next year. Time is of the essence. Every day we wait adds to the burden to be borne by us, our children, and their children. Every hour we delay threatens to make a mockery of the will of the American people so clearly expressed in November, and reiterated in countless ways since then. Americans are ready, and they will not forget if we fail to heed their call.

We must not allow ourselves to be distracted by those who refuse to hear that call. Over the past several days, I have heard much about the need for compassion in Government, from people who seem to believe that with the change in political control that occurred as a result of the November election, a change has taken place in the traditional humanitarian outlook of our Nation's leaders. Nothing could be further from the truth. Those leaders were elected by the American people—no one else—and the American people remain a compassionate people, as we have been throughout our history.

But the American people have begun to ask a question, and that question resounds from one end of the land to the other, and into the Halls of Congress: What is true compassion? Is it compassionate for the Government to turn its citizens into unwilling and perpetual creditors by running a massive tab called the national debt to such an amount that it now threatens to exceed our gross national product for an entire year? Is it compassionate to saddle Americans with an ever-increasing tax burden, while at the same time fueling the cruelest tax of all—inflation—by the taxing authority's own spending policies? Is it compassionate to harass our people's employers with unnecessary regulation to the point that they cannot afford to provide jobs for their own fellow citizens? Does true compassion mean that we must become so preoccupied with the distribution of wealth that we ignore the creation of wealth, and cover up the inevitable infection in America's economy with a medicine show poultice of printing press money?

The American people, I submit, have given their answers to those questions in unmistakable terms. Americans remain a compassionate, and even a charitable people, but it is an old saying that never gets too old, that charity begins at home, and Americans in homes across this land are saying that they want their Government to act compassionately to give them a currency that will turn another old saying—"sound as a dollar"—into more than a sad joke. Americans across this land are saying that they want to act compassionately in helping to regain America's role as a world trade and production pacesetter, not through a make work job, but in the honest employment in their own Nation's industry. And what Americans across this land, and, as I learned dramatically this week, what Americans across Florida are saying is not vague or unfocused. It is specific and pointed: Support President Reagan in his program for economic recovery.

Two weeks ago, I placed a questionnaire in several Florida newspapers soliciting my constituents' opinions about the President's program. I was very curious as to what the response would be, since scientific studies have shown that persons opposed to a given proposition are most likely to respond to these types of inquiries, being more emotionally involved in the subject. But the people fooled the pundits again. In 5 days, I received over 15,000 answers, and over 95 percent of them support the President. And the people have not been content to just check "yes." They have some excellent ideas of their own on how to make even more cuts in the Federal budget. Most of the respondents attached a letter of their own to the questionnaire, reemphasizing their sentiments.

None of us in Congress should make the mistake of misreading the American people on this subject. They are smarter than some politicians would like to believe. They know that the President has proposed an evenhanded, four-part program, which calls not only for budget reductions, but for tax relief for all Americans, a sound monetary policy, and getting the Government off the backs of the people by abolishing unnecessary regulations. President Reagan's program is a comprehensive program, and if the weight of my mailbags is any measure, the American people are supporting it comprehensively.

The reason for this astounding positive response rests on a basic realization by our people—that only when our overall economy is strong can we feel secure in our personal financial affairs. The consequences of an unhealthy economy are obvious—unemployment, inflation, and social unrest. As surely as an unhealthy economy breeds disease, in the broadest sense of that word, among our people, the salutary effects of a healthy economy penetrate to every strata of our society. Some of the medicine to cure the body

politic of what some have termed a malaise is strong and, for a time, distasteful. But better a temporarily unpleasant but long-lasting cure than a false and ultimately self-destructive panacea.

So the American people, I believe, have called upon us to redefine compassion. Compassion shall no longer mean throwing devalued dollars from the not-so-beneficent hand of big brother at problems which big brother himself helped to create. Compassion shall instead mean restoring our people's prosperity—and their destiny—to their own hands, through their own initiative and self-reliance—qualities that Americans have always displayed in abundance in times of crisis, and in which they will not be found lacking in our own time.

To bring it down to my own level, as a servant of the people, compassion for America requires my support of the President in his crusade to conserve our national promise, and that is why I shall do so, even if it means making decisions that are, for me and for the time, personally painful.

But at this time, it is not a pain, but a privilege to voice my support for this crucial resolution. When we meet and overcome the historic challenge of one time, the American people will truly be able to say, "thanks fifty billion."

The PRESIDING OFFICER. The Senator from Delaware is recognized.

THE GREAT DEBATE—ARE WE ASKING THE RIGHT QUESTIONS?

Mr. ROTH. Mr. President, as Congress debates the President's economic recovery plan and the American people watch and listen, I fear that the focus of that debate is taking the wrong direction.

First, let me point out that I am a very strong supporter of the President's economic package. It is the first comprehensive program that I have witnessed in my 14 years in Congress, and I congratulate Mr. Reagan for having the courage of proposing a long-term program that will build some home and growth into the economy.

Perhaps, rather than asking so blatantly what will happen to Government and specific programs under the President's economic plan, we should be asking what will happen to our economy, the American family and the American taxpayer if we do not pass the program Even more specifically, what will happen if the full 10 percent, 3-year tax cut as proposed in the measure I sponsored with Congressman JACK KEMP is not passed.

Unless tax rates are reduced and the growth of Federal spending is restrained, the economy faces continued inflation and recession. The high rates of taxation now imposed on the American people are strangling economic growth, choking off private initiative, pushing up prices, and retarding the savings and investments needed to increase productivity and create new jobs.

Tax rate reductions will reduce the tax drag on the economy and increase the incentives to work, save, invest, and produce.

Roth-Kemp is an across-the-board income tax cut which reduces tax rates for all taxpayers, with the benefits based on the amount of taxes a taxpayer pays. The bulk of the tax cut benefits will go to the middle-income working people who are bearing the greatest percentage of the tax burden. According to the Joint Committee on Taxation, taxpayers earning between $10,000 and $60,000 pay 72 percent of the total income taxes and would receive 73 percent of the Roth-Kemp tax cut.

It is one thing to cut Federal spending, which is sorely needed. But that action, in itself, will not provide relief to the massively tax-burdened middle American family.

Indeed, without a tax cut as suggested in Roth-Kemp and by the President, the average American faces a massive increase in his tax burden in the first half of the eighties.

Let us look at what will happen to the average family if we do not enact massive tax cuts—a family of four with earnings of $25,000 in 1981.

Last year, the Nation's inflation rate was 13.5 percent. Let us assume that the budget cuts are passed and that inflation will average 10 percent per year through 1985—a figure not unrealistic even with the spending cuts, but without tax cuts.

First, that family of four earning $25,000 in 1981 will be earning approximately $36,602 by 1985, considering a cost-of-living pay raise of 10 percent a year in order to keep pace with the 10-percent inflation rate. And certainly, all American workers believe their earnings will increase. Such an increase obviously would put that family in a higher tax bracket, therefore, its tax burden would be even greater.

Second, in 1985, that same family will face a social security contribution rate of 7.05 percent with the wage base increasing to roughly $42,300.

Today, at the current inflation rate, at the current social security contribution rate and at the current rate of taxation on $25,000 of earnings, that family of four's tax obligation is $4,563.

However, in 1985, in just 4 years, without a tax cut, that same family will face a social security and income tax liability of some $8,040.

In real terms, that average American family will face a whopping 76-percent increase in its tax liability in a scant 4 years.

Mr. President, I call to your attention the charts in the back of the Chamber. The diagram on the left shows what is happening to the typical American family and the taxes they will be paying to the Federal Government.

It shows how without a tax cut that increase will be 76 percent, whereas with the President's cut it will be reduced to 44 percent, which is still a very significant tax increase.

Let me point out that the same family's spending power would have remained the same with these increases except for the increase in its tax liability which, in effect, reduces its spending power by $3,477.

So what I am saying is that the bottom line is this: That despite cost-of-living pay increases, the average family of four is realistically $3,477 poorer simply because of Uncle Sam and the infamous bracket creep which has pushed that family from the 24-percent tax bracket into the 32-percent tax bracket.

Mr. President, I point out in the other chart what is going to happen to the taxes of the working families of America. The incline is most substantial if we do not do something about it now. The American people will be facing the highest tax increase in the history of the country if this Congress does not have the courage to follow the recommendations of the President.

It would be a crime against the working people of this Nation if we do not pass a massive long-term tax cut. What faces the American family, those making between $10,000 and $60,000 in the next 4 years cannot be allowed to happen. With the increases in social security taxes already on the books, with continued inflation, and, even with cuts in the Federal budget, the average family in America faces a tax nightmare, one that will continue to eat away at their freedom of choice for themselves, eat away at the prospect of more jobs, eat away at the prospect of a better tomorrow because simple arithmetic answers the question. American families will be much worse off 4 years from now if tax cuts are not passed.

Moreover, I am very concerned that the individual income tax rate reductions the President proposed are becoming overlooked in favor of the tax reductions benefiting business and industry. I support such tax changes, including accelerated depreciation, as a means of increasing productivity and providing new jobs for the young and unemployed. But I do not support business-side tax cuts either in isolation from or instead of individual cuts.

It is the middle-income individual and family that have been forgotten by Government. It has been left to the middle class to carry almost all of the tax burden in this country. It is past time that we give them some help.

Therefore, in order to emphasize the urgency of providing real help to middle-income taxpayers, I plan to advise the President that I will not support business tax cuts unless they are coupled with additional provisions identical or very similar to his proposals providing for a 3-year 30-percent reduction in tax rates.

I might point out, Mr. President, that this letter, which has already been sent to the President, has been signed by 19 of my colleagues. We say that,

> Furthermore, we will not support a reduction in the 70-percent maximum tax rate on unearned income, which would benefit the few, unless these individual reductions for the working people are also included in any tax cut bill.

Further, I will not support reduction in the 70-percent maximum tax rate on

unearned income, which would benefit, the few, without these individual reductions for middle-income taxpayers also being included in any bill.

At this time of economic emergency for many millions of Americans, it would be the height of irresponsibility for us to help business and the wealthy without at the same time giving real and substantial help to the American middle class.

The time has come to change the arguments from financing Government to easing the tax burden from the shoulders of the American family. And, I must point out, even with a tax cut in the first year, the American family will not be able to break even with its increasing tax burden for 1981.

We can no longer afford to argue the value of Government revenues versus the American family. The burden has become too great, and it holds promise of becoming even more debilitating without the tax cuts proposed by President Reagan.

If we look clearly at the picture down the road, there can be no question that the American working people must have relief from taxation by their Government.

Mr. President, I yield the floor.

The PRESIDING OFFICER (Mr. SPECTER). The Senator from Wisconsin.

THE REAGAN PROGRAM FOR ECONOMIC RECOVERY

Mr. KASTEN. Mr. President, we have before us a rare opportunity—a chance to redirect the economic future of our Nation. Seldom are the issues as clear-cut, and the American people as united, as they are today. It is time for a fresh start, a new beginning. That is what the people were trying to tell us last November, and that is the mandate we will have to live up to in 1982.

The American economy is still the strongest in the world, but it has been abused for too long by too many administrations. Too many economic game plans—no matter how well intentioned—have gone astray. We have attempted to spend our way to prosperity, to stop inflation with wage and price controls, to balance the budget by raising taxes, and even to blame our economic problems on a "malaise" among the people.

Now we have a President who believes that the American people are not the cause of our problems—they are the solution. Ronald Reagan wants to unleash the creative and innovative forces of the American people, who have been held down too long by excessive taxation, inflation, and Government regulations. Once we remove the burdens of a bloated Federal Government, we can have full employment without inflation, a rising standard of living, and a strong defense. The American people know we can, because we have done it before.

But in 1981, our economic problems are complex and entrenched. Unless we act—and act boldly—we have to expect continued double-digit inflation, continued high interest rates, continued unemployment, continued stagnation, and little or no real growth.

The best strategy for solving these problems is a broad and comprehensive economic package that takes advantage of all the economic tools we have at hand. It includes a monetary policy geared toward restoring the value of the U.S. dollar; spending cuts to reduce both the Federal deficit and high interest rates; regulatory reform to cut the cost of Government regulations (now approaching $100 billion a year); and tax-rate reductions to increase the incentives for real economic growth. Together these policies can restore the kind of noninflationary, fully employed and highly productive economy that used to be commonplace.

That is why the Republican program for economic recovery consists of not one but four major policy changes. We have heard a lot about budget cuts this past week, but that is only one-fourth of our economic package. The other sections are just as important: We must institute a far-reaching program of regulatory relief, a monetary policy that will restore a stable currency, and a tax reform bill that will dramatically reduce the high tax rates on individuals and businesses across the board.

It is ironic that one of the most important parts of our recovery program, tax reform, may be the most difficult to accomplish. Critics call the Reagan tax plan jellybean economics, and say it will only succeed in making inflation worse. And yet, despite all their protests, they have yet to explain why it is inflationary when people spend their own money, but not inflationary when the Government spends it for them.

Everyone knows that when you tax something, you get less of it. When you subsidize something, you get more of it. The Reagan administration is simply saying that in America today, we are taxing work, saving, investment, enterprise, and excellence, as never before. And we are subsidizing nonwork, consumption, debt, leisure, and mediocrity. Is it any surprise that we are getting less of one and more of the other?

We will never see the end of stagflation until we restore the incentives for saving, entrepreneurship, and productivity in this country. Dramatic tax rate reductions, then, are an essential part of any overall economic recovery plan.

Equally important are the budget cuts the President has recommended, approved by the Senate Budget Committee last week. Personally, I would have preferred that we made deeper cuts in an effort to balance the budget by 1983 at the latest, instead of 1984. The Federal budget has been out of control for years—we ran a deficit every year of the past decade, and overall Federal spending increased by an incredible 200 percent. And as one who faced the voters last November, I am convinced that the vast majority of Americans are solidly in favor of our strategy to cut the growth of Federal spending and balance the Federal budget as soon as possible.

That message seems to be reaching Washington at last.

There probably is not a single Senator on the Budget Committee who would not change the administration's budget package a bit if he were designing it alone. But on March 19, that bipartisan and philosophically diverse group voted 20 to 0 in favor of the administration's budget cut package. As a member of the Senate Budget Committee, I strongly believe this is a budget we all can, and must, support.

President Reagan made the best argument for his program 1 month ago when he stated that—"If we as a Nation do not take the bold new policy initiatives proposed in this program, we will face a continuation and a worsening of the trends that have developed in the last two decades. We have a rare opportunity to reverse these trends: To stimulate growth, productivity, and employment at the same time that we move toward the elimination of inflation." I urge my colleagues to join me in supporting the entire economic recovery package and in pushing for its speedy enactment.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HAYAKAWA. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from California is recognized.

RECONCILIATION

Mr. HAYAKAWA. Mr. President, reconciliation is a process which enables, which indeed forces Congress to bring the programs of the Federal Government, which it continually authorizes, into accord with the budgetary expectations and limits which it establishes for itself. This process is particularly advantageous because changes in authorizations can be achieved in a very short time, without invading the jurisdictional responsibility of the congressional authorizing committees.

The reconciliation resolution which this body will soon debate is essential to the economic future of this country. President Reagan has recommended an ambitious list of program reductions, totaling $82.3 billion through fiscal year 1983. The Budget Committee in its turn has reviewed the recommendations and has incorporated its own proposals to achieve spending reductions of $87 billion over the next 3 years. If we are to turn the corner in Federal spending and begin to get control of the economy, decisive action on this resolution is mandatory.

Mr. President, there seems to be no escaping this matter of the budget resolution for this reason: The Budget Committee is charged with the responsibility of establishing aggregate spending levels for the Federal Government and relating those levels to anticipated revenues. This responsibility requires, not an arbitrary determination, but a careful review of the ongoing processes and programs with an eye toward reducing expenditures, on the one hand, in particular

areas, and it is incumbent upon the committee, therefore, to advise the Senate of its recommendations for changes in specific programs, to achieve the goal of aggregate reductions in outlays.

I feel that the committee has done an admirable job in reviewing the President's specific recommendations and offering additional suggestions for spending reductions. The resolution's totals will provide sufficiently reduced Government intervention to allow a reversal of the downward economic trend. The requests for legislative action on the part of the authorizing committees will provide the impetus to make the changes necessary to meet the budget goals. And the committee recommendations for specific program reductions will provide a valuable guideline for the authorizing committees to follow on in responding to the resolution.

Let me give an example. In the Agriculture Committee, we have been working for some time on proposals to eliminate fraud, abuse, and waste in the food stamp program.

I like to talk about my grocer friend in Sebastopol, Calif., who is sick and tired of selling Perrier water with food stamps.

Both the President and the Budget Committee have offered constructive solutions to the dilemma of providing benefits only to those who truly need them.

And both the President and the Budget Committee have the moral support of the vast majority of the Nation in restricting benefits only to those who truly need them because those who do not truly need them and nevertheless take advantage of this program are essentially acting as parasites toward the rest of society.

As a member of the Agriculture Committee, I appreciate having the benefit of the suggestions. I shall carefully consider them, as we construct our legislative proposal in response to this resolution. While we may not exactly follow the specific program reductions recommended—I am looking into ways of achieving greater savings in some areas—the aggregate request contained in the resolution will force us to take action on this important matter.

Similarly, the Budget Committee's recommendations for reductions in the area of foreign aid have been carefully devised. The Foreign Relations Committee has begun extensive hearings on both the foreign assistance authorization and the State Department authorization. In light of a reordering of national and international priorities by the Reagan administration, the opportunity for program change is excellent.

But as we all realize, international relations are frequently struck with changes of the relations of one country to another. Some regimes that are friendly to us suddenly become hostile and those that are hostile become friendly. It is not possible from moment to moment to predict who our friends are going to be and who our opponents are going to be.

Therefore, I have learned, during my service on the Foreign Relations Committee, the importance of facilitating a prompt response from the United States to a changing international environment. Often this requires appropriate economic assistance especially to nations struggling to become free to get their house in order, after they have established a peaceable and authoritative government that knows how to handle things. In many cases, the administration is able to reprogram funds in order to meet these good-faith commitments. I feel the request for aggregate authorization reductions from the Budget Committee provides the Foreign Relations Committee with adequate flexibility in responding to both the economic and international situations. The fluidity of international situations requires a kind of flexibility such as the Budget Committee has provided for the Foreign Relations Committee.

I will, therefore, support this resolution, because it demands action on the part of the authorizing committees without dictating particular program modifications which fall within their respective jurisdictions. Congress has received a mandate for change from the electorate. As Members of the Senate, we must echo that mandate by resolving to expeditiously legislate that change. This resolution provides us with that opportunity; I urge my colleagues to join me in supporting its passage.

I have just come from a meeting of constituents from California, and the question frequently asked by the people who were there—it was a meeting of about 20 or 25 Californians, who kept asking—does the President really mean it? Does the present budget, does the present economic budget, really mean a change in the direction of the economy?

I myself said it really does mean a change. For 4 years, ever since I took office here in 1977, I have been waiting for that change. I have been voting in favor of measures that go in the direction of this change, and the victory of President Reagan in the November election and the victory of so many Republicans in the Senate races, and the general tone of the enitre country since the elections of last November, indicate not only that there is a change but that the vast majority of people are welcoming that change.

Therefore, if we back this reconciliation resolution, if we live up to its terms, if we keep within the limits it establishes in the direction of savings, budget cuts, prudence in our international commitments, improvements in the food stamp program and other agricultural programs, if all these begin to happen then within a year or so we shall really realize in our practical daily economic lives the fact that the Nation has made a turnaround.

Mr. President, I look forward very, very much to that turnaround, and I pledge myself to fully support the President in achieving this change of direction which we so very, very badly need in the economic affairs of this Nation.

I thank the Chair.

The PRESIDING OFFICER. The Senator from Wyoming.

SENATE CONCURRENT RESOLUTION 9, BUDGET RECONCILIATION

Mr. WALLOP. Mr. President, I compliment the Senator from California on his statement and the support he has offered. I think it will be a reflection of support that will be bipartisan before this process is over because the public clearly anticipates major reductions in the Federal role, and in the Federal deficits.

I think there is an absolute verity in all of this which is difficult, perhaps, for the press to understand, and it is difficult, perhaps, for the public to understand from time to time, but it is that you cannot cut the budget without cutting the budget. It is an absolute truth that we cannot avoid, and there are going to be cuts straight across that will cause difficulty for people who have come to graze in the Federal trough without viewing the consequences to the secure nature of the country as a whole.

I offer my congratulations to the Senate Budget Committee and to the Senators from New Mexico and South Carolina for the rapid disposition of President Reagan's budget proposal.

The Nation now faces a catastrophic situation with high inflation, high interest rates, high unemployment, high taxes, and high unpredictability in the whole economic scene. Thousands upon thousands of businesses across the country are on the brink of collapse. Our competitive position abroad is in serious straits, and our competitive position in this country with foreign businesses is in serious straits.

The Federal Government bears a heavy responsibility for these economic problems. For years we have been spending as if there was no tomorrow. In January we woke up to find that tomorrow had dawned. Federal spending increased 75 percent in 4 years. Even with President Carter's proposal for the largest revenue increase in America's history, deficits continue to grow. In the 12-month period from the first announcement of the 1981 budget the estimated deficit jumped from $16 to $55 billion.

Our mortgaging our future has cost us dearly. The yearly payments on the public debt are $106 billion, larger than the entire Federal budget in 1962, just to service the debt of self-interest.

Unrestrained Fedral spending weighs heavily on the economy. High taxes discourage work effort, and they discourage capital from flowing into the marketplace. Deficits cause Government competition in the financial markets and pressure for growth in the money supply, and the consequent inflationary effects of that activity.

The Government burden on the economy is now at a peacetime high, and we are spending a full 23 percent of our gross national product in nonproductive Government spending.

This percentage only measures the burden of Federal expenditures recorded

in the budget. Off-budget spending has mushroomed in the seventies as has the proliferation of unnecessary Government regulations. These shackle business and add unknown costs to the products produced by American manufacturers, and they reduce our competitive position abroad, reduce our competitive position at home, and increase the burdens of inflation on the consumers and taxpayers of America.

I urge the Senate and the Congress to move rapidly to adopt the reconciliation measure to demonstrate to the country that we can make the hard decisions necessary to make the Government and the economy work.

Some of the President's proposals I question. Some hurt my State. Some will be modified. President Carter worked 22 months in preparing his budget. President Reagan had but 6 weeks to prepare his, and while we may argue about the details and the components, keep the goal in mind. The budget must be reduced by $52 billion to meet 1982 reduction targets. Anything less will not be adequate, and it postpones the inevitable recovery within our economy.

President Reagan's program for economic recovery does not suggest decreasing total Federal spending, only holding back the rate of increase to 6 percent. The budget for 1982 will be greater than this year, and 1983 will be greater than in 1982. The deficit will not be eliminated this year and, perhaps, not in 1984, certainly not before then, and then only by finding billions of dollars in additional program reductions.

We must move quickly to put in place proposed savings this year and carry them on to the outyears. Delay will but cause further pain in the future, threatening the very fabric of the society of democracy which we all profess to prefer.

A country cannot sustain the level of inflation that we have and maintain the institutions of democracy. The pressures will be far too great to sacrifice everything to any central authority to achieve some measure of security for a period of time in the history of this country.

The proposed spending reductions in this budget are only the first step in restoring some vitality to this economy. Substantial tax cuts are necessary for increasing the incentives to work, to save, to invest, and for decreasing the excise effect that the present tax structure has on the American economy. Our taxes are now so high that they are becoming a contemplated part of the request for compensation, the request for wage settlements, and salary settlements, of the request to operate within the economy, and certainly they are part and parcel of the pricing mechanism that is drawing inflation behind it.

If anybody doubts that taxes in this country are adding to this inflation, they are dreaming in clouds that do not have anything to do with the reality of the American economy as it exists today.

Our citizens must be allowed to escape from the treadmill of the ever-increasing tax rates brought upon them by the profligacy of a Congress that will not come to grips with the spending habits of two or three decades.

Businesses must replace obsolete equipment in America and create new jobs through liberalized depreciation schedules. Without lessening the tax burden, spending reductions will only be partially effective in unfettering this economy.

Spending and tax reductions, along with the elimination of unnecessary regulation, will start to take decisionmaking out of Washington and put it back where it should be, with the ingenuity of American citizens, American business, American citizen-politicians in the cities and States of this country.

The program does not abandon the poor and truly needy. It will help to free them from the crush of inflation and the lack of jobs that hurts them worse than anything. It allows States and cities to design programs that work best for the needs of their citizens without supporting a heavy layer of Federal rulemakers and a heavy layer of Federal administrative requirements which do nothing more than provide employment for those who would not seek it and could obtain it elsewhere.

The citizens of our country said overwhelmingly in November that they were indeed ready for a change. The President has responded with a package that will do the job, and it is a package promised in the campaign. The Budget Committee voted 20 to 0 to report this package of spending cuts. Now is the time for the Senate to demonstrate that it can quickly make the hard decisions required to put Government on a sound financial basis and to revitalize the economy.

There remains one impediment to economic recovery in this country. There is the President, who is willing to make the hard choices required. There is a country which expressed its desire to have these hard choices laid on the table before them. They want and expect an economic program that will lead to the lessening of effects of inflation and to the revitalization of the American economy. In between them lies a Congress devoted to its special interests, devoted, indeed, to all manner of self-serving, self-perpetuating terms in the Congress that are purchased with the taxpayers' money.

On one side, you have a public ready and willing. On the other side, you have a President seeking to lead. In the middle, is there or is there not an impediment of an unwilling and uncourageous Congress? It may well be the case. And if it is, the country has not been served by a political process that leads to that.

To make these decisions is important to the country. To fail to make these decisions is to choose double digit inflation, to choose interest rates that deny the access to homes for young Americans or the access to colleges for young Americans or the access to the business world for Americans of any kind, to the commerce of this country, and to the purchasing power of their own wages. To choose that is wrong and to choose that is 8 percent unemployment which rises higher and higher and higher as the economy declines.

The very fabric of democracy will not—cannot—survive these strains. We must and we will survive, but only on the basis of some political courage and not "business as usual" in the halls of Congress.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from Alaska is recognized.

SENATOR MURKOWSKI SUPPORTS REAGAN BUDGET CUTS BUT DISAGREES WITH BUDGET COMMITTEE'S DECISION TO CUT FUNDING FOR THE STRATEGIC PETROLEUM RESERVE

Mr. MURKOWSKI. Mr. President, Senate Concurrent Resolution 9, of which I am an original cosponsor, is the first and necessary step for Congress to implement President Reagan's budget reduction plan—a plan which I wholeheartedly support. I commend the Senate Budget Committee and all other Senate committees which have been making the tough decisions over the last several weeks to bring Federal spending under control.

There has been and will continue to be much debate about the causes of inflation and the proper cure for the problem. However, there is no doubt in this Senator's mind that the habit of excessive, deficit spending by the Federal Government is a principal cause for the crippling, debilitating inflation from which all Americans now suffer. Throughout our recent history, Congress has been a guilty partner with the executive branch in being unable to curb its spending appetite. In recent years, Federal spending has increased nearly 14 percent annually.

We are now at a crucial juncture. This Congress can begin to prove to the American people that we are indeed serious about cutting excessive Federal spending and restoring fiscal sanity to the Federal Government. Adoption of the Senate Budget Committee's reconciliation resolution will provide for an outlay reduction of $2.9 billion and budget authority reduction of $14.7 billion for this fiscal year. In fiscal year 1982, it will reduce budget outlays by $36.4 billion and budget authority by $52.1 billion; in fiscal year 1983 there will be an outlay reduction of $47.7 billion and a budget authority reduction of $59 billion. Over these 3 fiscal years, a total savings of $87 billion in outlays and $125 billion in budget authority can be realized.

The process in which we are engaged presently—consideration and adoption of a reconciliation resolution—is clearly provided for by section 310 of the Budget Act of 1974. This reconciliation process allows Congress to instruct its committees to change already-enacted laws in order to reduce spending by specified amounts during the fiscal years addressed by the reconciliation instruction.

Mr. President, over the last several weeks, each authorizing committee of the Senate, as well as the Senate Budget Committee, has been engaged in the difficult process of reviewing existing programs with the view toward reducing the level of Federal spending. Sometimes—where waste and duplication is evident—decision to reduce or eliminate funding has been easy. But, more often than not, a strong argument has been made in each

of our committees to continue and even increase funding for programs that may well indeed be beneficial to one group or more of Americans and to one or more regions of our country. This has made some of the decisions to reduce funding very difficult—though not any less necessary—if we are to bring inflation under control.

Mr. President, I am new to the Senate, and, of course, to the congressional budget process. Nevertheless, I have already had to come to terms with one of the very real problems in this process—that is, the ability of authorizing committees to maintain effective authority over authorizing legislation for which they are responsible under the rules of the Senate, while at the same time the Congress proceeds to make necessary spending reductions pursuant to the Budget Act.

The reconciliation process was not intended to be used nor should it be used to replace the authority of authorizing committees over programs and policies within their respective jurisdictions. The Budget Committee's own report on the pending concurrent resolution states—

The process also allows the individual committees to keep their autonomy and to exercise their full judgment on the laws to be changed and on the changes that should occur.

The Senate Budget Committee's reconciliation instruction directs the Senate Energy Committee, of which I am a member, to modify programs within its jurisdiction sufficient to achieve savings in budget authority of $3,714,000,000 and budget outlays of $3,404,000,000 in fiscal year 1982.

The Budget Committee's report on page 82 reads, in part—

In arriving at this recommendation, the Committee's working assumptions were the levels for reduction by the President except for the reduction of payments in lieu of taxes, and except that the Committee assumed that additional savings beyond those proposed by the President could be achieved by implementation of an alternative financing mechanism for the strategic petroleum reserve.

On page 83, the committee's report continues—

Although this list of savings is not binding on committees that receive reconciliation instructions, cuts of this magnitude in programs of this kind will be necessary if the reconciliation instructions and the totals in the Resolution are to be achieved.

Mr. President, the total proposed fiscal year 1982 budget authority for programs within the jurisdiction of the Senate Energy Committee in President Reagan's budget proposal is $21,960,780,000. This budget proposal included $3.8 billion in budget authority for the strategic petroleum reserve. The Budget Committee's instructions to the Energy Committee to make savings of $3,714,000,000 in fiscal year 1982 budget authority in these programs, read against the Budget Committee's suggested list of savings make it absolutely clear that there is no other practicable way to achieve these savings without a drastic reduction in funding for the strategic petroleum reserve.

The Energy Committee does not, in fact, have a real choice if it is to honor the savings target embodied in the pending reconciliation resolution. It must cut budget authority by $3 billion from what President Reagan has recommended for this important program. The Budget Committee's own report acknowledges that funding for the strategic petroleum reserve must be drastically cut to meet its targeted savings. It explicitly assumes a new plan to finance the reserve, without any assurance whatsoever that any such plan can be adopted in the next few months.

While I believe that the Congress should develop an alternative means of financing the strategic petroleum reserve, I do not believe it is wise to eliminate funding for this important program until Congress can indeed agree upon an effective alternative. If the Senate were to adopt the Budget Committee's recommendation to eliminate funding for purchases for the strategic petroleum reserve in fiscal year 1982, the Congress would have just a few months to develop, consider, and enact an alternative financing plan.

Mr. President, what would happen if we cannot agree on an alternate plan in this short period of time? As a newcomer to the Senate, I have already come to realize that the world's greatest deliberative body does indeed take its own good time to deliberate. Would it not be wiser—as the Senate Energy Committee recommended—to keep the funding level recommended by President Reagan for fiscal year 1982 until we enact an effective, alternative financing plan?

Mr. President, this program is of vital importance to the national security and economic well-being of the United States. It was established by Congress in 1975, after the first oil embargo, to supply the United States with oil in the case of any future, emergency oil supply disruptions. It is probably the Nation's most important near-term energy program. The oil is stored in salt domes in Louisiana and could be available in case of unexpected supply shortages. It is designed to store ultimately 1 billion barrels of oil. The strategic petroleum reserve has always had strong bipartisan support in the Congress.

In 1977 the Congress approved a plan which established a goal of 500 million barrels of oil in storage by December 25, 1980. Projections are that we will have a total of 180 million barrels by the end of calendar year 1981. Because the previous administration dragged its feet in purchasing oil for the reserve, we now only have 118 million barrels stored in the reserve. The Reagan administration has wisely decided to reemphasize this program and proposed for fiscal year 1982, budget authority of $3.8 billion. This would allow purchases on an annual average of 230,000 barrels of oil per day for fiscal year 1982.

Mr. President, I support the intention of the Reagan administration and many in Congress to boost defense spending. Indeed, the President has proposed to increase defense spending dramatically in the next several years, beginning in the next fiscal year to a budget authority level of $226.3 billion. Unfortunately, Mr. President, much of this increased military strength—as well as our existing military strength—is very vulnerable to oil supply disruptions. If we do not insure the continuation and increased-filling rate of the strategic petroleum reserve, our commitment to increase defense spending may mean very little to the national security.

Last week, in recognition of this fact, the Senate Energy Committee took strong exception to the Budget Committee's proposal to delete funding for the Reserve. The Energy Committee, by a vote of 19 to 1, adopted a resolution which reads in part, as follows:

The Committee on Energy and Natural Resources recommend to the Budget Committee the functional totals for fiscal year 1982 contained in President Reagan's budget within the Committee's jurisdiction (functions set forth in the agenda); and further that the Committee express the sense of the Committee that it will move expeditiously to consider and report an alternative off-budget funding mechanism for the Strategic Petroleum Reserve and, when such alternative mechanism is enacted, it will support an appropriate reduction in authorizations and appropriations for the Strategic Petroleum Reserve . . .

Mr. President, this is the sensible course to follow. To eliminate funding for strategic petroleum reserve, before we have any idea what agreement we may be able to reach as an alternative funding program is foolish and dangerous. Several alternative plans have already been mentioned in the press and in committee discussions.

Some may be workable, but others have already provoked great controversy. I sincerely support the overall effort of the Budget Committee to reduce Federal expenditures. I simply do not believe we can take the risk—and it is a risk—that Congress will be able to put into place an effective, alternative financing plan for the reserve over the next several months.

It is much wiser to adopt the approach recommended by the Senate Energy Committee—to provide budget authority—as recommended by President Reagan—until such time as the Congress enacts an effective alternative for financing this program so important to our national security.

Mr. President, I ask unanimous consent to have printed at this point in the RECORD the full text of the Senate Energy Committee's motion as agreed to.

There being no objection, the motion was ordered to be printed in the RECORD, as follows:

MOTION BY MR. MCCLURE

Motion that the Committee on Energy and Natural Resources recommend to the Budget Committee the functional totals for fiscal year 1982 contained in President Reagan's budget within the committee's jurisdiction (functions set forth in the agenda); and further that the committee express the sense of the committee that it will move expeditiously to consider and report an alternative off-budget funding mechanism for the strategic petroleum reserve and, when such alternative mechanism is enacted, it will support an appropriate reduction in authorizations and appropriations for the strategic petroleum reserve;

and additionally that the committee reserves the prerogative to make future program decisions within the aforementioned functional totals.

Mr. MURKOWSKI. I yield to the Senator from Illinois.

The PRESIDING OFFICER (Mr. GRASSLEY). The Chair recognizes the Senator from Illinois.

Mr. DIXON. Mr. President, I thank the Senator from Pennsylvania for kindly yielding me a moment of his time.

SAUDI ARMS SALE

Mr. DIXON. Mr. President, I wish to register my disapproval of the Reagan administration's announced intention to stock F–15 fighters sold to the Government of Saudi Arabia with offensive weaponry.

I believe that the President's proposal suffers from several concrete shortcomings, and foremost among them is the failure to extract specific assurance from Saudi Arabia about the security of the State of Israel.

The enhanced offensive power of these aircraft will not only threaten Israel, but I fear it could also trigger another round of the destabilizing arms race in the Persian Gulf, thereby tilting a precarious balance of power away from the interests of the United States.

Mr. President, when Congress approved the sale in 1978, it did so barely, and only with explicit assurances from the Carter administration that advanced equipment would not be attached to the F–15's.

The current proposal seeks to reverse our previous commitment. That is a dangerous repudiation and a dangerous precedent. The administration has not demonstrated that present circumstances demand such action.

Although I believe we should pursue strengthened relations with Saudi Arabia, I am not convinced the present proposal lays the proper groundwork for further stabilization in the Middle East, for continued security for the State of Israel, or for protection of the vital interests of the United States.

The PRESIDING OFFICER. The Chair recognizes the Senator from Pennsylvania.

THE PRESIDENT'S ECONOMIC RECOVERY PACKAGE

Mr. SPECTER. Mr. President, I appreciate this opportunity to express my views on the President's economic recovery package.

I believe that President Reagan was very accurate in a statement made at a breakfast a week ago today with the 16 newly elected Republican Senators when he said the economic problems facing this Nation are the worst since 1932 and those posed by the Great Depression.

In my judgment, that accurately characterizes the problems faced by our country today, with runaway inflation threatening the senior citizens who must live on fixed incomes, and threatening all those who face the rising prices at the supermarket or at the gas pump.

We also face an enormous problem in runaway interest rates which prevent the young marrieds from buying homes, which prevent all of us from buying consumer goods and automobiles, and make it virtually impossible for the businessmen to function, as attested by the fact that large groups which visited my office, realtors, automobile salesmen, businessmen from all walks of life, who pointed out the staggering impact interest rates of 17 and 18 percent had.

The economic situation confronting our Nation, I think, has called for a bold program, which has been mandated by the American people in the very dramatic election results last November. Now, it is up to the Congress, in cooperation with the administration, to carry forward a legislative program to improve the economic climate. Realizing that, when dealing with the economy, it is extremely difficult, if not impossible, to predict results with any degree of accuracy, in my judgment, President Reagan has adopted a pragmatic, likable, workable, three-point program in seeking, first to cut Federal expenditures; second, reduce taxes; and third, cut regulatory redtape.

As to the issue of governmental regulation, I think there is a wide consensus on the need to reduce such needless regulatory abuses. Billions of dollars were spent each year in the regulatory system. Recognizing that some regulations are necessary, there is wide latitude to cut down the tremendous regulatory maze which is crippling productivity in this country.

With respect to the issue of expenditures, I think that there is also a wide consensus in the United States—certainly, I can report on a wide consensus in Pennsylvania based upon the trips that I have made to Pennsylvania, the people I have talked to who have visited me here, in Washington, and the influx of my mail—that the public recognizes the indispensable imperative of cutting back on governmental expenditures. Within the range of the cutbacks as requested by President Reagan, amounting to almost $50 billion, I think it is important to note, as Mr. David Stockman has agreed in his position as head of the Office of Management and Budget, that the specific cuts requested by the administration are not sacrosanct and that Congress has a legitimate role to evaluate those cuts. As long as the bottom line is achieved, as Mr. Stockman has put it, the President's program is workable.

Mr. President, while this is not the occasion to dwell upon the differences which some of us may see, and I see particularly, it might be appropriate to note the concerns which come from my State on the issues of mass transit, some of the social programs on nutrition, medicaid, and black lung, and some of the economic development programs from UDAG and from the Appalachian group, which have been very effective in leveraging private investment and in providing jobs for Americans. In Pennsylvania, this is a way which, I think, makes those specific expenditures worthwhile.

In due course, I shall have suggestions as to how some modifications may be made within the proposals advanced by Mr. Stockman, still leaving the bottom line intact, and, I think, improvements in the judgments which I think Congress must make with some independence on those scores.

In so stating, I underscore my own view that the President's package is necessary. There have to be major budget cuts, based upon the testimony given in the Committee on Appropriations by the economists who have laid down in direct terms that the only way to cut interest rates in the future is to have these governmental reductions in expenditures so that there can be a movement toward balancing of the budget and some effect upon the sky-high interest rates and the spiraling inflation.

While we have yet to see the specifics of the President's tax program, I do believe that it is necessary to stimulate incentives. I do believe that an appropriate tax program giving accelerated depreciation to industry and more incentives to the working man and working woman would contribute substantially to productivity in this country. It is an indispensable part of the road to economic recovery.

Mr. President, I very much appreciate the reservation of these several minutes to express my views on the floor today and for the RECORD.

The PRESIDING OFFICER. The Chair suggests the absence of a quorum. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HUMPHREY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. SIMPSON). Without objection, it is so ordered.

THE PRESIDENT'S ECONOMIC RECOVERY PROGRAM

Mr. HUMPHREY. Mr. President, I believe the Senate should, in an unequivocal fashion, support Senate Concurrent Resolution 9. In the last election, the voters reaffirmed their belief in the straightforward precepts of fiscal responsibility and realism in Government. As the duly elected representatives of the American people, it is our responsibility to follow the instructions of the electorate and implement the President's economic recovery program.

The greatest impediment to the well-being of the United States is Congress reluctance to take bold and responsible action during these difficult economic times. I reassure my colleagues that we need not be paralyzed by the political fear that our constituents will object to the daring proposals currently before Congress. The voters want a return to realism. They want policies that promote economic well-being, not programs that take it away. They want their representatives to heed the message of November and reassess the Government's implementation of the principles which have guided past actions.

Before casting their votes last year, millions of Americans asked the question: What have my representatives done in the past decade? The answer mandated change. The national debt has

grown from $382 billion to a staggering trillion dollars. The annual Federal budget, which had been $210 billion, has swelled 300 percent, reaching $629 billion in 1980. As a direct result of this profligacy, our economy is in a shambles. Americans have not prospered from Federal schemes to spend money, rather, by weakening the economy, our well-intended programs have forced greater numbers of our constituents to rely on the Government for help.

Annual inflation, which a decade ago never exceeded 5 percent, today persists above 12 percent. Mortgage money, 10 years ago plentiful, is today scarce and priced beyond the means of the majority of working Americans. The 3,000-percent increase in the food stamp program, the 150-percent increase of income security payments, the 400-percent increase in Federal housing programs, the 200-percent increase in job creation programs are not evidence of Government munificence, rather they are all indications of a viscious never-ending dependency caused by Government programs gone awry.

There is, however, just cause for hope. The American people's clear and continued expression of support for a return to reason is proof that the desire for productive independence has not been extinguished. Daily, I receive a flood of mail overwhelmingly supportive of President Reagan's economic recovery plan. People who have never written to an elected official are writing to me expressing their belief in the President's spending and tax proposals. My mail is a reflection of an adamant, nationwide call for enactment of the entire budget proposal. One constituent has written—

I am an Independent. I did not vote for Reagan, but . . . please support him all the way.

Another, who will feel directly the impact of budget cuts courageously writes:

DEAR SENATOR HUMPHREY: Last night I listened to President Reagan's budget and tax cut proposals very intently, which I support completely.

I am a divorcee with three school age children to solely support. I have a full-time job, and I constantly seek ways to improve my income. At present, I am a recipient of food stamps which help greatly. I don't feel that I abuse this program, but I do know that plenty of people do. I also know that if the burget cut goes through that I stand to lose some or all of this assistance, and I am willing to take this cut if it will help our economy in any way. As it stands now, I am losing a great deal more with inflation where it is.

My hope is that the people of this country will band together and support President Reagan with all their strength and courage. I love my children and would like to be able to show them some kind of positive future.

The American people are in many ways ahead of Congress. They recognize the need to act expeditiously and selflessly on a plan clearly in the Nation's best interest. A plan which is based on sound expenditure, tax, regulatory and monetary policies. In the President's own words:

Our program for economic recovery does not rely upon complex theories or elaborate Government programs. Instead, it recognizes basic economic facts of life and, as humanely as possible, it will move America back toward economic sanity. The principles are easily understood, but it will take determination to apply them. Nevertheless, if inflation and unemployment are to be curtailed, we must act.

First, we must cut the growth of Government spending.

Second, we must cut tax rates so that once again work will be rewarded and savings encouraged.

Third, we must carefully remove the tentacles of excessive Government regulation which are strangling our economy.

Fourth, while recognizing the independence of the institution, we must work with the Federal Reserve Board to develop a monetary policy that will rationally control the money supply.

Fifth, we must move, surely and predictably, toward a balanced budget.

This reconciliation resolution, Senate Concurrent Resolution 9, is precisely what our economy needs and our people demand. It recognizes the need for bold and swift, yet reasoned, action. It guarantees that spending reductions will be shared widely and fairly. No needy person need fear the program nor doubt the intent of its author. Now we can affirm with absolute clarity our desire to represent the best interests of this and future generations.

I urge my fellow Senators to vote for Senate Concurrent Resolution 9 and the principles which it represents.

Mr. President, I believe that President Reagan's program, if Congress has the political courage to pass spending cuts of the magnitude required, is a significant step in the right direction. But it is only the first step.

If we are to halt the movement of our Republic toward the edge of the abyss, we must go far beyond merely questioning the expense of many programs that we have taken unto ourselves. We need to go beyond that and question the philosophical basis of these programs.

It seems to me that if we are to overcome the malaise in our land, we need to address more than just economic matters. To be sure, the restoration of health to the economy will be a great help, but I submit that it is not enough.

We are an unhappy Nation, as President Carter pointed out some months ago, although I disagreed with his diagnosis of the cause. We are an unhappy Nation because we have departed from the purpose, the true purpose, for which our Government was created.

To my way of thinking, the purpose of our Government is the protection of life, liberty, and property. Of course, Jefferson's phrase in the Declaration of Independence is more famous "life, liberty and the pursuit of happiness" but it was also common among his contemporaries to express it as life, liberty, and property.

Indeed, in many State constitutions, that phrase is used. In fact, it appears in our own Constitution, in the 14th amendment, as the famous due process clause, which states that no person shall be deprived of life, liberty, or property without due process of law.

What I am getting to, Mr. President, is the assertion that, among other things, we are not only failing to protect property but also directly attacking property in the administration of many programs.

There is absolutely no justification under the Constitution, in my opinion, for grants of any kind, for subsidies of any kind, for low-interest loans of any kind; because, in fact, these things represent an attack upon property.

In order for the Federal Government to pass money around, to issue grants, it must first take that money from the people. To those people from whom money is taken in the form of taxation and who are not on the receiving end of these grant programs and other programs like them, it represents an attack upon property.

So I am saying that if my party, which has now seized the initiative by offering new ideas—and that is what politics is all about, ideas, and not personalities or even parties, except to the extent that parties represent different ideas—if those in the Republican Party are to keep the leadership, we must conceive new ideas to offer to the American people.

This Senator suggests that an idea which, in timely fashion, deserves focus and attention after we restore health to our economy is the true purpose of government—the idea that government is instituted to protect life. Today, we are not fully protecting life; we are acquiescing in the taking of human life, and I am speaking of abortion. We are not protecting liberty; we are acquiescing in the piecemeal destruction of liberty by creating more and more bureaucracy, which gives forth a torrent of regulation, which takes away our liberty. We are not protecting property but attacking property.

If we are to carry out our function of leadership, we must begin to focus on this area.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DENTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Alabama is recognized.

SPENDING CUTS

Mr. DENTON. Mr. President, I wish to make a few remarks apropos of the consideration by the Senate this week of the first part of the President's package of proposals: the spending cuts.

It is said that the effect of these cuts would be to help move America back toward economic sanity. "Sanity" is a strong word. It implies that the state we are in economically is its opposite—insanity.

I do not believe that the word is too strong, because the procedure by which a person spends himself into bankruptcy, into economic ruin, in the presence of facts that he is indeed doing so, can be described as insane.

Our Nation is doing that. In 1960, the Federal Government had a surplus of $800 million. By 1970, this had become

a deficit of $13.1 billion. Today's deficit has reached $68.4 billion.

This Nation not only is spending too much, but also, it is spending too much on the wrong things and not enough on the right things. We are spending too much on programs termed "social," and not enough on national security programs.

The shift of emphasis between these two programs is dramatic. In 1960, the percent of total outlay by this country for defense was 49 percent; for social purposes, 27 percent. Last year, 1980, instead of 49 percent for defense, we were spending 23 percent; for social services, 52 percent instead of 27 percent.

Many in the news media and in academe suggest that this is a humane and compassionate shift. But how can one call it humane and compassionate when, on the one hand, in spending ourselves into bankruptcy we are eliminating the basis from which we can give aid of any kind to people in distress—to the poor, to the handicapped? A bankrupt nation can give nothing for social purposes.

Similarly, if the number one social service which a government is required to provide its people is not provided, then the social services after number one do not count. The number one social service to which I refer is the assurance to the people of the Nation that they can withstand an attack which would result in the loss of the freedoms and economic advantages which we now enjoy.

We do not have that assurance today. We have a Soviet Union which particularly since 1962, after the missile crisis in Cuba, has concentrated even further on defense spending, although the word "defense" is extremely doubtful in their case. They are spending money on strategic missilry—missilry which if leveled against the United States in an actual attack could destroy roughly 50 percent of our population. In response our retaliatory forces could perhaps destroy 5 percent of the Soviet population.

This is a gory consideration, but one worthy of our attention because the Soviets in the period following their revolution in 1917 destroyed in their internal purges—numerically and by percentages of their present population for political purposes and for suppressive purposes—more people than our retaliatory attack could account for.

That is the kind of antagonist which is homing in on us, aiming with those missiles.

We must meet that threat. We must start to shift the imbalance favorably or we are doomed in both senses which I have already mentioned.

It is true that we must judge a wealthy nation by how well it takes care of its poor, but a nation destroyed by nuclear weapons or a nation spent into bankruptcy has no capability whatever for taking care of any poor.

I agree with the preceding speaker, Senator HUMPHREY, when he said the basic cause of all of this is a shift away from the traditional philosophy of this country. We have an identification problem. We are in the process of proving Socrates right when he said a democracy cannot survive because sooner or later too many people will perceive they can get their hands in the till and the elected officials will cater to that perception—end of democracy.

Our social programs from their inception were based on the principle of "love thy neighbor as thyself," a principle stemming from our sense of striving to be "'One Nation under God," a national principle which is included in the Old and the New Testaments.

When we reach the point at which we are not being compassionate from that motive of loving neighbor as self but are extending in to the Socratically identified state of demagoguery, appealing to vested interests among the society in a way such as subsidization of laziness or inculcating expectations that are not realistic with respect to what a federal government should provide, then we are threatening ourselves with destruction.

Most basically, I believe we must return to the philosophy of trying to be one Nation under God. I think that philosophy has the economic and strategic answers which the President's package contains.

I believe the people in this country are ready to support the President's package.

I conclude by saying that the package is like a football play. It has a number of elements. As in a football play we have blocking assignments. We cannot just generally decide we are going to go off tackle with a particular reverse play. We have to decide that we are going to do it with detailed assignments to each member of the team. The President's package is like that. It is not just some spending reductions; it is not just spending some more for defense; it is a quantified package and has other elements. It is tax incentives to business and individuals designed to put our economy back into a sane condition. It is regulatory reform. We must pass it as a coherent package.

It will require sacrifice by each segment of our society, and I can speak for the State of Alabama in saying that my tuning in to them in the past year and especially in the past few days has indicated that they are ready to make those sacrifices individually for the common good.

I exhort my colleagues to support the President's package in detail beginning with the first step, the spending cuts, and begin the overall return to honesty, to realism, the return to sanity which they represent.

I thank you, Mr. President.

The PRESIDING OFFICER. The Chair recognizes the Senator from Vermont.

BUDGET RECONCILIATION

Mr. STAFFORD. Mr. President, tomorrow the Senate will take up Senate Concurrent Resolution 9, revising the congressional budget for fiscal years 1981, 1982, and 1983. The Senate is proceeding apace in a process we call "reconciliation." Reconciliation is an appropriate means to implement a congressional policy of spending restraint. That we would need to resort to such a process was anticipated when the landmark Congressional Budget Act of 1974 was drafted. That statute instituted major reforms in the approach Congress would take to Federal spending. Speaking as the chairman of the Senate Committee on Environment and Public Works, I am pleased to participate in the Senate's efforts to carry out the spirit of that law.

On February 18, less than a month after he took the oath of office, President Ronald Reagan proposed to Congress a program for economic recovery. His plan is based on sound expenditure, tax, regulatory, and monetary policies. His objective is to reverse the debilitating inflation and stagnating productivity that has inflicted our economy for more than a dozen years. The reconciliation instruction to standing committees contained in Senate Concurrent Resolution 9 begins to carry out the spending restraint policy contained in the President's program. I support this policy, even though it means severely restricting programs which were begun with good intentions and great promise. In some cases it means bringing some of these programs to an end.

The Committee on Environment and Public Works is prepared to take these often difficult steps because we recognize it is the only way to reduce deficits and without increasing the tax burden that discourages productivity.

Last week our committee made its report to the Budget Committee, giving our views on new budget authority and spending restraint for programs in our jurisdiction. I wish to take this opportunity to review our activities for the record.

The circumstances surrounding the development of committee reports this year are extraordinary. Normally, committees are supplied with the President's budget request by the end of January, providing adequate time to conduct a thorough inquiry into the impacts of the administration's budget on programs of concern to the committees. In 1981, the change of administrations was further complicated by President Reagan's major budget reduction initiative required to carry out his economic recovery program announced on February 18.

The President's revised request for fiscal year 1982 was formally transmitted to Congress on March 10. This was accompanied by special messages proposing rescissions and deferrals of budget authority previously enacted by the Congress. As of March 17, the cumulative amount proposed for rescission in fiscal year 1981 is $12 billion; for deferrals it totals an additional $8.6 billion. President Reagan's program therefore includes substantial modifications in budget authority in the current fiscal year.

A number of these rescissions and deferrals affects programs within the jurisdiction of the Committee on Environment and Public Works. In addition to developing a recommendation to the Budget Committee for fiscal year 1982, this committee also reviewed the President's proposals for fiscal year 1981 or earlier and included recommendations thereon in this report.

Overall, the committee recommended new budget authority for its programs in fiscal year 1982 identical to that requested by the President. Likewise, for fiscal year 1981 the committee recommends budget authority that, in the aggregate, achieves the reductions proposed by the President. However, the committee did depart from the Reagan administration's proposals in some areas:

First, the Environmental Protection Agency wastewater treatment works construction grants program. The President proposed rescinding previously appropriated funds totaling $1.7 billion. Of this, $1 billion reflects appropriations enacted in fiscal year 1981; $586 million in fiscal year 1980; and $114 million in fiscal year 1977.

The Committee on Environment and Public Works recommended rescinding $1.214 billion. The difference of $486 million reflects the committee's decision to recommend rescinding only $100 million rather than $586 million for construction grants appropriated in fiscal year 1980.

Under the Clean Water Act, States normally have 2 years to obligate their allotments to specific projects. Funds appropriated in fiscal year 1980 which remain unobligated at the end of fiscal year 1981 are available for reallotment. The committee determined that a rescission of $100 million in fiscal year 1980 funds would not be unduly disruptive to the States' construction programs since it represents the current estimate of the unobligated balance that will remain at the end of fiscal year 1981, which, incidentally, is September 30, 1981.

The committee also recommends $2.4 billion in new budget authority for fiscal year 1982, contingent upon enactment of reforms in the construction grants program that will limit Federal funding responsibility to projects having the greatest water quality benefits. At this time, the Reagan administration provides no funds for fiscal year 1982, but is committed to request $2.4 billion if reforms are enacted.

Next, in the case of the Water Resources Council and the Office of Water Research and Technology, the committee voted to reject the President's recommended rescissions totaling $16.8 million in fiscal year 1981 and related proposals to terminate these agencies in fiscal year 1982. Instead, the committee recommended reducing the general construction account of the Corps of Engineers by $16.8 million in fiscal year 1981. In fiscal year 1982, the committee proposes to provide $40 million in new budget authority, evenly divided between WRC and OWRT, again to be offset by a $40 million reduction in the corps' general construction account.

Finally, in fiscal year 1982, the committee voted to increase budget authority associated with Fish and Wildlife Service programs by $6.4 million, to be offset by reductions in budget authority for the Tennessee Valley Authority and the Nuclear Regulatory Commission.

With these exceptions the committee adopted budget authority levels that matched the President's spending restraint proposals.

Compared with congressional spending authority of $19.5 billion enacted in fiscal year 1981 for environment and public works programs, this committee recommended savings of $1.5 billion, 8 percent below current law. Our total recommendation for fiscal year 1982 of $17.1 billion is $2.3 billion or 12 percent less than current law and $4.7 billion or 21.5 percent less than the previous administration's request.

Mr. President, although the committee adopted recommendations that contemplate more spending than the President proposes, we are prepared to reexamine these recommendations in light of the Budget Committee's instruction that more savings be achieved. In any event, I would like to offer my personal commitment to achieve the total spending reduction figures contained in Senate Resolution 9, for the Committee on Environment and Public Works.

Naturally, members of the committee will differ on the details of how these reductions ought to be achieved. That is a necessary part of the process which we will undertake between now and May 31. Nevertheless, I believe the Budget Committee and the Senate can count on the full cooperation of the Committee on Environment and Public Works in achieving the savings in Federal spending that will be necessary to achieve our economic revitalization goals under President Reagan.

Mr. President, I am prepared to yield the floor.

The PRESIDING OFFICER (Mr. BOSCHWITZ). The Senator from Idaho.

BUDGET RECONCILIATION RESOLUTION

Mr. SYMMS. Mr. President, today I would like to share with my colleagues some of my thoughts on the budget reconciliation resolution before the Senate this week. This resolution mandating reductions in Federal spending during the remainder of fiscal year 1981 and for 1982 and 1983 is, of course, the first of President Reagan's economic reform proposals that will come before Congress this year. As a member of the Senate Budget Committee—along with the Senator occupying the chair—I was pleased to be able to play an active role in developing the legislation mandating spending cuts for the future.

Mr. President, I hope all Members of this body realize the urgent need for the quick approval of the President's reform proposals in their entirety. The dramatic rise in inflation, interest rates, and fundamental instability in the economy and financial markets during recent years is due, in large part, to the uncontrolled growth in Federal spending, expansion of the Federal debt, and the failure to control the growth in the money supply. These high rates of inflation and interest rates have created a crisis in capital investment, productivity, and American competitiveness in the world.

My constituents in the State of Idaho tell me that homebuilding is at a near standstill; young people find it impossible to obtain home mortgage loans; small businesses and farmers cannot find money for expansion or, in some cases, to meet operating contingencies that are rapidly becoming emergencies and in many cases are already at the emergency stage for these small businesses. This is because the Federal Government is borrowing so heavily in the capital markets that the private citizen—the farmer, the small businessman, the young couple wanting to buy their first home—is simply being equeezed out of the market. This excessive consumption of available lending capital by the Federal Government has driven interest rates to unprecedented highs.

For the 4 years, 1976–80, Federal spending grew at an average rate in excess of 12 percent per year; in the 1979–80 period this spending growth accelerated to almost 16 percent annually. Inflation rates during the last several years have averaged near 10 percent each year as measured by the Consumer Price Index. At such rates of inflation our currency will lose fully half of its purchasing power in just 7 years. This rapid growth in Federal spending and inflation will result in higher rates of unemployment, lower productivity and increased economic and social chaos if it is not stopped. As Government takes greater and greater portions of the earnings of individual citizens there will be no incentive to work, to save, to invest. In other words, people will see no hope for the future—no way to get ahead in life. As this becomes apparent social decay and degeneracy will result if we do not get on top of this situation now while this window of opportunity presents itself.

Mr. President, I must point out that this rapid rise in Federal spending, debt, and inflation results from the fundamental nature of Government to expand its power combined with the use of the public purse by our political rulers to pacify and control the population. The "tax, spend, and elect" mentality took hold in Washington nearly 50 years ago and has been employed at an accelerated pace by politicians promising a "free lunch" and trying to buy the votes of the people with their tax dollars in an effort to insure reelection. Politicians have acted as if the Government rather than the private sector was the creator of wealth. In reality, however, Government confiscates the wealth of the individual and redistributes it—it is not a source of wealth and production; it is a consumer of wealth and production.

As a result the size and power of the central Government in Washington has grown at an alarming rate during the last 20 years. Program after program has been pyramided one on top of the other in an effort to solve social problems by transferring money from those who earn it to those who do not. The tax policy of the Federal Government for the last 20 years, really the last 50, but especially the last 20, has been used as a vehicle for socioeconomic change rather than to simply raise the revenue necessary for legitimate functions of Government.

The taxing and regulatory power of the Federal Government has not only been used to support the ever growing bureaucracy but to restrain individual

enterprise saving and investment. The average wage earning family of four has seen their taxes triple in the last decade. Today, taxes—not food, shelter, clothing, education, entertainment, or savings—but taxes are the largest single item in the budget of a typical working family of four.

We have run up a budget deficit of $500 billion in the last few years alone, and the result is inflation that is wrecking this Nation's economy, destroying businesses and job opportunities which is literally causing whole regions of this country to wither and die on the vine. For years we have been eating our seed corn in an economic sense rather than investing in next years crop.

It is for these reasons, Mr. President, that the Congress must approve the Reagan tax package as well as make these spending cuts in the budget resolution. President Reagan is proposing changes in the tax policies to encourage work, savings, and capital investment. He is proposing, and I support, across-the-board reductions in income tax rates of 10 percent per year for the next 3 years. We must immediately lower to a maximum of 19 percent, as President Reagan has proposed, the portion of the gross national product that is consumed by taxes.

It is nearly up to 25 percent today and it must be brought back in line so that there is more money left in the hands of the individual Americans to provide for new enterprise, for new entrepreneurial activity, for new sound economic growth which will lead this country and sustain it so that all Americans will be able to participate in the economic system.

There have been some that have argued that the Reagan economic proposals will turn the clock back 20, 30, or even 40 years, that years and years of "social progress" will be eliminated. But, such arguments are simply not credible if we examine these proposals, and specifically the budget resolution before the Senate this week. We are not eliminating needed programs. We are simply restraining the rate of growth of some of the Federal programs and we are thinning down some of the programs that are too fat. We are targeting them, we are consolidating them, and we are trying to make them more efficient.

More importantly, however, is that President Reagan is proposing systemic changes in many areas. Many of the categorical-grant social programs that have built huge consumptive bureaucracies are being replaced with block grants to the States so that they can administer the programs with greater latitude and at lower cost. Making these systemic changes is most important for the long run because, if the bureaucratic structure is left in place, budget cuts this year or next year will be only temporary.

President Reagan said once on the campaign trail that the only thing that has eternal life on this Earth is a Government agency. That has been more and more true as the years have gone by. I think this is the reason why it is so essential that this budget resolution as reported by the committee pass as the first step toward a reduction in Government and less Government intervention in the daily activities of the American people. Furthermore, it is important for Congress to demonstrate that it is going to back the President so as to lower the inflationary expectations and restore confidence in our economic future.

Obviously, all of us are not going to agree with every detail of the budget proposals. I, myself, have areas in which I would have made different recommendations. For example, I would have made fewer reductions in what I refer to as resource capital investment; namely, water projects, supports for basic science R. & D., the highway program, and other programs that aid the Western States in coping with the burden of the large Federal land holdings within their borders that lower their revenue base. I did not propose specific amendments to this resolution in the Budget Committee, because I feel that the overriding interest of the people of Idaho and the Nation must be to get the President's economic package moving and passed in its entirety as quickly as possible. However, I have proposed in the committee report that a fair share of Federal funds be distributed to each of the States. This would not increase the bottom line in the Federal budget, but it would provide a more equitable distribution of funds.

I have recommended that no State receive less that 90 percent of its per capita share of Federal block-grant funds for the areas of health, education, and social services. I would urge the Senate, Mr. President, to adopt the 90 percent capita share approach. This should not only benefit my State of Idaho but would also benefit some of the States in the Midwest region that are having economic difficulties.

In closing, Mr. President, I would like to say to the Members of this body where I think we should go and where I think the majority of Americans want to go. That is in a direction toward less Government, less spending, lower taxes, a lot less inflation, more creativity in the private sector and greater opportunities for people to define their own lives and make their own way free of Government restraints. The American people are a "can do" people.

Our forefathers struggled against great odds to build on the continent a monument to human freedom. We came from many lands united by our belief in God and our desire for freedom. We now have the opportunity to relegate the errors of the past to the past.

President Reagan is trying to make fundamental changes in the direction of our Nation and our economic policy. He is the first President in over 40 years to offer the American people a real change in the direction of national policy.

A systemic change, if you will. The spending reductions proposed in this budget resolution, Senate Concurrent Resolution 9 is just the first step—not just the first step in improved budgeting, but I am convinced it is the first step in the revitalization of this Nation's economy that will enable us to preserve our Republic as a free society.

Thank you, Mr. President.

The ACTING PRESIDENT pro tempore. The Chair recognizes the Senator from Minnesota.

BUDGET CONTROL

Mr. BOSCHWITZ. Mr. President, I want to join in the remarks of my friend from Idaho, who serves on the Budget Committee with me, and make some remarks of my own.

This morning there have been a series of Senators talking about the budget and President Reagan's economic plan. They mentioned the necessity for getting it under way, and the accomplishments of the Budget Committee during the past week in starting that ball rolling. Indeed, I think those accomplishments were very meaningful.

Mr. President, I have served on the Budget Committee since I entered the Senate 2 years ago. Among my earliest votes in March 1979, just 2 years ago, was on the 1980 budget. That budget was $532 billion. I looked at the budget and when I compared it to the 1979 budget I noted that it had grown only 7.6 percent. So I wrote a concurring opinion and voted for that budget of $532 billion.

Since that time, I have grown somewhat more accustomed to the Senate and somewhat more experienced, and I realized that I was not making a fair comparison. Normally the budget resolution that we pass in the spring is only the first in a series of upward revisions to the budget numbers. Because the various agencies of Government come back to us and say that we did not give them enough, we have a second budget resolution and then we have a second budget resolution revised, or a third budget resolution. That is what happened in 1979.

I find in looking back that I was comparing the first budget resolution of 1980 with the second budget resolution, revised, of 1979. If I had compared the first budget resolution of 1980 with the first budget resolution of 1979, the increase indeed would have been, as the Senator from Idaho said, 16 percent.

Now, in 1981, only 2 years later, President Carter left us with another budget, not at $532 billion, but at $739 billion. And it is that budget that we are addressing in the Budget Committee and on the Senate floor.

We are not really cutting the budget. As the Senator from Idaho said, we are slowing the rate of increase. President Reagan has said that the rate of increase of the budget should not be faster than the rate of increase of the working people's salary in this Nation. I agree.

In the 2 years that I have served on the Budget Committee, the budget indeed has grown at a rate in excess of 16 percent, compounded annually.

At the same time, President Carter, in 1980, asked working people of this country to restrict their wage increases to about 8 percent a year.

By and large, wage increases did average in that area.

There is no way, Mr. President, that

the Government of this country can grow at a faster rate than the economy, unless the Government takes more from each taxpayer, or unless the Government goes deeper into debt. That is, of course, what has happened.

We take more and more from each taxpayer, and taxpayers ride through the magic of inflation into higher and higher income tax brackets. It is a cycle that must end if we are going to gain control of our economy.

I believe the Senate Budget Committee acted with great responsibility when it voted 20 to 0 to restrict the growth of Government. Some of my friends and colleagues on the Democratic side of the aisle made long and moving speeches about programs that have done much good for this country. In spite of the fact that they voted to continue current spending on these programs in the Budget Committee, nevertheless, when the final vote on the budget came about, 20 members out of 20 on the Budget Committee voted to restrain the growth of the budget. They voted to cut $36.4 billion from the budget suggested by President Carter prior to his leaving.

If we are to gain control of inflation, Mr. President, there is no question that we must gain control of the budget.

As the distinguished Senator from Idaho said, the borrowers of this Nation are being squeezed out of the lending market. They are being squeezed out of the ability to borrow at decent rates, because the Government is coming in and borrowing 40 percent of the available funds in the banking system of the United States.

The result has been that the Federal Reserve has felt it necessary to expand the money supply at too fast a rate, and. as a result of that, we have a cheapening of the currency, a debasement of the currency. When money becomes cheaper that is, of course, what we call inflation.

If one looks upon the economic growth of this country or of any industrial country in the world, without question you will find that it was done in a noninflationary environment. A noninflationary environment existed before governments tried to buy their way to prosperity. Unfortunately, governments now have helped to encourage inflation by these policies, and have helped cause the inability of society to control inflation when things got out of hand.

Mr. President, in the fifties and sixties in this country, the average rate of inflation was just over 2 percent. Many people forget how recently inflation at 2 percent was considered the norm in this country. The great growth in this country which brought so much egalitarianism to the people of the United States, was predicated on a low rate of inflation.

As recently as the early seventies inflation was still at a low rate, between 4 and 5 percent. Yet in the early seventies an inflation rate of 4.3 percent was considered so high, so unsatisfactory, so objectionable, that wage and price controls were imposed by the President of the United States.

Certainly today that feeling would not abound. If we told the people of the United States we were going to restore a 4.3-percent inflation, they would just be overjoyed. But, indeed, we have to do better than that and we can.

The Budget Committee's actions earlier this week are the first step in that direction. The Budget Committee's action to cut $36.4 billion is a step in the direction of getting the Government out of the borrowing line and stopping the squeezing out of the working people and the businesses of this country in their ability to borrow money from the banks.

The reconciliation process that the Budget Committee adopted is the right process. There were approximately 140 to 150 cuts in the budget suggested by Mr. Stockman and his group at OMB and the President.

If we vote on each one of those individually, unquestionably this body is not going to succeed in making meaningful budget reductions.

But through the reconciliation process, where we package it all together, through one vote and through instructions to various committees to tell them to reduce their spending, I think we will have achieved the desired goal.

So we are on our way. What we do tomorrow, whether or not we carry through the will of the American people as expressed in the 20-to-0 vote in the Budget Committee, will have a great impact on what happens to this Nation in the future.

Without question, my constituents in Minnesota tell me that they are for the President's program. They want it to be fairly applied.

They do not want one segment to be cut more than another segment, nor do they want one segment to profit from the budget cuts that we are bringing about.

I think my people and your people, Mr. President, and the people from the State of Illinois, whose Senator I see sitting here, and the State of Mississippi, whose Senator is sitting here, will also agree with the idea that budget restraint fairly applied is indeed in the interest of the Nation.

Finally, I commend Senator DOMENICI for his leadership in the Budget Committee, Mr. President. He encouraged everyone on the committee to have their say whether it be pro or con. He did not shut off debate on the issues at any time, which I think was important because the issues in the budget are not only large but very complicated. And yet, the resolution was reported out and reported out unanimously for the first time, I believe, in the history of the Budget Committee. which is a good sign of what we have before us.

I congratulate him and I congratulate the other members of the Budget Committee who worked 12 and 14 hours a day to accomplish that end. I hope the full Senate will act in the same spirit of cooperation when we open the debate on the floor tomorrow.

Thank you, Mr. President.

Mr. COCHRAN addressed the Chair.

The ACTING PRESIDENT pro tempore. The Senator from Mississippi.

PRESIDENT REAGAN'S BUDGET PROPOSALS

Mr. COCHRAN. Mr. President, I am pleased to have this opportunity to speak for a few minutes concerning President Reagan's budget proposals and the reconciliation instructions.

We are scheduled to take up Senate Concurrent Resolution 9 tomorrow. As stated in the Budget Committee report, this is the largest single reduction in Federal spending in history. Over the 3-year period, the resolution calls for total reductions of $125.8 billion in budget authority and $87 billion in outlays.

The Budget Committee is to be commended for its efforts and hard work in reporting this unprecedented legislation. Theirs is generally a thankless, but necessary, task; few appreciate the Budget Act, even fewer understand it. I certainly do not claim to be an expert, but with a little patience and study it is at least partially decipherable.

This resolution marks the beginning of our efforts to reverse the growth in Federal spending. Over the last several years Federal spending has been growing at an alarming rate. Despite our efforts to halt this growth, in fiscal years 1980 and 1981, outlays have grown by some $170 billion. In fiscal year 1981 alone, spending has jumped some $80 billion, or around 14 percent. Obviously, something must be done to stop this.

The budget process was designed to give Congress an overall approach to restrain spending. It is a self-policing method whereby, hopefully, we can control spending rather than having it control us.

Unfortunately, because of eroding economic conditions—brought on in large part by Government-included problems—the budget process has heretofore not effectively restrained spending. We have had to come back time and time again to revise the budget levels and the deficit for 1981. I hope that Senate Concurrent Resolution 9 marks the last such revision.

Senate Concurrent Resolution 9 is truly unprecedented. Never before has a reconciliation package of such dimensions come before the Congress. Never before have instructions been proposed to require authorizing committees to make reductions in specific authorizations. There has been a great deal of discussion about this procedure and some serious criticism.

But I am afraid that unprecedented actions must be taken, because we are facing an unprecedented challenge. Many people are asking whether we can control Federal spending or whether the Federal Government has so imbedded itself in so many expensive programs that it cannot be extricated.

I intend to support the budget resolution, although I am concerned about some of the specifics, including the implications of the instructions to the authorizing committees. I am optimistic that these concerns will be fully discussed, and that, possibly, solutions in the form of suggested legislative changes to the authority contained in the Budget Act may be considered at a later time.

It is too late for that right now, Mr. President. There may be some who would like to suggest that, on this occasion, the Committee on the Budget has really gotten too big for its britches. I might be one who would be standing here saying that under ordinary circumstances, but, really, at this point, it is my judgment that an attack against the Budget Act, an attack against the Budget Committee, would not be appropriate. We need to stand behind the procedure that has been developed by the Budget Committee and support the recommendations that it is making.

I thank the Chair very much.

THE RECONCILIATION RESOLUTION

Mr. GORTON. Mr. President, I am pleased to appear with many of my colleagues today to emphasize the importance to our Nation of Senate Concurrent Resolution 9, the reconciliation resolution. The Senate Budget Committee's prompt and successful attention to reconciliation provides a strong indication that the Congressional Budget Act will work.

It has been a privilege for me to have been involved in such an historic process so early in my tenure in the U.S. Senate.

There is no question that this Congress must act quickly to address the problems which plague our Nation's economy. Our goal must be to adopt a program that will end the dual curses of double-digit inflation and the lack of growth in productivity in our economy. If we fail to address these two conditions immediately and effectively, there is little hope that this Congress will be able to deal effectively with other issues facing our Nation.

Since the beginning of this session, the Budget Committee has been hard at work building the structure for the reconciliation process. The committee has heard from a multitude of economists of differing economic persuasions. Despite their differences in other areas, these economists have been almost unanimous in their view that a first and vital part of the program for turning our Nation's economy around is a substantial reduction in the size and growth rate of Federal spending. The reconciliation resolution constitutes a major but not a final step toward such a reduction.

Senate Concurrent Resolution 9 offers the Congress the opportunity to break quickly and effectively with its past spending practices—practices which have led us inevitably to the economic crisis we now face.

The Budget Committee's task was not an easy one. The committee has had to make many tough decisions in recommending cuts in programs with worthwhile objectives. Our goals cannot be met simply by eliminating fraud, waste, and abuse from the Federal budget. In order to decrease outlays by $36.4 billion next year, many programs have had to share the burden of reduced spending. It is important to recognize, however, that while individual social programs have been scaled down or eliminated, the overall share of our Federal budget earmarked for social services will not be reduced by this resolution.

I am convinced that the economic course which this resolution charts will lead to a better economic future for all Americans, a future in which the war against inflation begins to win battles, and in which a new wave of growth in the productivity of the American economy starts to build. It is appropriate and vital, therefore, that Congress adopt this resolution quickly and enthusiastically.

The ACTING PRESIDENT pro tempore. In my capacity as Senator from the State of Alaska, I suggest the absence of a quorum. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. PERCY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is ordered.

THE BUDGETARY ASPECT OF THE ECONOMIC RECOVERY PROGRAM

Mr. PERCY. Mr. President, I am very pleased to join my colleagues this week to discuss the President's economic program, with particular emphasis on the budget.

Tomorrow, the Senate will take up the reconciliation resolution that will be our first step toward realizing the budget savings recommended by the President earlier this month. The process of making these savings—reconciliation—was originally authorized by the Budget Reform Act of 1974. We have had the option of using it in the past, but have not, until last year. There has been a great deal of discussion about this process and how it affects the operations of Congress.

I look back now at the work we did in the Governmental Affairs Committee in 1973 and 1974. I served then as ranking minority member, and Ed Muskie and I worked in tandem with our chairman, Senator Sam Ervin in creating the Budget Reform Act of 1974. We did not envision at that time how valuable the reconciliation process would become.

However, there is a very good reason for Congress to turn to this reconciliation procedure again this year—namely, the state of the economy.

In today's papers, we are reminded again of the precarious state of the U.S. economy. After a lull in January, the February Consumer Price Index shot up to double-digit levels again. If we thought that the 8.4-percent inflation rate of January was a signal that we were out of the woods, today's economic news serves to remind us that we have not tamed the beast of inflation. It may not be quite as bad as what we were experiencing a year ago—when the winter CPI hit 18 percent—but it is a far cry from the low levels of inflation that this country was used to in the 1950's and early 1960's.

I can well remember, as an industrialist during those years, that beginning in the 1950's, one of the lowest priced photographic products produced by the company I was affiliated with as CEO was about $50. Within a period of 1 decade of inflation, in which the rate averaged 1.5 percent for the entire decade, and with a 3- to 4-percent increase in productivity each year in that period of time, the company, at the end of 10 years, was able to market a product for $39.95. That same camera had sold a decade before for $50. Moreover, the newer, less expensive camera was better than its predecessor.

Those days, I hope, are not gone forever, when we could live with a decade of 1.5-percent inflation and rising productivity.

We can look back to that era of American productivity, and we can today look at the productivity in the agricultural field and see how productive this Nation really can be. The same procedure and practice we follow in agriculture can be be used in other areas of industry today. But we should not lose sight of the fact that we have a long way to go.

We can look back to our earlier accomplishments when we worked industrial miracles. I believe that with the proper incentive program for the future, we can do the same, and economic history can repeat itself.

We should not lose sight of the fact that in those growth years of the 1950's and 1960's, we were able to sustain great yearly advances in the gross national product with only 1- and 2-percent inflation. In short, capital and consumer spending in those years did not—I repeat, did not—fuel inflation.

Moreover, we had an unemployment rate that is by today's standards enviable, although it did not seem so to us at the time. For the post-World War II economy, an unemployment rate of 4 to 5 percent was the norm. In some years, it actually dipped down to 3 percent. A look back reveals that until the mid-seventies, unemployment only cracked the 6-percent barrier twice, in the recession years of 1958 and 1961. Since the midseventies, unemployment has notched up another degree and the norm seems to have become 7 percent, with the old high, 6 percent, at the bottom range.

Mr. President, we are confronted here with two seemingly intractable problems that have developed in the past decade. The state of the economy is not good and it is for that reason that we are embarking on an economic recovery program this year.

Past policies have not worked and we must turn to medicine that is a bit stronger. If we can put these policies in place, there seems to be a good chance that inflation will begin to slow and job opportunities will expand. We know that continuation of the old policies of more and more spending will not give us a long-term solution to the economic problems we face. It is because of this promise of an expanding economy that I support the budget reduction program that will soon be before the Senate. It is for these reasons that I joined as a principal cosponsor of the reconciliation instructions resolution.

While the economy has been experiencing rapid inflation over the past dec-

ade and as unemployment has risen, what has been going on with Federal finance?

It, too, has been showing ominous trends, with spending increasing and taxes climbing to ever higher levels. When I first came to the Senate in 1967, the Federal budget stood at $158 billion. By 1970, just 3 years later, it had climbed by almost $40 billion, to $196 billion. During that period, the Federal budget was in deficit, but it also realized the one surplus budget of the past 20 years. During this 3-year period, Government spending increased by less than $15 billion annually, on the average.

Then, when we hit the 1970's, the budget began to grow like topsy. By 1975, Federal spending had doubled, to $326 billion. In the past 6 years, the budget has doubled again, to $662 billion originally estimated for fiscal year 1981. Instead of the $15 billion a year increases in spending, we now talk about $80, $90, and $100 billion a year increases.

Mr. President, I ask unanimous consent that a table showing Federal outlays and revenues be printed at this point in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

FEDERAL BUDGET RECEIPTS AND OUTLAYS

[In millions of dollars]

	Receipts	Outlays	Surplus or deficit (—)
Fiscal year:			
1970	193,743	196,588	—2,845
1971	188,392	211,425	—23,033
1972	208,649	232,021	—23,373
1973	232,225	247,074	—14,849
1974	264,932	269,620	—4,688
1975	280,997	326,151	—45,154
1976	300,005	366,418	—66,413
Transition quarter	81,773	94,728	—12,956
1977	357,762	402,710	—44,948
1978	401,997	450,804	—48,807
1979	465,940	493,635	—27,694
1980	520,050	579,613	—59,563
1981 [1]	607,525	662,740	—55,215

[1] Estimate.

Source: Economic Report of the President, January 1981.

Mr. PERCY. Mr. President, as Federal spending has been rising in real terms, so has it also been increasing in terms of gross national product. This is an alternate way to express the role the Federal Government plays in the economy and may be the best way to show the importance of slowing the spending juggernaut.

During the 1950's and 1960's, Federal spending tended to stick to the range of 18 to 19 percent of GNP. Again during the mid-1970's, we seem to have reached a new plateau in the low 20-percent range.

Mr. President, I ask unanimous consent that a chart from President Reagan's economic recovery program be printed in the RECORD at this point.

The chart points out the extent to which the Federal Government has assumed a larger and larger share of the economy—from 18.7 percent for the period 1955–64 to a rate of 22.3 percent during 1979 to 1981.

There being no objection, the chart was ordered to be printed in the RECORD, as follows:

GROWTH IN FEDERAL SPENDING

	1955–64	1976–81	1979–81
Annual rate of growth (percent):			
National defense	2.9	11.9	17.0
Nondefense	9.9	12.0	15.5
Total	6.3	11.9	15.9
Average outlay share of GNP:			
National defense	9.4	5.3	5.3
Nondefense	9.3	16.8	17.0
Total	18.7	22.1	22.3

Mr. PERCY. Mr. President, it is necessary for us to begin to slow this pace of spending. It is not enough to try to balance the budget if doing so is done at a higher tax rate. That would be a counterproductive balanced budget, for it would choke off the economic incentives we want to put back into the economy. Going hand in hand with our effort to reach a balanced budget must be a committed effort to reduce the percent of the gross national product taken up by Government.

I am pleased that the Reagan budget proposals and the reconciliation instructions move us simultaneously in this direction.

For the first time in many years, the budget proposed to Congress by the President—President Reagan's budget submitted just 3 weeks ago—forecasts a rate of Federal spending under the rate of inflation. Previous budgets proposed to Congress have led the inflation rate or at least always equalled it. Now we have a budget that says it is time for us to tighten our belts now for improvement in the long run.

There is no better way to drive this point home than to compare the Reagan budget revisions with the Carter budget submitted just before he left office. The Carter 1982 budget would have sanctioned increased spending at a 12-percent clip, just about even with the inflation rate forecast for 1982. President Reagan's budget has come to grips with this and cuts the rate of increase in half—to 6 percent.

Mr. President, in concluding, I should like to tell my colleagues that the need for this program is very clearly evident in my home State of Illinois. The rates of inflation and unemployment that I mentioned at the beginning of my remarks are national averages. Some States have higher rates; others have lower rates. Illinois is one of those States that is experiencing both higher inflation and higher unemployment. Chicago, for example, experienced consumer price inflation last year of 14 percent, compared with a national average of about 12½ percent. In the jobless rate, it is much the same: February unemployment in Illinois had come down to 8.3 percent. For the same month, nationwide unemployment was still lower, at 7.3 percent.

So the economic problems are very real at home, and the people of Illinois want action to end this stagflation of high prices, high unemployment, and sluggish growth.

This economic recovery program responds to that need. It is often said that a rising tide raises all boats. So it is with an improving economy. We will all benefit from lower inflation and a healthier economy. Perhaps those who stand most to gain from this program are the elderly—whose fixed incomes make it difficult to cope with rising prices—and the poor—who have neither job opportunities nor the means to pay higher prices. They are the real victims of this sluggish economy, and it is time we did more than conduct business as usual that will simply perpetuate their condition.

I commend my good friend and colleague, the chairman of the Senate Budget Committee. This is his first year in this important position. Moving this reconciliation process forward would be a challenge for even the most seasoned committee chairman. I have great confidence in his abilities and congratulate him on bringing this resolution to the floor in such an expeditious manner.

I also commend the ranking minority member, the former chairman of the committee, Senator HOLLINGS. He has been totally bipartisan. I believe that all members of the Budget Committee proved their fiscal responsibility, their dedication to a common cause, and their dedication to making this program work, by unanimously voting—minority and majority members together—to report this budget to the floor of the Senate.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. ANDREWS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE PRESIDENT'S ECONOMIC PACKAGE

Mr. ANDREWS. Mr. President, I join my colleagues today in support of the economic package proposed by the Reagan administration.

My support reflects the sentiment of an overwhelming number of North Dakotans who have written or called to express their support of administration proposals. However, I would certainly be less than candid if I suggested there is no opposition. In fact, I occasionally find myself with reservations about specific aspects of a few administration recommendations.

Nevertheless, the job of Congress is to fine-tune those programs so they provide the most efficient and economical utilization of the funds we appropriate for essential Government services.

There are those who suggest the administration is rolling back social programs 20, 30, or 40 years. That is simply not true.

No Member of this Congress would deprive the needy of food, clothing, and

shelter. No Member of this Congress or this administration can or will ignore those truly in need. In fact, administration proposals to reduce Federal spending, Federal regulation, and Federal taxes are designed to improve services to that element of society most in need by eliminating those who do not really need Federal assistance, thus leaving more help for those who do.

As the President has warned, it took some 40 years to get our economy in its present deplorable state, and it cannot be reversed in a matter of weeks or months. But I find the people are patient, too, if there is a good reason to anticipate improvements, and if they feel we are moving at last in the right direction.

At a meeting of farm editors yesterday, in this very building, editors from all corners of the Nation confirmed what most of us know—farmers are willing to take their bumps along with all other segments of society. The majority of farmers are confident there will be an improvement in their economic condition in the long run. No one suffers more from inflation than the producers of the food and fiber we need so much for our own consumers and to supply a hungry world abroad. They have no qualms about putting the good of the Nation above temporary personal gain, but they do not want to bear more of the burden than other segments of our economy. We must all share this attitude, and I am convinced that Americans, generally, are willing to sacrifice to get our country back on the right track. They know it will not be easy and it will require some adjustments, but for the overall, long-term good, they are willing to cooperate.

It has been so long since an administration proposed anything but additional expenditures that many of the big spenders are in shock. These skeptics have a greater fear of the unknown than they do of what they know and can see has devastated our economic system.

I am firmly convinced it is time we try something else. Many of us think it will work and that it deserves a fair chance. We can help the administration as it seeks that opportunity to put its program to work.

The skeptics, frankly, can perhaps take consolation in what Abraham Lincoln said just over 100 years ago:

> While the people retain their virtue and vigilance, no administration, by any extreme of wickedness or folly, can very seriously injure the government in the short space of four years.

Maybe even in the short space of 4 years we can turn this thing around and get our Nation back on track again. That, after all, is the goal of the Reagan economic proposals.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. Before the clerk calls the roll, will the Senator withhold?

Mr. ANDREWS. Yes, I withhold.

The PRESIDING OFFICER. The Senator from South Dakota.

THE PRESIDENT'S ECONOMIC PROGRAM

Mr. ABDNOR. Mr. President, President Reagan's economic program aims to bring to all Americans the opportunity for prosperity through stable and sustained economic growth.

The program consists of four broad, interrelated parts: First, immediate, substantial, and continuing reductions in the growth of Federal expenditures; second, reductions in tax rates over the next 3 years; third, elimination of unnecessary Federal regulation; and fourth, a steady and predictable monetary policy.

In place of piecemeal, stop-and-go policymaking, the President's reform measures offer a coordinated package for encouraging private sector economic initiative. This initiative is the fundamental source of economic motivation and growth. A fostering of individual initiative demands a coordinated reordering of economic priorities. In order to overcome the effects of inflation and Government spending, we must have sound economic policies. Policies that will stop rewarding present consumption over investment for the future; policies that will no longer favor the nonproducer over the producer; and policies that will stop emphasizing redistribution over the creation of income and wealth.

Mr. President, consider the consequences of passing a part of the economic program without the other parts as well. Some have suggested that not reducing personal income tax rates would lead to a balanced budget more quickly. Such a suggestion is mistaken because unless tax rates are reduced according to a consistent schedule, there will be little incentive for additional investment in the private sector. Low investment means fewer jobs and more people dependent upon Federal transfer programs. The President's program, however, aims at economic growth which will provide jobs and remove the need for Federal supports.

The economy has been seriously abused in recent years and fundamental changes in monetary fiscal and regulating policies are necessary.

A slow, steady predictable monetary policy set by the independent Federal Reserve is indispensable to controlling inflation. A proper monetary policy focuses on the long run and tailors money growth so that it is, in the words of the Federal Reserve Reform Act of 1977, "commensurate with the economy's longrun potential to increase production."

Money growth had accelerated above the guideline in the decade before 1975 and it has accelerated even more from 1975 to 1980. In conjunction with this extreme growth of the money supply, the United States has experienced rising inflation, volatile interest rates, lower real GNP growth, reduced productivity increases, generally higher unemployment, and growing use of resources to cope with inflation rather than to improve living standards.

Some would argue that we should wait until inflation ends before reducing money growth. Our experience shows that if we do wait, inflation will not subside. The President has proposed meaningful, yet not drastic, deceleration of money growth, a proper fiscal policy, and regulatory reform. Taken together, these measures will spur economic growth and reduce inflation.

In the area of fiscal policy, growth in the size of Government as a proportion of the economy must be reduced in terms of both revenues and expenditures.

Fiscal policy in recent years has been perverse. The tax burden on working people and businesses has become oppressive. Inflation-induced "bracket-creep" has reduced the real returns, on an after tax basis, of saving and investment, personal effort and risk-taking.

For example, a married person, filing a joint return with $16,000 taxable income in 1967, and the same real, inflation-adjusted income in 1980—about $36,000—was taxed at the margin by the Federal Government at 28 percent in 1967 and 43 percent in 1980. Mr. President, the key factor is that these people in 1980 are not able to continue living at their 1967 level, for they are being taxed at a much higher rate.

This increasing tax burden has transferred real resources to the Federal Government and away from the private sector. In addition, depreciation allowances based upon historical rather than current costs have understated expenses and overstated profits, resulting in a rising tax burden for everyone and a further transfer of command over resources to the Government. No one feels this more than the farmer and the small businessman.

The transfer of control over resources has been aggravated by Federal activity in the credit markets. Total Federal borrowing—the sum of Federal borrowing and federally-assisted off-budget borrowing—rose from $24.4 billion in 1974 to $124.4 billion in 1980. This represents a compound annual growth rate of 31.2 percent.

Mr. President, the key point is that while many loan guarantees have been necessary and may continue to be necessary, still they need to be examined for their effects on the credit market elsewhere. And they need to be examined evenly and fairly if we are to get away from politics as usual. Americans are ready for a change. Let us be sure the change is fair.

What is clear is that tax rates are too high. By discouraging work effort, saving and investment and risk taking, these expenditures impart a consumption-oriented antisaving bias to the economy. This bias is not in accord with faster economic growth.

I am in full accord with the Republican report of the Joint Economic Committee on the 1981 Economic Report of the President. Across-the-board personal marginal income tax reduction, as well as tax cuts for business, will increase productivity and real growth substantially and will not increase inflation.

Without a doubt, tax reductions will stimulate growth. I realize, however, that direct inflationary impacts cannot be precisely calculated.

On the demand side, personal income tax rate cuts will stimulate spending and could thereby add to inflationary pressures. On the supply side, personal marginal tax rate cuts will impel additional work effort and production, and thereby operate to slow the rate of rise of prices.

The question is which of these effects dominates. It is our view that the

supply effect does. In addition, we want to stress that our fiscal policy program calls for spending cuts—which may reduce demand somewhat. These incentives, which are aimed at substantially reducing the marginal tax rate on savings income, will help shift individual activities toward saving and away from consumption. Consequently, we can expect an extra large part of the personal tax cut and the income it generates to be used to increase saving and investment as opposed to consumption.

I am aware that some detractors from the President's program are claiming that across-the-board personal marginal tax cuts are unfair; that they will cut the taxes of the rich too much and the taxes of the poor too little. In fact, they will scale down all tax rates, and the scale is the same for all individuals.

In this regard, it is important to recognize that, since 1967, inflation-induced bracket creep has greatly increased the tax burden of middle- and upper-income persons despite some legislated tax cuts. It would be wrong from the standpoint of equity, as well as counterproductive from the standpoint of the economy, not to correct past bracket creep by scaling marginal tax rates down across the board.

Mr. President, I ask unanimous consent that pertinent data on tax rates be printed in the RECORD.

There being no objection, the tax rates were ordered to be printed in the RECORD, as follows:

TAX RATES ON SAME REAL TAXABLE INCOME,[1] 1967 AND 1980

	1980 equivalent inflation adjusted taxable income	Marginal percent tax rates		Average percent tax rates	
		1967	1980	1967	1980
1967 taxable income:					
$1,000	$2,245	15	0	14.0	0
$4,000	8,890	19	18	15.5	9.8
$8,000	17,960	22	24	17.3	15.3
$12,000	26,940	25	32	18.8	19.5
$16,000	35,920	28	43	20.4	23.6
$20,000	44,900	32	43	21.9	27.5
$24,000	53,880	36	49	23.2	31.0
$28,000	62,860	39	54	25.4	33.8
$32,000	71,840	42	54	27.1	36.3
$36,000	80,820	45	54	28.7	38.3
$40,000	89,800	48	59	30.4	40.1
$44,000	98,780	50	59	32.0	41.8

[1] For married persons filing joint return.

Note.—Across-the-board marginal tax rate cuts will tend to restore the progressivity of the tax code which existed in 1967 before inflation distorted it.

(Mr. WALLOP assumed the chair.)

Mr. ABDNOR. Mr. President, President Reagan has proposed a wide range of spending cuts to accompany the tax cuts. It should be understood that a stagnating economy allows few significant cuts in Federal spending where that spending is made up largely of entitlement programs.

When the economy stagnates, people become unemployed and real standards of living decline, causing individuals to make claims on Government services. When an individual is employed, he or she is a source of Government revenue; when the person is unemployed, he or she becomes a consumer of Government revenue, through such programs as unemployment compensation, trade adjustment assistance, food stamps, et cetera. Thus, an increase in unemployment reduces Government revenue even as it causes an increase in spending. It is estimated that a 1 percentage point increase in the national unemployment rate "costs" the Federal Government $25 billion per year.

The converse also is true. An expanding economy will provide jobs for the unemployed and higher living standards for many now in need. People will go off unemployment rolls, off food stamps, off welfare, and will become taxpayers rather than tax consumers. Thus, a reduction in tax rates will partially pay for itself by causing automatically a reduction in Federal spending.

We are at a critical juncture in moving the President's proposals through Congress. I would stress the importance of the need for all of us to reexamine the need for expenditure cuts. If all of us bear some fair share of these reductions, then they can be made. However, it is not fair to reduce benefits for the farmer and for rural America unless urban Americans also have some of their benefits scaled back. We all must make adjustments and I completely support the administration's efforts to fairly apportion those adjustments.

A word on the importance of curbing Federal budget deficits: When the Federal Government spends more that it receives in tax revenues, the deficit incurred must be made up by borrowing from the public. In other words, the U.S. Treasury directly competes with the private sector investor for available capital funds.

If the Federal Reserve Board holds the money supply constant, then the demands of Government directly crowd out investors and lead to a decline in economic activity and unemployment. If the Federal Reserve increases the supply of money simply to accommodate the needs of the Treasury—this is called monetizing the debt—then prices rise because there has been no increase in productive output. Inflation is "too much money chasing too few goods," and it is encouraged by Federal deficit spending.

Some argue that Government deficits play no role in inflation. Rather, OPEC and big oil companies and the American farmer—just to mention a few—are blamed for oil and food price shocks to the economic system. This shock explanation would have us believe that an increase in the price of one good will increase the level of all prices. If the supply of money is constant then consumers will shift their purchases from relatively expensive, to relatively cheap items. If, however, the money supply increases simply to accommodate the shock, then a general increase in the price level occurs because no new increase in production has occurred. A partial cure for inflation calls for an end to continuous Federal deficits and thus a decrease in the pressure on the Federal Reserve to add to the money supply.

The President's program for economic recovery also includes regulatory reform. On- and off-budget Federal borrowing has inexorably increased Federal Government domination over the Nation's resources. The same is true of Federal off-budget or regulatory activity. In just 15 years, the regulated sector of the economy has increased from roughly one-tenth to about one-fourth of GNP.

The regulatory mandates which have driven this extraordinary growth of regulatory activity impose both direct or compliance, and indirect costs on the economy. From the evidence available, compliance costs are currently running at more than $100 billion per year. The indirect costs—while difficult to measure—include higher product prices and reduced output and employment growth because of the necessity of meeting regulatory initiatives. Whatever the magnitude of these costs, they represent a hidden cost of regulatory mandates; a hidden cost whose effects include the displacement of discretionary, private spending.

There is little doubt that regulatory mandates generate benefits. However, the direct and indirect costs of securing these benefits ought to be minimized. This is nothing more than good economics and commonsense. To achieve this result will require that, in general, least-cost methods of achieving regulatory goals be sought.

I will close my remarks with a few summary words. Supply-side economics holds that the supply of both labor and capital to the marketplace is determined by their real, aftertax returns. A rise in tax rates induces workers to seek less work and induces investors to seek not necessarily productive tax shelters. Assured across-the-board tax rate reductions would reverse these effects by restoring the work incentive of increased real aftertax earnings and by restoring the investment incentive which would stimulate economic growth and job creation.

Expenditure cuts must be borne by all, fairly and squarely. The administration must be very sensitive to the needs of that most productive sector in America, the farming sector. In helping other members of society, we must not unfairly burden the farmer whose productivity is unparalleled and small business which provides more jobs than any other sector of the economy.

These supply-side inducements are necessarily complemented by a stable monetary policy. We cannot have a strong eccnomy in the absence of a strong dollar. And of course, we must work to reduce unnecessary regulatory costs.

Mr. President, we are a turning point in our Nation's economic history. We can choose the muddle of policies of the previous administration; economic policies that have locked Americans into public welfare programs and sapped American industrial efficiency or we can choose the President's program for economic recovery.

Mr. President, I stress that this improvement will not happen overnight. It took years to get into our present circumstances and it will take years of steady, sound economic initiative to get beyond them. I support the President's program because I believe it charts the

course to a better future for all Americans.

Mr. President, as I spoke today, I do so with the support of most of my constituency. In fact the South Dakota State Legislature has passed House Concurrent Resolution No. 1029 which calls on the Congress to support the President's economic passage. I ask unanimous consent that the resolution be printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

HOUSE CONCURRENT RESOLUTION No. 1029

A concurrent resolution, Memorializing Congress to support the economic programs presented by the President on February 18, 1981.

Whereas, the continued policy of deficit spending has had a devastating effect upon the economy which has resulted in a serious constriction of projected revenues in South Dakota; and

Whereas, we recognize that there should be a complete change in direction and philosophy of federal spending, taxation and regulation; and

Whereas, although President Reagan's economic package will include cuts that directly affect the state of South Dakota and its ctiizens, we agree that the long range effects of the President's economic package will have lasting benefits far greater than any short-term gains from continuing the expansion of federal spending, taxation and regulation:

Now, therefore, be it resolved, by the House of Representatives of the Fifty-sixth Legislature of the state of South Dakota, the Senate concurring therein, that we support the economic program as presented to Congress on February 18, 1981 and urge the Ninety-seventh Congress to support the President's program through proper legislative process; and

Be it further resolved, that the Chief Clerk of the House of Representatives be instructed to forward this resolution of support to the President of the United States and to the members of the South Dakota Congressional Delegation.

Mr. ABDNOR. In closing, Mr. President, I certainly wish to commend the Budget Committee which has done such an outstanding job and put in such long hours. Certainly they deserve a great thank you.

Mr. ZORINSKY. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. MATHIAS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MATHIAS. Mr. President, I ask unanimous consent to address the Senate for not more than 15 minutes on the subject of the commemoration of the 347th anniversary of the founding of the State of Maryland.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MATHIAS. I ask further unanimous consent, Mr. President, that since we are, today, particularly, honoring the memory of a great American, John Hanson, who was an American of Swedish ancestry, during my remarks, the Ambassador of Sweden, Count Wilhelm Wachtmeister, may be invited to enter the floor.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

A TRIBUTE TO JOHN HANSON: MARYLAND DAY 1981

Mr. MATHIAS. Mr. President, it has been my custom each year to observe Maryland Day, the anniversary of the founding of the great Free State of Maryland, by calling attention to an event or person prominent in Maryland history. In reflecting on this custom while preparing for today's 347th anniversary, it occurred to me that even if I were fortunate enough to outlive my allotted three score years and ten, there still would be far too few Maryland Days for me to pay adequate tribute to Maryland's illustrious past and the inspiring men and women on Maryland's lengthy roll of honor. If this be a problem, however, it is the type of problem I enthusiastically welcome—a surfeit of heroes, leaders, patriots, men and women of distinction.

Who, then, among the honored sons and daughters of the Free State was to be my subject for today? The choice was clear—John Hanson—for in this year of 1981, we will commemorate the bicentennial of his election as the first President of the United States in Congress Assembled.

John Hanson was the grandson of one of our Nation's original Swedish colonists, also named John Hanson, who, with his three brothers, sailed as wards of the Crown of Sweden in the care of Johan Printz to New Sweden on the Delaware, landing in New Gothenborg in February 1643. Later, the family moved inland and finally settled in Charles County, where John Hanson was born in 1715. History tells us that he was "tall, dignified and reserved—a man of principle," that he had "wealth and high social standing," that he was thoroughly educated.

As a representative of Charles County in the provincial Lower House of Assembly, Hanson "soon ranked with the Chases, the Tilghmans, and the Carrolls in the distinguished regard of his fellow citizens," according to one biographer. That is impressive company, indeed. In fact, today we would say that he was one of the heavyweights of the Assembly. In 1773, Hanson moved to Frederick County, a section favored by emigrants from Germany, Switzerland, and Great Britain. Accounts of this period of Hanson's life contain some of those truly delightful passages which one comes upon when perusing history. For instance, here is one from a booklet on John Hanson written by Douglas Thomas, of Baltimore, and published in the 1890's:

Being a hardy, independent race, they (the Frederick Countians) were naturally impatient under the oppressive legislation of the British Government, and though peaceable in nature, and slow to violence, were tenacious of their rights and determined to assert them at all hazards.

As a native of Frederick County, I like that description—peaceable in nature but tenacious of their rights.

All that, of course, was approximately 200 years ago. And 200 years is obviously a long, long time. In fact, although I delight in events such as our Nation's Bicentennial and post-Bicentennial observances, I will admit, reluctantly, that my basic image of John Hanson is somewhat colored by what I see when I pass the bronze statue of him in the corridor outside this Chamber. As you view the statue of John Hanson, he looks somewhat old-fashioned; his tricorn hat and his buckled shoes seem quaint. But the issues and problems he faced were not dissimilar to the issues and problems of today. For today's discussion, therefore, let us bring John into the 20th century. Let us fit him with new shoes—loafers, perhaps—and let us look at some of those issues and problems.

In 1769, Hanson was one of the strongest advocates of a nonimportation system inaugurated by the colonists as a result of grievances against Britain. In this year of 1981, do we not have our trade embargo against the Soviet Union as a result of grievances?

In 1774, Hanson was chairman of a committee which sent 200 pounds sterling to Boston for the relief of the poor of that city after normal commerce had been interrupted as a result of the passage of the Boston Port bill. Aid to cities; aid to the poor; we see articles about them practically every day on the front page of the Baltimore Sun.

The year 1775 found Hanson active in efforts to obtain guns and ammunition. If John Hanson were here today, I am sure we could swap tales about our efforts to provide for the common defense as if the centuries between us had never occurred.

Also in 1775, in addition to trying to obtain guns and ammunition, John Hanson worked as a member of a committee formed to establish a gunlock factory in Frederick. An economic development project, obviously.

I shall not belabor this train of thought. The point I am leading to is this: That John Hanson, confronted with problems common to his day and ours, handled these problems in a manner uncommon to his day and ours. Such is the stuff of leadership. Events pass; people pass. Leadership endures. As we look more closely at the life of this man whose problems were so like ours, this point is worth remembering.

Hanson began his public career in the 1750's in the Maryland Assembly, where he first represented Charles County and, later, Frederick County.

In 1769, Hanson was one of the first to sign the nonimportation agreement which I mentioned previously. Then, in October, there came an occasion on which he was called upon to put up or shut up, as we would say. Several packages of goods had been landed in Charles County in violation of the terms set by the nonimportation society. Under Hanson's leadership, the county's advocates of the nonimportation policy forced the

owners to send the goods back to England—and, most importantly, Hanson and his colleagues acted openly and fearlessly.

Several years later, in 1773, Hanson moved to Frederick County where, according to the Thomas biography, "his honesty inspired universal respect and confidence, and his singularly vigorous and well-balanced mind made him a leader among men."

The Boston Port bill was passed the following year. This was designed to cut off all commercial dealings with Boston, and immediately Marylanders took sides with Massachusetts. A meeting of the citizens of Frederick, with Hanson presiding, was held at the courthouse on June 20. Hanson; his son, Alexander Contee Hanson; and another gentleman, Philip Thomas, were appointed as delegates to the "General Congress at Annapolis." They were also selected as members of the "Committee of Observation to receive and answer all letters, and in any emergency to call a general meeting."

When the Committee of Observation was actually organized, Hanson was made chairman, and he served in this capacity until the State government was established and the committee abolished. It was during Hanson's service as chairman that the funds for the poor were sent to Boston—an action acknowledged appreciatively by Samuel Adams of that city.

When the "General Congress," or Convention of Maryland, assembled in Annapolis on June 22, 1774, John Hanson was present as a delegate from Frederick County. Later in the year, when Frederick Countians met to appoint new committees, Hanson was chosen a member of the "Committee to represent the County to carry into Execution the Association agreed on by the American Continental Congress," and was also made a member of the "Committee of Correspondence for the County." The list of the important positions to which Hanson was selected continues, almost too lengthy for repetition. In fact, he seems to have faced the same type of proliferation of committee assignments that we in the Senate have experienced, too.

As the threat of conflict increased, the citizens of Frederick County responded. Gunpowder, arms, ammunition, and other military provisions were assembled. Persons capable of bearing arms were enrolled for duty. Among the leaders in these actions, once again, was John Hanson. Then came June 17, 1775—Bunker Hill.

The echoes of the shots fired at Bunker Hill had scarcely died when, at a meeting of the Committee on Correspondence in the Frederick Courthouse, Hanson read a letter he had received from the Maryland Delegates in Congress. In the letter, the county was called on to supply two companies of expert riflemen to join the army in Boston. In less than a month, the two companies marched from Frederick; 22 days and 550 miles later, they became the first troops from the South to join Washington.

The Convention of Maryland assembled on July 26, 1775. With John Hanson an active participant—a boldly and fearlessly active participant, according to one account—the Convention issued its Declaration of Independence, known as the "Association of the Freedom of Maryland." Force would be repelled by force. The "present opposition" would be supported. Among the signers was Hanson.

Under the powers of the "Association of the Freemen of Maryland," all of the power of government was vested in the Provincial Convention, composed of five delegates from each county. The convention, in turn, elected a Committee of Safety. This committee was assigned executive power, and, in addition, jurisdiction over military matters.

Again came a series of committee positions for Hanson—Committee on Observation, Provincial Committee for Licensing Suits, Committee for the Building of a Military Jail, or Barracks, in Frederick Town, and others. During Hanson's chairmanship of the Committee on Observation, the conspiracy of the British and Indians in Canada against the western frontiers of Maryland, Virginia, and Pennsylvania was discovered and thwarted.

We come now to 1776. Responding to a call from the Members of Congress for an expression of sentiment on independence, the citizens of Frederick County, with Hanson in a typical leadership role, unanimously resolved the following:

Resolved, That what may be recommended by a majority of the Congress, equally delegated by the people of the United States, we will, at the hazard of our lives and fortunes, support and maintain . . .

The Frederick resolution was, to a large extent, the basis of the resolution adopted by the Convention of Maryland on June 28, and on July 4, 1776, the Maryland Delegates in Congress voted with the other colonies for independence.

Later in the year, Hanson was appointed to a commission to reorganize the military commands in Maryland. And as the year drew to an end, the Convention of Maryland adopted the Declaration of Rights and Constitution of Maryland. Under the new constitution, Maryland set up a new government including a legislature with a senate and house of delegates. Subsequently Hanson was elected to the Continental Congress by the Maryland Assembly. His role in Congress was critical to the future of our new Nation. By February of 1797, all of the States except one had signed the Articles of Confederation. The sole holdout was Maryland. According to Prof. William F. Swindler, professor of law, emeritus, at the College of William and Mary, "Maryland's opposition went to the most fundamental of the issues hampering the birth of the Nation—the Western lands." Maryland, with Hanson among the leaders in the fight, held firm to the policy that the lands beyond the natural geographic boundaries of the States should be ceded to the United States for the benefit of all. Virginia and other "landed" States disagreed, pressing their claims to the land. Again I quote Professor Swindler:

When Virginia finally gave in to Maryland's insistence, early in 1781, the last obstacle to ratification of the Articles of Confederation was removed. By February the unanimous adoption of the new frame of government was certified, and one month later the new government formally came into being. There were no stirring speeches, or anything to mark the event at the time. The Congress continued as it had before, although the community celebration outside the legislative halls made up for the prosaic course of business within. John Paul Jones' warship, the *Ariel*, fired off salutes in the harbor, and these were answered by fireworks from the city. The evening was filled with receptions, dinners, and "collations" in celebration.

It had taken three years of effort to achieve the adoption of the Articles of Confederation. They would last for eight more.

That was in March. In November—on November 5, to be exact—Hanson was elected President. He served for a year, until sickness prevented him from discharging his duties, and in 1783, he died while visiting a nephew in Oxon Hill, Prince Georges County.

The compatriots of John Hanson honored him by electing him our first President under our first Constitution. His election under the Articles of Confederation predated the election of George Washington by 8 years. If George Washington is the father of our country, then John Hanson is the grandfather.

Today we honor him with speeches and a wreath.

In the days to come there will be new remembrances and greater honors, for John Hanson belongs neither to our Nation's early days alone nor to the contemporary context within which we considered him here; he belongs to that select domain of great leaders which is timeless and ageless.

Hanson left us a priceless and diverse legacy—patriotism, service, dedication to duty. More than these, though, he left us an imperishable example of personal integrity. When he and his associates signed the nonimportation agreement, they bound themselves to their decision "by the sacred ties of honor and reputation * * *."

By honoring John Hanson today, we are reaffirming to ourselves and our fellow countrymen that the concepts of honor and reputation, battered though they may be at times, persevere today as part of the heritage we are dutybound to cherish, to use wisely, and to pass along to future generations.

I offer a bill to provide for the issuance, by the U.S. Postal Service, of a stamp in honor of John Hanson. I have written to the Postmaster General and to the Citizens' Stamp Advisory Committee about this matter, and I ask unanimous consent that my letters be included in the CONGRESSIONAL RECORD at the end of my remarks since they include additional material about John Hanson—especially about his service as President of the United States in Congress Assembled—which, in the interest of time, I have omitted from this statement.

A bronze medal in honor of Hanson is already being readied for issuance this year, and a Hanson commemorative stamp would be an appropriate complement to the medal. The medal will be issued by the U.S. Capitol Historical So-

ciety, operating under the authority of the Congress. It will be the fourth in a series of medals which are being brought out on an annual basis so that the issuance of the last, in 1989, will coincide with the 200th anniversary of the year in which the Constitution became effective. The first three medals in the series commemorated George Washington and the Battle of Yorktown, John Paul Jones and his ship, the *Bonhomme Richard*, and James Madison, our Nation's fourth President who is widely known as the Father of the Constitution. The sculptor of the Hanson medal is Miko Kauffman, and it is being produced by a firm in Connecticut. No date of issuance has been set, but the medal will eventually be distributed to collectors of the series and to other interested parties through the Capitol Historical Society.

In conclusion, I want to mention in a particular way two of the various sources I used in preparing these remarks—"John Hanson, President of the United States in Congress Assembled, 1781–1782," by Douglas H. Thomas, of Baltimore, and "John Hanson, First President of the United States Under the Articles of Confederation," by Dr. Amandus Johnson. In general, I relied on their accounts of Hanson's activities. If there are historians who disagree with their presentations and interpretations, I would like to explain again that my purpose in these remarks, as I have stated, has not been to scrutinize and debate over the events in which Hanson participated but rather to focus on the common thread of his leadership which can be seen in them all and which binds them together into the story of the life of a great patriot. The biography by Douglas Thomas published and distributed in the 1890's, was instrumental in having Hanson selected as one of the two Marylanders to be honored in accordance with an act of Congress, in 1864, authorizing each State to place two statues of honored sons or daughters in the Capitol (the other is Charles Carroll of Carrollton, one of the three Maryland signers of the Declaration of Independence). A copy of the booklet is in the Rare Books and Special Collections Division of the Library of Congress. The other biography, by Dr. Amandus Johnson, the outstanding Swedish-American historian, lecturer and author of books and articles on the history of Swedes in America, contains a great deal of information about Hanson's ancestry and about the controversy over whether he was truly "president."

Dr. Johnson founded the Swedish Colonial Society in 1908 and was instrumental in the establishment of the American Swedish Historical Foundation and Museum in Philadelphia. Let me add a couple of reminders at this point. It was the Swedish Colonial Society which donated the bronze bust of John Hanson which surmounts the seven-sided monolith of black Swedish granite at Gloria Dei (Old Swedes) Church in Philadelphia; the monolith itself was the gift of the Vasa Order of America in Sweden. There is also a permanent monument to Hanson at his birthplace in Mulberry Grove, Calvert County, and this was erected by the Vasa Order of America.

Back to Dr. Johnson's booklet: As I was saying, the publication by Dr. Johnson as well as the booklet by Douglas Thomas are interesting publications about an interesting man, and I acknowledge the assistance they were to me in the preparation of these remarks.

At this point, Mr. President, I ask to have printed in the RECORD letters on this topic, beginning with the most recent.

I send to the desk on behalf of myself and my distinguished colleague from Maryland (Mr. SARBANES) the bill to provide for the issuance of a postage stamp to commemorate the 200th anniversary of the election of John Hanson of Maryland as the first President of the United States in Congress assembled. I ask for its appropriate reference and I ask unanimous consent that it be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 797

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, that the Postmaster General shall issue a commemorative postage stamp to honor the 200th anniversary of the election of John Hanson of Maryland as first President of the United States in Congress Assembled.

SEC. 2. The commemorative postage stamp issued under this Act shall be issued in the denomination used for first-class mail up to one ounce in weight and shall bear such designs as the Postmaster General shall determine.

SEC. 3. The commemorative postage stamp issued under this Act shall first be placed on sale on November 5, 1981, the 200th anniversary of John Hanson's election as President of the United States in Congress Assembled, and shall be sold for such period thereafter as the Postmaster General shall determine.

The PRESIDING OFFICER. Without objection, the bill will be received and appropriately referred.

Is the Senator requesting that the other information he spoke of be printed in the RECORD?

Mr. MATHIAS. I further ask unanimous consent that the letters accompanying my statement be printed in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

MARCH 4, 1981.

Hon. WILLIAM F. BOLGER,
Postmaster General,
U.S. Postal Service,
Washington, D.C.

DEAR MR. POSTMASTER GENERAL: Today I am sending this letter to you and to the Citizens' Stamp Advisory Committee. On November 30, 1781, George Washington wrote to John Hanson: ". . . I congratulate you on your appointment to fill the most important seat in the United States."

What Washington saw fit to recognize in the full awareness of contemporary history, our modern United States Postal Service, two centuries removed from its own and our Nation's beginnings, has thus far neglected. It is not too late to remedy the omission. Memories fade; enthusiasms wane; history dims. The facts of history, however, endure and it is our duty today to dispel the haze of time and illuminate those aspects of our Nation's history which are our heritage and our inspiration.

What better way to honor the service of John Hanson—the first President under the Constitution—than to call his service to the attention of the Nation through the issuance of a commemorative stamp in this bicentennial year of his election as President of the United States in Congress Assembled?

The time is eminently appropriate. We hear today of new beginnings. How fitting it would be to turn again in a special way to our first new beginnings. We hear much today of the need for qualified men and women of honor to seek public service despite our troubled times. John Hanson remains a continuing exemplar. The spirit which renewed our Nation as we prepared for and observed its bicentennial lingers. If stamps in honor of Sybil Ludington, Youthful Heroine; Salem Poor, Gallant Soldier; Haym Solomon, Financial Hero; and Peter Francisco, Fighter Extraordinary, helped bring us closer to the cessation of our ties with England, a stamp in honor of Hanson would surely take us back in thought and spirit to our subsequent fledgling days as a sovereign nation.

In addition to the stamps I have just mentioned, I have seen stamps in honor of Dolley Madison, Adolph S. Ochs, Sidney Lanier, Henry David Thoreau, Walt Disney, W. C. Handy, John Steinbeck, W. C. Fields, and Jimmy Rodgers, Singing Brakeman. I do not question their worthiness. I have also seen stamps in commemoration of Everett Dirksen, who was my friend and colleague, and Frances Perkins. Again I do not question their worthiness. I thoroughly understand why each is on the list of honorees. What I do not understand when I review these individuals is why John Hanson has not yet been added to their number.

My interest in a Hanson commemorative stamp is not new. As your files will show, I have written to you at length on this important matter. Copies of my previous correspondence are enclosed for your information. I will not repeat the arguments contained therein, but I urge you to reread my previous letters. I will, however, emphasize these points: (1) that when John Hanson was elected in Independence Hall two centuries ago, he became the first President elected under and according to our first Constitution and the head of Sovereignty of the United States, and (2) that in this anniversary year, the significance of Hanson's election and service should be given appropriate recognition through the issuance of a commemorative stamp.

Recently I saw a fairly new stamp in honor of Philip Mazzei, "Patriot Remembered." I am sure that you and the Citizens' Stamp Advisory Committee will not relegate John Hanson to the ignominious category of "Patriot Forgotten."

With best wishes,

Sincerely,

CHARLES MCC. MATHIAS, JR.,
U.S. Senator.

OCTOBER 9, 1980.

THE CITIZENS' STAMP ADVISORY COMMITTEE,
U.S. Postal Service,
Washington, D.C.

GENTLEMEN: The 200th anniversary of the Declaration of Independence was the highlight of the Bicentennial Era, and its celebration stimulated considerable public interest in the signers of that document and the events of the period. In 1989, another national celebration will mark the 200th anniversary of the adoption of the Constitution of the United States.

It is fitting that we also commemorate and focus the public's attention on the events of the fateful years between—events that transformed 13 independent colonies into one united nation—and on the leaders who kept

government strong at a time when its breakdown would have made the revolution fail. The adoption of the Articles of Confederation and election of John Hanson as President was an event of momentus significance, for it marked the first time the American colonies were united under a written constitution with a head of state. We were for the first time truly free and independent, and so considered by the governments of Europe. For the first time we were a nation.

When representatives of the colonies met for the first Continental Congress in 1774, they sought conciliation with the King, and had no intention to seek independence or to form a permanent union with one another. As hope for harmony with the King faded, the colonies began to separately declare themselves to be "free and independent states," and they so remained until adoption of the Articles of Confederation in 1781, when the structure of the new republic had been completed and its first constitution went into effect.

In my previous letters of April 14 and May 7, I have touched briefly on some of John Hanson's achievements, which were of momentous importance in uniting the states as one American nation. In the later years of the Revolutionary War, when victory seemed within grasp the 13 colonies began laying vast claims to lands outside their immediate boundaries. These claims led to heated territorial disputes among the states that threatened to dissolve into armed conflicts. Wars among the independent states at that time would no doubt have greatly altered the structure of our government, and indeed may have altogether prevented the founding of the United States. By insisting that all states renounce their claims to additional territories, John Hanson, as leader of the Maryland delegation and respected statesman of the Continental Congress, performed a unique and great service by bringing about harmony among the states that made possible their agreement to unite as one nation.

The colonies did finally agree, after much discussion, on one constitution by which all would be governed, and in 1781 the Articles of Confederation were adopted. John Hanson was elected President and was the first to serve as chief of state, rather than as a temporary presiding officer of the Congress.

He was recognized as the highest official of the land, and it was to him that foreign dignitaries paid their respects when travelling in the new world. During his term of office, for the first time a national government structure was formed. A Department of Foreign Affairs was established, a national Judiciary was created, a Secretary of Marine (Navy) was appointed, the offices of Secretry at War and Superintendent of Finance (Secretary of the Treasury) were instituted, and a national system of taxation was proposed. The Consular Service was originated, the Bank of North America was founded, the national post office was organized, and a special Seal of the United States was adopted. In other words, a functioning national government became a reality.

Some years later, in the effort to form "a more perfect union," a new Constitution of the United States was written and adopted in 1789. That Constitution has survived to this day. It retained many of the provisions of the Articles of Confederation, its predecessor. The first to be elected by his colleagues to serve as President under the new constitution was, of course, Gen. George Washington. His was a unique and important horor, to be sure, but it is important also that we honor the men who filled the highest office under the original constitution, and whose leadership and dedication preserved and advanced the principles which endure to this day.

I hope that we can properly focus attention on this important historic event by issuing a stamp to commemorate the bicentennial of John Hanson's presidency under the Articles of Confederation. The Hanson home in Frederick has been named to the national register of historic places, and his statue stands in Statuary Hall in our nation's Capitol. In these bicentennial years, it is fitting also that a stamp be issued to commemorate this great patriot and his service in helping to found this nation.

I respectfully urge your favorable consideration of the proposal which is pending before you.

Sincerely,

CHARLES McC. MATHIAS, Jr.

MAY 7, 1980.

Hon. WILLIAM F. BOLGER,
Postmaster General,
U.S. Postal Service,
Washington, D.C.

DEAR MR. POSTMASTER GENERAL: I appreciated very much your prompt response to my letter urging issue of a stamp to commemorate the 200th anniversary of John Hanson's presidency.

We are now in the period between the bicentennial of the Declaration of Independence in 1976 and the bicentennial of the adoption of the Constitution in 1989. During this period 200 years ago the statesmanship of men like John Hanson was crucial to resolving the differences among the separate states and leading them to become "United States" under the Constitution.

Yet those men who helped forge that union have remained largely unsung heroes. By recognizing the men and events of these interim years, we can help to remind the public of the relationship between the two bicentennial celebrations.

I remain hopeful that the Citizens' Stamp Advisory Committee will find it possible to help honor this great Swedish-American patriot who was our nation's first head of state.

Sincerely,

CHARLES McC. MATHIAS, Jr.

APRIL 14, 1980.

Hon. WILLIAM F. BOLGER,
Postmaster General,
U.S. Postal Service,
Washington, D.C.

DEAR MR. POSTMASTER GENERAL: Because of my longstanding interest in our American heritage and my interest in John Hanson, I very much hope that a stamp can be issued to commemorate the 200th anniversary of Hanson's presidency and to honor his vital contributions to our nation.

As you may know, John Hanson, of Frederick, Maryland, led the Maryland delegation to the Continental Congress. He was held in great esteem by the members of that historic body and was elected the first president of the states assembled under the Articles of Confederation. That formative period between the Revolutionary War and the adoption of the Constitution was a volatile one. Had it not been for the strong and wise leadership of John Hanson, disputes that arose among the states might well have dissolved into conflicts that would have prevented the union of the states under the Constitution of the United States.

Every school child knows that the first President elected under the Constitution was George Washington, but the importance of John Hanson's leadership as the first President under the Articles of Confederation has been much less well known and is deserving of our recognition.

Mr. Erik Tornqvist, Governor of the Swedish Colonial Society, has provided the Citizen's Stamp Advisory Committee more detailed information about the crucial role of John Hanson in unifying our new nation. I heartily endorse the proposal for a stamp in his honor, and urge your favorable consideration.

Sincerely,

CHARLES McC. MATHIAS, Jr.

Mr. SARBANES. Will the Senator yield?

Mr. MATHIAS. I am happy to yield to my distinguished colleague.

Mr. SARBANES. Mr. President, I am pleased to join the senior Senator from Maryland, my distinguished colleague (Mr. MATHIAS), in introduction of this bill. I am pleased also to join him in commemorating Maryland Day and recognizing the enormously significant contributions made to our State and Nation by John Hanson, one of our outstanding Revolutionary War leaders and the Nation's first President of Congress under the Articles of Confederation.

Born at Mulberry Grove, near Port Tobacco, of Swedish descent, in April of 1715, John Hanson lived in Charles County until 1777 and represented his county during this period in the assembly for several sessions.

In 1773, he moved to Frederick County, where he was to make his home for the rest of his life.

Frederick County is the home county of our distinguished senior Senator, Senator MATHIAS, so, in a sense, there is a clear line of descent in terms of public officials of that great county from John Hanson down to Senator MATHIAS.

While living in Charles County, John Hanson assumed the leadership of the opposition to the Stamp Act. He strongly advocated the nonimportation agreement in 1769. After he moved to Frederick County in 1773, he led the movement in that part of our State for testing the closing of the Port of Boston.

Shortly thereafter, he was appointed a delegate to the Convention of Maryland as well as a member of the Committee of Observation.

In 1777, Congress submitted the Articles of Confederation to the legislatures of each State for ratification. Within a year and a half, all the States had ratified the articles except Maryland, which refused to do so until those States which claimed lands in the Northwest Territory should surrender their claims, Maryland's position being that only Congress had the sole right and power to determine the western boundary of those States which possessed land claims. Maryland insisted that the Northwest Territory should become the common property of the United States, subject to be parceled out by Congress into free, convenient, and independent governments.

Led by John Hanson, who in 1779 had been elected to the Continental Congress, Maryland persisted in its demands, until finally Congress yielded and recommended that all States with western land claims cede them to the Confederation. After the adoption of the Maryland plan, the Articles of Confederation then became operative, when John Hanson and Daniel Carroll signed the document.

On November 5, 1781, 200 years ago, John Hanson was elected President of the United States in Congress Assembled. He served until April of the following year, when increasing ill health forced him to become inactive.

After General Washington's victory over Cornwallis at Yorktown, John Han-

son presented Washington to the Congress on that auspicious occasion.

Mr. President, as my distinguished colleague has pointed out, Maryland has had many, many important and significant historical figures who have contributed to the building of the Republic. Today, which marks the 200th anniversary of John Hanson being the first President of the United States in Congress Assembled, is a particularly significant occasion, and we are honored that the Ambassador of Sweden is here with us on this occasion.

In 1902, the State of Maryland selected John Hanson to represent our State with a statue in the National Hall of Fame, and that statue stands literally right outside the center door of the U.S. Senate. In fact, we pass by it every time we assemble and proceed to the House of Representatives for a joint session of Congress, with John Hanson staring down at us with forbearance and understanding and tolerance, which always has characterized our State, and with the vision which he brought to the problems of his day.

So I am very pleased to join Senator MATHIAS today in honoring Maryland Day and in honoring John Hanson.

I thank the Senator for yielding.

Mr. MATHIAS. Mr. President, I thank my distinguished colleague for his thoughtful remarks and for his historical review. I also appreciate his generous thoughts with respect to Frederick County, my native county, and his charitable thoughts with respect to me—all of which are much appreciated.

I point out that the measure which has been introduced by Senator SARBANES and me has its counterpart in the other body, in a bill introduced by Representative HOLT; and I urge Members of the Senate to act upon that measure very promptly.

I might even urge the Postmaster General to act on his own initiative and to issue this stamp promptly, which would make it more economical and more efficient than going through the rather cumbersome legislative process of ordering it done by statute.

Mr. SARBANES. Mr. President, will the Senator yield?

Mr. MATHIAS. I yield.

Mr. SARBANES. I suggest that if the Postmaster General were to do so, it would show a sensitivity to the history of our State and country which would be highly commendable.

Mr. MATHIAS. I agree.

Mr. President, I take this opportunity to welcome the Ambassador of Sweden, who has entered the Chamber pursuant to the order of the Senate.

I believe it is a mark of his high degree of sensitivity that he has joined up today for this event. He is certainly one of the most distinguished of the ambassadors to serve in Washington.

My acquaintance with Count Wachtmeister goes back prior to his arrival here as Ambassador. I had occasion to meet him in Stockholm at a time when the United States was much worried about our prisoners of war in Vietnam; and through his efforts and those of his countrymen, we were able to take first steps toward alleviating the conditions under which American prisoners of war were held. For that, we shall be grateful to Sweden and particularly grateful to Ambassador Wachtmeister.

We are pleased, also, that his wife, Countess Wachtmeister, has joined us for the ceremonies in connection with this commemorative day of Maryland. She has contributed enormously to the cultural life of Washington during the years they have lived here. I am happy that both of them are able to be in the Capitol and to join us today.

Mr. SARBANES. Mr. President, I join my colleague in his expressions of respect and admiration for Ambassador Wachtmeister in the superb representation he has provided his country and in being a very close and true friend of our country. We are honored that he and Countess Wachtmeister have taken the time to join us today on this occasion.

SENATE CONCURRENT RESOLUTION 9

Mr. GRASSLEY. Mr. President, I wish to speak in support of the second concurrent resolution on the budget (S. Con. Res. 9) as reported by the Senate Budget Committee on March 23, 1981, the contents of which are more fully described in Senate Report No. 97–28. The bill is not perfect; little that we as a deliberative body undertake to do cannot be improved. We will have a chance to make further refinements when the Senate takes up this measure tomorrow.

I speak in support of the resolution as a recently elected Senator who recognizes that he was elected by the people of the State of Iowa because of their desire to limit spending and the imposition of taxes by the Federal Government.

I speak in support of the resolution as a person who served 6 years in the other body and in that Chamber fought excessive Federal spending. During those 6 years, my side continually lost. The events of recent years, during which time the Nation's economy has declined precipitously, proves that the people of the United States also lost.

For example, the Consumer Price Index, commonly cited as a measure of the rate of inflation, increased by only 6.5 percent in 1977. The CPI increased by more than 12 percent during calendar year 1980.

Finally, I speak as a Member of the Senate committed to making the legislative process and the institutions of Government work, at least until we can make structural improvements. Here, I make reference—in regard to structural improvements—to my desire to provide in the Constitution for a balanced Federal budget.

Until we are successful in that endeavor, we must make use of existing laws and procedures.

In this case, today, we are following the provisions of the Congressional Budget and Impoundment Control Act of 1974.

The effort of the President and the Congress to restrain increases in Federal spending has, at least up to this point, been a useful exercise.

The Budget Committee, of which I am a member, has sent to the floor a resolution that trims $14.7 billion in budget authority and $2.9 billion in outlays from the current fiscal year's budget.

These savings are somewhat lower than the administration requested for fiscal year 1981. Our budget authority reduction is $2.5 billion less than President Reagan proposed; our outlays will total $100 million more this fiscal year. Savings achieved for fiscal year 1982 total $52.1 billion in budget authority and $37.4 billion in outlays.

It is expected that even greater savings will accrue to the taxpayers in the outyears past 1982.

We have given President Reagan virtually everything he has asked for and, in some instances, we have improved upon the administration's suggestions by shaving an additional $2.4 billion in authority and $2.3 billion in outlays for fiscal year 1982.

I say that this has been a useful exercise for a number of reasons. To illustrate this point, it is necessary to compare where we are and what we are doing this year as opposed to just 1 year ago.

In the autumn of 1979, Congress approved spending targets of approximately $548 billion in fiscal year 1980 and $613 billion in fiscal year 1981. In May 1980, Congress, at the request of former President Carter, increased fiscal year 1980 outlays by $16 billion to nearly $566 billion. The former President, as well as his loyalists in the Congress, carried on a much publicized flirtation with a balanced Federal budget for the current fiscal year (fiscal year 1981), and then moved to dump the idea.

Federal spending, in part fueled by double digit inflation and a faltering economy, continued to explode during the summer of 1980 so that, by the end of fiscal year 1980, the former President and the Congress incurred outlays of $579 billion. Last autumn, outlays for the current fiscal year were set at $632 billion. President Carter, in one of his last official acts in office, revised fiscal year 1981 spending projections upward to $662 billion. Incidentally, his new projected deficit was projected to be in excess of $55 billion.

It is against this backdrop of spiraling inflation brought about by uncontrolled Federal spending that President Reagan's budget revisions should be viewed. The Budget Committee's actions must be evaluated in light of the economic calamity awaiting our country unless corrective action is taken. President Reagan seeks to limit Federal outlays to $655 billion this year. This sum, which is 2 percent less than the amount projected by President Carter in his January revision, still is more than $42 billion above what was anticipated just 1 year ago.

The Senate Budget Committee has given President Reagan $2.9 billion in reductions this year, and more significant savings next year. And this fact cannot be overemphasized, but we still are spending much more than even the biggest spenders in Washington thought possible a year and a half, or even 1 year ago.

Just 12 months have brought about a $42 billion increase in expenditures beyond expectations.

The President's initiatives are useful because the frame of reference for discussions on Federal spending has been shifted, both for the immediate moment as well as the foreseeable future, or at least I should say hopefully for the foreseeable future. This became apparent to me in talking with lobbyists and representatives of interest groups.

In the past, it was standard practice for those pleading the case of increased Federal spending for a given program or policy to ask for an increase over and above the rate of inflation. Discussions were prefaced with the comment that "We'll have to have this much just to keep up with inflation and then we'll need an additional amount for our new program." This sort of mentality, the constant add-ons that anticipate a high rate of inflation and a Federal Treasury without limit, has contributed to the economic mess we are in.

Now when I am approached with respect to the Federal budget, the discussion is begun by an indication that "There is some waste in what we are doing" and an admission that "We can live with last year's funding or even a slight reduction." This indicates to me that Americans are reexamining and reevaluating Federal spending in light of the new economic realities, and, more importantly, in light of the mandate of the electoral race in the last election. Programs will operate more efficiently and those things that must be done will still be done.

Mr. President, there is a common misconception among commentators and opinionmakers, who either have not done their homework or are not inclined to report all of the facts, to the effect that the Budget Committee recommendations provide for "meat ax" reductions in social and income transfer programs.

They fail to point out that, although there are indeed reductions from current law or President Carter's budget proposals, total Federal spending for most of these programs will continue to increase.

I will give you the following as an illustration of my point:

If my colleagues will turn to the top of page 106 of the committee report, they will observe a half-page summary of proposed reductions in the disability insurance program within function 600.

The President and the Budget Committee believe that if stricter recency of work standards are applied, then outlays in fiscal year 1982 can be reduced by $124 million.

The baseline figure indicates that, even with this reduction, spending for the disability insurance program will increase by more than $2 billion from $17.447 billion in fiscal year 1981 to $19.491 billion in fiscal year 1982.

This proves the point that many of us have been making as we visit with our constituents back home, namely, that we are not proposing budget cuts; rather, we are asking for restraints in increases.

I tried to emphasize this point in my additional views contained in the committee report where I wrote that:

> The proposed budget reductions included in the revised budget resolution for fiscal year 1981 do not reduce the Federal budget to a level lower than we have had in any previous year. Even with the difficult spending cut decisions we have made, the budget for fiscal year 1982 will be approximately $700 billion, with a deficit of $45 billion. The reductions are merely designed to limit the rate of growth of Government spending from its current growth trend of 16 percent to 6 percent. The budget next year will still be the largest in history.

Mr. President, President Reagan and the members of the Senate Budget Committee have, in light of the economic calamity facing us if we do nothing and adopt a "business as usual" approach, acted responsibly. The facts that document my assertion are contained in the committee report accompanying the resolution.

I regret that some, whom I have made reference to earlier, have portrayed our program for economic recovery as drastic and insensitive, the budget revisions as draconian.

Those who have, over the years, profited from profligate Federal spending, have seized upon the media's "evidence" and I use that term advisedly, and attempted to mobilize their particular constituencies in an effort to undo the work that must be done.

Facts have been distorted and millions of Americans, without direct access to the hard documents containing the President's program and detailing the Budget Committee's deliberations, have been unduly alarmed.

I began my remarks by observing that I speak as a recently elected U.S. Senator. I believe that one of the reasons that I was elected last November was that, during my years as a Member of the House of Representatives, I kept in touch with the people whom I represented in the Congress. I have kept in touch since being sworn in to serve in the Senate. The people do not want a "business as usual" approach. They want an approach to solving the economic problems facing our country. These constituents insist on reductions in size and growth of the Federal Government. The adoption of the second concurrent resolution on the budget for fiscal year 1981 will demonstrate that we have listened and paid attention to the message that has been sent. Expeditious consideration and adoption of this legislation will mark a first step, however tentative, down to the road to economic recovery for our people and the entire nation.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

(Mr. GRASSLEY assumed the chair.)

Mr. TOWER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE RECONCILIATION INSTRUCTION

Mr. TOWER. Mr. President, last November the American people mandated Congress to bring the size and scope of Government back into control and to end the runaway Government spending that has fueled inflation. Last Thursday the Senate Budget Committee acted in compliance with that mandate by unanimously voting to report to the full Senate a reconciliation instruction which embodies President Reagan's proposed budget cuts. This reconciliation instruction is the result of an arduous effort put forth by my colleagues on the Budget Committee to respond to a mandate given by the people of our country—mandate voiced by the majority of Americans to stop Government growth, to balance the budget, to strengthen our national defense, to stimulate the creation of jobs and reduce the tax burden, to reduce and eliminate inflation, and to resurrect our economy from the nadir to which it is now plummeting.

The urgency of our situation is underscored by the expeditious manner in which the Budget Committee has reported to the Senate the reconciliation instruction for fiscal years 1981, 1982, and 1983. In my 20 years in this great deliberating body, I have never seen such unity of purpose and such willingness to place the national good ahead of parochial interests. It is an historic event—one I am proud to be associated with—and I exhort my colleagues to recognize that our failure to preserve the integrity of the President's economic package will unmistakably consign us to a state of precipitous and irreversible economic decline.

I think I would be remiss if I failed to thank the distinguished chairman of the Senate Budget Committee, Senator DOMENICI, for his fairness and perseverance in leading the committee to unanimous agreement on a package of budget rescissions totaling $36.4 billion for fiscal year 1982. This package has the support of Senators from the north and south, east and west; it has the support of Democrats and Republicans, liberals and conservatives; it is representative of the administration's intentions, and most important, it embraces the wishes of the vast majority of the American people.

Now, I am certain the rescission proposals have brought many interest groups to the Capitol to urge the sparing of their particular programs. It is true that the magnitude of our problems requires drastic action which will cut growth in some very desirable programs around the country. But many of the affected groups have told me they are willing "to take it on the chin,"—even though it is not in their short-term economic interest—if it means our economy will be revitalized. One constituent tells me he is tired of Band-Aid cures for cancer. He is a realtor and knows the budget cuts will hurt him in the short run; but if the corrective surgery is performed now, he and the rest of us will be better off in the long run.

I am aware of the complaints that "the budget cuts are necessary, but they are inequitably distributed." A parochial approach, however, would only serve to undermine the administration's attempts to deal with the pressing economic con-

cerns of the day. The multifarious economic problems confronting us call for a united front to achieve a common objective. I can hardly be sympathetic to charges of regional bias from the North—when Buffalo, Detroit, and Cleveland all receive far higher amounts of Federal moneys for community development than Dallas, Tex. The cities of Detroit and Cleveland alone receive three to five times the amount of Federal funds in transit subsidies than does Dallas. And in the city of Houston—the fifth largest, and the fastest growing city in the United States—no funds will be available for a mass transit rail system; but fixed rail systems in the Northeast corridor will continue to receive mass transit capital grants.

The State of Texas has the longest international border of any State. Reductions in appropriations to Immigration and Naturalization Service exacerbates problems peculiar to the Mexican border States.

Although Texas has the greatest number of retired military personnel of any State, I am willing to go along with the proposal to limit the cost-of-living adjustments to one per year instead of two per year. Scientific research at NASA and health research at Houston's Medical Center will be cut down. SBA and FEMA loans are being reduced. Our State, which is disaster-prone, will have to bear the financial burden of rebuilding whenever plagued by hurricanes, tornadoes, and other disasters.

We must take the overall program with particular reductions that each of us individually might disagree with because once the program becomes open to special interests, we will never be able to arrest growth in Federal spending. There are aspects of the package which I seriously question, but I am putting aside those concerns. It is a tough, hard-nosed way to have to go about it; but I think this is what the American people want. I urge my colleagues in the Senate to put aside special interests in order to pass the President's program.

We have a rare opportunity to respond to the expressed will of the American people. We must stay in step with the administration on its crusade to set our financial house in order. The reconciliation will not destroy 30 years of social programs; it will not take food out of the mouths of mothers and children; nor will it go back on our society's commitment to help the needy. This resolution will trim the untamed, unharnassed, and rampant growth of Federal spending which is bringing our country to its knees. It is imperative that we act responsibly and expeditiously in approving the reconciliation instructions.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

THE PRESIDENT'S BUDGET PROPOSALS FOR FISCAL YEAR 1982

Mr. THURMOND. Mr. President, today I rise to express my strong support for President Reagan's budget proposals for fiscal year 1982.

This program is not just a cut in Government spending. It also includes a tax cut package, a reduction in excessive Government regulation, a sound monetary policy, and eventually, a balanced budget. I believe all of these measures are necessary, and I will support the administration's efforts to achieve them.

During the past two decades, the Democratic-controlled Congress has addressed every aspect of our social and economic problems with more legislation, more interference by the Federal Government, and more spending to support the growth of Federal services.

The traditional relationship between the power of the States and the Federal Government has been thrown totally out of balance. Federal grant programs, subsidies, regulations, and special interest groups, acting with Federal financial support, have tipped the principles of Federal/State relations too far in the direction of big Government.

The United States is fast approaching a trillion dollar budget, which would be reached in just a few years if Government spending continues at present rates.

Although Federal spending may rise, it must not do so at the rate we are now experiencing. President Reagan proposes to reduce the amount of the Federal spending and, in the process, reduce the size of Government.

A few figures are helpful in understanding the growth of Federal spending. The January budget estimates showed Federal spending increasing at an annual rate of 13.3 percent from 1977 to 1981. The Reagan administration budget program will reduce the rate in the increase of Federal spending to only 5.5 percent a year over the 1981–84 period.

Revenues will also be reduced through the passage of tax cuts recommended by the administration. As a result of these proposals, Federal receipts are estimated to rise by 28 percent between 1981 and 1984, and by 57 percent over the entire 1981–86 period. Under the Carter administration's proposals, receipts would have risen by 96 percent over this 5-year period. This reduction in revenues to the Government will mean more capital for private investment and economic growth, thus reducing the size of Government spending while stimulating the private sector.

Mr. President, one area where I wholeheartedly support the President is the necessity for a balanced budget. The budget has been balanced only once in the last 20 years, and if we keep spending at current levels, there is little hope of ever balancing the budget again. For years, I have advocated the need to spend only what can be brought in as revenue. Numerous States have long recognized the need for fiscal responsibility and have passed laws, or amendments to State constitutions, to achieve that purpose. My State is one of those. Unfortunately, the Federal Government has been consistently running up deficits in record style and making no attempts to maintain a balanced budget.

I have introduced a measure to amend the U.S. Constitution that would require Congress to vote affirmatively if it wants expenditures to exceed revenues in any given year. There would be, however, an exception for wartime situations. The Constitution Subcommittee of the Senate Judiciary Committee has already held a day of hearings on this proposal, and I expect action by the full committee early this year.

Mr. President, the administration's proposed budget reductions have not been made in a random or hurried manner. A number of criteria have been used to reach these decisions. For example, the President has made it very clear that he intends to continue funding support for the elderly, the hardcore unemployed and poor, and those Americans who fulfilled their commitments to the country in times of war.

Entitlement programs will be revised to eliminate unintended benefits or, in other words, benefits that have gone to people with middle to upper incomes or to people who are collecting twice from similar programs.

Economic subsidy programs like CETA, Job Corps, and other community service programs will be scaled back or consolidated into a block grant to the States where they can be more effectively managed and tailored to local needs.

Tax credit for certain nonprofit institutions will be withdrawn, and the guaranteed student loan program will be modified to remove the special allowance for those who lend to parents of students. The 9-percent interest subsidy now provided for students while they are in school will also be eliminated.

Another criterion will be the consolidation of many categorical grants to State and local governments into block grants. Nearly 550 programs are scheduled for such action. In the health, education, and social services programs alone, consolidation will encompass 616 pages of law; 1,400 pages of regulations; more than 10,000 separate grants; and approximately 88,000 grant sites. It takes over 7 million hours to fill out the forms relating to the programs funded by the Federal Government in this area and several thousand Federal employees to administer them.

Finally, President Reagan is addressing the matter of reducing Federal overhead, personnel costs, and program waste and inefficiency. President Reagan placed a complete freeze on hiring and put limits on orders for the procurement of new office equipment.

These are the criteria that the administration has used to achieve budget reductions so that it can provide support for the truly needy while fulfilling our responsibility to strengthen the national defense. To many, the proposed increases in defense spending at the expense of social programs may seem unacceptable. However, an increase in defense spending is a necessity. The security of the United States in terms of military readiness has never been more in jeopardy. We are falling far behind the Soviet Union in a number of areas, and we need an infusion of programs to catch up. This

is especially important in view of the current world situation.

Mr. President, I intend to support the budget revisions recommended by President Reagan, even as they adversely affect people in my own State of South Carolina. A number of groups and individuals have contacted me asking for my support in reversing administration cuts of Federal programs, such as the Economic Development Administration, coastal plains projects, the Appalachian Regional Commission, and the food stamp program. These cuts, according to the Governor's office of South Carolina, will amount to approximately $122.5 million for fiscal years 1981–82. On the positive side, however, Miss Barbara Feinn, the chief economist for the State of South Carolina, predicts that South Carolina can expect nearly 150,000 new jobs in the next 5 years. Forty percent of these jobs, according to Miss Feinn, can be attributed to increased productivity due to Federal spending cuts.

In conclusion, Mr. President, we cannot continue to spend more than we take in. When the budget deficit increases, the U.S. Treasury is forced to go out into the marketplace and borrow money to service that debt.

This borrowing by the Federal Government, in turn, forces up interest rates, which results in higher inflation. Inflation hurts everybody—rich and poor alike. It especially hurts the governmental units of this Nation which are being asked to provide more and more services. If Federal spending can be reduced, inflation can be brought under control.

Mr. President, on November 4, 1980, the American people expressed their desire to have less government, less Federal spending, and less regulation. The Reagan budget proposals are responsive to that mandate. The President has the responsibility to see that this program is carried out. He has the support of the American people. I know he has the support of the senior Senator from South Carolina. He deserves the support of every Member of Congress.

PRESIDENT'S SPENDING REDUCTION PROPOSALS

● Mr. QUAYLE. Mr. President, today we have an opportunity to take the first step in implementing the President's spending reduction proposals.

The passage of S. 509, to suspend the April 1 increase in milk prices supports, will represent a modest savings of $147 million in fiscal 1981, and an additional $86 million in fiscal year 1982.

However, it will be an important and necessary signal that Congress is serious about fighting inflation, reducing Federal spending, and putting our economic house in order.

In 1980 the Agriculture Department spent more than $1 billion on the dairy program. Unless we take this action, the gross expenditures of the program in 1981 will reach $2 billion.

Failure to enact this legislation will impact on consumers with retail milk prices estimated to rise about 3½ to 4 cents per half gallon.

We are experiencing a growing surplus of Government-held stocks of dairy products. For example, as of February 20, 1981, the Government owned 355 million pounds of nonfat dry milk. This is expected to increase even without an increase in the price support level. In January, the Government bought 43 percent of all the butter produced in this country.

Mr. President, many Indiana dairy farmers have advised me that they are willing to forego the April 1 increase in the best interests of the economic health of the country. This is in keeping with the longstanding tradition of patriotism shown by American farmers and their commitment to fiscal responsibility.

There are those who have suggested to me that we support an amendment to require imposition of a quota on casein imports at a level based on 50 percent of the average import levels between 1975 and 1980. I have studied the merits of this amendment and have concluded that it is deficient in that it has the potential of damaging the $47 billion of U.S. agricultural export trade; it poses the threat of almost certain action against all U.S. exports under the General Agreements on Tariffs and Trade; and the issue might better be addressed under existing administrative procedures.

It is my understanding that the USDA is conducting a study of the casein import issue, and its findings should be available in June.

I would suggest that we review this problem again with the benefit of that report this summer.

Meanwhile, let us move ahead in taking this initial step in President Reagan's program to fight inflation by adopting S. 509.●

ADJUSTMENT OF PRICE SUPPORT FOR MILK

The PRESIDING OFFICER (Mr. GOLDWATER). Under the previous order, the hour of 3:30 p.m. having arrived, the Senate will now resume consideration of S. 509, which will be stated by title.

The legislative clerk read as follows:

A bill (S. 509) to amend Section 201 of the Agricultural Act of 1949, as amended, to delete the requirement that the support price of milk be adjusted semiannually.

The PRESIDING OFFICER. Who yields time?

Mr. BAKER. Mr. President, I suggest the absence of a quorum, with the time to be charged equally to the managers of the bill.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, how much time remains? Fifteen minutes, is that correct, equally divided?

The PRESIDING OFFICER. The vote will occur at 4 o'clock unless there is a vote in progress on the Melcher amendment, if that is offered.

Mr. HELMS. I thank the Chair.

I am not absolutely certain at this moment, Mr. President, whether the distinguished Senator from Montana is going to submit an amendment, and I wonder if I might make inquiry of him about that?

Mr. MELCHER. Mr. President, if the Senator will yield, we will have an amendment for the distinguished chairman of the Agriculture Committee to review to see whether it is acceptable.

I might state to the distinguished chairman that the preliminary information we have received from the Department of Agriculture concerning the outbreak of hoof-and-mouth disease in the United Kingdom is encouraging, and the fact that they have traced to the very farm where the disease broke out in the Isle of Wight those animals that were present on the farm at that time, and they have destroyed all of them, as is the method used in eradicating the disease at its outbreak.

Furthermore, the Department is assured by the veterinarians in England that samples of the milk which may have left that dairy farm prior to shutting off any movement from that farm have been determined as nearly as they can accurately portray to being negative for the live virus.

Although the live virus was found in milk on the farm or from the diseased animals on the farm, at the time the entire herd was slaughtered in order to prevent any further spread of the disease, they feel quite confident, the veterinarians in England feel quite confident, that none of the infected milk has gotten into the stream of trade in the United Kingdom.

The Department has assured me and has assured the chairman, I am sure, that continual scrutiny will be maintained by the veterinarians in England, and reviewed by our own animal disease quarantine and animal inspection forces within the Department of Agriculture, and will continue to provide surveillance also to prevent any possible spread of the disease to food products that may be coming into the United States.

I do have some concern as to whether or not the Department has adequate safeguards in place to make sure that the disease cannot be introduced into the United States. My amendment, which I will shortly show to the chairman and, hopefully, for his acceptance, will be along that line.

Mr. HELMS. Mr. President, will the Senator submit his amendment?

Mr. MELCHER. Mr. President, if the chairman will yield again, yes, I will show the Senator the amendment very quickly to see if it is acceptable.

Mr. HELMS. Mr. President, on my own time, I think I can allay the concern of the distinguished Senator from Montana. I have just received a letter from the Secretary of Agriculture, John R. Block, and let me read it into the RECORD:

DEPARTMENT OF AGRICULTURE,
Washington, D.C., March 25, 1981.

Hon. JESSIE A. HELMS,
U.S. Senate,
Washington, D.C.

DEAR MR. CHAIRMAN: I understand that the Senate will be considering this afternoon an amendment to be offered by Senator Melcher from Montana which would require the Department to review and make changes to be certain that the procedures employed by the Department will assure that the United States remains free of foot and mouth disease. In order to satisfy any concerns that Members of the Senate might have on this matter, I will within thirty days submit a complete report on our procedures.

The Department of Agriculture recognizes the essential and important responsibility that it has in the protection of this nation against that dread disease. As Secretary I want you to know that I will do everything possible and leave no stone unturned to see that this mission is carefully carried out.

Sincerely,

JOHN R. BLOCK,
Secretary.

Mr. President. obviously this eliminates the need for any amendment. The Department does not need to be required to do anything in this regard. It is voluntarily doing it. It recognizes the need for doing it. and a report will be submitted within 30 days. So I do hope the distinguished Senator from Montana will not offer his amendment.

I reserve the remainder of my time.

Mr. MELCHER. I think the chairman has performed very notably. I think the amendment we would offer would be along that line requiring a report of the procedures that are being followed.

Would the chairman mind reading that kev sentence again on what the report will contain?

Mr. HELMS. I do not know which sentence the Senator considers the key sentence. I think all of it is. He says:

In order to satisfy any concerns that Members of the Senate might have on this matter I will within 30 days submit a complete report on our procedures.

Mr. MELCHER. Mav I interrupt the Senator, will the chairman yield to me, Mr. President?

Mr. HELMS. Certainlv.

Mr. MELCHER. I think the procedures to which he is referring are the methods the Department uses to safeguard against the introduction of the disease into the United States; is that not correct?

Mr. HELMS. Yes, I think that is correct.

Mr. MELCHER. That is what I was asking the chairman to read. May I just look at the letter? That will be sufficient.

Mr. President, will the chairman yield to me?

Mr. HELMS. I yield the floor.

Mr. MELCHER. Mr. President, the amendment we have drafted and would ask the Senate to approve would be to require that the Department review their procedures and report back to us.

We would not have asked them to report back within 30 days. I think that is a little bit too fast. But this letter, dated today, by Secretary Block contains the very thoughts that we would have in our amendment, and completely satisfies me because what we would have asked for is that the Department must review their procedures to assure that the United States remains free of the disease, and then report back to us.

I think the letter the chairman of the Committee on Agriculture has received from the Secretary accomplishes the very purpose of the amendment I would have offered, so I certainly will not offer an amendment.

I am delighted at this proper reply from the Secretary, and I hope the procedures, after the review, look as good to them as they have been describing them to me today.

Mr. President, I do want to again express to my colleagues in the Senate that I am extremely apprehensive about any procedure that allows the live virus of hoof-and-mouth disease to come into the United States. There is no reason why we should take that chance.

Some countries that provide us milk products have higher standards than others. But as of right now, as of today, the Department does not enforce anything more than this on the milk products that come into this country, that is, pasteurization, normal pasteurization, where the milk is heated to 75 degrees Centigrade for 15 seconds, which is all that is envisioned by many countries, and we do not insist on anything higher than that.

In the case of a foot-and-mouth disease where the live virus is shed in the milk and, therefore, does get into food products, simple pasteurization is not adequate.

The Department's procedures right now are to say that while they safeguard and identify against any milk product, including casein, introducing the disease into the United States, because they only have it go into the food products that humans are going to consume, well, that is not quite enough to satisfy me, knowing that often hoof-and-mouth outbreaks have occurred in areas simply because of food product that went into the garbage can or fed to hogs or got into contact with other animals, and the animals that were susceptible, picked up the virus and the disease was then introduced to the livestock or wild animals in that area.

The secnd point, the Department says is, "well, after all the virus will only remain alive in casein or cheese products for 84 days." Well, that is not very comforting to me either because 84 days, with modern transportation, that is a pretty long period of time.

So I think it is absolutely essential that we require—or in this case we do not need to require—the Department is volunteering to review their procedures, and in doing so I think or rather I believe strongly that the Department will tighten up on their procedures as they affect dairy products that come out of a hoof-and-mouth-disease country. That is exactly what I would like to accomplish, and I am delighted that the chairman has received this letter from Secretary Block. I commend him for that and I thank him for that because I believe it is a very positive and necessary step.

Mr. HELMS. Mr. President, I am grateful to my friend from Montana. I might say to him that he disclosed he would not offer an amendment. He has said many things in his career as a Senator that pleased me, but none pleased me more than that. I am delighted he will not offer an amendment, and I further say that if there is any lapse in the implementation of this guarantee by the Department of Agriculture, I will join the Senator in insisting that they perform adequately.

I ask unanimous consent to insert in the RECORD a copy of the report that USDA made in response to questions raised yesterday by the Senator from Montana. I think that the Department has acted in an expeditious fashion to be responsive to Senator MELCHER'S concerns. I want to commend the Secretary of Agriculture for his sincere efforts to address this important problem.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. DEPARTMENT OF AGRICULTURE,
Washington, D.C., March 25, 1981.

SENATOR JOHN MELCHER: Attached you will find two documents requested by you in relation to importation of dairy products and the current foot-and-mouth disease (FMD) situation in the United Kingdom.

The former of these is an opinion from the Department's Office of the General Counsel relative to authorities exercised by the Secretary in importing dairy products from FMD-infected countries.

The second document will update you on the most recent FMD outbreak in the United Kingdom and the action being taken by the Department as a result.

I believe these two papers will answer the questions you raised. In the event there are further issues which need to be addressed, we will be pleased to supply further information.

HARRY C. MUSSMAN,
Administrator.

FOOT-AND-MOUTH DISEASE UPDATE: ISLE OF WIGHT SITUATION AND ANIMAL AND PLANT HEALTH INSPECTION SERVICE ACTIONS

The outbreak of foot-and-mouth disease (FMD) on the Isle of Wight occurred in dry dairy cows being held on pasture. No lesions were found in cows being milked nor were lesions noted in a small beef herd also located on the affected farm. To determine whether FMD virus had entered trade channels, milk samples from the farm were sent to the FMD World Reference Laboratory, Pirbright. No virus was found in the samples from the bulk tank or in samples collected at milkings prior to the day the entire herd was slaughtered. Samples of milk collected at the time of slaughter did contain virus; however, none of the milk was moved off the farm after FMD had been suspected several days earlier. All cattle on the farm (166 head) have been slaughtered and the carcasses disposed of.

Additional efforts are being made to assure the disease does not spread. All milk from other farms on the Isle of Wight is being heat treated as a precautionary measure to assure inactivation of any FMD virus. Some cattle shipped to the mainland from a farm near the outbreak were traced to a market in Dorsett. These cattle were showing no lesions and had normal temperatures but the decision was made to slaughter them, again as a precautionary measure.

The U.S. has removed Great Britain from the list of countries free of foot-and-mouth disease. Consequently. any products or by-products (cheese. casein. lactalbumin. etc.) entering this country from Great Britain will have to meet the requirements for a country with FMD; this means products can only

move under permit and must be destined for use solely in human food products. The APHIS regulatory personnel at U.S. ports have already been notified of the change and will require the products and byproducts originating from U.K. markets since the FMD outbreak was confirmed meet our requirements.

U.S. DEPARTMENT OF AGRICULTURE,
Washington, D.C., March 24, 1981.

Subject The Authority of the Secretary of Agriculture to Permit the Importation of Casein From Countries Designated as Being Infected With Foot-and-Mouth Disease Into the United States.

To Harry C. Mussman, Administrator, Animal and Plant Health Inspection Service.

This is in response to your request for a legal opinion concerning the authority of the Secretary of Agriculture to permit the importation of casein into the United States from countries infected with foot-and-mouth disease.

This office is not aware of any law which prohibits the importation of casein from any country, and it is therefore our opinion that the Secretary of Agriculture may permit the importation of casein into the United States.

The Tariff Act of 1930 (19 U.S.C. 1306), with certain limited exceptions, prohibits the importation into the United States of cattle, sheep, or other ruminants, or swine, or fresh, chilled or frozen meat of such animals from foreign countries in which rinderpest or foot-and-mouth disease exist, if the Secretary of Agriculture complies with certain specified procedures not applicable to this opinion. However, this Act does not apply to products other than meat or to milk and milk products such as casein.

Currently the Department has regulations in Title 9, Code of Federal Regulations, section 94.16 which place certain restrictions on the importation of casein into the United States. These regulations were promulgated pursuant to section 2 of the Act of February 2, 1903 (21 U.S.C. 111) which vests in the Secretary broad authority "to make such regulations and take such measures as he may deem proper to prevent the introduction or dissemination of the contagion of any contagious, infectious, or communicable disease of animals and/or live poultry from a foreign country . . . and to seize, quarantine, and dispose of any . . . meats, hides, or other animal products coming from an infected foreign country to the United States . . . whenever in his judgment such action is advisable in order to guard against the introduction or spread of such contagion." This Act gives the Secretary of Agriculture authority to regulate the importation of casein as long as such regulation is necessary to guard against the introduction or spread of the contagion of any contagious, infectious, or communicable disease of animals and/or live poultry in interstate or foreign commerce. The Secretary of Agriculture is not, however, required to prohibit the importation of any animal product including casein. The restrictions on and the requirements for the importation of casein are, of course, matters for determination by your agency.

JAMES MICHAEL KELLY,
Acting General Counsel.

Mr. HELMS. Mr. President, I suggest the absence of a quorum, which will be called off at 4 o'clock.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HUDDLESTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HUDDLESTON. Mr. President, in this last minute before the vote on this bill, S. 509, I would just like to call the attention of the Senate to the fact that this is the first piece of legislation that has come to the floor from the Senate Committee on Agriculture, Nutrition, and Forestry and, therefore, the first piece of legislation to come under the new leadership of that committee, the distinguished Senator from North Carolina (Mr. HELMS).

The PRESIDING OFFICER. The Chair will observe that the hour of 4 o'clock has arrived.

Mr. HUDDLESTON. Mr. President, I ask unanimous consent that I be allowed to continue for 1 minute.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HUDDLESTON. It is also the first piece of legislation submitted by the current administration that is designed to restrain the growth of Federal expenditures. This one relates to farming, to agriculture, and in particular, of course, to the dairy farmers. A vote for this legislation is not a vote in any way against the dairy farmers of this country.

I think all of us can agree that we need a good dairy price support program. This vote is one which actually will help preserve the program because it helps keep it from getting too far out of balance and too expensive to the American people.

So I support the legislation that is before us. I support the effort to restrain spending and I support our agriculture segment. We will work toward making sure that as we go through the next months that we do develop a program that will assure that we continue to have a stable dairy industry in this country.

The PRESIDING OFFICER. The Senator's 1 minute has expired.

The hour of 4 o'clock having arrived, the question is on the engrossment and third reading of the bill.

The bill (S. 509) was order to be engrossed for a third reading and read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass? On this question, the yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. BAKER. I announce that the Senator from Florida (Mrs. HAWKINS), the Senator from New Hampshire (Mr. HUMPHREY), the Senator from Indiana (Mr. LUGAR), and the Senator from Alaska (Mr. STEVENS) are necessarily absent.

I further announce that, if present and voting, the Senator from New Hampshire (Mr. HUMPHREY), and the Senator from Florida (Mrs. HAWKINS) would each vote "yea."

Mr. CRANSTON. I announce that the Senator from Connecticut (Mr. DODD), the Senator from Louisiana (Mr. LONG), and the Senator from New Jersey (Mr. WILLIAMS) are necessarily absent.

The result was announced—yeas 88, nays 5, as follows:

[Rollcall Vote No. 40 Leg.]

YEAS—88

Abdnor	Exon	Mitchell
Andrews	Ford	Moynihan
Armstrong	Garn	Murkowski
Baker	Glenn	Nickles
Baucus	Goldwater	Nunn
Bentsen	Gorton	Packwood
Biden	Grassley	Pell
Boren	Hart	Percy
Boschwitz	Hatch	Pressler
Bradley	Hatfield	Pryor
Bumpers	Hayakawa	Quayle
Byrd, Harry F., Jr.	Heflin	Randolph
	Heinz	Riegle
Byrd, Robert C.	Helms	Roth
Cannon	Hollings	Rudman
Chafee	Huddleston	Sarbanes
Chiles	Inouye	Sasser
Cochran	Jackson	Schmitt
Cohen	Jepsen	Simpson
Cranston	Johnston	Specter
D'Amato	Kassebaum	Stennis
Danforth	Kennedy	Symms
DeConcini	Laxalt	Thurmond
Denton	Levin	Tower
Dixon	Mathias	Tsongas

Domenici	Mattingly	Warner
Durenberger	McClure	Weicker
Eagleton	Melcher	Zorinsky
East	Metzenbaum	

NAYS—5

Burdick	Leahy	Stafford
Kasten	Proxmire	

NOT VOTING—7

Dodd	Long	Williams
Hawkins	Lugar	
Humphrey	Stevens	

So the bill (S. 509), as amended, was passed as follows:

S. 509

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 201 of the Agricultural Act of 1949, as amended (7 U.S.C. 1446), is further amended by deleting subsection (d).

SEC. 2. It is the sense of the Senate that the restrictions on the exportation of agricultural commodities to the Union of Soviet Socialist Republics should be terminated.

SEC. 3. It is the sense of the Senate that no agricultural commodities produced in the Union of Soviet Socialist Republics should enter the United States during any period during which the President imposes restrictions on, or prohibits, the export of grain or any other agricultural commodity to the Union of Soviet Socialist Republics (including the restrictions on the exportation of agricultural products to such country initiated on January 7, 1980).

Mr. HELMS. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATCH addressed the Chair.

The PRESIDING OFFICER. The Senator from Utah.

THE BUDGET PROBLEMS

Mr. HATCH. Mr. President, tomorrow we begin one of the first floor approaches toward trying to resolve the budget problems that we have all been so concerned about. I think most people in our country today are not aware that we are really not cutting the budget of the United States in the literal sense. What we are doing is cutting the increases in the budget which have gone up at escalated rates.

For 45 of the last 51 years we have failed to balance the budget of the United States of America. As a matter of fact, I think our first $100 billion budget was in 1962; our first $200 billion budget was in 1972, 10 years later; the first $400 billion budget was in 1976; and today we are facing a $695 billion budget, if we are lucky, in fiscal year 1982.

I think our President has had no choice other than to try to get this free spending under control.

Back in 1976, the national debt was a little over $650 billion. The interest against that debt, as I recall, was around $42 billion, or thereabouts. I remember when we were running at that time we thought that was a horrendous interest debt on an annual basis.

Today, in fiscal year 1982, the interest is approaching $100 billion and the interest is calculated to be in the neighborhood of $106 billion for fiscal year 1982.

I think my friend Dave Stockman indicated that we have jumped in interest payments in 1 year $35 billion. He said even the big spending Congress would have a rough time spending that much money, although I would have to dispute him on that particular last statement. I think the big spending Congress can find all kinds of innovative ways to spend money. I think that we have to get spending under control.

One of the worst aspects of the Federal budget, one that I fought against ever since I have been here in the U.S. Senate, happens to be the off budget spending items.

Today as we enter into the 6th month of the fiscal 1981 year, we are $55 billion in deficit, and that does not include the $23 billion in off budget deficits that the Congress in its infinite wisdom decided cannot be brought on budget.

In other words, we are around $78 billion in deficit. If we do not enact the Reagan proposal, it will go to $90 billion in deficit for fiscal year 1981.

Now, what makes those figures even more bizarre is, as I said on the Budget Committee last year in marking up the first concurrent budget resolution by May 15, 1980, the Budget Committee came out with a lot of hoopla that they had balanced the budget for the first time in some 20 years. There were a number of us on the committee who said they were using phony econometric models; that they had not balanced the budget; that they were at least $30 billion in deficit; that the deficits were rising, and that did not even include the off budget spending deficits of the then $23 billion which is today $23 billion.

We were laughed at, ridiculed, and almost drummed out of town because of making those particular comments.

By August of last year, the Budget Committee pretty well had to admit that they were at least $30 billion in deficit and that the so-called grand balanced budget of 1980 was not so grand, nor was it balanced, nor was it anywhere near balanced.

As we all know, instead of meeting the by-law deadline of September 15, 1980—September 15 date being the date where all second concurrent budget resolutions have to be passed—the Congress refused to do that, refused to meet the laws of this country and pass a second concurrent budget resolution, and acted pursuant to a continuing resolution which threw the whole matter over until the lameduck session.

When the startling election took place, there was not much enthusiasm about coming up with a second concurrent budget resolution then. And, as we all know, they even deferred the debt ceiling limitation lift off until February of this year when we had to increase it to $965 billion, good only until about October or November of this year.

In other words, this year is going to be such a banner year that it will be the first year wherein we transcend the trillion dollar budgetary deficit, with all of the interest charges that are stacked up against it.

Mr. President, on top of all of this, we find that not only is spending running out of control, not only is the Congress inept in working within the budget process or at least has been up to now, but now we have testimony today by Alice Rivlin, the head of the Congressional Budget Office, based upon the same faulty econometric model she has been using all of these years, indicating, according to her static economic analysis, that the Reagan program will amount to major deficits even in 1984.

Now, I would like to spend just a few seconds talking about the econometric models that have been used by the Congressional Budget Office of some 200 people, working at the Federal Government top pay scales for the most part, many economists, many top professionals, who have, in my opinion, been deceiving the American people because they only look at the demand side of the econometric equation and will not look at the supply side of the econometric equation and what will happen if, in fact, you have productivity or other tax rate reductions to stimulate the economy on the supply side of the economy to create a dynamic econometric situation or economy, instead of a static economy from which we have been suffering over these last number of years.

I think it is really important that we all consider that these econometric models used by the CBO have been so wrong in the past that how can we give them any credibility in the future? And yet I suspect that many in our media will, because the Congressional Budget Office is so prestigious and has so many Ph. D. economists working for it, buy the line that the Reagan program is not going to be successful or work.

In order to buy that line, you would have to presume a static economy continuing, even though we have the stimulative effect of budget cuts—or should I say additional spending budget cuts—productivity oriented tax rate reductions in the 5-10-5 approach that President Reagan has indicated in his message to the joint session of Congress—and, I might add, the 10-5-3 accelerated depreciation which should help many of our businesses in society, although not those who do not make profits—the reduction in the overregulatory burden which should cut billions of dollars of costs out of the programs that businesses are trying to present and produce, and, of course, the gradual phase back of the monetary supply which should stabilize our monetary supply and quit the debauchment of our currency which has been occurring over the last 100 years.

I recall last year in that budget markup that we got in a horrendous fight because somebody who was sympathetic to the econometric fight I had been waging in the committee sent me a copy of a memorandum between the top staff director of the Budget Committee and Senator Muskie.

That memorandum indicated that Mrs. Rivlin was scared to death or extremely concerned about my request for hearings on the econometric models because she realized that if we got into hearings on the econometric models she would have to admit that the models they are using are slanted and biased in favor of Federal Government spending, rather than stimulating effects to the supply side or the private sector.

Now, I am extremely concerned that the Congressional Budget Office has become a major political battleground and has been used as a major political football to advance the outmoded, shopworn theories of the past, certainly of the past 50 years, that have been afflicting and besetting this country.

I suppose if you believe that Federal Government deficit financing and spending really helps the economy, you could point to the years when we had a low monetary supply and low inflation. Certainly throwing more dollars into the economy under those circumstances would look like it is helping the economy. But that particular philosophy has brought us to where we are today—and where we are today is in trouble.

We are in trouble primarily because of the same type of econometric modeling, econometric approaches as Mrs. Rivlin has been articulating on the Hill these days. I for one am tired of it. I like her personally. I think she is a very intelligent and bright woman, but she is totally stratified, in my opinion, by harkening to the past and on the outmoded theories of the past which have been proved as unworkable. She has been totally unwilling to look toward the theories of the future, the supply side theories that approach us that really could pull this country out of its economic morass and help to save it.

I, for one, intend to support the Reagan program to the utmost limit that I can.

On the Labor and Human Resources Committee, we have cut, depending upon which set of econometric assumptions you use, an authorization of $11 billion out of our total authorizing functions. And that committee happens to be one of the big authorizing committees on the Hill. I think we have some 61 reauthorization bills that have to be brought to the floor before May 15 of this year. It is almost an overwhelming experience to try to do this.

I believe that, except for the little over $500 million in outlays and about $998 million in authority, the Labor and Human Resources Committee has done a tremendous job. We are a little over

a billion dollars in authority and a little over half a billion dollars in outlays above where President Reagan wanted us to cut. But we have cut, in essence, $11 billion on a committee that has never cut a dime, in my opinion, since its existence. That committee has only created legislation, created spending programs, created social spending programs to the degree that all of us know that we have to face the music and face the responsibilities that have come from committees that really have run away as far as legislative programs have been concerned.

With regard to the approximately $1 billion that we were unable to cut, I think we were justified in not cutting those, because $353 million was for the handicapped, people who cannot help themselves; $345 million happened to be for block grants because we do not believe we can get the implementing legislation enacted in time to be able to prevent the deterioration in program moneys for the various States and local governments. The remaining $400 million we put into youth employment in the private sector and CETA. We feel those three items out of the literally thousands of items that we had to consider are justified.

Beyond that, I believe our committee will vote to maintain the Reagan cuts. And I for one will do everything we possibly can to do so.

In the meantime, I again renew my request that we have hearings in the Budget Committee, maybe the Finance Committee, perhaps even in the Appropriations Committees concerning the econometric models being used by the Congressional Budget Office, because they are biased and slanted toward one side of the econometric equation to the extent that they are really unjustifiable in the overall economic programs of this country, certainly the overall economic planning programs of this country.

Mr. President, I hope that we will support the President's program. I do believe that the people understand that we are in trouble and that we must do something about it. Although we may differ with regard to individual spending and cut amounts, I think most all of us realize that something has to be done. Now is the time for the leadership and for us to follow the leadership and do everything we possibly can to not only get spending under control but to give people tax breaks so that we can have more productivity in this country and more growth and to reduce the regulatory burden which is stifling this country to the nth degree, and to put back the monetary supply so we quit debauching our currency.

Mr. MATHIAS addressed the Chair.

The PRESIDING OFFICER. The Senator from Maryland.

CONGRESSIONAL BUDGET RESOLUTION

Mr. MATHIAS. Mr. President, as we consider the resolution before the Senate to revise the Federal Government's 1981 budget and to shape the 1982 budget, I am reminded of E. B. White's sage definition of democracy:

> Democracy is the recurrent suspicion that more than half of the people are right more than half of the time.

In November the American people expressed themselves in answer to the simple question, "Are you better off now than you were 4 years ago?" The people spoke. Judging from the budget resolution now before the Senate, I would say that the Senate Committee on the Budget heard their answer and concurs with E. B. White's suspicion.

The budget resolution begins a long legislative effort to fire up the engines of economic development and to lift the American economy out of stagnation. I applaud that goal.

I do not expect that the budget proposed by this resolution will solve all of our economic problems and it will not solve any problem immediately. It took many years for our economy to reach this low point. It is only realistic to expect that it will take time for recovery.

There are many causes of our inflationary economic problems. Expansion of the Federal deficit, declining productivity, overregulation, high-priced imported energy, continuing trade deficits and inconsistent monetary policies all contribute to the fundamental instability of the economy. Too much Government spending is the specific cause of inflation addressed by this resolution, but let us not disregard these other causes.

To put a brake on unreasonable spending, to reverse runaway Government expansion, to give individuals and industry greater incentive for investment—these are necessary actions if we are to spur economic growth and thereby benefit all segments of the American society.

I too recognize that excessive Government spending and growing Federal deficits have shaped the economic climate. The idea that America can live beyond her means and yet expect a constantly rising standard of living is no longer tenable. Surely Government must set the pace and the standard for budget responsibility.

As chairman of the Senate Committee on Rules and Administration, I am particularly concerned about reducing Senate spending. We cut the budget of the Rules Committee by more than 10 percent and we achieved an overall cut of 10 percent among all Senate committee budgets. The Senate has set a positive example for the rest of the Federal Government.

The budget resolution is a sturdy effort to change the national psychology, and I welcome that. Individuals and businesses decide to work, to save and to invest based upon their personal economic assessments and upon their perceptions of the national effort to invigorate the economy.

This budget resolution and its reconciliation provisions are dramatic statements of congressional intent to rein in Government spending. Controversy is bound to swirl around specific aspects of the proposal in the days and weeks ahead.

The traditional ideas about public spending have now been ordered to stand up and account for themselves. That is a useful exercise. Certainly there have been more than enough public mistakes in recent years. But as we conduct this review, we must take care not to throw the baby out with the bath water.

It would be unfortunate if the rallying cry against Government extravagance became a cry against all Government activities. It is the ineffective, inefficient or wasteful Government programs that must be addressed. Many legitimate, constructive, and responsive Government activities serve the public interest. These must not be slashed with an ax when a judicious trim from a paring knife would be adequate.

The aim is to make Government programs cost-effective and responsive to genuine need.

I believe that the American people can live and prosper with the overall spending ceilings set by the budget resolution. I do not accept all of the program budgets suggested by the Budget Committee. In fact, when the Senate considers specific programs in the 13 individual appropriations acts later this year, I expect to support some alternative funding levels and to propose alternative cuts, as requested by President Reagan when he submitted his budget. We should all recognize that the possibilities for increases in program funding beyond the President's proposals will be slim indeed without offsetting reduction in other programs.

We must continue to meet our obligations to those who cannot work or cannot find work and who are unable to improve impoverished circumstances. I do not for one moment imagine that budget cutting will be easy. My experience in cutting the budget of the Senate's own committees showed how hard it can be.

Every reduction we consider may result in some discomfort, perhaps even pain. The challenge before us, therefore, is to use limited public funds creatively and efficiently and in the most cost-effective ways possible; and if pain is to be inflicted, to inflict it on those who can best stand the pain.

The PRESIDING OFFICER. Who seeks recognition?

Mr. DOMENICI. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business, not to exceed 15 minutes in length, in which Senators speak for not more than 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the

Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting a sundry nomination and a treaty which were referred to the Committee on Foreign Relations.

(The nomination and treaty received today are printed at the end of the Senate proceedings.)

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. DOLE, from the Committee on Finance:

Beryl Wayne Sprinkel, of Illinois, to be Under Secretary of the Treasury for Monetary Affairs.

Norman B. Ture, of Virginia, to be Under Secretary of the Treasury.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. GOLDWATER (for himself and Mr. DECONCINI):

S. 794. A bill to amend the National Trails System Act to designate the General Crook Trail in Arizona and the Beale Wagon Road in Arizona, for study to determine the feasibility and desirability of their designation as national historic trails; to the Committee on Energy and Natural Resources.

By Mr. THURMOND (for himself and Mr. DECONCINI):

S. 795. A bill to amend the Sherman Act and the Clayton Act to exclude from the application of such acts certain conduct involving exports; to the Committee on the Judiciary.

By Mr. ZORINSKY:

S. 796. A bill entitled "Rural Telephone Bank Amendment Act of 1981"; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. MATHIAS (for himself and Mr. SARBANES):

S. 797. A bill to provide for the issuance of a postage stamp to commemorate the 200th anniversary of the election of John Hanson of Maryland as first President of the United States in Congress assembled; to the Committee on Governmental Affairs.

By Mr. RIEGLE (for himself and Mr. LEVIN):

S. 798. A bill to provide a program of emergency unemployment compensation; to the Committee on Finance.

By Mr. HATCH:

S. 799. A bill to amend the Public Health Services Act to revise and extend titles VII and VIII of such act with regard to training in health professions and nursing, and for other purposes; to the Committee on Labor and Human Resources;

S. 800. A bill to amend the Public Health Services Act to revise provisions relating to research in health statistics and health services, support for medical libraries, and the National Research Service Awards, and for other purposes; to the Committee on Labor and Human Resources;

S. 801. A bill to amend the Public Health Services Act to revise provisions relating to the National Health Service Corps; to the Committee on Labor and Human Resources.

By Mr. ZORINSKY:

S. 802. A bill to remove the Soviet grain embargo unless the President takes certain action; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. DURENBERGER:

S. 803. A bill to authorize construction of a project for flood control and other purposes on the South Fork Zumbro River at Rochester, Minn.; to the Committee on Environment and Public Works;

S. 804. A bill to modify the project for flood protection at Winona, Minn.; to the Committee on Environment and Public Works.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. GOLDWATER (for himself and Mr. DECONCINI):

S. 794. A bill to amend the National Trails System Act to designate the General Crook Trail in Arizona and the Beale Wagon Road in Arizona, for study to determine the feasibility and desirability of their designation as national historic trails; to the Committee on Energy and Natural Resources.

NATIONAL HISTORIC TRAILS LEGISLATION

● Mr. GOLDWATER. Mr. President, I am introducing today, for myself and my colleague from Arizona, Mr. DECONCINI, a bill to provide for a study to determine the feasibility and desirability of designating as national historic trails, the General Crook Trail in Arizona and the Beale Wagon Road in Arizona.

These two old roads meet the criteria established in the National Parks and Recreation Act of 1978. Their routes are known and are in a remarkable state of preservation. Both have a high degree of recreation potential as hiking and riding trails through some of northern Arizona's most scenic country.

Of the two, the Crook Trail is the most developed at this time. It goes from Prescott, across the Mogollon Rim to Fort Apache, and even further on to Fort Craig in New Mexico. It was the chief supply and tactical route to Fort Apache during Crook's first campaign against the Apaches. In addition, the trail has been named Arizona's first State Historic Trail by the State parks board.

The Beale Wagon Road was probably the first federally funded road in the far Southwest, and constructed in 1858–59 by Lt. Edward Beale, famed for the Army's experiment in Arizona with camels. It rivaled the California cutoff of the Oregon Trail for immigrant travel both before and after the Civil War. Its route is closely followed by Highway 66 across Oklahoma, New Mexico, and Arizona.

It gives me great pleasure to reintroduce this bill at the request of the Grand Canyon Council of the Boy Scouts of America. This is their special project and as it happens, locating the Crook Trail for preservation and public use was the Council's bicentennial project. The work was done under the guidance of Dr. Eldon Bowman, of Northern Arizona University. These young men and Dr. Bowman have done a fine job and we are very proud of their contributions to Arizona's history.●

By Mr. THURMOND (for himself and Mr. DECONCINI):

S. 795. A bill to amend the Sherman Act and the Clayton Act to exclude from the application of such acts certain conduct involving exports; to the Committee on the Judiciary.

FOREIGN TRADE ANTITRUST IMPROVEMENTS ACT OF 1981

Mr. THURMOND. Mr. President, I am today introducing the Foreign Trade Antitrust Improvements Act of 1981. This bill is identical to a bill cosponsored in the House, H.R. 2326, by the chairman and ranking Republican member of the House Judiciary Committee, Mr. RODINO and Mr. MCCLORY.

The bill would amend the Sherman and Clayton Acts to clarify the international application of U.S. antitrust laws. Specifically, the bill provides that the Sherman Act would prohibit only conduct which has a direct and substantial effect on commerce within the United States, or on a domestic firm competing for foreign trade. The bill also would protect joint ventures that are limited to export trading from challenges under section 7 of the Clayton Act.

The purpose of this legislation is to aid the efforts of American business to compete vigorously and effectively throughout the world. The bill is designed to relieve the antitrust concerns of American businessmen over their conduct which primarily affects foreign, rather than domestic, markets. It would allow them to compete on more nearly equal terms with other great industrial and commercial powers.

This bill, therefore, insures the proper focus and direction for our antitrust laws. Since the purpose of these laws is to protect our domestic markets and our consumers against anticompetitive conduct, there is no good reason to have our antitrust laws applicable to export transactions where direct and substantial domestic anticompetitive effects are nonexistent. It should be noted that this bill does not and should not try to relieve American business from compliance with the antitrust laws of other countries in the world where U.S. companies do business.

At the present time, the Federal courts consider a variety of factors in deciding whether to assert Sherman Act jurisdiction over conduct occurring in the course of foreign trade. Such factors include the effect of the course of conduct on commerce in the United States; the relative interests of the United States vis-a-vis those of the country where the conduct or the effects occur; the nationality or allegiance of the parties; and the extent to which there is an explicit purpose to harm or affect American commerce.

This bill would not remove these factors from consideration in deciding whether to apply our antitrust laws to any particular conduct. It would, however, provide that before these or any other factors may be considered, there must be a threshold determination that the conduct has had the requisite direct

and substantial effect on commerce in this country. Without this determination at the outset, no Federal court should entertain a Sherman Act suit.

Section 3 of the bill removes from the reach of the Clayton Act joint ventures formed to conduct export trade. Rather, such joint ventures, like other concerted activity in foreign trade, would be analyzed solely under the Sherman Act by looking to their actual effects. Therefore, since section 7 of the Clayton Act is designed to eliminate, in their incipiency, combinations which "may" tend to lessen competition at some future date, it could not be used to challenge joint ventures. By analyzing export trading joint ventures in terms of their actual direct and substantial effect on U.S. commerce, such agreements will not be frustrated on the basis of a speculative fear that they may later adversely affect domestic commerce.

I am hopeful, Mr. President, that this measure to revitalize America's competitive position worldwide will receive support from both sides of the aisle.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 795

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Foreign Trade Antitrust Improvements Act of 1981".

SEC. 2. The Sherman Act (15 U.S.C. 1 et seq.) is amended by inserting after section 6 the following new section:

"SEC. 7. This Act shall not apply to conduct involving trade or commerce with any foreign nation unless such conduct has a direct and substantial effect on trade or commerce within the United States or has the effect of excluding a domestic person from trade or commerce with such foreign nation.".

SEC. 3. Section 7 of the Clayton Act (15 U.S.C. 18) is amended by adding at the end thereof the following:

"This section shall not apply to joint ventures limited solely to export trading, in goods or services, from the United States to a foreign nation.".

By Mr. ZORINSKY:

S. 796. A bill entitled "Rural Telephone Bank Amendment Act of 1981"; to the Committee on Agriculture, Nutrition, and Forestry.

RURAL TELEPHONE BANK AMENDMENT ACT OF 1981

Mr. ZORINSKY. Mr. President, I am introducing legislation today to extend the authorization for the Federal purchase of class A stock of the Rural Telephone Bank. This bill will continue the annual $30 million Federal purchase of stock for another 10 years. In addition, the bill will delay the repayment by the Bank of the Federal money until after September 30, 1995.

The Rural Telephone Bank was established by Public Law 92–12 which authorized the Federal Government to purchase annual increments of $30 million of class A stock of the bank. The money from this purchase, when added to funds from other sources, produces loan funds that bear interest at an intermediate cost level. These interest levels are designed to base the cost of money on the ability of the small rural telephone companies to pay. This in turn reduces the need for the low cost insured programs of the Rural Electrification Administration.

Recently, studies have shown that without further purchases of class A stock by the Government, interest rates for Rural Telephone Bank loans would escalate dramatically, forcing a number of telephone companies who currently meet the criteria for a Rural Telephone Bank loan into the lower interest insured program. The net result would be an increased cost to the Government.

During its short history the bank has proven successful in meeting the demand for loan funds for the development of rural telephone service. However, accelerating technological advances in telecommunications will make a much stronger source of intermediate cost financing needed in the future if rural areas are to maintain communications services and facilities equivalent to those available in urban areas.

The record of the telephone companies in their commitment to serve our farm families, and the accomplishments of the Rural Electrification Administration and the Rural Telephone Bank convinces me that this legislation is needed to assure the continuation of this most successful program. To date, the Rural Telephone Bank has provided over $1.3 billion in loan funds to improve existing telephone plants and to build new telecommunication facilities in the remote areas of our Nation. It is estimated that more than 12 million persons are presently served by these facilities.

Since the Federal Government first provided funds for the development of rural telephone systems in 1949, much has been accomplished. There is complete agreement that, without the REA and the moneys and the technical expertise it has provided, the public goal of universal service, or single-party telephone service in every home, could not have come as far as it has. But there is still much to be done. There remain many locations in rural America where this goal has not been reached. Furthermore, the enhanced services now being offered in urban and suburban America must of necessity, be made available to rural America if they are to be brought into the telecommunications mainstream of this country.

Mr. President, I urge my colleagues to join me in working toward speedy passage of this bill. I ask unanimous consent that the text of this bill and a copy of the Comptroller General's report to Congress on the Rural Telephone Bank for fiscal year 1979 be printed in the RECORD.

There being no objection, the bill letter and the report were ordered to be printed in the RECORD, as follows:

S. 796

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Rural Telephone Bank Amendment Act of 1981".

SEC. 2. The Rural Electrification Act of 1936, as amended (7 U.S.C. 901–950 b), is further amended as follows:

(a) The second sentence of section 406(a) is amended by inserting after "thereafter" the words "but not later than fiscal year 1991", and by striking "$300,000,000" and inserting in lieu thereof "$600,000,000".

(b) The first sentence of section 406(c) is amended by striking "September 30, 1985" and inserting in lieu thereof "September 30, 1995" and by striking "and after the amount of class A and class B stock issued totals $400,000,000".

COMPTROLLER GENERAL OF THE UNITED STATES,
Washington, D.C.

To the President of the Senate and the Speaker of the House of Representatives:

This report summarizes the results of our examination of the financial statements of the Rural Telephone Bank, Department of Agriculture, for the fiscal year ended September 30, 1979.

The financial statements for the year ended September 30, 1978, which are presented for comparative purposes only, were not examined by us. Therefore, we do not express an opinion on the 1978 statements.

We made our examination pursuant to the Government Corporation Control Act (31 U.S.C. 841).

Copies of the report are being sent to the Director, Office of Management and Budget; the Secretaries of Agriculture and the Treasury; and the Governor, Rural Telephone Bank.

ELLMER B. STAATS,
Comptroller General of the United States.

REPORT

CHAPTER 1—INTRODUCTION

Public Law 92–12 dated May 7, 1971, established the Rural Telephone Bank (RTB) to make loans for the construction, improvement, expansion, acquisition, and operation of telephone lines, facilities, or systems in rural areas. The law amended the Rural Electrification Act of 1936 (7 U.S.C. 901) which, since 1949, has authorized the Administrator of the Rural Electrification Administration (REA), Department of Agriculture, to make loans for essentially the same purposes as the REA telephone program, that is, furnishing and improving telephone service in rural areas. To the extent practicable, RTB is to obtain funds from non-Federal sources and to conduct its operations on a self-sustaining basis.

In fiscal year 1979 RTB loaned $130 million to rural telephone systems. It has loaned $1.2 billion since its inception. The amounts borrowed from the U.S. Treasury, interest earned on loans, and proceeds from the sale of stock are RTB's primary sources of funds.

Management and administration

RTB, an agency of the Federal Government, is subject to the direction of the Secretary of Agriculture. The Administrator of the Rural Electrification Administration, who is also the Governor of RTB, is RTB's chief executive officer.

RTB has a 13-member board of directors which is responsible for its management. The Administrator of REA, the Governor of the Farm Credit Administration, five Presidential appointees, and six people elected by RTB's stockholders serve on the board. RTB has no employees; however, the RTB operations are performed by REA employees who also have similar responsibilities for REA operations.

Capitalization

RTB issues three classes of capital stock: (1) class A to the Government, (2) class B to RTB borrowers, and (3) class C to RTB

borrowers, organizations eligible to borrow, and organizations controlled by borrowers or eligible borrowers.

Class A stock

Class A stock has a par value of $1 a share and is issued, at par, only to the Administrator of REA on behalf of the United States. The United States provides money for the purchase of class A stock by REA. Public Law 92–12 authorizes the Congress to appropriate up to $30 million annually for the purchase of class A stock until RTB has issued $300 million of class A stock. As of September 30, 1979, RTB had $247,500,000 of class A stock outstanding.

Public Law 92–12 also authorizes RTB to pay the United States a 2-percent annual return on the class A stock outstanding. This return is cumulative and must be paid from RTB's income. In fiscal year 1979 RTB paid $4.9 million to the U.S. Treasury.

RTB must retire its class A stock as soon as practicable after September 30, 1985, as long as its Board of Directors determines that such retirement will not impair RTB's operations.

Class B stock

Class B stock has a par value of $1 a share. Borrowers must purchase, at par, class B stock equaling 5 percent of the amount borrowed excluding the amounts borrowed to purchase such stock. As of September 30, 1979, RTB had $56 million of class B stock outstanding. Although class B stockholders do not receive dividends, they receive annual patronage refunds in the form of additional shares of class B stock. RTB's Board of Directors determines the amount of the patronage refund, which is made from net income after deducting the return on class A stock, cash dividends on class C stock, and any addition to the reserve for contingencies. In fiscal year 1979 RTB issued $3.7 million of class B stock as a patronage refund.

Class C stock

Class C stock has a par value of $1000 a share and is issued at par only to borrowers; to corporations and public bodies eligible to borrow; or to organizations controlled by such borrowers, corporations, and public bodies. As of September 30, 1979, RTB had $548,000 of class C stock outstanding.

Class C stockholders may be paid dividends from RTB's income if the Board of Directors declares such dividends. The Board can only declare dividends on class C stock when income exceeds the 2-percent return on class A stock. Until all class A stock is retired, the dividend on class C stock cannot exceed the average rate of interest RTB pays to borrow money. In fiscal year 1979 RTB paid $32,820 in dividends on class C stock.

Conversion of ownership, operation, and control of the bank

When 51 percent of the maximum amount of class A stock issued and outstanding at any time after September 30, 1985, has been retired:

The powers and authority of the Administrator of REA will be vested in RTB's Board of Directors, and the Board will select a new Governor for RTB.

The five Board members appointed by the President will no longer be members of the Board.

RTB will no longer be a U.S. agency.

RTB will continue as an instrumentality of the United States and a banking corporation.

When all class A stock has been retired, RTB loans will not be subject to restrictions imposed by Public Law 92–12; however, after that time, the Congress can continue to review RTB's operations.

CHAPTER 2—OPERATIONS

Borrowing power

Public Law 92–12 authorizes RTB to obtain funds by selling its bonds, debentures, notes, and other evidences of indebtedness (collectively called telephone debentures). RTB's Board of Directors determines when telephone debentures may be issued, their interest rate, and other terms and conditions. The amount of outstanding telephone debentures may not exceed 20 times RTB's paid-in capital and retained earnings.

On June 30, 1972, Public Law 92–324 gave the Secretary of the Treasury the authority to purchase RTB's telephone debentures. The Secretary of the Treasury determines the rate of return that must be realized on any telephone debentures purchased. The current average yield on outstanding marketable U.S. securities with comparable maturity must be considered.

At September 30, 1979, cumulative debentures borrowings from the Secretary of the Treasury amounted to $394,868,000 at various interest rates, as shown below.

	Borrowings from Treasury from inception through Sept. 30, 1979
Interest rate:	
7.250	$5, 071, 000
7.375	7, 667, 000
7.500	10, 017, 000
7.625	10, 461, 000
7.750	24, 451, 000
7.875	23, 603, 000
8.000	11, 092, 000
8.125	60, 571, 000
8.250	48, 290, 000
8.375	53, 989, 000
8.500	37, 376, 000
8.625	9, 037, 000
8.750	11, 647, 000
8.875	6, 103, 000
9.000	52, 995, 000
9.125	12, 097, 000
9.250	4, 401, 000
Total	394, 868, 000

RTB can repay amounts borrowed from the Treasury through the sale of telephone debentures at any time. Repayments will be applied to the oldest amounts outstanding. No amounts borrowed from the Treasury had been repaid as of September 30, 1979.

The Secretary of the Treasury can sell acquired telephone debentures at any price considered appropriate. All purchases and sales of telephone debentures by the Secretary are treated as public debt transactions of the United States.

Lending power

RTB can make loans, in conformity with policies approved by the Board of Directors, to corporations and public bodies which have received an REA loan or loan commitment or have been certified by the Administrator of REA to be eligible for a loan or loan commitment. RTB's loans may be made—

For the same purposes as REA loans made under section 201;

To finance or refinance the construction, improvement, expansion, acquisition and operation of telephone lines, facilities, or systems in rural areas to improve efficiency, effectiveness or financial stability of borrowers; or

To finance the purchase of class B stock.

The Rural Electrification Act requires that RTB, rather than REA, loan funds if the borrower is eligible for an RTB loan and RTB has funds available. However, all loans for telephone system facilities which, on the average, will have three or fewer subscribers for each mile of telephone line are to be made by REA unless the borrower elects to take an RTB loan instead.

RTB loans can only be made when, in the judgment of the Governor of RTB, (1) the loan has adequate security and will be repaid within the time agreed and (2) the borrower is able to earn net income before interest which is at least 150 percent of the interest requirements on all of its outstanding and proposed loans or, if this is not true, this requirement should be waived because it prevents emergency restoration of the borrower's system or otherwise results in severe hardship to the borrower.

The Governor of RTB determines the terms and conditions of RTB loans that are not specified by law. The Rural Electrification Act, as amended, requires that the interest rate on an RTB loan be equal to RTB's average cost of money; however, the interest rate cannot be less than 5 percent per annum. The act also requires that RTB loans be repaid within 50 years.

RTB borrowers may not sell or dispose of property, rights, or franchises acquired under the provisions of the Rural Electrification Act, as amended, without the approval of RTB's chief executive officer until any loans obtained from RTB, including all interest and charges, have been repaid.

Cost of operations

The interest cost of money borrowed from the Treasury through the sale of telephone debentures in fiscal year 1979 ranged from 8.875 to 9.25 percent a year. The total interest cost for fiscal year 1979 was $27,930,503.

The Rural Electrification Act authorizes RTB to partially or jointly use the facilities and services of REA or any other agency of the Department of Agriculture without cost, and thus are not shown as expenses on the RTB statement. Costs incurred by REA as it provides facilities and services to RTB are generally for salaries and related benefits, employee travel, and automatic data processing.

CHAPTER 3—SCOPE OF EXAMINATION AND OPINION ON FINANCIAL STATEMENTS

Scope of examination

We have examined the Statement of Financial Condition as of September 30, 1979, and the Statements of Income, Expenses, and Patronage Capital and Changes in Financial Condition for the fiscal year ended September 30, 1979. Our examination was made in accordance with Comptroller General standards for financial and compliance audits and included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances. We also reviewed RTB's system of internal control and its compliance with applicable laws, rules, and regulations.

The financial statements for the year ended September 30, 1978, which are presented for comparative purposes only, were not examined by us. Therefore, we do not express an opinion on the 1978 statements.

Opinion on financial statements

In our opinion, the accompanying financial statements (schedules 1 through 3) present fairly the financial position of the Rural Telephone Bank at September 30, 1979, and its income, expenses, patronage capital, and changes in financial position for the fiscal year then ended, in conformity with generally accepted accounting principles.

By Mr. MATHIAS (for himself and Mr. SARBANES):

S. 797. A bill to provide for the issuance of a postage stamp to commemorate the 200th anniversary of the election of John Hanson of Maryland as first President of the United States in Congress assembled; to the Committee on Governmental Affairs.

ISSUANCE OF POSTAGE STAMP HONORING THE ANNIVERSARY OF THE ELECTION OF JOHN HANSON OF MARYLAND AS FIRST PRESIDENT OF THE UNITED STATES IN CONGRESS ASSEMBLED

(Remarks on this legislation appear earlier in today's RECORD.)

By Mr. RIEGLE (for himself and Mr. LEVIN):

S. 798. A bill to provide a program of emergency unemployment compensation; to the Committee on Finance.

EMERGENCY UNEMPLOYMENT COMPENSATION ACT

● Mr. RIEGLE. Mr. President, I am today introducing legislation for myself and Senator LEVIN to establish a program of emergency unemployment benefits for individuals who have exhausted their entitlement to regular and extended unemployment benefits under existing law.

Most States now provide 26 weeks of unemployment benefits under their regular State unemployment compensation program. During periods of high unemployment, a maximum of 13 additional weeks of benefits are payable under the Federal-State extended benefits program, to workers who have exhausted their regular State benefits without securing employment. Extended benefits are payable in a particular State if the rate of insured unemployment in that State is at least 4 percent, but only if the State's insured unemployment rate is 20 percent higher than it was in the preceding 2 years.

At the State's option, extended benefits in that State can also be triggered if the State's insured unemployment rate is at least 5 percent, without regard to how that rate compares to previous years. In addition, extended benefits are payable in all States if insured unemployment for the Nation as a whole equals or exceeds 4.5 percent in each of the 3 most recent calendar months.

During the 1975–77 recession, it rapidly became evident that the combination of regular and extended benefits under existing law was insufficient to protect workers against sustained levels of severe unemployment. Tens of thousands of workers exhausted extended benefits, but were unable to find jobs in an economy suffering from deep recession.

In response, the Congress enacted the Federal supplemental benefits program providing a temporary extension of unemployment benefits for jobless workers. While the legislation initially provided that workers could collect a maximum of 65 weeks in combined State, extended and Federal supplemental benefits, this was subsequently lowered to a combined maximum of 52 weeks.

The Emergency Unemployment Compensation Act, which established this temporary additional benefit protection, expired in 1978. As a result, individuals in States with high unemployment who exhaust their benefits today are left to fend for themselves.

On August 28, 1980, in response to persistently high unemployment, President Carter called for legislation to extend the duration of unemployment benefits for jobless workers hit by the recession.

Legislation (H.R. 8146) authorizing an additional 10 weeks of emergency unemployment benefits passed the House on September 30, 1980, by a vote of 336 to 71. On October 1, 1980, the Senate approved H.R. 8146 by voice vote. H.R. 8146 would have made jobless workers eligible for a maximum of 49 weeks of combined regular, extended, and supplemental unemployment benefits.

Although both the House and Senate-passed versions of H.R. 8146 provided for a 10-week benefit extension, a controversial package of amendments dealing with other aspects of the unemployment insurance program were added to the bill on the Senate floor. The House and Senate were unable to resolve their differences prior to the sine die adjournment of the 96th Congress and the legislation was thus not enacted.

The need for emergency legislation extending the duration of unemployment benefits has not diminished, however. Nationally, unemployment stands at 7.4 percent. High as this figure is, the situation in many States is even more severe.

In my own State of Michigan, seasonally adjusted unemployment has now reached 14.2 percent, and 604,000 people are jobless. The extended benefits program has been triggered on in Michigan since October 6, 1979.

More than 300,000 jobless workers are collecting unemployment insurance; 260,700 jobless workers have already exhausted their unemployment benefits without being able to secure employment in Michigan's severely distressed economy.

The number of exhaustees is projected to climb at a rate of 20,000 persons per month for the foreseeable future, according to Michigan's Employment Security Commission.

Nor is Michigan the only State suffering from severe unemployment. In January 1981, the unemployment rate in Ohio was 10.4 percent, in Illinois 9.9 percent, in Pennsylvania 9.1 percent, and in New York 8.3 percent.

These jobless workers have lost their jobs through no fault of their own. After they exhaust the unemployment benefits available under current law, they often have no place to turn. Few of their families are immediately eligible for welfare—and in those 26 States which do not cover families where both parents are present in the home under their welfare system, they will never be eligible.

Furthermore, few States provide adequate emergency assistance to those not eligible for welfare.

The stress which these jobless workers and their family face is reflected in increased alcohol and drug abuse, in depression and other health and mental health problems, and in family instability.

These workers and their families need and deserve our attention. The legislation we are introducing today would provide badly needed additional protection under the unemployment insurance system. I urge my colleagues to join me in supporting this urgent and important legislation.●

● Mr. LEVIN. Mr. President, I am pleased to cosponsor legislation introduced by Senator RIEGLE today which will establish a program of emergency unemployment benefits for individuals who have exhausted their regular 26 weeks and extended 13 weeks of benefits.

In the 96th Congress, Senator RIEGLE and I introduced a similar bill. On October 1, 1980, this bill was debated and considered by the Senate and in a modified form agreed upon.

A great deal of work went into this legislation and with the assistance of members of the Finance Committee, we were able to pass this important piece of legislation. Unfortunately, we were unable to come to an agreement with the House and the bill died.

The unemployment situation in the United States has worsened since we originally introduced this bill last spring. At that time, the national unemployment rate was 7 percent, now it is 7.3 percent. The latest figures for the 10 largest States show unemployment rates higher now than a year ago in 9 of the 10 States.

For all of 1980, the average unemployment rate was 7.1 percent up considerably from the 5.8 percent average of the preceding year. For February 1981, there were 7.8 million Americans officially unemployed. That is a totally unacceptable figure.

I might add that in the fourth quarter of 1980, there were an additional 1.055 million "discouraged workers," persons who are not counted in the unemployment figures because they have given up looking for work in our depressed economy.

In my home State of Michigan, the situation is even worse. The latest figures we have are February and they show an adjusted unemployment rate of 13.5 percent with 574,000 workers unemployed. The unadjusted figures place the rate at 14.2 percent with 604,000 persons out of work.

These statistics reflect nearly a 3-percent increase over a year ago, with about 100,000 more workers unemployed. Even more serious is that 20,000 Michigan workers are exhausting their regular and extended benefits each month.

More workers ran out of benefits in 1980 than at any time in the program's 43-year history. That figure is estimated to be 285,000.

Naturally, with this increasing unemployment and exhaustion of benefits, many, many workers are finding themselves without any source of income except welfare.

For these citizens, the current state of our economy is more than a statistic. It is the denial of their ability to discharge their basic measure of human worth—the ability to be a productive and contributing member of this society. We have an environment in which people cannot find work, and a system which punishes them for not working.

During the recession of the mid-1970's, we had a similar situation and Congress acted by authorizing a similar program to the one introduced today and provided an additional 13 weeks of emergency unemployment benefits.

Congress should act quickly to take the same action now. There is simply no reason why we should force members of our work force onto the welfare rolls.

In Michigan, the caseloads for AFDC-U and general assistance have increased dramatically over the past year. Long-term unemployment already places a

great deal of tension on our out-of-work citizens and their families. The eligibility requirements of welfare which requires persons to divest themselves of their possessions and resources and the social stigma often inappropriately applied to welfare recipients ought not be added to the woes of those who have exhausted unemployment benefits.

The situation does not promise much improvement during 1981. The President's 1982 budget assumes 7 percent average unemployment for 1981. The Congressional Budget Office estimates 7.9 percent in the second quarter of 1981 and some private forecasters believe the number of workers unemployed in 1981 will exceed 8 percent.

We need a program of emergency unemployment benefits for workers who have exhausted their extended benefits or will do so in the near future. These workers are involuntarily unemployed and we must come to their assistance now as Congress has done in the past.●

By Mr. HATCH:

S. 799. A bill to amend the Public Health Services Act to revise and extend titles VII and VIII of such act with regard to training in health professions and nursing, and for other purposes; to the Committee on Labor and Human Resources.

HEALTH PROFESSIONS EDUCATIONAL ASSISTANCE AND NURSE TRAINING ACT

Mr. HATCH. Mr. President, I am today introducing the Health Professions Educational Assistance and Nurse Training Act of 1981. This is a thorough reexamination of titles VII and VIII of the Public Health Service Act, which provides for Federal programs affecting the education of the health professionals, including nurses. This bill builds upon the work done over the last 2 years by the Senate Committee on Labor and Human Resources, especially our distinguished former colleague, Secretary Richard S. Schweiker. However, in recognition of the current budgetary constraints, this bill is lean. It reflects a number of hard decisions that may not be popular but which are my considered judgment as to where the highest Federal priorities are within the scope of this legislation. As a result, some worthwhile programs have not been continued and in a number of potentially useful areas new initiatives have not been sought. However, I believe that this bill does justice to the most pressing needs within the health professions.

My bill, in dealing with institutional support, special projects, construction, and other traditional areas of support, is guided by one overarching principal: That there will be a substantial physician "surplus" by the mid-1980's and that this will result in substantial changes in the delivery of health care in the United States. Previous health manpower legislation has had just the opposite purpose: To alleviate the physician shortage. The changes proposed in my bill are in part a tribute to the success of these past efforts.

I am convinced that the surplus will result in more competition among providers, a better geographic distribution of health care services, and a better specialty distribution among physicians.

Though figures clearly show a surplus of physicians and other health care providers, I am concerned shortages still remain in the field of nursing. A need for more highly skilled and trained nurse specialists, salaries, and advancement which are not competitive with other careers, unattractive hours and working conditions, all contribute to current nurse shortages. There is a Federal role, though limited, in eliminating these shortages. Through title VIII, The Nurse Training Act, we can help improve the attractiveness of the nursing profession, put emphasis on career mobility for diploma and associate degree nurses through enhancement of their educational credentials and provide opportunities for advanced nurse training. Further through loan and grant programs under the Higher Education Act, we can continue to assist nursing students in obtaining financial assistance for their education.

In revising the health manpower legislation, my bill attempts to focus the limited resources on the very few areas which still need Federal attention: Stimulating training in primary care and rehabilitative medicine; assuring adequate professional support for individuals who practice in underserved areas; improving the attractiveness of the nursing profession; helping health professions schools to attract and retain more disadvantaged students; and assisting health professions schools to survive limited periods of financial distress.

Specifically, the main features of my bill are:

First, the health education assistance loan (HEAL) program under which health professions students can borrow through the private loan capital market to finance their education is continued;

Second, the health professions student loan program and the nursing student loan program, which provide direct loans to health professions students, are allowed to continue using funds available from the revolving funds. Interest rates under the program are increased. No new Federal appropriations are needed for this program;

Third, the National Health Service Corps scholarship is transferred to title III of the Public Health Service Act where it is covered by another bill I have introduced today;

Fourth, the existing programs to stimulate primary care—family medicine, general internal, and pediatric medicine—are revised and continued. This includes support for residency programs, programs to train students and teachers, and support for family medicine departments;

Fifth, two new provisions highlight important areas of concern for the 1980's: Professional support for health care providers practicing in underserved areas and training needs in physical and rehabilitative medicine;

Sixth, an existing program to assist health professions schools to survive limited periods of financial distress is continued but in an extensively revised form;

Seventh, the disadvantaged assistance program, designed to help health professions schools to recruit and retain disadvantaged students, is continued;

Eighth, project grants for public health and health administration are continued; and

Ninth, special projects and advanced training—including nurse practitioners—for nurses are revised and continued.

I urge my colleagues to join me in supporting this bill. I recognize that to do so they must put aside special interest concerns, recognizing the paramount need to restrain Federal expenditures. This bill exemplifies how this goal can be accomplished responsibly, by assuring that the most critical needs, both old and new, are met.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 799

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) this Act may be cited as the "Health Professions Educational Assistance and Nurse Training Act of 1981".

(b) Except as otherwise specifically provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Health Service Act.

EFFECTIVE DATE

SEC. 2. Except as otherwise specifically provided, this Act and the amendments and repeals made by this Act shall take effect on October 1, 1981.

TITLE I—AMENDMENTS TO TITLE VII

PART A—AMENDMENTS TO GENERAL PROVISIONS

LIMITATION OF USE OF APPROPRIATIONS

SEC. 101. Section 700 is repealed.

DEFINITIONS

SEC. 102. (a) Section 701 (2) is amended to read as follows:

"(2) The term 'nonprofit' refers to the status of an entity owned and operated by one or more corporations or associations no part of the net earnings of which inures, or may lawfully inure, to the benefit of any private shareholder or individual.".

(b) (1) Section 701 is amended by striking out paragraph (3) and redesignating paragraph (4) as paragraph (3).

(2) Section 701(3) (as redesignated by paragraph (1) of this subsection) is amended—

(A) by striking out "a school which" and inserting in lieu thereof "an accredited public or nonprofit private school in a State that"; and

(B) by adding at the end thereof the following: "The term 'graduate program in health administration' means an accredited graduate program in a public or nonprofit private institution in a State that provides training leading to a graduate degree in health administration or an equivalent degree.".

(c) Section 701 is further amended by inserting after paragraph (3) (as redesignated by subsection (b) (1) of this section), the following new paragraph:

"(4) The term 'accredited', when applied to a school of medicine, osteopathy, dentis-

try, veterinary medicine, optometry, podiatry, pharmacy or public health, or a graduate program in health administration, means a school or program that is accredited by a recognized body or bodies approved for such purpose by the Secretary of Education, except that a new school or program that, by reason of an insufficient period of operation, is not, at the time of application for a grant or contract under this title, eligible for accreditation by such a recognized body or bodies, shall be deemed accredited for purposes of this title, if the Secretary of Education finds, after consultation with the appropriate accreditation body or bodies, that there is reasonable assurance that the school or program will meet the accreditation standards of such body or bodies prior to the beginning of the academic year following the normal graduation date of the first entering class in such school or program.".

(d) Section 701 is further amended by redesignating paragraphs (9) and (10) as paragraphs (11) and (12), respectively, and by inserting after paragraph (8), the following new paragraphs:

"(9) The term 'allied health personnel' means individuals trained at the associate, baccalaureate, master's, or doctoral degree level in a health care related science, with responsibility for the delivery of health care related services (including services related to the identification, evaluation and prevention of diseases and disorders, dietary and nutrition services, health promotion, rehabilitation, and health systems management), but who, for the purposes of this title, are not graduates of schools of medicine, osteopathy, dentistry, veterinary medicine, optometry, podiatry, chiropractic, pharmacy, public health, or nursing, or a graduate program in health administration.

"(10) The term 'school of allied health' means a public or nonprofit private junior college, college, or university—

"(A) which provides, or can provide, programs of education in a discipline of allied health leading to a baccalaureate or associate degree (or an equivalent degree of either) or to a more advanced degree;

"(B) which provides training for not less than a total of twenty persons in the allied health curricula;

"(C) which includes or is affiliated with a teaching hospital; and

"(D) which is accredited by a recognized body or bodies approved for such purposes by the Secretary of Education, or which provides to the Secretary satisfactory assurance by such accrediting body or bodies that reasonable progress is being made toward accreditation.".

(e) Section 701(11) (as redesignated by subsection (d) of this section) is amended by inserting "the Commonwealth of" before "the Northern Mariana Islands,".

(f) Section 701(12) (as redesignated by subsection (d) of this section) is amended by such accrediting body or bodies that reasonable progress is being made toward accreditation.".

NATIONAL ADVISORY COUNCIL ON HEALTH PERSONNEL

SEC. 103. (a) The section heading for section 702 is amended to read as follows:

"NATIONAL ADVISORY COUNCIL ON HEALTH PERSONNEL"

(b) Section 702(a) is amended—

(1) by striking out "Professions Education" after "National Advisory Council on Health" and inserting in lieu thereof "Personnel";

(2) by striking out "(or his delegate)" and inserting in lieu thereof "(or the delegate of the Secretary)";

(3) by striking out "twenty" after "who shall be Chairman of the Council, and" and inserting in lieu thereof "twenty-two";

(4) by inserting "among" before "persons who because of their education";

(5) by striking out "parts B, C, D, E, F and G of";

(6) by striking out clause (1) and inserting in lieu thereof "(1) fourteen shall be representatives of the schools and graduate programs assisted under this title, including at least one representative from each of the types of schools and programs defined in paragraphs (3) and (10) of section 701,";

(7) by striking out "two" in clause (2) and inserting in lieu thereof "three"; and

(8) by inserting "or interns or residents," after "health professions schools," in clause (2).

(c) Section 702 is further amended—

(1) by striking out "(other than subpart II of part G thereof)" each place it appears; and

(2) by striking out "he" in subsection (C) and inserting in lieu thereof "the Secretary".

ADVANCE FUNDING

SEC. 104. Section 703 is amended—

(1) by striking out "(a)"; and

(2) by striking out subsection (b).

RECORDS AND AUDITS

SEC. 105. The second sentence of section 705(a) is repealed.

NONINTERFERENCE WITH ADMINISTRATION

SEC. 106. Section 707 is amended to read as follows:

"NONINTERFERENCE WITH ADMINISTRATION OF INSTITUTIONS

"SEC. 707. Nothing in this title shall be construed as authorizing any department, agency, officer, or employee of the United States to exercise any direction over, or supervision of, or control over, or impose any requirement or condition with respect to, the personnel, curriculum, methods of instruction, or administration of any institution.".

HEALTH PROFESSIONS DATA

SEC. 107. (a) Section 708 is amended by redesignating subsections (e), (f), and (g), as subsections (f), (g), and (h), respectively.

(b) Section 708 is further amended by striking out subsections (a) through (d) and inserting in lieu thereof the following new subsections:.

"SEC. 708. (a) The Secretary shall establish a program to collect, compile, and analyze data on health professions personnel, including allopathic physicians, osteopathic physicians, dentists, pharmacists, optometrists, podiatrists, veterinarians, public health personnel, health care administration personnel, nurses, allied health personnel, and any other health personnel in States designated by the Secretary to be included in the program. Such data shall include data respecting the training, licensure status (including permanent, temporary, partial, limited, or institutional), place or places of practice, professional specialty, practice characteristics, place and date of birth, sex, and socioeconomic background of health professions personnel, and such other demographic information regarding health professions personnel as the Secretary may require.

"(b) In carrying out subsection (a), the Secretary shall collect available information from public or private entities. The Secretary may make grants to and enter into contracts with public and private entities for the collection of information not otherwise available.

"(c) The Secretary, in cooperation with appropriate public and private entities, shall—

"(1) analyze or provide for the analysis of health personnel data collected under this section;

"(2) conduct or provide for the conduct of—

"(A) analytic and descriptive studies of health personnel information, including studies of the need for, and supply of, health personnel; and

"(B) projections relating to such need and supply in the future, compiled according to type of personnel, practice specialty, and geographic location; and

"(3) conduct or provide for the conduct of analytic and descriptive studies of information on health students, interns, residents, and practitioners who are participating in health professions education, and on health personnel education programs and institutions, including institutional resources, student financial requirements and indebtedness, student characteristics such as age, sex, race, ethnicity and socioeconomic background, and apparent career choices such as practice specialty and geographic location.

"(d) Any school, program, or training center receiving funds under this title or title VIII shall submit an annual report to the Secretary. Such report shall contain such information as is necessary to assist the Secretary in carrying out this section and evaluating the efficacy of these programs in addressing national health priorities. The Secretary shall not require the collection or transmittal of any information under this subsection that is not readily available to such school, program, or training center. Information provided pursuant to this subsection shall be collected or transmitted only to the extent permitted under subsection (f).

"(e) The Secretary shall submit to Congress on October 1, 1982, and biennially thereafter, the following reports:

"(1) a comprehensive report regarding the status of health personnel according to profession, including a report regarding the analytic and descriptive studies conducted under this section; and

"(2) a comprehensive report regarding applicants to, and students enrolled in, programs and institutions for the training of health personnel, including descriptions and analyses of student indebtedness, student need for financial assistance, financial resources to meet the needs of students, student career choices such as practice specialty and geographic location and the relationship, if any, between student indebtedness and career choices.".

(c) Section 708(h) (as redesignated by subsection (a) of this section) is amended to read as follows:

"(h) There are authorized to be appropriated to carry out this section $3,000,000 for the fiscal year ending September 30, 1982, and for each of the two succeeding fiscal years.".

SHARED SCHEDULED RESIDENCY TRAINING POSITIONS

SEC. 108. (a) Section 709 is repealed.

(b) Sections 710 and 711 are redesignated as sections 709 and 710, respectively.

PAYMENT UNDER GRANTS

SEC. 109. Section 709 (as redesignated by section 108(b) of this Act) is amended to read as follows:

"APPLICATIONS, PAYMENTS, AND ASSURANCES UNDER GRANTS

"SEC. 709. (a) Grants made under this title may be paid (1) in advance or by way of reimbursement, (2) at such intervals and on such conditions as the Secretary may find necessary, and (3) with appropriate adjustments on account of overpayments or underpayments previously made.

"(b) No grant may be made or contract entered into under this title unless an application therefor has been submitted to and approved by the Secretary. Such application shall be in such form, submitted in such

manner, and contain such information, as the Secretary shall by regulation prescribe.

"(c) Whenever in this title an applicant is required to provide assurances to the Secretary, or an application is required to contain assurances or be supported by assurances, the Secretary shall determine before approving the application that the assurances provided are made in good faith.

"(d) The Secretary may provide technical assistance for the purpose of carrying out any program or purpose under this title.".

TUITION AND OTHER EDUCATIONAL COSTS

SEC. 110. Section 710 (as redesignated by section 108(b) of this Act) is amended to read as follows:

"DIFFERENTIAL TUITION AND FEES

"SEC. 710. The Secretary may not enter into a contract with, or make a grant, loan guarantee, or interest subsidy payment under this title or title VIII, to or for the benefit of, any school, program, or training center if the tuition levels or educational fees at such school, program, or training center are higher for certain students solely on the basis that such students are the recipients of traineeships, loans, loan guarantees, service scholarships, or interest subsidies from the Federal Government.".

Part B—GRANTS AND LOANS FOR CONSTRUCTION OF TEACHING FACILITIES

APPROVAL OF APPLICATIONS

SEC. 121. Section 721 is amended by striking out subsections (c) through (g) and by amending subsection (b) to read as follows:

"(b)(1) To be eligible to apply for a grant under section 720, the applicant must be a public or other nonprofit school of medicine, osteopathy, dentistry, veterinary medicine, optometry, podiatry, pharmacy, or public health, or any combination of such schools.

"(2) An application for a grant under section 720 or loan guarantee or interest subsidy under section 726, which would involve the construction, conversion, renovation, or modernization of all or part of an ambulatory primary care teaching facility which is affiliated with but not owned by a school eligible for such grant under section 720 or loan guarantee or interest subsidy under section 726, shall be submitted jointly by the eligible school and the affiliated facility.

"(3) In the case of a joint application submitted under paragraph (2), assistance under section 720 or a loan guarantee or interest subsidy under section 726, shall be provided only for that portion of the proposed construction, conversion, renovation, or modernization which the Secretary determines to be reasonably attributable to the needs of such school for teaching or research purposes.".

ENROLLMENT COMMITMENTS

SEC. 122. (a) Section 725 is amended to read as follows:

"ENROLLMENT COMMITMENTS

"SEC. 725. The Secretary shall unilaterally release all recipients of grants, loan guarantees, and interest subsidies under sections 720(a) and 726 (as such sections were in effect prior to October 1, 1981) from any contractual obligation to fulfill enrollment increases incurred pursuant to such sections or under regulations published to implement such sections.".

(b) The amendment made by subsection (a) of this section shall take effect on the date of enactment of this Act.

LOAN GUARANTEES AND INTEREST SUBSIDIES

SEC. 123. (a) Section 726(a) is amended by striking out "September 30, 1980" after "and ending with the close of" and inserting in lieu thereof "September 30, 1984".

(b)(1) Section 726(b) is amended by striking out "September 30, 1980" after "with the close of" and inserting in lieu thereof "September 30, 1984."

(2) Section 726(b) is further amended by inserting before the period at the end thereof "and for loan guarantees and interest subsidies first made after September 30, 1981, such amounts as are sufficient to reduce the net effective interest rate otherwise payable on such loan—

"(1) by 6 percent per annum; or

"(2) to 7 percent per annum;

whichever is less".

(c) The second sentence of section 726(e) is amended by striking out "and" after "1979," and by inserting before the period a comma and "$4,300,000 for the fiscal year ending September 30, 1981, and $4,300,000 for the fiscal year ending September 30, 1982, and each of the next two fiscal years".

(d) Section 726(f)(2) is amended to read as follows:

"(2) In any fiscal year no loan guarantee may be made under subsection (a) and no agreement to make interest subsidy payments may be entered into under subsection (b) if the making of such guarantee or the entering into of such agreement would cause the total of—

"(A) the principal of the loans first guaranteed under subsection (a) in such fiscal year, and

"(B) the principal of the loans for which no guarantee has been made under subsection (a) and with respect to which an agreement to make interest subsidy payments is first entered into under subsection (b) in such fiscal year,

to exceed $10,000,000 in such fiscal year.".

(e) Section 726(g) is repealed.

Part C—STUDENT ASSISTANCE

SCOPE AND DURATION OF FEDERAL LOAN INSURANCE PROGRAM

SEC. 141. (a)(1) The first sentence of section 728(a) is amended by striking out "and" after "1979;" and by inserting before the period a semicolon and "and $100,000,000 for the fiscal year ending September 30, 1982, and for each of the next four fiscal years".

(2) The last sentence of such subsection is amended by striking out "1982" and inserting in lieu thereof "1987".

(b) Section 728(C) is amended by inserting "consolidate" after "sell," and by inserting before the period a comma and "except that no loan under this subpart may be consolidated if as a result of such consolidation the Federal Government becomes liable for any payment of principal or interest under the provisions of section 439(o) of the Higher Education Act of 1965".

LIMITATIONS

SEC. 142. Section 729(a) is amended to read as follows:

"LIMITATIONS ON INDIVIDUAL FEDERALLY INSURED LOANS AND ON FEDERAL LOAN INSURANCE

"SEC. 729. (a) The total of the loans made to a student in any academic year or its equivalent (as determined by the Secretary) which may be covered by Federal loan insurance under this subpart may not exceed $20,000 in the case of a student enrolled in a school of medicine, osteopathy, dentistry, veterinary medicine, optometry, or podiatry, and $12,500 in the case of a student enrolled in a school of pharmacy or public health, or a graduate program in health administration. The aggregate insured unpaid principal amount for all such insured loans made to any borrower shall not at any time exceed $80,000 in the case of a borrower who is or was a student enrolled in a school of medicine, osteopathy, dentistry, veterinary medicine, optometry, or podiatry, and $50,000 in the case of a borrower who is or was a student enrolled in a school of pharmacy or public health, or a graduate program in health administration. The annual insurable limit per student shall not be exceeded by a line of credit under which actual payments by the lender to the borrower will not be made in any year in excess of the annual limit.".

ELIGIBILITY OF STUDENT BORROWERS AND TERMS OF FEDERALLY INSURED LOANS

SEC. 143. (a)(1) Section 731(a)(1)(A) is amended by striking out clause (iii) and redesignating clauses (iv) and (v) as clauses (iii) and (iv), respectively.

(2) Clause (iii) of such section (as redesignated by paragraph (1) of this subsection) is amended by striking out "and" before "other reasonable educational expenses" and by inserting "and reasonable living expenses," after "and laboratory expenses,".

(b) Section 731(a)(2) is amended—

(1) in subparagraph (C) by inserting "and interest" after "installments of principal" and by striking out "and be paid" after "shall accrue";

(2) in subparagraph (D) by inserting "for the purposes of calculating a repayment schedule" before the semicolon;

(3) by striking out "and" after the semicolon at the end of subparagraph (E); and

(4) by redesignating subparagraph (F) as subparagraph (G) and inserting after subparagraph (E) the following new subparagraph:

"(F) offers the borrower a graduated repayment plan option with larger payments due later in the repayment period, pursuant to criteria set by the Secretary; and".

(c) Section 731(c) is amended by inserting before the period a comma and "except as provided in section 731(a)(2)(C)".

CERTIFICATE OF FEDERAL LOAN INSURANCE

SEC. 144. Section 732 is amended by adding at the end thereof the following new subsection:

"(f) Nothing in this section shall be construed to preclude the lender and the borrower, by mutual agreement, from consolidating all of the borrower's debts into a single instrument, except that the portion of such debt that is insured under this subpart shall not be consolidated on terms less favorable to the borrower than if no consolidation had occurred and no loan under this subpart may be consolidated with any other loan if, as a result of such consolidation, the Federal Government becomes liable for any payment of principal or interest under the provisions of section 439(o) of the Higher Education Act of 1965.".

DEFAULTS

SEC. 145. Section 733(g) is amended to read as follows:

"(g) A debt which is a loan insured under the authority of this subpart may be released by a discharge in bankruptcy under title 11, United States Code, only if such discharge is granted—

"(1) after the expiration of the five-year period beginning on the first date, as specified in subparagraphs (B) and (C) of section 731(a)(2), when repayment of such loan is required;

"(2) upon a finding by the Bankruptcy Court that the nondischarge of such debt would be unconscionable; and

"(3) upon the condition that the Secretary shall not have waived the Secretary's rights to apply subsection (f) to the borrower and the discharged debt.".

DEFINITIONS—STUDENT ASSISTANCE

SEC. 146. (a) Section 737 (1) is amended to read as follows:

"(1) The term 'eligible institution' means, with respect to a fiscal year, a school of medicine, osteopathy, dentistry, veterinary medicine, optometry, podiatry, pharmacy, or public health, or a graduate program in health administration.".

(b) Section 737 is further amended by striking out paragraph (2), and by redesignating paragraphs (3) and (4) as paragraphs (2) and (3), respectively.

ELIGIBLE STUDENTS

SEC. 147. Subpart I of part C of title VII is amended by inserting after section 737 the following new section:

"DETERMINATION OF ELIGIBLE STUDENTS

"SEC. 737A. For purposes of determining eligible students under this part, in the case of a public school in a State that offers an accelerated, integrated program of study combining undergraduate premedical education and medical education leading to advanced entry, by contractual agreement, into an accredited four-year school of medicine which provides the remaining training leading to a degree of doctor of medicine, whenever in this part a provision refers to a student at a school of medicine, such reference shall include only a student enrolled in any of the last four years of such accelerated, integrated program of study.".

ELIGIBILITY OF INSTITUTIONS

SEC. 148. (a) Section 739(a) is amended—

(1) by striking out paragraph (1) and redesignating paragraphs (2) and (3) as paragraphs (1) and (2), respectively;

(2) by striking out "and" at the end of paragraph (1) (as redesignated by paragraph (1) of this subsection);

(3) by striking out "whether" in paragraph (2) (as redesignated by paragraph (1) of this subsection) and inserting in lieu thereof "whenever";

(4) by striking out the period at the end of paragraph (2) (as redesignated by paragraph (1) of this subsection) and inserting in lieu thereof a semicolon and "and"; and

(5) by adding at the end thereof the following new paragraph:

"(3) the collection of information from the borrower, lender, or eligible institution to assure compliance with the provisions of section 731.".

(b) Section 739(b) is amended to read as follows:

"(b) The Secretary shall require an eligible institution to record, and make available to the lender and to the Secretary upon request, the name, address, postgraduate destination, and other reasonable identifying information for each student of such institution who has a loan insured under this subpart.".

LOAN AGREEMENTS

SEC. 149. Section 740(a) is amended by striking out "which is located in a State and is accredited as provided in setcion 721(b)(1)(B)".

INTEREST RATE

SEC. 150. Section 741(e) is amended to read as follows:

"(e) Such loans shall bear interest at the rate of 9 percent per year.".

DISTRIBUTION OF ASSETS FROM LOAN FUNDS

SEC. 151. Section 743 is amended by striking out "1983" each place it appears and inserting in lieu thereof "1986".

NATIONAL HEALTH SERVICE CORPS SCHOLARSHIP PROGRAM

SEC. 152. Section 751 through 757 are transferred to title III of the Public Health Service Act and renumbered sections 338A through 338G, respectively.

MISCELLANEOUS REPEALS

SEC. 153. Subpart V of part C, part D, and part E of title VII are repealed.

Part D—SPECIAL PROJECTS

PROGRAMS AND PROJECTS

SEC. 161. (a) Part F of title VII is redesignated as part D.

(b) Section 780 is amended to read as follows:

"PROJECT GRANTS FOR FAMILY MEDICINE

"SEC. 780. (a) The Secretary may make grants to schools of medicine and osteopathy to assist in meeting the costs to such schools of projects to establish and maintain or improve academic administrative units (which may be departments, divisions, or other units) to provide instruction and conduct research in the fields of family medicine.

"(b) There are authorized to be appropriated to carry out the provisions of this section $7,000,000 for the fiscal year ending September 30, 1982, and each of the next two fiscal years.".

AREA HEALTH EDUCATION CENTERS

SEC. 162. Section 781(g) is amended by—

(1) striking out "and" after "1979,"; and

(2) by striking out "the fiscal year ending September 30, 1980" and inserting in lieu thereof "each of the fiscal years ending September 30, 1980, and September 30, 1981, and $16,000,000 for the fiscal year ending September 30, 1982, and each of the next two fiscal years".

SUPPORT SERVICES IN UNDERSERVED AREAS

SEC. 163. Section 782 is amended to read as follows:

"SUPPORT SERVICES IN UNDERSERVED AREAS

"SEC. 782. (a)(1) The Secretary may make grants to and enter into contracts with schools of medicine, osteopathy, dentistry, veterinary medicine, optometry, podiatry, pharmacy, or other appropriate public or nonprofit private entities to assist in meeting the costs of planning, establishing, and operating projects to provide support services to health professionals practicing in health manpower shortage areas designated under section 332. Such support services may include continuing education, relief services, specialist referral services, and placement of students in a preceptorial relationship with the practitioner.

"(2) No grant may be made to or contract entered into with an entity under paragraph (1)—

"(A) unless the entity agrees to provide support services to any physician, dentist, veterinarian, optometrist, podiatrist, or pharmacist (as appropriate to the category of health professionals proposed to be served by the grant or contract) who requests such services within the health manpower shortage area proposed to be served, including any member of the National Health Service Corps;

"(B) to carry out activities required to be carried out under section 781; or

"(C) unless the amount of the award under this section is matched by a no less than equal amount from non-Federal sources.

"(3) Not more than 15 percent of the funds available to carry out this subsection may be used by the Secretary to fund eligible recipients to carry out research relating to the support needs of practitioners in health manpower shortage areas, nor shall more than 30 percent of such funds be used to provide continuing education.

"(b) There are authorized to be appropriated to carry out the provisions of this section $2,000,000 for the fiscal year ending September 30, 1982, $2,500,000 for the fiscal year ending September 30, 1983, and $3,000,000 for the fiscal year ending September 30, 1984.".

REHABILITATIVE MEDICINE

SEC. 164. Section 783 is amended to read as follows:

"GRANTS FOR TRAINING IN PHYSICAL AND REHABILITATIVE MEDICINE

"SEC. 783. (a) The Secretary may make grants to and enter into contracts with schools of medicine or osteopathy or other appropriate public or nonprofit private entities to assist in meeting the costs of such schools or entities of providing projects to—

"(1) plan, develop, and operate or maintain a physician residency training program in physical medicine and rehabilitation: or

"(2) provide financial assistance (in the form of traineeships and fellowships) to residents in any such program in need of financial assistance and who plan to specialize or work in physical medicine and rehabilitation.

"(b) There are authorized to be appropriated to carry out the provisions of this section $1,000,000 for the fiscal year ending September 30, 1982, $1,500,000 for the fiscal year ending September 30, 1983, and $2,000,000 for the fiscal year ending September 30, 1984.".

TRAINING GRANTS

SEC. 165. Section 784 is amended to read as follows:

"GRANTS FOR TRAINING IN FAMILY MEDICINE, GENERAL INTERNAL MEDICINE, AND GENERAL PEDIATRICS

"SEC. 784. (a) The Secretary may make grants to and enter into contracts with schools of medicine or osteopathy or other public and private nonprofit entities (including hospitals) to assist in meeting the costs of providing projects to—

"(1) plan, develop, and operate approved residency or internship training programs in family medicine which emphasize the training of residents for the practice of family medicine;

"(2) plan, develop, and operate approved residency training programs in internal medicine or pediatrics, which emphasize the training of residents for the practice of general internal medicine or general pediatrics;

"(3) plan, develop, and operate teaching programs for medical students in primary care (family medicine, general internal medicine, and general pediatrics), emphasizing preceptorship experiences with practicing physicians and clinical experiences in ambulatory settings.

"(4) plan, develop, and operate programs (that may be structured differently than residency training programs) for the training of physicians who plan to teach in family medicine, general internal medicine, or general pediatrics, training programs; and

"(b) To carry out the purposes of subsection (a)(1), there are authorized to be appropriated $16,000,000 for the fiscal year ending September 30, 1982 and each of the next two fiscal years. To carry out the purposes of subsection (a)(2), there are authorized to be appropriated $10,000,000 for fiscal year ending September 30, 1982 and each of the next two fiscal years. To carry out the purposes of subsection (a)(3) and (a)(4), there are authorized to be appropriated $6,000,000 for the fiscal year ending September 30, 1982 and each of the next two fiscal years.

"(c) Within each authorization provided in subsection (b) for the programs described in subsection (a), the Secretary may provide, as appropriate, funds for financial assistance (in the form of traineeships and fellowships) to medical and osteopathic students, interns (including interns in internships in osteopathic medicine), residents, practicing physicians, or other medical personnel, who are in need thereof, who are participants in any such program, and who plan to specialize, teach, or work in the practice of family medicine, general internal medicine or general pediatrics.".

FINANCIAL DISTRESS GRANTS

SEC. 166. Section 785 is amended to read as follows:

"FINANCIAL DISTRESS GRANTS

"SEC. 785. (a) The Secretary may make grants to, and enter into contracts with, a school of medicine, osteopathy, dentistry, veterinary medicine, optometry, pharmacy, podiatry, public health, or nursing, or a graduate program in health administration that is in serious financial distress for the purposes of assisting such school or program to—

"(1) meet the costs of operation if such school's or program's financial status threatens its continued operation;

"(2) meet applicable accreditation requirements if such school or program has a special need to be assisted in meeting such requirements; or

"(3) carry out appropriate operational, managerial, and financial reforms.

"(b) Any grant or contract under this section may be made upon such terms and conditions as the Secretary determines to be reasonable and necessary, including requirements that the school or program agree to—

"(1) disclose any financial information or data necessary to determine the sources or causes of such school's or program's financial distress;

"(2) conduct a comprehensive cost analysis study in cooperation with the Secretary; and

"(3) carry out appropriate operational, managerial, and financial reforms including the securing of increased financial support from non-Federal sources.

"(c) No school or program may receive a grant under this section if such school or program has previously received support for three or more years under this section or under section 788(b) (as such section was in effect prior to October 1, 1981).".

ADVANCED FINANCIAL DISTRESS GRANTS

SEC. 167. Section 786 is amended to read as follows:

"ADVANCED FINANCIAL DISTRESS GRANTS

"SEC. 786. (a) The Secretary may enter into a multiyear contract or cooperative agreement with a school of medicine, osteopathy, dentistry, veterinary medicine, optometry, podiatry, or pharmacy to provide financial assistance to such institution to meet incurred or prospective costs of operation if the Secretary determines that payment of such costs is essential to remove the institution from serious and long-standing financial instability. To be eligible for a contract or cooperative agreement under this section, a school must have previously received financial support under section 785 or under section 788(b) (as such section was in effect prior to October 1, 1981) for a period of not less than 3 years.

"(b) No school may enter into a contract or cooperative agreement under this section unless—

"(1) the school has submitted to the Secretary a plan providing for the school to achieve financial solvency within five years and has agreed to carry out such plan;

"(2) such plan includes securing increased financial support from non-Federal sources;

"(3) such plan has been reviewed by a panel selected by the Secretary and consisting of three experts in the field of financial management who are not directly affiliated with the school or the Federal Government; and

"(4) the Secretary determines, after consultation with such panel, that such plan has a reasonable likelihood of achieving success.

"(c) The panel described in subsection (b)(3) shall be appointed by the Secretary within thirty days after the date of receipt of the school's plan and shall be dissolved no later than forty-five days after the panel's recommendation has been transmitted to the Secretary. Members of the panel shall be entitled to receive the daily equivalent of the annual rate of basic pay in effect for grade GS–18 of the General Schedule for each day (including traveltime) during which they perform duties.

"(d) Any contract or cooperative agreement under this section may be entered into upon such terms and conditions as the Secretary determines to be reasonable and necessary, including requirements that the school agree to—

"(1) disclose any financial information or data necessary to determine the sources or causes of such school's financial distress;

"(2) conduct a comprehensive cost analysis study in cooperation with the Secretary; and

"(3) carry out appropriate operational, managerial, and financial reforms including the securing of increased financial support from non-Federal sources.

"(e) No school may receive a grant or contract under this section unless in the same year the school shall have received, or have a legally binding commitment to receive, a grant or contract from a State or local government, private entity or combination thereof for the exclusive purpose of alleviating such school's financial distress. Such grant or contract from a State or local government, private entity or combination thereof shall, in the first year of any support under this section, exceed any grant made in the preceding year by such State or local government, or private entity by an amount equal to or greater than the amount of the proposed grant or contract under this section. In subsequent years of support under this section, such grant or contract from a State or local government, private entity or combination thereof shall exceed any grant made by such State or local government, private entity or combination thereof in the year prior to the first year of support under this section by an amount equal to or greater than the amount of the grant or contract under this section for such years.

"(f) Pursuant to the approved plan in subsection (b), funds received under this section may be used to pay short-term or long-term debts of such schools, meet accreditation requirements, or meet other costs, payment of which is essential to the continued operation of the institution or to permit such institution to achieve financial solvency within the period of the contract or cooperative agreement.

"(g) No school may receive support under this section for more than five years. No contract or cooperative agreement may be entered into under this section, or continued, in a fiscal year in which the school receives support under section 785.

"(h) An application for a contract or cooperative agreement under this section shall contain or be supported by assurances that the applicant will, in carrying out its function as a school of medicine, osteopathy, dentistry, veterinary medicine optometry, pharmacy, or podiatry, as the case may be, expend during the fiscal year for which such contract or cooperative agreement is sought, an amount of funds from non-Federal sources (other than funds for construction and any contract or cooperative agreement under this section) at least as great as the average annual amount of funds from non-Federal sources expended by such applicant in the preceding two years.

"(i) For the purpose of entering into contracts or cooperative agreements to carry out this section and section 785, there are authorized to be appropriated $9,000,000 for the fiscal year ending September 30, 1982, and each of the succeeding two fiscal years. Funds provided under this section shall remain available until expended without regard to any fiscal year limitation.".

EDUCATIONAL ASSISTANCE TO INDIVIDUALS FROM DISADVANTAGED BACKGROUNDS

SEC. 168. (a) Section 787(a)(1) is amended by inserting "allied health," after "pharmacy,".

(b) Section 787(a)(2) is amended—

(1) in subparagraph (A) by inserting "or allied health profession" before the comma at the end thereof;

(2) by striking out subparagraph (B) and redesignating subparagraphs (C), (D), and (E), as subparagraphs (B), (C), and (D), respectively; and

(3) by inserting "enter and" before "complete" in subparagraph (B) (as redesignated by paragraph (2) of this subsection).

(c) Section 787(b) is amended to read as follows:

"(b) There are authorized to be appropriated for grants and contracts under this section $18,000 000 for the fiscal year ending September 30, 1982, and for each of the next two fiscal years. No less than 80 percent of funds appropriated in each fiscal year shall be for grants or contracts to institutions of higher education and no more than 5 percent shall be used for grants or contracts having the primary purpose of informing individuals about the existence and general nature of health careers.".

STARTUP GRANTS

SEC. 169. Section 788 is amended to read as follows:

"STARTUP GRANTS

"SEC. 788. There are authorized to be appropriated such sums as may be necessary to assure that any school that received a startup assistance grant under section 788(a) (as such section was in effect prior to October 1, 1980) and would have reasonably expected to have received subsequent grants under such section in fiscal year 1981, 1982, or 1983, shall be eligible to receive such grants on the same terms and conditions as were contained in section 788(a) (as such section was in effect prior to October 1, 1980).".

GENERAL PROVISIONS

SEC. 170. Section 790 is amended to read as follows:

"PROJECTS IN PUBLIC HEALTH AND HEALTH ADMINISTRATION

"SEC. 790. (a) The Secretary may make grants to, and enter into contracts with, schools of public health, graduate programs in health administration, and other educational institutions that provide training in health administration, health planning, public health, and health policy analysis in order to assist such schools or programs in meeting the costs of special projects (including curriculum improvement and continuing education) in—

"(1) biostatistics or epidemiology;

"(2) health administration, health planning, or health policy analysis and planning;

"(3) environmental or occupational health;

"(4) diet and nutrition;

"(5) maternal and child health;

"(6) preventive medicine or dentistry;

"(7) gerontology; or

"(8) techniques for the evaluation of the cost, quality, and effectiveness of organizational structures and technology in the delivery of health care.

"(b) Not less than 80 percent of the amounts appropriated to carry out subsection (a) shall be awarded to schools of public health and graduate programs in health administration.

"(c) There are authorized to be appropriated to carry out the provisions of this section $5,000,000 for the fiscal year ending September 30, 1982, and each of the next two fiscal years.".

MISCELLANEOUS REPEAL

SEC. 171. Part G of title VII is repealed.

TITLE II—NURSE TRAINING

MISCELLANEOUS REPEALS

SEC. 201. (a) Subparts II and III of part A of title VIII are repealed.

(b) Subpart IV of part A of title VIII is redesignated as subpart II.

SPECIAL PROJECTS

SEC. 202. Section 820 is amended to read as follows:

"SUPPORT FOR PRACTICING NURSES

"SEC. 820. (a) For the purposes of encouraging schools of nursing to provide support for practicing nurses and nursing aides, the Secretary may make grants to, and enter into contracts with, schools of nursing, public and nonprofit private hospitals, and other public and nonprofit private entities to assist in meeting the cost of projects to provide—

"(1) continuing education for nurses;

"(2) programs, including continuing education, to provide professional support for nurses, including nurse practitioners practicing in health manpower shortage areas (designated under section 332);

"(3) appropriate retraining opportunities for nurses who (after periods of professional inactivity) desire to engage actively in the nursing profession;

"(4) training and education to upgrade the skills of licensed vocational or practical nurses, and nursing assistants and other paraprofessional nursing personnel, especially with regard to providing nursing services to special populations such as geriatric patients in nursing homes; and

"(5) programs to assist graduates of diploma and associate degree schools of nursing to enhance their educational credentials.

"(b) In awarding grants and contracts under this section, the Secretary shall give special consideration to schools of nursing.

"(c) There are authorized to be appropriated for the purposes of this section and sections 822 and 823, $8,000,000 for the fiscal year ending September 30, 1982, $10,000,000 for the fiscal year ending September 30, 1983, and $12,000,000 for the fiscal year ending September 30, 1984.".

ADVANCED NURSE TRAINING PROGRAMS

SEC. 203. Section 821 is amended to read as follows:

"ADVANCED NURSE TRAINING PROGRAMS

"SEC. 821. (a) The Secretary may make grants to and enter into contracts with public and nonprofit private schools of nursing and other public and nonprofit private entities to meet the costs of projects to—

"(1) plan, develop, and operate programs;

"(2) significantly expand programs; or

"(3) maintain existing programs;

for the advanced training of professional nurses to teach in the various fields of nurse training, to serve in administrative or supervisory capacities, to serve in various fields of advanced clinical practice, or to serve as nurse practitioners.

"(b) The Secretary shall give special consideration under subsection (a) to applications—

"(1) from schools of nursing;

"(2) which would provide a program for advanced training in geographic areas lacking such a program; or

"(3) which provide for opportunities for advanced training on a part-time basis.

"(c) For payments under grants and contracts under this section there are authorized to be appropriated $14,000,000 for the fiscal year ending September 30, 1982, and each of the next two fiscal years.".

EDUCATIONAL ASSISTANCE TO INDIVIDUALS FROM DISADVANTAGED BACKGROUNDS

SEC. 204. Section 822 is amended to read as follows:

"EDUCATIONAL ASSISTANCE TO INDIVIDUALS FROM DISADVANTAGED BACKGROUNDS

"SEC. 822. (a)(1) For the purpose of increasing nursing education opportunities for individuals from disadvantaged backgrounds (as determined in accordance with criteria prescribed by the Secretary), the Secretary may make grants to and enter into contracts with schools of nursing and other public or private nonprofit health or educational entities to assist in meeting the costs described in paragraph (2).

"(2) A grant or contract under paragraph (1) may be used by such school or other entity to meet the costs of—

"(A) identifying, recruiting, and selecting individuals from disadvantaged backgrounds for education and training in nursing, including advanced training;

"(B) providing counseling or other services designed to assist such individuals to enter and successfully complete their education at such a school;

"(C) providing, prior to the entry of such individuals into the regular course of education of such school, preliminary education designed to assist such individuals in successfully completing such regular course of education at such a school, or referring such individuals to institutions providing such preliminary education; and

"(D) publicizing existing sources of financial aid available to students in such a school and to students who are undertaking training necessary to qualify them to enroll in such a program, with particular emphasis on individuals—

"(i) who are in high school; or

"(ii) who are practicing nurses and nursing assistants who want to upgrade their educational credentials.

"(b) Not more than 20 percent of the funds appropriated under this section may be used for grants to or contracts with entities that are not schools of nursing. Not more than 5 percent of the funds appropriated under this section may be used for grants or contracts having the primary purpose of informing individuals about the existence and general nature of health careers.".

STRENGTHENING NURSING EDUCATION

SEC. 205. Subpart II of part A of title VIII (as redesignated by section 201 (b) of this Act) is amended by adding at the end thereof the following new section:

STRENGTHENING NURSING EDUCATION

"SEC. 823. (a) For the purposes of strengthening nursing education and the utilization of nurses, the Secretary may make grants to and enter into contracts with schools of nursing, public and nonprofit private hospitals, and other public and nonprofit private entities to assist in meeting the cost of projects to—

"(1) significantly improve the quality and extent of clinical education provided to students in schools of nursing, including demonstrations and evaluations of new or improved arrangements of providing such education;

"(2) plan, develop, establish, or maintain programs of research and investigation into methods of strengthening nursing education;

"(3) demonstrate and evaluate new or improved patterns of nursing care that will promote the full utilization of nurses or assist in the retention or reentry of nurses in active nursing practice; and

"(4) help to increase the supply or improve the distribtuion of adequately trained nursing personnel (including nursing personnel who are bilingual) by geographic area or by specialty group.

"(b) In awarding grants and contracts under this section, the Secretary shall give special consideration to schools of nursing.".

TRAINEESHIPS

SEC. 206. (a) Section 830 (a) is amended—

(1) by striking out subparagraph (D) of paragraph (1) and inserting in lieu thereof the following:

"(D) to serve in various fields of advanced clinical practice.";

(2) by striking out paragraph (2) and redesignating paragraph (3) as paragraph (2); and

(3) by inserting before the period in the second sentence of paragraph (2) (as redesignated by paragraph (2) of this subsection) a comma and "whether full-time or part-time".

(b) Section 830 (b) is amended—

(1) by striking out "and" after "1978,"; and

(2) by inserting before the period a comma and "and the next fiscal year, $8,000,000 for the fiscal year ending September 30, 1982, and each of the next two fiscal years".

TRAINEESHIPS FOR TRAINING OF NURSE ANESTHETISTS

SEC. 207. Section 831 is repealed.

LOAN AGREEMENTS

SEC. 208. Section 835 (b) (4) is amended by striking out ", and that while the agreement remains in effect no such student who has attended such school before October 1, 1980, shall receive a loan from a loan fund established under section 204 of the National Defense Education Act of 1958".

INTEREST RATE

SEC. 209. Section 836(b)(5) is amended to read as follows:

"(5) such a loan shall bear interest at the rate of 7 percent per year.".

SEC. 210. Section 839 is amended by striking out "1983" each place it appears and inserting in lieu thereof "1986".

TRANSFERS TO SCHOLARSHIP PROGRAM

SEC. 211. Section 841 is repealed.

SCHOLARSHIP GRANTS

SEC. 212. Subpart III of part B of title VIII is repealed.

NATIONAL ADVISORY COUNCIL ON NURSE TRAINING

SEC. 213. Section 851(a) is amended by striking out "and the Commissioner of Education, both of whom shall be ex officio members,".

DEFINITIONS

SEC. 214. (a) Section 853(1) is amended by inserting "the Commonwealth of the Northern Mariana Islands," after "Virgin Islands,".

(b) Section 853(2) is amended by inserting "in a State" before the period.

(c) Section 853(6) is amended by striking otu "Commissioner" each place it appears and inserting in lieu thereof "Secretary".

DELEGATION

SEC. 215. Section 856 is repealed.

By Mr. HATCH:

S. 800. A bill to amend the Public Health Service Act to revise provisions relating to research in health statistics and health services, support for medical libraries, and the National Research Service Awards, and for other purposes; to the Committee on Labor and Human Resources.

HEALTH CARE RESEARCH AND RESEARCH TRAINING AMENDMENTS OF 1981

Mr. HATCH. Mr. President, I am today introducing the Health Care Research and Research Training Amendments of 1981. This bill reauthorizes provisions for research in health statistics and health care delivery, continues support for medical libraries, and assures the continued research training of our Nation's future scientists.

I believe this bill carefully reexamines the existing programs in light of our current economic goals. In an economy of scarce resources, only those provisions that have a real effect on the quality of patient care or on the productivity of scientific research should be continued.

I will briefly describe the programs contained in this reauthorization and

discuss how this bill provides for what I believe to be the essential aspects of these programs while eliminating or consolidating those aspects that unnecessarily perpetuate our Federal bureaucracy and offer no real hope of improving health care or scientific research in the future.

The National Center for Health Statistics (NCHS) is the barometer of our Nation's health. It is the major Federal agency established specifically to collect and disseminate health data. Through its surveys and inventories, NCHS produces data on illness and disability, on the supply and use of health services, as well as the Nation's vital statistics on births, deaths, marriages, and divorces. While recognizing the critical importance of such activities, I believe that savings can be accomplished without substantially reducing the availability or usefulness of the health data that must be collected. Several surveys and reports can be produced on a periodic basis other than annually.

The cooperative health statistics system, an overly ambitious, unrealistic, and questionably effective program is replaced in the proposed bill with a less costly grant mechanism, which, at the discretion of the Secretary, can strengthen the ability of the States to develop appropriate statistical capability. My bill also deletes the requirement that the NCHS promulgate guidelines coordinating Federal data collection concerning the effects of employment and the environment on health because that responsibility is also within the duties of the Federal Statistical Policy Office of OMB.

My bill eliminates the National Center for Health Care Technology (NCHCT) because I believe those activities that are essential can be consolidated with other existing programs. The NCHCT, under current legislation, is mandated to undertake and support assessments of major, emerging, high-cost medical technologies.

Yet evidence shows that it is the thousands of small tests and procedures that account for a much larger proportion of total health care costs. Focusing on emerging technologies may only stifle necessary innovation.

To begin to control health costs we must continue to increase our understanding of what constitutes appropriate and efficient patient care. No form of Government regulation will provide the necessary answers, for the responsibility lies with the medical community. We should, however, continue to draw upon the resources of the National Institutes of Health and other appropriate programs to provide the medical community with better information on how to provide expensive medical services in a more cost-effective manner without compromising the quality of care.

The NIH currently has an ongoing program in which experts come together to discuss the state of the art of selected medical procedures and technologies. Randomized controlled clinical trials to assess the efficacy of medical technologies have been and should continue to be within the perview of the NIH. Under my bill, research to develop new methodologies for technology assessment may be undertaken in the Public Health Service.

An additional existing responsibility of NCHCT is to advise the Health Care Financing Agency (HCFA) regarding the appropriateness of reimbursement decisions under medicare.

NCHCT, in turn, relies in many instances on the National Institutes of Health for the appropriate medical and scientific advice. In my estimation, it would be a more efficient process if HCFA relied directly on the NIH for such information. Together HCFA and the NIH can assure public participation coupled with the opportunity for notice and comment in reimbursement issues.

The National Center for Health Service Research, under my proposal, will continue to provide relevant information concerning the development and evaluation of health service systems albeit under a reduced budget. Federal funding for several extramural health service research centers, established several years ago. Would, under this bill, not be continued bevond their original commitments. Private funding will continue to support the highest quality centers. These extramural centers can still compete for individual research grants—only the guaranteed core support would be eliminated.

The National Library of Medicine, housing the Nation's major collection of biomedical literature does not require reauthorization. The important services the library provides such as indexing, cataloging, and maintaining computer data bases must be continued at appropriate funding levels.

But I seriously question whether the Library of Medicine should be providing information and services in competition with the private sector. During the upcoming hearings on this bill I hope to thoroughly explore this issue. The Medical Library Assistance Act, the national library's extramural grant programs, does require reauthorization. Several provisions of this act are continued in the proposed legislation. Small hospital and medical libraries as well as local consortiums will continue to be eligible for grants for limited time periods to help develop their collections. The regional medical library program, an excellent national network of medical libraries that provides, among other services, inter-library loan and access to computerized bibliographic systems would continue to receive limited Federal support. The program's current plan to impose charges on a fee-for-service basis to individual users should be fully implemented. This will allow recovery of the program's cost and permit the network to be more self-supporting. The bill does not continue support for scientific publications because these projects are more appropriately funded elsewhere. High-priority, selective research in information systems is continued on a limited basis.

An important aspect of my bill would continue support for training high-quality research personnel in the biomedical and behavioral sciences, thus assuring a cadre of research scientists who will meet the future health needs of our country. In 1974, research training authorities under the Public Health Service Act were consolidated into a mechanism called the National Research Service Awards (NRSA). Under this authority the Secretary of Health and Human Services provides both predoctoral and postdoctoral research training support.

Three changes are proposed in my bill.

First, in apportioning the funds available under NRSA, the Secretary should give special priority to physician-investigators who seek to undertake a minimum of 2 years' scientific research. As documented by the National Academy of Sciences, there has been a decline in the number of physicians entering research careers.

While some of this decline is inevitable because research salaries cannot compete with income derived from the practice of clinical medicine, the research physician nonetheless has a very special role in attempting to solve important medical questions. We must assure a steady supply of these physician-investigators without ignoring the production of other investigators.

Second, my bill exempts the first 12 months of research training from the payback provision which requires continued service after completion of the training program. Although logical in theory, the payback requirement appears to act as a disincentive to the recruitment of physician investigators.

Third, my bill allows the Secretary, in accordance with regulation, to decide how best to allocate funds under an individual or institutional training grant in an attempt to reduce indirect and unnecessary program costs.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 800

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) this Act may be cited as the "Health Care Research and Research Training Amendments of 1981".

(b) Except as otherwise specifically provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or a repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Public Health Service Act.

TITLE I—RESEARCH AND TRAINING

GENERAL AUTHORITY

SEC. 101. (a) The section heading for section 304 is amended to read as follows:

"GENERAL AUTHORITY RESPECTING RESEARCH, EVALUATIONS, AND DEMONSTRATIONS IN HEALTH STATISTICS AND HEALTH SERVICES"

(b)(1) Section 304(a)(1) is amended—

(A) by striking out the comma after "Research" and inserting in lieu thereof "and"; and

(B) by striking out "and the National Center for Health Care Technology,".

(2) Section 304(a)(3) is repealed.

(c)(1) Section 304(b)(1) is amended by striking out "Health, Education, and Welfare," and inserting in lieu thereof "Health and Human Services,".

(2) Section 304(b) is amended by striking

out paragraph (2) and by redesignating paragraphs (3) and (4) as paragraphs (2) and (3), respectively.

(3) Section 304(b)(2) (as redesignated by paragraph (2) of this subsection) is amended by striking out "305, 306, and 309" and inserting in lieu thereof "305 and 306".

(4) Section 304(b)(3) (as redesignated by paragraph (2) of this subsection is amended by striking out "construct".

(d)(1) Section 304(c)(1) is amended—

(A) by striking out "Health, Education, and Welfare" and inserting in lieu thereof "Health and Human Services"; and

(B) by striking out "and the National Center for Health Care Technology" and inserting in lieu thereof "the National Institutes of Health and other appropriate Federal entities established under this Act".

(2) Section 304(c)(2) is amended by striking out "and the National Center for Health Care Technology" and inserting in lieu thereof "the National Institutes of Health and other appropriate Federal entities established under this Act.".

(e)(1) Section 304(d)(1) is amended—

(A) by striking out "shall jointly and" before "in cooperation with";

(B) by inserting "may" before "conduct,"; and

(C) by striking out "section 308(1)(2)," and inserting in lieu thereof "section 301,".

(2) Section 304(d)(3) is amended—

(A) by inserting "Labor and" before "Human Resources"; and

(B) by striking out "shall be made by the Secretary and the Academy every two years after the date the first report is submitted" and inserting in lieu thereof "may be made by the Secretary and the Academy at such times as the Secretary and the Academy consider appropriate".

NATIONAL CENTER FOR HEALTH SERVICES RESEARCH

SEC. 102. (a) Section 305(a) is amended—

(1) by striking out "Health, Education, and Welfare" and inserting in lieu thereof "Health and Human Services"; and

(2) by striking out "and supervised by the Assistant Secretary for Health (or such other officer of the Department as may be designated by the Secretary as the principal adviser to him for health programs)".

(b) Section 305(b) is amended—

(1) by inserting "dissemination," after "evaluation,";

(2) by striking out "and" after the semicolon in paragraph (3);

(3) by striking out the period at the end of paragraph (4) and inserting in lieu thereof a semicolon and "and"; and

(4) by adding at the end thereof the following new paragraph:

"(5) the development of methods to improve competition among health care providers by giving providers greater incentives to provide lower cost medical care and consumers greater incentives to seek such care.".

(c) Section 305(c)(3) is amended by striking out "Health, Education, and Welfare" and inserting in lieu thereof "Health and Human Services".

(d) Subsections (d) and (e) of section 305 are repealed.

NATIONAL CENTER FOR HEALTH STATISTICS

SEC. 103. (a) Section 305(a) is amended—

(1) by striking out "Health, Education, and Welfare" and inserting in lieu thereof "Health and Human Services"; and

(2) by striking out "and supervised by the Assistant Secretary for Health (or such other officer of the Department as may be designated by the Secretary as the principal adviser to him for health programs)".

(b) Section 306(c) is amended by inserting "Labor and" before "Human Resources.".

(c) Section 306(e) is amended to read as follows:

"(e) For the purpose of producing comparable and uniform health information and statistics, the Secretary, acting through the Center, may—

"(1) coordinate the activities of Federal agencies involved in the production of such information and statistics;

"(2) undertake and support (by grant or contract) research, development, demonstrations, and evaluations in support of the production of such information and statistics;

"(3) make grants to and enter into contracts with State and local health agencies to assist them in meeting the costs of data collection and other activities incurred in the production of such information and statistics; and

"(4) review the statistical activities of the Department of Health and Human Services to assure that they are consistent with the production of such information and statistics.".

(d) Section 306(j) is amended by striking out "Health, Education, and Welfare" and inserting in lieu thereof "Health and Human Services".

(e) Section 385(k)(4) is amended—

(1) by striking out "Health, Education, and Welfare" in clause (i) of subparagraph (C) and inserting in lieu thereof "Health and Human Services";

(2) by striking out "including the Federal-State-local cooperative health statistics system referred to in subsection (e)," in clause (ii) of subparagraph (C);

(3) by striking out "Health, Education, and Welfare, with respect to the Cooperative Health Statistics System established under subsection (e)" in subparagraph (D) and inserting in lieu thereof "Health and Human Services"; and

(4) by striking out "an annual" in subparagraph (G) and inserting in lieu thereof "a biennial".

(f) Section 306(l) is repealed.

GENERAL PROVISIONS

SEC. 104. (a) The section heading for section 308 is amended to read as follows:

"GENERAL PROVISIONS RESPECTING SECTIONS 304, 305, 306, AND 307"

(b)(1) Section 308(a)(1) is amended—

(A) by striking out "and section 309"; and

(B) by striking out "research, health statistics, and health care technology" and inserting in lieu thereof "research and health statistics".

(2) Section 308(a)(2) is amended by striking out "not later than September 1 of each year the following reports" and inserting in lieu thereof "every two years".

(c)(1) Section 308(b)(1) is amended by striking out "306, 307, and 309" and inserting in lieu thereof "306 and 307".

(2) Section 308(b)(2) is amended by striking out "$35,000" and inserting in lieu thereof "$50,000".

(d) Section 308(c) is amended by striking out "$5,000,000" and inserting in lieu thereof "$2,000,000".

(e) Section 308(d) is amended by striking out "307, or 309" and inserting in lieu thereof "or 307".

(f) Section 308(e) is amended by striking out "307, or 309" each place it appears and inserting in lieu thereof "or 307".

(g) Section 308(f) is amended by striking out "306, or 309" and inserting in lieu thereof "or 306".

(h)(1) Section 308(g)(1) is amended by striking out the last sentence.

(2) Section 308(g)(2) is amended by striking out "306, and 309" and inserting in lieu thereof "and 306".

(i) Section 308(h) is repealed.

(j)(1) Section 308(i) is redesignated as section 308(h).

(2) The first sentence of section 308(h)(1) (as redesignated by paragraph (1) of this subsection) is amended by striking out "and" after "1980," and by inserting before the period comma and "and $20,000,000 for the fiscal year ending September 30, 1982, and each of the two succeeding fiscal years".

(3) Section 308(h)(2) (as redesignated by paragraph (1) of this subsection) is amended by striking out "and" after "1980," and by inserting before the period a comma and "and $35,300,000 for the fiscal year ending September 30, 1982, and each of the two succeeding fiscal years".

HEALTH CARE TECHNOLOGY

SEC. 105. (a) Section 309 is repealed.

(b) Section 310 is redesignated as section 309.

NATIONAL RESEARCH SERVICE AWARDS

SEC. 106. (a)(1) Section 472(a)(1)(A) is amended—

(A) by inserting "and" after the comma in clause (iii);

(B) by striking out clauses (iv), (v), and (vi);

(C) by redesignating clause (vii) as clause (iv); and

(D) by striking out "and the research described in clause (vi)" in clause (iv) (as redesignated by subparagraph (C) of this paragraph).

(2) Section 472(a)(3) is amended to read as follows:

"(3) In awarding National Research Service Awards under this section, the Secretary shall take account of the Nation's overall need for biomedical research personnel by giving special consideration to physicians who agree to undertake a minimum of 2 years of biomedical research.".

(b)(1) Section 472(b)(1)(C) is amended by striking out "or (a)(1)(A)(iv)".

(2) Section 472(b)(2) is amended by striking out "Health, Education, and Welfare" and inserting in lieu thereof "Health and Human Services".

(3)(A) The first sentence of section 472(b)(5) is amended by inserting a comma and "tuition, fees," after "stipends".

(B) The second sentence of such section is amended by striking out "shall" and inserting in lieu thereof "may,".

(c)(1) Section 472(c)(1) is amended to read as follows:

"(c)(1) Each individual who is awarded a National Research Service Award (other than an individual who is a prebaccalaureate student who is awarded a National Research Service Award for research training) shall, in accordance with paragraph (3), engage in health research or teaching or any combination thereof which is in accordance with the usual patterns of academic employment, for a period computed in accordance with paragraph (2).".

(2) Section 472(c)(2) is amended to read as follows:

"(2) For each month for which an individual receives a National Research Service Award which is made for a period in excess of twelve months, such individual shall engage in one month of health research or teaching or any combination thereof which is in accordance with the usual patterns of academic employment."

(3) The second sentence of section 472(c)(3) is amended to read as follows: "The Secretary shall by regulation prescribe the type of research and teaching in which an individual may engage to comply with such requirement and such other requirements respecting research and teaching as the Secretary considers appropriate.".

(d) The first sentence of section 472(d) is amended by striking out "and" after "1980," and by inserting before the period a comma and "and $150,000,000 for the fiscal year ending September 30, 1982, and each of the two succeeding fiscal years".

STUDIES RESPECTING BIOMEDICAL AND BEHAVIORAL RESEARCH PERSONNEL

SEC. 107. Section 473(c) is amended by striking out "Public Welfare" and inserting in lieu thereof "Human Resources".

TITLE II—MEDICAL LIBRARIES

PART A—NATIONAL LIBRARY OF MEDICINE

BOARD OF REGENTS

SEC. 201. Section 383(a) is amended by striking out "Assistant Director for Biological and Medical Sciences" and inserting in lieu thereof "Director".

REGIONAL BRANCHES OF THE NATIONAL LIBRARY OF MEDICINE

SEC. 202. Section 388 is repealed.

PART B—ASSISTANCE TO MEDICAL LIBRARIES

DECLARATION OF POLICY, STATEMENT OF PURPOSE, AND AUTHORIZATION OF APPROPRIATIONS

SEC. 211. Section 390 is amended—

(1) by striking out subsections (a) and (b);

(2) by striking out "(c)" before "For"; and

(3) by adding at the end thereof the following new sentence: "For the purposes of grants and contracts under sections 394, 395, and 396, there are authorized to be appropriated $6,000,000 for the fiscal year ending September 30, 1982, $6,000,000 for the fiscal year ending September 30, 1983, and $6,000,000 for the fiscal year ending September 30, 1984.".

TRAINING GRANTS

SEC. 212. Section 393 is repealed.

RESEARCH AND DEVELOPMENT

SEC. 213. (a) The section heading for section 394 is amended by striking out "ASSISTANCE FOR SPECIAL SCIENTIFIC PROJECTS, AND FOR".

(b) Section 394 is amended by striking out subsection (a) and by redesignating subsections (b) and (c) as subsections (a) and (b), respectively.

(c) Section 394(a) (as redesignated by subsection (a) of this section) is amended by striking out "carry out the purposes of section 390(b)(3) the Secretary shall" and inserting in lieu thereof "promote research about access to, the retrieval of, and the use of information concerning sciences related to health, the Secretary may".

BASIC RESOURCE GRANTS

SEC. 214. (a) Section 395(a) is amended by striking out "carry out the purposes of section 390(a)(4), the Secretary shall" and inserting in lieu thereof "promote, in a geographic area, the sharing and availability of information concerning sciences related to health, the Secretary may".

(b) Section 395(b)(2) is amended by striking out "$200,000" and inserting in lieu thereof "$100,000".

REGIONAL MEDICAL LIBRARIES

SEC. 215. (a) Section 396(a) is amended—

(1) by striking out "carry out the purposes of section 390(b)(5)" and inserting in lieu thereof "promote efficient, access to information concerning sciences related to health"; and

(2) by striking out "shall" after "Board," and inserting in lieu thereof "may".

(b) Section 396(b) is amended—

(1) by striking out paragraphs (1), (2), (3), and (5);

(2) by redesignating paragraph (4) as paragraph (1) and by striking out "and" after the semicolon in such paragraph;

(3) by inserting after paragraph (1) (as redesignated by paragraph (2) of this subsection) the following new paragraphs:

"(2) regional coordination of access to computerized bibliographic data bases; and

"(3) planning for services that promote, in a geographic area, the sharing and availability of information concerning sciences related to health.".

(c)(1) Clause (B) of section 396(c)(1) is amended to read as follows: "(B) to charge fees for individual user services in accordance with guidelines issued by the Secretary.".

(d) Section 396(d) is repealed.

(e) Subsections (e) and (f) of section 396 are redesignated as subsections (d) and (e), respectively.

BIOMEDICAL SCIENTIFIC PUBLICATIONS

SEC. 216. Section 397 is repealed.

RECORDS AND AUDIT

SEC. 217. Section 399(b) is amended by striking out "Health, Education, and Welfare" and inserting in lieu thereof "Health and Human Services".

TITLE III—ASSESSMENT OF HEALTH CARE TECHNOLOGIES

SECRETARIAL AUTHORITY

SEC. 301. Section 301(b) is amended by redesignating paragraph (5) as paragraph (6) and by inserting after paragraph (4) the following new paragraph:

"(5)(A) In order to provide the medical community with improved information on means of providing medical services at lower costs without compromising the quality of patient care, the Secretary may undertake, support, and disseminate (by grant or contract) assessments of particular health care procedures, practices, or technologies, and research relevant to such assessments. Any assessment undertaken or supported under this section shall take into account the efficacy, effectiveness and cost effectiveness of any health care procedure, practice, or technology which is the subject of the assessment. Whenever practicable, the Secretary shall, in undertaking such assessments, seek the assistance of the medical community, the health care industry, health care insurers, and other appropriate public and private entities.

"(B) The Assistant Secretary for Health, acting through the National Institutes of Health or any other appropriate Federal entity established under this Act, may, after consultation with other appropriate public and private entities, make recommendations to the Secretary respecting issues relating to health care procedures, practices, and technologies in the administration of the laws under the Secretary's jurisdiction, including recommendations with respect to reimbursement policy.

"(C) For the purposes of this section, the term 'health care procedure, practice, or technology' means any discrete and identifiable regimen or modality used to diagnose and treat illness, prevent disease, monitor patient well-being or facilitate the provisions of health care services.".

By Mr. HATCH:

S. 801. A bill to amend the Public Health Service Act to revise provisions relating to the National Health Service Corps; to the Committee on Labor and Human Resources.

NATIONAL HEALTH SERVICE CORPS AMENDMENTS OF 1981

Mr. HATCH. Mr. President, I am today introducing the National Health Service Corps Amendments of 1981, an important step in providing adequate health manpower for our Nation's underserved in a fiscally responsible manner.

The major features of the bill are:

First, a revision of the definition of health manpower shortage areas and the procedural steps necessary for an area to achieve such designation;

Second, use of Corps personnel only in areas where there is a demonstrable demand for their services as well as a statistically established need;

Third, an authorization level, consistent with the President's March 10 request, which allows the Corps to grow from 2,060 individuals in 1981 to a level of 2,500 assignees in 1982 and subsequent years;

Fourth, the phaseout over the next 3 years of the National Health Service Corps scholarship program, currently funded to provide over 6,000 assignees in 1987, to reflect the fact that the NHSC will be capable of recruiting sufficient volunteers during the late 1980's to meet its needs;

Fifth, revision of the scholarship program's independence practice option to make it more attractive and to provide a partial subsidy for individuals choosing this option;

Sixth, provisions which allow the Secretary of HHS substantially greater flexibility in dealing with the surfeit of scholarship recipients who will be available for service over the next 5 years.

The National Health Service Corps has often been looked upon as an educational tool rather than as a health services delivery program. As a consequence, the program has been planned and developed without regard for the most notable fact of the health care delivery system in the 1980's: That we will have by mid-decade a substantial surplus of physicians and that the resulting competitive forces are pushing doctors into areas where they have not previously been available. There are undoubtedly some areas for which no increased amount of competition in the health care delivery system will provide a readily accessible doctor. It is for this reason that the Corps, while undergoing substantial modification and reorientation under this bill, would nonetheless continue to grow slightly from its 1980 level and would probably stay at that increased level at least through the 1980's.

This reorienting of the National Health Service Corps is more than just an adjustment of numbers because of the oncoming surplus. Last September, in an oversight hearing chaired by Senator Richard S. Schweiker, the Labor and Human Resources Committee heard ample testimony about the administrative and conceptual shortcomings of the Corps and about the bloated image of medical underservice in America created by the current "health manpower shortage area" designation process. To remedy these faults, as well as to assure that Corps placements serve the most needy communities, basic changes have been made in the designation definition and procedures. This is also important because of an apparent contradiction: That the placement of a federally salaried National Health Service Corps physician in a community is often an impediment rather than an asset in a community's long-term struggle to find a permanent doctor. Thus, the definition of health manpower shortage area is changed to assure that the Secretary, in making such designations, takes account of: Reasonable access to nearby adequately served areas; indicators of unmet demands for health services by individuals in the area; indicators of the likelihood that unmet demand will be met within 2 years even if the area is not designated; the willingness of groups within the community to support and properly utilize Corps personnel; and the

comments of appropriate agencies, including medical and professional societies and State and local planning agencies. To a greater extent than under current procedures, this information would be required to be provided to the Secretary prior to designation of an area and placement of personnel.

With these changes made, the Corps would be allowed to grow from 2,060 individuals in 1981 to 2,500 individuals in 1982. At this level, and with increased administrative oversight of the effectiveness of existing placements, it is hoped that the National Health Service Corps will become a truly important service to those communities which are truly underserved.

The bill also deals with the impact of unnecessarily ambitious plans for the growth of the National Health Service Corps. In 1980 the Corps had not quite 2,000 individuals in service but awarded almost 6,500 scholarships to individuals who will be ready to serve in the mid to late 1980's. In view of the recent evidence that the physician surplus is having a significant effect on the geographical distribution of physicians, this substantial future growth of the Corps is unnecessary.

However, the Secretary of HHS will, over the next 6 years, be in the difficult situation of releasing some of these scholarship recipients from their service obligation because of this excess capacity building. To deal with this, this bill starts immediately to trim the pipeline by allowing scholarship awards only to those who have received awards in previous years.

In addition, a long-standing program, known as the private practice option and renamed the independent practice option, is strengthened to allow the Secretary more flexibility in encouraging individuals to serve, at their own financial risk, in underserved areas during their obligated period. A new provision allows the Secretary to pay the malpractice insurance and a partial income supplement to individuals who choose this option. Such payments are still a considerable savings over having these individuals serve on the Federal payroll. The independent practice option also provides greater incentives for service-obligated individuals to develop good relationships with the community they serve and to stay in that community for longer periods of time.

The bill allows the Secretary to enter into negotiation with past scholarship recipients to convert their service obligation, at the Secretary's discretion, into a low-interest loan. This is a necessary cost saving provision, if the Federal Government is to avoid unnecessarily spending hundreds of millions of dollars on the salaries of physicians who would be serving communities that are able to attract a physician on their own or for which health services are reasonably accessible in adjacent areas.

It is important to emphasize that this bill requires no reduction in services provided to underserved communities across this Nation. In fact the number of individuals actually serving in the Corps will be increased. However, the bill does provide the Secretary an opportunity to make more realistic and more highly focused use of Corps personnel. Inevitably this may mean that some communities may lose their National Health Service Corps personnel because a tightened definition of health manpower shortage area requires redesignation of their service area, or facilities with unreasonably low demand levels are defunded. I emphasize that those communities with substantial numbers of individuals who are geographically underserved will continue to receive services through this program.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 801

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) this Act may be cited as the "National Health Service Corps Amendments of 1981".

(b) Except as otherwise specifically provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or a repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Public Health Service Act.

ESTABLISHMENT

SEC. 2. (a) Section 331(b) is amended by striking out "shall" and inserting in lieu thereof "may" and by striking out "and the Scholarship Program".

(b)(1) Section 331(d)(1)(A) is amended by striking out "shall" and inserting in lieu thereof "may".

(2) Section 331(d)(1)(B) is amended by striking out "shall" and inserting in lieu thereof "may".

(c) Subsections (f) and (g) of section 331 are repealed.

(d)(1) Subsection (h) of section 331 is redesignated as subsection (f).

(2) Section 331(f)(1) (as redesignated by paragraph (1) of this subsection) is amended by striking out "Health, Education, and Welfare" and inserting in lieu thereof "Health and Human Services".

(3) Section 331(f)(2) (as redesignated by paragraph (1) of this subsection) is amended by striking out "section 751" and inserting in lieu thereof "section 338A".

(4) Section 331(f)(3) (as redesignated by paragraph (1) of this subsection) is amended by inserting "Commonwealth of the" before "Northern Mariana Islands".

DESIGNATION OF HEALTH MANPOWER SHORTAGE AREAS

SEC. 3. (a) Section 332(a) is amended to read as follows:

"(a) For purposes of this subpart, the term 'health manpower shortage area' means an area in an urban or rural area which—

"(1) need not conform to the geographic boundaries of a political subdivision.

"(2) is a rational area for the delivery of health services;

"(3) the Secretary determines has a health manpower shortage; and

"(4) is not reasonably accessible to an adequately served area.".

(b) Section 332(b) is amended to read as follows:

"(b) The Secretary shall establish by regulation, promulgated not later than January 1, 1982, criteria for the designation of areas in the States as health manpower shortage areas. In establishing such criteria, the Secretary shall take into consideration the following:

"(1) The ratio of available health manpower to the number of individuals in an area under consideration for designation.

"(2) Indicators of a need for health services for the individuals in an area under consideration for designation, including indicators of special needs of facilities and population within the area and indicators of—

"(A) infant mortality,

"(B) access to health services, and

"(C) health status.

"(3) Indicators of an unmet demand for health services by individuals in an area and indicators of the likelihood that such demand will be met within two years after the area is considered for designation as a health manpower shortage area if the area is not so designated.".

(c) Section 332(c) is repealed.

(d)(1) Section 332(d) is redesignated as section 332(c).

(2) Section 332(c) (as redesignated by paragraph (1) of this subsection) is amended—

(A) by striking out "and the considerations listed in subsection (c)";

(B) by striking out "November 1, 1977" and inserting in lieu thereof "January 1, 1982"; and

(C) by striking out "areas, population groups, medical facilities, and other public facilities" and inserting in lieu thereof "areas".

(e) Section 332(e) is repealed.

(f)(1) Section 332(f) is redesignated as section 332(d).

(2) Section 332(c) (as redesignated by paragraph (1) of this subsection) is amended—

(A) by inserting "proposed" before "designation";

(B) by striking out "from the date" and inserting in lieu thereof "before the date";

(C) by striking out "areas, population group, medical facility, or other public facility so" in paragraph (1) and inserting in lieu thereof "area to be";

(D) by inserting "and" after the semicolon in paragraph (1);

(E) by striking out paragraph (2);

(F) by redesignating paragraph (3) as paragraph (2);

(G) by inserting "(including medical and professional societies and State and local health planning agencies)" before "which are located" in paragraph (2) (as redesignated by subparagraph (F) of this paragraph); and

(H) by striking out "so" in paragraph (2) (as redesignated by subparagraph (F) of this paragraph) and inserting in lieu thereof "to be".

(g) Section 332(g) is repealed.

(h)(1) Section 332(h) is redesignated 332(e).

(2) Section 332(e) (as redesignated by paragraph (1) of this subsection) is amended—

(A) by striking out "shall" and inserting in lieu thereof "may"; and

(B) by striking out "areas, among population groups, and in medical facilities and other public facilities designated under this section as".

ASSIGNMENT OF CORPS PERSONNEL

SEC. 4. (a) Section 333(a)(1)(D) is amended—

(1) by striking out beginning with "in the case of" through "which has expired,";

(2) by striking out "continued need" in clause (i) and inserting in lieu thereof "need and demand";

(3) by inserting "intended" before "use of Corps members" in clause (i);

(4) by striking out "previously" before "assigned to the area" in clause (i) and inserting in lieu thereof "to be";

(5) by striking out "fiscal management by the entity with respect to Corps members previously assigned" in clause (i) and inserting in lieu thereof "the fiscal manage-

ment capability of the entity to which Corps members would be assigned";

(6) by striking out "continued need" in clause (ii)(I) and inserting in lieu thereof "need and demand";

(7) by striking out "has been" in clause (ii)(II) and inserting in lieu thereof "will be";

(8) by striking out "previously" in clause (ii)(II);

(9) by striking out "continued" in clause (ii)(IV) and inserting in lieu thereof "unsuccessful";

(10) by striking out "has been" in clause (ii)(V) and inserting in lieu thereof "is a reasonable prospect of"; and

(11) by striking out "previously" in clause (ii)(V).

(b) Section 333(b) is amended to read as follows:

"(b) The Secretary may not approve an application under this section for assignment of a Corps member to a health manpower shortage area unless the Secretary has afforded appropriate public or nonprofit private entities (including medical and professional societies and State and local health planning agencies) which are located or which have a demonstrated interest in the area so designated an opportunity to review the application and submit to the Secretary its comments respecting the need for, and proposed use of, the Corps member requested in the application.".

(c) Section 333(c) is amended—

(1) by striking out "area, population group, medical facility, or other facility" in paragraph (1) and inserting in lieu thereof "area";

(2) by inserting "and" after the semicolon in paragraph (1);

(3) by striking out paragraphs (2) and (4) and by redesignating paragraph (3) as paragraph (2);

(4) by striking out "or population group, or at the medical facility or other public facility," in paragraph (2) (as redesignated by paragraph (3) of this subsection); and

(5) by striking out the semicolon and "and" at the end of paragraph (2) (as redesignated by paragraph (3) of this subsection) and inserting in lieu thereof a period.

(d) Section 333(d) is amended by striking out "areas, population groups, medical facilities, or other public facilities" and inserting in lieu thereof "areas".

(e)(1) Section 333(f)(1) is amended by striking out "shall" and inserting in lieu thereof "may" and by striking out "or has a demonstrated interest".

(2) Section 333(f)(2) is amended by striking out ""shall" and inserting in lieu thereof "may" and by striking out "or has a demonstrated interest".

(3) Section 333(f)(3) is amended by striking out "shall" and inserting in lieu thereof "may".

(f) Section 333(g) is repealed.

(g) Section 333(h) is redesignated as section 333(g).

COST SHARING

SEC. 5. (a) Section 334(b) is amended—

(1) by striking out paragraph (2);

(2) by redesignating paragraph (3) as paragraph (2); and

(3) by striking out "or (2)" in paragraph (2) (as redesignated by paragraph (2) of this subsection).

(b) The second sentence of section 334(d) is amended by striking out "or without charge".

(c) Section 334(e) is amended by striking out "this subpart" and inserting in lieu thereof "sections 331 through 335 and section 337".

PROVISION OF HEALTH SERVICES BY CORPS MEMBERS

SEC. 6. (a)(1) Section 335(a) is amended by striking out "population group, medical facility, or other public facility,".

(2) Clause (2) of section 335(a) is amended to read as follows: "(2) in a manner which is cooperative with, and not competitive with, other health care providers serving such health manpower shortage area.".

(b) The first sentence of section 335(c) is amended—

(1) by inserting "and" before "(3)";

(2) by striking out "; and (4) establishing appropriate continuing education programs".

ANNUAL REPORTS

SEC. 7. Section 336 is repealed.

NATIONAL ADVISORY COUNCIL

SEC. 8. (a) Section 337(a) is amended to read as follows:

"(a) There is established a council to be known as the National Advisory Council on the National Health Service Corps (hereinafter in this section referred to as the 'Council'). The Council shall be composed of not more than 15 members appointed by the Secretary. The Council shall consult with, advise, and make recommendations to, the Secretary with respect to his responsibilities in carrying out this subpart, and shall review and comment upon regulations promulgated by the Secretary under this subpart.".

(b) The last sentence of section 337(b)(1) is amended by inserting "not" before "be reappointed".

AUTHORIZATION OF APPROPRIATION

SEC. 9. (a) Section 338(a) is amended—

(1 by striking out "this subpart" and inserting in lieu thereof "sections 331 through 335 and section 337";

(2) by striking out "and" after "1979;"; and

(3) by inserting before the period a semicolon and the following "$85,000,000 for the fiscal year ending September 30, 1981; $99,000,000 for the fiscal year ending September 30, 1982; $110,000,000 for the fiscal year ending September 30, 1983; and $120,000,000 for the fiscal year ending September 3, 1984".

(b) Section 338(b) is amended by striking out "this subpart" and inserting in lieu thereof "sections 331 through 335 and section 337".

NATIONAL HEALTH SERVICE CORPS SCHOLARSHIP PROGRAM

SEC. 10. (a) Sections 751, 752, 753, 754, 755, 756, and 757 are redesignated as sections 338A, 338B, 338C, 338D, 338E, 338F, and 338G, respectively.

(b)(1) Section 338A(C)(1) (as redesignated by subsection (a) of this section) is amended by striking out "section 754" and inserting in lieu thereof "section 338D".

(2) Section 338A(f)(1)(A)(ii) (as redesignated by subsection (a) of this section) is amended by striking out "subpart II of part D of title III" and inserting in lieu thereof "sections 331 through 335 and section 337".

(3) Section 338A(f)(2) (as redesignated by subsection (a) of this section) is amended by striking out "subpart II of part D of title III" and inserting in lieu thereof "sections 331 through 335 and sections 337 and 338".

(4) Section 338A(f)(3) (as redesignated by subsection (a) of this section) is amended by striking out "section 754" and inserting in lieu thereof "section 338D".

(5) Subsections (i) and (j) of section 338A (as redesignated by subsection (a) of this section) are repealed.

(c)(1) Section 338B(a) (as redesignated by subsection (a) of this section) is amended—

(A) by striking out "section 753" and inserting in lieu thereof "section 338C"; and

(B) by striking out "section 751" and inserting in lieu thereof "section 338A".

(2)(A) Section 338B(b)(4) (as redesignated by subsection (a) of this section) is amended by striking out "section 753" and inserting in lieu thereof "section 338C".

(B) Section 338B(b)(5)(D)(2) (as redesignated by subsection (a) of this section) is amended by striking out "section 753" and inserting in lieu thereof "section 338C".

(3) Section 338B(d) (as redesignated by subsection (a) of this section) is amended by striking out "subpart II of part D of title III" and inserting in lieu thereof "sections 331 through 335 and sections 337 and 338".

(d)(1) The section heading for section 338C (as redesignated by subsection (a) of this section) is amended to read as follows:

"INDEPENDENT PRACTICE".

(2) Section 338C(a) (as redesignated by subsection (a) of this section) is amended—

(A) by striking out "shall" and inserting in lieu thereof "may, to the extent permitted by, and consistent with, the requirements of applicable State law,";

(B) by striking out "his" before "service obligation" each place it appears and inserting in lieu thereof "the";

(C) by striking out "section 752(a)" and inserting in lieu thereof "section 338B(a) or under section 225 as in effect prior to October 1, 1977";

(D) by striking out "private clinical practice" and inserting in lieu thereof "independent practice"; and

(E) by striking out "his" before "health profession" and inserting in lieu thereof "the individual's".

(3) Section 338C(b) (as redesignated by subsection (a) of this section) is amended—

(A) by striking out "private practice" in paragraph (1) and inserting in lieu thereof "independent practice";

(B) by striking out "and" after the semicolon in subparagraph (A) of paragraph (1);

(C) by adding at the end of paragraph (1) the following new subparagraph:

"(C) the individual, in providing health care services covered by part A or part B of title XVIII of the Social Security Act, shall agree to accept assignment and to accept the reasonable charge as payment in full;"; and

(D) by redesignating paragraph (2) as paragraph (3) and inserting the following new paragraph after paragraph (1):

"(2) provide for the submission of periodic reports as required by the Secretary;".

(4) Section 338C (as redesignated by subsection (a) of this section) is further amended by adding at the end thereof the following new subsections:

"(c) The Secretary shall provide to each individual released from service obligation under this section technical assistance to assist such individual in fulfilling his or her agreement under this section.

"(d) Failure to meet the terms of the agreements under subsection (b) shall be considered a breach of the scholarship contract as provided in section 338D.

"(e) The Secretary shall, out of appropriations authorized under section 338, pay to individuals participating in independent practice under this section the cost of such individual's malpractice insurance and the lesser of—

"(1)(A) $10,000 in the first year of obligated service;

"(B) $7,500 in the second year of obligated service;

"(C) $5,000 in the third year of obligated service; and

"(D) $2,500 in the fourth year of obligated service; or

"(2) an amount determined by subtracting such individual's net income before taxes from the income the individual would have received as a member of the Corps for each such year of obligated service.".

(e)(1) Section 338D (as redesignated by subsection (a) of this section) is amended by striking out subsection (a) and redesignating subsections (b), (c), and (d) as subsections (a), (b), and (c), respectively.

(2) Section 338D (a) (as redesignated by subsection (a) of this section and paragraph (1) of this subsection) is amended—

(A) by striking out "section 751" and inserting in lieu thereof "section 338A";

(B) by striking out "or" at the end of paragraph (2);

(C) by inserting "or" at the end of paragraph (3); and

(D) by inserting after paragraph (3) the following new paragraph:

"(4) fails to accept payment, or instructs the educational institution in which he is enrolled not to accept payment, in whole or in part, of a scholarship under such contract,".

(3) Section 338D(b) (as redesignated by subsection (a) of this section and paragraph (1) of this subsection) is amended—

(A) by striking out "(for any reason)" and inserting in lieu thereof "(for any reason not specified in subsection (a) or section 338F (b))";

(B) by striking out "section 752 or 753" and inserting in lieu thereof "section 338B or 338C";

(C) by striking out "section 752" and inserting in lieu thereof "section 338B"; and

(D) by striking out "section 753" and inserting in lieu thereof "section 338C".

(f)(1) The section heading for section 338E (as redesignated by subsection (a) of this section) is amended by striking out "GRANTS" and inserting in lieu thereof "LOANS".

(2) Section 338E(a) (as redesignated by subsection (a) of this section) is amended:

(A) by inserting a comma and "out of appropriations authorized under section 338," after "The Secretary may";

(B) by striking out "grant" and inserting in lieu thereof "loan"; and

(C) by striking out "(other than an individual who has entered into an agreement under section 753)".

(3) Section 338E(a)(2)(A) (as redesignated by subsection (a) of this section) is amended by striking out "and described in paragraphs (1) and (2) of section 753(a)".

(4) Section 338E(a)(2)(B) (as redesignated by subsection (a) of this section) is amended by striking out "section 753(b)(1)" and inserting in lieu thereof "section 338C (b)(1)".

(5) Section 338E(a) (as redesignated by subsection (a) of this section) is further amended by striking out the last sentence.

(6) Section 338E(b) (as redesignated by subsection (a) of this section) is amended by striking out "grant" and inserting in lieu thereof "loan".

(7) Section 338E(c) (as redesignated by subsection (a) of this section) is amended by striking out "grant" and inserting in lieu thereof "loan" and by adding at the end thereof the following new sentence: "The Secretary shall set by regulation interest rates and repayment terms for loans under this section.".

(8) The second sentence of section 338E(d) (as redesignated by subsection (a) of this section) is amended by striking out "120 days" and inserting in lieu thereof "60 days" and by striking out beginning with "an amount determined under section 754(c)" through the period and at the end thereof inserting in lieu thereof "within 90 days, the full amount of the principal and interest owed by such individual under this section.".

(g)(1)(A) The first sentence of section 338F(a) (as redesignated by subsection (a) of this section) is amended by striking out "this subpart" and inserting in lieu thereof "sections 338A through 338E".

(B) The second sentence of section 338F(a) (as redesignated by subsection (a) of this section) is amended by striking out "two" and inserting in lieu thereof "three".

(2) Section 338F (as redesignated by subsection (a) of this section) is further amended by striking out subsection (b) and inserting in lieu thereof the following new subsections:

"(b) Notwithstanding any other provision of this subpart—

"(1) the Secretary may not enter into any new or continuing scholarship contract after September 30, 1981, unless such contract provides that, at the Secretary's option, the contract may be converted into a loan agreement under which the individual is relieved of his service obligation and becomes liable for repayment, at 7 percent simple interest from the date of disbursement, of all sums provided to such individual by the Federal Government under such contract; and

"(2) the Secretary may negotiate with individuals for the modification of any scholarship contract entered into under this subpart prior to October 1, 1981, to include the provision described in paragraph (1) of this subsection.

"(c) In establishing any loan agreement under subsection (b), the Secretary shall set reasonable terms for the period of the loan and the date upon which repayment begins.

"(d) In implementing subsection (b), the Secretary may negotiate interest rates and repayment terms more favorable to the individual conditioned upon such individual establishing an independent practice in a health manpower shortage area (designated under section 332).".

(h) Section 338G(a) (as redesignated by subsection (a) of this section) is amended by striking out "section 756(a)" and inserting in lieu thereof "section 338F(a)".

By Mr. ZORINSKY:

S. 802. A bill to remove the Soviet grain embargo unless the President takes certain action; to the Committee on Banking, Housing, and Urban Affairs.

SOVIET GRAIN EMBARGO

Mr. ZORINSKY. Mr. President, yesterday the Senate passed over my amendment on the grain embargo in favor of a nearly meaningless sense of the Senate resolution. I voted present on the substitute amendment because I could in good conscience neither reject any expression of disapproval of the embargo, nor support such a sham.

My colleague from Iowa, I know, feels as strongly as I that the embargo on sales of grain to the Soviet Union must be terminated. Under the circumstances, however, I cannot agree with his approach to the problem.

I offered an amendment which would have forced the President to live up to his campaign pledge of an expeditious decision on the embargo. My colleagues chose instead to simply reiterate yet another time the Senate's desire to end the embargo.

I cannot believe that this President is not aware of the sentiments of the Senate and of the people they represent. America's grain producers are tired of hearing speeches. They are tired of hearing that the Senate has told President Reagan how they feel. America's farmers do not want to hear that the Senate has again told President Reagan where it stands on the embargo. They want to know where they stand. The Senate yesterday had the opportunity to get that answer for the men and women toiling in America's corn and wheat fields, and they refused to use it.

After nearly 5 months studying the problem and more than 2 months in the White House, President Reagan still has made no decision on the embargo. America's farmers are still suffering under the yoke of an unfair and discriminatory restriction of their markets. They are still the sole bearers of the national security and foreign policy burden placed on them by a previous administration.

Under the guise of reviewing the situation, the Reagan administration has kept the embargo in place. If this continues much longer, Mr. President, I will be forced to believe that a decision has indeed been made—a decision to continue to embargo indefinitely and to deceive the American people into believing that it is still in fact under review.

For that reason, Mr. President, I am introducing today legislation paralleling the amendment which was so shamefully rejected yesterday. I would urge all of my colleagues to join me in securing prompt passage of the bill, and to resolve, once and for all, the question of President Reagan's intentions on the embargo. I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 802

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, notwithstanding any other provision of law, effective 30 days after the date of enactment of this Act, the restrictions on the exportation of agricultural products to the Union of Soviet Socialist Republics imposed on January 7, 1980, shall expire unless, prior to such effective date, the President certifies to Congress that—

(1) the continuation of such restrictions is necessary to further significantly the national security and foreign policy interests of the United States; and

(2) the continuation of such restrictions will not have an undue adverse effect nor unfairly impose a discriminatory burden on the agricultural economy and the farmers of the United States.

If the President does not make the certifications provided for in the preceding sentence, the President may, nonetheless, delay for a reasonable time the expiration of the restrictions and resumption of normal grain trade with the Union of Soviet Socialist Republics by certifying to Congress, prior to the effective date of the preceding sentence, that the President intends to negotiate a new bilateral grains agreement with the Union of Soviet Socialist Republics to replace the agreement that expires September 30, 1981.

ADDITIONAL COSPONSORS

S. 63

At the request of Mr. RANDOLPH, the Senator from Minnesota (Mr. BOSCHWITZ), the Senator from Minnesota (Mr. DURENBERGER), and the Senator from Missouri (Mr. DANFORTH) were added as cosponsors of S. 63, a bill to amend the Clean Air Act to provide compliance date extensions for steelmaking facilities on a case-by-case basis to facilitate modernization.

S. 458

At the request of Mr. CRANSTON, the Senator from North Dakota (Mr. BURDICK) and the Senator from Delaware

(Mr. BIDEN) were added as cosponsors of S. 458, a bill to amend title 38, United States Code, to extend the period of eligibility for certain Vietnam-era veterans to request readjustment counseling, to extend the program of veterans readjustment appointments in the Federal Government, and to extend the educational assistance and rehabilitation program delimiting periods for Vietnam-era and service-connected disabled veterans, respectively, under certain circumstances.

S. 498

At the request of Mr. HART, the Senator from Oregon (Mr. PACKWOOD) and the Senator from Nevada (Mr. CANNON) were added as cosponsors of S. 498, a bill to amend the Internal Revenue Code of 1954 to provide a tax credit to homebuilders for the construction of residences incorporating certain solar energy utilization characteristics.

S. 533

At the request of Mr. STAFFORD, the Senator from Wisconsin (Mr. PROXMIRE) was added as a cosponsor of S. 533, a bill to establish public buildings policies for the Federal Government to establish the Public Buildings Service in the General Services Administration, and for other purposes.

S. 702

At the request of Mr. BAUCUS, the Senator from Minnesota (Mr. DURENBERGER), the Senator from Iowa (Mr. JEPSEN), the Senator from Kansas (Mrs. KASSEBAUM), and the Senator from Idaho (Mr. SYMMS), were added as cosponsors of S. 702, a bill to allow an income deduction for certain motor carrier operating authorities to offset the impact of the Motor Carrier Reform Act of 1980.

S. 750

At the request of Mr. WALLOP, the Senator from Connecticut (Mr. WEICKER) was added as a cosponsor of S. 750, a bill to amend the Internal Revenue Code of 1954 to provide nonrefundable tax credits for investments in qualified industrial energy efficiency and fuel conversion projects, and for other purposes.

SENATE JOINT RESOLUTION 40

At the request of Mr. RIEGLE, the Senator from North Dakota (Mr. ANDREWS) was added as a cosponsor of Senate Joint Resolution 40, a joint resolution to designate April 26, 1981, as "National Recognition Day for Veterans of the Vietnam era."

ADDITIONAL STATEMENTS

ANNIVERSARY OF GREEK INDEPENDENCE

● Mr. HUMPHREY. Mr. President, Wednesday, March 25, marks the 160th anniversary of the beginning of the battle for Greek independence. As a nation which successfully endeavored upon a similar struggle 45 years earlier, the United States feels a special kinship with the Greek people. This relationship has further benefited by the pricelessness of Greek influence, both ancient and modern, on American society today, and by the immense contributions made by immigrants from Greece over the last century.

The Greek people's passion for freedom has long been recognized as inherent in Greek character. In 1953, after Greece had defeated the Communist rebel threat of the post-World War II period, President Dwight D. Eisenhower said:

> Greece asked no favor except the opportunity to stand for those rights in which it believed, and it gave to the world an example of battle . . . a battle that thrilled the hearts of all free men and free women everywhere.

But the Greeks are noted for their more aesthetic virtues as well. This is especially true of the era of the ancient Greek empire, whose influence can still be seen today in art, sculpture, architecture, and literature.

Immigration from Greece to America began on a large scale around 1890. Since then, between 500,000 and 1 million Greeks have come to this country, and in that time have made responsible contributions to every aspect of American culture.

America can thank the people of Greece for providing an excellent example to the world of nationalism and pride, and for their unending contributions as citizens of this country.●

A DEMOCRATIC ENERGY BUDGET

● Mr. HART. Mr. President, our Nation has few priorities higher than reestablishing our energy independence. Our continued addiction to foreign oil gets at the very heart of our identity as an independent people. It threatens both our national and our economic security.

Although many Americans might like to forget the energy crisis, wearing blinders will not make the problem disappear.

Forty percent of the oil this country uses each year comes from foreign sources. Over the past 10 years, OPEC has raised oil prices fifteenfold. This has helped bring about double-digit inflation. Last year alone it drained $85 billion in capital we could have otherwise directed to our productive base.

As much as OPEC prices have limited out control of our own economy, the limits in our freedom of action from a sudden cutoff of our supplies of foreign oil would be worse. For example, a yearlong blockade of the Strait of Hormuz—the mouth of the Persian Gulf:

Would add 13 percent to the inflation rate;

Would decrease the GNP by 8.3 percent; and

Would cut business investment by 20 percent.

Finally, pressure to keep oil flowing could drag us into a fruitless war in the Middle East—against what otherwise might be in our best interest.

The Congress, under the three previous administrations—one Democratic, two Republican—forged an energy policy that promoted a variety of alternative energy sources both to secure energy independence and, in the interim, to reduce U.S. vulnerability to disruptions in the supply of foreign oil.

Now, as a substitute for these policies, the Reagan administration has proposed an energy budget that reduces or eliminates programs that have contributed to reducing U.S. consumption of foreign oil, while maintaining or increasing programs to develop technologies that probably will not reduce foreign oil consumption in the near term, and will have only a speculative chance of reducing foreign oil consumption in the long term. This approach promotes continued energy insecurity rather than energy security.

Before we establish the distinction between the Reagan policy and an effective energy policy, let us examine the Reagan proposal for clues to that distinction. The proposed energy budget would reduce the total amount of funds available for both energy supply R. & D. activities and conservation by about 15 percent in fiscal year 1981 and by 41 percent in fiscal year 1982.

This overall reduction, however, is not distributed equitably among the various program functions. For example, the proposed budget would cut funds for solar programs by 35 percent in fiscal year 1981 and 78 percent in fiscal year 1982. It would cut funds for conservation programs by 35 percent in fiscal year 1981 and 78 percent in fiscal year 1982. It would cut funds for fossil energy programs by 27 percent in fiscal year 1981 and by 73 percent in fiscal year 1982. And, finally, it would eliminate entirely the Solar Energy and Conservation Bank, which received a $1 billion authorization under the Energy Security Act in 1980, but would spend out only $10 million in fiscal year 1981 and $96 million in fiscal year 1982.

While all these energy research and development programs have fallen victim to the budget-cutting hatchet, one energy program has been spared and even fattened: the nuclear energy research and development program. The administration's proposed budget would increase the funding for that program by 2.5 percent in fiscal year 1981 and by 18.2 percent in fiscal year 1982—an increase of $300 million over the $1.3 billion requested by the Carter administration. This proposal includes $100 million in fiscal year 1981 and $220 million in fiscal year 1982 for the Clinch River breeder reactor, a project that will cost at least $3 billion to complete.

The Reagan administration's limited energy policy, with its excessive bias toward nuclear energy research and development, has several serious flaws.

First, it gambles enormous amounts of tax dollars for research and development on extravagant technologies that may never displace one drop of foreign oil and may never become economically viable. Breeder reactors, for example, probably will not become economically viable before the year 2020, if at all, according to many experts. Their commercial appeal will depend on such interrelated factors as the price of uranium, the costs of reprocessing spent fuel from light water reactors, the demand for additional electrical generating capacity, and the extent to which utilities will buy light water reactors to fill that demand. The depressed state of uranium prices, the decreasing demand for additional

electrical generating capacity and light water reactors, and the projected increases in the cost of spent fuel all indicate that the date for economic viability of breeder reactors could recede further in the future.

Given the remote possibility that breeder reactors will have commercial appeal within the next 40 years, continuation of the Clinch River breeder reactor is highly questionable. Moreover, the Clinch River breeder reactor design has been described by several experts as outdated. Indeed, the Department of Energy has developed a detailed conceptual design for a bigger, better breeder that it plans to build in Idaho. These facts lead to the inescapable conclusion that the Clinch River breeder reactor is nothing more than a CETA program for nuclear engineers.

David Stockman, Director of the Office of Management and Budget, presented the best arguments against the breeder technology generally and the Clinch River reactor in particular. As a Congressman, in 1977, he wrote a 14-page brief opposing the Clinch River project, which I include for the RECORD. In that brief, Mr. Stockman said—

> I have come to the conclusion that it (CRBR) is totally incompatible with our free market approach to energy policy . . . The breeder cannot compete with existing technologies within the time frame contemplated by its advocates without massive subsidies.

The Reagan administration seeks to increase other nuclear R. & D. programs with the same zeal with which it hopes to throw tax dollars away on the Clinch River breeder reactor. Yet, increased development and use of nuclear power will not substantially contribute to U.S. energy independence.

There are several reasons why. First, nuclear power consumers—electric utilities—consumed less than 7 percent of all the oil used in the United States in 1980, and by the end of the decade will consume only a few percent of the oil used. Thus, utilities do not depend heavily on foreign oil.

Second, the annual increases in demand for electricity have become consistently less over the last few years and will continue to decrease. The annual increases in demand have declined from 7 percent in the early 1970's to less than 2 percent today.

Finally, increased use of coal-fired generation, rather than nuclear power, has predominantly contributed to the reduction of oil consumption by electric utilities. For example, between 1978 and 1980, nuclear power generation declined 9 percent. If nuclear power were a direct substitute for oil, oil consumption would have increased by at least 8 percent. Contrary to expectation, however, actual oil consumption by utilities declined, 25 percent, undoubtedly because utilities relied on other nonnuclear energy sources to supply the difference. Consequently, rather than displace foreign oil, nuclear power tends to compete with coal and natural gas as the fuel utilities use to generate electricity.

The Congress should recognize and correct this first flaw in the Reagan administration's limited energy policy by supporting continued funding for programs that have demonstrated their ability to further reduce consumption of oil in the near term. For example, the DOE has estimated that its programs for solar energy and energy conservation replace about 102 million barrels per year of oil, or 20 days per year of imported oil, while its nuclear energy programs replace only 4 million barrels per year of oil, or less than 1 day per year of foreign oil. Another DOE study shows that, after accounting for higher energy prices to reduce consumption and energy tax credits to encourage use of alternative sources, DOE's conservation and solar programs could further reduce projected annual U.S. consumption of oil and natural gas by about 10 percent by the year 2000—20 to 30 years before the breeder reactor could possibly bear economic fruit.

By reducing the disproportionate increases in the proposed budget for nuclear energy R. & D. and transferring most of the funds to the more cost-effective solar and conservation programs and synthetic fuels, the Congress can place this country back on the road to energy independence.

A second flaw in the Reagan energy budget proposal is its Panglossian optimism that the free market will provide energy security without additional "encouragement" from the Federal Government.

The Reagan proposal leaves to the free market the development of those energy sources that can contribute the most to reducing consumption of foreign oil, while it subsidizes technologies that may never contribute to energy independence. If our need to reduce oil imports were not so urgent and if the free market operated perfectly, we could accept the notions that the free market can most efficiently allocate resources for energy development, and that the Federal Government should adopt a new policy of benign neglect toward the need to attain energy independence.

Unfortunately, neither is the case. For example, the free market does not account for unexpected interruptions in the supply of foreign oil. The true cost of oil includes both the actual market price of oil plus an additional amount that reflects the price of continued U.S. vulnerability to supply disruptions. The free market's inability to respond to this true "cost" requires the Federal Government to promote the use of alternatives to oil to free the Nation from its vulnerability.

In addition, the free market cannot operate properly without adequate information upon which businesses and individuals can make economically efficient choices of which alternative energy source, if any, to use. Yet, the Reagan limited energy policy would cut the very programs that provide information to enhance the operation of the free market: Energy extension services, State conservation programs, energy efficiency labeling for appliances, and voluntary building energy performance standards.

Finally, significant barriers prevent those energy sources whose funds the Reagan proposal would cut drastically from competing on an equal footing with those sources, such as nuclear power, for which the Reagan proposal would increase funding levels. The numerous small firms that have attempted to enter the solar energy and energy conservation fields often do not enjoy sufficiently great economies of scale to permit them to pursue major research and development efforts or to market their products extensively.

By contrast, five large firms have virtually captured the market for manufacturing nuclear powerplants and, because of their size, can achieve sufficient economies of scale for their R. & D. or marketing activities. Thus, the Federal Government should become a partner in these activities to reduce the barriers that stand in the way of near-term commercialization of alternative energy technologies.

Securing energy independence is too essential for our national interest to leave it to the whims of an imperfect market. Thus, the Congress should support these programs which will achieve, over the shortest period of time, the greatest marginal decrease in foreign oil consumption for each tax dollar spent. The Reagan administration has the burden of proving that its allocation of funds within the energy budget will produce that result.

The third flaw in the administration's proposed energy budget is its emphasis on "high-technology" alternative energy sources that necessarily concentrate control in a few corporate hands. The Congress should take just the opposite approach and support those alternative energy sources—to the extent they prove cost efficient—which give individuals greater control over their own energy security and encourage self-reliance.

Finally, perhaps the most serious flaw of the Reagan proposal is its blatant inconsistency in its "free market" approach. On the one hand, it cites free market theories to justify reducing programs that promote nonnuclear energy sources while, on the other hand, it funds an extensive subsidy program for nuclear energy research and development. The "double standard" for justifying the allocation of funds within the energy budget just does not make sense.

Secretary of Energy Edwards repeatedly has argued that the Federal Government must increase its programs to promote nuclear energy and, in particular, build the Clinch River breeder reactor, to help the nuclear industry get on its feet again. We should ask, however, why an industry that has existed for over 25 years and has received billions of dollars in Federal subsidies should require an addition Federal umbilical cord to assure its survival?

The Congress should remind the Reagan administration that it cannot have it both ways. We cannot subsidize the nuclear industry at the same time that funding for other, potentially more cost-efficient energy technologies on the verge of full commercialization is drastically reduced. If the Reagan administration wishes to apply the free market philoso-

phy to energy policy, it should apply that philosophy consistently.

From this analysis of the Reagan administration's nonenergy policy, several general criteria emerge that could guide the Congress in substituting for it an energy program that defines a proper role for the Federal Government and that can achieve energy independence in the near term. This program should rely on the free market, to the greatest extent possible, to allocate available resources for promoting alternative energy technologies. At the same time, however, the Federal Government should play a seven-part role.

First, it should widely disseminate information about all alternative energy technologies to enhance the efficiency of the free market.

Second, it should pursue R. & D. activities for those alternative energy technologies which could most efficiently replace foreign oil in the near term but are too expensive for the private sector to develop at the current time. Conversely, it should not support R. & D. activities for alternative energy technologies that have only a speculative chance of commercialization and of efficiently displacing consumption of foreign oil.

Third, it should encourage faster decreases in the consumption of foreign oil that the natural operation of the free market would otherwise achieve. These steps preferably should take the form of incentives, such as tariffs on imported oil with revenues rebated through the tax system, rather than mandatory Government regulations.

Fourth, it should aid those people, particularly at lower income levels, who cannot readily adapt to increases in prices and changes in energy technology. This aid should take the form of low-income weatherization assistance of "retrofit vouchers" that enable the recipients to improve energy efficiency rather than as low-income energy assistance, which constitutes a recurring cost to the Federal Government but does not reduce overall energy consumption. This approach should be swiftly replaced with "lifeline utility rate" reform.

Fifth, it should assist State and local governments in implementing a national energy policy.

Sixth, it should provide for effective emergency planning during the period that the United States must necessarily depend on foreign oil.

Finally, it should maintain a vigorous antitrust program to guarantee against anticompetitive activities that reduce the efficiency of the free market or divert resources from needed energy production.

This Nation's continued dependence on foreign oil is a national problem that requires a national solution. We cannot blithely assume that the market will solve that problem for us. The Federal Government has a role to play in solving that problem—research and development—a role far more critical than merely pursuing expensive and speculative activities for energy technologies that may never reduce our energy dependence.

The Congress should carefully scrutinize the allocation of funds within the Reagan administration's energy budget. If it agrees that the programs supported under the budget will perpetuate rather than eliminate energy insecurity, then it has an obligation to reject and reallocate the funds to encourage the development of energy sources which can end our reliance on foreign oil. Anything less could seriously jeopardize the national interest.●

RURAL TRANSPORTATION CO-OPERATIVES: AN UPDATE

● Mr. BAUCUS. Mr. President, last fall the U.S. Department of Agriculture announced an innovative pilot project on rural and agricultural transportation. Designed to test whether rural transportation services can be improved by forming transporation cooperatives, this program has, I believe, a great potential for resolving some of the very serious transportation problems that have plagued agricultural producers for years.

In January of this year, I sponsored a series of meetings around the State of Montana with our Governor, Ted Schwinden, to explore the potential for rural transportation cooperatives in Montana. The response we received was extremely enthusiastic. As much as anything else, this enthusiastic response spoke to the seriousness of Montana's transportation problems.

Mr. President, as a result of these meetings the Montana Department of Agriculture has put together a preproposal for rural transportation cooperatives in Montana. The submission of the preproposal is the first step that States must take in developing a plan for submission to USDA.

I have reviewed Montana's preproposal. It is well developed, well conceived, and complete. It is also extremely informative. For the benefit of my colleagues, I ask that the proposal be printed in the RECORD.

The proposal follows:

STATE OF MONTANA,
Helena, Mont., March 13, 1981.

Hon. JOHN R. BLOCK,
Secretary, U.S. Department of Agriculture, Washington, D.C.

DEAR SECRETARY BLOCK: Pursuant to Secretary Bergland's letter dated January 14, 1981, on Rural Transportation Cooperatives, the following letter should be considered as a pre-proposal for each specific rural transportation cooperative that the State of Montana wishes to propose.

The pre-proposal covers a three-phase project which I have designated the Montana State Department of Agriculture as the State agency to be responsible for reviewing situations in the State and submitting pre-proposals for this demonstration project.

The Montana Department of Agriculture has the facility to match the federal funds given to this State through an arrangement of in-kind services.

The State of Montana is extremely interested in completing these proposals and being selected for an organizational and operational funding of the projects.

Due to the shortness of time, it has been necessary to be somewhat cursory in the analyses, however, it is anticipated that during the proposal stage the project feasibilities will be completely developed.

Thank you for your consideration of the Agriculture and Rural Transportation Coop project.

Sincerely,

TED SCHWINDEN, *Governor.*

PREPROPOSAL FOR SUBMISSION TO REVIEW OF RURAL TRANSPORTATION ORGANIZATIONS; DEMONSTRATION PROGRAM

1. The Purposes of this Program:

a. This demonstration project will establish rural transportation cooperatives to provide essential transportation services in two specific locations and generally statewide in the rural areas of Montana. The project will help maintain vital transportation services for agriculture and rural development.

b. The transportation cooperative demonstration projects will provide an alternative service in those areas where a loss of rail service has occurred or potentially will occur in the foreseeable future.

c. The demonstration projects will involve a large cross-section of the rural farm producer and elevator operators and will help mitigate and off-set rising costs and deterioration of transportation plant.

d. The transportation demonstration project will assist the rural producers in determining their own solutions to their transportation problems by allowing participation to alleviate and mitigate continuing transportation problems in the movement of their grain to market.

2. Background:

Montana has been faced with some of the largest abandonments of rail system in the history of the United States. The abandonments of the Chicago, Milwaukee, St. Paul and Pacific lines west of Miles City, Montana, caused an adverse social-economic and environmental impact upon Montana. The principally affected commodities were coal, grain, potatoes, and timber within the state. Communities within Montana may experience primary and secondary job losses. Several communities whose existence and livelihood was dependent upon the railroads were particularly hard hit. Those included Harlowton. Roundup, Deer Lodge, and Lewistown.

The results of these abandonments have caused heavy increases in local motor carrier traffic in localized areas.

The Burlington Northern's market position in Montana, Idaho, and Washington was greatly strengthened by the abandonment and there was a corresponding decrease in price and service competition between the railroad and other transportation modes.

The fiscal resources of the state and local governments in Washington, Idaho, and Montana were strained by tax base erosion and efforts to mitigate adverse impacts associated with the withdrawal of the Milwaukee west of Miles City.

5. Description of the Project:

The Montana Department of Agriculture is submitting this preproposal requesting that funding be forthcoming for evaluation of the feasibility of a pilot demonstration project for rural transportation service within Montana. The Montana Department of Agriculture has worked closely with and has concurrence of the Rail Planning Unit within the Montana Department of Highways with respect to this project.

The project is divided into three parts. The project is basically a shipper's cooperative with rail/truck transfer facilities located in Lewistown, Montana and around Plentywood, Montana and a support computerized back-haul system with incoming and outgoing data transmission.

The highway-rail facility to be located at Lewistown, Montana will serve a surrounding seven-county area and be comprised of a broad based group of farmers and grain handlers from Fergus County.

The highway-rail facility to be located around Plentywood, Montana will serve the

surrounding five-county area and be comprised of a broad based group of farmers and coop members within the area.

These rail transfer facilities will cost in the range of $4–$5 million dollars with the Lewistown facility at about $2–$2.5 million dollars and the Plentywood facility at $2–$3 million dollars. The Plentywood facility will be located on one of the longest branch lines in the state and in one of the most productive areas of the state. Its design may encompass utilization of both spring wheat, barley and durum wheat.

The rail transfer facility around the Plentywood area may involve utilization ultimately of a competitive rail system (Soo Line) in order to provide effective intramodal competition forces within northeastern Montana.

This report will briefly analyze the markets available around each of the facilities. The following Table No. I indicates the wheat and barley produced in the five counties surrounding the Plentywood area.

TABLE I

[In bushels]

	All wheat, 1979	Barley, 1979
Daniels	3,652,300	306,800
McCone	4,041,500	346,300
Richland	2,875,400	596,400
Roosevelt	6,235,000	461,300
Sheridan	6,403,200	381,500
Total	23,180,400	2,092,300
Total, all grain	25,272,700	

Note.—Table II shows the wheat and barley available in the 7-county area surrounding the Lewistown, Mont., site.

The Federal Railroad Administration (FRA) refused to allow the Milwaukee to abandon any Emergency Rail Services Act funding for the lines west of Miles City and therefore the Milwaukee determined that the lines, even though profitable, were non-essential to its core system.

The Burlington Northern (BN) on 12–1–80 instituted multi-car rates from all points in Montana on west-bound wheat. Of all the wheat in Montana approximately 90 percent moves west-bound and of that about 80 percent goes into export position. The distances which the wheat must travel are long and the terrain is not conducive to economical truck transportation.

Montana is basically faced with one railroad, the BN.

In middle January, the state was advised that the USDA, Office of Transportation therein, was proposing a transportation demonstration project based upon a transportation cooperative type structure. The idea revolved the premise that the shippers could form a cooperative or shipper association which would deal with and start to solve some of their overall transportation problems. The Montana Department of Agriculture, the Montana Department of Highways and Senator Baucus' office conducted a series of informative briefings around the state with USDA staff people. At each of these briefings a steering group was put together (Appendix A) which were charged with the duty of developing transportation coop ideas for submission and evaluation by the state. The Department of Agriculture had three follow-up meetings, two in Lewistown and one in the northeastern part of the state to put together the ideas and coalesce them into workable projects. The department has involved in excess of 201 people in this process and have sent numerous survey letters in an attempt to generate ideas. The department has utilized the resources of the State Department of Agriculture, State Department of Highways, the community development people, the various local planners, the university, and trucking organizations in preparing this pre-proposal which the department chooses to submit.

3. Contract Person:

a. Mr. Terry C. Whiteside, Manager, Marketing and Transportation, Montana Department of Agriculture, Capitol Station, Helena, Montana 59620; (406) 449–3124, will be the contact person for the U.S. Department of Agriculture. He may be consulted to communicate about the feasibility and planning studies, budget for the studies, etc.

4. Certification of the State:

a. The State of Montana hereby certifies that it will meet the state matching requirements of the studies needed for completing the proposal if the pre-proposal is selected. The state also indicates that it may utilize inkind service matches for completing the proposal.

TABLE II

[In bushels]

	All wheat, 1979	Barley, 1979
Fergus	4,072,900	2,395,900
Garfield	1,186,300	226,500
Golden Valley	373,200	122,900
Judith Basin	2,035,500	1,408,300
Musselshell	349,200	125,700
Petroleum	83,900	108,100
Wheatland	466,200	289,400
Total	8,567,200	4,676,800
Total, all grain	13,244,000	

A map of the rail lines of Montana is provided in Appendix B. One should note that Lewistown, Montana is in central Montana and Plentywood, Montana is in the northeastern corner of Montana.

The third part of this pre-proposal would include a feasibility analysis of a computerized back-haul system which would allow prospective shippers and motor carriers to have a focal point from which to contract back-hauls and forward-hauls to market. This will provide increased flexibility for shippers in Montana to be able to contract the various truckloads that need to be moved.

6. Goals of the Proposed Cooperative:

The proposed cooperative project is centered around the concept that development of rail-highway transfer facilities will insure continued rail service to the areas and prevent abandonment of rail services in the future. The second goal of the transportation cooperative projects are to provide increased opportunities for efficient utilization of alternative modes.

7. Funding Sources:

It is anticipated that during the feasibility development of the proposal that the final funding sources will be developed. It is anticipated also that applications will be made for Farm Home Administration loans or loan guarantees under the Community Facilities Program. It is uncertain at the time of this writing whether the Business and Industry Loan Guarantee Program will be available for funding a project of this nature due to Presidential cuts of the Farm Home Administration programs. It is proposed that the feasibility analysis of each part of the proposal will be subject to review and must be capable of profitable operation prior to application to the Farm Home or other loan guarantee programs. It is anticipated that the necessary legal authority for constructing, operating and maintaining the proposed facility or service will be obtained and provisions made for obtaining, giving, security for, and repaying the proposed loan. The applicant for the loan will be responsible for operating, maintaining, managing, and providing for its continued availability to the general public at reasonable rates. The State Department of Agriculture will initially exercise the above-described responsibilities even though the facility may be ultimately operated, maintained, or managed by a third party.

Negotiations for obtaining continuous and adequate rights-of-way and interest in land needed for construction, operation, and maintenance of the facility have already begun.

The project will also consider alternative funding sources such as state rail bonding authority for facilities and equipment, together with community and county funding sources.

8. Description of the Nature of the Surveys and Planning Efforts:

It is anticipated that the necessary planning efforts for determining the feasibility and acceptability of the proposed service will cover the following points:

1. Complete a market feasibility study.
2. Determine the cost for operation, maintenance, and construction.
3. Develop a time flow schedule for construction together with financing instruments.
4. Conduct preliminary negotiations for land sites.
5. Finalize the financing package and appropriate applications.
6. Submission of final feasibility analysis to USDA and the lending institutions.

It is anticipated that during the conduct of these planning and survey efforts that the State Department of Agriculture will utilize in-house staff studies on the bulk loading facilities, some consultant work, and possibly some land-grant university personnel.

9. Support by Lewistown City/County Planning Board:

Appendix C is a copy of a letter from Mr. John Hughes, Planning Director of the Lewistown City/County Planning Board which indicates that Lewistown has a local development corporation by the name of New Industries, Inc., a non-profit corporation which stands willing to assist in any development efforts undertaken in the Lewistown area. This group has met and adopted a resolution of support for the project which has been proposed and they are anxious to become involved. Appendix C also indicates some draft material from the Overall Economic Plan which includes development of a highway-rail transfer facility.

10. Support by Fergus County CC & D Facilities, Inc.:

Appendix D is a copy of a letter from Timothy J. O'Hare, Esq. who represents the Fergus County CC & D Facilities, Inc.

This group indicates that they are willing to participate underneath this transportation coop demonstration project and locate a highway-rail transfer facility in Lewistown. Mr. Terry C. Whiteside has met with the Fergus CC & D Facilities, Inc. and has viewed their plans and some of their market feasibility studies. This group was formed in response to the transportation coop demonstration project idea. It is estimated that the facility which the proposal will study will be in the 2 to 2.5 million dollar range.

11. Support by the Montana Department of Highways, Rail Planning Unit:

The Montana Department of Highways, Rail Planning Unit, under its manager, Mr. John D. Craig, has indicated his conviction for long-term support for the rail lines in and around the Lewistown area. The rail planning program in Montana is projecting to spend most of its current rail planning allocations for the current year on rail lines around the Lewistown, Montana area. The negotiations are currently continuing with the Burlington Northern Railroad for those rehabilitation projects.

12. The State of Montana Requests Planning Grant:

The State of Montana respectfully requests that the task force provide a planning grant

for the pre-proposal in order to assist the State in development of a proposal for submission to USDA on transportation cooperatives. This planning grant will be used to develop analysis and the planning steps and to negotiate the budgets for analysis and planning of the proposed project. The state respectfully requests that it receive a planning grant of $60,000. in federal funds for analysis and planning activities. The state plans to conduct the analyses and plans for this proposed project together with assistance from the Montana State University and/or some outside consultants. The state of Montana feels that due to the nature of the projects being spread over such a wide geographic area and the complexities of the planning processes that it will require the full $60,000. to complete the proposals for submission to the task force for a selection of a demonstration project. The Montana Department of Agriculture feels that the projects are extremely worthwhile and will benefit a large number of rural users which have been adversely affected by rail abandonments within the state during the last two years.

W. GORDON MCOMBER,
Director, Montana Department of Agriculture.
TERRY C. WHITESIDE,
Manager, Marketing & Transportation Unit, Montana Department of Agriculture.
RAYMOND W. BRAULT,
Attorney, Montana Department of Agriculture.

APPENDIX C

LEWISTOWN,
CITY-COUNTY PLANNING BOARD,
Lewistown, Mont., March 9, 1981.

Mr. TERRY WHITESIDE,
Department of Agriculture, Transportation Office, Office of the Governor, Helena, Mont.

DEAR TERRY: This letter is in reference to your recent visit to Lewistown to discuss the possible location of a unit train loading facility in this area.

Please be advised that we are currently preparing an Overall Economic Development Plan for Fergus County which is 80 percent complete. One of the 12 projects identified as having the best potential for development within the area is to expand the rail facilities and locate a large grain terminal facility in the Lewistown area. Not only is it felt that the area has a lot of potential for a facility of this type, but the continuation of rail service is essential for the area's economy.

Also be advised that Lewistown has a Local Development Corporation by the name of New Industries Inc. This is a non-profit corporation that stands willing to assist in any development efforts undertaken in the Lewistown area. This group has adopted a Resolution of Support for the project and they are anxious to become involved. The President of New Industries Inc. is Donn Pennell and you can reach him in Lewistown at 538-3162.

I am enclosing copies of some of the draft material from the Overall Economic Development Plan. Hopefully this will be of some use to you in developing this project.

If I can be of any further assistance in this matter, please do not hesitate to call on me.

Sincerely,

JOHN HUGHES,
Planning Director.

ADOPTED BY THE O.E.D.P. COMMITTEE
JANUARY 20, 1981

Goals

1. Preserve and enhance existing county employment opportunity.
2. Increase per-capita income in the county.
3. Diversify, expand and stabilize the economic base of the county.

Assumptions

1. That agriculture will play an important role in the county economy.
2. That the county population, especially the city of Lewistown, will grow at or above projected rates.
3. That a diverse labor force will exist in the county.
4. That future economic development will not be at a cost of a loss of agricultural lands.
5. That providing the necessary infrastructure will lead to an increase of commercial, industrial, public service and other uses in the county.

POTENTIALS FOR DEVELOPMENT

I. Agriculture:
1. End product agricultural goods.
2. Distribution and holding centers for agricultural products.
3. Expand beef industry (feed lots/packing plants).
4. Water use development.
Projects:
1. Unit Train Terminal.
2. Judith River Flood Control/Irrigation System.
3. East Judith Mt. Irrigation System.
4. Barley Syrup Manufacture.
5. Montana Ranch Beef.
6. Packing Plant Expansion.

II. Commercial:
1. Expand convention facilities.
2. Downtown restoration and development.
3. Expand commercial area as necessary.
Projects:
1. Community Center/Convention Center.
2. Downtown Re-development.
3. Large Office Buildings Development.

III. Industrial:
1. Cottage industries (piece work—retired population).
2. Centralized location in the state to attract government buildings and small industries.
3. Mineral and energy resource development.
4. Gasohol development.
Projects:
1. Gasohol.
2. Electronics Plant.
3. Textile Manufacturer/Stead.
4. Pipeline/Processing Plant.
5. Small Brewery.
6. Industrial Park.
7. Steel Detailing/Fabrication.
8. Floor tile/Brick panels.

IV. Transportation:
1. Expand rail facilities.
2. Centralized location in the state for a rail/trucking terminal for Central Montana.
3. Air transportation using industries/commercial activities.
Projects:
1. Assist in Locating a Flight Service in Lewistown.
2. Expand Air Transportation Lewistown—Great Falls.
3. Expand Rail Facilities in Lewistown for Unit Train Handling.
4. Winifred—Big Sandy Road.
5. Bus Transportation System for Lewistown.

V. Tourism:
1. Increase out of U.S. travelers (Old West Era).
2. Missouri River tours.
3. Hunting, fishing and skiing activities.
4. Dude ranches.
Projects:
1. Develop Tour Packages to Promote the Local Area
2. Cross Country Ski Trails.
3. Down Hill Ski Area.

VI. Education:
1. Vocational/technical school.
2. Expand College of Great Falls facilities.
Projects:
1. Expand College Facilities.
2. Vo-tech School.
3. Upgrade High School Facilities.

APPENDIX C

CRITERIA AND RATING

1. How urgent is the need for the project, ——.
2. Does the project create long-term permanent jobs,——.
3. Does the project benefit the unemployed, low-income and under-employed,——.
4. Does the project prevent the loss of existing permanent jobs,——.
5. Does the project serve the entire OEDP Area,——.
6. Is there local financial and/or physical commitment, if needed,——.
7. Is the project planned and designed,——.
8. Does it have a good environmental impact,——.
9. Would the project have overall community support,——.
10. Does the project have potential for growth on its own merits once initiated, ——.

PROJECT LIST (FINAL) O.E.D.P. (IN PRIORITY)

1. Textile Plant.
2. Community Center/Convention Center.

3. Expand Rail Facilities/Grain Terminal.
4. Upgrade High School.
5. Barley Syrup Manufacture.
6. Upgrade and Expand Brick Plant.
7. Gasohol Plant.
8. Industrial Park.
9. Winifred/Big Sandy Road.
10. Judith River Flood Control Project.
11. Develop Tour Packages.
12. Expand College Facilities.

Adopted by the O.E.D.P. Committee on January 13, 1981.

OVERALL ECONOMIC DEVELOPMENT COMMITTEE

APPENDIX D

PARRISH, KNOPP & O'HARE,
Lewistown, Mont., March 9, 1981.

Mr. TERRY WHITESIDE
Department of Agriculture, Transportation Office, Office of the Governor, Capitol Station, Helena, Mont.

DEAR MR. WHITESIDE: Our firm represents a broad based group of farmers and grain handlers from Fergus County and the surrounding six (6) counties who are working on plans for a Unit Grain Terminal Facility with the capability of rapid loading 52 car unit trains. In this regard we have contacted all the local grain elevator operators seeking their assistance in this co-operative effort. Additionally we have contacted New Industries, Inc. of Lewistown, Montana seeking their support as well. New Industries is the economic development corporation for Lewistown, Montana.

Our corporation Fergus County CC & D Facilities Inc. requests that you submit a pre-application for any available FHA funding through the Montana Department of Agriculture on our behalf.

As you are aware the Milwaukee Railroad has terminated railroad services to the Central Montana-Lewistown area and there is a strong possibility that the Burlington Northern may also abandon rail service to this area unless we can assure Burlington Northern continued profitability from the branch line servicing central Montana and Lewistown.

Our studies indicate that if both lines are abandoned that:

(1) Marketing grain from our seven (7) county area will become non-competitive and monopolized and work an economic hardship on area farmers, grain producers, and independent elevator operators. In particular all local elevator grain operations will be destroyed.

(2) Cause business and economic hardship to Lewistown businesses dependent upon rail service and the stability and profitability of the farm and grain production from our area.

(3) Cause increased use of the highways and increased truck transportation and fuel costs to the economic detriment of our farmers and grain handlers.

By establishment of a contemporary grain loading terminal in Lewiston, capable of handling 52 unit car trains we hope to maintain the competitive marketing position for our local grain trade, and prevent abandonment of rail services to central Montana and Lewistown. This is our goal.

In order to reach our goal by step by step objectives we are committed to the following:

(1) Conduct market feasibility study.
(2) Determine costs involved.
(3) Develop projected budget.
(4) Identify locations suitable for construction of facility.
(5) Explore financing alternatives and obtain financing for project.
(6) Obtain options and/or purchase site.
(7) Prepare and distribute bid proposals for final architect plans.
(8) Let bids.
(9) Begin construction.
(10) Open and operate facility.

At this time we have completed our market feasibility study and have made the decision to proceed with the project. We also are receiving architectural preliminary drawings from several sources.

In closing I would advise you that we will cooperate fully in preparing or assisting your office with a pre-application for FHA funding.

Sincerely,

TIMOTHY J. O'HARE,
Attorney for Fergus County CC & D Facilities, Inc.●

MONTANA SEVERANCE TAX—A SUPREME COURT DEFENSE

● Mr. BAUCUS. Mr. President, I am deeply concerned by proposals that advocate Federal intrusion in State taxation decisions. Recently, in response to a legal attack on the Montana coal severance tax by a group of utilities, I submitted an amicus brief to the U.S. Supreme Court. That brief argues that State resource taxation decisions are matters for State legislatures to decide—not the Federal courts.

In addition, as I have indicated before, Congress must not venture into this quagmire. State taxation is a complex area. Once Congress embarks on control of State taxes, no State will be immune from scrutiny.

We must take seriously the position of the electorate this past fall, when it was clearly announced that the Federal Government should reduce its inappropriate intrusion in areas of traditional State and local jurisdiction.

Mr. President, I was pleased to have the support of Senators ANDREWS, BURDICK, DECONCINI, MELCHER, and Representatives HANK BROWN, DORGAN, KOGOVSEK, LOWRY, MARLENEE, SANTINI, SWIFT, PAT WILLIAMS, and WIRTH on the amicus brief. I ask that the brief be printed in the RECORD.

The brief follows:

[In the Supreme Court of the United States
October Term, 1980]

COMMONWEALTH EDISON COMPANY, ET AL., APPELLANTS, *v.* STATE OF MONTANA, ET AL., APPELLEES

On Appeal from the Supreme Court of the State of Montana.

Brief as amici curiae of the Honorable Max Baucus, the Honorable Mark N. Andrews, the Honorable Quentin N. Burdick, the Honorable Dennis DeConcini, the Honorable John Melcher, the Honorable Hank Brown, the Honorable Byron L. Dorgan, the Honorable Ray Kogovsek, the Honorable Michael E. Lowry, the Honorable Ron Marlenee, the Honorable Jim Santini, the Honorable Allen Byron Swift, the Honorable Pat Williams, the Honorable Timothy E. Wirth in support of appellees.

This brief amici curiae is filed with the written consent of counsel for the parties by several Members of Congress:

INTEREST OF THE AMICI CURIAE

The amici believe that the outcome of this case challenging the power of a State to impose severance taxes on natural resources within its borders could have a substantial impact on the ability of the States to raise taxes to provide for the general welfare of the citizens of those States. Amici are concerned that a decision in favor of the appellants would set a dangerous precedent for use of the national Commerce Clause power to interfere in the areas of traditional State governmental functions. This brief also serves to inform the Court that Congress is not united in its approach to the issues involved in this case.

SUMMARY OF ARGUMENT

The rate of taxation imposed on an intrastate or local activity, such as the mining of coal, is normally a matter for the State legislature to consider. State sovereignty requires that the states have considerable autonomy in determining which intrastate activities are subject to taxation and at what rates. The factors which go into such a determination are political factors which are appropriately considered by the state legislature, not the federal courts. If the federal courts were to attempt to determine whether the Montana severance tax on strip mined coal is appropriate or fair, not only would they have to make such a determination without any guidelines other than political ones, but also they would be faced with the very real possibility that every state tax would be subject to the same standardless review by the federal courts. Such a result is always to be avoided, and particularly in this case because not only does the Montana tax have a minimal impact on interstate commerce, but also the right to tax has been recognized by Congress.

ARGUMENT

I. The State legislature is the appropriate governmental body to determine whether a tax on an intrastate or local activity should be imposed, and at what rate.

Appellants do not challenge the right of Montana to tax the severance of coal by strip mining; they challenge only the rate of taxation. Appellants ask this Court to make a uniquely political judgment: what is an appropriate or fair rate of taxation to be imposed on the severance of coal by strip mining. If this Court were to hold that a 30% tax on the severance of coal by means of strip mining is too high, and the Montana legislature were to enact another tax at a rate of 25% or 20% or 15%, this Court would then have to determine the fairness of those rates. These are not judicial issues; they are political questions for the state legislature. If the federal courts usurped this power, the burden on the courts to make such determinations would prove to be extraordinary, for in modern times virtually every state tax "affects" interstate commerce.

A. The decisions of this Court reflect policy reasons for upholding the constitutionality of state severance taxes regardless of the rates.

This Court has never held that a state severance tax burdened interstate commerce even when a large percentage of the severed resources subsequently entered interstate

commerce. *Heisler v. Thomas Colliery Co.*, 260 U.S. 245 (1922); *Oliver Iron Mining Co. v. Lord*, 262 U.S. 122 (1932); and *Hope Gas Co. v.* Hall 274 U.S. 284 (1927), answer most of the arguments raised by appellants. *Heisler* involved a severance tax on anthracite coal. It was alleged that Pennsylvania had a natural monopoly on anthracite coal in the United States; that coal was a prime necessity for life, especially in the northeastern states; that 80 percent of the coal was shipped outside of Pennsylvania; and that Pennsylvania would be able to force consumers in other states to pay the tax. The Court turned aside the challenge to the tax because the incidence of the tax was prior to the entry of the coal into interstate commerce. A contrary decision would have left the states with nothing to regulate or to tax. *See* 260 U.S. at 259–260.

No subsequent decisions of this Court have imposed limits on the ability of states to tax local activities or articles merely because the activities "affect" or the articles eventually enter interstate commerce. Indeed, recent Commerce Clause cases have made clear that a state may tax various aspects even of interstate commerce. *See, e.g., Complete Auto Transit v. Brady*, 430 U.S. 274 (1977); *Michelin Tire Corp. v. Wages*, 423 U.S. 276 (1976); *Department of Revenue v. Association of Washington Stevedoring Companies*, 435 U.S. 734 (1978.

The policy of leaving to the state legislature the decision whether to tax intrastate activities and the rate of such taxation remains a sound one. One of the essential attributes of state sovereignty is the power to raise funds by taxation; this power is essential to the very existence of a state. Almost every local activity has some effect on interstate commerce. If the federal judiciary should bar a tax on a local activity, before it enters the stream of commerce, because it "affects" interstate commerce, then the state's power to tax would be a virtual nullity. Every state tax would be subject to challenge in the federal courts, and the federal courts would become a super-state legislature.

B. The standards for determination of what taxes should be imposed on local activities are political questions for the state legislature and are beyond the institutional competence of the federal judiciary.

When a legislature, whether the Congress of the United States or a state legislature, imposes a tax and determines the rate of that tax, the factors that it considers are political factors. A state legislature decides what tax is fair based on the entire complex of state taxes, upon the ability of the taxpayer to pay, upon a determination as to whether the tax is progressive or regressive, upon how much money the tax will raise, upon constituent interests, upon the impact of the tax on the business community in the state, upon a value judgment as to what activities it wishes to encourage or discourage by taxation, upon an economic judgment as to whether the effect of the tax will be productive, and upon a host of other political issues.

These determinations are made after informal private consultations and legislative hearings in which witnesses may offer facts, statistics, and opinions as to what the effect of a proposed tax will be. Gradually an imprecise consensus is formed, and a political decision is reached about whether or not the tax should be imposed and the appropriate level of the tax. This is a decision uniquely appropriate to the state legislative process and one for which the federal judiciary is not competent because it is not responsive politically and cannot consider under evidentiary rules all the factors that a state legislature can. Only in the most extraordinary situation, such as a tax imposed on citizens because of their race, in which there is clear Constitutional violation, should the federal judiciary concern itself with a state tax imposed on intrastate activities.

Since almost every type of severance tax which a state can levy can affect some aspect of interstate commerce, every kind of state severance tax could be subjected to a complicated factual analysis as to its impact. Numerous states have severance taxes on a wide variety of resources. Some of those states collect revenues which far exceed the total amount obtained under the Montana coal severance tax. For example, in 1977 the State of Texas collected over $900 million in severance tax revenues—over 20 times the revenues generated by the Montana coal tax that year.[1]

Beyond that, other states rely far more heavily on royalties and severance taxes than does Montana.

1977—Royalties and severance taxes as a percentage of State government revenues

Rank, State:	Percent
1. Louisiana	19.43
2. New Mexico	15.78
3. Texas	13.85
4. Wyoming	11.42
5. Oklahoma	9.18
6. Montana	6.82
7. Alaska	4.46
8. Kentucky[2]	3.79

These taxes are on some occasions applied as a percentage of the gross value of the resource, a flat amount per barrel or thousand cubic feet, a percentage of the sales price, and so on. The taxes are, in short, difficult to compare and are the subject of considerable political judgment.

Other types of taxes are equally complicated and could be subject to challenge. States with high levels of tourism and with relatively high hotel, restaurant, entertainment, or gambling taxes arguably force nonresidents to contribute more to state revenues than the benefits which they receive. Examination of inheritance taxes on local real estate or nonresidents might indicate that a state is asking more of these taxpayers than it asks of others. Income, gross receipts, and the sales taxes might be subject to challenges based on the Commerce Clause. Who is to say when a tax that goes to support the general revenues of the state is out of all proportion to the benefits provided? What standard measures the benefits a taxpayer receives from a state?

Opening state tax rates and benefits received by taxpayers to judicial examination would also open the mix of state taxes to examination. If a state should decide to levy high property taxes and to forego a state income tax or vice versa, one group of taxpayers may be subjected to higher taxes than if both taxes were levied at lower rates. States with high cigarette or alcohol taxes may be imposing heavy taxes on certain consumers who gain no special benefit from the state other than the usual benefits of civilized society and local government.

A challenge to a single tax based on the aggregate revenues resulting from that tax would bring the entire state tax structure before the court. A tax which may seem unreasonable standing alone may be reasonable when the mosaic of all state considerations is examined. As this Court stated in *Carmichael v. Southern Coal and Coke Co.*:

"[A]s the state is free to distribute the burden of a tax without regard to the particular purpose for which it is to be used, there is no warrant in the Constitution for setting the tax aside because a court thinks that it could have drawn a better statute or could have distributed the burden more wisely. Those are functions reserved for the legislature. 301 U.S. 495, 525 (1937)."

This Court has been a strong defender of the prerogative of a state to determine how to structure its taxes, *e.g., Moorman Manufacturing Co. v. Bair*, 437 U.S. 267 (1978), what to include in the tax base, *e.g., Mobil Oil Corp. v. Commissioner of Taxes of Vermont*, 455 U.S. 425 (1980), and what accounting method to require, *e.g., Exxon Corp. v. Department of Revenue of Wisconsin*, 466 U.S. ——, 100 S.Ct. 2109 (1980).

Similar deference should be accorded a state's right to select an appropriate tax rate for a severance tax. Judicial second-guessing of legislative tax decisions would open the courts to every disgruntled taxpayer who feels that a tax imposes an extraordinary burden on himself, and can demonstrate that the tax affects interstate commerce.

C. The effect of the Montana severance tax on coal is not adverse to the national interest and does not warrant the intervention of the federal judiciary.

The factual question which appellants seek to have resolved in the courts—whether the economic impact of the Montana tax is so unfair that it unduly burdens interstate businesses and requires these businesses to pay taxes which are disproportionate to the benefits received—illustrates the complexity of the factual issues which appellants would subject to judicial redetermination. Appellants assert that the 1975 tax is a 30% tax on the value of coal which on a percentage basis, increases by 500% to 1,250% the severance tax today compared to the severance tax that was in effect prior to 1975. (Brief for Appellants at 7–8). This analysis, suggesting astronomical increases in the ultimate price of coal, is faulty for two reasons. First, the tax rate differs depending upon how the coal is mined. The 30% tax is imposed only on strip mined coal, which constitutes the majority but not all of Montana coal. Second, as the following figures demonstrate, the amount of the tax when compared to the ultimate price of coal to the consumer, is far less than appellants imply. The tax is imposed as a percentage of the contract sales price before shipping, and the shipping costs constitute the largest share (typically 60%) of the cost to consumers.[3] Moreover, even with the tax, the price of Montana coal is still considerably lower than the price of coal mined in most other states. Recent estimates show Montana coal selling at $8.50 per ton with Eastern and Midwestern coal selling at over $20 per ton.[4]

Furthermore, a more accurate measure of the impact of an energy resource tax is the tax per BTU of heat produced. Coal, oil, and gas have value by virtue of their heating capability. By this measure, Montana's coal tax produces 9.97 cents revenue per million BTU's. This compares very favorably with other state severance taxes—taxes which appear on their face to be lower than the Montana tax. For example, Louisiana's 12.5% tax on oil is in fact a tax of 16.58 cents per million BTU's—over 60% higher than Montana's coal tax.[5]

We cite these figures not to support an argument on the merits that the Montana tax is reasonable. Rather, we wish to illustrate the complexities of the issue put forth by appellant as to the fairness of the tax and its effect on the ultimate taxpayer and on interstate commerce.

Additionally, there are obvious market restraints which prevent Montana from imposing a tax so high that it would make Montana coal unable to compete with coal mined in other states with alternative sources of energy. Montana has no monopoly on coal, and coal is not the only source of energy. If the tax were so high that it caused the mining of coal in Montana to decline significantly thereby decreasing employment and revenues, there would be substantial incentive for the Montana legislature to lower the tax.

Finally, there are legitimate reasons why Montana could choose to impose a heavier

Footnotes at end of article.

tax on strip mined coal than it imposes on other business activities and to set aside part of the proceeds of that tax in a trust fund for future generations. Strip mining may have severe adverse effects on the environment. The Montana State Legislature clearly recognized the severity of these impacts in adopting the coal severance tax (15–35–101 *et seq.*, MCA.) and the Montana Strip and Underground Mine Reclamation Act (82–4–201 *et seq.*, MCA). These environmental costs will be borne not only by the current generation of Montana citizens, who will share in the economic advantages and disadvantages that flow from an active coal industry, but also by future generations long after the economic advantages have diminished or ceased. Coal is a limited resource which, if mined today, will be unavailable to future generations. It is surely within the power of the Montana legislature to tax the depletion of this resource and to set aside a portion of the tax for future generations.

II. Congress has recognized the right of the states to impose severance taxes on coal and has not preempted such taxes.

The Commerce Clause grants the power to regulate interstate commerce to the Congress, not to the courts, and when Congress has acted, the role of the courts should be to enforce Congress' action. *See Pennsylvania* v. *Wheeling & Belmont Bridge Co.*, 59 U.S. (18 (How.) 421, 430 (1856)); *Prudential Insurance Co.* v. *Benjamin*, 328 U.S. 408 (1946). Congress expressly recognized the validity of state severance taxes in the Mineral Lands Leasing Act of 1920. 30 U.S.C. § 189 states:

"[N]othing in this Act shall be construed or held to affect the rights of the States or other local authority to exercise any rights which they may have, including the right to levy and collect taxes upon improvements, output of mine, or other rights, property, or assets of any lessee of the United States."

This Court interpreted this language to mean that Congress authorized the states to impose severance taxes upon lessees of Federal lands without regard to the interest of the United States in the lands or leases. *Mid-Northern Oil Co.* v. *Walker*, 268 U.S. 45 (1925). While *Mid-Northern Oil* dealt only with the propriety of state severance taxes on lessees of federal lands, it follows that such taxes on non-federal lands are also proper or else the 1920 Act would authorize a state tax that discriminates against federal lessees.

In enacting the Power Plant and Industrial Fuel Use Act in 1978, three years after the challenged Montana severance tax went into effect, Congress acknowledged that states have severance taxes on coal and other fuels and provided that such severance taxes should be taken into account when determining a state's need for certain impact assistance. See 42 U.S.C. § 8401(a)(2). This statute is an express congressional recognition of severance taxes and reflects a congressional determination that these taxes are compatible with the Commerce Clause.

Despite the clear authorization by statute since 1920 for the imposition of severance taxes, appellants urge that the rate of the Montana tax violates the legislative intent of the Mineral Leasing Act, because a broad federal policy in favor of the use of coal underlies other statutes that have no direct relevance to several taxes. In short, appellants urge this Court to ignore the clear language of the statute and interpret the statute by considering the legislative intent of other statutes. This approach turns on their head well-accepted principles of statutory construction. Moreover, even apart from the dispositive effect of the Congressional authorization to impose severance taxes, the statutes and "policies" cited by appellants offer no basis for concluding that Congress has preempted the Montana severance tax. Indeed, Congressional *amici* supporting appellants make no preemption argument whatsoever in their brief.

Unless there is clear federal preemption—a direct conflict or congressional intent to override contrary state legislation—the judiciary is generally without power to interfere on Commerce Clause grounds with state taxation. In this case, there is no direct conflict between state and federal legislation. The conflict asserted is between federal energy policies promoting the use of coal and the rate of Montana's severance tax on strip mined coal. Without direct conflict, congressional intent to override the state legislation must be found. This intent may be shown in a number of ways, including the pervasiveness of federal regulation, the dominance of the federal interest because of a need for national uniformity, or the danger of conflict between federal and state legislation. *Rice* v. *Santa Fe Elevator Corp.*, 331 U.S. 218, 230–231 (1947); *Pennsylvania* v. *Nelson*, 350 U.S. 497, 502–505 (1956). However, "the exercise of federal supremacy is not lightly to be presumed." *New York State Dept. of Social Service* v. *Dublino*, 413 U.S. 405, 413 (1973), quoting *Schwartz* v. *Texas*, 344 U.S. 199, 202–203 (1952); *see Sears, Roebuck & Co.* v. *San Diego County District Council*, 436 U.S. 180 (1978); *Philadelphia* v. *New Jersey*, 437 U.S. 617 (1978); *Exxon Corp.* v. *Governor of Maryland*, 437 U.S. 117, 132 (1978); *Hisquierdo* v. *Hisquierdo*, 439 U.S. 572 (1979). The rule in *Rice* v. *Santa Fe Elevator Corp.* "provides assurance that 'the federal-state balance' will not be disturbed unintentionally by Congress or unnecessarily by the courts." *Jones* v. *Rath Packing Co.*, 430 U.S. 519, 525 (1977) (citation omitted).

Two factors beyond the express congressional authorization of severance taxes make appellants' preemption argument a particularly weak one.

First, although Congress has considered adopting legislation which would limit the rate of state coal severance taxes, *e.g.*, H.R. 6625, H.R. 6654, H.R. 7163, and S. 2695 introduced in the 96th Congress, Congress has been sharply divided over the advisability of such legislation and has not adopted such a limitation. Neither the opponents nor the proponents of these bills argue that existing legislation or policies preempt Montana's severance tax rates. If the advisability of such legislation is hotly contested within the Congress, it cannot be said that there is a clear federal policy in favor of preemption until Congress adopts legislation specifically supporting such limitation.

Second, *Exxon Corp. v. Governor of Maryland*, 437 U.S. 117 (1978), instructs that a conflict between a general federal policy and a state statute, without a more specific expression of intent to affect a particular type of state statute, is insufficient to preempt the state statute.

"Appellants point out that the Robinson-Patman Act itself may be characterized as an exception to, or a qualification of, the more basic national policy favoring free competition, and argue that the Maryland statute 'undermine[s]' the competitive balance that Congress struck between the Robinson-Patman and Sherman Acts. This is merely another way of stating that the Maryland statute will have an anticompetitive effect. In this sense, there is a conflict between the statute and the central policy of the Sherman Act . . . Nevertheless, this sort of conflict cannot itself constitute a sufficient reason for invalidating the Maryland statute . . . We are, therefore, satisfied that neither the broad implications of the Sherman Act nor the Robinson-Patman Act can fairly be construed as a congressional decision to preempt the power of the Maryland Legislature to enact this law. 437 U.S. at 133 (citations and footnotes omitted)."

Refusal to find preemption of state legislation on the basis of general federal policies arguably reflected in a few federal statutes is additional insurance that the preemption does not occur "unintentionally by Congress or unnecessarily by the courts." *Jones* v. *Rath Packing Co.*, *supra*, 430 U.S. at 525. Because of the lack of congressional agreement on whether state severance tax rates should be limited, and because it cannot be said that the Montana severance tax on coal stands as an obstacle to accomplishment of the objectives of Congress, *De Canas* v. *Bica*, 424 U.S. 351 (1976), or that it frustrates the full effectiveness of a federal law, *Perez* v. *Campbell*, 402 U.S. 637, 652 (1971), no federal legislation nor even a "federal policy" preempts the Montana coal severance tax.

III. The Standards Set Forth in *Complete Auto Transit* v. *Brady* Are Inapposite Here, But Montana's Coal Severance Tax Would Survive Scrutiny Under Those Standards.

This case is unique in that it raises the question not of whether the state may tax a particular activity, but at what rate the state may tax. There is no case law that even suggests standards for the federal courts to use in evaluating the rate of a state tax.

Appellants have urged this Court to apply the fourpart test set out in *Complete Auto Transit* v. *Brady*, 430 U.S. 274, 278 (1977). Even a cursory glance at the *Complete Auto* test demonstrates that it is a test to measure whether a state may tax an instrumentality of interstate commerce, not a test to measure the rate at which a state may tax a local activity which affects interstate commerce. The cases in which the test has been applied are all cases in which an instrumentality of interstate commerce has been taxed. *See Department of Revenue of the State of Washington* v. *Association of Washington Stevedoring Companies*, 435 U.S. 734 (1978) (tax on unloading of items that have moved in interstate commerce); *Complete Auto Transit, Inc.* v. *Brady*, *supra* (tax on transportation of automobiles in interstate commerce); *cf. Japan Line, Ltd.* v. *County of Los Angeles*, 441 U.S. 434 (1979) (tax on a shipping container). Indeed the first two parts of the four-part test—substantial nexus to the taxing state and fair apportionment—are obviously irrelevant to a tax on a local activity which occurs entirely within one state and could not be taxed by another state.[8]

Forcing the *Complete Auto Transit* test into a role for which it was not designed, appellants argue that the Montana tax is inconsistent with the final two parts of the test, which prohibit discrimination against interstate commerce and which require that a tax on interstate commerce be fairly related to benefits received by the taxpayer. The argument is not persuasive.

A. The Montana severance tax does not discriminate against interstate commerce because it does not favor local markets over interstate markets.

Appellants argue that the tax discriminates against interstate commerce "because it would shift an extraordinary burden to other states". (Appellants' Brief at 33.) The cases cited do not support such an argument. Appellants concede that the Montana tax does not discriminate on its face, while citing *Nippert* v. *City of Richmond*, 327 U.S. 416 (1946), for the proposition that a tax which is not discriminatory on its face may discriminate in fact. In order to find discrimination, whether facial or factual, there must be a discrimination against interstate goods or taxpayers in favor of local goods or taxpayers or an attempt to benefit local commerce at the expense of interstate commerce. The first type of discrimination occurs in situations such as *Boston Stock Exchange* v. *State Tax Comm'n.*, 429 U.S. 318 (1977), where higher tax rates were imposed on out-of-state businesses than on local businesses, or *Nippert* v. *City of Richmond*, *supra*, where the facially neutral tax was found to im-

Footnotes at end of article.

pose a higher tax on out-of-state vendors than on local vendors. The second category of cases is illustrated by *Pike* v. *Bruce Church*, 397 U.S. 137 (1970), where an Arizona statute prohibited shipment of cantaloupes out-of-state unless they had been packed in a state-approved manner, or *Oklahoma* v. *Kansas Gas Co.*, 221 U.S. 229 (1911), where the state tried to prohibit the exportation of natural gas. In these last two situations the statute was designed to favor local industry at the expense of interstate commerce.

In this case there is no attempt to favor local industry over out-of-state industry nor is there an attempt to prevent local resources from being exported. This case involves a uniform tax on every ton of coal produced in Montana, whether produced by local or out-of-state taxpayers and whether bound for use in or out of Montana. Even if appellants could prove that every ton of coal produced in Montana were eventually exported, that alone would not prove discrimination. Appellants' argument resembles that rejected by the Court in *Exxon Corp.* v. *Governor of Maryland*, 437 U.S. 117 (1978). In that case, *Exxon* challenged a Maryland statute which prohibited producers and refiners of gasoline from operating retail service stations in the state. The effect of the act was to require producers and refiners to divest themselves of any retail outlets which they owned. The divestiture requirements affected only interstate companies, but this Court said that "this fact does not lead, either logically or as a practical matter, to a conclusion that the State is discriminating against interstate commerce at the retail level." *Id.* at 125.

The Court listed some of the factors which led to its conclusion that the Maryland statute did not discriminate against interstate commerce:

"In fact, the Act creates no barrier whatsoever against interstate independent dealers; it does not prohibit the flow of interstate goods, place added costs upon them, or distinguish between in-state and out-of-state companies in the retail market. The absence of any of these factors fully distinguishes this case from those in which a State has been found to have discriminated against interstate commerce . . . The fact that the burden of a state regulation falls on some interstate companies does not, by itself, establish a claim of discrimination against interstate commerce." *Id.* at 126. (Citations and footnote omitted.)

Similarly, the Montana statute does not prohibit the flow of interstate goods, does not place added costs on interstate goods as such, and does not distinguish between in-state and out-of-state companies. In short, the tax does not discriminate against interstate commerce.

B. The Montana statute does not burden interstate commerce because Montana has provided services and benefits for which it is entitled to compensation.

Appellants allege that the Montana tax is not fairly related to the services provided by the state and seek an opportunity to prove that the tax bears no relationship to the legitimate needs of Montana. Appellants Brief at 29–30. Although this Court has not decided a case where the "fair relationship" test has been put in issue, more than once this Court has indicated that the fair relationship test would be satisfied by provision of services including "police and fire protection" and "the benefits of a trained workforce and the advantages of a civilized society." *Japan Line, Ltd.* v. *County of Los Angeles*, 441 U.S. 434, 445 (1979; *Department of Revenue* v. *Association of Washington Stevedoring Companies*, 435 U.S. 734, 764 (1978) (concurring opinion); *Exxon Corp.* v. *Department of Revenue of Wisconsin*, 446 U.S. —, 100 S. Ct. 2109, 2122 (1980).

There is no basis for a court to consider other factors. Indeed, appellants have failed completely to suggest how a court could identify, much less quantify, the benefits received by coal companies operating in Montana from the activities of the state's government. Moreover, except in the case of user fees, "a tax is not an assessment of benefits . . . The only benefit to which the taxpayer is constitutionally entitled is that derived from his enjoyment of the privileges of living in an organized society, established and safeguarded by the devotion of taxes to public purposes." *Carmichael* v. *Southern Coal & Coke Co.*, 301 U.S. 495, 522 (1937). In this case there is no allegation that the taxes are not devoted to public purposes. Creation of a trust fund for future generations is a legitimate public purpose. Providing funds to ameliorate the local impact of strip mining, providing funds for education, providing funds for highway improvement, and using taxes for the general support of the government are also legitimate public purposes. *See* 15–35–108 MCA. Federal courts have no basis for substituting their judgments on these matters for those of the Montana legislature.

CONCLUSION

For the foregoing reasons and those set forth by the appellees, the judgment of the Montana Supreme Court should be affirmed.

Respectfully submitted,

R. Stephen Browning [7]

[6] It is ironic that appellants rely on these cases which, although largely irrelevant to a tax on a local activity, do generally represent a trend of expanding the power of the states to tax actual interstate commerce, since appellants seek to diminish the power of the states to tax local activities which merely affect interstate commerce.

EXPLANATION OF BUDGET PROCESS

● Mr. BAUCUS. Mr. President, the U.S. budget and the process of creating this budget, is very complex. I am sure all of my colleagues are asked as frequently as am I for brief explanations of how this system works.

Recently, the Environmental Study Conference published a concise, clear summary that is so good that I want to make it easily available for constituents and others who are interested in the process. Accordingly, I ask that a copy of this paper be printed in the RECORD.

The material follows:

A GUIDE TO THE BUDGET PROCESS

(By Dave Lauter)

Think of the U.S. Treasury as a gigantic bank. Revenue flows in from three major sources: tax receipts, government operations (user fees, royalties, sales of timber on public lands, etc.) and sale of Treasury bonds.

An authorization law establishes what can be thought of as a checking account at that bank—a specific program account which can stay open for a specified number of years and be used under specified restrictions. Generally, authorizations provide ceilings for the total amount which the account can hold.

To take money out of the Treasury's general fund and put it into a specific program account requires budget authority, which is granted by appropriations acts.

The appropriations say, in effect, "This year, take this amount of money out of the Treasury and put it in the account for program X to be used according to the specifics in the authorizing law." The year referred to is a fiscal year, which begins on Oct. 1.

Some accounts do not get appropriations like that; they are entitlements.

The authorization law for an entitlement program sets a few criteria and then says, "Anyone who meets this description is entitled to the following sum from the Treasury."

Money to cover entitlement claims must be put into the program account or else the government defaults on its legal obligations. For that reason the entitlement programs often are classified among uncontrollable expenses, although the cost of an entitlement can be altered by amending the original authorization.

Another relatively uncontrollable expense is government obligations, contracts signed or orders placed or bills for services rendered which the government cannot refuse to pay without facing law suits.

Obligations may be entered into by an agency which has contract authority, a form of budget authority which allows them to sign a contract. Once the contract is signed, the Treasury must eventually put money into the agency's account to liquidate, or pay off, the obligation. Appropriations to liquidate existing contract authority do not get counted as new budget authority the way most appropriations do because the contract authority already has been counted once.

Another sort of account which deviates from the usual system is the trust fund. Some special taxes, mostly excise taxes, are credited by Treasury's accountants to specific funds. The money in the trust funds can be spent only for purposes set out in the authorization. If the amount coming in exceeds the amount spent, money in the trust fund piles up, and Treasury invests it. The interest gets credited to the trust fund. The Airport and Airways Trust Fund, financed by airline ticket taxes; the Highway Trust Fund, financed by federal excise taxes on gasoline and tires; and the hazardous waste and toxic spill "superfund," financed by taxes on chemical feedstocks, are prominent trust funds.

Other accounts, like the Land and Water Conservation Fund which pays for park acquisition, are called funds but are not trust funds. They get regular appropriations out of general revenues like any other program account and do not garner interest accrued on unspent money.

Not all the money in a program's account is spent in the year the money is appropriated. For many programs the appropriation may be spent-out over three or four years. The amount spent in any one year is that year's outlay.

When outlays for a given year match revenues from taxes and operations, the government has a balanced budget. When outlays exceed those two revenue streams, the government budget is in deficit, and the treasury must raise more revenue by selling more bonds. A budget with more revenue than outlays is in surplus.

Up until 1974, presidents occasionally impounded appropriated funds. That is, the president said, "Even though the money has been put into the program account, I have ordered that the money not be spent. Congress outlawed impoundments after former President Nixon took the practice to unforeseen heights. The 1974 Congressional Budget and Impoundment Control Act (Budget Act) also established the House and Senate Budget Committees and the Congressional Budget Office to help them.

Now if a president does not want to spend money which has been appropriated, he has two choices.

He can issue a deferral order which says that the money appropriated will not be spent this year but will be spent in the future. Deferrals go into effect unless either house passes a disapproval resolution.

If the president wants to stop spending on a program permanently, he must request a recision (also spelled "rescission"), which only goes into effect if Congress within forty-five days passes a resolution of approval.

One of the jobs of the General Accounting Office is to keep watch to make sure that what the president calls a deferral is not really a recision in disguise. If GAO decides a deferral really is a recision, it notifies Congress.

To keep track of all this, the U.S. government has two budgets. Both are talked about in terms of budget authority and budget outlays, hence the acronyms BA and BO seen in all the budget tables.

One of the budgets is the President's budget, due each year by Jan. 15, which gives the executive branch's detailed requests for most agencies and departments of the government.

Some off-budget government activities do not show up in the president's budget. These include some activities of semi-autonomous agencies such as the Tennessee Valley Authority. TVA's power generation activities are supported by TVA's ratepayers.

The term "off-budget" also is used to describe government activities paid for in a variety of creative ways which do not require direct withdrawals from the Treasury.

The second budget is the congressional budget, a resolution in which Congress sets itself some guidelines to keep government spending in line. The congressional budget is a much less detailed document than the executive budget, but, unlike the president's budget request, it can directly control congressional spending decisions.

Congress writes its budget in at least two parts. By March 15, each committee submits to the Budget committees its expectations for spending within its jurisdiction.

For a month the Budget committees ponder those reports, hold hearings and, by April 15, produce a first budget resolution, which sets general guidelines for spending and revenues for the fiscal year that starts the next October 1.

The budget resolution divides total budget authority and outlays into 18 broad functions, ranging from interest on the national debt to national defense and income security.

To take effect, the resolution must pass both houses. It is subject to the normal legislative process, including rules for floor procedure, time agreement and House-Senate conferences. It does not have to be signed by the president.

The amounts provided for each function supposedly guide and constrain congressional committees and subcommittees as they write spending and entitlement bills. The resolution also says how much revenue the government should collect.

In the fall, the Budget committees write a second budget resolution. This resolution revises the springtime effort and, once passed by Congress, turns the revenue and outlay guidelines into binding limits.

After passage of the second budget resolution, any bill which would cause outlays to rise above the ceiling or cause revenues to fall below the floor, can be killed in either house by a point of order unless a new budget resolution is passed.

What the president can do with a deferral order or a recision request, the Budget committees can do with a reconciliation resolution. If the committees determine that spending is going to break the bounds set by the budget resolution, they write a reconciliation resolution and send it to the floor. Upon passage, by both houses, the resolution becomes a binding order to House and Senate committees to write new laws to cut spending in specific functions or to raise new revenues. The committees draft their responses to the reconciliation orders and forward them to the Budget committees which then put the changes together in one large package for the floor. Congress first enacted a reconciliation last fall.

The preceding, of course, describes how the budget process is meant to work. It doesn't always happen that way. Budgets lead a double life as financial statements and political documents, and conflicts between the two arise all the time. Deadlines and rules for congressional action on the budget are self-enforced, and Congress nearly always runs late and sometimes ignores the rules completely.●

CONSULTANT REFORM AND DISCLOSURE ACT OF 1981

● Mr. BAUCUS. Mr. President, I am very pleased to cosponsor a bill, S. 719, introduced by the distinguished Senator from Arkansas, Mr. PRYOR.

As one who has spent considerable time investigating abuses of Federal contracting and consulting procedures, I support Mr. PRYOR's efforts to reform consulting practices. The Consultant Reform and Disclosure Act of 1981 will help solve many of the problems uncovered by congressional oversight subcommittees and the press during the last 2 years. I urge my colleagues to consider carefully each of its sections.

As chairman of the Subcommittee on Contracted and Delegated Authority in the 96th Congress, I reviewed consultant and contracting procedures at a dozen Federal agencies. My findings, unfortunately, were similar to those of Senator PRYOR and former Congressman Harris—from beginning to end, current contracting law has been ignored, misinterpreted or violated. And, the result was always the same—increased costs for the Government and the taxpayers.

I especially support this legislation because of its low cost "sunshine" provisions. I have always believed sunlight is the best disinfectant. The Senate should be doing everything possible to improve Government services while lowering the cost to the taxpayer. This legislation serves that purpose.

Almost without exception, problems occur in government contracting when contracts are let, monitored and completed behind closed doors. All too often, those individuals best suited to monitor contract work, including professional peers, are excluded from the process. In addition, contractors doing poor or shoddy work bounce from agency to agency receiving Government contracts because there is no institutional memory for the quality of work performed. Finally, professional biases are often not disclosed or uncovered until the product is in hand.

Mr. President, each of these problems costs us money. Former Senator Lee Metcalf began to address these problems as chairman of the Subcommittee on Reports, Accounting and Management. He issued, in August 1977, "A Survey of the Government's Purchase of Outside Services" that detailed the lack of information we then had about Government contracting. I urge this body to give this legislation its full consideration so we might begin working on solutions.

VIEWS ON THE BUDGET

● Mr. HART. Mr. President, on Thursday, March 19, the Senate Budget Committee voted unanimously on a set of budget reconciliation instructions. I supported the Senate Budget Committee reconciliation instructions because the Federal budget must be reduced by $40–$45 billion.

I opposed a number of the President's proposals—and the priorities which underlie them—because they undermine his own program of providing for increased productivity and a safety net for the needy, as well as our own energy security.

As we complete this first step in the process that will lead to a fiscal 1982 budget, we have made progress in our efforts to review Federal programs and reduce the Federal deficit. This reconciliation instruction continues a program of fiscal restraint that we began several years ago, one that will continue as we take up the first budget resolution next week.

Thus, those who have been making this effort welcome the administration's support in cutting the Federal deficit. And I fully expect the 1982 budget to achieve cuts about as deep as the ones the President has proposed. In many cases, I have supported the President's suggestions. Nonetheless, in important respects, both this process and the program it has produced are seriously deficient.

The President developed his proposals—proposals for radical changes in our Government—in only a few weeks. We on the Senate Budget Committee had less than 1 week to consider them.

It would be unfortunate if the results of this all-too-brief review were uncritically adopted in the first budget resolution. Even if the administration's proposals and the committee's decisions were perfect—and they are far from that—the crucial requirement of a program that cuts so substantially is bipartisan consensus.

Even in this brief time, the shortcomings of the President's program have already become apparent. While voting to approve the overall level of cuts endorsed by the administration, I would make those cuts quite differently in some important cases. The following three principles should be followed:

First, we should maintain public investment that contributes to economic growth, such as programs which foster technological research and the educated and well-trained work force that is crucial to increasing productivity. We must also maintain the public capital base—

railroads, highways, and waterways—that represent our Nation's infrastructure.

Repeatedly this past week, I supported inclusion of funds for this essential "supply-side" investment: Programs for economic development, for scientific research and for job training. Our Nation's economic strength comes as much from the innovation and skill of its people as from its machines and factories. This is essential investment in human capital.

Second, the President's program fails to achieve his goal of protecting the truly needy. This goal requires more than rhetoric and slogans about "safety nets." We should not cut programs on which the poor and the needy, depend: Child nutrition; nutritional assistance for women, infants—and children; medicaid; and low-income energy assistance. Clearly the safety net has a few holes. By restoring funds for these and other programs—and choosing other cuts—we can fill those holes.

Third, we must increase our energy security. This means we must rely on conservation, renewable energy, and synthetic fuels as well as nuclear energy. I opposed cuts that weaken our energy security, such as elimination of the solar bank and weatherization programs, sale of the SPR, when we could fund them dollar for dollar from funding for such outworn technologies such as the Clinch River Breeder Reactor.

These three principles—"supply-side investment," a true "safety net," and energy security—summarize the shortcomings of the administration's proposed cuts. We can achieve a better program that is consistant with these principles, while still applying real restraint.

The most serious deficiency, however, is not in the choice of budget or tax cuts. Rather, it is the administration's narrow assumption that these measures alone will solve the problems of our economy. They will not.

We cannot solve the problem of inflation without a policy that fosters moderation in prices and wages. We cannot demand national sacrifice and investment until we take steps to make sure that all parts of the Nation and our society reap the economic rewards. And our economy will never be healthy and secure until we reestablish our own independent energy supplies.

These are formidable challenges, but we can meet them. And we will.●

ORDER FOR RECESS UNTIL 10 A.M. TOMORROW

Mr. BAKER. Mr. President, is there a time for the convening of the Senate on tomorrow?

The PRESIDING OFFICER. There is not.

Mr. BAKER. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until 10 o'clock tomorrow morning.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECOGNITION OF SENATOR MATTINGLY AND SENATOR PRESSLER TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that after the recognition of the two leaders under the standing order tomorrow, the Senator from Georgia (Mr. MATTINGLY) and the Senator from South Dakota (Mr. PRESSLER) be recognized, each for not more than 15 minutes, in that order.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR ROUTINE MORNING BUSINESS TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that following the time allocated to the two leaders under the standing order and the special orders provided for on tomorrow, there be a period for the transaction of routine morning business, not to exceed 20 minutes, and that Senators may be permitted to speak therein for not more than 5 minutes each, and in no event to extend beyond 11 a.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR CONSIDERATION TOMORROW OF SENATE CONCURRENT RESOLUTION 9

Mr. BAKER. Mr. President, I ask unanimous consent that at 11 a.m. tomorrow, the Senate proceed to the consideration of the budget resolution, Senate Concurrent Resolution 9.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. BAKER. Mr. President, for the record. this has been cleared with the distinguished minority leader, as have the other requests I am making.

REMOVAL OF INJUNCTION OF SECRECY—TREATY WITH NEW ZEALAND ON DELIMITATION OF THE MARITIME BOUNDARY BETWEEN THE UNITED STATES OF AMERICA AND TOKELAU

Mr. BAKER. Mr. President, as in executive session, I ask unanimous consent that the injunction of secrecy be removed from the Treaty with New Zealand on the Delimitation of the Maritime Boundary between the United States of America and Tokelau (Treaty Document No. 97–5), transmitted to the Senate today by the President of the United States; and ask that the treaty be considered as having been read the first time, that it be referred, with accompanying papers, to the Committee on Foreign Relations and ordered to be printed, and that the President's message be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The message of the President is as follows:

To the Senate of the United States:

I transmit herewith, for the advice and consent of the Senate to ratification, the Treaty between the United States of America and New Zealand on the Delimitation of the Maritime Boundary between the United States of America and Tokelau. Also transmitted for the information of the Senate is the report of the Department of State with respect to the Treaty.

This Treaty is necessary to settle the overlapping claims of jurisdiction resulting from the establishment of a 200 nautical mile fishery conservation zone off the coasts of American Samoa in accordance with the Fishery Conservation and Management Act of 1976, and the establishment by the Government of New Zealand of a 200 nautical mile zone around Tokelau.

In this connection, the status of three Tokelauan islands has also been resolved and the sovereignty of the United States over Swains Island has been confirmed.

The Treaty satisfies the interest of the peoples of Tokelau and New Zealand that the Tokelauan claim to sovereignty over three of these islands, inhabited by natives of Tokelau and administered by New Zealand, will not be encumbered by a conflicting but inferior claim by the United States. The Treaty protects United States interests by confirming United States sovereignty over Swains Island, which had been claimed by Tokelau, and by securing a maritime boundary in accordance with equitable principles. It further serves United States foreign policy interests in the area by promoting friendly relations with New Zealand and with Tokelau.

I am transmitting for the information of the Senate a document from the Government of New Zealand vesting the Tokelauan signatories with authority to sign the Treaty on behalf of New Zealand and a separate exchange of letters between the United States and New Zealand, signed on December 2, 1980, setting forth the understanding of each side that New Zealand is willing to make arrangements for United States fishermen to have access to the Tokelauan 200 mile zone.

I recommend that the Senate give early consideration to the Treaty and give its advice and consent to ratification.

RONALD REAGAN

THE WHITE HOUSE, *March 25, 1981.*

RECESS UNTIL 10 A.M. TOMORROW

Mr. BAKER. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the order previously entered, that the Senate stand in recess until 10 a.m. tomorrow.

The motion was agreed to; and at 4:56 p.m. the Senate recessed until tomorrow, Thursday, March 26, 1981, at 10 a.m.

NOMINATIONS

Executive nominations received by the Senate March 25, 1981:

DEPARTMENT OF STATE

Nicholas A. Veliotes, of California, a Foreign Service officer of the class of career minister, to be Assistant Secretary of State, vice Harold H. Saunders, resigned.

79-059 O - 1984 - 65 - (Vol. 127 Pt.4)

HOUSE OF REPRESENTATIVES—*Wednesday, March 25, 1981*

The House met at 12 o'clock noon.

The Reverend Mr. Charles A. Mallon, permanent deacon, Holy Family Church, Mitchellville, Md., offered the following prayer:

The Lord is just in all His ways and holy in all His works. The Lord is near to all who call upon Him, to all who call upon Him in truth.—Psalms 145: 18.

Father open our eyes that we might see clearly the dignity of the poor and oppressed, and open our ears that we might hear their pleas.

Spirit of the living God enlighten our minds that we might know the bounty of God's creation, and open our thoughts to His eternal wisdom that our Nation's legislation might reflect that same wisdom.

Lamb of God open our hearts to Your fraternal love and draw this legislative family into unity with the Father, and purify our motives through the power of Your blameless blood that atones the transgressions of self-serving men.

We ask this as we ask all things, in the spirit of truth, through Christ our Lord. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

OFFICIAL OBJECTORS FOR DEMOCRATIC SIDE FOR 97TH CONGRESS

(Mr. WRIGHT asked and was given permission to address the House for 1 minute.)

Mr. WRIGHT. Mr. Speaker, I take this time to announce the official objectors for the Democratic side for the 97th Congress.

For the Consent Calendar, our official representatives will be the gentleman from Alabama (Mr. FLIPPO); the gentleman from Texas (Mr. HANCE); and the gentleman from Maryland (Mr. DYSON).

For the Private Calendar, our official representatives will be the gentleman from Massachusetts (Mr. BOLAND); the gentleman from Minnesota (Mr. OBERSTAR); and the gentleman from Pennsylvania (Mr. ERTEL).

MORE THAN A SQUABBLE OVER NUMBERS

(Mr. RATCHFORD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RATCHFORD. Mr. Speaker, the debate over the accuracy of the economic forecasts used by the administration in constructing its budget is not just a matter of partisan nitpicking on the part of the Democrats in Congress. To quote the Wall Street Journal:

> The debate over forecasts is more than a squabble over numbers. The dispute involves basic disagreement over how the economy works, and what mix of policies can best produce . . . high growth and low inflation.

The Congressional Budget Office analysis released recently concludes that President Reagan has overestimated the health of the economy, and thus underestimated the size of budget deficits over the next 3 years. But the CBO is not alone in feeling that the administration's hopes for the country are out of line with past experience and current realities.

Corporate economists were also quoted 2 weeks ago expressing skepticism that the public's attitude about inflation is going to change overnight or that lower taxes will be an incentive for harder work and greater productivity. And in testimony before committees, economists and financial experts have been in near unanimous agreement that President Reagan's scenario is beyond anything in this Nation's historical experience.

So, the numbers are not unimportant. They provide a measure of the President's clarity of vision on how the economy works, and a measure of how well his policies hang together as a whole and work. The budget figures will be reestimated this summer by CBO; if they again show serious flaws in the administration's projections for spending and deficits, it will be an indication of just how nearsighted the President has been and how effective his policies have been.

"All the President has given us so far is a theory," in the words of Irving Shapiro, chairman of the Du Pont Co. and one of the leading spokesmen for American business. "No businessman can run his company on an untried business theory."

Nor, one might add, should a government.

VICE PRESIDENT BUSH TO HEAD ADMINISTRATION'S CRISIS MANAGEMENT TEAM

(Mr. LAFALCE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LAFALCE. Mr. Speaker, it was with a great deal of pleasure and relief that I learned today of Vice President BUSH's designation as head of the administration's crisis management team.

The news was pleasing because Mr. BUSH has a broad foreign policy background, with much diplomatic experience.

But, Mr. Speaker, my strongest emotion is one of relief. I believe that President Reagan has made one of his smartest moves as President by deciding against Secretary of State Alexander Haig. Former General Haig has shown a warlike proclivity in his new position, voicing sentiments on policy matters in a way that demonstrate that military, not diplomatic, options are usually his primary approach.

Mr. Haig has declared himself the "Vicar of Foreign Policy"—a title that I believe reveals much about the man's lack of diplomatic instincts.

This latest incident is pehaps most revealing. In a conflict over responsibilities with the Vice President of the United States, Mr. Haig chose to reveal his displeasure in public, and to show his disappointment and resentment to a world that he hopes will stiffen at his commands. Rather than accept the fact that crisis management is a role traditionally reserved for the White House, and that the Vice President is, after all, his superior, Mr. Haig chose to display his arrogance in public.

I am relieved that this man is not going to head our Nation's crisis management team.

THE HIDDEN DEFICITS IN THE PRESIDENT'S BUDGET

(Mr. GLICKMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GLICKMAN. Mr. Speaker, throughout his campaign and in his first address to the Nation, the President proclaimed that the root of all economic evil was the deficit spending of the Federal Government. And yet his budget is built around quite substantial deficits—those seen and those hidden.

□ This symbol represents the time of day during the House proceedings, e.g., □ 1407 is 2:07 p.m.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

Then candidate Reagan promised a balanced budget by 1983. President Reagan's budget calls for a deficit of $45 billion in fiscal 1982 and $23 billion in fiscal 1983, with a balanced budget possible only by 1984. To reach even that goal the President must come up with as of yet unspecified savings of $30 billion in 1983 and $45 billion in 1984. In addition, he must have accurate economic assumptions.

Today the Congressional Budget Office (CBO) released its estimates of the Reagan budget and found these economic assumptions unrealistic. CBO thus estimates much larger deficits than the White House admits. For fiscal 1982 CBO concludes the deficit will be $67 billion—$22 billion more than the Reagan estimate and, one might add, almost $40 billion more than the January budget submitted by Mr. Carter. For 1983 where the Reagan budget foresees a $23 billion deficit, CBO forecasts almost double that—$59 billion. And looking ahead to 1984 when the President promises us a budget surplus of $1 billion, CBO sees a $49 billion deficit instead.

The CBO's analysis is just the latest in a series of reviews by noted economists and budget experts that cast serious doubt on the economic assumptions used by the administration in putting this budget together. The growing discrepancy between what these experts feel are realistic projections for inflation and growth and interest rates, and what the administration says, leads one to the uncomfortable suspicion that the Reagan team was forced into assuming a rosy economic future as the only way to deliver on its exaggerated promises of reduced taxes, higher defense spending, and lower budget deficits—all at the same time.

The whole range of overly optimistic economic assumptions woven into the Reagan budget only works to hide budget deficits, not reduce them.

THE REAL WORLD

(Mr. DASCHLE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DASCHLE. Mr. Speaker, I wish to associate myself with the remarks made by the gentleman from Kansas.

Mr. Speaker, the budget reestimates released today by the Congressional Budget Office underscore the same message received by Congress over the last few weeks from noted economists and financial experts; and that message is that the Reagan budget plan is based on wildly optimistic assumptions about the future direction of the American economy.

What frightens me to death is that, even with these incredibly optimistic assumptions, the Reagan administration itself predicts a $45 billion deficit for 1982. If those assumptions are wrong, as CBO and almost every other knowledgeable expert we have heard says they are, then a deficit of at least $60 to $70 billion is likely. And if we face another Middle East problem, or any of a score of other unpredictable disasters, both inflation and the deficit could soar even higher.

In my opinion the odds that the Reagan budget will result in a $100 billion deficit for 1982 are at least equal to the odds it will mean the $45 billion deficit he predicts.

Faced with these possibilities it would be the height of irresponsibility for this Congress to adopt the $50 billion plus, across-the-board tax reduction proposals presented by the President. Certainly we need tax relief. Certainly we can devise tax relief that will provide some direct, targeted assistance for our hardest pressed taxpayers and our investment starved businesses. But can we really afford to gamble on a $100 billion deficit? Can we afford to gamble on a runaway inflation? And can we, Mr. Speaker, really afford to make a gamble for those kinds of stakes based on budget numbers that amount to little more than economic tea leaf reading?

I believe our first goal should be to make the spending cuts we need to get our Federal budget into balance. I intend to work and vote this year toward that end. I have presented a detailed program toward that end and will work this year in hopes it can be adopted. But whatever policies we adopt, let us use realistic economic assumptions. Let us assume the worst and devise a budget that can begin ending inflation even if the worst comes to pass. Let us level with the American people about the difficulty of slowing inflation and get on about the job in full recognition it will not be easy.

That, I believe, is the only responsible way to proceed.

HOUSE SHOULD REJECT EFFORT TO ELIMINATE LEGAL SERVICES PROGRAM

(Mr. WEISS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WEISS. Mr. Speaker, David Stockman may or may not be good with numbers, but his attempts at defining social policy clearly leave a great deal to be desired. He demonstrated his lack of understanding again on Sunday, when he made the sweeping statement that American citizens are not entitled to Federal services of any kind.

Mr. Stockman made this statement in response to a question about the administration's proposal to eliminate Federal funding for legal services. In effect, this proposal would eliminate the basic right to equal justice for many poor and underprivileged citizens who cannot afford to hire a lawyer.

Legal services is one of many programs designed to insure equal opportunity and a basic living standard for all our citizens. The provision of such basic services is a national commitment certified by legislation enacted by this Congress almost 20 years ago. These services express basic rights also identified by the courts, and epitomize the spirit of social justice which motivates our uniquely successful democracy.

The right of every citizen to equal justice will be severely curtailed under the Reagan-Stockman plan and our society will be the poorer for it. I urge the House to reject this ill-considered effort to eliminate the legal services program.

The SPEAKER pro tempore (Mr. AKAKA). The time of the gentleman from New York has expired.

IS EVERY TAX EXPENDITURE MORE PRECIOUS THAN EVERY SPENDING CUT?

(Mr. HUGHES asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HUGHES. Mr. Speaker, the President has promised the country deep spending and tax cuts, billions more in defense—and a balanced budget. Much of the defense budget increases are coming out of programs that now provide that safety net for the elderly and the poor which the President has lowered considerably in his economic package.

What the President and his Budget Director, David Stockman, refuse to recognize in their march toward a balanced budget is the entire range of tax expenditures that offer enormous direct Federal benefit to individuals and businesses.

Most of the tax expenditures were put in the code long ago to shape particular economic and social responses—from oil depletion allowances to credits for political contributions. In fiscal year 1982 these expenditures will amount to just under $230 billion. In fact, tax expenditures have grown faster in recent years than direct Federal spending.

The question to Mr. Reagan and Mr. Stockman is whether every tax expenditure in the tax code is more precious than every spending cut we are being asked to make in the name of defense and a balanced budget?

U.S. AMBASSADOR TO UNITED NATIONS MEETS WITH SOUTH AFRICAN MILITARY OFFICIALS

(Mr. MOFFETT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MOFFETT. Mr. Speaker, it was not that long ago that Members of this body, most of them from the minority, were attacking the Carter administration's behavior at the United Nations, the mixed signals and confusion, and the Carter foreign policy overall. Today's paper presents a situation that makes much of that look like child's play. It tells us today that Jeane J. Kirkpatrick, the U.S. Ambassador to the United Nations, was totally unaware that she was meeting with South African military officials until well after the March 15 meeting took place. A State Department official said that Jeane Kirkpatrick was under the impression that the four officials with whom she met were civilians interested in promoting closer United States-South African ties when she attended a private luncheon for them.

Even worse, these four civilians also met with officials of the National Security Council and the Defense Intelligence Agency, and not until March 13 did the State Department become aware of the four officers' presence.

Mr. Speaker, this is indeed confusion that far surpasses the Carter administration.

THE 160TH ANNIVERSARY OF GREEK INDEPENDENCE FROM OTTOMAN EMPIRE

(Mrs. HOLT asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. HOLT. Mr. Speaker, today we commemorate that day 160 years ago when the people of Greece started their rebellion for independence from the Ottoman Empire. We Americans, who annually celebrate the birth of our country through revolution from foreign domination, can share the feelings of our Greek brothers and sisters on this day.

We especially note the great contributions Greek Americans have made to our country. They are heirs to a great and ancient culture that has much to teach us. They have been valuable citizens of our land.

Greece was not born in the 19th century revolution that won independence from the Ottoman Empire, and Greece is much more than a nation. It is a civilization that gave the world stupendous works of art, poetry, architecture, drama, and philosophy hundreds of years before the birth of Christ. The idea of democracy originated in Greece. Western civilization has its roots in the distant Hellenic past.

As we mark Greek Independence Day now, I should note that severe earthquakes have shaken that country in February and March. The United States has provided some emergency assistance, and the Government of Greece may request aid for reconstruction. We should give prompt consideration to such a request.

It is also very fitting that this day is Maryland Day, commemorating the date 347 years ago when the first European settlers landed on the shores of Maryland, the great Free State so named because of the open arms to all and the freedom of religion practiced there.

DEMOCRATS INVITED TO JOIN IN TAX CUTS

(Mr. SOLOMON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SOLOMON. Mr. Speaker, you know, I am a little confused. I have been watching a lot of Democrats from that side of the aisle standing here day after day complaining about the cuts, but I have also been keeping a running account of all the Democrats that have stood up and asked for more cuts. My total so far comes to 45.

Gentlemen on that side of the aisle, we Republicans only need 28 of you. If you want more cuts, baby, we will give them to you. Just come on over and join us, and we will be glad to not only pass President Reagan's economic plan, but we will cut even more if you will help us. In other words, gentlemen, put your votes where you rhetorical mouth is.

INCENTIVE TO SAVE

(Mr. DREIER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DREIER. Mr. Speaker, I wish to bring to the attention of my colleagues legislation I have introduced to attack one of the most debilitating elements of this Nation's economy. That is, the desperately low rate of personal saving.

Today, I have introduced legislation which calls for an exclusion from taxation for the first $750 of interest earned by an individual, or $1,500 if earned by a married couple.

Let me say that I am a strong supporter of President Reagan's program for economic recovery. The measure I have introduced is designed to go hand in hand with that program. The President's proposal will leave more money in the hands of our Nation's taxpayers. The Congress must take action to encourage Americans to save those dollars.

I would like to ask my colleagues to read my additional remarks printed in today's record and to join me by cosponsoring the vital legislation I have introduced.

GIVE PRESIDENT REAGAN'S PLANS A CHANCE TO WORK

(Mr. LUNGREN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LUNGREN. Mr. Speaker, as I have sat here and listened day after day, I have become perplexed. I have heard Members on the other side criticize the President's tax cuts in taking away money from Government on the one hand and then tell us, "Besides, it is not really a tax cut, even with the Reagan tax cut the American taxpayer is going to pay more money because of the progressive tax rates that we have already built in."

I have also heard them talk about the budget cuts. They have attacked the budget cuts as being inhumane, insensitive, not proper, and excessive on the one hand, and then tell us, "Look at CBO. CBO tells us that the President is too optimistic. If we adopt all his cuts, we will have an even higher deficit."

I am really confused. Which do they want, a higher deficit or a lower deficit? Do they want more tax cuts or do they want less tax cuts? It is very easy to sit back and criticize the President, to blame him for the impending deficit we are going to have when he has been in office but 2½ months, after we had an administration for 4 years which brought us pie-in-the-sky promises and never did deliver.

If you want to criticize the President's budget and tax policy, first give it a chance to work. If it does not work, then come back and say, "We have given you a chance and it did not work. Let us try something else."

But, do not hamstring him or cut him off at the pass. Do not say that his untried plan is not good enough and then urge us to go back to the old way that we know does not work.

□ 1230

ANNOUNCEMENT OF OFFICIAL REPUBLICAN OBJECTORS FOR CONSENT CALENDAR AND PRIVATE CALENDAR

(Mr. MICHEL asked and was given permission to address the House for 1 minute.)

Mr. MICHEL. Mr. Speaker, I take this time to announce the official objectors from the Republican side for the Consent and Private Calendars.

The Republican official objectors for the 97th Congress for the Consent Calendar will be the gentleman from Pennsylvania (Mr. WALKER), the gentleman from California (Mr. LUNGREN),

and the gentleman from South Carolina (Mr. NAPIER).

For the Private Calendar, the Republican official objectors for the 97th Congress will be the gentleman from California (Mr. ROUSSELOT), the gentleman from Wisconsin (Mr. SENSENBRENNER), and the gentleman from Virginia (Mr. BLILEY).

PROVIDING FOR EXPENSES OF STANDING AND SELECT COMMITTEES OF THE HOUSE

Mr. BOLLING. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 116 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 116

Resolved, That during the consideration of the resolution (H. Res. 115) providing for the expenses of investigations and studies to be conducted by the standing and select committees of the House, debate in the House shall continue not to exceed four hours, to be equally divided and controlled by the chairman and the ranking minority member of the Committee on House Administration. It shall be in order to consider, without intervening motion, the amendment to said resolution printed in the Congressional Record of March 24, 1981, by, and if offered by, Representative Wright of Texas, and said amendment if offered shall not be subject to amendment or to a demand for a division of the question and shall be debatable for not to exceed one hour, to be equally divided and controlled by Representative Wright and the ranking minority member of the Committee on House Administration or his designee. The previous question shall be considered as ordered on the amendment, if offered, and on the resolution to final adoption without intervening motion except one motion to recommit with or without instructions and a motion to recommit with instructions shall be debatable for not to exceed one hour, to be equally divided and controlled by the proponent thereof and a Member opposed.

The SPEAKER. The gentleman from Missouri (Mr. BOLLING) is recognized for 1 hour.

Mr. BOLLING. Mr. Speaker, I yield 30 minutes to the gentleman from Mississippi (Mr. LOTT), pending which I yield myself such time as I may consume.

Mr. Speaker, this is a very straightforward rule—unusual but straightforward. House Resolution 115 is already in order because it is privileged, and what House Resolution 116, the rule just read, does is provide for some additional procedures.

The additional procedures involve making in order 4 hours of general debate, to be equally divided and controlled between the appropriate chairman and the ranking minority member; an amendment to be offered by the majority leader, the gentleman from Texas (Mr. WRIGHT), to be debated for an hour, to be equally divided between the gentleman from Texas (Mr. WRIGHT) and the ranking member of the Committee on House Administration; and then a motion to recommit with instructions, which will come from the Republican side, with an hour of debate and again to be equally divided between the proponent—I take it that is the gentleman from Minnesota (Mr. FRENZEL)—and an opponent.

I see no reason why this should be considered as anything but a fair approach to the problem. The main issue is put before us, and one side has an amendment and the other side has an amendment. It seems to me to be a very fair way in which to deal with the problem.

Mr. Speaker, the rule came out from the Committee on Rules on a voice vote, and I see no reason for my extending debate, so I reserve the balance of my time.

Mr. LOTT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this rule provides 4 hours of debate on House Resolution 115, the consolidated commmittee funding resolution, with debate time evenly divided between the majority and minority managers. It also makes in order an amendment to be offered by the distinguished majority leader (Mr. WRIGHT), subject to 1 hour of evenly divided debate time. And finally, the rule makes in order a motion to recommit, with or without instructions, and 1 hour of evenly divided debate time if the recommittal motion includes instructions.

Mr. Speaker, let me make quite clear at the outset that I strongly object to this new, streamlined, and consolidated procedure for considering the funding requests of some 24 standing and select committees in a single resolution. Make no mistake about it, this is an unprecedented procedure for handling these committee funding resolutions. Ordinarily these come to the floor as separate resolutions from the House Administration Committee and are privileged matters requiring no rule from the Rules Committee. It is obvious that the leadership felt it necessary to consolidate these various authorizations this year because many of them could not stand the test of individual House scrutiny and a vote.

I think it is time to lay to rest another claim that is being made by some, and that is that the House Administration Committee's recommendation and the Wright amendment would make real cuts from last year's committee spending. While it is true that both make reductions in last year's authorization levels, the fact remains that the House Administration recommendation is still 11.9 percent higher than what was actually spent by our standing and select committees last year, and the Wright amendment is still 6 percent higher than last year's expenditures for these units. So do not let anyone fool you into thinking that we are actually going to be spending less than last year under either of these proposals.

The Republican alternative, which will be offered in the motion to recommit with instructions, is the only chance you have for really making a reduction from last year's expenditure level—a $2.9 million cut which comes to 9.6 percent less than we spent last year on our standing and select committees. Now, it is true that if you include HIS, Mr. WRIGHT's amendment comes in at about 1 percent below the 1980 expenditure level; but, by the same token, the Republican substitute then amounts to an 11.6-percent reduction from the 1980 spending total.

Finally, Mr. Speaker, let us put to rest this bugaboo that the DSG is peddling that our attempts to cut back on committee staff is some kind of a partisan conspiracy to render our committees "inoperative" so they cannot handle the administration's program. That is the biggest bunch of hogwash I have ever read. In the first place, we opposed inflated committee staffs when a Democrat, Mr. Carter was President. We forced rollcall votes on 15 of the 21 funding resolutions considered in February of last year, and, with a little help from the other side of the aisle, we might have defeated a couple. In the second place, we want our committees to be able to handle the administration's legislative proposals, efficiently and expeditiously. It would do us no good to have the committees rendered "inoperable" so that they could not do their work. And that is certainly not what our proposed cutbacks would do. If anything, a reduction in staff would make the legislative process more efficient and manageable. The fact is, we have got staff tripping over staff nowadays, and subcommittees tangling with subcommittees. We have reached a point of diminishing returns when it comes to committee staffing, and the legislative returns on our investment in this process are diminishing pretty rapidly.

I do not offer this as a partisan criticism. The fact is that it is a view shared by most Members, regardless of party. In just the last Congress our bipartisan Select Committee on Committees surveyed Members on numerous issues, including committee staffing, and listen to the results of that survey:

By a margin of 63 to 23 percent, Members felt committee staffs are generally too big;

Members felt the growth of committee staff should be controlled by a margin of 61 to 27 percent;

And 80 percent of the Members agreed that some kind of overall ceiling should be placed on committee and subcommittee staff;

Moreover, 62 percent of the Members agreed with the statement that

"large committee staffs have contributed to fragmentation and unmanageability of the House committee system," while only 20 percent disagreed.

So this is not a partisan issue—it is a general consensus. And it is not just a question of austerity for the sake of austerity, though that is a big part of last fall's mandate; it is an institutional problem crying out for a solution.

In conclusion, Mr. Speaker, I oppose this rule because it does establish a precedent of making it impossible to further reduce individual committee staff authorizations, or even get a separate vote on the most objectionable committee resolutions. We should not be forced, as this rule would have us do, to consider all committees as some amorphous lump or dough that is either good or bad per se. We should retain the options we have had in the past, when these were considered separately, of exercising our collective judgment on each committee based on its past performance and anticipated workload for the coming year. To do otherwise is to unfairly slight some committees and overly protect others. So let me simply warn my colleagues now that if you accept the precedent being establish in this consolidated procedure today, you are simply opening your committees to unfair across-the-board cuts in the future which may be imposed due to the profligacy of other committees. Think about it.

Mr. Speaker, I now yield 5 minutes to the distinguished minority leader, the gentleman from Illinois (Mr. MICHEL).

Mr. MICHEL. Mr. Speaker, I appreciate the gentleman's yielding me this time, and I applaud him for his very comprehensive statement.

So long as this gentleman has been a Member of this House, I know of no time when funding resolutions for our committees have been deferred to such a late date as this one. As the gentleman from Mississippi pointed out, normally we would have considered these on an individual basis, and they were originally scheduled for consideration 3 weeks ago. But due to the fact that the Republican opposition was making a point on the size of those resolutions, and then being joined by some well-meaning and discerning Democrats on the other side of the aisle, it is quite obvious the leadership on the other side recognized some adjustment had to be made.

So I join with the gentleman from Mississippi (Mr. LOTT) in the assessment that what the majority leader will be proposing here is a good move in the right direction. It is not, in this Member's feeling, sufficient, and I would hope that Members would at the appropriate time support the motion to recommit to give us that meaningful reduction of 10 percent rather than simply going through the motions with a half-hearted gesture.

With that, Mr. Speaker, I yield back the balance of my time.

Mr. LOTT. Mr. Speaker, I yield 5 minutes to the gentleman from Minnesota (Mr. FRENZEL).

Mr. FRENZEL. Mr. Speaker, I would echo the sentiments of the distinguished gentleman from Mississippi (Mr. LOTT) that this unfair rule is about as fair as an unfair rule can be. Later I will talk a little bit about its closed nature, about the lack of amendments, and about the restriction on debate time.

On the other hand, Republicans at least were fairly allowed some extra time to discuss their motion to recommit with instructions. However it is unfair that the Democratic leadership's amendment is allowed a preferential position. The Republicans' amendment, my own, is forced into the motion to recommit after the main action on the bill has already taken place. That is an unfair way to divert the attention of the House away from the Republican amendment.

Nevertheless, the allotment of time is, I think, reasonable, even though I do not like the style in which this whole thing is being presented.

Mr. Speaker, the problem of committee budgets is not an easy one. It is simple for Members to defend committee budgets with unreasonable rhetoric, and it is just as simple for Members to take cheap shots at them. Often, the conversation on both sides of the aisle is overstated.

Nevertheless, the intent of the Republican motion to recommit which I will offer is to stress the fact that sacrifice begins at home. If we are indeed going to make budget cuts this year, we ought to include ourselves in them, and they ought to be significant cuts that the public understands.

But back to the rule, this rule departs from the usual precedent, as noted by the distinguished Republican whip, in that, instead of considering the resolutions separately and giving them the attention of the House, we will be obliged to debate and vote on them in one single lump.

□ 1245

This, of course, prevents legislative scrutiny on the individual budgets. It focuses on the macro elements, but takes our minds off of bloated budgets of specific committees. It restricts the debate from the customary 1 hour per resolution, which would have been 25 hours. It restricts the potential number of votes on which Members would like to be recorded from about 50 to 3.

In my judgment, all of these things are detrimental to free and fair discussion, and to recording of the Members' sympathies on this very important issue.

This rule was denied in the traditional Democrat style. That is, when the people are against you, you close the rule and you limit debate and you hope maybe the people would not find out.

The only defense of handling all these resolutions together that I have heard articulated, either before the Rules Committee or elsewhere, is that it wastes the time of the House to talk about committee budgets.

Well, I would like to know what the House has been doing since January that is so important that we cannot take a little time to talk about committee budgets. I would like to have the Member stand up who tells me that he is too busy with work on the floor, or who has had too many votes, or who believes that the House has spent too much time in session.

I would like to know if there is anybody in the House who wants to go on record as saying that debate over spending the taxpayers' money is a waste of the time of the Congress. Is $40 million of the taxpayers' money too little that we should discuss it on the floor of this House?

I doubt that anyone will want to say that, but that is what the Rules Committee said when it passed this resolution.

It is a bad resolution. It sets a bad precedent, but I have to echo again the remarks of the distinguished Republican whip who said that once it is passed, we can never turn back. No committee chairman, no Rules Committee chairman, will ever want to bring out these things separately. Nor will any political party. So today when we vote on this rule, we are forcing a precedent that is going to be with us probably through our political lifetimes.

Mr. Speaker, what we are not going to get a chance to talk about this afternoon are all these things that we could focus on that refer to the specific committee spending. You know, there are the select committees which have no legislative jurisdiction, but they have lots of staff. They cannot pass bills, but they can spend money like mad.

We could talk about the good committees. Those are the ones that submit what we consider to be reasonable budgets. They include the Armed Services Committee, House Administration Committee, the committee which accepted a voluntary 20-percent cut under what it spent last year, and the Standards of Official Conduct Committee which we think deserves the increase that it is getting.

The SPEAKER pro tempore (Mr. NATCHER). The time of the gentleman from Minnesota (Mr. FRENZEL) has expired.

Mr. LOTT. Mr. Speaker, I yield 2 additional minutes to the gentleman.

Mr. FRENZEL. The Public Works Committee, Mr. Speaker, is a good committee. It and the Agriculture Committee give almost one-third of their staff to the minority. They come the closest of all the standing committees toward meeting the one-third-two-thirds staff ratio test.

We could also talk about the bad committees, at least bad in my judgment; the Energy and Commerce Committee, which has asked for over $4 million and which is, with the exception of the Appropriations Committee, the House's most egregious spender.

We could talk about the Post Office Committee which in a time of austerity and sacrifice asked the House Administration Committee for twice as much money as it spent last year, or I suppose we could talk about the Rules Committee which had that famous 1,600-percent increase 5 years ago, and was back for a huge increase again this year. Or, we could talk about the persecuted committee, that is the House Information Systems. The majority leader's amendment takes almost all of the cuts out of that particular service. The reason is so that the favored committees and committee chairmen will not be reduced too much and will, in fact, be allowed to spend under his amendment more than they spent last year.

We also are not going to have a chance to talk much about minority staff ratios. Twice this House has voted to have one-third of the total staff assigned to the minority and two-thirds to the majority. The Senate follows a similar rule today. However, in this House currently less than 20 percent of the staff is assigned to the minority, which makes up 44 percent of the seats in this House, an obvious discrimination.

Well, Mr. Speaker, I am not going to go on much longer except to say that I think the House is making a mistake when it accepts the consolidated resolution to handle these funding resolutions. I warn the House again that once we go, there will be no returning. This is the way we are going to handle funding resolutions in the future.

I thing it is a bad rule and it should be defeated.

Mr. BOLLING. Mr. Speaker, I yield 5 minutes to the gentleman from Connecticut (Mr. MOFFETT).

Mr. MOFFETT. Mr. Speaker, I thank the distinguished chairman of the Rules Committee for the time. I will not take the full 5 minutes, but I rise only to say that I suppose it would not be the same if we did not have the articulate opposition of the gentleman from Minnesota, who is, indeed, an articulate spokesman for his point of view; but I will point out, as I think the distinguished chairman has, that the proposal that will come before us is essentially the same as the Senate proposal and it represents a 10-percent cut over last year's authorization; but beyond that, when the gentleman from Minnesota asks the question, what have we been doing with our time? I would like to respond on behalf of a lot of people on this side of the aisle who have been working extremely hard to try and determine how we can responsibly approach the budget and just as importantly to hold oversight hearings and investigative hearings into various Federal programs and the question of whether or not they work or they do not work and the various regulations and the question of whether they work or do not work.

I think all of us in this body would agree that one of the most important functions of this body is to try and figure out what works and what does not work, not just to go in with a hatchet and slash things, but to say what represents a wise investment by the taxpayers and what does not.

Now, this gentleman will never say, the gentleman from Minnesota is right about this, you will never get this gentleman or probably anyone to say that $40 million is not important. It is an important expenditure to take a look at; but how about the $40 milllion in comparison to say the $7.5 billion in oil company overcharges that the Department of Energy is turning its back on? That is the kind of thing we have been investigating.

We would love to have more support on that particular kind of thing from the minority that is so indignant about the issue before us.

The question of expenditures by this body is extremely important and none of us would deny that; but if the gentleman wonders what many of us have been doing, we have been chairing hearings and sitting in hearings and doing our investigative oversight work to try to determine what is happening with Federal programs, what works and what does not work.

I wanted to say that because I have never seen this body in my 6 or 7 years here so serious about that sort of thing on both sides of the aisle, so serious about its oversight reponsibilities, and it would be a terrible disservice and injustice to this body to leave the impression that we have somehow not been working hard or not looking at expenditures overall, because I am rather proud of the way this body has been performing the past 2 or 3 months on that very issue.

I thank the gentleman for yielding to me.

Mr. LOTT. Mr. Speaker, I yield 5 minutes to the gentleman from California (Mr. BADHAM).

Mr. BADHAM. Mr. Speaker, I serve on the House Administration Committee as the ranking minority member of the Accounts Subcommittee. I think that there are a few obvious reasons as to why we are coming before the House with this precedental rule.

First of all, as the gentleman from Mississippi, our gentleman on the Rules Committee, says, a lot of these resolutions really could not stand the scrutiny of the light of day.

Comments were made that the Senate did their committee budgets one way. A lot of people around here, I guess, have a hard time figuring out that we are not the Senate. We are the House of Representatives. We do not know what they have done or why they have done it. They have their own reasons for doing that, but at least they made cuts.

Now, another reason I think the majority lumped it all together is because that is the way that the information comes to the House Administration Committee, just in a lump. A committee chairman will come in and say, "We need so much money because we are going to be doing such and such an activity." We have absolutely no way of finding out whether a committee and its staff and all those bodies actually do what they say they are going to do.

Another reason is because the majority does not want to waste the time of the Congress taking up spending resolutions of $30 to $40 million, waste the time of the Congress discussing each committee, its activities, and the bloated numbers of staff people they have.

Besides, if we did debate each one of these as privileged resolutions, it would take some 25 hours, rather than the 4 hours we have set aside for this, but I would venture to say in those 25 hours we would have more votes than this House has already had for this session of Congress—and at least we would be doing something. We would at least be doing some business with the taxpayers' money.

We have had only 11 recorded votes thus far in the 1st session of the 97th Congress, which is supposed to be, if we were on the old time calendar, halfway through. I think this rule is very clear. It is trying to lump together to keep it out of sight. It is trying to lump it together so more will vote for it than would otherwise if they really knew what was in these spending resolutions and what the spending would really be used for. We are adding more bodies. It is business as usual and I contend that the people of this country have not quite yet got the message over to the House of Representatives that it is time to start cutting.

Mrs. FENWICK. Mr. Speaker, would the gentleman yield?

Mr. BADHAM. I would be delighted to yield to my colleague, the gentlelady from New Jersey.

Mrs. FENWICK. I thank my colleague for yielding.

I would like to ask the Rules Committee, why was this brought to the floor in this way? Those of us who sit on various committees of this House know where the padding is. We know perfectly well that there are certain committees, with large numbers of investigators, which meet only two or three times a year at most.

Why do we have to go on with this year after year when the people are staggering under their taxes, threatened by increases in costs and social security taxes; why do we have to do it?

Mr. BOLLING. Mr. Speaker, will the gentleman yield?

Mr. BADHAM. I would be delighted to yield to the gentleman for a response.

Mr. BOLLING. Frankly, because the attitude toward this rule was relatively mild up to this point, I had not intended to get involved in this aspect of it.

One of the reasons that we have to do it is that we have been unable to pass in this institution an overall approach to the problem of administration in the House of Representatives. There have been a number of occasions, but on the most recent occasion, on October 12, 1977, a rule brought up an extensive proposal. It was defeated by a substantial majority, with not a single Republican voting for the consideration of the matter. That was on October 12, 1977.

One of the reasons that we have been unable to deal with the problem of committees and committee staffs is that we have been unable to put together an approach that seemed acceptable to both sides of the aisle.

Mr. BADHAM. If I may for just a moment reclaim my time, undoubtedly the gentleman is referring to the great report of the great Patterson committee, when we established a new committee to find out why we had so many committees. Is that the one the gentleman is referring to?

Mr. BOLLING. No; in 1977 it turns out to be the Obey Commission.

Mr. BADHAM. I am sorry. I beg the gentleman's pardon, but it does bring to light the great Patterson committee where we made a new committee to count the old committees.

Mr. LOTT. Mr. Speaker, I yield 4 minutes to the gentleman from California (Mr. LUNGREN).

Mr. LUNGREN. Mr. Speaker, as has already been mentioned, we have been in this session for, well, since January 5 and we have been only able to manage to get ourselves together here to take 11 substantive votes and 4 quorum votes. That means we have had 37 legislative days in which we could have done something about what we are being asked to do today. We have had 19 legislative days since the Accounts Subcommittee of the House Administration Committee approved the first seven resolutions which, of course, are packaged with all the resolutions today. We are 15 days past the time when the full committee passed out to us the first seven resolutions that we could have dealt with; but somehow we have not been able to find the time to do it here before today.

It seems passing strange at least to say that we have been too busy in committee and subcommittee. You do not have to listen to what we are saying here to know what we have not been doing. Just go down and talk to the Members as they are walking around the halls today and see what they are saying about our lack of organization. See what they are saying about the fact that we are really not doing the people's business here.

□ 1300

I think it is rather ironic that right now we are being told to adopt a gag rule—and make no mistake, it gags the minority; it does not give us an opportunity to do what we want to do—when at the same time the report that came out from the Committee on House Administration referring to the Committee on Rules' justification for their budget had this to say:

> The Committee on Rules should, in my opinion, operate not solely as a traffic cop but as the body that structures the conflicts, providing alternatives to the House, and ensuring that minority rights are protected. If the Committee on Rules is to perform this function efficiently and fairly, it is imperative that adequate resources be available.

I would say, based on their own measuring stick, the Committee on Rules has failed. They are not offering alternatives here; they are denying alternatives here. They are not protecting the rights of the minority here; they are denying the rights of the minority here. It is as bald as that, and we ought to recognize it as that.

Let us not fool ourselves. When we are denied the opportunity to take committee after committee to see what is good and what is bad, to see where we can cut out the deadwood, we are really being told the minority has no rights here. You accept the whole thing, or you accept nothing. It seems we could probably sum it up this way. It is as if the American taxpayers were like those people who had paid top dollar for ringside seats at a major heavyweight title bout, and here they are and what do they get? They get the champ right in the middle of the ring shadowboxing.

If the purpose of this exercise is to protect the majority leadership to make sure that they do not take any cuts, then, by golly, we are doing a good job of it. But if the purpose here is to protect the American people, the taxpayer, and to show leadership, we have failed. A little earlier, someone asked "Why is it important for us to talk about $40 million here?" The answer is short: Because we have to show leadership. How can we go to the executive branch and tell them they are supposed to cut 10 or 20 percent from food stamps when we cannot cut $1 from our own committees? How can we say to the average taxpayer in America who makes less today in purchasing power than he did in 1965 that: "Everything is all right, we will continue the way we have gone on here in the committees and subcommittees." Year after year we have gone far beyond inflation in terms of the people we hire; we have gone far beyond inflation in terms of the money we spend. And what is the result? We become musclebound. We cannot move in this place because we have so many committees and committee staffers. We trip over them as we go from committee to committee.

We find we have seven committees and subcommittees meeting at one time, so we have staff to protect ourselves, to allow us to vote by proxy to make sure we can vote in absentia.

The fact of the matter is if we want to get serious about reorganizing this place, we should take into consideration the recommendations of the committee of several years ago, the Bolling Commission, which came up with some excellent recommendations on how we ought to organize this place. But it was not gutted by this side; it was gutted by that side; and even the chairman recognizes that.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. BOLLING. Mr. Speaker, I yield myself 2 minutes.

I think it is fairly important that people understand what is true and what is not true. One of the things that is true is that if these matters were considered under the normal rules, there would be no division of time and each hour on each funding resolution would be completely under the control of the Member bringing the matter to the floor,

The second point that has to do with accuracy is the last statement of the distinguished gentleman who spoke just before me. When the recommendations of that Select Committee on Committees back in 1974 were defeated, the margin of defeat in fact from Republicans, but there was a very substantial number of Democrats who voted against it, too. The fact of the matter is that it was not possible to get a bipartisan majority to pass it.

Mr. LUNGREN. Will the gentleman yield on that point?

Mr. BOLLING. Of course.

Mr. LUNGREN. Is it not true that those Commission reports were required to go though the Democratic Caucus and the Republican Conference, and they were changed in a

major portion in the Democratic Caucus?

Mr. BOLLING. That is not correct except in terms of its result. Actually what happened was that the recommendations of the so-called Bolling committee came to the floor and were defeated by a substitute that came from the Democratic Caucus. That is what ultimately happened. That substitute was supported by a substantial number of Republicans and a substantial number of Democrats, and the final version which bore the number of the Bolling resolution was then passed by a substantial majority.

But what I have said at the beginnig of my statement and what I just said conform to each other, and the gentleman is in error in his notion that what came to the floor was something modified by the Democratic Caucus.

Mr. LUNGREN. Will the gentleman yield?

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. BOLLING. I yield myself another minute.

I yield to the gentleman.

Mr. LUNGREN. I thank the gentleman for yielding.

The quotation that I saw from the gentleman from Missouri in the book of the former Minority Leader Mr. RHODES as to the impact of the Bolling commission report and the fact that it failed in the Democratic Caucus then somehow must be in error.

Mr. BOLLING. It could very well be. That would not be the only error that ever occurred in any book.

Mr. LOTT. Mr. Speaker, I yield 4 minutes to the gentleman from California (Mr. DANNEMEYER).

Mr. DANNEMEYER. Mr. Speaker, I have been listening to this debate, and I do not really think that we are generating the sympathy and understanding that the Democrat majority really needs and deserves in handling this matter. Let us put ourselves in their shoes for a moment and analyze the problem that they have in presenting this issue to the House and getting it passed.

They reflect on the fact that last year we had 22 rollcalls on committee funding resolutions. Roughly 75 percent of the Republicans in the House at that time were voting against them; about 25 percent of the Democrats were voting against them. We actually beat one on the floor. The vote was later reversed. We came very close to beating another one, the House Committee on Post Office and Civil Service, and the Members may recall that we had it beaten at one point, but then strangely enough in the well of the House votes were changed at the last moment and it passed. Every intendment would indicate that if they brought them individually this year for consideration by the House, there were some that were going to go down. In other words, if we voted on each of the spending resolutions by themselves standing on the merits, some of them would go down. What do you do? You plan, and then you work up the plan. The plan is a good one from the Democratic standpoint. The plan says we cannot stand to have individual votes on each of these spending resolutions, so we are going to have one vote on all of them.

What does that do for the Democrat majority? That will permit them to maximize their political leverage with their Members to keep them in line so as to get the matter approved. They are going to lose if they take them up individually. If they take them up as a unit, they hope they are going to be able to prevail. That is why this change is proposed in historical procedure of having all of these spending resolutions in one. Then we are going to have, I am told, an amendment offered which will say, we are going to cut 10 percent from what was authorized last year. Now that is interesting.

The way the game will be played, the more things change, the more they are the same, because the figures show that last year the committees of the House spent $30,287,293. That is exclusive of the HIS Committee. Remember that: exclusive of the HIS Committee.

The gentleman from Texas, the distinguished majority leader (Mr. WRIGHT), I understand is going to offer an amendment, if this rule passes, which will cut 10 percent from what was authorized last year, so that will authorize $33.8 million, which is roughly $3.5 million more than what was spent last year. In other words, they will live the fiction that we are cutting 10 percent but in fact spending will go up by $3.5 million, or roughly 10 percent.

In other words, rather than a 10-percent cut, the taxpayers of this country are going to sustain a 10-percent increase. How are they doing it? The authorization for HIS is being decreased by $2 million from what was spent last year. And what do you know. It is almost predictable that before this year is out this House is going to consider, under the rules, a resolutuon to ask for a supplemental appropriation for HIS. In other words, HIS is to be the patsy right now, and then later on we will come in with a supplemental appropriation to increase what we have taken away from them.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. LOTT. I yield to the gentleman 30 seconds to finish his statement.

Mr. DANNEMEYER. I thank the gentleman for yielding.

I think the responsible thing for us to do in this process today is to defeat this ridiculous rule. It is a gag rule. It changes a vote on the merits to a partisan vote. I do not think that is proper procedure. It lays the foundation for the attempted deceptive action that we are going to see by turning an alleged 10-percent cut into an authorization for a 10-percent increase. I do not want any part of it.

Mr. LOTT. Mr. Speaker, in my final moments here I would like to commend the gentleman from Minnesota (Mr. FRENZEL) and the gentleman from California (Mr. BADHAM) for their efforts in trying to begin to get some of these committees' spending resolutions under control. I think they have already saved the American people several million dollars and should be commended for that.

This is an unprecedented rule. I think it is a mistake, and I would still urge that the Members oppose the rule.

Mr. BOLLING. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

Mr. ANNUNZIO. Mr. Speaker, by direction of the Committee on House Administration, I call up a privileged resolution (H. Res. 115) providing for the expenses of investigations and studies to be conducted by the standing and select committees of the House, and ask for its immediate consideration.

The Clerk read the resolution as follows:

H. RES. 115

Resolved, That effective January 3, 1981, there shall be paid out of the contingent fund of the House in accordance with this primary expense resolution not to exceed the amount specified in section 2 for the expenses of investigations and studies to be conducted by each committee named in such section, including expenses—

(1) for the employment of investigators, attorneys, and clerical, stenographic, and other assistants;

(2) in the case of a committee named in section 3, for the procurement of services of individual consultants or organizations thereof pursuant to section 202(i) of the Legislative Reorganization Act of 1946 (2 U.S.C. 72a(i)); and

(3) in the case of a committee named in section 4, for specialized training, pursuant to section 202(j) of such Act (2 U.S.C. 72a(j)), of committee staff personnel performing professional and nonclerical functions.

Payments under this resolution shall be made on vouchers authorized by the committee involved, signed by the chairman of such committee, and approved by the Committee on House Administration.

SEC. 2. The committees and amounts referred to in the first section are: Select Committee on Aging, $1,233,000; Committee on Agriculture, $1,294,187; Committee on Armed Services, $952,223; Committee on Banking, Finance and Urban Affairs, $2,457,631; Committee on the District of Columbia, $288,719; Committee on Education and Labor, $2,832.087; Committee on Energy and Commerce, $4,043,722; Committee on

Foreign Affairs, $1,888,609; Committee on Government Operations, $2,461,885; Committee on House Administration, $1,219,000; Committee on House Administration—House Information Systems, $9,000,000; Permanent Select Committee on Intelligence, $938,700; Committee on Interior and Insular Affairs, $1,295,293; Committee on the Judiciary, $1,417,519; Committee on Merchant Marine and Fisheries, $1,700,414; Select Committee on Narcotics Abuse and Control, $551,173; Committee on Post Office and Civil Service, $978,530; Committee on Public Works and Transportation, $1,870,000; Committee on Rules, $530,738; Committee on Science and Technology, $1,896,800; Committee on Small Business, $776,000; Committee on Standards of Official Conduct, $450,000; Committee on Veterans' Affairs, $359,550; and Committee on Ways and Means, $2,450,782.

SEC. 3. (a) Of the amounts provided for in section 2, each committee named in subsection (b) may use not to exceed the amount specified in such subsection for consultant services under paragraph (2) of the first section, but this limitation shall not prevent the use of such amount for any other authorized purpose.

(b) The committees and amounts referred to in subsection (a) are: Committee on Agriculture $100,000; Committee on Armed Services, $36,000; Committee on Banking, Finance and Urban Affairs, $5,000; Committee on the District of Columbia, $10,000; Committee on Education and Labor, $55,200; Committee on Energy and Commerce, $28,000; Committee on Foreign Affairs, $35,000; Committee on Government Operations, $45,000; Committee on House Administration, $100,000; Committee on House Administration—House Information Systems, $304,000; Committee on Interior and Insular Affairs, $33,600; Committee on the Judiciary, $90,000; Committee on Merchant Marine and Fisheries, $16,000; Committee on Post Office and Civil Service, $100,000; Committee on Public Works and Transportation, $30,000; Committee on Rules, $12,000; Committee on Science and Technology, $15,000; Committee on Standards of Official Conduct, $350,000; Committee on Veterans' Affairs, $25,000; and Committee on Ways and Means, $50,000.

SEC. 4. (a) Of the amounts provided for in section 2, each committee named in subsection (b) may use not to exceed the amount specified in such subsection for specialized training under paragraph (3) of the first section, but this limitation shall not prevent the use of such amount for any other authorized purpose.

(b) The committees and amounts referred to in subsection (a) are: Committee on Armed Services, $15,000; Committee on Education and Labor, $3,000; Committee on Energy and Commerce, $2,850; Committee on Government Operations, $2,000; Committee on House Administration, $5,000; Committee on House Administration—House Information Systems, $95,000; Committee on the Judiciary, $3,000; Committee on Public Works and Transportation, $8,000; Committee on Rules, $2,000; Committee on Science and Technology, $7,600; Committee on Small Business, $2,000; and Committee on Standards of Official Conduct, $4,000.

SEC. 5. No part of the amount provided for the Committee on Post Office and Civil Service in section 2 may be used to establish or operate a redistricting data center or any similar unit.

SEC. 6. The Committee on House Administration is authorized—

(1) to incur such expenses as the committee considers advisable to enable House Information Systems to provide for the development, operation, maintenance, and improvement of ongoing computer and information services for the House, to provide for the investigation of additional computer and information services for the House, and to furnish computer and information systems support directly to Members, committees, and administrative offices of the House;

(2) to expend funds received in reimbursement for computer services in accordance with the policies of the committee; and

(3) to expend funds for the provision of employment placement services, professional development programs, office and personnel management consultation services, and periodic publication of handbooks, guides, bulletins, and other matters as may be necessary for the House.

SEC. 7. No part of the funds authorized by this resolution for any committee shall be available for expenditure in connection with the investigation or study of any subject which is being investigated or studied for the same purpose by any other committee of the House, and the chairman of each committee shall furnish the Committee on House Administration information with respect to any investigation or study intended to be financed from such funds.

SEC. 8. The authorization granted by this resolution shall expire immediately prior to noon on January 3, 1982.

SEC. 9. Funds authorized by this resolution shall be expended pursuant to regulations established by the Committee on House Administration in accordance with existing law.

Mr. ANNUNZIO (during the reading). Mr. Speaker, I ask unanimous consent that the resolution be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

This was no objection.

The SPEAKER pro tempore. Pursuant to House Resolution 116, the gentleman from Illinois (Mr. ANNUNZIO) will be recognized for 2 hours, and the gentleman from California (Mr. BADHAM) will be recognized for 2 hours.

The Chair now recognizes the gentleman from Illinois (Mr. ANNUNZIO).

Mr. ANNUNZIO. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, as we debate the 1981 funding resolution for committees of the House of Representatives, let us fully understand what we are discussing and its importance from the viewpoint of the people we are elected to serve.

Your Subcommittee on Accounts is held responsible for the fiscal health of the committees of the House. Their sustenance is developed through a committee's funding resolution known as a primary expense resolution. The studies and investigative staff of a committee is sometimes called the temporary staff because it would not exist without House passage of a resolution funding it from our contingency fund. Investigative staffs usually serve subcommittees. In fact, they are the working blood of our subcommittees. Furthermore, a special or select committee can have only investigative staff.

Under House Resolution 9, 20 standing committees, 3 select committees, 1 task force, and the House computer facilities are authorized to spend $47,090,286 for studies, investigations, and oversight during 1981.

As we debate this resolution, we should have in mind the relative importance of committees to the governing of this Nation. We must also weigh the dollar value of our committees as compared to the total budget weight of the Federal Government.

President Reagan's budget for the Federal Government during fiscal year 1981 authorizes the spending of $710.2 billion.

I believe the people of America place prime responsibility upon our committees to investigate and root out fraud, waste, abuse, mismanagement, misfeasance, and malfeasance whenever it occurs in the administration of our Federal programs.

There are two roles dominating the work of our committees. The first is legislative. The second is investigative. Critics of Congress today usually comment that there is too much of the first and too little of the second. If I know my people, and 17 years in Congress should show that I do, they now want less law and more oversight of Federal activities by this body.

Oversight or investigative inquiries by committees is what this funding resolution is all about. Seldom can we have such a hearing without spending money. If there is the possibility of criminal liability, loss of work or jobs, or possible damage to reputation, we have to subpena witnesses. Months of staff time are spent in preparation. We have to check every fact; we have to corroborate every witness; we have to examine every document; we have to leave no stone unturned; we have to make long-distance calls; we have to travel to the sites where trouble occurs; we have to pay travel and per diem for witnesses, Members, and staff. The fact of the matter is that we do not have enough staff or funding to meet all the demands on committees to conduct investigative inquiries and to keep up with our obligation for oversight of all Federal activities.

Our investigations and the holding of hearings have to be done in a very sensitive and a very careful way. I do not think anyone who has sat through such a hearing could say that we have overspent the money, particularly in light of the billions of dollars saved through our committees' investigations, studies, and recommendations.

Oversight is also a function of the Subcommittee on Accounts of the Committee on House Administration. The internal budget of the House is our jurisdiction. Where we find that the taxpayers' dollars are not spent wisely, we will slash that budget.

During our hearings and markup, we did just that. The total request by committees for studies and investigations in 1981 was $47,394,476. These requests totaled only six-tenths of 1 percent more than is currently authorized by House Resolution 9, the continuing resolution which expires March 31. The difference between the amounts sought and the amounts we are recommending is $4,507,914 or a 9.5-percent cut from current authorization.

When a committee proves a case for an increased workload, additional funds should be forthcoming. When the workload is approximately the same as the previous year, the committee should receive approximately the same funding as last year in today's dollars. When the workload decreases, so should the funding.

In making those judgments this year, your Subcommittee on Accounts bent toward the rule of frugality. I feel we were most conservative. Some may differ with me but I say we were most prudent.

Early during our hearings I made the following statement:

> The Subcommittee on Accounts has two major responsibilities—
>
> To insure that committees of the House have adequate funds to accomplish their legislative and oversight responsibilities; and
>
> To make certain that the contingent funds of the House are used wisely and economically.

Mr. Speaker, the subcommittee and its parent Committee on House Administration accomplished those two missions in bringing this resolution to you today. Any further reduction in the financial capability of or committees for 1981 will impair their performance to no good end for the people who elected us to serve and protect them.

Mr. Speaker, as a matter of fact, on this side of Capitol Hill, we have been cutting people from committee staffs each year since 1977. The Democratic majority on the other side of the Hill decided last year to follow the lead of the House. The much-heralded reduction this year in Senate committee funds is the result of an action, initiated by the Democratic majority last year, to reduce all Senate operations by an aggregate cut of 10 percent.

The new Republican majority in the other body had no choice when they took up the reins of Senate leadership. They must cut some $20 million from their budget. They chose to start with committee funds but so far have achieved cuts amounting to less than $500,000, leaving them with a cutting goal 40 times larger.

Which brings me to the next charge against this House, Mr. Speaker. Some of our colleagues have been telling the media and this body that the Senate is cutting committee budgets while the House is increasing them. Had all committees presented budgets justifying increased workloads of value to the American people, those charges might have been sustained. The truth is we are cutting deeply into the budgets of House committees by passage of this resolution. Last year's authorization total for funding resolutions was $44,005,970. Convert that amount to today's dollar by the double-digit inflation rate of 12.4 percent and the total would be $49,462,710.

House committees were warned prior to our hearings this year that they must be fiscally prudent in a year of austerity. Most loyally responded with budget requests that reflected long and thoughtful hours of paring and planning.

The total request from all committees and the House Information System was $47,394,476. This amount is $2,068,234 less than the rate called for to maintain last year's rate of activity at today's dollars. It is only $304,190 more than the $47,090,286 total annualized authorization in House Resolution 9, which is the continuing resolution setting the current spending rate for committees passed by this body on January 5, 1981.

The truth is as follows: The resolution we are debating today provides 9.5 percent less than the amounts requested; 9.4 percent less than the last year's authorization; and 13.2 percent less than last year's budgets converted to today's dollars.

In other words, our committees will have to be 13.2 percent more efficient in order to produce the same amount of work they did last year, and at the same time, meet the goals established by the new administration which will require more work by those same committees than they did last year.

The facts of the matter are these:

The estimated number of House committee staff in 1981 will be the smallest since 1976 and 6.2 percent below the average number for 1980.

The other body will make more money and staff available to its committees and computer facilities than will the House, despite the fact that there are 5 fewer Senate committees and only 100 Senators compared to 435 House Members. The House has 25 committees including Appropriations and Budget which are not covered by this resolution, whereas the other body has only 20. Thus, in the House there is $2.6 million available on a per committee basis compared to $3.2 million, or 23 percent more, per committee in the Senate.

The average salary for committee staff in the other body is approximately $32,000. In House committees the average salary is approximately $24,000. One House committee's average salary is approximately $15,000. Another House committee's average is approximately $17,000. No Senate committee is that frugal.

On top of the $41.7 million made available directly to Senate committees for staff and expenses during 1981, each Senator is automatically provided $183,000 for employment of associate committee staff in addition to his clerk-hire allotment. Multiplied by 100 Senators, this is an additional $18.3 million for committee staff. There is no House counterpart to the associate committee clerk-hire funds.

The much publicized $41.7 million figure for 1981 committee funding resolutions in the other body does not include the amount available for the Senate Ethics Committee which expended $800,000 in 1980. The true total should be approximately $42,500,000. Neither did that figure include $17 million for the other body's computer facility, which in the House resolution is budgeted at $9 million. To be truly comparable, that $9 million should be subtracted from the $42,886,562, which this resolution would authorize, leaving a balance for comparison of $33,886,562. If we add to that amount the $29.2 million which is the 1981 appropriation for statutory staff, the final total for comparison would be $63,086,562. Divide this sum by 435 Members and you will end up with a figure of $145,027 per House Member for committee work. By comparison divide the Senate budget of $42,500,000 by 100 Senators and you will arrive at a figure of $425,000 per Senator for committee work. In addition, each Senator has $183,000 for associate committee staff. We should trade our per Member share of $145,000 for the $183,000 associate committee staff allotment. We would be better off while each Senator would retain his edge of a $425,000 share in the amount made directly available for committee activity.

While our two bodies will provide almost identical amounts of money during 1981 for the productivity of our committees, the Senate committee budget will provide more committee staff per Senator. It is estimated that House committees will employ 1,661 people in 1981 while the Senate budget allows for 1,134 positions on committee payrolls, plus an estimated 600 associate committee staff positions for a total committee staff of 1,734. With adoption of both budgets there will be 17.3 committee staff employees per Senator and 3.8 committee staff per House Member.

It is not my intention to disparage the other body in making these com-

parisons. It is making a heroic effort to trim what fat it can find in the overall operations of the Senate. However, I do not believe this House should be in any race just to prove it can spend less money. Our decision should be made instead on which horse in the Federal stable will produce the best investment per dollar expended by the taxpayer. My money is on the horse called House committees.

Our committees will be instructed to stay within a budget of approximately $33 million—not counting funding for computer facilities—to study, investigate, and make decisions on a Federal budget of more than $710 billion. I believe in their ability to do that although it may be tough down the stretch.

When I was elected chairman of the Accounts Subcommittee at the beginning of this Congress, I did not take the job for the purpose of stripping the House of Representatives of its ability to do its job. This is the House of the people and the people are calling upon their elected Representatives to eliminate unnecessary Government spending. How can we do that job if there are not enough funds available to conduct the work of the Congress?

Mr. Speaker, last week in this Chamber's well I stood and said there has been so much smoke blown into the ears of the American public by some Members of this House that it is a wonder that every smoke detector on Capitol Hill has not been set off. Those who like to blow smoke will continue their unwarranted attacks on House committees.

I note that in recent weeks many Members on the opposite side of the aisle delivered fiscal restraint speeches which make it appear that the Accounts Subcommittee was engaged in a giveaway program rivaled only by "Tic-Tac-Dough," "The Price Is Right," and the "$50,000 Pyramid."

I do not stand in the well to pat myself on the back, but I do want to pat the subcommittee on the back, both the minority and the majority members. Never before has there been such keen scrutiny of committee budgets and intensive questioning of witnesses. The Subcommittee on Accounts held 8 days of hearings during which it heard 25 budget requests and took testimony from more than 70 witnesses. No one who asked to appear was denied an opportunity. There was a spirited discussion of every budget request.

As I have already reported, the 25 budget requests submitted to the subcommittee for 1981 totaled $47,394,476. The subcommittee reviewed each budget carefully, and by cutting out what it considered to be unnecessary jobs and expenditures, reduced the overall request to $42,886,562, a cut of more than $4.5 million from the budget requests. This was a cut of 9.5 percent from the amount requested and 9.4 percent less than the currently approved spending rate.

We arrived at the budget cuts not by imposing an arbitrary 10-percent figure, but rather by looking at each budget individually and judging each committee on its past performance and projected workload. If we had cut on the basis of an arbitrary percentage, we would have hurt some committees which have a legitimate need for extra funds, while at the same time we might have given extra money to committees unable to justify the extra funds.

The Subcommittee on Accounts and the Committee on House Administration has done a thorough and conscientious job.

This year, for the first time, the funding resolution includes payment for a charge on committees called an equipment user fee. Last year's funding resolutions included a new user fee for computer services and systems. Together, these two new charges on committees add an additional burden on House committees, not charged to Senate committees, that total $1,217,208.

If these two new user fee requirements were absorbed in the aggregate allowance for expenses of the House, as they were previously, the amount in this recommended resolution for committee oversight studies and investigations would be $32,669,354.

With all the push for increased military spending, compare this $33 million for committee investigations and studies with the $16 to $32 million cost of a single jet fighter, or to the proposed B–1 bomber that will cost approximately $50 million apiece. And if we bring a battleship out of mothballs, such an action will cost several hundred million dollars for processing each ship. And consider that a single Trident submarine costs $1.2 billion and a *Nimitz*-class nuclear aircraft carrier $2.3 billion. Is it unrealistic then for this body to consider such costs with a budget of only $33 million?

As your chairman of the Accounts Subcommittee, I sincerely believe that the amounts reported out of the Committee on House Administration for the investigatory inquiries of this House are both fair and just. I believe the subcommittee and the full committee did their job and did it properly and well.

We are being asked to approve a budget for House committees of $33 million which will be used to make decisions on a national budget of more than $710 billion. I urge my colleagues to support the resolution.

□ 1330

Mr. BADHAM. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, in my first term now as the ranking member of this subcommittee, I would like to take the opportunity to commend the chairman of our full committee, the gentleman from California (Mr. HAWKINS) and the chairman of our subcommittee, who, with dedicated and obvious zeal has pursued this most difficult task. I certainly do commend my good friend and colleague, the gentleman from Illinois (Mr. ANNUNZIO), for making a sincere effort to cut. But we have not cut. We have not cut the spending. We have not received the message from the American people that they want a smaller, leaner, tougher, more efficient Congress.

We are expanding and expanding and expanding and we are doing business as usual.

Now I could go along with a lot of this, if we were really producing more or better legislation, but in the words of then candidate and now our President of the United States, Ronald Reagan who said in the final debate with the now no longer President, Mr. Carter:

> Next Tuesday is election day. You all will go to the polls and will stand there in the polling place and make a decision. I think when you make the decision it might be well if you ask yourselves if you are better off than you were four years ago.

I think we should ask these questions of the Congress. Do we have a better Congress than we had 4 years ago or 10 years ago? Do we have a Congress that deserves staffs that have grown by leaps and bounds in unprecedented fashion over the past decade? You can ask yourself, are you better off than you were 4 years ago? Is it easier for you to go buy things in the stores than it was 4 years ago? Is legislation better from Congress than it was 4 years ago?

Absolutely not. The single precedential resolution that we have before us today is single because everybody on the other side wanted to lump it together so nobody would study each committee undividually. The moneys that we are being asked today to authorize for committee staff expenditures do not even include the statutory staffs amounting to 30 souls per committee.

In addition to that, we are talking about investigative staffs. Look at some of the comparisons with me, if you will, from just 10 short years ago to today, as far as staffs are concerned, asking ourselves if we are getting better legislation and more of it.

The Committee on Energy and Commerce, the staff of 28 went to a staff of 135. And I do not think that anybody would be willing to stand here and say we do not have a worsening rather than a bettering energy situation in this country.

The Committee on Foreign Affairs, as America's prestige declines around the world, the staff went from zero to 55.

The Committee on House Administration went from zero to 48. But I commend again the chairman of the full committee because he has made honest, sincere, and dedicated efforts and has had results in asking for sizable cuts in that budget.

The Committee on the Judiciary more than doubled from 22 to 50.

The Committee on Merchant Marine moved from 11 to 52.

The Committee on Rules from zero staff, investigative, to 52. And what are they investigating? How to make closed rules, I imagine.

I hope that in the future, as the distinguished chairman, the gentleman from Illinois (Mr. ANNUNZIO) has promised and we have promised to use our meager staff resources to support that effort, that we are going to examine the committees and whether all the people are actually there in their offices and actually working so next year when we come to the 2d session of the 97th Congress we will be able to actually determine whether the committees are really using their people and using them for the proper things assigned.

For the gentleman from Illinois (Mr. ANNUNZIO), the gentleman from California (Mr. HAWKINS), the gentleman from Minnesota (Mr. FRENZEL), and myself, it has not been without some fear and trepidation that we have tried to cut some of the budget figures and some of the staff numbers. But I feel compelled to relate one story about the pressure.

In my district in California, there exists probably the greatest architectural abomination of a public building that anyone in this room could possibly imagine. It is a post office. The building is structurally unsound. It is an architectural abomination and I asked the Post Office Committee, as one Member of Congress to another Member of Congress, if they would please send some staff out there to look at that building so that they might talk to the post office people and see what could be done about this disaster, both architecturally and a physically potential disaster. They scheduled a group to go out and look at my post office out there. But when the committee budget resolutions came out, the Post Office Committee canceled that trip because they said, "We do not have enough money to travel around the country to check on things that we are supposed to do in the Post Office Committee."

So I checked and we found that they had requested $105,000 for domestic travel this year and only spent $53,000 last year. But they did not have enough time and enough staff resources to check a post office in this country. I think that is really not terribly good.

But that still brings us back to the basic issue and I listened with eager anticipation hoping what we might hear from the gentleman from Illinois (Mr. ANNUNZIO), our distinguished colleague, the chairman of the subcommittee, about the Senate. Maybe we would hear something new. But again I stress to my colleagues, we are not the Senate. It is not our bailiwick. It is not our prerogative to criticize, examine, or discuss even what they do on the other side. We are the House of Representatives and if we cannot cut out staffs and we cannot cut our budgets, it really matters not what the Senate does because the responsibility is ours.

I commend the gentleman from Texas (Mr. WRIGHT) for offering the palliative amendment that will be a cosmetic cut in the budget authorizations, knowing full well that it will pass and it will be heralded as a desire to cut the budget. But again, it is not a cut, it is an increase in the budgets, an increase in spending, an increase in staffing of the committees of this Congress.

That is wrong, it is improper and we know it. So I hope that when we come to the motion of the gentleman from Minnesota (Mr. FRENZEL) to really take a look at it and to make a 10-percent reduction from the amount spent last year in most cases—if not all—but in most cases, that that will receive the most serious consideration so we might tell the people of this country that we really do get the message and we really do want to cut the fat out of the Congress so we can go ahead and cut the fat out of the Government.

□ 1345

Mr. PEYSER. Mr. Speaker, will the gentleman yield?

Mr. BADHAM. I will be delighted to yield.

Mr. PEYSER. Mr. Speaker, I thank my friend from California for yielding. The question I have is, when you move to recommit to cut 10 percent from the expenditure that was made—is that correct, that is the way it is going to read, the recommittal?

Mr. BADHAM. Basically it will be a 10-percent cut.

Mr. PEYSER. From expenditures?

Mr. BADHAM. From expenditures last year, correct.

Mr. PEYSER. But are you not, basically, when you are doing that, are you not taking the good judgment away from these committees that now only spend what they have to spend of their budgets to operate efficiently? It seems to me that the minute you do what you are suggesting you will be saying to every committee, "You had better spend every last dollar you have got whether you need it or not."

You and I know how that happens, "And then next year we are going to base your budget on what you spend," so you are practically providing an incentive to spend money that may not be needed.

I wonder how the gentleman would answer that.

Mr. BADHAM. I would answer that very simply, I think. We in California used to refer to that as university budgeting. Every year the University of California comes in with its budget request from the State of California, and they estimate how much they are going to be cut back, and pad that much on top. We refer to that as university budgeting.

Any committee chairman of this House, I would say to the gentleman, is amply smart enough to figure that out. The process goes like this, if the gentleman will spare me a few minutes of my time: The committee budgets come in, they look as though they want to be doing more work and expanding, so they ask for more money and more staff. The House Administration Committee, to make itself look good, gives them a modest cut. Then, the committee coming back at the end of the year, to make itself look even better, turns back money.

What happens? Everybody looks better, but the budgets and staffs grow and grow and grow. We have said in the House Administration Committee year after year after year: "If you really cannot live with this, and you want to come back and ask for more money, we will be here until December or October or November or July, we will be here if you want to come back and ask for more and can justify it; we will give you more money."

Mr. PEYSER. If the gentleman will yield further, I appreciate that remark.

Mr. BADHAM. Be delighted to.

Mr. PEYSER. I, as you know, served on the Accounts Subcommittee until this year, and I am very familiar with the process, we in the Congress discussed last year the motion and the legislation that would say to agencies, Federal agencies, that, "You could not spend, you know, in excess over the last quarter of the year," which is typically what many Federal agencies were doing just to spend all the money, and I think that you end up promoting that kind of thing if you base a cut on the efficiency of the committee operations last year. I think you ought to give the committees that opportunity to turn back money because I think honestly they tried to do it.

Mr. BADHAM. We have never refused to take back money from a committee, never, and I do not think we would do that.

Mr. LEE. Mr. Speaker, will the gentleman yield?

Mr. BADHAM. I will be happy to yield to the gentleman from New York.

Mr. LEE. Mr. Speaker, I would just like to elaborate on the remarks the gentleman made to our colleague from New York. If we look at the record for the last 6 or 7 years of the authorized levels of the committees vis-a-vis the actual expenditures, we will see a gap of about 15 to 28 percent of unused money, so I think it is an incorrect assumption to make that because you ask for a reduction against the expenditure levels of the previous year, we are going to do something irresponsible.

Mr. BADHAM. I thank the gentleman for his contribution. New York is a many-faceted State.

The SPEAKER pro tempore. The gentleman from California (Mr. BADHAM) has consumed 12 minutes.

Mr. ANNUNZIO. Mr. Speaker, I yield 3 minutes to the distinguished chairman of the full committee, the gentleman from California (Mr. HAWKINS), who has worked so long and hard and diligently in helping to bring this legislation to the floor.

Mr. HAWKINS. Mr. Speaker, I rise in support of House Resolution 115.

Mr. Speaker, House Resolution 115 represents an extraordinary effort by the Committee on House Administration and the Subcommittee on Accounts under the able leadership of my friend and colleague, the gentleman from Illinois (Mr. ANNUNZIO), to fix the spending of the committees of this House.

Parenthetically, may I say that this sharp difference of views on this resolution will be the only major conflict on partisan lines this session. I commend the Members of the other party for their cooperation in bringing to the committee sound business practices.

Mr. Speaker, I would like to point out to the Representatives of this body that, unlike the Senate, the House has been reducing committees' budgets over the last 2 years. During the 96th Congress, the Committee on House Administration, through its Subcommittee Accounts, slashed committee budget requests by over $8 million or nearly 9 percent.

Mr. Speaker, this year the Accounts Subcommittee is taking an historic step and is recommending for the first time that committee budgets be reduced by $1,119,408 or 2.6 percent less than was actually budgeted for in calendar year 1980. If one takes into account the rate of inflation over the last year, this would represent a real cut of over 13 percent of the committee's spending power from last year.

Mr. Speaker, as the new chairman of the Committee on House Administration, I am very proud of this committee's effort in achieving fiscal austerity. In January, the Committee on House Administration cut its own budget 19.4 percent from what the committee expended in 1980 and 31 percent from what was authorized in 1980.

Now, with the recommendations before you today, I think the Committee on House Administration once again has demonstrated fiscal responsibility with respect to the other committees of the House by giving them only the necessary funds to carry out their legislative and oversight duties.

I urge my colleagues to support the committee's recommendations.

Mr. BADHAM. Mr. Speaker, at this time I yield 5 minutes to the gentleman from Minnesota (Mr. FRENZEL).

Mr. FRENZEL. Mr. Speaker, there is a growing recognition that committee budgets are out of control. The last decade witnessed a growth in budgets of unparalleled proportions. From 1970 to 1980, budgets for the standing committees of the House climbed from $6.3 million to $30.7 million. Even select committees, which display an erratic and discontinuous growth pattern, ended the decade with budgets totaling $3.4 million—which is $2.2 million higher than 10 years before. In all, committee budgets increased by more than 300 percent. Although this phenomenal growth has moderated somewhat, the profligate practices of the past—and the continued acceptance of excessively high budgets—have seriously weakened the institutional authority of our committee system.

Until recently, committee budgets have generally been accorded little more than a perfunctory review—their consideration has generally been viewed as a noncontroversial housekeeping matter. But this year is different. Prompted by public demands for reductions in Government spending, the House has begun a careful and intense review of the costs of its internal operations.

The minority members of House Administration—aware of and responsive to the public desire for more efficient Government—and concerned by the seemingly uncontrollable spiral of committee costs—established a goal of reducing committee budgets overall to a level 10 percent below expenditures incurred in 1980.

We anticipated, in light of last November's mandate, that the committee budgets would demonstrate a serious attempt at fiscal restraint. I must admit that we were stunned at the magnitude of the budget requests submitted to the Committee on House Administration. Committee budget requests topped $37.8 million, a spurt of $7.6 million—which represents an incredible 25-percent increase over last year's expenditures. In addition, a budget request was received from House Information Systems for $9.5 million. Although the Subcommittee on Accounts shaved $4 million from these budgets—and one-half million from HIS—deeper cuts can and should be made.

The minority members of House Administration offered amendments to reduce all but three of the funding resolutions considered. Regrettably these amendments were rejected on party line votes. If they had been adopted, committee budgets would have been reduced by $6.5 million from the total amount recommeded by House Administration—$33.8 million. Further, HIS would have been reduced by more than $1 million.

While House committee budgets pleaded for more funds, we observed the other body acted with prudence and dispatch to reduce the costs of its committee operations. Although the other body can serve as a beneficial model, neither the funding process nor the requirements of the committee structure are identical to that of the House. Strict comparisons between the two Chambers often ignore distinct dissimilarities in the funding process. The Senate has eliminated the distinction between statutory and investigative staff—all staff costs are included in their funding resolutions; the House, which retains the distinction between statutory and investigative includes only investigative staff costs in its resolutions.

In the Senate, administrative expenses such as contributions to civil service retirement fund and health benefit programs are included in the funding resolutions; not so in the House. In the Senate all stationery costs are included in the funding resolution; in the House, virtually all of such costs are drawn, not from the funding resolutions, but directly from the contingent fund. In the Senate all committees—except the Select Committee on Ethics—must file funding resolutions—in the House, two big spending committees—Budget and Appropriations—are exempt from this funding process. The other body sought a 10-percent reduction from last year's authorization—a goal achieved and approved on March 3 in floor action. In the House we have sought a more stringent reduction—10 percent from last year's expenditures. In large measure, this reflects the fact that a substantial portion of costs—particularly those for statutory staff—for which $27 million has been appropriated so far this fiscal year—are not subject to review in the funding process. With such a sizable share unaccountable, more severe reductions are necessary in the budgets presented to this House.

One of the more controversial episodes during the budget hearing was the request by the Committee on Post Office and Civil Service for a redistricting data center to assist Member concerning reapportionment issues;

$200,000 was allocated for this initiative—plus another $116,000 for staff salaries. As redistricting is a State function, not a congressional one—the value of this center appeared dubious; its purpose, illegal.

Although amendments to prohibit the creation or operation of such a center were initially rejected, the committee reconsidered its action and deleted $200,000 for the center—although leaving in an unnecessary $116,000 in staff salaries—and added language to the resolution which prohibits any such redistricting unit. Although the Committee on House Administration generally shuns such specific line item exclusions—in this case, however, it had no alternative.

During the consideration of the various budget proposals, we were amazed by the disparity in investigative staff ratios between majority and minority. Although a one-third standard applies to statutory staff, no such guidelines apply to staff hired pursuant to the funding resolution. Presently, of over 1,000 investigative staff, only 15 percent are assigned to the minority. At this point, I would like to include for the RECORD a table which indicates these ratios on a committee-by-committee basis:

COMMITTEE STAFFING: MAJORITY/MINORITY RATIOS [1]

Committee	Statutory [2]		Investigative		Total		Overall percentage	
	Majority	Minority	Majority	Minority	Majority	Minority	Majority	Minority
Aging (Select)	([3])	([3])	[4] 29	[4] 11	29	11	72.5	27.5

Budget: [24]								
Full committee	60	8	.....	.....	75	8	90.4	9.6
Associate staff	15	.....	.....	.....	.....	.....	.....	.....
Total [25]	532	187	848	156	1,380	343	80.1	19.9

[1] Unless otherwise indicated, the statistics on staff are derived from the budget requests submitted to House Administration by the various committees.

[2] According to the Rules of the House, each standing committee (except Budget and Appropriations) are allowed up to 30 "statutory" staff; the minority party can request up to ⅓ of the statutory allotment. As to investigative staff, the minority is not entitled to any specified fraction.

[3] The Select Committee on Aging is not authorized to employ "statutory" staff.

[4] According to the budget submitted by the Select Committee on Aging, the ratio in 1981 will be altered to 28–12, or 70 percent majority, 30 percent minority.

[5] The Committee on Appropriations, like the Committee on the Budget—refer to footnote 24, is permitted to establish its own staffing levels, and is not restricted by the limitation of 30 "statutory" slots. Further neither committee is obligated to introduce a funding resolution to be reviewed by House Administration, and then to be considered on the floor. The statistics on staff are as of February 1981: the investigative column includes only the 9 full-time committee staff; in addition there are 77 individuals detailed to the committee on a reimbursement basis who are not included in the ratio determination. The final total, however, includes the associate staff (30 majority; 16 minority).

[6] The Committee on Armed Services operates with a staff which is not differentiated on majority/minority lines.

[7] During hearings before the Subcommittee on Accounts of the Committee on House Administration, it was indicated that the 2 minority vacancies on the investigative staff would probably not be filled, although it was expected that 1 minority staff person would be added to the "statutory" side. If this occurs, the ratio would be 34 to 7, or 82.9 percent majority/17.1 percent minority.

[8] The budget submitted by the Committee on Education and Labor anticipates the addition of 2 new minority investigative positions, or a ratio of 76/17.

[9] Staff statistics are derived from the Report of the Clerk of the House, Sept. 30, 1980.

[10] The budget proposal submitted by the Committee on Foreign Affairs indicates the possibility of 3 new minority investigative positions, or a total of 6.

[11] The investigative staff totals include 7 vacancies: 6 majority and 1 minority.

[12] The staff statistics for the Committee on House Administration do not include the 198 staff members of the House Information Systems.

[13] Of these 47 investigative positions, 27 consists of personnel at the Office of Management Services. If these 27 were deleted from the computation, the new ratio would be 46 majority/5 minority, or 90 percent to 10 percent. The statistics are projected as of February 1981.

[14] The staff is not differentiated on majority/minority lines. The Permanent Select Committee on Intelligence is not authorized "statutory" personnel.

[15] The proposed budget anticipates 2 new majority investigative positions, or a ratio of 37 to 8—a total of 57 to 18.

[16] The statistics are as of February 1981; however, these are expected to diverge somewhat from the anticipated final 1981 staff ratios. Vacancies are not included in the totals.

[17] The Select Committee on Narcotics is not authorized "statutory" staff.

[18] As the Committee on Post Office and Civil Service contemplates a major staff reorganization, these investigative figures are tentative. On the regular investigative payroll would be 31 majority and 4 minority; on the Commission on Congressional Mailing Standards would be 5 majority and 1 minority.

[19] The budget proposal of the Committee on Rules indicates 3 new positions, although no distinction is made as to how the slots will be allocated between majority and minority.

[20] Statistics are as of February 1981.

[21] The Committee on Standards of Official Conduct has a nonpartisan staff.

[22] In addition to the 8 majority and 2 minority investigative spots filled, there are 4 vacancies (1 majority and 3 minority).

[23] Of the 13 minority staff, 9 are vacancies. Of the 64 majority investigative staff, 8 are vacancies.

[24] As the Committee on Appropriations—refer to footnotes, the Committee on the Budget is not required to file a funding resolution and may hire as many staff as it so determines. Statistics on staff are as of Sept. 30, 1980.

[25] The totals do not include the staff of the following committees: Armed Services, Intelligence, and Standards of Official Conduct. Neither do the totals include the staff at the House Information Systems.

Note.—The statistics on staff include vacancies, but do not include, unless indicated, requested new positions for 1981. New positions which would alter the ratios are so specified. As committees and subcommittees are still in the process of reorganizing, significant changes in staff may occur over the next few weeks, with a consequent change in staff ratios. Furthermore, revisions in committee budget proposals by the Committee on House Administration, or as a result of floor action, may likewise have a similar effect. It should be emphasized that a number of the staff designated as majority perform support services for the "committee as a whole". Additionally, in many cases, staff designated as majority (and minority) are directed to act on requests by members of the other party.

These ratios appear inequitable, particularly for a Chamber where the minority party constitutes 44 percent of the membership. Republican Members advanced amendments to the funding resolutions which would have provided the minority with one-third of the funds allocated for staff salaries—these, however, were all rejected. We will renew these efforts next year, when committee budgets once again are submitted for our review.

Understandably, in any review of committee budgets, the immediate preoccupation is with their projected cost in dollars and cents terms. But equally significant is that the prevailing fiscal irresponsibility of these budgets has serious institutional consequences.

During the past decade, we have witnessed the number of subcommittees jump from about 100 in 1970 to almost 160 at the end of last year. Each of these subcommittees strives to establish its own turf, thereby fragmenting the coherent consideration of legislative issues. In large part, the increases in committee budgets has been directed to the feeding of these subunits—in

fact, the budgets submitted by Banking and Education and Labor were little more than compilations of their subcommittee demands.

The increases in committee budgets reflect in large part, the increase in committee staff. In 1970, less than 400 staff members were hired by moneys provided in standing committee funding resolutions—by 1980 nearly 1,000 committee staff were hired pursuant to these resolutions. Then, of course, one must add in the staff of select committees and House Information Systems which are also provided by these resolutions—and that, in no way, takes into account the more than 700 individuals on the statutory payroll.

We all recognize that the knowledge and dedication of our staff enables the House to fulfill its policymaking role. Yet the staff growth in this last decade has been too fast, too large, and, too inefficiently distributed. Layer on layer of staff has been added; subcommittees have developed their own staff bureaucracies. We are at the threshold where staff is becoming surrogate members; I fear that if some restraint on staff growth is not imposed, our staff will soon be making policy for us. As the bulk of moneys in committee funding resolutions represents staff salaries, these resolutions offer a means to manage and limit staff expansion.

I have read several studies recently which compare our committee staff in terms of size and expense with the White House staff, the various Government agencies, or even the Architect's people. Such comparisons, I believe, offer little substantive merit. If we ever sought to duplicate in any way, the bureaucracies which encircle us, this House would no longer serve its constitutional functions as representatives of the people.

If we continue to approve bloated budgets, if we allow staff to run rampant—then it is the legislative process which ultimately suffers. We will have an opportunity today to begin to move toward greater accountability and fiscal control in our funding process. But this means we must support lower budget authorizations than the ones now incorporated in House Resolution 115. This means we must support lower budget authorizations than the ones included in the amendment of the gentleman from Texas. It requires that we reduce spending, not below some artificial authorization level, but in relation to actual expenditures. The House will have that opportunity when we consider the motion to recommit.

COMMITTEE STAFF PAY SCHEDULES ($30,000+)

Budget [4]													
Total [5]	155	197	352	154	109	263	168	59	227	477	365	842	

[1] Represents percentage of total Committee staff at $30,000 or above.
[2] Committee not authorized to have statutory staff.
[3] The investigative staff statistics do not include individuals detailed to the committee on a reimbursement basis.
[4] No statistics compiled as to the Committee on the Budget.
[5] Totals do not include the Committee on the Budget or the staff provided to the Subcommittee on Labor-Management Relations of the Committee on Education and Labor who are to be hired pursuant to a separate funding resolution.

Note.—As committees are still in the process of organizing, these figures should be regarded as tentative.

Mr. Speaker, I want to start my presentation with a commendation of the distinguished chairman of the subcommittee, the gentleman from Illinois (Mr. ANNUNZIO) and of my good friend from California (Mr. BADHAM) for the excellent, workmanlike, and effective way in which they conducted the subcommittee's operations in trying to arrive at fair committee budgets so that the Congress can do the work that is required of it with the most efficient use of the taxpayers' money. I think they worked long and hard and well.

I also want to compliment the distinguished subcommittee chairman for his promise that next year we are going to do a better job because our staff is going to zero in on all of the committee staffs. We are going to find out where the people are and what they are doing, what the subcommittees are doing, what bills they are passing, and the Republicans have pledged our full cooperation with the subcommittee chairman so that next year, when we come to you with these funding resolutions, we are going to have a lot better idea of where the fat in these budgets is and where the budgets cannot be cut.

Mr. Speaker, I also want to compliment the distinguished chairman of the House Administration Committee, the gentleman from California (Mr. HAWKINS). He, of all the committee chairmen, brought in a budget under what was spent last year. He was the only person who brought one in voluntarily. I would like to take credit for helping him do that, but I cannot. He did it by himself, he took a voluntary 20-percent cut under last year's spending, and maintained strict oversight over the committee's operations to see if we can even reduce more from that. I want to salute him for those efforts.

I would also like to echo a statement that he made. I hope that this is the last partisan dispute that the committee brings before this body. I think that the committee has worked well together. There are times when we must agree to disagree, but most of the time that is not true.

I might mention now, Mr. Speaker, that there are four committee budgets which are not in dispute. On these committees the House Administration

Committee, the Republican minority, and the Wright amendment and the Frenzel motion to recommit are in agreement. These are the Armed Services Committee, which has an increase because of an increased workload; the House Administration Committee, which voluntarily took a substantial decrease; the Committee on Standards of Official Conduct; and the Select Committee on Intelligence. Therefore, those committees need no part of this debate.

Mr. Speaker, there is not too much sense in discussing the House Administration Committee report because, in fact, the battleground is going to be the Wright amendment and the motion to recommit. None the less for the record it is well to note that despite good work by the subcommittee, it brought in committee budgets which were 12 percent more than were spent by the committee's last year.

That is a little more than the predicted inflation rate, and reflects the business-as-usual attitude in the Congress in which the Republican minority could not concur. Therefore we have brought in our separate recommendations which result in a real cut from last year's spending.

Next, we have the Wright amendment, the leadership amendment. That is not business as usual, but it is almost business as usual. I refer to it as the "harmless substitute" because instead of cutting, it allows a 6-percent increase over what was spent by all the House committees whose budgets are before us this year.

Now, the motion to recommit, which will be my motion, offered when the House has completed work on the bill, provides for a real 10-percent decrease in spending.

The Wright amendment is a real increase. Mine is a real decrease. If the motion to recommit is accepted, we will save $4.2 million of the taxpayers' money, which will not be saved by the Wright amendment.

Under the Wright amendment, the Education and Labor Committee gets an 11-percent boost; Public Works, 12 percent; Rules 16 percent; Government Operations, 11 percent; Veterans' Committee, about 14 percent.

The SPEAKER pro tempore. The time of the gentleman from Minnesota has expired.

Mr. BADHAM. Mr. Speaker, I yield 3 additional minutes to the gentleman from Minnesota.

Mr. FRENZEL. Ways and Means Committee is the grand champion, having achieved, even after the decrease—the minor decrease in the Wright amendment—a 17-percent increase from its spending of last year.

Now, it is not easy to analyze all these committee budgets. We have statutory staff and we have investigative staff; we have two committees, Budget and Appropriations, which are not even under our jurisdiction. We do not even get a chance to look at their budgets. We have travel, salaries, machinery, supplies.

My criticism of the budgets—and they are severe criticisms—do not imply any criticisms of committee and subcommittee chairmen, who worked very hard to deliver a good product and want to be equipped with the personnel and expense money to deliver the best possible legislative product. Nevertheless, we believe that there is fat in these budgets, and we believe that our motion to recommit gets at some of the worst of it.

We have been compared with the Senate a number of times, and I think that is a very dangerous comparison. The Senate operates in a different way. They do not have statutory and investigative staff. The Senate Budget and Appropriations Committees do not have a direct dip into the legislative expense account. Their associate staff is different from our associate staff. However, Senate associate staff allowances are not without limit. It is very difficult to make those kinds of comparisons. I think the best thing for us to do is make sure that our committees are run as frugally as we can consistent with the need to produce good legislation.

Mr. Speaker, I would like to talk about minority staffing a little bit. A table I will introduce along with my remarks indicates that of the more than 1,000 investigative staff, only 150 belong to the minority. That is 15 percent. I have discussed this earlier in the question on the rule, but it bears repeating, I think.

In the Senate the staffs are one-third/two-thirds. In the House they are not, and it seems to me there can be no good reason, when the Republican minority makes up 44 percent of the House, that they should get, of total statutory and investigative staff ratios, slightly less than 20 percent. Some of the committees are much worse than others, and I do not think that I will call the roll of the worst offenders, but there will be in the RECORD a table which all Members can look at if they wish.

□ 1400

Why are the Republicans wanting to cut? Well, the House has gotten overstaffed for a number of reasons. The subcommittees and committees are geared for a maximum effort, but the subcommittees and committees make a maximum effort for only a few months out of the year when the legislation they are working on is on center stage. The rest of the time they carry the full staff complement, but the staff is not doing the full job.

Also each committee takes its oversight responsibilities very seriously, but unfortunately that is not enough.

The SPEAKER pro tempore. The time of the gentleman from Minnesota (Mr. FRENZEL) has expired.

Mr. BADHAM. Mr. Speaker, I yield 2 additional minutes to the gentleman from Minnesota (Mr. FRENZEL).

Mr. ANNUNZIO. Mr. Speaker, will the gentleman yield?

Mr. FRENZEL. Yes; certainly I will yield to the distinguished subcommittee chairman.

Mr. ANNUNZIO. Mr. Speaker, I take this time to commend the gentleman from Minnesota (Mr. FRENZEL), the ranking Republican on the Committee on House Administration. He attended every meeting; he attended the sessions of the subcommittee; he made a major contribution to the legislation, and I want to say as chairman of the subcommittee that I am deeply grateful for the diligent and honest effort that the gentleman has made to represent his point of view.

I really believe that without the gentleman's help and assistance we would not have gotten as far as we did. The gentleman might not agree with us as to how far we got, but we did go a lot further than we have ever gone before.

Mr. FRENZEL. Mr. Speaker, I thank the gentleman for those words. I agree with him that we have made progress, and I only wish he would have voted for a few more of my amendments.

Mr. Speaker, in oversight some of our subcommittees have tried to reproduce the executive branch. They have looked at all their jurisdictions and created subcommittee staffs so they can try to follow everything the executive branch does.

Oversight is oversight, but we have only a certain amount of capability in each committee. We have spread our staffs too large and too thin, and we are not concentrating on where we should be focusing our energy.

After the class of 1974 came into the Congress, we adopted rule XI, clause 5(d), which provides that subcommittee chairmen and ranking minority members would get specially designated staff. That has proved to be a mistake. It has fractionated the staffs and caused much too large staffs. We have allowed associate staff in the Budget Committee and in the Rules Committee and in the Appropriations Committee, which is unnecessary and is actually simply an increase in the personal staffs of those members.

It is fair to say—and I am sure the subcommittee chairmen would agree with me—that we do not know exactly where to cut. We are just giving the Members our best recommendations, but we think that there is fat, and we hope that the Members will be able to find it with us.

Mr. ANNUNZIO. Mr. Speaker, I yield 5 minutes to the distinguished chairman of the Committee on Sci-

ence and Technology, the gentleman from Florida (Mr. FUQUA).

Mr. FUQUA. Mr. Speaker, the staff of the Committee on Science and Technology was one of 87 people in the last Congress; 53 of those are classified as professionals. We have 16 Ph. D.'s in such fields as nuclear engineering, biology, aeronautics, marine sciences, chemistry, and math, just to name a few of them.

From our budget of approximately $1.9 million in the last Congress we did return about $48,000 to the Treasury last year.

Now, during our presentation to the Subcommittee on Accounts—and I want to thank the chairman and the ranking minority member for the very courteous reception that we received before the subcommittee—a question was raised that maybe we ought to check the role and scope of our committee. Well, we have been "rolled and scoped" pretty well over the years. The growth of the committee always is an issue, that "you have grown from so many people from 1972 to 1976, and so many since then."

Well, I think there is justification on this committee.

To the Committee on Science and Technology was added the jurisdiction of energy, all non-nuclear energy, in 1973, and then in 1977, with the abolishment of the Joint Committee on Atomic Energy, there was added the responsibility of all nuclear R. & D. with the exception of military.

Now, the 4-percent reduction that is proposed in the Wright amendment requires that our committee decrease our staff by 12 people from what we were last year. We are reducing six positions by not filling vacancies that have occurred. We have sent out notice to six people that their services no longer can be utilized by the committee because of the severe budget problem we are faced with. Any further reduction that we have, as proposed in the motion to recommit, is going to require us to reduce the size of our committee even further, and I think it will impede our ability to carry out the responsibilities that we have been assigned by this House of Representatives.

We have, as I pointed out at the beginning, many very fine professionals who work on our staffs, and I would say to this House, that we have saved well over the money that we have spent in the last 10 years in 1 year through oversight work and through trying to scrutinize many very big projects that fall within the authorization of our committee.

One was a coal demonstration plant in Kentucky. We saved approximately $22 million by careful scrutiny of that project. In another project in West Virginia, as estimated by the OMB, we are found to have saved approximately $12 million. There was another project in Colorado relating to solar energy; we were able to reduce some $18 million from the construction costs that were authorized for that project.

I am not advocating that we can always "drink ourselves sober," but I do think sometimes in order to save money we have to spend money. I do not think we would feel that we were saving money if we abolished the IRS or if we abolished the General Accounting Office, because I think we have proven that for every dollar we spend we receive back about tenfold or more.

I think the oversight in this Congress is very important in many of the programs that we authorize and reauthorize.

Mr. Speaker, I would like to point out one thing to my Republican friends. We have talked about saving money, and the man who has the new reputation in that area is our former colleague, Mr. Stockman. I was checking to see how much he is saving this year in his own budget, and lo and behold, I find that he has requested a 9-percent increase in the budget of OMB over what it was last year. I am sure it will be well spent, and I am not arguing that. My only point is that Congress should not be the only one to try to save.

While it is painful to lay off people from the committee staff and, while I think it somewhat impairs the ability of the committees to carry on their responsibilities, I think the amendment of the gentleman from Texas (Mr. WRIGHT), as painful as it is, is certainly much preferable to the motion that will be made by the minority to recommit.

Mr. Speaker, I urge passage of the Wright amendment as the lesser of the two evils.

Mr. BADHAM. Mr. Speaker, I now yield 5 minutes to the gentleman from California (Mr. THOMAS).

Mr. THOMAS. Mr. Speaker, I am a new Member of this Congress on the Committee on House Administration. My previous congressional experience has been on the Committee on Standards of Official Conduct and on the Committee on Agriculture.

In the entire time I have served on those committees, I could never recall a single straight party line vote, let alone a series of straight party votes time after time after time, regardless of the specifics laid upon the table for discussion. So in terms of my full committee chairman's concerns that, hopefully, the party line votes are behind us, I want to assure my chairman that from this particular Member comes the statement that I did not enjoy my initial experience on those party line votes, and I hope they do not occur again.

My distinguished subcommittee chairman, who I know is going through an excruciating period in terms of understanding that it is a different ballgame and that we can no longer do what perhaps was done here in the past, has indicated that, in comparison to the Senate, the House of Representatives is doing a wonderful job. As one of the newer Members who does not have the historical perspective of what was done here 10 years ago or 15 years ago or 20 years ago, I might like to submit to my distinguished subcommittee chairman that perhaps one of the reasons that the House of Representatives, in any opinion poll in terms of whether or not the American public admires or respects the House of Representatives, always falls near the bottom of any comparison in terms of professional or occupational positions. Perhaps one of the reasons is that what the American public wants is not the House compared with the Senate, but the House compared with reality.

My concern is that in my former life I had occasion to look at some budgets in my time, and the distinguished subcommittee chairman said that we had done our job properly and we did it well. I have real concern when we examine a committee—this is just a "for instance"—that has had a 14,000-percent increase over the last 6 years—that is a 14,000-percent increase—yet in terms of the specificity and the needs of getting particulars so that the Subcommittee on Accounts could do its job in examining where that money was to go, the committee accepted this kind of language, under "Travel":

> At this time it is not possible to provide any definite Committee travel proposals. When such plans are designed, the travel will be structured to provide the maximum benefit to the Committee's operations in a cost efficient manner.

I have never seen such creative writing in a budget.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. THOMAS. Certainly I yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Speaker, that was the entire justification for a travel budget for a committee of this House?

Mr. THOMAS. That is the travel budget of a committee of this House.

Perhaps the gentleman would be interested in the language used to justify the amounts of moneys under "Consultant Fees." This is an important segment of the committees, because one of our concerns is growing staffs. We would not like to see provided a particular expertise to us through these salaries, because that position is locked into the salary structure then and the committee continues to grow. Consultants is the area we would like to spend money in if we need particular expertise at a moment's time. This is the language that committee provided:

At the present the Committee has no specific proposals with regard to the use of consultants. However, we anticipate that several of the Committee's ongoing and planned special projects will probably require contracting outside work. For these projects, it will be more cost efficient to utilize consultants rather than hire additional staff.

Again creative writing in a budget. I would emphasize the need of the Subcommittee on Accounts to make a determination as to whether the dollar amounts are reasonable. The language I just read to you is worthless for this purpose. It is very poor planning.

Mr. WALKER. Mr. Speaker, will the gentleman yield further?

Mr. THOMAS. I yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Speaker, could the gentleman tell us how much money they were asking for in these areas? It seems to me in the proposal the gentleman read for travel they had no idea where they were going, but they knew how much they were going to spend.

Mr. THOMAS. Mr. Speaker, fortunately the amount is not earth-shattering. The amount they have down here is $8,000, which is a 100-percent increase from the previous year. And since they have never utilized consultant fees at all in the budget category, up until 1979, the amount is again at least a manageable amount of $12,000.

The SPEAKER pro tempore. The time of the gentleman from California has expired.

Mr. BADHAM. Mr. Speaker, I yield 2 additional minutes to the gentleman from California (Mr. THOMAS).

Mr. THOMAS. Mr. Speaker, if I may continue, perhaps because they are new to the game and do not yet know how to play the justification procedure, we might apologize for the creative writing aspect, but I do not think the Accounts Subcommittee should be the one to excuse it. I think we should have called this to their attention.

I realize that at one time the House of Representatives and its committee operation could have been characterized as a feudal system, but in regard to the statement of the gentleman from New York (Mr. PEYSER), in terms of the committees returning dollar amounts back, that is a kind of a feudal concept in terms of the committees. It means: "Give them what they want, and they will give back to you that amount which they want to give back."

That does not have anything to do with reality. It would seem to me that if, for example, the salary areas were the areas that were getting out of hand in most of the committees—and they are—the subcommittees and, in particular, the full committee, could limit the salary portion of that budget to the same percentage reduction so we could begin to get a handle on the budget.

□ 1415

As a matter of fact, I offered that amendment specifically for various committees and it was rejected. By a straight party line vote this would tie the hands of the chairman of the committee too much, it was said.

Just a couple other examples in my brief time. In the House information services budget, it was proposed that there would be reimbursements of about $4½ million, $4.537 million to be exact. The day before the full committee heard it, after the subcommittee had acted, that was changed in terms of money coming back from Members as reimbursables from $4.5 to $3 million. Where did that money go and where was the studied analysis to allow a committee of the House spending over $9 million of the House's money to be able to make a decision like that?

The SPEAKER pro tempore. The time of the gentleman from California (Mr. THOMAS) has expired.

Mr. BADHAM. Mr. Speaker, I yield 2 additional minutes to the gentleman.

Mr. THOMAS. Mr. Speaker, I thank the gentleman for yielding.

For example, in an account labeled "Leadership Support," which originally had expected a reimbursement of $144,000, all of a sudden with a sharp pencil finds out it is zero dollars that they are expecting from reimbursements.

I could go down the line in terms of publications development, an anticipated $43,000 of reimbursement, all of a sudden it is zero; policy analysis services, $79,000 to zero.

Obviously when you have to reduce from $4.5 million reimbursable to $3 million reimbursable, you have to go in with a meat cleaver to adjust the budget; apparently it depends on whose meat cleaver you are using.

Finally, I would like to end on the note of knowing it is extremely difficult for Members who have been here for a long time to change the way in which they relate to the structure.

I would like to commend the chairman of the subcommittee for his ability to adapt and in terms of his honest attempt to play a new game. I do have to commend him and I have to commend the chairman of the full committee in terms of the example that he has set.

I would like to echo the words of the gentleman from Minnesota, in terms of if only the other committees could do what the House Administration Committee was able to do.

Those of us on the minority, although we lost by straight party line votes, would like to think that based upon the reductions that occurred inside the committee, that you can teach an old dog new tricks. The problem was we only got you to sit up. We would like to have taught you to roll over.

Mr. ANNUNZIO. Mr. Speaker, I yield such time as he may consume to the gentleman from New York (Mr. GARCIA).

Mr. GARCIA. Mr. Speaker, I rise in reluctant support of the committee funding resolution and in opposition to the motion to recommit.

Frankly, I am getting tired of Members who feel compelled to slash committee funding to ridiculously low levels in order to prove that they are more budget conscious and seemingly alined with the mood of the country than those of us who oppose dismantling the committee structure.

Now I recognize that it is not the popular thing to do these days. But someone should be willing to expose these efforts to cut committee funding. The stampede to reduce congressional costs is being led by the minority. Our Republican friends contend that the majority is overstaffed, overpaid, and just plain overindulgent when it comes to spending the taxpayers money. I do not think anyone here contests the fact that the congressional budget has risen or that there are more people on the payroll than a decade before. But let us keep this in perspective and stick to some basic facts; 10 to 15 years ago, there was no such thing as legislative oversight. The powers downtown for the most part controlled policy and planning. Moreover, they essentially dictated to Congress the way things would be. Congress had, for the most part, delegated its constitutional role to the Executive. This changed in the mid seventies with the adoption of internal reforms which were brought about as a result of Nixon administration practices and tactics in dealing with Congress.

Since then Congress has reclaimed its position as a coequal partner in governing the country.

The minority is saying, however, that the times are different now. We have to be frugal. We have to set an example for the country to follow. What they fail to say is that they want to return to the good old days. They do not want Congress examining the administration's policies with respect to personnel practices that involve hiring, transferring, and firing Government employees. Nor, I take it, do they feel Congress should review the administration's response to the internal conflict in El Salvador. Likewise, the minority feels that issues such as the decontrol of oil and natural gas prices, bilingual education, food stamps, and a whole host of others should be left to the administration. This is not the way to go. In these inflationary and uncertain times the public will be looking to us to provide a counter balance to the Executive's proposed cuts. We must be in a

position to respond. And to respond in a cogent and responsible manner.

If we accede to the demands of further cuts in committee funding we will be signaling to the administration that we lack the capacity to do the job the people sent us here to do.

Congress, and specifically the House, should not be so eager to roll over on this matter.

What we do on this first substantive vote of this new Congress will in my view dictate our response as well as our votes on matters in the future. We should not penalize ourselves under the false presumption of fiscal responsibility.

Accordingly, Mr. Speaker, I will support the leadership's request but oppose the motion to recommit with instructions and I urge my colleagues to do likewise.

Mr. ANNUNZIO. Mr. Speaker, I yield 5 minutes to the distinguished chairman of the Committee on Government Operations, the gentleman from Texas (Mr. BROOKS).

Mr. BROOKS. Mr. Speaker, the House Administration Committee has a very difficult and unpopular task to perform. Each year, they must consider the requests of all the standing committees of the House for investigative funds and determine how much will be made available for the committees to carry out their legislative and oversight responsibilities.

This year, the standing committees requested $47,394,475 to cover operations for 1981. The chairmen of those committees appeared before the House Administration Subcommittee on Accounts and explained the justification for every one of those dollars. That testimony should not be dismissed lightly. As chairman of the Committee on Government Operations, I testified in behalf of our request for $2,648,000 and I assure the Members of this House that I had kept the figure to what I considered a minimum needed for my committee to perform at its maximum capability.

In the last Congress, the Committee on Government Operations was credited with savings of $2.4 billion of taxpayers' funds. We could not have achieved savings of that magnitude without having available adequate investigatory funds to employ sufficient staff, to fund subcommittee travel for field hearings and investigations and, when necessary, to bring in witnesses from all across the country to give us the benefit of their expertise.

This year, in compiling the committee budget request, I consulted with all of the subcommittee chairmen and the ranking minority member and concluded that the committee would need $2.6 million if we were to sustain and indeed increase our level of oversight activity as so many Members of this House have expressed a desire to do.

Nevertheless, faced with the very heavy pressures that this Congress feels with regard to reducing Government expenditures, the House Administration Committee, and particularly its Accounts Subcommittee under the very able leadership of its new chairman, Hon. FRANK ANNUNZIO, proceeded to carefully consider all committee budgets and impose cuts wherever possible. The House Administration Committee has actually reduced total committee authorizations to a level below 1980. They have not used an emotional meat ax approach but have done it in a responsible and reasonable manner.

The Government Operations Committee did not escape the knife of Mr. ANNUNZIO and his colleagues. They slashed $190,000 off my request. Even that cut will result in the Government Operations Committee's not being able to do everything we have programed to do. But, I respect the Accounts Subcommittee and the House Administration Committee for carrying out its responsibilities to this Congress and to the American people. I have assured Mr. ANNUNZIO and Mr. HAWKINS that their actions have my support and that I will continue to manage the affairs of the Government Operations Committee in a manner that will achieve maximum return for the American people on the investment that they have recommended for us.

I commend them for their efforts to sustain adequate funding for the standing committees of the House of Representatives. I think they deserve our support and our congratulations for a job well done.

Mr. BADHAM. Mr. Speaker, I yield such time as he may consume to the gentleman from New York (Mr. SOLOMON).

Mr. SOLOMON. Mr. Speaker, just how gullible does the leadership of the House think the American people are? When our citizens overwhelmingly cried out in November for real spending reductions, the leadership responds with a phony amendment to reduce overall committee budgeting by 10 percent by taking virtually the entire cut out of the House information systems budget. That cut is all very well and good. But in the meantime, the budgets of almost every other House committee will continue to expand. We need an across-the-board cut in committee budgets, not a phony cut engineered on paper to make the leadership look good when, in fact, it is playing the same old game of spend, spend, spend.

Once again the leadership is trying to dupe the American people with a superficial and meaningless attempt to appear fiscally responsible, while the already bloated committee budgets continue to grow at an outrageous rate. The Wright amendment is nothing more than another leadership sham, and the American people will not be fooled by this trick any more than they were last November.

Mr. BADHAM. Mr. Speaker, I yield 5 minutes to the gentleman from New York (Mr. LEE).

Mr. LEE. Mr. Speaker, last September 15 on the west Capitol steps of the west front of the Capitol, many of us took a pledge to the American people that we would assiduously move forward in cutting spending for this Government. On the 4th of November last, it is clear that a mandate was rendered to President Reagan and Vice President BUSH and to many of us in this House that the time has come for us to lead by example.

I would like to take this opportunity to pay tribute to Chairman HAWKINS and the gentleman from Minnesota, BILL FRENZEL, the gentleman from California (Mr. BADHAM), and the gentleman from Illinois (Mr. ANNUNZIO) for leading the House Administration Committee in the direction of setting the example in motion that we can, indeed, cut our expenses within this body without jeopardizing the essential services which need to be rendered.

In the last 10 years the spending by the committees of the House of Representatives has jumped by almost 400 percent, approximately $9.8 million in 1971 and $37 million in the current fiscal year.

The requests from the committees before us today are up some 25 percent over last year's expenditure rate.

As I indicated in a previous colloquy with my friend, the gentleman from California (Mr. PEYSER), the requests of the committees over the last 6 or 7 years vis-a-vis the actual expenditure records indicates that there is indeed slack that can be taken up without jeopardizing the important services that need to be rendered. The time has come to implement fiscal discipline.

Mr. Speaker, the committee funding process in my judgment is going to be the first significant litmus test of this Congress to determine whether or not we mean business in responding to the mandate from the American people, that is, reducing costs.

I hope that throughout the months ahead as we address the President's program that we will have the intestinal fortitude to do what many of us have pledged to the American people to do and what the people of this great country elected us to accomplish in this Congress: Reduce spending, reduce taxes, and roll back rules and regulations.

Thank you, Mr. Speaker.

Mr. ANNUNZIO. Mr. Speaker, I yield 5 minutes to the gentleman from Texas (Mr. HIGHTOWER).

Mr. HIGHTOWER. Mr. Speaker, as has already been alluded to, last No-

vember 4 the voting public grabbed Members of Congress by our collective collar and forcibly brought us to attention. Today we should be saying, "You have led the way; now we'll proceed."

Many of us would like to claim bold leadership in addressing the issue of cutting Government spending. We cannot. We are following the orders of our constituents who preceded us on this issue. We now have the responsibility to carry out those orders. Congress own committee funding is a good place to start.

I support the 10-percent reduction. It is a significant cut, yet it would not cripple any necessary committee action. We know that some committees and subcommittees should be cut even more. Others should be cut less or not at all. As wielders of the ax we must make discriminate chops.

Statistics documenting the growth of Government spending are so numerous as to strain our capacity for retention. Some point to the growth of congressional staff as a prime example of the ballooning bureaucracy. Well, it is true. Congressional staff growth and the increase in committee funding levels over the past 10 years is well documented by figures. The figures, however, only address the symptoms; the disease itself remains. We need to be wary of the quick cure, and if we are to be responsive to the budget-cutting demands of our constituents, we must look beyond the figures documenting congressional staff growth to the reasons for this growth. There is where the doctoring is really needed.

One reason for the growth of committee staffs can be traced to the burgeoning bureaucracy in the executive branch. Executive branch personnel and funding levels have increased enormously over the past two decades. New programs have been instituted with corresponding new staffs. Task forces have been established to study specific problems. Old programs have been expanded, and staffs increased to handle the work load. It is quite understandable that congressional committee staffs have increased commensurately just to monitor and conduct oversight investigations of increased executive branch activity. We must also cut back the executive bureaucracy.

President Reagan has promised to reduce the size of the Federal work force, to reduce the size and number of Federal programs. I believe that he is committed to this kind of a spending cut in the Federal bureaucracy. When this happens, it should be easier for us to also reduce the sizes and budgets of our special committee staffs responsible for doing the work generated by some of these executive agencies.

Another important reason for the growth of committee staffs can be traced to the Legislative Reorganization Act of 1970. This act partitioned the committee staffs into majority and minority parties and gave each an unwritten but implicit mandate to develop partisan positions.

Let us look at the hard statistics on this point. From 1960 to 1970, the funding levels for investigative committee staff increased by 328 percent. This figure is certainly large enough in and of itself. But, from 1970 to 1980, investigative committee staff funding increased by 526 percent. This is a sizable increase in the rate of committee staff growth, and it happened immediately after the Legislative Reorganization Act went into effect.

□ 1430

This act partitioned the committee staffs into majority and minority parties and gave each an unwritten but implicit mandate to develop partisan positions.

Let us look at the hard statistics on this point. From 1960 to 1970, the funding levels for investigative committee staff increased by 328 percent. This figure is certainly large enough in and of itself, but, from 1970 to 1980 investigative committee staff funding increased by 526 percent. This is a sizable increase in the rate of committee staff growth, and it happened immediately after the Legislative Reorganization Act went into effect.

There will be an attempt here today by the minority to cut committee funding even more than the substantial 10-percent cut proposed by the distinguished majority leader. Anything more than the 10-percent cut would be a severe blow to the efficiency of the House committee system. The purpose for such a cut is more than simply to spend less money.

We know that the Senate, now controlled by the minority, has not seen fit to cut its own committee funding to this extent. We know that the Senate and the White House, while being budget conscious in spending levels for their own staffs, are still leaving themselves sufficient funds to carry out their mandated duties efficiently. At the same time, though, there are those who would demand that the House sustain a burden of budget cutting greater than its share, to the possible detriment of its efficiency and its ability to do its job.

I can only assume that this effort is a partisan one, designed more to hamper the effectiveness of a House still with a Democratic majority than to be responsive and responsible to the budget-cutting demands of the American public. Our President has told us that the issue of reducing Federal spending, at all levels, is nonpartisan. Our constituents tell us the issue is nonpartisan. Commonsense tells us the issue is nonpartisan. Yet, the structure of our committee system, created by the Reorganization Act of 1970, makes it partisan, as do some of the efforts on the floor of this House today.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. HAWKINS. Mr. Speaker, I yield 1 additional minute to the gentleman from Texas (Mr. HIGHTOWER).

Mr. HIGHTOWER. I thank the gentleman.

On the issue of Federal spending for congressional operations there should be no majority position. There should only be a congressional position that, in the purest form of representative government, reflects the will of the electorate. I urge that all my colleagues, in both the majority and minority parties, be responsible legislators today and vote for the 10-percent reduction in House committee funding. It is a significant first step.

Mr. BADHAM. Mr. Speaker, I now yield 10 minutes to the gentleman from California (Mr. DANNEMEYER).

Mr. DANNEMEYER. Mr. Speaker, we have heard reference today to the thought that we are going to do justice to our responsibility in connection with the spending resolutions by making a proposal to reduce spending 10 percent from what was authorized as our colleagues in the Senate did and that this, therefore, augers well for the taxpayers of this country. Let us look at what the facts are with respect to this matter.

In 1974 the Senate investigative staff totaled some 948. Six years later that had grown to 1,176, an increase of 24 percent. In that same beginning year in 1974, the House investigative staff totaled 785, and by 1980 it had grown to 1,247, an increase of 58 percent. In other words, over this 6 years of time, in the recent history of the two institutions, the House staff has grown by 58 percent while the Senate staff has grown by 24 percent. It is kind of like the example of two people, each person weighing 200 pounds. One gains 50 pounds, and one gains 20 pounds. Each one wants to go back to his original 200-pound beginning point, and the thought is expressed that fairness would dictate that each be cut 10 percent. It is obvious that the heavier one is not going to get close to the 200 pound starting point by cutting 10 percent. The one who gained more weight is going to have to shed more.

For us to suggest that we are going to do equity for the taxpayers of this country by cutting 10 percent from what was authorized in 1980 just is not doing it. We should be cutting 10 percent from what was spent in 1980, because in so doing we will truly make a reduction in total spending for these committees.

Just for the Members' attention, let us analyze the growth in staff in this institution over the same 6-year span

from 1974 to 1980 in terms of percentages. The dollars we have spent in the House have increased during the last 6 years by 237 percent. The number of people has increased by 58 percent. Our Senate counterpart increased by 24 percent. The Federal budget increased by 119 percent in that interval. The statutory staff increased by 111 percent. The Consumer Price Index increased by 71 percent. The Library of Congress staff in that same period increased by 22 percent. The Congressional Research Service staff increased by 26 percent. The Senate personnel staff increased by 7 percent. The Congressional Budget Office staff increased by 12.95 percent.

These figures indicate overwhelmingly that staff in the House investigative staff has been a growth industry that is far in excess of the growth in the national budget. It is far in excess of the rate of inflation. It really, as some Members have described it, is a national scandal, and the responsible thing for us to do in these proceedings today is to vote for the motion to recommit which will be offered so that we will reduce by 10 percent from what was spent in 1980.

Mr. Speaker, I yield back the remainder of my time.

Mr. ANNUNZIO. Mr. Speaker, I yield 5 minutes to the distinguished chairman of the House Committee on Banking, Finance and Urban Affairs, the gentleman from Rhode Island (Mr. ST GERMAIN).

Mr. ST GERMAIN. Mr. Speaker, if the minority's recommendation is adopted by the House, we will be unable to cover existing salaries for committee staff. I recommend that all Members of the House support the Wright amendment.

I will say to my friends on the minority side, if their proposal is agreed to, the House Committee on Banking, Finance and Urban Affairs will have to approach such cuts in an equitable fashion both to the majority and minority sides of the committee and we will operate strictly within the rules of the House as they now exist as far as legislative funding is concerned.

Mr. Speaker, contrary to what some might feel, the facts show that the Committee on Banking, Finance and Urban Affairs has not been profligate in the past nor is our budget request profligate in this instance. We will, of course, live within the figure the House approves, but if we are to carry out our responsibilities in a full and complete manner, we must have appropriate funding under which to operate.

Mr. Speaker, again I want to commend our colleague, FRANK ANNUNZIO, for the yeoman work he has done in bringing this resolution to the floor. I know we are all in his debt for the work he has done.

Mr. Speaker, I appreciate my colleague and good friend, FRANK ANNUNZIO, chairman of the Subcommittee on Accounts, yielding to me. FRANK ANNUNZIO, is to be heartily commended for the superb work he has done in shaping the committee budget resolutions for this year. No one in the history of the Subcommittee on Accounts has done a better job laboring under such extreme circumstances.

Mr. Speaker, the budget process within the Committee on Banking, Finance and Urban Affairs involves all members of the committee, majority and minority, and we arrive at a budget request ultimately pared down substantially from the original requests made by the ranking minority member and our subcommittee chairmen. Our committee has fewer employees now than it has had in past years. Our committee's request for funding provides for no new employees over that requested last year and, in essence, our request of $2.6 million for this year was a bare-bone, rock-bottom figure. The House Administration Committee's recommendation for funding for our committee for 1981 was $2.5 million in round numbers. In consultation with various members of our committee, it was agreed that we would live within this budget figure; although it would mean cutting down on the investigative activities of our committee, either in terms of personnel, investigative hearings or travel for investigative purposes.

Under the proposed Wright amendment, if adopted by the House, our committee would receive approximately $43,000 less than that recommended by the House Administration Committee, and we will have to live with this amount of funding. It will, of course, require further reductions in the investigative activities of the committee.

Mr. BADHAM. Mr. Speaker, I now yield 10 minutes to the gentleman from Texas (Mr. COLLINS).

Mr. COLLINS of Texas. Mr. Speaker, today we are discussing committee budgets, and as far as money goes, it does not sound like much money. The way Congress handles billions, you cannot tell the difference between a billion and a million when you are in the Halls of Congress.

But what we are doing today represents one of the most important sessions that we have ever had, because we are talking about getting the size of committee staffs in line, getting them into a workable size. I have heard so many chairmen of the various committees speak, and they have spoken of how it will mean cutbacks of some of their staffs. All I could think was, praise the Lord; we are going to have a cutback in reducing the sizes of the staffs of Congress.

We have too much staff in Congress. We have too much Government. You know where excess legislation all begins in this country—it begins with the staffs. In other words, these people have a job, and as we have created larger and larger and larger staffs, they have got to spend their time figuring out new regulations. They have got to spend their time figuring out new laws, some new way to keep the committee busy. Believe you me, they have been successful at it.

I want to give you just one example of it. I have the figures on the Federal Register. The Federal Register has gone up just in the past few years from 35,572 pages in 1973 to where it was 87,012 pages in 1980. What is the Federal Register? That just shows how we crank out these regulations around here, how we are putting more and more burden on business. Business in this country is having a hard time competing. The last thing they need is more Government regulations. All they want is an even chance where they do not have all this paperwork.

In our committee report this year—and we had a distinguished report—I notice that we had provided for 2 million copies of paper just for our committee—2 million copies to repeat what we are doing. The reason we need 2 million copies is that we have got so many people on the staffs, we were up now to where our committee is asking for 170 staffers.

Back in 1974 we had about 58; now we ask to have 170. We have to have extra computer time to take care of printing material so we can inform all of our staff what is going on.

I was on the Commerce Committee in 1974, and it had a very, very efficient staff. Let me tell you that many others have grown because, as we know, staffs have zoomed since 1974, and you have seen what has happened to the deficit since 1974. The deficit zoomed, too.

This year the total national debt went up $80 billion. With what the Carter administration left us, the debt is going up $80 billion in 1981 again. The reason is Congress just keeps passing bills and passing bills, and there is just too much Congress spending around here.

Let me come back to the Democratic empire. We are asking the people on your side of the aisle to make a real sacrifice. I see the chairman of the Committee on House Administration, the gentleman from California (Mr. HAWKINS) and the chairman of the Subcommittee on Accounts, the gentleman from Illinois (Mr. ANNUNZIO) and I want to tell the Members that those two have done the best of anybody on their entire side of the aisle.

Mr. ANNUNZIO. Will the gentleman yield?

Mr. COLLINS of Texas. I would just like to say a good word about the gentleman, and then I will let him tell me about how I am wrong.

Mr. ANNUNZIO. Will the gentleman yield at that point?

Mr. COLLINS of Texas. All right, I yield to the gentleman.

Mr. ANNUNZIO. I thank the gentleman for yielding.

I can truly appreciate, and I am grateful for, the effort that the gentleman from Texas has put forth to stem the growth of our own bureaucracy. He, as much as anyone, is aware that there are limits to the span of any Congressman's time and energy. A man can only be in so many places and can do only so many things at any single moment. I anticipate that the House will ultimately heed his advice to reduce the number of its subcommittees, and thus the space, equipment, supplies, and other support needed to sustain them.

On the other hand, the public mood, as expressed in the November elections, demands that this 97th Congress exercise more oversight than ever before to insure that the laws we have passed are administered without waste, fraud, deceit, excessive regulation, or mismanagement.

Given the size of our Government and the limits of 435 Congressmen and their supporting staff, this is no easy task. Congress is a branch of Government which, under our constitutional separation of powers, is considered to be equal to the executive branch. However, the dollars it spends and the resources it commands pale in comparison to those of the Executive. Congress must have adequate resources to do its work and the most vital part of that work is performed by our committees.

My predecessors in this chair have stated, and I will restate what they have said: This subcommittee must strike a balance between its responsibility to see that the contingent funds of the House are used wisely and economically and its obligation to insure that the committees of the House receive sufficient funds to accomplish their legislative and investigative duties. As I see it, this is our duty as members of the Accounts Subcommittee of the House of Representatives.

I truly want to commend the gentleman from Texas (Mr. COLLINS) for being consistent in constantly calling to the attention of the committees in the House their obligation and their responsibility to cut subcommittee staffs.

□ 1445

You know, we did not create the staffs; you know that, JIM. You and I have talked about this before. Once the subcommittees have grown from I think it was 48 to 157, we inherited the funding of those committees.

So I thank the gentleman for his efforts.

Mr. COLLINS of Texas. I appreciate what the gentleman from Illinois (Mr. ANNUNZIO) has said, and sitting over there by him is the chairman of the full committee, the gentleman from California (Mr. HAWKINS).

And when I saw these committee reports come in, you have the clearest vision for austerity and you have the best heart of anyone, you two from the House Administration actually cut your expenditures 20 percent. That was not any kind of a doubletalk accounting figure. You cut spending by 20 percent.

Now, out of the 23 committees that came before us, most of them have fought, they fought like they were a cornered raccoon. And only two others were cut at all. One of them got cut a small 2 percent and one got cut only 3 percent. But 20 of the 23 committees have a bigger budget for 1982 than they had last year.

And I just want to tell the Members how fast some committees have grown, just to remind the Members. I went back to 1974, and I looked at Agriculture, which used to be $145,000, and even this year we recommend giving them $1 million.

I looked at Education and Labor—no, it has not gone up too much. You have one of the better budgets, Chairman PERKINS.

I looked at Energy and Commerce. It went up from $900,000 in 1974 to where even the Frenzel recommendation will be $3,200,000. It will be four times as much as they had 6 years ago.

Foreign Affairs was $590,000, and it will be $1,464,000.

Look at Merchant Marine. That is the most difficult to defend of any committee we have. Merchant Marine was $245,000, and now it is $1,384,000, even with the suggested cut.

As I see these cuts that should be made, we realize that the one key vote today is going to be on the Frenzel recommit, because what my colleague from Texas (Mr. WRIGHT), the distinguished majority leader, will submit he is going to make a proposed cut. I hope everybody on the floor votes for it, because it is a good token cut, it is good accounting, it is a step in the right direction. We ought to accept it.

But the real cut, the real vote, is going to be what we are going to do when the gentleman from Minnesota (Mr. FRENZEL) brings out his recommit motion. Here is the issue. Will we accept Representative WRIGHT with $39,600,000? Or will we accept FRENZEL's $35,348,000? There is over $4 million difference, there is over 10 percent, and it is the real key issue that we have before us today.

When we think about operations of Government, we can go through any committee here and we come to the same conclusion that staff work is duplicating, duplicating. We talked a little bit about computers. I do not yet understand why we need to have a computer system in the House, a computer system in the Senate, and a third system in the Congressional Research Service, just turning out the same material, just having different technicians in different places cranking it all out in duplication.

We have come to the licklog. There have never been as many staff budget hearings. This thing has been heard more fairly and more thoroughly than ever in history. In a few hours we are going to be up to the vote.

One time Governor Wallace said, "There is not a dime's worth of difference between the parties." I am hoping today that we will find that not only will our Republican Party stand for fiscal restraint and fiscal economy, but on your side of the aisle, that many of you are going to join us on the recommit motion, because that is the showdown motion, that is the gut motion. That shows whether the Members can provide an example for America that we are here to cut our spending in Congress.

Mr. ANNUNZIO. Mr. Speaker, I yield 5 minutes to the gentleman from Kentucky (Mr. PERKINS) the distinguished chairman of the Committee on Education and Labor.

Mr. PERKINS. Mr. Speaker, let me congratulate the gentleman from Illinois (Mr. ANNUNZIO). I personally felt that the gentleman's committee did an excellent job.

Mr. Speaker, on February 18, 1981, the Committee on Education and Labor submitted to the House Administration Committee and to its Subcommittee on Accounts what the committee felt was the amount essential to carry out responsibly the functions of the committee during 1981.

The work on the committee budget was a bipartisan effort. It had strong bipartisan support in its submission to the Subcommittee on Accounts.

Moreover, this budget was carefully prepared in the light of the budget-cutting realities facing the 97th Congress. The committee took extraordinary care to assure that the funds being requested were the absolute minimum necessary to perform our tasks. Let me say at this point that at the time we formulated our committee budget, we recognized virtually every program providing Federal resources to State and local governments under the committee's jurisdiction, would be the likely subject of not only budget reductions but also dramatic changes.

This has been borne out by subsequent submissions to the Congress by the administration in which we are told that programs under the jurisdiction of the committee will not be funded and, in lieu thereof, five block-grant programs will be substituted.

This will necessitate the review of literally hundreds of pages of existing law, not taking into account the hun-

dreds of pages that the administration will submit to replace them.

The administration's budget reductions impact most heavily across the entire spectrum of elementary, secondary, and postsecondary education, employment and training programs, school lunch, child nutrition which are all within the jurisdiction of the committee.

Already, the committee and its subcommittees have conducted 32 days of hearings in preparation for the mammoth tasks that face us.

Similarly, every aspect of the labor and regulatory jurisdiction of our committee is the subject of legislative change—Davis-Bacon, Walsh-Healey, Service Contract Act, Fair Labor Standards Act, mine health and safety, occupational health and safety, workmen's compensation—all are areas in which the committee has had referred to it legislative amendments or has in process recommendations for legislative changes.

Our committee has been increasingly responsive to the requirements of the 1970 Reorganization Act and the Committee Reform Amendments of 1974 enlarging our oversight and investigative activities.

Areas which require oversight and very likely perfecting legislation are the Employment Retirement Income Security Act, Indian education, education finance, National Labor Relations Act and related legislation, juvenile delinquency, arts and humanities, black lung benefits, child abuse, and National Institute of Education.

Many programs are expiring. Their reauthorization and modification must be attended to. In this category are vocational education, Head Start, Older Americans Act, Comprehensive Employment and Training Act, education of the handicapped, library services and construction, vocational rehabilitation, Community Services Administration, Alcoholic and Drug Abuse Education Act, and ACTION.

An increasing portion of staff time is devoted to detailed analysis and study of departmental regulations to determine that the administration of our laws conforms with the intent of the Congress.

The committee has the authority under law to review all regulations proposed by the U.S. Department of Education. We have taken this responsibility very seriously, establishing a procedure for reviewing all new regulations line by line to determine whether they conform to their authorization statutes.

This task over the last 2 years has involved a review of 177 sets of regulations, entailing thousands of pages. To give some examples, regulations already reviewed or under review for elementary and secondary education programs alone total approximately 1,300 pages. New regulations for higher education total over 700 pages. These, along with many more sets of regulations, are currently being reviewed.

As a result of the review of regulations in the 96th Congress, I have sent 36 letters to the Secretary of Education raising questions regarding certain provisions of the regulations. Many regulations were changed as a result of these letters. But four sets of regulations with seriously offensive provisions were not. Consequently, the committee disapproved these regulations, and this action was later upheld by the full House and the Senate.

In the 97th Congress, I have already sent five letters to the Secretary of Education raising questions regarding new higher education regulations. Our review of these regulations has proved to be an effective means by which the committee can determine whether or not the administration is carrying out the laws under the committee's jurisdiction in accordance with the intent of Congress.

As I have indicated, this activity has concentrated chiefly on programs administered by the Department of Education. Extensive and continuing review of this agency and of the U.S. Department of Labor and the U.S. Department of Agriculture will be required in such programs as the Federal Mine Health and Safety Act, the Occupational Safety and Health Act, the Employee Retirement Income Security Act, the Labor Management Relations Act, the Fair Labor Standards Act, the Equal Opportunities Act, the Child Nutrition Act, the National School Lunch Act, and the Civil Rights Act.

The committee budget request submitted to the House Accounts Subcommittee anticipated no increase over the amount authorized last session beyond the 9-percent inflation factor, except for an increase for the minority. The cuts made by House Administration therefore reduced the capability of the committee to respond to its legislative duties below that which existed in the last session.

With all due respect to my distinguished colleague from Illinois (Mr. ANNUNZIO), the chairman of the Subcommittee on Accounts, I felt that the reduction in the committee's resolution request was austere and did not take into account the requirements of the committee in carrying out its broad responsibilities.

Now we are not only faced with this reduction, but a proposal on the part of the Wright amendment which will strip the committee to a level approximately $164,000 below our 1980 funding level.

If one of the rumored amendments is agreed upon, we will be reduced approximately $525,000 below our 1980 level.

I do not believe that this represents responsible legislative action.

At a time when we face substantial changes in major policy affecting every activity of this Nation, it is most imperative that the Congress be adequately staffed and equipped to analyze and to carry out its tasks in the most effective manner possible. These cuts are unwarranted and I hope that the House will soundly reject the motion to recommit with instructions to reduce committee operations.

I would like to insert in the RECORD at this point a table reflecting the effect of the Wright amendment on the allocations to the majority, minority, eight standing subcommittees, and the pension study group of the House Education and Labor Committee.

COMMITTEE ON EDUCATION AND LABOR—EFFECT OF WRIGHT AMENDMENT ON ALLOCATIONS WITHIN THE COMMITTEE ON EDUCATION AND LABOR

	1980	6 percent reduction	Available 1981
Full committee majority	$460,000	$27,600	$432,400
Minority	460,000	−27,600	432,400
Subcommittees	1,502,000	−90,120	1,411,880
Elementary, Secondary, and Vocational Education	(187,750)	(−11,265)	(176,485)
Employment Opportunities	(187,750)	(−11,265)	(176,485)
Labor-Management Relations	(187,750)	(−11,265)	(176,485)
Health and Safety	(187,750)	(−11,265)	(176,485)
Human Resources	(187,750)	(−11,265)	(176,485)
Postsecondary Education	(187,750)	(−11,265)	(176,485)
Labor Standards	(187,750)	(−11,265)	(176,485)
Select Education	(187,750)	(−11,265)	(176,485)
House Information Systems set-aside	100,000	−6,000	94,000
Subtotal	2,522,000	−151,320	2,370,680
H. Res. 102—Pension reform activities	207,200	−12,432	194,768
Total	2,729,200	−163,752	2,565,448

*Note.—Items in parentheses equals a 16 percent reduction of 1980 authorization.

Mr. BADHAM. Mr. Speaker, I yield 5 minutes to the gentleman from Pennsylvania (Mr. JAMES K. COYNE).

Mr. JAMES K. COYNE. Mr. Speaker, the votes which Members of this body cast today may be among the most important of the entire Congress. I do not think that this is just because of the dollar amounts that have been discussed on both sides of the aisle; rather, it is because of what each Member's vote will signify about his or her real commitment to fight inflation by demanding more responsible patterns and levels of Government spending.

Before being a Member of this august body, I was a faculty member at the Wharton School of Business. Economists now realize that, in microeconomic terms, citizens react on an individual level in response to what their future expectations are in regard to what the economy and what Government will be doing in the months ahead. And that is why what we do today is so terribly important, because I think it shows to the public, or will show, what they may expect with regard to Government spending in the months ahead.

Will they expect a true commitment to reduce Federal spending and efficiency in Washington? Or will they continue to get the kind of double talk and double accounting which they have become accustomed to for more than a generation?

It may well be impossible to find one among us who did not campaign on a platform calling for improved Federal responsiveness to the real needs of the American people and for greater accountability of the Federal Government.

Today we have an opportunity to prove to our constituents that we are serious about these commitments. We all recognize the dramatic plight of the American economy and the need to restrain Government spending. I believe it is incumbent upon us as Members of this Nation's highest legislative body to show that we can and that we will impose some sense of fiscal responsibility in the workings of our own house. Let us put our own house in order.

The measures to be voted on today offer a choice between a merely symbolic gesture to rein in the spending of these committee budgets or a sincere effort to significantly reduce this spending and turn around what has been an indefensible pattern of explosive growth and expense.

Even in our current economic state, the rate of inflation does not begin to approach the rate at which committee budgets have increased. In just the last 10 years we have seen a shocking sevenfold increase in the amounts allocated for House committees. This is truly a critical time. Our most pressing needs cannot continue to be met without a vastly improved economy. Inflation, which so erodes the security of all Americans and does most harm to those with fewest resources, must be halted.

Recent actions in both Houses of Congress prove that there is broad bipartisan support for necessary reductions in the Federal budget. But we must begin at home to implement these needed reductions. Our constituents will surely not be so naive as to believe that House committee functions today actually require 700 percent more money than they used in 1970.

□ 1500

We will be making many difficult decisions in the weeks to come. Today's decision, though, is not difficult and there is an impressively clear need to respond to the American voters by supporting the motion of my most distinguished colleague from Minnesota.

As you all know, this motion will recommit the committee funding resolutions with instructions to reduce the amounts by 10 percent from last year's expenditure. The 52 Republican freshmen, I am proud to say, have already indicated our united support for such action by unanimously approving a resolution calling for such a reduction.

I urge my colleagues to support the motion to recommit as the only viable way to demonstrate to the American public that we do not intend to exempt ourselves from the overriding mandate to make all aspects of American government more responsible and accountable to the American people.

Mr. ANNUNZIO. Mr. Speaker, I yield 2 minutes to the distinguished chairman of the Committee on the District of Columbia, the gentleman from California (Mr. DELLUMS).

Mr. DELLUMS. Mr. Speaker, last session, 1980, the amount approved for the District of Columbia Committee by House Administration was $289,670. The recommended amount by House Administration for the current session, 1981, is $288,719. This is $27,905 less than the $316,624 requested by the committee for 1981. It is also less than the amount approved for 1980.

Our expenditures, in salaries alone, for 1980 was only $201,178.47, which included an average of 13 investigative staff at an average annual salary of $15,475.27, as against an average salary of approximately $32,000 paid to staff of our counterpart in the Senate. This represents our concern to contain costs while at the same time performing the very necessary oversight responsibilities. This represents the lowest average annual salary paid by any of the House Standing Committees during the 1980 session. Also, our request to House Administration for funds in the amount of $316,624 was the lowest of any of the House standing committees for the current session, 1981.

Please accept my assurances that no appropriated funds will be spent unless absolutely needed to carry out specific responsibilities. The committee's record on this matter stands for itself.

Mr. BADHAM. Mr. Speaker, I yield 5 minutes to the Republican leader, the distinguished gentleman from Illinois (Mr. MICHEL).

Mr. MICHEL. Mr. Speaker, one Congress nonissue is another Congress issue. It seems that that is the case with this committee funding resolution.

Funding our standing and select committees in the past has been a matter of form. It is not now and I hope it will not ever be again. It is about time we kept a closer eye on ourselves.

There have been enough facts and figures bandied about on this issue to make it perfectly unclear to everyone. For my money, no matter what statistics you use, three conclusions are clear. First, congressional committee staffing has increased at intolerable levels; second, there is no evidence to suggest that the rate of productivity around here offers any justification for staff increases, quite the opposite is true; and third, the ratio of committee staff allocations constitutes an abuse of minority rights and it is about time we did something about it.

Those conclusions are based on fact. I suspect some of the committee recommendations we have here today are derived from facts based on conclusions.

We do not often air our housekeeping matters in the fashion we are today, but our spending habits and the proliferation of staffing have left us no alternative.

Total committee staff is up more than 300 percent in the last 10 years and there is no justification for that. Investigative staff has grown at an equally alarming rate and there is no justification for that either. Statistics on the number of bills referred and the number reported out since the 92d Congress have not changed all that much, certainly not enough to warrant anywhere from a 100 to 500 percent increase in funding.

It is not just the committee staffs we should be looking at. Do my colleagues realize we have more than 90, yes 90, informal conferences, caucuses, study groups, and research organizations here on the Hill? They do everything from track legislation on mushrooms, I guess, to promoting exports. Every one of these organizations, most every one, occupies the time and energy of some congressional staff. Some occupy actual rooms in the House office buildings and most of them consume money, energy, paper, equipment, and supplies. We now have a brandnew Madison Library across the street. Why? Partly because of the demands all these committee staffs make on the Congressional Research Service for information we ought to be getting, frankly, ourselves.

I am reminded of the first day I came to Washington and walked into the office of my predecessor, the late Everett M. Dirksen, who everyone on both sides of the aisle would have to admit was a giant in the legislative process. There were three people on his staff, a husband and wife team and one additional person. It did not inhibit what he did or what he contributed to this legislative process. But you all know what has happened since the days of those individuals serving here in this body.

Now I understand that the Democratic Study Group has concluded in some mysterious way that we are raising cain about these matters in a covert attempt to thwart the Democratic House from working its will on the Reagan program.

Well, brother, you have to walk a mile to come to that conclusion. To suggest that we are cutting staff to cripple the majority in this House is

ludicrous. If we wanted to cripple the majority we would increase the staff. What has the majority gotten from its bulging staff? Well, the election results suggest the payoff has been a minus. No; if we wanted to go after the majority we would be proposing more staff, not less.

There is only one small aspect of this issue that has any kind of partisan tinge and we all know pretty well what that aspect is. We have 156 staff members assigned to us on these committees and the majority has 839, hardly consistent with the ratio of Republicans to Democrats in this House.

I could not help but be reminded when the gentleman from Kentucky (Mr. PERKINS) talked about his being the first committee that recognized that the minority ought to have adequate staff. I think the latest figures show that he has 76 and we have 15. That is a far cry from equity in this body on the strength of the kind of ratio we have.

Now I was pleased though, however, to hear that my distinguished counterpart on the majority side, the gentleman from Texas (Mr. WRIGHT), was going to offer an amendment to reduce the committee's recommendation with a vote on his amendment and I would encourage every Member on my side to support that motion. I think it ought to be a unanimous vote. But the only problem with the Wright amendment is that it does not go far enough.

Let us face it. It is a gesture in the right direction, but not all that meaningful. I naturally hope that there will be a sufficient number of Members on the Democratic side of the aisle who will support our Republican motion to recommit and make some real significant savings on these funding resolutions.

Mr. ANNUNZIO. Mr. Speaker, I yield 5 minutes to the distinguished gentleman from Michigan (Mr. DINGELL).

Mr. DINGELL. Mr. Speaker, I have listened for a number of years to the discussions that we have on the budget of the House. I think there are some things that ought to be brought to the attention of the House with regard to the true facts on the budget of the House and what is the case with regard to the budget of the other body.

First of all, it must be observed that in the House is the body of the people's highest directly elected officials. This body is responsible for supervising a budget of over $700 billion. There have been a number of controversies raised with regard to the level of budgets of the committees of this body and the committees of the other body. But our budget and our committee staffs must be sufficient for proper discharge of our duty to the people.

It is time, I think, that we look at those responsibilities in perspective. First of all, Senate committees, this year, will spend on behalf of its committees about $2 million more than will be spent by the committees of the House. Second, the amount recommended by the Committee on House Administration is 13 percent below the level that the committees need to keep pace with inflation. The Senate has withdrawn from its accounting in connection with the legislation of similar character in that body the entirety of its computer budget, some $10 million. If you eliminate the cuts that were raised against one very large Senate committee, the Committee on the Judiciary, the Senate budget cut is reduced to about 1½ percent of budget in terms of total cuts. That does not include the level of moneys that is made available outside of the similar resolution in the Senate for three staff members for each Member of the Senate for each committee assignment which he holds, a total of hundreds of thousands of dollars not showing in the budget.

As indicated, the Senate has about $18.3 million which is made available to Senators for committee staff on top of their regular clerk-hire allotment to hire staff to work exclusively for committee members. The level of funding of the committees in the House under this resolution is 6.2 percent below the 1980 level.

To compare with the executive branch, it is interesting to observe that the Executive Office of the President will expend 16 percent more on staff than all of the House standing and select committees combined.

It should be observed that there are at this time only 3.8 committee staff employees for each House Member as compared to 17.3 committee staff employees for each Senator. That should give you an appreciation of the kind of job and where the tight budget is. It also should give my colleagues an appreciation of the fact that the Senate has not in fact engaged in any massive cuts of its expenditures or in any particular careful allocation of resources amongst itself, something which I think should trouble all of us here over some of the charges which have been made with regard to behavior by the House.

Now let me try and lay something else before my colleagues that I think is important. The Republican claim of a 10-percent cut in Senate committee funding is nothing but political hogwash, as I have already pointed out. They have not mentioned that the Executive Office Building continues to hold a high level of funding for staff, they have not told that the only significant cuts made down there are on the Office of Wage and Price Stability, the Council on Environmental Quality which were either totally or almost totally abolished in terms of their expenditures. It should be noted that very little in the way of real cuts in the executive offices has taken place and absolutely nothing has taken place with regard to cuts of employees from other executive offices in the White House.

This is the people's House. We are charged with the responsibility of legislating well and having the information that is needed. The committees' place in the structure of this body is to see to it that the Members of the House have the information upon which they make decisions. There has been growth in staff, and I think that has been good because staff of our committees is all that we have to assure that the Members of the House have the information necessary to full and correct judgment on the complex and difficult legislation which lies before this body.

The SPEAKER pro tempore. The time of the gentleman from Michigan (Mr. DINGELL) has expired.

Mr. HAWKINS. Mr. Speaker, I yield 1 additional minute to the gentleman from Michigan (Mr. DINGELL).

□ 1515

Mr. DINGELL. It should also be observed that the Senate has included in its expenditures $10 million for computers that, when you multiply out the budget of the Senate against the number of Members and the budget of the House against the number of Members here, you will find that they spend better than four times per Member in the resolution of the kind we are discussing here, than we spend in the House of Representatives. I believe this bespeaks very clearly the fact that we have behaved frugally and behaved well.

One last point: it has been charged that we have majority and minority staffs. On the Energy and Commerce Committee of which I am chairman, we have a committee staff that works for all the members of the entire committee regardless of what their party affiliation might happen to be. There is also a minority staff. That minority staff works exclusively for the members of the minority. I simply call on my colleagues, let us give the Congress the ability to respond with full information, well informed on the great issues affecting our Nation by passing this resolution.

Mr. BADHAM. Mr. Speaker, I would like to inquire how much time I have remaining.

The SPEAKER pro tempore. The gentleman from California (Mr. BADHAM) has 1 hour and 1 minute remaining. The gentleman from Illinois (Mr. ANNUNZIO) has 1 hour remaining.

Mr. BADHAM. Mr. Speaker, I yield 3 minutes at this time to the gentleman from Ohio (Mr. STANTON).

Mr. STANTON of Ohio. Mr. Speaker, Members of the House, you know, if we are mind boggled at the numbers with lots of figures of millions and millions that have been going through our minds, I just wonder for 1 minute what perhaps the listening audience—are thinking at the moment. I know I am confused. I am confused for several different reasons.

One of the very distinguished young members of our committee was up a while ago, and I think he made the right statement in that he felt that this was one of the most important votes he was going to make, on the motion to recommit this legislation with additional cuts, to be offered by Mr. FRENZEL of Minnesota. I strongly support him in that regard, but I am confused because I thought that this was a nonpartisan approach, a nonpartisan vote on the motion to recommit, Mr. Speaker, because what we would be doing would be carrying out the mandate, truly, of the American people on November 4 to cut the costs of Government.

It just seems so obvious to me that this is a not a very partisan approach. I would take just the time of the chairman and ranking Republican member on the subcommittee to put it in the proper perspective, maybe for that woman in California who wants to go to lunch and is wondering what this debate is all about. I ask the gentleman from California this question: If we do not pass the Frenzel motion to recommit here in another hour or two, if we do not pass this legislation, am I not correct in that we will be authorizing considerably more money for committee staffing this year than we spent last year? Am I right on that?

Mr. BADHAM. The gentleman is absolutely correct. If the motion of the gentleman from Minnesota (Mr. FRENZEL) to recommit is not agreed to, we will be authorized to spend 6 percent more than we have spent for all the committee structure last year.

Mr. STANTON of Ohio. Let me ask the gentleman one more question since he is on his feet. If we do not vote for the motion to recommit, the Frenzel motion, will we be carrying out our mandate of those who ran asking for less Government and less expenses in Congress, and fulfilling the request? I do not care if they are Republican or Democrat, how they voted, the overwhelming majority of people in my congressional district are appalled at the fantastic growth of these staffs—our staffs—people that we have direct control over. The question to the gentleman is, if we do not vote for the motion to recommit, are we not voting for an increase over what we had last year?

Mr. BADHAM. We are voting for an increase over that which we were authorized to expend last year.

The SPEAKER pro tempore. The time of the gentleman from Ohio has expired.

Mr. BADHAM. Mr. Speaker, I yield 2 additional minutes to the gentleman from Ohio.

The SPEAKER pro tempore. The gentleman from Ohio (Mr. STANTON) is recognized for 2 additional minutes.

Mr. BADHAM. As I was looking over my notes here of earlier comments, we have not received the message from the American people that they want a smaller, leaner, tougher, more efficient Congress. They do not want us to keep expanding our staff and our expenditures.

Mr. STANTON of Ohio. Let me just say in conclusion, and give one example to those who might be listening. We have on our minority staff on the Banking Committee a woman who, when she was hired, was the third employee of the House Banking Committee, both the minority and the majority side. She was the third employee, and she is still there. We now have over 100 employees on both the minority and the majority staff of the House Banking and Currency Committee. This is in the short course of a few decades over one person's livelihood in the Congress of the United States, and so I think, in putting things in the proper perspective, the American people know what they are doing when they ask us to cut back these staffs.

It was with great disappointment that I could not go along completely with the majority members on the Banking and Currency staff, asking for their budget, and I hope sincerely the motion to recommit will carry.

Mr. ANNUNZIO. Mr. Speaker, I yield 5 minutes to the distinguished gentleman from Florida (Mr. PEPPER), chairman of the Committee on Aging.

Mr. PEPPER. Mr. Speaker, I apologize for having a bad cold. This exercise in which we are now engaged is like an army curtailing its ammunition. This Congress works primarily through its committees. What we are doing is cutting off our ability to do a good job legislatively for our country.

The total amount that is involved in all of these expenditures of our several committees, after the Wright amendment should be adopted, as I am assuming it will be and should be, is an infinitesimal part of the national budget. Yet, if you curb unduly the committees of the Congress, you hamstring the legislative effort of the Government of the United States.

In the case of my own Committee on Aging, nearly 25 million of our fellow Americans are our subject of concern. One-sixth of them are below the poverty level, and millions more are near it. They need three times as much health care as people of younger ages. They live generally in substandard housing. They do not get enough, ordinarily, to eat. We have been trying by oversight, by proposals to the legislative committees, by holding hearings to expose their needs and in other ways to make life a little better for those deserving elderly people of America, the mothers and fathers of America; to try to follow the commandment, as it were, to honor our fathers and our mothers.

Now, this Republican amendment would add on to the cuts that have been made by the committee, which is 7 percent, or $89,000. That is all right; we have no complaint about that. We can live with it. Then, Mr. WRIGHT's amendment would cut another $50,000. We will live with that, but now our Republican friends, with whom we have worked so cooperatively on the committee, now what they would do is to take another $318,000, practically cutting in half the funds available to that committee.

I cannot believe that the public interest requires that sacrifice. I am not going to eat any less. I will be just as well off personally, but it may be that our effort to help the elderly will be so impaired that many of them will not receive the service we want to render in this Congress in respect to oversight of the problems that they face today.

So, I want to beg of my colleagues that if you are concerned about the elderly of America give your committee the means to help them. We now have 54 Members on our committee; that number went up by the appointment of the Speaker on account of the request of Members to be on the committee—from 45 to 54. That means, of course, that there will be more activity in the committee. There will be more people wanting to travel, wanting to hold hearings, wanting to do things for the elderly. At a time when we have a larger and more active committee, the Republicans want to cut almost in half the amount of money we have with which to make some contributions to the deserving elderly of America.

I am going to vote for the Wright amendment. I hope it will be adopted. That is a 10-percent overall cut. I think that is a good advance in economy, but I beg of you, if you are concerned about the elderly of America, do not impair your committees ability to make some contribution to lighten the burden that they have so long borne.

Mr. BADHAM. Mr. Speaker, at this time I yield 3 minutes to the gentleman from Illinois (Mr. DERWINSKI).

Mr. DERWINSKI. Mr. Speaker, with the funding resolutions of the various committees before us, I recognize the concern expressed over the levels of proposed spending. I share that concern. It is a legitimate concern, but as sometimes happens we have maneuvered ourselves into a posi-

tion where we cannot see the forest for the trees.

Our current dilemma, which will get worse before it gets better, is traceable to House rule XI, clause 5(d) which gives the chairman and ranking minority member of up to six standing subcommittees each the authority to appoint a staff person who shall serve at the pleasure of that member. By mandating a minimum number of subcommittees and conferring autonomy on the subcommittee chairmen, we have left ourselves in the position of authorizing and appropriating the necessary funds to operate these entities.

Under the banner of legislative oversight, subcommittee chairmen have created little dukedoms devoted to special causes and have assembled teams of overzealous staffers who have never learned the meaning of teamwork and cooperation. I support and endorse genuine staff initiative, but more often than not we find ourselves wasting time and energy dealing with staff-engineered projects which serve no interest outside the narrow scope of a subcommittee and consequently rarely get beyond that stage.

As the ranking Republican on the Committee on Post Office and Civil Service, I was, in making my budget request to the Committee on House Administration, obliged to ask for $165,200 to cover, at a minimum, the salaries of staffers authorized by the House rule. That amounts to 85 percent of my budget request. It is an uncontrollable commitment which certainly is worthy of special attention during these deliberations.

The minority committee budget for 1980 allocated $139,200 for investigative staff because I was persuasive enough to make a case for filling only four of those positions. In the current session, I am faced with requests to fill all six positions, so my only alternative is to request the necessary funds. My request of $165,200 in this year's budget is a reasonable accommodation of the facts of life.

In 1980, we allocated $22,000 for official travel and office expenses. Our request this year in this category is $23,800, a modest increase. I would point out that in this Congress we have one additional Republican member in our committee ratio.

And, finally, we are requesting $6,000 for the summer intern program, which will cover the four requests I have pending from my Members who wish to appoint students this year under the program. Last year we spent $5,476 on this program.

Our total budget request for 1981 is $195,000, as compared with our 1980 budget of $165,700, but fully explainable in the terms I have outlined.

I have made every effort to contain our minority budget for 1981, but as long as we continue to function under existing House rules we will be faced with a continuing budget problem.

When the housekeeping rules of the Congress draw national attention and criticism, it is time for us to examine whether we in the House are contributing to the erosion of Americans faith in their governmental system.

An essay entitled "American Renewal" in the February 23 issue of Time magazine accurately describes the effect of liberal reforms of the Congress that have taken place during the last decade.

Referring to the defunct seniority system, the essay says:

> For all its occasional abuses, this system gave Congress a certain coherence, the White House knew whom to deal with, and the legislative leaders could speak for the membership.

Then, focusing on a problem I have cited for many years, the article goes on:

> Today the chairmen are named by the party caucus and have to answer to their committee members—and therefore have little authority over them. Another of the reforms, however, decreed that each committee should have at least four subcommittees with independent chairmen and independent staffs. Result: There were 210 separate legislative entities in the House last year; out of 334 Democratic members of the House and Senate, all but about two dozen were chairmen of something. A relate problem: the congressional staffers, accountable to nobody outside their own communities, have nearly tripled, from 6,650 to 17,700 since 1960.

The problem really started with the revolt of the ultraliberals in January 1975 against the seniority system, and the House has grown increasingly ineffective ever since. Committee chairmen were stripped of authority and traditional discipline was discarded. Under the guise of reforms, the machinery of the House was dismantled and scattered. The result has been chaos instead of the smoothly efficient legislative procedure that was promised.

The House rule that is the root of the problem actually goes beyond the decree quoted in the Time article.

As I understand the amendment to the resolution, it will provide the Post Office and Civil Service Committee with $902,500, which represents a net increase of $55,947 over actual expenses in 1980. The minority's share of that increase will be $18,649. The minority's share of the total committee budget is frill free. The total budget for our committee has been subjected to sharp revisions. I intend to vote for and support the levels of spending provided for in the amendment.

Mr. Speaker, I must repeat that.

The problem started in January 1975 with the so-called reform or Watergate class of Democrats. You remember, those of you who have been here for four terms. They ripped apart the authority of every chairman; took over entire operations at committee level, and since then the budgets have skyrocketed. The only way you will control all of these costs you are damning is to take away the authority of subcommittee chairmen and ranking members of subcommittees to appoint staff, give the chairman and ranking member of every committee the sole authority over staff. Take away from subcommittee chairmen the petty little dukedoms they have been allowed to create.

Mr. ANNUNZIO. Mr. Speaker, will the gentleman yield?

Mr. DERWINSKI. I yield to my colleague from Illinois.

Mr. ANNUNZIO. Mr. Speaker, the gentleman is making a very excellent statement. As you know, the Subcommittee on Accounts has no jurisdiction in the fact that these subcommittees were appointed.

Mr. DERWINSKI. I understand.

Mr. ANNUNZIO. I recall vividly where we passed the rule that no Member of the Congress could be chairman of two subcommittees. Because of that very act, we had 140 subcommittees or something like that established where we were going to spread it out, you see. But, then came the responsibility of funding these committees not only with staff, but office space, garage space, and so forth, and so on. So, I would appreciate what the gentleman from Illinois is contributing, the contribution that he is making, and I would want the other Members of the House, and especially the freshman class on the Republican side, to understand that that is not within the jurisdiction of the Accounts Subcommittee.

You see, once the subcommittees are established, once even a special committee is established, a resolution comes before our committee and we have to act. That is a legitimate request. We cannot challenge the integrity of another Member of the Congress when he says that this is what he needs in order to carry out his investigative and legislative oversight. So, I appreciate what the gentleman from Illinois is saying.

Mr. DERWINSKI. Let me say for the benefit of the freshman Republicans that Mr. ANNUNZIO, in handling this bill, is as pure as the driven snow. He is a great statesman. He is exactly right.

To repeat, here is the problem. It is House rule XI, clause 5(d), that gives the subcommittee chairman and the ranking members hiring authority.

The SPEAKER pro tempore. The time of the gentleman from Illinois has expired.

Mr. ANNUNZIO. Mr. Speaker, I yield 2 additional minutes to the gentleman from Illinois.

Mr. DERWINSKI. That is the rule that gives the chairmen and ranking minority members of subcommittees

total control over staff. That is where the proliferation has gone. That is where the abuse is, and that is why you have free-wheeling staff off in orbit against the policies of the chairman of the full committee. That is where the problem is in this House.

If we just give the chairman and ranking member of the full committee total authority and responsibility for the staffs of committees, we would save plenty of money.

□ 1530

You would also give the committee chairmen the authority to limit subcommittees and end that proliferation. There is no need to be mandating six subcommittees per full committee—again, all-autonomous dukedoms.

Mr. Speaker, I commend the chairman for doing a great job with an impossible assignment.

Mr. ANNUNZIO. Mr. Speaker, I yield 3 minutes to the chairman of the Committee on Merchant Marine and Fisheries, the gentleman from North Carolina (Mr. JONES).

Mr. JONES of North Carolina. Mr. Speaker, I thank the gentleman for yielding this time to me.

Mr. Speaker, I had not intended to appear here this afternoon to make remarks in connection with this budget, but since some remarks have been made by my good friend, the gentleman from Texas (Mr. COLLINS), regarding the results and the action of the committee that I have the honor and privilege of chairing, I feel compelled to answer those in some part.

Of course, Mr. Speaker, I appear here today to support the Wright amendment to House Resolution 115, which contains the funding for the Committee on Merchant Marine and Fisheries for the coming year.

The Wright amendment requests $1,581,241 for our committee. This is 6 percent less than authorized in 1980 and is virtually the same amount as last year's expenditures. Now, these numbers do not take cognizance of several important new realities.

First of all, they do not highlight the fact that the members of the committee have reversed direction in terms of personnel policy. We have now reduced staff. I did that personally. Upon assuming my duties as chairman, I took steps to remove from the payroll 22 employees, and only 5 of these slots have been refilled, for a net reduction of 17 at the full committee level.

Second, and most important to the gentleman from Texas (Mr. COLLINS) and those on the other side, we have taken careful note of increased Republican representation, which now represents 44 percent of our committee, and have raised the minority's allocation in a way deemed acceptable by committee Republicans. These are two important, if not landmark, reforms in the business of the Committee on Merchant Marine and Fisheries.

For example, last year the ratio of the Committee on Merchant Marine and Fisheries was 25 Democrats and 15 Republicans. In that year that allocation for the minority side was $98,000. This year, because of the changes in the composition of the House, the Committee on Merchant Marine and Fisheries has 20 Democratic members, plus 1 representative from American Somoa, and 15 Republicans. We are going from 25-15 to 20-15.

Now, as chairman of that committee, in an effort to be fair and equitable, we have increased and submitted to the Budget Committee an increase from $98,000 to $248,000 for the minority side.

So I say to my friends that on the Committee on Merchant Marine and Fisheries we are reducing our size and streamlining it, and we are being more than fair to the other side.

Mr. BADHAM. Mr. Speaker, I now yield 3 minutes to the gentleman from New York (Mr. CONABLE).

Mr. CONABLE. Mr. Speaker, I support the Frenzel motion to recommit and urge all my colleagues to do likewise.

Our constituents would be astounded to hear the oratory today which equates the effectiveness of this body with the degree of staff expertise and the size of the legislative bureaucracy that we are able to create to support us in our work.

We are the citizens' branch; we should remain the citizens' branch. It is inconceivable to me that we could ever in this body match the expertise of the executive branch or that we should even try to do so.

The proliferation of committees here to some degree has been the response to the fear that the executive branch would overshadow us. That fear is not soundly based, because it is rooted in a misunderstanding of our function as a coequal branch of Government.

We are supposed to bring to the deliberations of Government a citizen's understanding of the pattern-setting responsibilities that rest with the people.

I, myself, Mr. Speaker, acknowledge that the amount of money here involved is not a big deal, but as pattern-setters we have a responsibility which makes the vote at this time, under these circumstances, of considerable significance in connection with the issue of the size of Government, its direction, and our willingness to heed the mandate of the people.

Mr. Speaker, I certainly hope that all my colleagues will vote to cut back on committee size, not just as authorized but in relation to the actual expenditures last year. For that purpose, I urge support of the Frenzel motion to recommit.

Mr. ANNUNZIO. Mr. Speaker, I yield 3 minutes to the distinguished chairman of the Committee on Small Business, the gentleman from Maryland (Mr. MITCHELL).

Mr. MITCHELL of Maryland. Mr. Speaker, let me say to my colleagues that last year there was a very successful White House Conference on Small Business, and out of that conference there has been organized an ongoing group of small businessmen who intend to continue to come to the Congress to see that this Congress will deliver on the things that they need.

After I assumed the chairmanship of the House Committee on Small Business, I had the first of a series of informal meetings with representatives of those trade associations. They were delighted that that kind of contact was made, and out of that contact they feel that they have now a vehicle by means of which they can get directly to our committee the things that they want done.

I would suggest to the Members that any reduction in the patterns of funding for our committee would fly right in the face of that White House Conference and the aftermath of it—a conference that was fully supported by Republicans, because they recognize that small businesses have difficulties in this Nation.

There has been some talk about or responding to the will of the people, and I think we should. One way of responding is to go out to the people. Now, many of the organizations that come in here are affluent and they can come to Washington, but some are not, so I propose to have full field hearings where we can go out to the people to be heard. If this budget is cut, we are not going to be able to make that linkage that I think is so significant.

In short, what we did in our committee was to come in at last year's level and funding, and I feel that is not even going to be sufficient to get us through the year. However, I came in at that level in an effort to be prudent.

Let me make one other suggestion to the Members of the House. If we really want to be effective in reducing funding for committee staff, then let us do it legitimately. The Members can do what I am doing. I am having a study made in terms of the efficiency of the staff. I am having an impartial group come in and see how many staff people we need. Are we using them effectively? Do we need more, or do we need less? Could the duties be distributed in a better fashion?

That is a far more acceptable way to handle it than to simply accept the Frenzel amendment, which would just cut without any rhyme or reason.

So, Mr. Speaker, I oppose the Frenzel amendment, and I hope this House will fully endorse and support the Wright compromise.

Mr. BADHAM. Mr. Speaker, I yield 3 minutes to the gentleman from Pennsylvania (Mr. WALKER).

Mr. WALKER. Mr. Speaker, it seems to me that the gentleman from Illinois (Mr. DERWINSKI), who preceded me, hit the nail on the head. I think we have to talk somewhat more than just on the facts and figures of how much a percentage the budgets have gone up in these committees. I think we ought to be talking about some of the practical realities of all this business as well.

I think the main question we have to ask is: Are the taxpayers really getting their money's worth out of the spending we are doing?

Mr. ANNUNZIO. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I would like to finish my statement first, because I have a limited amount of time.

Mr. ANNUNZIO. Mr. Speaker, I will be glad to yield another minute to the gentleman.

Mr. WALKER. In that case, then, I would be glad to yield to the gentleman from Illinois.

Mr. ANNUNZIO. Mr. Speaker, I want to commend the gentleman for that statement and to tell him that this year, where we had no limit on subcommittees per committee, it has now been reduced to eight subcommittees, and that is a step in the right direction.

Mr. WALKER. Mr. Speaker, I thank, the gentleman for that particular addition.

What I would like to do is talk a little bit as a former staff member in the Congress. I would like to look at it from this standpoint: What are we getting in return for the money we pay for staff? Because much of this discussion around here has been on how much we are paying for staff in the various committees.

It seems to me, as a former staffer, that we have two kinds of staff people on Capitol Hill. We have generally those who do what the Members want done. They accept the guidance of the membership; they understand that the traditional role of staff around here is to do what elected officials assign them to do.

On the other hand, we have staff in this Congress who are essentially activists in what they do. They do things on their own. They set out to guide Members. They set out to do those kinds of things that they believe are important, and then they say to the Members, "Won't you take up this particular cause?"

It seems to me that as we have gotten more and more activists on our staffs around here, we have gotten bigger and bigger budgets, because what we have had is a need to expand the amount of staff and support in order to do all the things that the staff thought up in the first place.

I think that the real role of Members that we are talking about here today is: Are we going to begin to jealously guard the time of the membership again? I think that is the wisest use of tax money.

We ought to be doing what we say should be done. We ought to be doing the kind of things we have determined are in the national interest and are the real national priority. We ought to be setting the priorities for this Nation, and we ought to be telling staff that this is where we want to go.

But what we have had is bigger and bigger staffs, and we end up then justifying the work they are doing by adopting their studies as they come forth with all these good ideas. We say, "Well, we have got to adopt these things because, after all, they put in the time. We paid for all this." And we, therefore, lose some control within the system, and really I think where we are now is that we have arrived at a time when more does not necessarily mean better.

The SPEAKER pro tempore. The time of the gentleman from Pennsylvania (Mr. WALKER) has expired.

Mr. ANNUNZIO. Mr. Speaker, as I promised, I will yield 1 additional minute to the gentleman from Pennsylvania (Mr. WALKER).

Mr. WALKER. Mr. Speaker, I thank the gentleman for yielding me this additional time.

We really have gotten to the point where more does not necessarily mean better, because what we have gotten is a lot of things that we did not determine should be done in the first place.

So I think that we ought to send a signal that we are going once again to assert ourselves, and that we are going to take control of our time and of our resources. We should do so, because I think that will result in a better legislative product. But we should also do so because the public expects us to exercise restraint not only in the total public purse but starting right here in our own purse.

Mr. ANNUNZIO. Mr. Speaker, I yield 3 minutes to the chairman of the Committee on Agriculture, the gentleman from Texas (Mr. DE LA GARZA).

□ 1545

Mr. DE LA GARZA. I thank the gentleman from Illinois.

Mr. Speaker, I am somewhat concerned as chairman of the Agriculture Committee at some of the ways the debate has gone today in dealing in generalities and speaking in the abstract and sometimes, I might say, even in a vacuum. Every one of us that is here was either elected or reelected, whether you are a freshman Member or a nine-termer like I am. We were out in the hustings. We heard the blare of the bugle. We heard the drum and we heard the word charge to reduce expenditures, the same as any freshman or second-termer or any other termer; so I would like to give you the anatomy of how a committee budget comes about.

First, and I just inherited this position, the honor and privilege of being chairman of the committee. I visited with the subcommittee chairman and visited with staff. We looked at the budget from last year. We went item by item, where can we cut, where can we cut?

The Speaker told me we had to cut. The majority leader told me we had to cut. The chairman of the House Administration Committee told me we had to cut. The chairman of the Accounts Subcommittee told me we had to cut. My people told me we had to cut. My wife told me we had to cut. So there I was. We went item by item, how can we reduce, how can we reduce?

Then when we had done that, I sat down with my ranking Republican Member and he and I went item by item, item by item. We came eventually to an increase of 5 percent of which the majority of Accounts Subcommittee reduced under their criteria.

Now, our committee did not spend everything that it was allowed the last session, so if you would go with this motion to recommit, you are penalizing frugality. You are penalizing those that did what the people wanted us to do last time.

All this talk about making it partisan is absurd. We have 12 committee staff on our committee. Six are Republicans and six are Democrats. The subcommittees, which is imposed by rule on us, of the 14, 8 are Republican, 6 are Democrats, so you cannot deal in the abstract. You have to go committee by committee. You have to look at what everyone has done.

I resent the fact that those that have used percentages of 300 and 600, whatever hundredth percent, they do not look at the individual committee. They do not look at the individual figures. In our committee 78 percent of our staff is imposed on us by that rule of the subcommittee, 78 percent.

The SPEAKER pro tempore. The time of the gentleman from Texas (Mr. DE LA GARZA) has expired.

Mr. ANNUNZIO. Mr. Speaker, I yield 1 more minute to the gentleman from Texas.

Mr. DE LA GARZA. I would like to clear one more thing, because one of my colleagues mentioned that the people may not know what is going on out there, that may be listening to us today, and that is, we do not know where our subcommittees are going to need to go in the course of 1 year; so frugally we say we need hopefully this much for travel. We will cut down if

we can, but we do not know where you are going to have a disaster, where you are going to have a flood, where a subcommittee might need to go. That is one of the areas that we have to deal with, hoping that you can reduce.

So I would tell you that as a responsible action of our committee and of the House Administration Committee, there will be a motion presented by the gentleman from Texas, the majority leader, but even that, I think, is unjust because we were handled properly by the House Administration Committee, but that is slightly more just than if you go to the 10 percent that does not take into account the responsible committees of this House.

Mr. BADHAM. Mr. Speaker, I yield 10 minutes to the gentleman from California (Mr. LUNGREN).

Mr. LUNGREN. Mr. Speaker, sometimes listening to some of our esteemed colleagues on the majority side of the aisle, I am reminded of Abbott and Costello's routine of "Who's on first and What's on second" and so forth.

I am somewhat confused trying to figure out exactly where they are going or trying to lead us. They have suggested that they came in with a bare minimum budget that they could possibly live with, and yet they tell us they are going to vote for Mr. WRIGHT'S commendable committee cuts; so evidently they are saying that even though they came in with their minimum, they are able to at least live with the Wright minimum. This suggests that perhaps we ought to assist the previous gentleman's home situation and help him agree with his wife even more by helping him cut even more. He indicated to us that he was hearing from everyone, even his wife, that we ought to cut. We would like to assist him in doing that.

Mr. DE LA GARZA. Mr. Speaker, will the gentleman yield?

Mr. LUNGREN. Yes, I would be happy to yield.

Mr. DE LA GARZA. I appreciate that and I would welcome any assistance the gentleman can give me, but that assistance has to be done in the House with the rule that imposes on our committee 78 percent of the staff.

Mr. LUNGREN. I appreciate what the gentleman is saying and to that I can only respond that sometimes you cannot pick and choose exactly where you have to fight.

If we have the opportunity here to have brought before us the question of how we reorganize this House, I think maybe all of us, from what I have been hearing from many of the chairmen of the committees would join to try to reorganize this place. If that is going to be a combined resolution of the chairmen on the majority side, let us know about it, because we would certainly like to assist you in that; but I must confess, I cannot hold my breath to wait for that, because I like to breathe once a year, at least. I think we would be in some difficulty waiting for this.

I think the fact that the House Administration Committee has done what it had done with its own budget is proof that we have a symbol for the rest of us to follow. We in the House ought to be a symbol for the executive branch. We in the House ought to show them that we are willing to take the first step and have them follow us.

Now, the House Administration Committee has done that. I am just very sorry that other committees have not followed that lead. We would certainly appreciate it if we would be given the opportunity to assist the House Administration Committee in following through and making it not just a symbol, but making it a reality.

I must tell you, Mr. Speaker, that 2 years makes a tremendous difference. I recall being a freshman here and talking about the fact that the Rules Committee had asked for a 2,600-percent increase, because they found it necessary. They have got two subcommittees now that are fully staffed, I understand, and not one piece of legislation came forth from those subcommittees last year.

You wonder, are we overstaffed in each committee? I wish we could go committee by committee. That is what we asked in the last go-around when we talked about the rule. We were prevented from going committee by committee, which I now hear many of the chairman getting up and saying would have been the fairest thing to do. We did not set those rules. Those rules were imposed upon us, as the previous speaker said. We have got to deal with what we have. And what we have now is an effort made, a good faith effort by the chairman of the appropriate committee and the chairman of the subcommittee and by the majority leader to at least lead us somewhere. We are going from nowhere to somewhere. That is progress, I suppose. But it is like finding ourselves in a swamp. With the Wright amendment at least we are going to grasp that one tree limb so that we keep our heads above water.

Well, I commend us for doing that. I commend the majority side for allowing us to do that, but what we are now saying is that grasping that tree limb is not enough. Let us get on solid ground and get out of the swamp and give the American people some reason to believe that we are really going to make an effort here.

The Frenzel recommittal will give us that opportunity. It does not cut the House. Look at it. There are several committees that have no cuts whatsoever. There is agreement on both sides that those should not be cut; but as to others, we are making a good faith effort to try to show how we would have come to a resolution if we would have been given an opportunity to look at each committee.

The other thing that comes to mind is that each committee chairman comes down here and give us a 5-minute explanation of his committee. We need at least an hour to go over every committee, but we are denied that opportunity by the rule. So we are in the proverbial point of being between a rock and a hard place. Should we just cave in and say, well, since the rules are against us, since the chairmen feel that they are imposed upon by the Rules Committee, all we can do is give up and go home. I do not think anyone would suggest that we do that.

We ought to follow the lead of Mr. FRENZEL and vote for the recommittal.

Now, unfortunately, I have heard some words here that I think are very disturbing. Some have suggested, and there are rumors about, that if we adopt the Frenzel motion, Republicans are going to suffer. We are going to take an equal or 50 percent share of the cut.

Well, really, is that equity? Is that fairness?

Let us go down the party ratios on the investigative staffs, because some have talked about how fair it is. The Aging Committee, 73 percent of the staff is Democratic.

Agriculture, 71 percent.

Banking, 77 percent.

District of Columbia, 83 percent.

Education and Labor where we heard there is equity has 91 people on the investigative staff; 76 are on the Democratic side, 15 on the Republican side.

You can go on with Energy and Commerce. There are 135 members; 120 of them happen to be given to the Democratic side. You can go on and on and on.

I know why we do that. We all know why we do that. I know that is why it puts a lot of pressure on Members on our side of the aisle to dare go against what is happening; but you know, we ought not to play those kinds of games. We ought to really decide here that there are cuts that have to be made and if they are made, and maybe this is a voice in the wilderness, they ought to be made on the same ratio that presently exists with those investigative staffs. I mean, how can we honestly go home to the people and say to them, "Look, we are trying to be fair."

Some suggest we have 3 people on the Republican side, 47 people on the Democratic side of the aisle so each side is going to lose 2 people. Now, that is not reasonable, but we know that perception is going on and we really should shy away from that.

Really, when you look at this week's U.S. News & World Report, you see that they have a study on middle

America. Those are the people in this country that are now making less in purchasing power than they did in 1970; accountants, chemists, engineering technicians, classroom teachers, typists, bank tellers, clerical workers, retail sales persons, printing and publishing workers, tire manufacturing workers; this is middle America. These are the ones we are supposed to be concerned about; so while we have made sure that we have gone far above inflation in the people that we hire and the money that we pay, our people back home suffer. What kind of a signal is that to them? It is not a very good signal at all and we ought to really try to build on the work, the good work that has been done by this committee and the subcommittee and particularly the chairman. I know it is going to be difficult.

If I could cite my colleagues to an article that appeared in Time magazine in Hugh Sidey's column, he said this:

Never has Washington seen such an army march down its old avenues, the soldiers clad in pinstripes and shod in Guccis. Not in all U.S. history have such unusual political alliances been formed as those now taking to the barricades against Ronald Reagan's budget cuts.

We may not have been shod there in Guccis, but we certainly attire ourselves in pinstriped suits. It is kind of interesting that when I hear people talking down there in the well you would think we were discussing food stamps. You would think we were discussing taking food out of the mouths of babes. We are not talking about that. We are talking about getting our house in order.

I have heard the suggestion that it will be a terrible thing if some people lost their jobs. Is this Nirvana? I mean, do you get a job here in the House and no matter who is elected and who is defeated, you stay here? We know that cannot take place. We know that these people are good people. We know that they are qualified people or they would not be here. I, for one, believe and have more confidence in their ability to get a job in the private sector if they should leave us. I do not think we should besmirch their reputations by suggesting that if we cut the staff here these people would be unable to function in the private market. We know they probably would be able to do a very good job there and perhaps give people on the outside some notion of what we do here.

Lastly, I will just close with a quote that was found in Hugh Sidey's column. He talks about a man named Bob Komer whom he describes as a former New Frontiersman for John Kennedy, former Great Society warrier for Lyndon Johnson, and former Under Secretary of Defense for Jimmy Carter. Obviously this man is not to be confused with a neoconservative or conservative Republican, and he said this:

If we don't first take care of the economy and our national security, there ain't going to be school lunches for anybody.

He is talking about our overall quest in attempting to get our total Government house in order. What we ought to be deciding here is whether we are going to give some symbol of leadership to the the executive branch to show them that, yes, we are not just talking about the Government's overspending, we are going to do something about it.

Who cares what the Senate did? Who cares what they have done in years past? To assume that if we take the cuts today asked by Mr. FRENZEL's recommital that we are somehow going to devastate our committees, suggest that every increase we have had over the last decade has been a reasonable one. I doubt anyone can suggest that. When a committee can get a 2,600-percent increase in 1 year and come back for more and more, 1 year and then the next year, and shy away from any attempt to bring some reasonable fiscal restraint to itself, how can we stand up and say to our people back home proudly, "Yes, we are doing our part." We are not doing our part. We have made one hesitant step with what the committee has done. Let us take a real big step for the rest of our constituents.

Mr. ANNUNZIO. Mr. Speaker, I yield 5 minutes to the distinguished chairman of the Committee on the Interior, the gentleman from Arizona (Mr. UDALL).

□ 1400

Mr. UDALL. Mr. Speaker, in the history of this country and in the history of the House we have had a swing of the pendulum every generation or two. I remember Woodrow Wilson when he was a professor back at Princeton wrote an article in the 1880's talking about congressional government. The problem was, he said, the House and the Senate, and the committee chairmen, had too much power and too little was vested in the Presidency.

When I came here, we were in the situation of an imperial Presidency, so-called, in which everyone lamented the lack of power in the House and in the Senate. We began to change that. We got back the power to make war. We established the congressional budget process.

I remember one day going over to a hearing, and the limousines arrived from the Pentagon and disgorged 20 witnesses, and they would come into the hearing room lined up in a 1, 3, 7, 22 formation. They had green books with questions to ask or responses to questions that I had not even thought about, and I did not have anyone to help. I was a member of the committee. I had no one to help me ask intelligent questions. I thought that was the way the House functioned. And I helped start to a modest degree giving our House Members more staff, getting committee expertise so that when the military or the Post Office or the Secretary of the Interior came to testify, the Congress would have the resources to answer them and to help really make public policy.

I guess maybe the pendulum has swung, and perhaps we might have overshot a little bit. But we have striven to get a balance between the need for expertise, which clearly the Congress had to do something about, and on the other hand the public has got a right to expect that we not have staffs which are too large and that we run a tight ship.

So I am here to support the Wright substitute.

Our Committee on Interior and Insular Affairs has a big chunk of important legislation. I have not checked it out this year, but regularly year in and year out our committee will produce about one-fourth of all the public laws that are passed by a particular Congress. We asked for $1,400,000, and the committee cut us down to a little over $1,200,000. We have parks and public lands. A third of the land in the United States is owned by the Federal Government. We deal with that.

The great gentleman from Texas has water and power, and a big chunk of the energy problems of the committee. And we have a minerals crisis on our hands, and our subcommittee chairman, the gentleman from Nevada (Mr. SANTINI) is trying to set a sensible minerals policy. We have important Indian jurisdiction. I think we are doing a pretty good job, and I do not think we are overspending on our committee. If you cut us much deeper than we have already been cut, you are going to find we will not be able to deal as we would like to with these very important questions.

So I think this debate today has perhaps been useful. There is a lot of feeling among Members that staffing is out of hand and we ought to make drastic changes. I think if we support the Wright substitute, we will come out at the balanced stage we ought to be.

Mr. Speaker, I yield back the remainder of my time.

Mr. BADHAM. Mr. Speaker, at this time I yield 4 minutes to the gentleman from Louisiana (Mr. MOORE).

Mr. MOORE. Mr. Speaker, today we witness the practice of what I believe could turn out to be a fiscal sleight of hand in setting the 1981 budgets of the committees of the House of Representatives. To name the terms of House Resolution 115 as being in tune with "fiscal discipline" as defined by this present administration, or expect-

ed by the American people, is reminiscent to me of a lesson taught the late Howard Hughes years ago when he built the famous *Spruce Goose* seaplane. It looked good; it made noise; it churned up plenty of water; but it just would not fly no matter how hard he tried. It was too big.

This budget is too big, and this is not literally the *Spruce Goose*, but it certainly is a stuffed goose.

I suggest that House Resolution 115 should not fly for several reasons. First, this is the first time committee funding resolutions have been consolidated in one bill to protect those individual committee funding levels that would not be able to pass in the House on their own. Aggregate funds for committees amount to nearly 12 percent more than spent by all committees last year. When you factor in a 19-percent cut over funds actually spent by the Committee on House Administration, you begin to realize how really big those increases are.

I wish to commend the Committee on House Administration for this 19-percent actual cut in their own internal operations, and I believe their work should not go unnoticed by any of my colleagues.

Second, it is customary to see that appropriations for programs be substantially lower than authorized levels. For fiscal year 1981 the Congressional Budget Office advises me that appropriations were exceeded by authorizations by some 40 percent. It is an old political game. You always authorize a larger figure than you intend to spend so when you make cuts, you make cuts in the authorization level and you never hurt the spending you intend to do. For that reason an amendment which will be offered later today that would cut the authorization level by 10 percent could turn out to be illusory in terms of really getting at a cut in the spending. A cut of 10 percent of the authorization level is not a cut in actual spending and would actually bring the authorization level this year just slightly more than the spending level of last year. Therefore, there is no cut in spending. There could even actually be a slight increase.

In my humble opinion, we do need to cut spending, not increase spending, or not even spend the same amount as last year.

Third, finally, and most importantly, tomorrow we are going to be asked to vote here in the House on the denial of an April 1 dairy price support. Dairymen in my district have a herd size averaging about 100 milk cows. They make a net income of about $100 per each cow. That comes to $10,000 a year income. I intend to vote to deny those dairymen in my district that April 1 increase for the sake of the Nation's economy. But I cannot really look at today's funding resolution and say by any standard that our work has imposed the same amount of fiscal discipline on us as we are going to apply to those dairymen in my district tomorrow, or really anywhere else in the President's recommended cuts. How can we deny those farmers or the participants in many other programs and cut Federal spending by $56 billion, or 9 percent, as the President proposes, and not really cut ourselves? Cut the people, but fool the people rather than cut ourselves.

The motion to recommit proposes a real cut of 10 percent below last year's actual spending. Only if the motion to recommit is implemented will sufficient cost savings be applied to genuinely assure the public that it will not have to endure cuts beyond those taken by Congress itself in an area that has grown from a cost of $6.3 milion in 1970 to $30 million just one decade later. We in the House must lead the way, not circumvent the way by illusionary cuts.

Mr. ANNUNZIO. Mr. Speaker, I yield myself 1 minute.

Mr. Speaker, I take this minute as we close debate today to extend my deep appreciation to the chairman of the full committee, the gentleman from California (Mr. HAWKINS); to the members of the committee on the majority side; and especially to the ranking minority member, the gentleman from California (Mr. BADHAM) on the Republican side, the ranking minority member of the Subcommittee on Accounts. He was present at all of the meetings. He has worked long and hard. He has been very diligent and very cooperative. I think we came to the floor of the House with a product that the subcommittee can be proud of. There are people who might disagree with it but, nevertheless, the subcommittee worked hard. Everybody worked hard. I want to thank them for their cooperation.

Mr. Speaker, I yield such time as he may consume to the gentleman from Michigan (Mr. FORD).

Mr. FORD of Michigan. I thank the gentleman for yielding.

Mr. Speaker, I rise in support of the resolution and the Wright amendment.

Mr. Speaker, if my colleagues will indulge me for a few more minutes, I should like to make two additional points, first dealing with the justification for the budget for the Committee on Post Office and Civil Service, and second, to set the record straight regarding some rather unfortunate language contained in the minority views of the report accompanying this resolution.

The 1981 budget for the Committee on Post Office and Civil Service was developed with the approval and participation of the ranking minority member, Mr. DERWINSKI, as well as the respective subcommittee chairmen.

That budget reflected the committee's determination to markedly increase its legislative and oversight efforts during the first session of the 97th Congress.

That budget also carefully reflected the new responsibility as well as the immediate and substantial challenges facing the committee during the next year.

That budget will unfortunately be drastically reduced by the adoption of House Resolution 115 and the leadership amendment. That reduction, Mr. Speaker, is not 10 percent or 30 percent or even 40 percent; it is a reduction of 45 percent.

The committee is fully cognizant of the relationship between a committee's budget in the past Congress and its present level of funding. So while the committee will receive a decrease in funding from last year, it must prepare to deal with new and important matters pending before the committee:

The contract of the air traffic controllers expired on March 15, 1981, and airports may eventually be closed down; these negotiations are within the committee's jurisdiction.

The various labor contracts of the U.S. postal employees expire on July 20, 1981 and national mail service may be halted; these negotiations are also within the committee's jurisdiction.

The question of pay for Members, the executive branch, and the judiciary remains before the committee.

With the change of administration, the provisions of the Civil Service Reform Act must be implemented and oversighted for the first time; this act is within the jurisdiction of the committee.

The lawsuit brought by Common Cause to declare the congressional frank unconstitutional is approaching a conclusion; the supervision of that lawsuit and the necessary increased monitoring of Members' use of the frank are before the committee and the Franking Commission.

None of the matters set forth above was before the committee during the last Congress. They represent new and important responsibilities that must be met; they represent a confluence of events—sensitive labor contracts expiring within months of one another, a once-a-decade census and redistricting responsibility, a change in administration, the approaching trial of a vital and sensitive congressional lawsuit—that may well double the work of the committee.

In addition, the committee's seven standing subcommittees will continue their legislative and oversight jurisdiction over all aspects of the Post Office, Civil Service, and the census, as highlighted below:

Response to the administration's proposal to eliminate the postal and revenue forgone subsidies, which may eliminate Saturday mail delivery;

The Civil Service retirement system, including frequency and indexing of cost-of-living adjustments, social security coverage for Federal employees and Members of Congress, and appropriate minimum retirement ages;

The administration's proposal to completely reform the Federal pay and benefit systems;

Review of the anticipated administration proposal for revising position classification in the Federal Government;

Oversight of implementation of the merit pay system and the SES bonus system;

Oversight of changes in the Federal employees' group life insurance program;

Reauthorization of the Federal Government's use of alternative work schedules—flexible and compressed workweeks;

Oversight of the Federal Government's use of contractors and consultants, and resultant effects on Government productivity and service to the public;

Oversight of implementation of Foreign Service Act of 1980;

Continued oversight of the census undercount and monitoring of redistricting litigation;

Oversight of proposed Postal Service expenditures in excess of $1 billion to implement the nine-digit ZIP code and electronic mail services.

The committee also has the responsibility for staffing and administering the Commission on Congressional Mailing Standards, chaired by Mr. UDALL. This bipartisan Commission has statutory responsibility for reviewing Members' newsletters to determine whether they are in compliance with the provisions of title 39, United States Code, relating to the use of the franking privilege. The committee intends to intensify the Commission oversight of Members' newsletters. The Commission also has the responsibility to adjudicate complaints alleging abuse of the frank and is representing the House in the lawsuit brought by Common Cause to declare the frank unconstitutional—Common Cause against the Postmaster General.

And so, Mr. Speaker, with these massive new responsibilities in my first term as chairman, the committee will have a lesser authorization than last year—but we will meet our commitments. The subcommittees and Franking Commission will have less funds than last year to operate; the full committee will have to reduce staff, committee expenses, and travel. The committee will attempt, to the best of its ability under these financial restraints, to meet the promise of our original budget justification presented to the House Administration Committee.

Second, Mr. Speaker, a brief attempt to set the record straight regarding some unfortunate language contained in the minority views of the report accompanying House Resolution 115, dealing with the investigative funding for the Committee on Post Office and Civil Service.

For the record, it is important to restate that the purpose of the proposed Redistricting Data Center was to provide a bipartisan staff which would give all Members a chance to conveniently obtain accurate tools and information by which they could analyze any redistricting proposals emanating from their States. There was never any plan that this staff would attempt to develop an overall redistricting strategy for a State or in any way attempt to usurp any State responsibility.

However, for the minority views to indicate that it is illegal for an entity representing the House of Representatives to provide a service for census information, maps, and population data to Members who are confronted with a redistricting plan or plans is a distortion of the rights of Members or of the House and to suggest that the committee got "a free gift of unneeded staff" totally ignores our testimony before the Accounts Subcommittee and the original action by the House Administration Committee to cut $461,000 from our budget. I invite anyone to show me the extra staff. Indeed, our majority investigative staff numbers exactly the same as last year: 10. And that I might add, Mr. Speaker, is one of the smallest investigative staffs in the House.

Mr. ANNUNZIO. Mr. Speaker, I reserve the balance of my time.

Mr. BADHAM. Mr. Speaker, I want to thank the distinguished chairman of our subcommittee, the gentleman from Illinois (Mr. ANNUNZIO), for his kind words. His efforts have been herculean. I know he has tried hard, and I think next year we will try even harder.

At this time I yield 3 minutes to the gentleman from New Mexico (Mr. SKEEN).

Mr. SKEEN. Mr. Speaker, as a new Member of this body I am getting a little confused. I have watched an awful lot of posturing and what we call in our country toe dancing this afternoon in this body. We have gone over the figures several hundred times, and I am more convinced than ever that the words that I keep hearing around the Halls of Congress such as "responsibility to the people that elected us," and "the message that we got on November 4," had some kind of substance to them. It is recognized by Members of the majority as well as the minority that we do not have any monopoly on all the good guys or good gals, because it is hard for me to believe that my newfound friends over here on the opposite side of the aisle are not as cherubic as they look.

Who could distrust an honest face like that of the gentlemen from Texas, Mr. WRIGHT, or Mr. DE LA GARZA, or anyone else? Of course not.

But the point is this: The senior Members of my party have been telling me that there is a deviousness behind all that cherubic facade, and I am beginning to believe it, because, first of all, I hear another word around in this body, and that is "signal." What kind of signal are we sending to the people of the United States? If we are asking them to accept austerity and cuts, what are we going to do here in this body? I think that is the reason I am down here today to say that I got the signal, and I am sure that everyone in this body has received the signal.

The point is this, that if they are going to accept cuts, then we should start in this body by accepting cuts. One of the most overblown operations we have got is the committee structure, and there is not any doubt about it.

While I am at it, I want to say this to my friends, the gentleman from Texas (Mr. COLLINS) and the gentleman from Pennsylvania (Mr. JAMES K. COYNE) that not in one case has information that they have provided us been refuted accurately during the discussion this afternoon. Not once has anybody accurately refuted any of the data that we have been operating on.

Our point has been this: The $3 million across the board should be cut plus 10 percent from the expenditures for the committees last year. I do not think that is entirely unreasonable. But I cannot believe that the majority is trying to sit here today—or stand here, whatever you prefer—and tell us that what they are proposing is not like telling your wife that her credit card limit is $2,000, but we are going to save money by cutting that limit 10 percent. That is just about how much sense that makes in the program that we have been offering, and that is why I am going to go with the motion to recommit.

I yield back the remainder of my time.

Mr. BADHAM. Mr. Speaker, I now would like to yield 3 minutes to the gentleman from Michigan (Mr. DUNN).

Mr. DUNN. Mr. Speaker, I rise today to oppose House Resolution 115 which would increase already bloated committee budget. Instead, I support the motion to recommit this matter with instructions to report back a resolution providing for significant cuts in committee spending.

Recently, I introduced a resolution, House Resolution 98, which would reduce total committee funding levels

by 10 percent from what was spent in 1980. Within 48 hours of my announcement, every one of my classmates on this side of the aisle had made clear their desire to support my resolution. Many distinguished Members from both sides of the aisle supported our efforts.

The foundation of this broad support is clear. My distinguished colleagues and I cannot, in good faith and without embarrassment, return to our districts and ask our constituents to cut back—knowing that we have approved an increase in our committee budgets.

Last November, the American people elected a President who promised to stem the growth in Federal spending. Several score of my collegues were elected, for the first time, on the same platform. We are now charged with the responsibility to act on this mandate and cut Federal spending.

The President has presented his program. He has asked every American to sacrifice. In return, he has promised, and I for one, believe, that the Nation as a whole will benefit.

Now we, the Congress, have the opportunity to shoulder our fair share of the Nation's economic burden, to sacrifice for the good of the Nation. Instead of asking more of the people we represent and less of ourselves, we are presented with the opportunity to lead by example. The depth of support for this brand of leadership is both noteworthy and gratifying.

I urge my colleagues to recognize that in these times of economic hardship we cannot act as if this is business as usual. We must oppose House Resolution 115.

Our distinguished majority leader, Mr. WRIGHT, will be offering an amendment to the resolution before us. It ostensibly provides for a cut of 10 percent from last year's authorized levels. No one here, however, is fooled by this proposal. We all know that the bulk of the proposed cut is taken from the House Information System, and that very little is actually cut from the committees themselves, this small reduction in budget authority, as offered by the gentleman from Texas, is insignificant when what we should be doing here is cutting spending.

I strongly support the efforts of the gentleman from Minnesota (Mr. FRENZEL), on his motion to recommit with instructions. This motion cuts 10 percent from last year's total spending level and is a serious attempt to get the spending of this House under control.

I would like to close by talking about two words. Those two words are "leadership" and "cut." My colleagues on the other side of the aisle seem to think they understand what the word "cuts" means. I challenge that statement. If they really think they know what cuts means, why do they not talk to the unemployed automobile worker? With 30 percent fewer employed than last year, there is a cut. When 75 percent of the people of this country cannot afford to buy an average house, there is a cut. I do not think this body understands insulated within these walls, the true meaning of the word "cuts."

The second word is "leadership." Are we so good as to say we are willing to pass laws to make sacrifices for the people out there and not live by the same laws? I challenge my colleagues on those two words.

The premise of our actions today should be clear. Those who would lead should do so by example, not by asking others to do something they themselves are unwilling to do.

Mr. Speaker, I yield back the remainder of my time.

Mr. BADHAM. Mr. Speaker, I now yield 3 minutes to the gentleman from North Carolina (Mr. JOHNSTON).

Mr. JOHNSTON. Mr. Speaker, as I listened to the debate on both sides of the aisle this afternoon, it became apparent that certain of my colleagues have tended to translate quality of legislation into dollars spent or time devoted to the effort. I have to admit in my own life that in many instances what I lacked in dollars I had to make up by hustle. I found that it was worth the effort. It was an effort worthwhile in that it kept me lean, mean, and trim, and perhaps the Congress of the United States, that has asked other people to cut back and lean down, could engage in the same exercise on its own behalf.

□ 1615

One thing is for sure: The proliferation of committees has, in my considered opinion, probably reduced the quality of legislation.

Last week, at one time, I was scheduled for two task forces and one subcommittee. It was obvious that my constituents were not getting their money's worth because I could not be in three places at one time. Perhaps if we had less staff dreaming up fewer hearings, those of us who are seriously interested could make a few more of the hearings.

The staff has to justify its existence by creating these hearings and creating position papers. And one thing is for sure: In November of this year, what the American people asked for was not only less spending but less Government. And it does not take a very sophisticated position paper to repeal a law. The tyranny of Washington can be just as great as the tyranny of George III. And the American people are ready to be free once again. But as long as we have more staff creating more laws, more rules and more regulations, they will never be free again.

● Mr. MONTGOMERY. Mr. Speaker, as chairman of the Committee on Veterans' Affairs, I will support the resolution to provide funds for House committees to conduct studies and investigations within their respective jurisdictions during this first session of the 97th Congress.

Much has been said about the large budgets of some committees of the House, and it may be true that some committee staffs have grown too much over the years. I am sure the chairmen and ranking minority members of all committees have done the very best they could to keep their budget requests as low as possible. I know that is the case with our committee. It appears that some have been more successful than others.

The amount contained in this resolution for the Committee on Veterans' Affairs is only $359,551. Is it enough? It is if we do not fill four staff positions authorized for chairmen and ranking minority members of the committee by the rules of the House. Mr. HAMMERSCHMIDT and I requested the appropriate amount when we appeared before the Accounts Subcommittee, but the amount approved and contained in this resolution will not allow us to fill these positions. I simply want the record to take note of that fact. When the rules were changed to provide these slots, I was a subcommittee chairman. I was not an advocate for the rule change; however, if the House provided the slots, I think the House should be willing to provide the funds to fill them.

We will not be able to conduct our oversight activities to the degree we think we should, but we will do the best job we can. Our committee has only 34 staff members including clerk hire, professionals, clerical, and investigative. Our staff is probably the smallest in number, although the committee has jurisdiction over the largest single independent agency in Government.

The Veterans' Administration has the second largest number of employees—second only to the Department of Defense. We oversee an income maintenance program of more than $11 billion. The Veterans' Administration operates the largest centrally directed health care system in the Nation, consisting of 172 medical centers, 1 independent domiciliary, and 49 satellite or independent clinics. All medical centers provide hospital and outpatient care, 92 operate nursing home care units and 15 operate domiciliaries.

The agency oversees one of the largest education programs in the world. In fiscal year 1979 nearly 1.3 million veterans and active duty personnel received educational benefits under what is commonly termed the GI bill.

The VA is one of the Nation's largest providers of housing assistance with its veterans' home loan programs.

Life insurance protection for the Nation's service personnel and veterans is provided under five separate programs administered by the VA and three programs supervised by the Agency. At the end of fiscal year 1979 these eight programs provided coverage exceeding $105 billion to nearly 8 million insureds.

The Department of Memorial Affairs of the VA is responsible for the national cemetery program, the headstone and marker program, the memorial marker and plot program, and the State cemetery grants program.

Of the 24 permanent and select committees included in the funding resolution, only the District of Columbia Committee has a smaller budget. As I mentioned earlier, it will be extremely difficult to carry out our oversight and legislative responsibilities under our budget this year, but we will do it. I fully recognize the need to cut back on expenses and I support efforts of the leadership to reduce expenses to operate the House. But it should be noted that the Committee on Veterans' Affairs is the one committee that has not substantially increased its staff and expenses over the years. The record clearly establishes that fact. In 1975 the House approved a budget for the Veterans' Affairs Committee of $460,000. This year, under this resolution, the committee budget would be limited to $359,551.

I am proud to have been a member of the committee under three great chairmen—the late Olin E. "Tiger" Teague, Bryan Dorn, and Ray Roberts. They were extremely careful with the taxpayers' money and I intend to carry out my responsibilities as chairman the same way they did—at the lowest possible cost to the taxpayers.

I want to commend the distinguished gentleman from Illinois, my good friend, FRANK ANNUNZIO, for the kindness he and other members of his subcommittee displayed when we appeared before his subcommittee earlier this month. The subcommittee has a tough and thankless job to do. In my view it does it well. All Members of the House appreciate the fine leadership of the very able gentleman from Illinois and the ranking minority member of the subcommitte, the distinguished gentleman from California, ROBERT BADHAM. I shall support the resolution.

COMMITTEE ON VETERANS' AFFAIRS, BUDGET CATEGORY SUMMARY

Description	1980 expended	1981 proposed
Salaries	$222,822.25	$360,930.12
Travel	46,242.34	77,750.00
Witness fees	0	1,000.00
Consultant fees	5,150.40	25,000.00
Duplicating	8,495.16	[1]
Equipment	20,602.25	36,000.00
Telephone and telegraph	307.12	1,500.00
Publications	1,264.35	2,000.00
Miscellaneous	321.75	700.00
House Information System charges	4,685.39	10,000.00
Total	309,891.01	514,880.12

[1] In 1981 Duplicating and Equipment categories will be combined since Office Equipment Service will be paying all equipment and duplicating charges directly.

REQUESTS FOR AND EXPENDITURES UNDER FUNDING RESOLUTIONS, 93d, 94th, 95th, and 96th CONGRESSES

Congress, year, and resolution number	Request	Approved	Expenditure	Unexpended
93d, 1973, H. Res. 134	$150,000.00	$150,000.00	$107,962.22	$42,037.78
93d, 1974, H. Res. 789	120,000.00	[1] 120,000.00	106,342.02	55,695.76
94th, 1975, H. Res. 164	460,000.00	460,000.00	120,237.28	339,762.72
94th, 1976, H. Res. 1048	354,762.72	354,762.72	152,048.06	202,714.66
95th, 1977, H. Res. 132	539,100.00	500,000.00	218,150.10	281,849.90
95th, 1978, H. Res. 957	500,000.00	400,000.00	278,725.78	121,274.22
96th, 1979, H. Res. 35	425,000.00	400,000.00	274,521.79	125,478.21
96th, 1980, H. Res. 537	427,490.00	352,490.00	309,981.01	42,508.99

[1] For the 93d Cong., funds unexpended from the 1st sess. were carried over to the 2d sess., making the 2d sess. total funding: $162,037.78.●

● Mr. HAMMERSCHMIDT. Mr. Speaker, as ranking minority member of the Committee on Veterans' Affairs I want the record to show that our committee has accomplished its responsibilities for oversight and investigation with a minimum of expenditures. The Veterans' Affairs Committee over the years has been frequently held up as a shining example of fiscal frugality and commonsense management.

I join the committee chairman, the gentleman from Mississippi, in his concern that we will be able to discharge our responsibilities with the amount we have been assigned in this resolution. The minority now has four subcommittee staff positions that are unfilled. House Resolution 115 initially contained sufficient funds for salaries for these positions as well as funds for necessary investigations.

Should the ranking members of these subcommittees elect to fill the four positions, then our ability to conduct needed investigations and studies with the remaining funds will be sorely taxed.

I applaud the leadership of the House for its drive to cut operating costs. The need to do so is well documented; however, our committee is being forced to pay a price for its past frugality when across-the-board cuts are made.

Like the chairman, I will support the resolution, but it should be crystal clear that the Veterans' Affairs Committee has, in the past, been prudent in its expenditures and will continue to be so.●

● Mr. GAYDOS. Mr. Speaker, by the vote to come, the House will begin a venture for which there is a collective will to success among the people—we have a command to rebuild America, from the inside to the outside, top to bottom, left to right.

Answering that order is an epic task that requires meticulous preparation because success will rise or fall on the preparation; and we will vote today on the quality of that preparation.

So this is an important vote and not a political game called rig the record.

And the importance of it makes it appropriate to give sincere thought to some age-old rules for success.

The first rule is, know what you are trying to do.

The second rule is, be sure you have the right tools for the work you want to do.

We are in the middle of debate that was heard countless times in preparing these budgets, and the argument amounts to justification for approaching our responsibilities less than wholeheartedly.

These justifications generally were: "we can't have the Senate cutting their committee budgets more than the House * * * we can't have budgets that show an increase, no matter how necessary, when we will be requiring the people to do with less * * * we can't duplicate bureaucracy * * * we can't explain doing business as usual * * *."

I place these arguments in a group I call the can't's.

Too often repeated, applied mindlessly for the record to too many situations, can't becomes cant, a particularly political manifestation of hypocrisy; and the holy writ that is the record of the people's voice become apochrypha, which can lead you into trouble in matters of faith and politics.

But on one thing the can't-sayers are right: we can't do business as usual.

We have to do business better than usual. Better than it has been done in

the tenure of most sitting in this Chamber.

Mr. Speaker, it is here we should apply the first rule: know what you are trying to do.

What do the people expect of us? What are we trying to do?

The list is not long, but is awe inpiring in its ambition.

We are expected to rebuild the Government, changing policies that have relentlessly hammered away chunks of our industrial base until the people fear the economy will fall of its own weight.

Yet our responsibility is to preserve what works.

We are expected to rebuild the economy, removing from that monument to energy and ingenuity the encrusted droppings of the years.

Yet our responsibility is to preserve the finely chiseled features of freedom, independence, and humanity as we rebuild.

We are expected to show a sterner face to the world, linking foreign policy and defense more directly to our self-interest.

Yet we must find the balance between what is necessary and a wrathful rapacity the people will not tolerate.

And we are expected to reorder the lives of all Americans as we cut budgets and taxes; by the way we cut, we will reorder.

Yet we are commanded to wield the knife carefully.

Everyone here swore just weeks ago to uphold the Constitution, which states squarely our only reasons for being in Congress assembled: "* * * to form a more perfect union, establish justice, insure domestic tranquility, provide for the common defense, promote the general welfare and secure the blessings of liberty * * *"

These are not things to be undertaken lightly or with guesswork or with poor tools.

Facts are our best tools, our only tools, Mr. Speaker. They are versatile. They are hard and they have life. They are father and mother to reason and truth. They are nail, hammer, lumber, forge, anvil, and blueprint.

Only in the clash of facts can we hear the ring of truth and only with fact can we build what is expected, what the customer has ordered.

Nothing else will do. The difference between factual and substantially factual is the difference between merit and meretricious.

Now facts, and true understanding of them, are not gifts. They are neither entitlements nor perquisites that accrue to Members of Congress when the election returns are certified or when the Member's button goes on the lapel.

For facts we must dig, and for understanding, dig deeper still. It is hard work. It is important work. False leads are many. To assist us in this work we have committee staff.

Work on committee and subcommittee is the most important work we have. Here we look at the facts, draw blueprints and build.

So we need strong committees, better committees, not weaker committees. We need to do business better than usual.

The recommendations before you from the Committee on House Administration are meant to deliver to the people, in accordance with their expectations and our oath to the Constitution, the best possible rebuilt America at the least possible cost.

And the committee budgets are built on fact, particularly when compared with what may be said about the Senate.

The House fact is, the investigative budget before you now for our committee work is 9.5 percent below what was requested by responsible chairman and 2.5 percent below what was authorized last year. That is economy.

But the Senate fact is, removing the smoke. Turning up the lights, looking up the sleeve, that the Senate has dropped below last year's authorization by only about 1 percent.

The House fact is, our committee staff will be about 6.2 percent below last year's levels and number no more than 1,661.

But the Senate fact is, considering their specially designed clerk-hire provisions, that the Senate will have committee staff numbering 1,734.

Senate facts often are not sharp tools. Their edge has a particular dulling slant, or cant, to it.

If we cut to a point 10 percent below last year's expenditures, as some would demand, we put the House and our oath at the mercy of the Senate, the White House, and the aggregate of some of the larger industries and organizations with which we deal.

To those who would say sincerity demands this 10-percent cut, I answer, make the same cuts in your personal office staff and spending, and then I will believe you are working at rebuilding and not merely playing rig the record.

Cut, outmanned, we will find ourselves unable to test important facts for cant or disguised flaw. To cripple the ability of the House to make sound independent judgment for political gamesmanship is irresponsibility verging on the reckless.

You must remember, the people are like a demanding military officer—they want results, not excuses.

So let us do it right the first time.

I say, let us do what we were elected to do. Let us be mindful of the Constitution, the expectations of the people, and the true nature—the almost revolutionary nature—of our marching orders.

And I say let us start by approving these budget recommendations and giving our committees the strength to dig out the facts however deep they may be buried.

It is a time in which we must do business much better than usual.●

● Mr. JONES of Tennessee. Mr. Speaker, I am one of the many Members of this body who recognizes the need to cut Federal spending of all types. Furthermore, I also recognize the need for this House to take the lead in doing so as a gesture to the rest of this Nation that we, as Members of Congress, are prepared to make the sacrifices needed to get Federal spending under control.

However, I also feel that the House Administration Committee and its Subcommittee on Accounts has done an excellent job in formulating committee budgets that accomplish the goal we want, and that is the reduction in spending for the House of Representatives. I know that there is a lot of talk about how spending in the House compares with the committee funding resolutions passed earlier this year for the other body.

The House Administration Committee recommendations are above those figures approved in the Senate by about $1.2 million, but there are some figures not included in the other body's committee funding resolution that I think are important and that should be recognized by all of my colleagues.

For example, each Member of the other body receives under its rules an allowance known as the legislative assistance allowance. That allowance amounts to $183,801 per Senator or $18.3 million a year above and beyond clerk-hire allowances and above and beyond the committee funding resolutions. Those funds are provided expressly for the purpose of providing staff support for committee activities. Needless to say, none of my colleagues in this body has this resource available.

In addition, the other body has a separate budget for the computer services provided to its committees. Funds allocated for that support service on the other side of the Capitol total about $17 million and is not reflected in the committee funding resolutions of the other body. Together those two items, the legislative assistance allowance and the funds for computer services total about $35 million, a figure that almost doubles the $41.6 million dollars approved by the Senate for their committees.

By comparison, our own committee funding resolutions include all funds for staff salaries and travel and all funds for computer services for individual Members offices and committees. That is an important factor to be considered today as we discuss the resolutions reported out of the House Administration Committee.

That committee has done its job in overseeing the budgets of the committees of the House and has voluntarily taken action to reduce authorizations for each committee. They are to be commended for that work and their actions deserve our support.●

● Mr. WALGREN. Mr. Speaker, as we consider a wide range of budget cuts proposed by President Reagan, from dairy price supports to foreign aid, the House of Representatives must look at its own budget and pare down spending as well. I support and will vote for the Democratic leadership amendment to cut the House's budget by 10 percent. This reduction is a 16-percent cut from the committees' requests.

I support this amendment for two reasons. First, as we ask the American taxpayer to help in the fight against inflation, we the elected officials must also do our part to bring the Federal budget under control. After all, our budgets come from the same place as those of our Federal agencies—the wallets and pocketbooks of hard-working Americans. It is unfair to ask everyone else to trim the fat without making sacrifices ourselves.

Second, I also believe that we can streamline the operations of the House, our offices and committees, rather than continuing to add, expand, and spend. We should be taking a hard look at our committees' structure and responsibilities. We should be working to eliminate duplication among the various committees. We should be moving to revamp outdated committees and committee jurisdictions to truly reflect the problems of the 1980's. Do we, for example, really need a committee concentrating on merchant marine problems, while responsibility for revitalizing our Nation's industries is fragmented and spread across many committees? I voted to eliminate the Select Committee on Narcotics on February 25, because it would have meant costly duplication in the House. The cost of this committee in the last Congress was $1 million. Yet, while I certainly agree that the goal of eliminating narcotics traffic and abuse is a high priority, I am not convinced that another House committee at that price to the taxpayer is the answer. Several other committees are working on this problem, including my own Subcommittee on Health and the Environment. We can control narcotics by beefing up the ability of those agencies that must deal with it—not by adding to our payrolls.

In short, Mr. Speaker, I will vote to cut House funding so that this Member of Congress can help stem a rising inflation and pare down our own bureaucracy.●

Mr. BADHAM. Mr. Speaker, at this time I know it will be to the delight of my colleagues and friends on the other side that, in thanking both the chairman of the full committee of the subcommittee for their friendship and hard work during this arduous and trying process, I have no more requests for time and I yield back the balance of my time.

Mr. ANNUNZIO. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The Chair now recognizes the gentleman from Texas (Mr. WRIGHT).

AMENDMENT OFFERED BY MR. WRIGHT

Mr. WRIGHT. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WRIGHT: Strike section 2 and insert in lieu thereof the following:

SEC. 2. The committees and amounts referred to in the first section are: Select Committee on Aging, $1,183,680; Committee on Agriculture, $1,184,840; Committee on Armed Services, $952,223; Committee on Banking, Finance and Urban Affairs, $2,414,919; Committee on the District of Columbia, $275,187; Committee on Education and Labor, $2,565,448; Committee on Energy and Commerce, $3,750,000; Committee on Foreign Affairs, $1,800,119; Committee on Government Operations, $2,229,402; Committee on House Administration, $1,219,000; Committee on House Administration—House Information Systems, $7,509,560; Permanent Select Committee on Intelligence, $938,700; Committee on Interior and Insular Affairs, $1,219,615; Committee on the Judiciary, $1,350,410; Committee on Merchant Marine and Fisheries, $1,581,241; Select Committee on Narcotics Abuse and Control, $540,000; Committee on Post Office and Civil Service, $902,500; Committee on Public Works and Transportation, $1,806,373; Committee on Rules, $530,738; Committee on Science and Technology, $1,820,928; Committee on Small Business, $776,000; Committee on Standards of Official Conduct, $450,000; Committee on Veterans' Affairs, $352,490; and Committee on Ways and Means, $2,252,000.

Section 6, subparagraph 1, after the word "expenses" insert the following: "(not in excess of $7,509,560)".

Mr. WRIGHT (during the reading). Mr. Speaker, I ask unanimous consent that the amendment be considered as having been read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

The SPEAKER pro tempore. Pursuant to House Resolution 116, the gentleman from Texas (Mr. WRIGHT) will be recognized for 30 minutes, and the gentleman from California (Mr. BADHAM) will be recognized for 30 minutes.

The Chair now recognizes the gentleman from Texas (Mr. WRIGHT).

Mr. WRIGHT. Mr. Speaker, the amendment I have just offered would reduce the total amount of authorizations granted for last year by an aggregate of 10 percent. We think this is an appropriate action for the Congress to take. This is precisely what the other body did. The other body reduced authorizations for this year exactly 10 percent below the amounts authorized last year. So we think it right and proper that we do the same thing.

It seemed to us that it would be fitting, at a time when Congress is calling upon all of the administrative agencies to demonstrate austerity, for us to give our own demonstration of austerity. When we are calling upon the departments of the Government to discipline their own spending, it seemed appropriate that we give an example of self-discipline.

When we consider that the cost of operating a congressional committee probably has risen during the past year by 6 or 7 percent, a 10-percent reduction below last year's authorized level probably amounts in real terms to a reduction of somewhere in the nature of 16 or 17 percent.

What we are doing is precisely what a group of Members on the Republican side of the aisle requested be done in a letter dated March 9 to Hon. THOMAS P. O'NEILL, JR., our Speaker. This group of 52 Members of the Republican freshman class, writing to Speaker O'NEILL, sent a resolution signed by all of them. That resolution begins with this "Whereas":

Whereas the Senate has cut its staff allocation for standing committees by 10 percent. . . .

It follows then with a second clause:

Whereas following the leadership of President Reagan, we believe the House of Representatives should be exercising fiscal restraint.

It concludes with the following resolving clause:

Resolved, That the House of Representatives should proceed to cut by 10 percent on the average the cost of the staffs of the standing committees of the House.

Well, that is just exactly what this amendment will do. It will cut by 10 percent, on the average, the authorizations for last year. We think it is a good example. We think it is an example of austerity.

Mr. DUNN. Mr. Speaker, will the gentleman yield?

Mr. WRIGHT. Of course I yield to my friend.

Mr. DUNN. A point of clarification.

The resolution offered by the 52 freshmen asked to cut staffs by 10 percent. That is what it asked to do. The gentleman just said his amendment would indeed do that, cutting the authorization of the staff by 10 percent. The gentleman threw an extra word in there.

A point of clarification. Is the gentleman saying the two points are the same?

Mr. WRIGHT. Perhaps I misread the resolution, but I think I read it correctly; at least I interpret it somewhat literally. The first clause is: "Whereas, the Senate has cut its staff allocation for standing committees by

10 percent," and then it resolves that we should do the same thing on an average. We are doing exactly what the Senate did in adopting my amendment. The Senate did not cut 10 percent below what was expended last year; the Senate cut 10 percent below what was authorized last year.

Now, let me address myself very briefly to the suggestion that a reduction should be made on the basis of what was expended last year. That would be sheer folly. That would set up a compulsion on the part of every committee to expend every penny it gets upon the theory that if it fails to do so, it will be cut even deeper when the cuts come. That would be the kind of a procedure that would reward profligacy and punish frugality. Therefore, on all counts, it would seem implausible in the extreme to base our reductions upon the question of how much actually was spent last year. Therefore, we are doing exactly what the resolution seems to call upon us to do, which is to do what the Senate did, and we are doing what the Senate did.

Mr. DUNN. If the gentleman will yield, my question. I will say to the gentleman, was on the resolution of the 52 freshmen and not the other body. Our resolution calls for a 10-percent actual cut. Forgetting the other body, I am talking about the 52. The gentleman made the statement earlier about the resolution of the 52 Congressmen. It did not talk about authorized-level cuts. It talked about a 10-percent cut instead. The gentleman made the statement that his amendment does that at the authorization level. I say there is a difference between the authorization level and what the resolution from the freshman class called for.

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that a copy of the resolution presented by the freshman Republicans be printed in the RECORD at this point.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. DUNN. I thank the gentleman.

The resolution is as follows:

RESOLUTION OF NEW REPUBLICAN MEMBERS OF THE 97TH CONGRESS

Whereas the Senate has cut its staff allocation for standing committees by 10 percent; and

Whereas following the leadership of President Reagan, we believe the House of Representatives should be exercising fiscal restraint: Now, therefore, be it

Resolved, That the House of Representatives should proceed to cut by 10 percent on the average the cost of the staffs of the standing committees of the House.

Mr. WRIGHT. I also ask unanimous consent, Mr. Speaker, that at this point in the RECORD there may be printed a table outlining by committee the 1980 authorization, the 1981 request, the action of the House Administration Committee for 1981, then a column demonstrating the percent of reduction below the 1980 authorization that this amendment which I offer would represent, and the final column showing in dollar terms exactly how much would be allowed to each committee by the amendment which is presently before the House.

In my opinion, the Accounts Subcommittee under the chairmanship of FRANK ANNUNZIO, did a truly excellent job in attempting to appraise the real and the legitimate needs of each committee.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

The table is as follows:

HOUSE ADMINISTRATION RECOMMENDATION

Committee	1980 authorization	1981 request	1981 authorization	Wright amendment percent below 1980 authorization	Wright amendment
Aging	1,233,000	1,322,000	1,233,000	−4	1,183,680
Agriculture	1,247,200	1,307,398	1,294,187	−5	1,184,840
Armed Services	827,000	1,042,000	952,223	+15	952,223
Banking	2,560,287	2,591,105	2,457,631	−5	2,414,919
District of Columbia	289,670	316,624	288,719	−5	275,187
Education and Labor	2,729,200	3,026,841	2,832,087	−6	2,565,448
Energy and Commerce	3,750,000	4,700,000	4,043,722	0	3,750,000
Foreign Affairs	1,875,124	2,049,948	1,888,609	−4	1,800,119
Government Operations	2,274,900	2,648,267	2,461,885	−2	2,229,402
House Administration	1,744,500	1,219,000	1,219,000	−31	1,219,000
HIS	9,881,000	9,531,000	9,000,000	−24	7,509,560
Intelligence	972,420	938,700	938,700	−4	938,700
Interior	1,316,679	1,448,214	1,295,293	−7	1,219,615
Judiciary	1,406,677	1,432,540	1,417,519	−4	1,350,410
Merchant Marine and Fisheries	1,682,171	1,850,476	1,700,414	−6	1,581,241
Narcotics	600,000	551,173	551,173	−10	540,000
Post Office and Civil Service	950,000	1,639,000	978,530	−5	902,500
Public Works and Transportation	1,870,000	2,175,000	1,870,000	−3	1,806,373
Rules	615,000	599,300	530,738	−14	530,738
Science and Technology	1,896,800	2,346,900	1,896,800	−4	1,820,928
Small Business	776,000	776,000	776,000	0	776,000
Standards of Official Conduct	500,000	450,000	450,000	−10	450,000
Veterans' Affairs	352,490	514,880	359,551	0	352,490
Ways and Means	2,252,000	2,918,109	2,450,782	0	2,252,000
Total	43,602,118	47,394,475	42,886,563	−10	39,605,373

Mr. WRIGHT. I think it would be demonstrated, by reference to this chart, that we have indeed reduced total authorizations by some $4 million below the amount authorized last year. That is what this is, of course. It is an authorization. To compare an authorization with another authorization is to compare an apple with an apple. To compare an authorization with the previous year's expenditure would be to compare an apple with an orange. So we are comparing apples with apples, and we are also doing exactly what the other body did when we reduce by 10 percent the total amount authorized last year.

I would suggest, once again, that I think that represents in real terms a reduction of some 15 or 16 or perhaps 17 percent in the amount available to each of the committees of the House.

We have tried to do this with some discretion. Not every committee has exactly the same burden this year as it had last year. Not every committee is being called upon for the same additional obligations this year. Obviously, this year the Committee on Armed Services is being called upon to exercise jurisdiction over a much larger budget and over new recommendations coming from the President of the United States. Therefore, we are recommending not a cut, but an increase of some 15 percent in the amount of money available for the Committee on Armed Services.

In that sense, we propose exactly what the House Administration Committee recommended for that purpose.

The largest single percentage cut, interestingly enough, is a cut of 31 percent which was voluntarily assumed by the House Administration Committee itself. Honoring the action of the House Administration Committee, we propose no change, and certainly no further cut beyond the 31-percent reduction voluntarily assumed by that committee in its own operating amounts.

The next largest would be a reduction of some 24 percent in the amounts available for what is known as the House Information Services. That is a conglomerate activity that has grown very rapidly, mushrooming into almost a $10 million authorization last year. And so we believe that it could sustain a reduction, and we have asked that a 24-percent reduction be applied.

A 14-percent reduction has been accepted by the Committee on Rules below the amount that was authorized last year.

So the important committees of the House—those which have had some purview already over this legislation—are demonstrating a good example. The Committee on House Administration and the Committee on Rules, notably among them, have voluntarily accepted larger than average cuts in order that some of the other committees charged with heavier than usual responsibilities might not have to assume cuts quite so large.

In that connection, I would like to suggest that the Committee on Ways and Means, which obviously has a larger burden than most committees in this particular Congress, faced as it is with a proliferation of recommendations for reductions in taxes, should not be reduced below the amount of last year's authorization. We think that it definitely is prudence and frugality that the committee is not raised, and it is not raised. It is allowed exactly the same amount under this amendment that it was allowed last year.

I want to suggest only that in the amendment which will be offered in the form of a motion to recommit by the Republican side, the gentleman from Minnesota (Mr. FRENZEL), would reduce the Committee on Ways and Means by some $500,000, approximately one-half-million dollars, or a 20-percent reduction.

We believe that the Committee on Veterans' Affairs should not be required to sustain a large reduction, and yet the amendment to be offered in the form of a motion to recommit by the gentleman from Minnesota would reduce it by some 25 percent.

The Committee on Government Operations, which serves as our eyes and ears, performs our oversight functions into the operations of the administrative branch of Government, would be reduced, according to the piece of paper that purports to represent the figures that will be contained in the motion to recommit by the gentleman from Minnesota, by some $650,000, or a reduction of some 30 percent in the amount available for the Committee on Government Operations.

□ 1630

And so it goes, committee after committee. Based upon this, it seems logical to me that the Members of the House, wanting to make a prudent reduction, wanting to make a good and noble and worthwhile example, wanting to show our willingness to tighten our own belts and our own capacity for self-restraint and for self-discipline, will want to support my amendment and thus to reduce the authorized amount by a total of 10 percent.

Surely we will want to oppose the draconian cuts which would rob the committees of the Congress of the muscle and the sinew and the bone that is necessary to conduct their functions.

Mr. Speaker, at this point I reserve the balance of my time.

Mr. BADHAM. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I am delighted that the distinguished majority leader would see fit to offer an amendment. I find the amendment eminently acceptable; hardly flawed. There is one flaw in it. The direction is superb. The verbage is fine. It just does not go far enough.

But as we learn from time to time, this is the only game in town and the only game in town I believe has been brought to the Members indirectly by the minority side which has conveyed to the majority side that the people out there want the fat cut from the Congress, want the fat cut from the departments of Government and want our Government returned to a lean, efficient body that should not be doing everybody else's business.

So, I am going to support this amendment because it is the only game in town. I hope that due credit will be given to the minority side that worked long and hard in its support of cutting the fat out of the committee system of the budget. I think we can take the responsibility safely for having the majority get itself in a mood where they have pulled all the budget resolutions in, all the committee funding resolutions, lumped them together and came up with an aggregate and then got the hot idea of saying maybe we ought to put a little cut on it. I think that is superb. It is demonstrative of the fact that the minority of this House does have some clout and can encourage in proper times and in proper terms the majority to see the light or to see the right, as it will in this case, to amend and actually reduce the authorizations and head back in the right direction, be it W-r-i-g-h-t or r-i-g-h-t. But I commend the gentleman for his amendment and say I am glad to see he is heading in the right direction.

Mr. Speaker, I yield such time as he may consume to the gentleman from Minnesota (Mr. FRENZEL), my stablemate and good friend.

Mr. FRENZEL. Mr. Speaker, my feelings about the Wright amendment are similar to those of my distinguished leader on the subcommittee, the gentleman from California (Mr. BADHAM). The majority leader's amendment does save the people a fair amount of money. I am trying to figure out how much it is. It is about $3 million, I think.

Mr. WRIGHT. Mr. Speaker, may I ask the gentleman to yield?

Mr. FRENZEL. I yield to the distinguished majority leader.

Mr. WRIGHT. Mr. Speaker, it is $4 million.

Mr. FRENZEL. Mr. Speaker, my figures would show that it is $3.3 million.

Mr. WRIGHT. If the gentleman deducts $39,653,073 from the 1980 authorizations of $43,602,000, the gentleman will get about $4 million.

Mr. FRENZEL. I thank the gentleman for his contribution. He is still erroneously comparing it with last year's authorizations.

Mr. Speaker, I think in this case the proper comparison is with the bill or the resolution that is before us, the House Administration resolution. If the Wright amendment is accepted, it will lower the total money in that resolution by $3.3 million.

The litany reads like this: In 1980 these committees spent $39.9 million. This year the requests by committee chairmen were $47.4 million. The committee resolution called for $42.9 million. The Wright motion calls for $39.6 million.

My motion to recommit will call for $35.3 million. That is a good direction, as the gentleman from California indicated.

We are delighted to have been helpful to the majority in pointing out the way. We are somewhat disappointed that their enlightenment has not been complete. They have moved an insufficient way toward true economy in our judgment. But we are delighted that they have moved at all, and, in the spirit of the day, we commend them.

I will be very pleased to support the amendment.

The Wright amendment makes token reductions in unnecessarily high spending by all committees—committee authorizations would still be $1.8 million above last year's expenditures, not including HIS.

The Frenzel motion to recommit makes real cuts of 10 percent from last year's expenditures and will save the

taxpayer $4.3 million from the amounts proposed in the amendment by Mr. WRIGHT.

Mr. Speaker, I place in the RECORD the following table:

TABLE OF COMPARISON

Committee	Expenditures 1980	Representative Wright amendment	Percent increase/ decrease from 1980 expenditures	Frenzel motion to recommit	Percent increase/ decrease from 1980 expenditures
Aging	1,153,838	1,183,680	+2.6	865,382	−24.9

Mr. BADHAM. Mr. Speaker, I have no further requests for time.

Mr. WRIGHT. Mr. Speaker, I have no further requests for time.

The SPEAKER pro tempore. Pursuant to House Resolution 116, the previous question is considered as having been ordered.

The question is on the amendment offered by the gentleman from Texas (Mr. WRIGHT).

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. ANNUNZIO. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were: yeas 407, nays 2, not voting 23, as follows:

Ms. Ferraro with Mr. Brown of Ohio.
Mr. Rose with Mr. Marks.

□ 1645

So the amendment was agreed to.

The result of the vote was announced as above recorded.

MOTION TO RECOMMIT

Mr. FRENZEL. Mr. Speaker, I offer a motion to recommit with instructions.

The SPEAKER pro tempore. Is the gentleman from Minnesota opposed to the resolution?

Mr. FRENZEL. I am, Mr. Speaker.

The SPEAKER pro tempore. The gentleman qualifies.

The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. FRENZEL moves to recommit the resolution (H. Res. 115) to the Committee on House Administration with instructions to report the same to the House forthwith with the following amendment:

Strike out all after the resolving clause and insert in lieu thereof the following:

That effective January 3, 1981, there shall be paid out of the contingent fund of the House in accordance with this primary expense resolution not to exceed the amount specified in section 2 for the expenses of investigations and studies to be conducted by each committee named in such section, including expenses—

(1) for the employment of investigators, attorneys, and clerical, stenographic, and other assistants;

(2) in the case of a committee named in section 3, for the procurement of services of individual consultants or organizations thereof pursuant to section 202(i) of the Legislative Reorganization Act of 1946 (2 U.S.C. 72a(i)); and

(3) in the case of a committee named in section 4, for specialized training, pursuant to section 202(j) of such Act (2 U.S.C. 72a(j)), of committee staff personnel performing professional nonclerical functions.

Payments under this resolution shall be made on vouchers authorized by the committee involved, signed by the chairman of such committee, and approved by the Committee on House Administration.

SEC. 2. The committees and amounts referred to in the first section are: Select Committee on Aging, $865,382; Committee on Agriculture, $1,003,896; Committee on Armed Services, $952,223; Committee on Banking, Finance and Urban Affairs, $2,001,690; Committee on the District of Columbia, $186,632; Committee on Education and Labor, $2,204,444; Committee on Energy and Commerce, $3,293,530; Committee on Foreign Affairs, $1,464,984; Committee on Government Operations, $1,872,228; Committee on House Administration, $1,219,000; Committee on House Administration—House Information Systems, $7,830,113; Permanent Select Committee on Intelligence, $938,700; Committee on Interior and Insular Affairs, $1,004,753; Committee on the Judiciary, $1,154,460; Committee on Merchant Marine and Fisheries, $1,384,953; Select Committee on Narcotics Abuse and Control, $501,941; Committee on Post Office and Civil Service, $761,827; Committee on Public Works and Transportation, $1,614,668; Committee on Rules, $300,011; Committee on Science and Technology, $1,664,162; Committee on Small Business, $654,073; Committee on Standards of Official Conduct, $450,000; Committee on Veterans' Affairs, $278,902; and Committee on Ways and Means, $1,753,750.

SEC. 3. (a) Of the amounts provided for in section 2, each committee named in subsection (b) may use not to exceed the amount specified in such subsection for consultant services under paragraph (2) of the first section, but this limitation shall not prevent the use of such amount for any other authorized purpose.

(b) The committees and amounts referred to in subsection (a) are: Committee on Agriculture, $100,000; Committee on Armed Services, $36,000; Committee on Banking, Finance and Urban Affairs, $5,000; Committee on the District of Columbia, $10,000; Committee on Education and Labor, $55,200; Committee on Energy and Commerce, $28,000; Committee on Foreign Affairs, $35,000; Committee on Government Operations, $45,000; Committee on House Administration, $100,000; Committee on House Administration—House Information Systems, $304,000; Committee on Interior and Insular Affairs, $33,600; Committee on the Judiciary, $90,000; Committee on Merchant Marine and Fisheries, $16,000; Committee on Post Office and Civil Service, $100,000; Committee on Public Works and Transportation, $30,000; Committee on Rules, $12,000; Committee on Science and Technology, $15,000; Committee on Standards of Official Conduct, $350,000; Committee on Veterans' Affairs, $25,000; and Committee on Ways and Means, $50,000.

SEC. 4. (a) Of the amounts provided for in section 2, each committee named in subsection (b) may use not to exceed the amount specified in such subsection for specialized training under paragraph (3) of the first section, but this limitation shall not prevent the use of such amount for any other authorized purpose.

(b) The committees and amounts referred to in subsection (a) are: Committee on Armed Services, $15,000; Committee on Education and Labor, $3,000; Committee on Energy and Commerce, $2,850; Committee on Government Operations, $2,000; Committee on House Administration, $5,000; Committee on House Administration—House Information Systems, $95,000; Committee on the Judiciary, $3,000; Committee on Public Works and Transportation, $8,000; Committee on Rules, $2,000; Committee on Science and Technology, $7,600; Committee on Small Business, $2,000; and Committee on Standards of Official Conduct, $4,000.

SEC. 5. No part of the amount provided for the Committee on Post Office and Civil Service in section 2 may be used to establish or operate a redistricting data center or any similar unit.

SEC. 6. The Committee on House Administration is authorized—

(1) to incur such expenses as the Committee considers advisable to enable House Information Systems to provide for the development, operation, maintenance, and improvement of ongoing computer and information services for the House, to provide for the investigation of additional computer and information services for the House, and to furnish computer and information systems support directly to Members, committees, and administrative offices of the House;

(2) to expend funds received in reimbursement for computer services in accordance with the policies of the Committee; and

(3) to expend funds for the provision of employment placement services, professional development programs, office and personnel management consultation services, and periodic publication of handbooks, guides, bulletins, and other matters as may be necessary for the House.

SEC. 7. No part of the funds authorized by this resolution for any committee shall be available for expenditure in connection with the investigation or study of any subject which is being investigated or studied for the same purpose by any other committee of the House, and the chairman of each committee shall furnish the Committee on House Administration information with respect to any investigation or study intended to be financed from such funds.

SEC. 8. The authorization granted by this resolution shall expire immediately prior to noon on January 3, 1982.

SEC. 9. Funds authorized by this resolution shall be expended pursuant to regulations established by the Committee on House Administration in accordance with existing law.

Mr. FRENZEL (during the reading). Mr. Speaker, I ask unanimous consent that further reading of the motion be dispensed with and that it be printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

The SPEAKER pro tempore. Pursuant to House Resolution 116, the gentleman from Minnesota (Mr. FRENZEL) will be recognized for 30 minutes, and the gentleman from Illinois (Mr. ANNUNZIO) will be recognized for 30 minutes.

The Chair now recognizes the gentleman from Minnesota (Mr. FRENZEL).

Mr. FRENZEL. Mr. Speaker, I yield myself 4 minutes.

Mr. Speaker, it has been a long day, and on this side we will try not to redo much of what has gone before. Instead we will try to come to a vote before the full time has been used.

Mr. Speaker, the motion to recommit is not a very complicated one. It follows the form of the Wright amendment, except that it goes much further. The committee brought to us a resolution that called for spending of $42.9 million. By adoption of the Wright admendment, we lowered the

spending to $39.6 million. That is almost exactly the same as was used for the same purposes as last year.

This motion to recommit will call for spending of $35.3 million, $4.3 million less than the Wright amendment.

The reason that I am bringing this motion to recommit is that, even with the Wright amendment, we have still approved a spending level greater than last year; about 6 percent on the average for the committees that are included under this resolution.

My intention in this motion to recommit is to bring the spending for the committees to about 10 percent—actually, about 9 percent—less than last year. That has been the target of the Republican minority since we began the hearings on this budget matter.

Some of the committees have been increased. There are four committees; House Administration, Armed Services, Standards of Official Conduct, and Intelligence, that are the same as are in the Wright amendment. Some committees have been decreased more than 10 percent over last year.

□ 1700

A few committees like the Committee on Public Works and Transportation have not been decreased at all. But the net result is that if we vote for the motion to recommit, we will save an additional $4.3 million and we will cause the committees to spend less money than they spent last year.

Our good majority leader indicated that he wanted to compare apples with apples. We want to compare what the committees are going to spend this year with what they spent last year, not with what they dreamed about last year, and for that reason I present this motion to recommit.

I regret very much that it has caused some suffering to some of the committees which believe that under it they would be cut too much. I also regret that some committees had an impression that it was going to be different from the final form that it took. I am sorry about that, but I think it is absolutely necessary that this House stand up for frugality, and stand up for economy.

If we are going to cut food stamps, special education, and programs across the board, we ought to be able to cut our own staffs. We ought to be able to begin to sacrifice right here in the Congress.

This vote is the test. It is not the most important vote of the year, but it is the first important vote of the year, of whether we believe in economy in Government and whether we believe in real frugality.

The Members got a freebee, a piece of cake, on the Wright amendment. That was easy. Now we are going to ask you to make a hard vote, to show if you really want to save the public some money. You are all going to be measured today by your performance. Either you are going to cut spending by passing this motion to recommit or you are going to accept the business-as-usual standard. If you vote against the motion you are going to fail the test. The people are watching and they are going to know.

The SPEAKER pro tempore. The Chair now recognizes the gentleman from Illinois (Mr. ANNUNZIO).

Mr. ANNUNZIO. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I am totally opposed to the recommittal motion and every Member of this body should also be opposed. The motion would not only seriously affect the operations of the House of Representatives, but would also hurt the lives of virtually every American.

The Republicans are asking the House to operate on a budget of $35.3 million which would be a reduction of $5 million in actual expenses from the previous year. This arbitrary cut fails to even consider the 10-plus percent inflation rate which this country currently faces. So it is not a 10-percent decrease that the Republicans are asking, but rather it is more than a 20-percent decrease because quite simply with inflation, yesterday's dollar does not go as far as today's.

And who will be hurt by these vicious cuts? By the year 2000 more than one-quarter of all the people in our country will be 60 years old or older. And how do the Republicans want to face that fact? They want to give the Select Committee on Aging a budget of only $865,000, when last year the committee spent $1.1 million and produced some of the most meaningful and worthwhile hearings in the Congress. Are the Republicans prepared to go back to their districts and tell their senior citizens who they profess so loudly to represent that they gutted the committee dealing with senior citizens' issues at a time when senior citizens need all the help and protection that this body can provide them?

And what about the small businessmen that we are told time and time again are the backbone of our country? The Small Business Committee had only asked for exactly what it was authorized to spend in 1980. It had done its job of trying to cut spending and to conserve as many dollars as possible. But that was not good enough for our Republican friends. They chose to cut the Small Business Committee more than $120,000. After 17 years in Congress, I know that small businessmen have major, major problems. Small businessmen account for much of the mail generated in congressional offices and they are not going to be thrilled when they learn that the committee that handles their problems is being virtually put out of business. I think it is important that we discuss the committee budgets because it is the American public that will be faced with a Congress that will be unable to deal with its problems. And the American people should know that it is the Republicans that want to bring the operations of the House to a standstill. I will say one thing for our Republican friends, they are not engaged in selective gutting. They want to stab everyone with the same fiscal knife. Even the veterans will have to face the wrath of the Republicans.

The Veterans' Affairs Committee is the one link that the millions of veterans in our country have with the House of Representatives. These veterans depend upon that committee to make certain that they have a strong voice in Government. At a time when thousands of veterans cannot find jobs or are facing reduced rehabilitation programs, and yes even the cutoff of some of their medical benefits, the Republicans want to do even more to damage these brave men and women who fought to defend our country. The Republicans want to give the Veterans' Affairs Committee only about $279,000, a substantial cut from the actual expenditures of the committee from last year. I suggest that if this amendment passes, that the millions of veterans across this country not bother to write to Congress for help in solving a problem because the committee that has done a good job in representing them in the past will not have enough money to function. And any Member of this body who votes for this recommittal motion with its disgusting treatment of veterans should not show his or her face at a veterans function or march in a Veterans Day parade again. The veterans do not want you marching down main street—they want your help fighting for their rights, and if you vote for the recommittal motion you are not a friend of the veteran.

President Reagan campaigned and was elected on a promise of broad tax cuts. And the gentleman from Illinois (Mr. ROSTENKOWSKI), my good friend, has promised the President that the Ways and Means Committee will deal with the tax legislation in a fair and expeditious manner and I applaud him for his spirit of cooperation. It is going to require a great deal of time, effort and staff to handle the tax cut legislation. It requires tax experts who do not come cheap. Yet, our Republican friends want to reduce the budget of the Ways and Means Committee to such a low level that I honestly wonder if the committee will be able to deal with the tax cuts at all.

Let us look at some other examples of the Republican philosophy on spending money. The Committee on Narcotic Abuse and Control would be

slashed. I wonder if this means that our Republican friends are against controlling narcotics. How can we control the illegal drug traffic in this country if we do not have the staff to monitor the problems?

Just look up and down the list of cuts that the Republicans are suggesting. Not even the Senate, which is controlled by the Republicans, went that far. The Senate Republicans did not cut funding by 10 percent of 1980 expenditures, but rather they cut the funding based on 10 percent of the request in 1980 and that is exactly what was contained in the motion of the majority leader. I contend that the Republicans do not want to cut this House—they want to cripple it. In the Dear Colleague letter circulated by the distinguished gentleman from Minnesota, he points out as justification for the budget cuts that "That is the type of sacrifice our constituents demand." Well I am glad to hear that the Republican Members of this body do not have constituents who are senior citizens, who are small businessmen or who are veterans. Certainly, those constituents, which the Democratic Party represents, want reasonable budgets but they do not want this House to put itself in such a financial bind that it becomes merely a caretaker operation.

This motion must be defeated. It is a motion that deals with numbers, not with human beings. It is a motion that deals with figures, not with compassion and understanding and it is a motion that says to the American people that solely to make ourselves look good we want to shut down the committee system of this Congress. I do not intend to sit idly by and let that happen.

This is the House of the people. If you do not represent people, then vote for the recommittal motion. But if you represent people, then vote against this brutal, unfeeling, unworkable, and unacceptable recommittal motion.

Mr. ZABLOCKI. Mr. Speaker, will the gentleman yield?

Mr. ANNUNZIO. I yield to the distinguished gentleman from Wisconsin.

Mr. ZABLOCKI. Mr. Speaker, at the very outset I want to commend the gentleman from Illinois (Mr. ANNUNZIO) not only for the excellent speech he has just given with respect to the motion to recommit but for the other statements he made during general debate on the resolution. I also want to commend him for the diligent and responsible work that he has done to bring down the cost of our staffs and our committees.

Now, I believe, Mr. Speaker, that when the gentleman from Minnesota (Mr. FRENZEL) referred to some of the committees being cut—he said that he has regrets that some of the committees would be cut too deeply by his motion—I am sure the gentleman from Minnesota must have had in mind the Committee on Foreign Affairs, because that committee is as important to our country's national security interests as any other committee of the House.

I would point out that I appeared before the Committee on House Administration and the Subcommittee on Accounts with a very tight budget and we were out partly because we did not spend everything we were authorized for 1980. In other words we were penalized because we acted responsibly.

Now, I submit to my colleagues in the House that if they want to see padded budgets for committees in the future, then they should do what the gentleman from Minnesota (Mr. FRENZEL) is recommending in his recommital motion. Under his recommital motion, the Committee on Foreign Affairs—and that is the only committee I can speak about—will be cut below the expenditures for 1980 by $162,776.

□ 1715

With the responsibilities we have in that committee, such a cut will deny the committee the resources necessary to carry out its responsibilities. I am sure the gentleman from Minnesota fully realizes what a difficult task we now have performing oversight of our international affairs legislation. With the gentleman's motion it will be necessary to reduce staff. That will impair our ability to do the oversight of the executive branch that the American people deserve. Furthermore, with his cut it will be necessary to lay people off—including some of the minority staff. For these reasons this recommittal motion should be resoundingly and soundly defeated.

Mr. ANNUNZIO. Mr. Speaker, I yield such time as he may consume to the gentleman from Ohio (Mr. ECKART).

Mr. ECKART. Mr. Speaker, I cannot help but be reminded about the story by a famous midwestern American prohibition violator, who said that when he sells liquor it is called bootlegging, but when his patrons serve it on silver platters in mansions it is called hospitality.

Well, when the Senate enacts a 10-percent budget authorization cut, it is called by people on the floor of the House, and I have taken the time to examine the record, supportive, necessary; indeed, when we look at the record and at remarks made by minority members of the House: there is the gentleman from Texas on the 11th of March saying that we must follow the example given by the Senate;

The gentleman from Pennsylvania on the 12th of March, who said "I do think my figures demonstrate the eminent reasonableness of seeking only a 10-percent cut in committee funding."

The gentleman from Texas on the 25th of February, who said Republicans in the Senate "have taken a strong step forward * * * they have cut their committee budgets this year by 10 percent—cut them by 10 percent. That does not mean any kind of pie in the sky. They cut 1980 by 10 percent in 1981."

Now, Mr. Speaker, after having embraced the Senate action, we are now told on this floor by Members of the minority that what the Senate did was tokenism, cosmetic, and does not matter.

Mr. Speaker, I submit to you that it cannot be both bootlegging and hospitality. It has got to be one or it has got to be the other.

Now, Mr. Speaker, I heard some attacks earlier today about a gag rule and how can we trundle this single resolution embodying all these committees on the floor for a single vote? Were we not denying the rights of the minority?

Mr. Speaker, on the 23d of February, one of the gentlemen from Pennsylvania, said in calling for passage of the President's package, that it should be "put into effect as the President defined it."

On the 3d of March, another gentleman from Pennsylvania said, "The President's proposal deserves to be considered as a whole package."

The 4th of March, it was a gentleman from Kansas.

On the 19th of February, it was a gentleman from Ohio.

On the 4th of March, it was a gentleman from Indiana.

Mr. Speaker, all were saying the same thing: that we must vote on the President's program in its entirety. What I submit is the result of that is a Republican position that it is fine for the President's package of budget cuts to be lumped together in a single vote, but it is improper for the Democrats to put our budget proposal in a single package and vote and, therefore, we ought to be criticized for it. You cannot have it both ways.

A further examination of the record, Mr. Speaker, will show that in the debate in the Senate, the distinguished Senator from Virginia said, "All expenditures for each committee will be authorized in one Senate resolution. This major improvement," he called it, "will increase our control over spending in the Senate."

The chairman of the Senate Rules Committee, the gentleman who presided over most of these cuts, said during consideration on the Senate floor, "So that we understand exactly what we are talking about, we are reporting resolutions today that represent an aggregate 10-percent cut from the past years' authorized committee expenditures."

In the House today we are invited to believe by the Republicans that what we do today and which they had

praised previously, is now "cosmetic", "tokenism" and that we should not pay attention to the majority in the Senate.

First the House Republicans sought to embrace the Senate action and now they repudiate it.

I am deeply disturbed, Mr. Speaker, to see this very premature rupture in what had been the facade of Republican Party unity. I am sure we on this side of the aisle will want to offer an opportunity to the Republicans to follow that excellent leadership which just 3 weeks ago was cited on half a dozen separate occasions in the well of the House as being an example for the House to follow.

Last, Mr. Speaker, I heard in the well today during this debate references to a "signal" that should go out to the people, that a "mandate" was presented in last November's election.

Well, Mr. Speaker, if there was a mandate, if there was a signal, let that signal go downtown to the White House which has not proposed significant cuts in its own personnel, or in the Office of the President and which, in fact, is seeking a $900,000 increase in a supplemental appropriation.

Many Members today on the floor spoke of sending messages, Mr. Speaker, and I want to join them in sending a message.

How much does the President plan to rescind, Mr. Speaker? All of his cuts come in the Office of Wage and Price Control, the Council on Environmental Quality, and a few other small areas.

Mr. Speaker, the Senate has sent a message. The House today can send a message that we too heard the people and we too will respond, and let us send that message to the White House that if they are interested in cuts we will support cuts, but let them follow our example by cutting their own staff and budget as well.

Mr. Speaker, I do not know how anyone after over 6 hours of debate on this issue can call what we propose today a gag rule. None of us could truly stay gagged for as long as 6 hours.

I submit to you that the consideration of the motion that we have before us only represents a very very difficult situation that we are trying to share throughout this country.

We will have cuts and they will be deep, and I will support them. But they will also be responsible and fair and the House, by agreeing with the Senate, can take an important first step today.

Mr. ANNUNZIO. Mr. Speaker, I reserve the balance of my time.

Mr. FRENZEL. Mr. Speaker, I yield 2 minutes to the distinguished Republican leader, the gentleman from Illinois (Mr. MICHEL).

Mr. MICHEL. Mr. Speaker, I rise obviously in support of the motion to recommit. I do so having voted for and urging all the Members on my side to support the amendment of the gentleman from Texas (Mr. WRIGHT) earlier in the day.

I would like to think that since we supported you unanimously on our side, I say to the gentleman from Texas (Mr. WRIGHT) that there might be a quid pro quo and in turn we might get significant support from your side for our motion to recommit.

I have to say, quite frankly, that I regret that we are considering these funding resolutions under one omnibus bill and then trying to address some of the grievances here. Maybe we do some harm or injury to several committees; one in particular maybe if it be the Public Works Committee that over a period of some years has held a steady line and now because of the reduction reflected in the motion to recommit, there may have to be some reductions in personnel on that particular committee; but I think it all comes about as the result of our not taking the time to address each and every one of these funding resolutions for committees on their individual merits.

I regret that if we do anyone any injury, and particularly since that committee has had an arrangement over a period of years with one-third staffing for the minority, that we would not have the majority under this set of circumstances taking it out of the hides of the minority; for I looked at the committee print here on page 165 and the total amount of staffing here, 848 in the investigative for the majority, 156 for the minority. Overall total staffing of 1,380 for the majority, only 343 for the minority; so the minority with four-fifths, or 4 out of 5 Members in this House really coming from—or four-fifths of the membership on our side, I think we are deserving certainly of a better ratio on our committee staffing.

We have been calling upon the people to make significant sacrifices by what we have been doing on rescissions and reductions in expenditures that will total something like $50 billion.

The SPEAKER pro tempore. The time of the gentleman from Illinois (Mr. MICHEL) has expired.

Mr. FRENZEL. Mr. Speaker, I yield 1 additional minute to the gentleman.

Mr. MICHEL. We certainly cannot call upon the people out there to make those sacrifices unless we are willing to make some adjustment and sacrifice in our own house. The people spoke very clearly on November 4. They wanted change and I think that change also ought to be reflected in what we do to our own selves here as individual Members of this House.

Mr. FRENZEL. Mr. Speaker, I yield 3 minutes to the distinguished Republican whip, the gentleman from Mississippi (Mr. LOTT).

Mr. LOTT. Mr. Speaker, I would like to make just a couple of observations before I get to the main points I want to make.

First of all, this early in this session I would hope that my colleagues on both sides of the aisle in this session will do a better job of showing respect for each other and for this institution that we serve in than we have done in the previous years. Traditionally, when a Member is asked to yield, if at all possible and if you have the time to yield on a subject, you will try to do that.

I hope that as we start this new session we will return to the days where we do have a little respect for each other.

The second point I want to make is that I find it quite interesting to see that this body is so concerned about what the other body has done. We usually try to do our own thing here and let them take care of themselves.

Mr. Speaker, there has been a lot of mixing of apples and oranges during this debate today, with a few lemons thrown in for good measure. But while all this might make for a good fruit salad, it has nothing to do with what we should be about today, and that is cracking the tough nut of committee staffing and getting down to the real kernel of what is at issue in this debate.

And the kernel of this whole debate is quite simply twofold: First, should the legislative branch of our Federal Government accept its fair share of the public demand for a reduction in the size and cost of Government? And second, has our committee staff become so overgrown and ingrown that the representative nature of our democracy is actually in jeopardy?

Mr. FORD of Michigan. Mr. Speaker, will the gentleman yield?

Mr. LOTT. I will be glad to yield to the gentleman from Michigan.

Mr. FORD of Michigan. I just wanted to thank the gentleman for his very eloquent explanation of the rules and I thought I would come down and give the gentleman an opportunity to illustrate exactly what the gentleman had in mind.

Mr. LOTT. Well, I am sure the gentleman will always yield to me and I will do the same with him.

Now if I were convinced that we could not possibly manage our responsibilities as a coequal branch of our Government with fewer committee staff than we now have, then I would resist any attempts to cut these committee funding authorizations by $1, no matter how strong the demands for austerity might be.

But the fact is, Mr. Speaker, today this House is overstaffed, not just to the breaking point, but to the break-

down point. This has been mainly due to our own turf-building imperatives as opposed to any real institutional need. We have witnessed a tremendous explosion in the number of subcommittees over the last decade, from 100 to 150, and with it an even more alarming growth in the number of committee staff, from 700 to 1,900—a 171-percent increase. And yet, instead of a better House, we now have a more fragmented and unmanageable House. That is not just my opinion. A survey of House Members in the last Congress taken by the Select Committee on Committees revealed that 62 percent of the Members agree that large committee staffs "have contributed to fragmentation and unmanageability of the committee system." A whopping 81 percent of the respondents felt that the number of subcommittees should be reduced, and 63 percent felt that committee staffs are generally too big.

So this is not a partisan issue; it is an institutional problem of monumental importance. This whole problem is perhaps best summed up in the title of a recently published book, "Unelected Representatives: Congressional Staff and the Future of Representative Government." That is really what this overstaffing problem is all about—the future of representative government: Are we willing to delegate our powers and responsibilities as the elected Representatives of the people to our unelected committee staff? I sincerely hope not.

The motion to recommit with instructions offered by the gentleman from Minnesota (Mr. FRENZEL) affords us the first real opportunity during this debate today to crack that tough nut of committee staffing and squarely confront the kernel of the issue—whether we are going to do our part to reduce the size and cost of Government, and whether we are going to recapture our rightful control over the legislative branch by making a real cutback in committee staff. Unlike the Wright amendment which is still 6 percent higher than last year's spending for our standing and select committees, this amendment would make a real reduction of $2.9 million in committee funding from last year—a 9-percent cut. This is the real test of how serious we are about cutting spending and reasserting our prerogatives as the only truly elected Representatives in the people's House. I urge adoption of the motion to recommit.

□ 1750

Mr. FRENZEL. Mr. Speaker, I yield 3 minutes to the distinguished gentleman from Arizona (Mr. RHODES).

Mr. RHODES. Mr. Speaker, this motion to recommit should be adopted because it is the only opportunity that we really have to cut the cost of the investigative staffs of the committees of the House. I know perfectly well that my good friend, the gentleman from Texas, the majority leader (Mr. WRIGHT) has in his heart the desire to make cuts. But I submit that the amendment which he offered and which was adopted does not really make the cuts that he would like to have us feel that we have made.

What we have really done here, Mr. Speaker, is to take one item in the bill, House Information Systems, and really take a massive whack out of it. This is the bank which is being used by my good friend, the gentleman from Texas (Mr. WRIGHT) as a means of indicating that the whole item has been cut tremendously. This is the way that actually he is making a cut in the total without making a cut in the individual committees. As a matter of fact, most of the committees, or many of the committees, will be able to spend much more next year than they spent last year.

I call attention to page 87 of the committee report just to show you how this little bit of legerdemain came about. The references to the fact that the House Information Systems budget for this year will take into consideration the fact that $1.5 million was budgeted to reimbursements last year, and we are going to budget $3 million for reimbursements this year. Those reimbursements will be amounts of money which you will pay the House Information Systems from your allowances, the allowances which come right out of the Treasury of the United States, more than you paid last year. So the House Information Systems is really not taking a cut because it is going to get the money back from you, from your pocket.

Are you taking a cut? Are you taking a cut in your office expenses? Maybe you are and maybe you are not, but you will have to recall, as many of us do, that some years ago this House gave the Committee on House Administration the authority to raise the allowances which individual members get. I will bet you—and I do not think you had better take me—that before too many weeks have elapsed, the individual accounts of the Members will be increased by enough to make up the difference between that $3 million and the $1.5 million. So do not get the idea that this is any kind of a cut. It is not. You have not voted for a cut yet. The only way you could vote for a cut is to vote for the motion to recommit.

I suggest that you do it, and if you do, I think the people back home will be happy with you; if you do not, then I think they will be very unhappy with you.

Mr. FRENZEL. Mr. Speaker, I yield 3 minutes to the distinguished gentlewoman from New Jersey (Mrs. ROUKEMA).

Mrs. ROUKEMA. Mr. Speaker, weeks ago I and my Republican colleagues sought to overturn what we considered excessive increases in the committee staff budgets that we have just voted upon today. It is clear that our message was heard by some of our Democratic colleagues, and it is now apparent that they saw the real and symbolic problems that were caused by raising committee budgets at a time of overall fiscal austerity. Therefore, most of us voted today for that proposal.

But, Mr. Speaker, the motion does not go far enough, and it is a cynical way, I submit to you, of doing business as usual by bringing authorizations in too high in order to allow Members an excuse for voting for symbolic lower committee budgets. The only real reform will come if we spend 10 percent less than we spent last year.

The particular reason I am rising is that I do not have any new figures for you today, but I want you to know, particularly my Democratic colleagues, that we sit day after day in committee hearings where you decry the potential adverse effects of the overall budget cuts for the poor, the disadvantaged, and the elderly. I have yet to see a committee staff member who qualifies as poor, disadvantaged, or elderly. There is, I am told from conversations with you, a general consensus even among the Democrats for substantial budget reductions this year. But now with a chance at one small step—one small step—to show your good faith to the American people, you have reverted to crass political opportunism.

I plead with you on this motion to recommit, without going through the details of the statistics; you have heard them ad nauseam this afternoon—I plead with you as a matter of conscience and intellectual honesty to vote to recommit.

Mr. FRENZEL. Mr. Speaker, I yield 3 minutes to the gentleman from Texas (Mr. COLLINS).

Mr. COLLINS of Texas. Mr. Speaker, everybody in the country is watching to see the way we are going to vote in about 10 minutes, because they want us to start today to limit spending money in Congress.

Some gentleman over here made the statement, inflation is the No. 1 issue in America, and he is right. Inflation is caused by the fact that we have increased the national debt $80 billion last year and $80 billion again this year. All Americans are saying "Cut the spending. Cut the spending."

In budget hearings the other day the chairman of my committee, the gentleman from Michigan (Mr. DINGELL) said something that I thought was most interesting. Mr. DINGELL spoke of the people who serve on the staffs of the U.S. Congress. He said they are qualified; they are well trained; they are hard working; they have tremendous ability. He said that

anyone who serves on our staffs could make twice as much money if they worked downtown. In other words, these people who are making $40,000 a year, when we relieve them of their staff responsibilities are going to be able to make $80,000 a year when they go downtown. So we are not seeing people who will lose their jobs; we are going to see people who will double their income. There are just plenty of people around here—we know that—who could be relieved and allowed to move into the private sector.

On my own Committee on Communications, we have 1 staff on the Republican side; they have 18 staff on the Democratic side. When I was on the Oversight Committee, Republicans had 1, Democrats had 30 staff. We all know that that is not exactly a balance.

What we are doing is calling on you today, calling on you to really cut this committee Budget. Of 23 committees we have before us on the floor, only 3 of these committees are cut from last year's expenditures. Only 3 of the 23 committees had a cut in their spending budgets. The Committee on House Administration made the only meaningful cut in the entire group. Most of the committees are spending much more than they did last year. You cannot operate that way. If we are going to ask the poor, if we are going to ask the schools, if we are going to ask the sick to cut their budgets, we need to cut our budget right here in Congress.

Mr. KAZEN. Mr. Speaker, will the gentleman yield?

Mr. COLLINS of Texas. I yield quickly.

Mr. KAZEN. I have sat here this afternoon and listened to speaker after speaker come to the well, and now we get this motion to recommit based upon the figures that the committees spent last year. This is what it is based on; is it not? The gentleman has just finished saying that we are asking for more money than the committees spent last year. The gentleman well knows that last year was an election year. I did not have in the committee that I am privileged to chair quorums to go out and hold hearings because everybody was interested in his own reelection. That was a bad year to hang onto.

Mr. COLLINS of Texas. I will take back my time. I will take back my time.

Mr. KAZEN. The gentleman well knows that.

The SPEAKER pro tempore. The time is controlled by the gentleman from Texas (Mr. COLLINS).

Mr. COLLINS of Texas. Let me tell the gentleman something. I want to tell him. I want to get the facts straight. Last year we had the most money spent on committee staffs of any year in this Congress history. Last year we spent more. I have also been comparing this year's spending to what Congress spent in 1974. We are now spending four times as much on many committee staffs as was spent in 1974. Let us reduce these overstaffed budgets.

Mr. FRENZEL. Mr. Speaker, I yield 3 minutes to the distinguished gentleman from Pennsylvania (Mr. JAMES K. COYNE), a member of the committee.

Mr. JAMES K. COYNE. I thank the gentleman.

Mr. Speaker, I am very happy that some remarks were made here by the gentleman from Texas (Mr. KAZEN) about the election last year, because in fact I think that is one of the issues we should be discussing here. After listening to the difficulty that the Speaker has had getting people just to pay attention to what has been said in the well, I am beginning to think that many Members of this body are deaf, not only deaf to what we are saying but deaf to what the public said November 4, 1980. The public said they wanted to see inflation stopped, and the public said they wanted to see a Congress that spoke with one voice. They do not want a Congress that talks out of one side of its mouth and then talks out of the other side. I am happy to say that we 52 freshmen heard that election voice on November 4, and we are responding to it. That is why we presented a resolution which called for a 10-percent reduction in what was spent, not in authorization.

The public does not even know what authorization is. Would you want to go to the public and say, we are going to reduce the authorization for inflation by 10 percent? We are going to reduce the authorization for crime by 10 percent? We are going to reduce the authorization of unemployment by 10 percent? Would you want to say that and then turn around in the next year and not do anything on those scores?

What the public wants to see is action. What the public wants to see is for us to reduce our spending. That is why I think this motion to recommit is so critical, Mr. Speaker, that we all ought to get behind it and support the public.

Mr. FRENZEL. Mr. Speaker, the gentleman from Illinois (Mr. ANNUNZIO), the subcommittee chairman, has graciously reserved his time, and I now propose to conclude the debate with a very short statement so that with the two votes we will be out of here, I hope, easily by 6:15 or before.

I do have a few comments on some of the statements that have been made. One of the speakers did not want to be compared with last year because it was an election year. We will be glad to compare it with the year before, if that is preferable to them.

An earlier speaker told about comparing with the Senate and said that it was too bad that we were now moving off of the Senate model. The gentleman said he followed the work in the Senate very closely. But I think he should have followed it a little more closely. I explained earlier in the debate that you cannot compare it with the Senate because their staff budget is in one lump sum. We have a statutory and an investigative staff, and sometimes the statutory even exceeds the investigative, so it becomes very hard to compare. But I think what was important about the model in the other body was that they set the standard which ultimately forced the majority leader to offer his amendment.

So I think we have to give them credit for ground-breaking even if we in the House, we Republicans in the House, believe that we ought to go farther.

I think the same speaker indicated that it was such a nice deal to handle all the committee budgets in one lump sum in the Senate appropriations, he did not notice that amendments were allowed to each of the committee budgets separately by unanimous consent, had anyone desired to do it, the agreement, of course, having been made before it was considered.

So I think it is a little dangerous to look for comparisons on the other side of the Capitol.

I think what we are losing sight of, however, is that this is an amendment to save money, and it is an amendment to committee staff, which large numbers of people including myself believe have gotten too big. I think the question is very simple and that our duty here is clear. If we are for economy, we are going to vote for the motion to recommit; if we are for business as usual and for sacrifice for somebody else, we will probably vote against the motion to recommit.

I urge that the motion be adopted, and I move the previous question on the motion to recommit.

The SPEAKER pro tempore. Does the gentleman yield back his time?

Mr. FRENZEL. I yield back my time.

Mr. ANNUNZIO. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. Without objection, the previous question is ordered.

There was no objection.

The SPEAKER pro tempore. The question is on the motion to recommit.

Mr. FRENZEL. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to the provisions of clause 5 of rule XV, the Chair announces that he will reduce to a minimum of 5 minutes the period of time in which a vote by electronic device, if ordered, will be taken on the question of agreeing to the resolution, as amended.

The vote was taken by electronic device, and there were—yeas 184, nays 225, not voting 23, as follows:

[Roll No. 17]

□ 1800

The Clerk announced the following pairs:

On this vote:

Mr. Wylie for, with Mr. AuCoin against.

Mr. Marriott for, with Mr. Rangel against.

Until further notice:

Mr. Cotter with Mr. Brown of Ohio.

Mr. William J. Coyne with Mrs. Holt.

Mr. Jacobs with Mr. Marks.

Mr. Shannon with Mr. Young of Alaska.

Mr. Rose with Mr. Wampler.

Ms. Ferraro with Mr. Quillen.

Mr. Long of Louisiana with Mr. Fish.

Mr. LEACH of Iowa and Mr. SHUSTER changed their votes from "nay" to "yea."

Mr. LONG of Maryland changed his vote from "yea" to "nay."

So the motion to recommit was rejected.

The result of the vote was announced as above recorded.

The SPEAKER pro tempore. The question is on the resolution, as amended.

The question was taken; and the Speaker pro tempore announced the ayes appeared to have it.

Mr. FRENZEL. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. The vote will be taken under the 5-minute provisions.

The vote was taken by electronic device, and there were—yeas 231, nays 171, not voting 30, as follows:

[Roll No. 18]

Cotter	Long (LA)	Shannon
Ferraro	Long (MD)	Wampler
Fish	Madigan	Washington
Gibbons	Marks	White
Guyer	Marriott	Wylie
Hall, Ralph	Pepper	Young (AK)

The Clerk announced the following pairs:

On this vote:

Mr. AuCoin for, with Mr. Brown of Ohio against.

Mr. Pepper for, with Mr. Guyer against.

Mr. Rangel for, with Mrs. Holt against.

Until further notice:

Mr. Long of Louisiana with Mr. Quillen.

Mr. Roe with Mr. Wampler.

Mr. Phillip Burton with Mr. Wylie.

Mr. Long of Maryland with Mr. Young of Alaska.

Mr. Cotter with Mr. Fish.

Mr. Ralph M. Hall with Mr. Marks.

Mr. Hughes with Mr. Madigan.

Ms. Ferraro with Mr. Chappie.

Mr. White with Mr. Rose.

Mr. Shannon with Mr. Washington.

So the resolution, as amended, was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate had passed a bill and a joint resolution of the following titles, in which the concurrence of the House is requested:

S. 509. An act to amend section 201 of the Agricultural Act of 1949, as amended, to delete the requirement that the support price of milk be adjusted semiannually; and

S.J. Res. 55. Joint resolution to grant honorary citizenship posthumously to Douglas Clyde Macintosh.

The message also announced that the President pro tempore, pursuant to Public Law 93-618, and upon the recommendation of the chairman of the Committee on Finance, appointed the following Members as official advisers to the U.S. delegation to international conferences, meetings, and negotiation sessions relating to trade agreements: Mr. DOLE, Mr. PACKWOOD, Mr. ROTH, Mr. LONG, and Mr. BENTSEN; as alternate official advisers, Mr. DANFORTH, Mr. CHAFEE, Mr. HEINZ, Mr. WALLOP, Mr. DURENBERGER, Mr. ARMSTRONG, Mr. SYMMS, Mr. GRASSLEY, Mr. HARRY F. BYRD, JR., Mr. MATSUNAGA, Mr. MOYNIHAN, Mr. BAUCUS, Mr. BOREN, Mr. BRADLEY, and Mr. MITCHELL.

The message also announced the Vice President, pursuant to Public Law 86-380, appointed Mr. SASSER to be a member of the Advisory Commission on Intergovernmental Relations.

GENERAL LEAVE

Mr. ANNUNZIO. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on House Resolution 115, House Resolution 116, and on the motion to recommit.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

STUDENTS WILL SUFFER BECAUSE OF FINANCIAL AID CUTS

(Mr. PEYSER asked and was given permission to address the House for 1 minute and to revise and extend his remarks and to include extraneous material.)

Mr. PEYSER. Mr. Speaker, today I am again entering into the RECORD letters from the presidents of the private universities of the Commonwealth of Puerto Rico, a letter from the California State University in Congressman MATSUI's district, a letter from Mount Sinai School of Medicine in the 19th District of New York, and a letter from the University of Arkansas in Congressman ANTHONY's district.

Mr. Speaker, in doing this every day we are highlighting the problem that college students are facing throughout this Nation if the proposed Reagan administration cuts go through. We know now that in the first year nearly half a million college students will be forced to leave college, leave higher education, because of cuts in financial aid.

Mr. Speaker, I know that the Democratic side of the House and hopefully the Republican side will stand to protect these students and keep higher education moving forward in this country.

MARCH 12, 1981.

Hon. RONALD REAGAN,
President of the United States,
The White House, Washington, D.C.

MR. PRESIDENT: We, presidents of private universities of the Commonwealth of Puerto Rico, want to call your attention to the adverse impact that proposed cuts of federal aid to higher education will have.

These broad and substantial cuts will cause sudden and severe dislocations at the private institutions we preside here in Puerto Rico. The fragile and dependent nature of our island economy adds to our deep concern.

During the 1960's and 1970's, federal aid to higher education favorably stimulated the growth of private institutions in Puerto Rico. Economically disadvantaged students—beneficiaries of these programs—could, for the first time, aspire to the college education that had previously been reserved for the affluent. Private institutions of higher education responded by expanding their campuses, facilities and resources, and new post-secondary schools developed rapidly. The post-secondary student population increased from 57,338 in 1969 to 131,074 in 1979—dramatic evidence of the effect of this financial aid.

Today, thanks to federal assistance, a college education is feasible for the mass of our young people. This, in turn, has greatly increased their expectations and aspirations.

Any sudden dismantling of these aid programs, or an across-the-board reduction in current levels, will disrupt the lives and hopes of these men and women. A few facts will show the extent of their dependency upon federal aid. In 1980, the annual disposable per capita income in Puerto Rico was $3,299 in current dollars. The unemployment rate was 17 percent for all ages and 47 percent for ages 15 to 19. General unemployment continues to grow. In January, 1981, it was 18.9 percent. In 1980, the cost of higher education for students attending private institutions was $3,100 per year. Given these facts, it is not surprising to learn that 90 out of every 100 students in post-secondary institutions in Puerto Rico are eligible for financial aid. At private institutions, 87 percent of the 63,100 undergraduate students enrolled are BEOG participants, and 96 percent of institutional income from tuition and fees can be traced to student financial aid.

Obviously, for private institutions in Puerto Rico, the proposed cuts will be disastrous. The institutions will have to dis-

mantle precipitously educational structures built up over the past two decades. The consequences will be traumatic. Moreover, once the damage is done, it will be difficult if not impossible to recover, and any recovery whatsoever will take a long time and incalculable effort.

Unlike the mainland of the United States, which enjoys a considerably higher standard of living and where other sources can be found to finance student needs, Puerto Rico faces a hopeless situation. In Puerto Rico, a reduction in the current level of financial assistance cannot be offset by tax credits to the parents of students attending college.

Puerto Rican students and the private institutions they attend will be deprived of the basis of which they have made their plans. They will suddenly find themselves in the most precarious of positions. The social cost defies imagination.

We trust you will realize that, although the aims which guide your general efforts are both laudable and necessary, adjustments to meet the specific conditions of different areas of the nation cannot be neglected. Because of their particular circumstances, special regard must be given to areas such as Puerto Rico when planning cuts.

Very truly yours,

P. Vicente A. M. van Rooij, O/P., Presidente, Universidad Central de Bayamón;
José F. Méndez, Presidente, Fundación Educativa Ana G. Méndez;
Ramón A. Cruz, Presidente, Universidad Interamericana de P.R.;
Pedro González Ramos, Presidente, Universidad del Sagrado Corazón;
Francisco J. Carreras, Presidente, Universidad Católica de Puerto Rico.

CALIFORNIA STATE UNIVERSITY,
SACRAMENTO,
Sacramento, Calif., March 17, 1981.

Hon. PETER A. PEYSER,
Committee on Education and Labor, Cannon House Office Building, Washington, D.C.

DEAR CONGRESSMAN PEYSER: Your letter of March 4, 1981 was the first ray of hope we have seen for the maintenance of the Guaranteed Student Loan Program and Basic (Pell) Grants. We most definitely wish to be considered as part of that supportive group of administrators, educators and students who must do what they can to preserve these two programs.

For the moment, we find the dilemma twofold. One is the enforced delay of implementing the payment schedules required to allow the processing of the Pell Grants. The processing is already three months behind schedule. Students who need the grants to make a decision cannot get a response from our financial aid offices because the student cannot supply the Student Eligibility Report.

The second part is that the Guaranteed Student Loan Program will be only a shell of its former self. Avoiding cumbersome detail, it is becoming all too obvious that no lender will wish to participate in this program regardless of the need of the student if the Reagan administration is allowed to retain its proposals. The Pell Grant Program appears to be headed for the same fate. Needy students at low-cost institutions such as ours (which attract the most needy students in California) simply will not be eligible. From what we understand at this time, the higher-income groups attending high-cost institutions, while not receiving sizable grants, will never-the-less receive a grant. Independent students who make up a great portion of our graduate schools tend to lose almost totally. We have only NDSL, CWS and GSL for these students as a state-funded institution with no portfolio of investments.

Some of our students, like those in Social Work, are required to do field work as part of their graduation requirements. This prevents them from working on CWS. What the students have done is to take a combination of NDSL and GSL. Without a GSL our students will simply be forced to quit after devoting several years of their time and effort to get this far.

Thank you again for your interest. Please count on us to help in your efforts to bring some balance to this critical issue.

Sincerely,

W. LLOYD JOHNS,
President.

THE MOUNT SINAI MEDICAL CENTER,
New York, N.Y., March 16, 1981.

Re Education Committee.
Hon. PETER PEYSER,
201 Cannon Building, Washington, D.C.

DEAR CONGRESSMAN PEYSER: I am writing in support of continued financial assistance to college, graduate and professional students, including the continuation of federal loan interest subsidies.

With specific regard to medical students, and in view of the increasing costs of education and medical education plus the ever escalating cost of living, the loss of federal loans and/or federally supported loan programs could be sufficiently overwhelming to subvert all the recent progress made in assuring students equal access to medical education.

There is concern that low-income students will be dissuaded from considering the medical profession because of the burden of compounded interest surcharges which will add to their accumulation of educational loan indebtedness. There is concern that middle-income students, who will be denied access to Guaranteed Student Loans and whose families do not have sufficient savings to finance continued educational costs, will also be dissuaded from the medical profession because of the aggravated accumulation of indebtedness from loans at market rates of interest. There is concern that the medical profession may once again become a profession for the affluent only.

It has been calculated that a loan indebtedness of $40,000 at 7% interest (Guaranteed Student Loan, Health Profession Loan, etc.) will require monthly repayments of $465. The same indebtedness at a higher rate of interest (12%), and unsubsidized during in-school years, will require monthly repayments in excess of $1,000. The current first-year Hospital House Staff salary amounts to $1,200 per month, after taxes.

Although I believe that education is the foundation for the future of our nation and, therefore, deserving of fully subsidized educational loans to provide equal access to education, I recognize there is a need for compromise. In this vein I suggest that we might consider providing federal interest subsidies to all students during in-school years; with total subsidy for needy students and partial subsidy (reduced interest rates of 7% or 9%) for non-needy students.

The rationale offered is that all students require some assistance to avoid the disadvantages of interest surcharges and disproportionate loan indebtedness; financially needy students require additional incentives to encourage their entry into higher education and the professions; but that once students become salaried they can be considered essentially equivalent for loan repayment purposes.

In this manner, continuation of our nation's commitment to provide equal access to education and medical education can be made available, while reducing the governmental cost of providing such assistance.

Very truly yours,

JAY A. COHEN,
Associate Director of Admissions and Student Affairs.

UNIVERSITY OF ARKANSAS,
Monticello, Ark., March 2, 1981.

REPRESENTATIVE PETER A. PEYSER,
Cannon House Office Building, Washington, D.C.

DEAR REPRESENTATIVE PEYSER: Thank you for your letter dated February 24, 1981, regarding budget cuts in student assistance programs. I want to pledge to you the support of the administration, faculty, and students of the University of Arkansas at Monticello in your effort to protect these vitally important funds for the education of young people. I am including a copy of a letter that I sent last week to Senators Bumpers and Pryor, Democrats, Arkansas, and Representative Beryl Anthony, Democrat, Arkansas.

During the next few days the students and administrators of this institution will produce many letters in support of your effort. My letter to our delegation will give you some idea of the importance of these funds to the students who attend this institution.

We support you and urge you to continue your efforts in our behalf.

Sincerely,

FRED J. TAYLOR,
Chancellor.

FEBRUARY 20, 1981.

Senator DALE BUMPERS,
6313 Dirksen Building, Washington, D.C.

DEAR SENATOR BUMPERS: I am sure by this time many people are concerned about special interest groups being affected by the President's budget cuts. I should like to call your attention to one group that will be affected adversely, and this effect will be felt throughout America for years to come. This is the student group who will be affected by the reduction in student aid. I am particularly concerned that the Pell grants will have to be reduced if a supplemental appropriation is not made.

At the University of Arkansas at Monticello over 90% of our students are eligible for student financial aid. Seventy percent of our students come from homes with annual income of less than $15,000. Over 70% of our entering freshmen are first generation college students which is probably due to the availability of federal assistance. The students on this campus are almost totally dependent upon a combination of federal and state aid to attend school. If these grants are reduced at least 30% of the student body at UAM will probably be deprived of an educational opportunity.

I hope you will give serious consideration to helping establish student aid as one of the highest priorities in the federal budget. I know there will be competing concerns but none will be as great as the need to educate our young people.

If you need additional information, please feel free to contact me.

Sincerely,

FRED J. TAYLOR,
Chancellor.

ACTS OF INTERNATIONAL TERRORISM ARE INCREASING

(Mr. DAN DANIEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. DAN DANIEL. Mr. Speaker, on March 14 the Foreign Minister of Turkey, His Excellency Bulend Ulusu, held a press conference. One of the topics of discussion was international terrorism with emphasis on diplomatic assassinations. He said in part:

Distinguished members of the press.

Before concluding my statement, I would like to dwell upon the assassination of Diplomats and other officials abroad which has become one of the most serious problems of our age.

Terrorist organizations, under various names, are killing or injuring innocent people without hesitation.

These incidents have become a common and chronic epidemic during the last few years. It is imperative for all countries to build a common front to face this problem. The most effective battle against such acts is to pursue, catch and punish the instigators and assassins involved in these inhuman acts.

If those taking part in such acts were made aware beyond doubt that they would, in any case, be caught and made to pay for their crimes, innocent people would have been saved from such aggression. It should be remembered that the security of life and property of the diplomats and other officials representing their nation in another country is guaranteed by the government of the host country. The Host Government, therefore, is responsible for their security and protection.

Governments of the Republic of Turkey have always been conscious of this duty and responsibility. From the first day of its foundation, in the Turkish Republic, perpetrators of any offense against foreign diplomats and Representatives were rapidly caught and duly brought to justice and have received the penalties they have deserved whether these incidents resulted in death or not. However, we regret to witness that certain states do not attach due care and sensitivity to this issue. Their negligence does not serve any other purpose than that of encouraging murders and causing new incidents each day with ever increasing victims.

Mr. Speaker, I share the concern expressed. Acts of international terrorism are multiplying at an alarming rate. From all corners of the world accounts are appearing in the press of acts of individual or collective terrorist endeavor.

Our own recent experience in Iran dramatized the extent to which such activities can be carried, but this was only an example of incidents which have been occurring weekly. Embassies are being violated in increasing numbers, airplanes are being seized, with passengers taken hostage, and assassinations have in many places become a substitute for diplomacy.

That we should be concerned about such events goes without saying; that we should do something about them raises a new challenge to our own foreign policy. The conscience of this Nation has been shaken by our own recent experience with terrorism against our national leaders and this fact alone dictates our reaction to such acts elsewhere in the world. We cannot ignore or condone that which strikes at the very heart of what we believe.

Democratic principles are the centerpiece of representative government and both, by definition, are meant to thrive in a peaceful atmosphere. We cannot support or sanction the subversion of the ideal by terrorist activities. To argue that political solutions may best be secured by allowing individuals or small groups to take matters into their own hands is to subvert the very essence of international relations.

Acts of terrorism should be speedily condemned by the world community and not encouraged by passive acceptance of the end result. Nor should benefits of recognition or exaltation be derived by those who practice unorthodox means of achieving their ends. Terrorism seeks to achieve by illegal or violent acts what should otherwise be achieved by diplomatic means. Terrorists stop short of nothing in pursuit of their goals. Legitimacy is not known to their code of ethics, for indeed they have none.

By gun, bomb or other means they seek to replace governments, remove opponents or create situations where ordinary means of political action are put at a disadvantage. Their methods are abhorrent to freedom-loving people and foreign to the standards by which most governments abide. To cooperate with or submit to their standards is to invite trouble wherever it is done. Success in one infamous endeavor only encourages repeat performances elsewhere.

For this reason, the world community should be more concerned than it apparently is over the continuing violence against Turkish diplomats. In more than a dozen incidents in the past 8 years Turkish representatives have fallen victim to violent acts. No single incident has aroused international indignations nor have collectively the other nations of the world responded with the kind of condemnation which might have been expected.

There has, however, been a good deal of press comment upon the situation. Some of these statements follow:

U.N. SECRETARY GENERAL CONDEMNS KILLING OF TWO TURKISH DIPLOMATS IN PARIS (MARCH 7, 1981)

The Secretary General has learned with dismay of the assassination of two Turkish diplomats in Paris.

The Secretary General strongly condemns these wanton acts of violence which is in flagrant violation of international law and conventions.

MURDER OF TURKISH DIPLOMATS IN PARIS (MARCH 5, 1981)

The Department of State strongly condemns the vicious assassinations March 4 of Mr. Resat Morali and Imam Tecelli Ari, Members of the Turkish Embassy in Paris. An anonymous caller told a French news agency that a group calling itself the "Secret Army for the Liberation of Armenia" was responsible for the murders. The Department of State has expressed its condolences to the Turkish Embassy in Washington.

The inviolability of diplomatic personnel is fundamental to the conduct of foreign relations and to the maintenance of international order. We condemn all acts of violence against diplomats and their families and we hope that the perpetrators will soon be brought to justice.

MURDER OF TURKISH OFFICIALS IN SYDNEY, DECEMBER 19, 1980

The United States Government condemns the brutal assassination of Mr. Sarik Ariyak, the Turkish Consul General in Sydney, Australia, and his bodyguard, Mr. Engin Sever, on Wednesday, December 17. The two men were murdered by gunfire as they were leaving the Ariyak home for the office. Reportedly, an anonymous caller claimed that the justice commandos of the Armenian genocide had carried out this brutal crime. There has been no confirmation of this claim.

The justice commandos are one of several small terrorist groups which have claimed responsibility for attack on official Turkish personnel and premises in recent years. The same group claimed responsibility for the October 12 bombings of Turkish facilities in New York and Los Angeles.

The inviolability of diplomatic and consular personnel, and their premises, is fundamental to the conduct of foreign relations, and to the maintenance of international order. We strongly condemn all acts by violence against such persons, and we hope that the guilty parties will soon be brought to justice.

The Government of Australia and the authorities of New South Wales are making every effort to capture the assassins of Mr. Ariyak and Mr. Sever, and to safeguard foreign diplomatic and consular officials in Australia.

STATEMENT BY ARCHBISHOP OHANNES COLAKYAN, THE SPIRITUAL LEADER OF THE ARMENIAN CATHOLIC COMMUNITY

The spiritual leader of the Armenian Catholic Community, Archbishop Ohannes Colakyan has called on his Armenian kinsmen in various countries not to get involved in shameful acts directed against Turkish diplomats and be deceived by any organization.

In his written statement, the spiritual leader of the Armenian Catholic Community Colakyan strongly condemned the murders of Turkish Consul General Sarik Ariyak and his bodyguard Engin Sever in Sydney.

Expressing the grief felt over the addition of another link to the chain of crimes committed against the Turkish representatives abroad, the spiritual leader of the Armenian Catholic community Colakyan said:

"The perpetrators of these abominable crimes should be exposed as soon as possible and brought before justice. The Turkish Armenian Catholic Community strongly condemns these senseless and cruel crimes which are incompatible with the tenets of our religion and humanity, directed against innocent people and which serve no purpose."

STATEMENT ISSUED BY AMBASSADOR MCHENRY, U.S. REPRESENTATIVE TO THE UNITED NATIONS (OCTOBER 12)

On behalf of the United States Government, I strongly condemn the savage and calculated terrorism directed against the Turkish Mission to the United Nations today. Violence in any form is reprehensible. We express our deep concern for those injured today.

I have been in touch with Turkish officials and all relevant agencies of the United States Government are working together with the New York Police to identify the perpetrators of this terrorism and to bring them to justice.

TEXT OF MESSAGE FROM SECRETARY MUSKIE TO FOREIGN MINISTER TURKMEN

(Delivered by Ambassador Spain to the Foreign Minister in Ankara morning of October 13)

DEAR MR. MINISTER: I am deeply saddened and concerned by the October 12 bombing attacks against your government offices in New York and London, and against the Turkish American Travel Agency in Los Angeles.

The United States Government unequivocally and vigorously condemns these outrages. Authorities in New York and Los Angeles began extensive investigations promptly after the attacks occurred, and they will take all possible measures to apprehend the persons responsible.

There can be no justification for terrorism in the service of any cause. Only continued strong measures, national and international, will enable mankind to overcome the menace of modern terrorism. I assure you that my government will continue to devote maximum efforts towards attaining that goal.

Sincerely,

EDMUND S. MUSKIE.

[From the Christian Science Monitor Mar. 1, 1981]

TURKEY'S VICTIMS OF TERRORISM

Turkey is understandably dismayed that its allies do little more than shrug their shoulders when Turkish diplomats abroad fall victim to terrorist gunmen, who identify themselves as Armenians.

This has happened no fewer than 16 times since a Turkish vice-consul in Los Angeles was assassinated there in 1973. The most recent killings were earlier this month in Paris, where two diplomats from the Turkish Embassy to France were gunned down.

Turks note that most of the Western world—and not only the Western world—kept alive its protest for the entire period that US diplomats were held hostage in Iran. Why (they ask) is there no similarly sustained protest when Turkish diplomats, entitled to the same immunities as the Americans in Tehran, are killed with barbarous regularity? Why do not the host governments (they ask further) react more vigorously to track down, apprehend, and punish the murderers?

For the Turks, it is all the harder to understand when the host governments are fellow members of NATO. Turkey, astride the straits which give the Soviet Navy access to the Mediterranean and the oceans beyond, is vital to the alliance. If the proposed increase in US military aid for Turkey is any indication. Turkey is also earmarked for an important role in US security plans for Southwest Asia—which includes the Gulf.

It follows that Soviet interests are served by anything that: (1) drives a wedge between Turkey and its North American and European allies; (2) helps stengthen the isolation of Turkey with which its historical past of Ottoman imperialism burdens it; or (3) contributes to the internal destabilization of the modern Turkish state. Interestingly Moscow has remained silent about the assassinations. There is no evidence that they were actually Soviet-organized, but the Soviets doubtlessly count the net effect as a plus for them.

There are others, too, who probably rub their hands. These include: the most fanatically right-wing Greeks and Greek Cypriots, whose anti-Turkish prejudice from the past is kept alive by the Turkish occupation of part of Cyprus; Kurdish nationalists, who harbor a long grievance for the discriminatory way (they claim) the Kurds (or "mountain Turks") are treated in eastern Turkey; and the most fanatical Palestinians who resent Turkey's diplomatic relations with Israel.

The shadowy gunmen—who boast over the telephone of belonging to the Secret Armenian Army for the Liberation of Armenia—are apparently pursuing a vendetta over half a century old. They want vengeance for the documented sufferings of Armenians at Ottoman Turkish hands, particularly during World War I. Armenians everywhere tend to keep that cruel memory alive. But Armenians as a worldwide community are not, to their credit, advocates of terrorism. Least of all against innocent diplomats of a generation not even born as long ago as World War I.

TAXING BUSINESS

(Mr. BONIOR of Michigan asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. BONIOR of Michigan. Mr. Speaker, the lead editorial in Tuesday's Washington Post raises some very legitimate questions about the impact of the President's proposal to hasten capital cost recovery—otherwise known as "10-5-3".

The editorial focuses on the issue of "tax neutrality," making the point that the writeoff formula would draw billions of investment dollars out of productive economic sectors and move them into less productive areas—like shopping centers—just because of the tax break. It underscores the irony that little, if anything, in depreciation plan goes to the country's most endangered industry—automakers.

I recommend the following editorial to all who want to get the most economic bang out of the tax-cut dollar:

TAXING BUSINESS

Perhaps you feel that the country needs more vigorous speculation in commercial real estate. Perhaps, in your opinion, the national economy is being strangled by a shortage of shopping centers. In that case, you will enthusiastically support the sweeping changes that the Reagan administration proposes for the taxation of business. Otherwise, you ought to think twice.

Perhaps you think that the automobile industry is already sufficiently favored by the tax code, despite its terrific financial losses, and already provides sufficient incentives to investors. The Reagan bill would actually lengthen the present depreciation schedules for the dies, patterns and other special tools that are roughly half of an automobile company's investment flow. Of all major industries, the automobile manufacturers would be offered the least by this bill. If you doubt the wisdom of that balance, you need to take another look at this bill.

This revision of business taxation is an attempt at simplification—radical simplification, impelled by the same radical spirit that touches every part of the Reagan tax policy. By simplifying and sharply speeding up the depreciation of most business assets, the bill attempts to compensate investors for inflation. But there could hardly be a better illustration of the familiar principle of tax law that fairness requires complexity, and the law can be made simpler only by making it less fair.

The drastic increase in tax benefits for commercial buildings is intended to induce a wave of construction of new factories. But the administration chose not to distinguish between factories and stores. Its bill would allow the depreciation of owner-occupied stores in 10 years and rented stores in 15. There are already uneasy murmurs of protest from small businesses that typically use rented space and see their larger and richer competitors paying less for their quarters because they are able to build their own and depreciate them faster.

These extraordinary increases in depreciation benefits may well encourage more investment. But they will certainly create a two-class system of business taxation, in which the heavily capitalized companies pay little tax while all the others pay much more. The administration seems to feel that all investment is equally good and equally to be spurred on. But it's not always the high-investment industries that promise the greatest progress in technology or productivity. In some of them—steel comes to mind—even substantial investment might bring only marginal improvement in a field that does not require expansion of production capacity.

The Reagan administration's proposed simplifications are not, in fact, so simple as they look. Congress is now about to begin rewriting the president's bill. As the debate begins, it will be useful to remember that these changes in the depreciation rules would affect different industries very differently. When the Reagan bill calls for five-year depreciation of machinery, that includes both the auto dies now depreciated in three years and the oil refineries now depreciated in 16 years. The eccentric distribution of these benefits would powerfully affect the terms on which companies and industries compete with each other. There is no evidence whatever, in its program or in its testimony, that the administration has thought much about these consequences. That's a good reason for Congress to think about them very carefully indeed.

VIETNAM VETS DESERVE BETTER TREATMENT

(Mr. MILLER of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. MILLER of California. Mr. Speaker, in its never-ending quest to cut funds from the budget, the Reagan administration has now taken aim at a group of citizens most deserving of public support—our Vietnam veterans.

This past weekend, I heard OMB Director David Stockman say that he did not believe that any citizen had a right to any service, no matter how sick, or poor, or abused that citizen may be. If we abandon our constitutional mandate to "promote the general welfare," we might genuinely ask what the legitimate role of Government is.

But I do not believe that the American people accept that vision of our Government. And I especially do not believe that our people support slashing away at the benefits which were promised to the men and women who served their country in Vietnam.

I cannot believe the hypocrisy of this administration. They promise higher pay and benefits to current soldiers. They promise a new GI bill for future soldiers. But for those who have already served their Nation under the most dangerous and trying of circumstances, this administration wants to pull away the welcome home mat and forget the vet.

To save $70 million in the budget—just 1 percent of the Veterans' Administration budget—this administration is going to deny these veterans job training, educational services, vocational instruction, and medical attention, especially for those exposed to agent orange. Vietnam vets need more, not less, support from their Government. A recently completed study for the VA by the Center for Policy Research concluded that Vietnam veterans suffered from higher rates of alcoholism, drug abuse, and arrests than average citizens.

And what of the needs of the women veterans, so graphically described in the Washington Post this morning? We learn that these women have no obstetric and gynecological services at VA hospitals, and that the special effects of agent orange on their offspring and themselves have been overlooked. The VA says it would be "discriminatory" to create programs to aid these veterans, and I am sure that most Members of this Congress find that statement as incomprehensible as I do.

Betraying our promise to these veterans can only breed cynicism and contempt for Government, and with good reason. Reversing promises to veterans can only undermine the Volunteer Armed Forces, to which this administration is supposedly committed, because potential recruits are bound to doubt the promises made to them in light of the denial of benefits to Vietnam veterans.

Phillip Geyelin of the Washington Post, who has been deeply involved in studying the conditions of Vietnam era veterans, has written a powerful column of the administration's proposal for Vietnam vets, and I want to share that column with my colleagues in the House in hopes that we will resist efforts to abandon our commitment to our veterans.

The articles follow:

FORGOTTEN WOMEN: EFFECTS OF WAR ON FEMALE VIETNAM VETERANS ARE ONLY NOW EMERGING

(By Pete Earley)

Kathy Gunson could not talk about Vietnam, not for years. The former Army nurse from Eugene, Oreg., felt guilty, tainted, frightened, alone. Flashbacks and nightmares of the war haunted her. One morning, she grabbed a pencil.

"I desperately want my childhood back with its innocence and ignorance," she scribbled. "I want to go back to Vietnam and make it different. I want to come home to a marching band and a red carpet. I want to hear a 'Thank you.' I want to hear 'I'm sorry.' Most of all, I want to feel at peace with myself."

She finished writing, and cried.

It has been six years since Saigon fell, but the effects of the war on the 7,484 women stationed in Vietnam, 6,250 as nurses, are only now beginning to surface. Volumes have been written about the problems of the 2.8 million male Vietnam veterans, but no comprehensive study of female veterans has ever been done. Even the eight-year Veterans Administration-sponsored study of the war's multiple impacts on 1,340 veterans released Monday failed to include a single woman.

"Women were forgotten," says Shad Meshad, a former Army psychologist in Vietnam and pioneer in Vietnam veterans' storefront counseling centers. "We are only now beginning to see the war through their eyes."

Most researchers have assumed that since women and men lived through the same war, their reactions to it have been the same. But Meshad and female vets say the woman's role was unique in Vietnam and still is an unexplored issue today.

Although they weren't on the front lines, women saw the worst of the war: An endless procession of mangled bodies across the operating table.

They lived in the swirl of wartime romances that often ended abruptly and painfully. They returned home to not only a hostile nation, but to frequent questions about why a decent woman would want to be stationed half way around the world with so many men. And once home, women seem to have blamed themselves for problems that male Vietnam veterans blamed on the war.

"Women had to be warm fuzzies," explains Meshad, who has counseled more than 200 female Vietnam veterans. "They had to be a wounded soldier's mother, wife, and girlfriend. They saw these beautiful young bodies, 18- and 19-year-old kids, coming in every day with sucking chest wounds and ripped off flesh and they had to hold their hands and tell them everything was okay."

Their anger and frustration built. And unlike the soldiers they treated, nurses could not shoot back.

Nurses were officers," Meshad says. "They were not supposed to date enlisted men. But most male officers were older and married. I don't know how many times a doctor would come to me and tell me he couldn't bear to say goodbye to Jeanie, who was maybe 22 or 23 and deeply in love. They'd ask me to do it for them."

Because women "are brought up to nurture and protect others," says Meshad, "many of the nurses felt like failures because, no matter what they did, the GIs kept dying."

"Every Vietnam vet was told he was a fool, a real sucker, for going over there, but for women, it's been even worse," explains Lynda Van Devanter, a 33-year-old former Army nurse in Vietnam who last year headed a task force studying women veterans for the VA. "People figure you were either a hooker or a lesbian if you were a woman in the Army in Vietnam. Why else would a woman want to be with 500,000 men unless she was servicing them?"

Van Devanter's task force learned that few women take advantage of GI benefits, most VA hospitals do not have obstetric/gynecologic services and that no studies have been done to discover how the Agent Orange defoliant may have affected women soldiers. Van Devanter and her husband are delaying a family because they know the chemical has been linked with birth defects.

VA spokesman Julian Morrison insists that women veterans have not been ignored. VA hospitals may not have facilities for women, he says, but the VA will send women to private clinics and pay the tab.

"Only 2.3 percent of veterans are women," Morrison says. "They are entitled to the same benefits as the men, but it would be discriminatory to create programs just for them."

But Van Devanter, now head of the women's program of the Vietnam Veterans of America, says many women simply do not realize their problems might be war related, in part because the VA has failed to reach out to women.

"I'd cry for days, once for six months," she remembers. "I'd wake up crying and spend the entire day in tears.

"I kept losing jobs. I went on unemployment, food stamps and welfare. I couldn't sleep. I kept having the same nightmare over and over again so I'd stay awake drinking, afraid to go to bed."

Without knowing it, Van Devanter was suffering delayed shock syndrome—a delayed reaction to a stress common in male Vietnam vets. Van Devanter would feel guilty and have constant headaches. She'd explode at her husband and friends for no reason. She could not concentrate or remember what people had said. She wanted to be alone, yet she was lonely and afraid.

She went to a therapist, but never told him about Vietnam—or her recurring nightmare.

"We talked about marital problems and other pressures, but I kept telling myself that Vietnam was five, six, seven years ago," she says. "I was afraid my therapist would think I was crazy if I told him about Vietnam."

"I was ashamed of Vietnam," she says.

Van Devanter learned about delayed stress only after meeting Meshad by chance. He forced her to "walk through Vietnam

day by day." The story she told him was similar to the stories he had heard from dozens of other women Vietnam veterans suffering from memories of the war.

"It is 3 a.m. in Pleiku, South Vietnam," says Van Devanter as she recalls the nightmare she told Meshad. It's been 10 years, but her hands still tremble.

"I had been sleeping under my cot because I was afraid of the rocket attack outside. It is only a few days until my hump point, when I will pass the half-way point of my tour.

"They send me to the neuro emergency room. The longest trail of blood I have ever seen leads the way." Her voice is a monotone. "He is there. His entire face was blown away when a flare he was handling exploded. A perfect set of straight, even, white teeth is swinging from a jaw that dangles loose.

"The anesthetist yells at me and the wall goes up. I become a robot, doing my job."

For eight hours, the medical team labors over the young soldier, pumping 120 units of blood through needles in his leg, neck and both arms.

"I always believed that you could stop bleeding. The lesson I learned that night was that we have developed the ability to destroy something beyond repair."

While changing a blood bag, Van Devanter kicked the soldier's clothes which were on the floor. A photograph fell out.

"It's a picture of him and a girl. He is gazing sweetly at her. Straight, blond and tall, he looks proud in his tuxedo. She, too, is tall with shining dark hair and a pastel gown. Suddenly, he is real again and the wall falls down. I gaze at the mass of blood vessels and burned skin in front of me and I feel sick."

Again, someone yells at her, and she becomes a robot. Finally, the team gives up.

"We wrap his face with layers of pressure dressings and send him to post-op intensive-care to die," she says. Her eyes fill with tears. "I keep telling myself that a miracle could happen. He could stop bleeding. He'd be all right. Picking up the bloody linens and putting them into the hamper, I see the photograph again and stare at it.

"This boy was real. He was a person who could love and think and plan and dream and now he is nothing, there is nothing left.

"I must see him again. I take his hand. Already the blood is coming through the bandages. I ask him if he is in pain. He squeezes my hand. I ask him if he wants pain medicine. He squeezes again. I call a nurse and tell her to give him some. I know it will cause him to go faster. That's what I want to do, for him to go easy.

"I stand with him, 20-30 minutes. I want to say something, to tell him it is okay that he will be fine and that I care.

"He stops breathing. He's dead. I am crying. I want my mother and father. I want to go home and forget everything that is around me, the death, the destruction that I am a part of, but they are calling me, saying more wounded are coming and I must put the wall up again. Always the wall."

A "NOBLE CAUSE" LOST?

Much has been made, and quite rightly, of the Reagan administration's decision to shut down some 91 "storefront" counseling centers for Vietnam veterans across the country. But that is only the first wave of the assault on Vietnam War veterans by David Stockman's Office of Managment and Budget.

As if by the most careful calculation, OMB has gone through the federal budget and neatly excised programs of the Labor and Education departments, as well as the Veterans' Administration, specifically designed to help those who served in the military in the Vietnam years. Marked for extinction are efforts to hire the disabled; to find jobs for the unemployed; to promote education and vocational training; to deal with psychological readjustment; to ease the anxiety and provide medical attention for those fearful of exposure to the toxic effects of the dreaded herbicide Agent Orange.

Says one Vietnam veteran advocate in the Labor Department: "It's a wipeout of the only benefits that we were able to get in all of the last 10 years." Total savings: $70 million—less than one percent of total VA outlays.

Now where, you might ask, does this special pleading fit into a column regularly devoted to foreign policy and matters having to do with national security? I would turn to President Reagan's own spoken record to make the connection.

"Because our national security is so dependent upon the people in our armed forces, we must do all in our power to assure that they are of the highest caliber," Reagan told the American Legion last year, in mid-campaign. "The key to building and retaining effective military forces is to encourage people to pursue a career in the services of their choice."

One way to "attract and retain superior people," he went on, is "to restore the GI Bill, one of the most effective, equitable and socially important programs ever devised."

True to his word, the president is supporting a new peacetime GI Bill to provide education and other benefits for the military veterans of the future. But in the very same budget he would strip away a provision that would have extended for another two years the expiration date of GI Bill education benefits for those who served in the time of the Vietnam War.

That is precisely the part of the connection between national security and public policy on the treatment accorded Vietnam veterans that the president and his budget-cutters can't seem to make. In their efforts to make military service more attractive, respectable, honorable—to lay to rest that part of the so-called Vietnam syndrome—the government would dangle the carrot of aid to education and other compensation for time lost and service rendered. The hope would be to avoid having to use the stick of conscription.

But just how enticing is that carrot likely to look to potential volunteers when, at the same time, comparable benefits for the most recent generation of veterans are among the first items singled out for budget cuts in a government economy drive?

You think the present generation of potential veterans won't notice? Perhaps. But it won't be for lack of effort by the Vietnam veterans, already thoroughly aroused by Stockman's handiwork. Their numbers, you could say, are relatively small: Some 9 million men and women were in uniform in the Vietnam years, of which about 2.6 million actually served in the combat zone. And it is often said that the Vietnam experience for most veterans was, in fact, not all that much more stressful than in other wars.

But more than enough respected psychologists and psychiatrists have come up with persuasive evidence that just as the war was distinctively destructive, so was its emotional impact on many of those who were caught up in it and its aftereffects.

Last year, in his famous defense of the Vietnam effort as a "noble cause," Reagan was at pains to note that "we have been shabby in our treatment of those who returned." Last month, hailing their valor, he talked of Vietnam veterans, not as having been "defeated" but as having been "denied permission to win."

Does it not occur to him that this experience alone must have taken some considerable emotional and psychiatric toll?

Psychologist John Wilson, director of a definitive study, "The Forgotten Warrior," argues that "appallingly few psychiatric people know anything about Vietnam veterans—they are misdiagnosed, mistreated." He estimates there are a half-million or so alienated Vietnam veterans beyond the reach of conventional VA medical help.

Hence the 91 VA "outreach centers" in modest, unforbidding storefronts, manned largely by fellow Vietnam veterans. Those are the community-based operations David Stockman would disband, on the ground that the established facilities of the federal government can do the job.

That is not only "shabby." It is also an invitation for a "single issue" political outcry that, however indirectly, cannot help having serious repercussions for the military services—and, by extension, for national security.

LEGISLATION INTRODUCED TO KEEP AMERICAN CREDIT SYSTEM FROM DESTROYING AMERICAN AUTOMOBILE INDUSTRY

(Mr. ERTEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ERTEL. Mr. Speaker, the legislation I am introducing today will keep the American credit system from destroying the American automobile industry.

In 1979, fully 90 percent of the imports sold on credit in the United States were financed for a period of 3 years or more. Obviously, the American consumer places great weight in our credit system when buying an automobile, but I must ask: "Why should we finance Japanese imports to this country through our credit industry?"

Specifically, my bill will limit the financing for the purchase of a Japanese automobile to 25 months and require as a minimum a 15-percent down payment.

Why this approach?

First, unlike quotas, it does not deny American consumers their right to purchase a Japanese automobile if it is the product of their choice. Also, unlike quotas, it will not drive up the cost of automobiles in this country by artificially restricting supply.

My legislation also is more than fair to the Japanese. Japan imposes the same 25 month, 15 percent down payment requirements on Japanese consumers. But in Japan, because of the market and government, a $6,000

American-made automobile would sell for over $12,000.

I certainly would urge the administration, the Senate, and this House to fully consider this legislation.

Mr. Speaker, I believe the legislation I am introducing will contribute in a beneficial way to a resolution of the Japanese automobile import question.

All of us certainly are aware of the problem. Sales of imported passenger cars from Japan more than doubled from 817,000 units in 1975 to 1,908,000 units in 1980. Japanese automobiles now account for more than 21 percent of all new car sales in the United States.

This Japanese penetration occurs at a time when the domestic automobile industry is extremely vulnerable, requiring breathing room for the retooling necessary for the production of smaller, more fuel efficient automobiles. Last year, domestic automobile sales dropped 16 percent; Japanese automobile sales in the United States increased 7.8 percent.

A number of proposals have been recommended for easing the plight of the domestic automobile industry. They include consumer subsidies and income tax credits for the purchase of U.S. automobiles, postponing mandated safety and emission standards, and a reduction of the 15-percent tariff on imported automobile parts.

However, the issue comes down to a question of quotas.

This Nation has a free-trader tradition and most Americans would prefer to see no quotas, formal or informal, voluntary or involuntary. But, with 1 of every 12 U.S. manufacturing jobs in the United States directly tied to the domestic automobile industry, and with several Western European nations—Italy, France, Great Britain—having already negotiated quotas on Japanese automobile imports (Belgium, Luxembourg, and the Netherlands are negotiating quotas and Germany is expected to follow suit), it is imperative that this Nation take some action to slow the rate of Japanese penetration of the domestic market.

There are, however, some very good reasons why quotas are inappropriate. First, and rooted in our free-trade tradition, quotas, voluntary or involuntary, artificially deny the American consumer the right to purchase the product of his choice by limiting available supply. Quotas, again by restricting supply, intensify demand and inflate prices. The organization, Consumers for World Trade, estimates that quotas would increase both Japanese and American automobile prices from between $527 and $838 per car, because of reduced competition.

The legislation I am introducing today will, I believe, slow the rate of Japanese penetration of the U.S. automobile market and give the domestic automobile industry its breathing room, without imposing quotas.

Specifically, my bill will limit the financing for the purchase of a Japanese automobile to 25 months and require as a minimum a 15-percent down payment.

Why this approach? First, while these conditions may make it more difficult for some American consumers to purchase a Japanese automobile, it certainly does not deny them their right to do so. Certainly, if a Japanese automobile is the consumer's preferred choice, he or she may have to save a little more before making the purchase. But, every American who wants to purchase a Japanese automobile will not have to worry about quotas restricting a car's availability when the time comes, nor an artificially inflated price because of the restricted supply.

Second, I believe my approach is more than fair to the Japanese. Japanese consumers are limited to the same 25 months and 15 percent down payment when they purchase cars in Japan. These conditions extend to both the purchase of Japanese and foreign imports, including American cars, in Japan. But, Japan imposes on American automobiles additional costs which make American cars much more expensive to the Japanese consumer than Japanese cars. Let me give you an example. According to a General Accounting Office study, a compact-size American automobile retailing in the United States for $6,635 would sell in Japan for $12,065. Let me stress that this $6,000 add-on is above and beyond what the U.S. Government and market impose on Japanese cars coming into the United States. A Japanese automobile retailing for $6,635 in Japan could be expected to sell in the United States for about the same $6,635.

In Japan, the consumer has to decide whether he wants to put $900 down and finance the remaining $5,700 over 25 months for the purchase of a Japanese car, or whether he wants to put $1,800 down and finance the remaining $10,200 over 25 months for the purchase of an American automobile. The choice for the Japanese consumer, I think, is obvious.

The legislation I am offering does not impose the additional costs on Japanese automobiles that Japan imposes on American automobiles. This legislation only limits the credit terms for the purchase of Japanese automobiles, which, let me stress again, sell in the United States for about the same price as they do in Japan. Therefore, Japanese automobiles still will be more readily available to American consumers than American automobiles are to Japanese consumers.

The point here, however is that the approach I am suggesting in this legislation is more than fair to Japan. This approach also is more reasonable than quota restrictions from the American consumer's perspective. I certainly would urge the administration, the Senate, and this House to fully consider this legislation.

INFLATION: CRISIS OF THE AMERICAN DREAM

(Mr. PARRIS asked and was given permission to address the House for 1 minute and to revise and extend his remarks and to include extraneous material.)

Mr. PARRIS. Mr. Speaker, last December Mr. Finn M. W. Caspersen, chairman, Beneficial Operation, serving as cochairman at the seminar on inflation, delivered some remarks on the question of inflation. I commend the attention of the House to the remarks he made at that time. I have paraphrased his remarks and insert them in the RECORD on the subject of "Inflation: Crisis of the American Dream."

Mr. Speaker, the remarks follow:

The topic of inflation has been marked by innumerable technical dissertations, many of which have been correct in their proposed solutions. But none have worked. All have failed beause they have not galvanized the nation to action. Technical expertise is not the answer—action is. Accordingly, my comments will be extremely broad with the caveat that implementation will be complex, detailed, difficult, and indeed, often painful.

Inflation is simply the rapid upward spiral of the price of goods and services which increases the price of labor-wages, the price of goods, and the price of capital for investment-interest.

These cost increases have severely disrupted our economy. They have created an economic lethargy as opposed to an emphasis on dynamic, productive enterprise. Inventory profits often exceed those of the operating enterprise. Individuals and institutions are paralyzed—more influenced by inflationary expectations than by actions that would enhance society's collective wealth and employment.

Most importantly, inflation levies a disproportionate burden on the moderate and lower income sectors of America. I am acutely aware of the problems and deprivation being endured. Simply stated, it is the middle class and disadvantaged who suffer most from inflation. Inflation is not a significant problem to the wealthy. Inflation is by far the most regressive tax, afflicting those who can least afford it.

The causes of inflation are much debated with each group trying to blame the other. Accordingly, it is easier to start off by stating what is not the cause.

Inflation is not caused by a profligate American society. Today's average American is no more profligate or licentious than our predecessors. The American consumer is merely reacting to the new inflationary rules of the game which have clearly set a negative real return for consumer savings as compared with a positive real return for borrowing to the hilt.

Secondly, I strongly believe that inflation is not caused by the wage demands of the American worker. While productivity has decreased on an annual basis for 1980, and

conversely wages have increased approximately 10 percent, this is a result of inflation, not the cause. In fact, the real disposable income of the average American, after inflation, is now actually declining.

The American worker is as productive, efficient, and innovative as any in the world. However, to compete internationally and increase productivity, American workers must be given the tools to properly exercise their skills and talents and these tools must be purchased by capital made available to business at a reasonable cost. Productivity in the U.S. is not just a function of the industriousness of our work force—it is equally a function of their tools.

What then are the causes of inflation? Obviously, they are multitudinous with no single item having sole responsibility.

The recent dramatic escalation of energy cost is often pointed to as a prime scapegoat. I disagree. As significant as the OPEC price increases have been, by far the most important cause of inflation is government policies that directly and indirectly cause misallocation of resources. Specifically, I refer to government tax policy, government social policy, government monetary policy, government fiscal policy and government regulatory policy. In contrasting the relative impact of OPEC increases with Government tax policy, one must note that the federal tax burden on American families during the last five years rose eight times as much as their fuel bill. The correlation between government fiscal policy and inflation is clear from the deficits of recent years. During the 1966–79 period, a time of unparalleled inflation, the average annual federal deficit was nine times as much as the 1947–66 period, a time of low inflation.

The solutions to inflation are even more debated than the causes. I do not believe the solution to our present inflationary crisis lies primarily in restraining demand—i.e., the so-called root canal theory, the more it hurts, the better it is for you.

Similarly, the solution does not lie solely with restrictive monetary policy or the variant now being practiced. The Federal Reserve cannot soak federal deficits of the present magnitude solely thru manipulation of monetary and credit policies. High interest rate themselves exacerbate the federal fiscal deficit and deprive the productive sector of the economy of needed capital. With close to a trillion dollars of federal debt, even a one percent interest increase over a period of time will increase federal debt service and deficits by 10 billion dollars annually and thus further crowd the private sector from capital markets.

We have seen the impact of the Treasury Department stepping up to the nations credit window and withdrawing the majority of the available funds.

While monetary policy is not the sole solution, we do need a consistent apolitical monetary policy to provide the necessary environment for a solution to inflation. Such a monetary policy should aim to achieve moderate growth over the long-term—a growth that is consistent with the real growth of the economy.

If the country is to truly control inflation, we must alter past policies which have resulted in misallocation of resources, government, human and capital.

First. There must be steady movement towards a balanced budget. We must restore sanity to government fiscal policy—during fiscal 1980 alone, we had a deficit of almost $60 billion with another $20 billion in off-budget items. Present deficits are pricing and forcing the productive sectors out of the market. Federal deficits decrease productivity.

Second. Government social programs must be reviewed and revised, including the many sacred cows. I am not, I repeat not, using this as a shorthand way of advocating the elimination or minimization of benefits for those who require them. Those with lower and moderate incomes are already bearing the brunt of inflation. It would be socially unthinkable and politically impossible to ask them at the same time to bear the brunt of anti-inflationary policies.

However, the thrust of most of today's governmental social programs is pallative rather than solution oriented. Instead, programs should be solely aimed at solving structural problems and restoring the disadvantaged to productive roles. Social programs should not be aimed at making a miserable existence slightly more bearable. Such revisions in our social programs will be extremely difficult and not the least difficulty will be that successful program administrators will be successfully eliminating their own jobs.

Revisions must be made, not only from the standpoint of social conscience, but also because we cannot afford the structure of an unproductive human sector which present programs have produced.

Third. Government regulatory policies, both federal and state, must be subject to a most careful cost-benefit analysis and then subject to regular periodic reviews to see if the original estimates were, in fact, correct.

These analyses should clearly state how many jobs a given regulation or action will cost and what will be the negative multiplier effect on the economy as a whole. What is the true cost to society of Justice Department actions, what is the cost of an FTC judge advancing a novel theory in the real world.

Artificial governmental regulatory barriers to the allocation of resources, human and capital, must be discarded.

Fourth. Present federal tax policies must be dramatically revised.

Several specific areas of tax policy require the greatest attention.

Individual Income Taxes: Inflation caused bracket creep is increasing the real tax burden on those with low or moderate incomes. At the same time these groups, because of inflation, have a diminished ability to pay these taxes. Obviously, changes are needed.

Business Taxes: The entire federal tax policy with respect to business must be carefully reviewed. This is where both jobs and productivity originate.

Capital Gains: The present capital gains tax has resulted in the systemic withdrawal of productive capital from the private sector because of inflation induced appreciation. This must be changed.

Incentive to Save: Most importantly, there must be a dramatically increased incentive to save. We must drive down the cost of capital accumulation if we are to significantly increase productivity and jobs. Such a program should start with the ultimate saver—the average American, the man or woman on Main Street. But, before we can induce such savings, an attractive real return must be assured to the small saver, not the present inflationary induced negative return.

We must encourage savings and investment and move urgently needed resources into the capital markets. Because of the increase in the supply of capital, interest rates would soon plummet and all segments, individuals as well as business, would benefit, including the hard hit housing and automotive sectors.

Doubtless, the task of implementing necessary changes will be most difficult. They cannot be accomplished overnight—it will be a decade-long effort.

But changes must be made. The present situation is intolerable, penalizing those who can least affort it. Change we must, or the economic and political system as we know it, will not survive.

THE CONGRESS MUST AUDIT ITSELF

(Mr. McCLORY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McCLORY. Mr. Speaker, I am today introducing a bill to establish a Joint Committee on the Legislative Branch, the primary purpose of which is to provide a mechanism for a regular and thorough audit of all expenditures of the legislative branch of the Federal Government.

In an article on waste and fraud in Government in this week's issue of U.S. News & World Report, the magazine notes that the General Accounting Office, the agency of the Congress created to serve as a watchdog on spending by executive branch agencies, itself escapes regular review; as the magazine puts it, nobody is watching the watchdog.

My bill is designed to correct not only lack of oversight of the GAO but of all the other legislative branch agencies such as the Library of Congress, the Office of Technology Assessment, and so on. The joint committee created by my bill would be an evenly bipartisan committee, composed of an equal number of majority and minority members from both bodies of the Congress. The committee would have only a small staff and would meet only as frequently as needed to accomplish its oversight purpose, and since it would assume the duties of both the Joint Committee on the Library and the Joint Committee on Printing, I feel the new committee would not be a significant additional burden either in dollar cost or in the cost of time required to be devoted to it by its members. In the long run, I hope the new committee would add up to a saving in legislative branch expenditures by uncovering waste, inefficiency, or obsolescence in our own branch of the Government.

In fiscal 1980, appropriations for the legislative branch were as follows:

Senate	$206,884,000
House	312,903,900
Joint items	60,152,500
Architect of the Capitol	62,756,000
Botanic Garden	1,464,000
Congressional Budget Office	12,117,000
Office of Technology Assessment	11,000,000
Library of Congress	177,491,000
Government Printing Office	111,146,000
General Accounting Office	200,300,000

Cost Accounting Standards Board	1,300,000
Copyright Royalty Commission	471,000
Total regular and supplemental appropriations	1,168,382,063

Admittedly, our billion-dollar-plus Congress seems only a drop in the bucket when compared to the hundreds of billions appropriated for programs and administrative costs of the executive branch of the Federal Government. The principle matters more than the figures, however. How can we in Congress continuously point an accusing finger at the executive branch when we give no regular accounting to the American people for the way in which money is spent to operate the Congress and its agencies?

Some activities of the Congress, of course, are closely monitored and minutely accounted for, as in office accounts of individual Members of the House of Representatives. Other activities, however, as in the case of so-called investigative staff of House committees, undergo scrutiny in name only.

Mr. Speaker, I am well aware of the traditional comity between the Houses of Congress that permits each body to administer its own internal affairs. However, we now have a number of legislative branch agencies accountable neither to the Senate nor to the House, and therefore not accountable to the American public, that should be subject to some regular oversight procedure by the Congress as a whole. Creation of a Joint Committee on the Legislative Branch would bring all of the pieces of the puzzle together and give a total picture of the operations of the U.S. Congress.

As we discuss funding resolutions for the committees, this seems to me an appropriate day upon which to take note of the absence in the U.S. Congress of a regular procedure for auditing and reporting on the expenditure of the taxpayers' money to run the legislative branch of the Government.

Mr. Speaker, the American voters sent us a message last November that they were fed up with business as usual in Washington. We in the Congress can take a great step toward restoring the people's confidence in their Government by instituting a procedure for systematic review and accounting of activities and expenditures of the legislative branch of the Federal Establishment.

INTRODUCTION OF BILL TO LIMIT CIRCUMSTANCES UNDER WHICH FOREIGN GOVERNMENTS MAY SUE FOR VIOLATIONS OF ANTITRUST LAWS

(Mr. BUTLER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BUTLER. Mr. Speaker, today I am introducing a bill in the House to remedy what I believe to be a fundamental unfairness in our antitrust laws as they are made applicable to foreign governments suing in our courts.

Some Members may be familiar with the decision of the Supreme Court in *Pfizer* v. *India* (434 U.S. 306 (1978)), which by clarifying an issue never before decided by the Court has precipitated this legislation. The Pfizer decision held that a foreign nation otherwise entitled to sue in the courts of the United States is a "person" within the meaning of section 4 of the Clayton Act and is therefore entitled to sue under the antitrust laws to the same extent as any other plaintiff. In other words, not only private persons and corporations but even foreign governments have the right to come into our courts and seek recovery of treble damages for injuries to their business or property arising from antitrust violations. In the case of foreign governments, there is no requirement that U.S. corporations be afforded equivalent opportunities for recovery for similar antitrust injuries which they may sustain within the national boundaries of such foreign government at the hands of business entities there. The probability is very great indeed, as a matter of fact, that the foreign nation has no antitrust law, or that it is not enforced. This is true in virtually all parts of the world outside of Western Europe. So we have a one-way street, with American corporations being liable for antitrust violations but often having no effective recourse if they are themselves the victims. Not only that, but when our own Government comes into court in this country with an antitrust claim it can only recover single or actual damages under the law.

After giving this situation some thought, and after reviewing a proposal made in the House and Senate several years ago to bar foreign governments absolutely from any antitrust recoveries in our courts, I decided to take a middle course based on the ideas of equality and reciprocity.

The bill I am intoducing makes foreign governments and their instrumentalities—such as government agencies and corporations over which the governments exercise control—equal to our own Government in being limited to actual damages, plus cost of the suit including reasonable attorneys fees. It also provides that foreign governments may not maintain an action in our courts unless the allegedly unlawful conduct on which their claim is based was illegal under their own laws at the time of the violation, which were enforced, and unless such law permits recovery of actual damages by the U.S. Government if it is injured by similar conduct. To give an example, before an American corporation can be sued in this country by a foreign government for price fixing, it must be established that price fixing was illegal and prosecuted as such in the plaintiff foreign nation, and also that our Government would be able to recover damages there for injuries arising from a similar conspiracy.

Reducing recoveries by foreign governments from treble to no more than single damages will preserve both the compensatory and deterrent effects of our antitrust laws. And the reciprocity requirement may arguably inspire some foreign nations, anticipating the day when they might wish to qualify as plaintiffs in our courts, to enact their own antitrust laws.

I do not begrudge fairly proven antitrust recoveries against American corporations by foreign governments when there is reciprocity; I do begrudge them when foreign government plaintiffs receive treble damages when our own Government is confined to single damages, and when reciprocity does not exist.

I do wish Members to be aware, however, that section 2 of my bill makes it expressly applicable to pending actions. While this would normally be the case with legislation enacted by the Congress, the provisions of title 1, United States Code, section 109, raises the question whether that would be the case in this instance without such express language. Title 1, United States Code, section 109, provides in relevant part that the repeal of any statute shall not have the effect of releasing or extinguishing any penalty, liability, or forfeiture incurred unless the repealing act shall so expressly provide. This bill may not technically be a repeal but it clearly reduces liability for injuries to the business or property of foreign governments or their instrumentalities from treble to actual or single damages, or to no damages at all if the foreign government fails to meet the reciprocity test, and so it seems advisable to cover this point in the legislation rather than have the lawyers argue about the application of title 1, United States Code, section 109, in court.

So far as I am aware, there is only one pending action to which this legislation would expressly apply by reason of the language of section 2. This is the treble damage antitrust action brought under section 4 of the Clayton Act by the Governments of India, the Philippines, West Germany, Colombia, Iran, and North Vietnam against Pfizer and five other U.S. pharmaceutical manufacturers for conspiring to restrain trade and attempting to monopolize the patent for broad spectrum antibiotics. The litigation arises over exports from the United States and third countries and is scheduled to proceed to trial this

summer in Federal district court in Philadelphia.

LEGISLATION TO STIMULATE SAVINGS AND INVESTMENT

The SPEAKER pro tempore (Mr. MURTHA). Under a previous order of the House, the gentleman from Iowa (Mr. TAUKE) is recognized for 5 minutes.

● Mr. TAUKE. Mr. Speaker, in order to stimulate savings and investment, I have reintroduced legislation to increase the current amount of interest and dividends that each individual may exclude from gross income for tax purposes. Originally introduced in the 96th Congress in a different form, my bill would phase in over a 3-year period a $300 increase in the amount of the existing exclusion, established by the crude oil windfall profit tax legislation in 1980, thus raising the level to $500 for an individual return and $1,000 for a joint return.

Moreover, my bill will make the exclusion a permanent part of the Internal Revenue Service Code.

The reasons for the legislation are evident. We have all seen the disturbing figures that highlight the low level of savings in the United States. We save at a rate of less than 5 percent of our income, while the British, West Germans, and Japanese save at rates of 13, 15, and 20 percent, respectively. In addition, we have all been exposed to the need to revitalize our economy through capital formation. And finally, we are all aware of the undue hardship that inflation and tax disincentives have caused the average American saver.

To militate against these disturbing conditions, my legislation is designed to accomplish three major objectives:

First. To once again make savings a profitable venture. The $200/$400 exclusion is a step in the right direction, but the ceiling is not high enough. The $500/$1,000 levels in my bill are reasonable and affordable.

Second. To provide some sort of equity to the tax laws, as they relate to the small saver. Those who do save in small amounts will have access to tax-free investments currently available to those who save in large amounts.

Third. To reduce the fiscal impact on the Treasury. While I would ideally like to see the total exclusion implemented now, I believe a 3-year phase-in is a more realistic approach, particularly in light of all of the other tax legislation that is currently pending. Increased saving, however, will stimulate investment and economic growth, thereby providing a natural rise in Government tax revenues. By the end of 3 years, we will, hopefully, make up a substantial portion of the revenues lost through the tax exemption.

The bill also has some other positive side effects. By dealing with both interest on savings and dividends from stock investments, the legislation will encourage investments in stocks as well as in interest-bearing accounts, thereby preventing a shift of funds from one to the other. And, in addition, the bill will provide a desperately needed benefit to the housing industry, as well as to other sectors of the business community.●

THE POSTAL MANAGEMENT REFORM ACT OF 1981

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. CORCORAN) is recognized for 5 minutes.

● Mr. CORCORAN. Mr. Speaker, I am introducing legislation today that would restructure the top management organization of the U.S. Postal Service. Under current law, the Postal Service is run on a day-to-day basis by the Postmaster General, who is an appointee of the Board of Governors. With the exception of the Postmaster General and the Deputy Postmaster General, the Board of Governors is an obscure group. It is composed of 11 people who meet sporadically throughout the year to pass on the Postmaster General's recommendations. The members of this Board have no particular expertise in postal matters, no staff, and they rely on the expertise of the Postmaster General and on the information provided them by the Postal Service. Their decisions, then, amount to rubber stamps—but costly rubber stamps, as these individuals are paid the generous sum of $10,000 per year plus $300 per day for their work, plus travel and expenses.

The Board of Governors serves a function other than that of rubber stamp, but it is no more desirable a function. They provide a layer of bureaucracy that can be used to excuse poor policy decisions, and they serve to further muddy the waters between the people and the Postal Service that is supposed to be serving the people.

Examples of the Board's less than impressive operations are easy to come by, but a very recent example is particularly instructive. On February 19, the Postal Rate Commission issued a recommended rate decision for increased postal rates. You may be familiar with this decision because it included an 18-cent first class stamp, whereas the Postal Service and the Board of Governors had requested a 20-cent first class stamp. The recommended decision of the Postal Rate Commission provided a billion dollars less in revenues than the Postal Service had requested.

The Board of Governors, which is charged with making the final decision on whether to accept or reject this recommendation, did not even meet until 11 days after the Postal Rate Commission issued its recommendation. They did not decide to implement the recommended rates while remanding them for further consideration until 19 days after the recommended decision. Finally, they set a date for implementation under protest that was 31 days after issuance of the recommended decision. At a rate of about $7.5 million per day, this 31-day delay cost $232.5 million. That is more than one-fifth of the loss due to the rate decision in the first place. This is an unconscionable delay when the Postal Service says it cannot function without more revenues. The Board claims the Postal Service will be forced to file another rate case almost immediately if the rate decision is not modified, yet they wasted $232.5 million and 31 days trying to decide whether or not to implement the decision.

When the Board of Governors testified before Congress last year, the members of the Board were unwilling to make any recommendation whatsoever as to whether or not 6-day delivery should be eliminated. It was the single biggest issue facing the Postal Service and the Committee on Post Office and Civil Service at that time, and the Board had no position on the matter.

This Board of Governors strikes me as an expensive boondoggle, and I say it should be eliminated. In its stead, my bill would make the Postmaster General a Presidential appointee serving at the pleasure of the President. His salary would be set at executive level 1, Cabinet level, and he would provide the people with a manager of the Postal Service who is directly accountable to the people through the President, an elected representative of the people.

Such a change in the organizational structure of the Postal Service would be particularly necessary in light of proposed changes in the financing of the Postal Service. President Reagan's budget would eliminate the public service subsidy of the Postal Service altogether by 1984, severing the last tie between Congress and the Postal Service. If the Postal Service has no direct link to Congress and no direct link to the President, we will have created a Postal Service with a monopoly over first class mail, but with no public accountability whatsoever.

That is a prescription for abuse of the public interest if ever I have seen one. In the interest of a more smoothly managed, more efficient, and more responsive Postal Service, I urge my colleagues to support reorganization of the postal management structure.●

THE 1981 ACTION AGENDA OF THE NATIONAL ASSOCIATION OF HOUSING COOPERATIVES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Connecticut (Mr. McKINNEY) is recognized for 10 minutes.

● Mr. McKINNEY. Mr. Speaker, a housing cooperative is a corporation that owns the housing development in which the resident/members live. Each resident owns a share or a membership in the nonprofit cooperative housing corporation, and has an equal vote in electing the board of directors, which makes all policy decisions regarding the operation of the cooperative. Because the board of directors controls the budget, cooperative residents can make real decisions about housing costs. They can develop methods of handling inflation, energy management, and additional services that members may desire. Through cooperatives, members can build strong communities.

Much of the impetus for my support of the cooperative form of ownership arises from a fruitful relationship with Roger Willcox, president of the National Association of Housing Cooperatives, a resident of my hometown, Bridgeport, Conn., and a true "father" of cooperative housing in the United States. At its 20th annual conference, held recently in San Diego, the National Association of Housing Cooperatives honored Mr. Willcox with a plaque for his effective leadership, sound and diligent guidance and his many contributions in furthering the principles and causes of cooperative housing in the United States. I concur in that praise, and also wish to acknowledge Mr. Willcox for his many years of tireless and invaluable assistance in bringing cooperative homeownership opportunities to so many families throughout the United States.

Mr. Speaker, also I am pleased to include in the RECORD the 1981 Action Agenda of the National Association of Housing Cooperatives. The Action Agenda represents issues that should be considered in developing national policies and programs as they relate to the development and continued successful operations of housing cooperatives. It is important, as we search for innovative means of delivering affordable housing, that we fully explore the benefits of cooperative ownership.

The agenda is as follows:

PART I—HOUSING FINANCE: REHABILITATION, CONVERSION AND NEW CONSTRUCTION

1. Proposed action: Ensure full and continued support for the National Consumer Cooperative Bank.

NAHC position: NAHC notes with approval the March 21, 1980 opening of the National Consumer Cooperative Bank. The Bank can be an invaluable resource for the development and growth of consumer cooperatives in this country. While ultimately loans available to the cooperative housing sector will be limited to 30% of the Bank's capitalization, an effective use of the Bank's resources can leverage far more than it's very limited housing capital. NAHC supports a leadership role for the Co-op Bank within the Federal government to coordinate Federal support of consumer cooperatives.

Administrative action: None required.

Legislative action: Congress should appropriate full funding for the National Consumer Cooperative Bank and reauthorize Title II of the Act.

2. Proposed action: Promote the financing of housing cooperatives by state and local Housing Finance Agencies (HFA).

NAHC position: State and local HFAs provide an important resource for the financing of low, moderate and middle income housing projects. Although cooperative housing has proven to be successful for low and moderate income families, many HFAs currently do not finance the development of housing cooperatives. Federal assistance to HFAs provides a basis for HUD to assure that cooperative housing is financed at the state and local level.

Administrative action: State and local HFAs should make provisions for the financing of cooperative housing; Secretary of HUD should adopt a policy that encourages HFAs in this regard.

Legislative action: None required.

3. Proposed action: Assure continued funding for the College Housing Program.

NAHC position: For a variety of reasons, students need special assistance in obtaining safe and sound housing. The College Housing Program, formerly administered by HUD and to be administered by the Department of Education beginning in fiscal year 1981, has proven to be an invaluable source of funding for both college sponsored dormitories and student sponsored cooperative housing. This program should be continued, and at a minimum, loans should be made out of a revolving fund composed of the repayments of principal on previous loans.

Administrative action: Secretary of Education should continue the College Housing Program and request increased appropriations into the Fund for fiscal year 1982.

Legislative action: Appropriate adequate funds for the College Housing Program.

4. Proposed action: Develop regulations which will promote the conversion of HUD-held properties to cooperative ownership.

NAHC position: Conversion to cooperative ownership is a major avenue for returning HUD-held properties to the private housing market. Both Section 246 of the National Housing Act and Section 203(a) of the Housing and Community Development Amendments of 1978 encourage HUD to preserve Department-held properties as cooperative housing. The full implementation of this directive would include an evaluation of all HUD-held properties prior to disposition to determine the feasibility of conversion to tenant cooperative ownership. Conversion to cooperatives would put these properties back on the housing market and meet the long desired social objectives of providing low and moderate income families with homeownership.

Administrative action: HUD should determine the feasibility of conversion to tenant cooperative ownership prior to disposition of Department-held properties.

Legislative action: None required.

5. Proposed action: Encourage the use of the Section 8 "certificate" and "set aside" programs by housing cooperatives.

NAHC position: Cooperative housing has proven to be a desirable and cost effective use of federal housing assistance to low and moderate income families. Currently, about 5000 units of cooperative housing receive assistance under the Section 8 program. To ensure the consistent and successful use of Section 8 by housing cooperatives, the Special Assistant to the Commissioner for Cooperative Housing should add a chapter to the Section 8 Handbook to cover housing cooperatives.

Administrative action: HUD should add a chapter to the Section 8 Handbook to cover housing cooperatives and support a set-aside of Section 8 funds for the National Consumer Cooperative Bank.

Legislative action: None required.

6. Proposed action: Promote cooperative housing development in Farmers Home Administration and HUD's Indian Housing Programs.

NAHC position: Cooperative enterprise is quite common in rural areas. NAHC notes with approval recent funding by FmHA of a rural cooperative housing demonstration project. FmHA should continue this initiative and along with HUD's Indian Housing Programs further encourage the development of the cooperative form of homeownership in rural areas.

Administrative action: FmHA and HUD should encourage the development of cooperative homeownership in rural areas. HUD should provide the expertise of the Office of the Special Assistant for cooperative housing to FmHA and other agencies interested in the development of the cooperative form of homeownership.

Legislative action: None required.

7. Proposed action: Eliminate HUD application and GNMA financing fees for low, moderate and mixed-income developments.

NAHC position: Federal housing program application and financing fees can add up to 4.3% in additional cost per project. This additional cost is passed on in the mortgage and raises amortization costs. Federal subsidies must pay these additional costs and, in the long run, the Federal government pays about 3 times more in subsidies than is received in income from these fees. These fees are also a further financial burden to developments that must operate at the lowest feasible rents. At GNMA Tandem 23 financing of 7½% for 40 years, these fees cost tenants and/or the Federal government over $680,000. HUD application and GNMA financing fees should be eliminated for low, moderate and mixed income housing.

Administrative action: HUD/GNMA should support legislation eliminating application and financing fees, substituting direct appropriations for agency operations.

Legislative action: Amend Housing and Community Development Act to eliminate HUD application and GNMA financing for low, moderate and mixed-income housing under applicable sections of the Act.

8. Proposed action: Establish HUD project review deadlines.

NAHC position: Processing housing development applications through HUD often results in significant time delays. During construction of a housing project, delays often result in additional costs equal to 1% per month; hence the reduction of HUD processing time could result in significant project savings. Maximum periods for review of housing applications, similar to those imposed on CDBG submissions, should be established by HUD.

Administrative action: HUD should establish maximum housing application review periods for each phase of the development process.

Legislative action: None required.

9. Proposed action: Reactivate Section 106(b) Seed Money Loan Program.

NAHC position: The Federal Seed Money Loan Program for non-profit sponsors of low and moderate income housing is currently restricted to senior citizen housing under Section 202. This program is a vital element in allowing community, Religious and Fraternal organizations to sponsor low and moderate income housing. Seed money is also necessary to assure that non-profit sponsors can employ qualified consultants to assure proper planning and expeditious development of proposed housing. This program should be restored to its original form to cover all Federal housing programs for low and moderate income households.

Administrative action: HUD should support legislation that would restore broader eligibility for Section 106(b) Seed Money Loans to community based organizations and other non-profit sponsors of low and moderate income housing.

Legislative action: Amend Housing and Urban Development Act of 1968 to provide eligibility under Section 106(b) to non-profit sponsors of HUD assisted low and moderate income housing projects.

10. Proposed action: Establish a direct construction loan program.

NAHC position: Many State Housing Finance Agencies have a direct construction loan program that (1) facilitates packaging a housing development and (2) reduces construction interest payment and financing costs. The Federal government should establish a construction loan program that would be used in tandem with Federal insurance and direct permanent loan programs.

Administrative action: HUD should propose legislation to establish a direct construction loan program.

Legislative action: Amend Housing and Community Development Act to provide for a direct construction loan program for housing developments to be insured or financed under the Act.

11. Proposed action: Establish "shallow subsidy" program.

NAHC position: NAHC notes with interest Congressional attempts to establish an interest rate subsidy program from moderate income families. This type of subsidy assists those families unable to qualify for Section 8, yet not able to afford homeownership on the open market. Combined with additional subsidies, these developments promote mixed-income populations, a major objective of the Federal government. To the extent that funding for this program does not compete or diminish funds for low income housing programs, NAHC supports the establishment of a "shallow subsidy" program.

Administrative action: HUD should support legislation to establish a "shallow subsidy" program.

Legislative action: Amend Housing and Community Development Act to establish a "shallow subsidy" program.

12. Proposed action: Expand the Moderate Rehabilitation Programs.

NAHC position: NAHC notes with approval HUD implementation of Section 312 Multi-family and Section 8 Moderate Rehabilitation Programs.

Administrative action: HUD should support expanded scope and funding levels for Section 312 and Section 8 Moderate Rehabilitation Programs.

Legislative action: Expand scope and funding levels for the Section 312 Multifamily and Section 8 Moderate Rehabilitation Programs.

PART II—SUCCESSFUL OPERATIONS FOR EXISTING COOPERATIVES

1. Proposed action: Establish on-going resident orientation and Board training programs for HUD insured and assisted cooperatives.

NAHC position: To assure effective management and successful operation, housing cooperatives need ongoing member orientation and Board training programs. HUD should require member education programs for all HUD insured or assisted cooperatives.

Administrative action: HUD should develop criteria for member orientation and Board training to be required in all HUD assisted or insured cooperative projects. Cost of providing the training should be included in cooperative operating budgets.

Legislative action: None required.

2. Proposed action: Allow excess project income to be retained for capital improvements.

NAHC position: In assisted projects where excess income is generated, HUD should permit placing excess income in replacement reserves. Currently HUD requires either a refund to the government or a reduction in subsidy. Cooperatives have proven to be a cost effective use of housing subsidy funds; in those cases where excess income is generated, it should be used to fund the HUD-required replacement reserves.

Administrative action: HUD should adopt a policy permitting excess project income, in assisted projects, to be placed in replacement reserves rather than be paid back to the government.

Legislative action: None required.

3. Proposed action: Require certification of property and resident managers.

NAHC position: HUD has already implemented procedures for certification of Public Housing Managers. This program should be extended to include managers of insured and assisted cooperative projects as well. Property management firms, professionals and resident managers should be required to meet appropriate criteria and obtain certification. An on-going program, requiring additional training and demonstration of professional capability should be an element in maintaining certification.

Administrative action: HUD should encourage certification of property and resident managers for all assisted and insured cooperative projects. An on-going training and recertification should be an element of this program.

Legislative action: Authorize expenditure of funds to develop and initiate property and resident manager certification program.

4. Proposed action: Expand Flexible Subsidy (Troubled Projects) Program.

NAHC position: Legislation is incorporated in the 1978 Housing and Community Development Act to establish a Flexible Subsidy (Troubled Projects) Program to assist housing developments experiencing financial problems. The Flexible Subsidy Program has been implemented for HUD-assisted projects that can be made financially stable with one-time grants.

Administrative action: HUD should request additional Congressional appropriations for the Flexible Subsidy Program.

Legislative action: Fully support and increase appropriations for the Flexible Subsidy Program for fiscal year 1982.

5. Proposed action: Establish Multifamily Latent Defects Insurance Program.

NAHC position: A Latent Defects Insurance Program should be established by the Federal Government for multifamily housing projects. This program would protect sponsors—and HUD—from project default after contractor warranties have expired or when contractors fail to correct outstanding deficiencies. The insurance program could be self-financed from premiums paid after the project's initial capitalization.

Administrative action: HUD should support legislation to establish a Latent Defects Insurance Program.

Legislative action: Amend Housing and Community Development Act to establish a Latent Defects Insurance Program.

PART IV—GENERAL POLICY ACTIONS

1. Proposed action: Support the Mutual Housing Association Demonstration Project.

NAHC position: NAHC notes with interest the inclusion of a Mutual Housing Association Demonstration Project as a part of the Housing and Community Development Act of 1980. The MHA concept as developed in Europe has shown great potential for assisting in the develpment and successful operations of housing cooperatives. NAHC supports the demonstration project as undertaken by HUD, Neighborhood Reinvestment Corporation and the National Consumer Cooperative Bank to provide a support system for housing cooperatives in the United States.

Administrative action: HUD, Neighborhood Reinvestment Corporation and the National Consumer Cooperative Bank should use the Mutual Housing Association Demonstration to develop a support system for housing cooperatives.

Legislative action: None required.

2. Proposed action: Strengthen HUD Office of Special Assistant for Cooperative Housing.

NAHC position: There is need for a central resource within HUD to coordinate and expedite cooperative housing programs. This office would (1) coordinate departmental activities in the cooperative housing field, (2) develop and adjust or modify regulatory/legislative proposals necessary to assure the effectiveness of cooperative housing programs, (3) serve as HUD liaison with the National Consumer Cooperative Bank and other agencies as their programs relate to cooperative housing and (4) serve as HUD liaison with consumers and professionals in the cooperative housing field. The office of the Special Assistant was authorized by Congress in Section 102(h) of the Housing Amendments of 1955, as amended in 1966 and 1976.

Administrative action: Secretary of HUD to appoint a full time Special Assistant to the Commissioner with adequate staff and full time responsibilities for cooperative housing programs.

Legislative action: None required.

3. Proposed action: Provide cooperative housing training for HUD area office staff.

NAHC position: Successful implementation of cooperative housing programs requires sensitive understanding of cooperative housing. A staff person, designated in each HUD area office should be trained in cooperative housing development and management. This staff person would serve as a resource person for professionals, tenant groups and cooperative members regarding both the development and management of housing cooperatives.

Administrative action: Secretary of HUD should establish an ongoing cooperative

housing training program for area office staff.

Legislative action: None required.

4. Proposed action: Revise the Section 203(n) program and extend its provisions.

NAHC position: Section 203(n) of the National Housing Act was passed by Congress in 1974 to provide insurance for mortgages placed on cooperative memberships/shares (commonly called "individual unit financing.") Membership loans are often necessary to finance the purchase of membership/shares in today's cooperative housing market. Federal insurance will greatly increase the willingness of lenders to finance cooperative memberships. The current 203(n) handbook and regulations shoud be revised to reflect the unique nature of cooperative housing as developed since 1950 by HUD/FHA. The current program conflicts in significant ways with other HUD/FHA cooperative housing programs.

Administrative action: HUD should revise the 203(n) handbook and regulations as necessary.

Legislative action: Amend National Housing Act to permit use of Section 203(n) in (1) cooperatives insured by state and local agencies, (2) cooperatives whose blanket mortgage has been paid off and (3) establish a uniform 30 year loan period for membership/share financing.

5. Proposed action: Develop a secondary mortgage market for cooperative blanket and membership loans.

NAHC position: NAHC notes with approval the 1979 and 1980 Congressional authorization of a secondary market for individual cooperative membership loans by the Federal Home Loan Mortgage Corporation and the Federal National Mortgage Association. A secondary market is necessary to encourage local lenders to make loans for individual cooperative memberships and blanket mortgages.

Administrative action: FHLMC and FNMA should promptly develop a secondary market for blanket mortgages and individual cooperative membership loans.

Legislative action: Amend the Internal Revenue Code to treat, for the purpose of determining the bad debt reserve, cooperative memberships/shares as real property.

6. Proposed action: Authorize Veterans Administration to allow financing of cooperative memberships/shares.

NAHC position: Current Veterans Administration authorization does not allow the financing or insurance of individual cooperative memberships/shares. VA authorization should be amended to allow this type of financing.

Administrative action: The VA should support legislation to allow for financial and insurance of loans on individual cooperative memberships/shares.

Legislative action: Legislation should be introduced to amend appropriate VA authorization to allow for the financing and insurance of individual cooperative memberships/shares.

7. Proposed action: Allow all housing cooperatives insured under the National Housing Act to participate in a Cooperative Management Housing Insurance Fund.

NAHC position: Congress created the Cooperative Management Housing Insurance Fund (CMHIF) in 1965 for all cooperatives insured under Section 213 of the National Housing Act. The creation of a separate fund was designed to allow cooperatives insured under Section 213 to benefit from their superior success rate. Cooperatives insured under other Sections of the Act have had a similarly high success rate. NAHC supports the creation of a fund similar to the CMHIF for all cooperatives insured under the National Housing Act.

Administrative action: None required.

Legislative action: NAHC supports amendment of the National Housing Act to allow all cooperatives insured under the Act to receive similar benefits to those received by participating cooperatives in the CMHIF.

8. Proposed action: Eliminate or reduce the impact of Section 277 of the Internal Revenue Code on housing cooperatives.

NAHC position: Section 277 of the Internal Revenue Code requires certain membership organizations to distinguish, for income tax purposes, between member and nonmember income and offsetting expenses. Several IRS Area Offices have required housing cooperatives to file pursuant to Section 277, specifically requiring that income earned from reserve funds be considered "non-member income." NAHC opposes the extension of Section 277 to housing cooperatives, particularly in the case of interest income from reserve funds.

Administrative action: None required.

Legislative action: Amend the Internal Revenue Code to eliminate or reduce the impact of Section 277 on housing cooperatives.●

GREEK INDEPENDENCE DAY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

● Mr. ANNUNZIO. Mr. Speaker, Greek Independence Day has a special meaning for Americans, for 160 years ago, on March 25, 1821, Greek patriots raised the flag of revolt against their Turkish oppressors and the flag was blessed by Bishop Germanos of Palaeion Patron, at the monastery of Aghia Lavra.

There followed 7 years of grim fighting during which a handful of Greek freedom-fighters held at bay the combined might of the Sultan's Ottoman Empire. The engagements of Valtetsi, Dervenaia, as well as Missolonghi, where Lord Byron fought and died, rank among the most glorious exploits of the Greek Navy, which stirred the hearts of the peoples of Europe, who finally brought pressure upon their governments to intervene in the fight and to compel the Sultan to recognize Greek independence. The Greeks saw their valor and tenacity crowned with success, for freedom was regained with the Treaty of Adrianople of 1829 and the London Protocol of 1830.

Mr. Speaker, a summary of the Greek Constitution follows, as does an overview of Greek immigration to the United States as published in the Greek Research and Publicity Centre book entitled, "Greece: A Portrait."

GREECE: A PORTRAIT

THE CONSTITUTION AND ITS PRINCIPLES

The Greek State, which is the product of the 1821 Revolution, acquired the frontiers and territorial proportions which it has today only after a long struggle for liberation involving many trials and sacrifices. It is a state which displays a striking degree of homogeneity in nationality, religion and language.

Lawful order in Greece, as elswhere, rests upon the foundation of the country's charter. This contains the blueprint for its institutions and the basic legal prerequisites for its political, economic, and social existence and development. It provides for the manner in which law can be created and defines the composition and function of the instrument of the State's operation.

The 1975 Constitution currently in force is the product of the free expression of the people's will, after the collapse of the seven-year military regime and the restoration of political normality in the country. It is in the tradition of earlier Constitutions which have regulated the public life of the Greek people since the Revolution of 1821. It contains a number of progressive innovations and is an expression of present-day political reality aimed at strengthening the executive to deal effectively with the problems of our times, extending the protection of individual liberties, and safeguarding the social rights of the citizen.

The Constitution—which defines the country's political system as a parliamentary democracy headed by a President of the Republic—is inspired chiefly:

By the principle of the sovereignty of the people exercised through a system of representation. (The people's representatives provide the support of those who govern, and vote new legislation).

By the democratic principle (which signifies the linking of freedom with equality).

By the principle of the division of powers—that is, the separation of the public authorities according to the content of their responsibilities into legislative, executive, and judiciary—a division which safeguards political liberties by anticipating the danger of the concentration in the hands of a single authority of all the powers and means of coercion.

By the principle of the legality of the activities of the executive (political action being subject to the legislative authority, together with provision for enquiry into executive acts by independent courts of law, constitutes the Rule of Law).

THE GREEK EMIGRANT POPULATION

The Greek element in the United States began to take shape during the closing decades of the last century. At that time the United States had reached nationhood and had embarked on a course of developing its resources at a rapid pace. The conditions existing there at that time made many inhabitants of the countries of Europe think that the New World would offer them the chance to improve their lives and so led them to decide to emigrate. Among those emigrants were fellow countrymen of ours. Emigration continued during the early years of the present century and so, when the First World War broke out, there were already several thousand Greeks in America. The United States accepted the emigrants who arrived there as future American citizens and expected them to become assimilated into their new environment as rapidly as possible. Our fellow contrymen were very willing to adapt themselves to their new life, but, at the same time, they felt the need not to abandon their national and religious traditions. To achieve this they used a variety of methods. One of these was their effort to create the necessary conditions for the preservation of their

Orthodox Christian faith. Gradually churches were established in cities with a Greek population and around each of these a Greek Orthodox Community grew up. In 1922 the Greek Orthodox Archdiocese of America was established. Another means by which the Greeks of America attempted to preserve their identity as a national group was by the foundation of different organizations of their own (AHEPA, GAPA etc).

After the Second World War, emigration, which in the interwar years had been limited as a result of measures taken by the American Government, continued, with the result that many more of our fellow-countrymen settled in America.

Today the exact number of Greeks living in the United States is not known. It cannot, however, be less than two million, and it might possibly be three. The largest concentrations of Greek population are in New York, Chicago, Boston, San Francisco, New Orleans and generally in the major urban centers. In the country as a whole there are more than 400 Greek Orthodox communities. Each of these has its own church, and in most cases they maintain a school of some kind (a day, evening, or Sunday School) which gives the children of members a Greek education or, at least, inspires in them the qualities which spring from our national and religious tradition. The spiritual and cultural life of the Greek Orthodox who live in the Western Hemisphere is led by the Archdiocese of America, which draws its spiritual authority from the Ecumenical Patriarchate and its administrative power from its Assemblies of Clergy and Laity.

Mr. Speaker, I send my greetings to Americans of Greek descent who reside in the 11th District I am honored to represent, in Chicago, and all over our Nation who are celebrating this anniversary of Greek Independence Day, as well as the precious heritage of freedom celebrated in common by our two peoples.●

VIETNAM VETERANS AGENT ORANGE ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from South Dakota (Mr. DASCHLE) is recognized for 5 minutes.

Mr. DASCHLE. Mr. Speaker, last Friday, I reintroduced legislation that is important if this Nation intends to assist those veterans whose health may have been affected by exposure to toxic herbicides while serving in Vietnam. The unique and controversial nature of the war made readjustment to civilian life difficult for many Vietnam veterans. Of those that were married when they went to war, over 38 percent were divorced or separated within 6 months of their return. Their suicide and incarceration rates are much higher than their nonveteran peers and many continue to struggle from the effects of "delayed stress." On top of all this, Vietnam veterans are now confronted with the potentially devastating effects of exposure to herbicides. In the past 2½ years since this issue has come to the forefront, Vietnam veterans and their representative organizations have been justifiably outraged about the lack of sensitivity within the Veterans' Administration concerning this problem. Concern about the effects of exposure to agent orange and other herbicides are shared by veterans from Australia and New Zealand. Similar to their American counterparts, Australian, and New Zealand veterans have organized and are lobbying their respective governments in addition to disseminating educational materials to the general public. Clearly, more can be done for those who served and now face irreparable effects from herbicide exposure.

Mr. Speaker, the VA has denied all but a few claims by veterans for disabilities alleged to have resulted from exposure to agent orange.

I present for the RECORD a complete summary of herbicide exposure claims before the VA:

HERBICIDE EXPOSURE CLAIMS, FEBRUARY 2, 1981

	Number	Percent
A. Total number of cases in study	6,164	100.0
Claims with diagnosis or specific allegation	5,054	81.8
Claims with no diagnosis	1,120	18.2
B. Claims with diagnosis or specific allegation	5,054	100.0
Allowed	[a]5	.1
Allowed for other reason	[b]19	.4
Denied	[c]5,030	99.5
In summary:		
Total claims	6,164	100.0
Allowed	24	.2
Denied	5,030	81.6
No diagnosis	1,120	18.2

[a] 5 Claims for skin condition.
[b] 16 claims skin condition, 3 claims for cancer
[c] These 5,030 claims having more than one claimed diagnosis or specific allegation fall into the following categories:

Skin condition (acne, alopecia, eczema, keloids and urticaria)	2,941
Nervousness, headaches and fatigue (claimed)	2,668
Paralysis or numbness and other symptoms of extremities	913
GI and GU conditions	735
Malignancies (Leukemia, lymphoma, melanoma, etc.)	363
Impaired sexual activity (alleged)	397
EENT pathology	409
Lung condition	276
Cardiovascular and hypertension	219
Miscellaneous	134

Source: Veterans Administration.

The VA's major contention in denying these claims is that there is not enough evidence to draw a correlation between exposure and ill health. Though as I will point out there is an abundance of literature and data to prove otherwise, the VA can address this problem as they have with other diseases and illnesses that have occurred after veterans left the service. In the absence of definitive evidence, there is established in section 312 of title 38, a presumptive clause relating to certain diseases and disabilities which exists for handling just this sort of dilemma. Mr. Speaker, this legislation would give Vietnam veterans the benefit of this doubt, and establish a presumption that certain conditions, as defined by the VA Administrator, were as a result of exposure to herbicides while the veteran was in Vietnam. These conditions would thus be service related and compensable.

This legislation would also change the burden of proof. Presently, the entire burden of proof is on the veteran to prove that his illness is service related. This is truly impossible for Vietnam veterans, most of whom were in Vietnam over 10 years ago, who do not have access to medical and other records, and were not even aware at the time that they were exposed. This legislation would rectify this injustice, and force the VA to prove that the veteran was not exposed. If epidemiology studies determine that there is no health risk associated with exposure to herbicides or service in Vietnam, then compensation payments can be stopped.

Though the Government and especially the Congress have been very deliberative when discussing this issue, there certainly was not a lack of forums or interest in this issue in the 96th Congress.

In 1980 alone, hearings were held by the Senate and House—three—Veterans' Affairs Committees, the House Interstate and Foreign Commerce Subcommittee on Oversight and Investigations, and the interagency work group (IWG) to study the possible long-term health effects of phenoxy herbicides and contaminants. The themes heard at all of these hearings were similar. Vietnam veterans have felt that there has been a lack of outreach and public information from the VA on agent orange; that there has been framework established for the evaluation of scientific data and the abjudication of veterans claims; and that a presumption should be established. The VA stated that there is not enough evidence to establish service connection; that data is necessary on Vietnam veterans themselves; and that it will take a few additional years before they have enough information to decide policy questions.

Also within the past year three different epidemiology studies were either authorized or agreed to which will hopefully clarify what we already know concerning dioxin through existing animal and human data. The Air Force is in the process of sending out an initial questionnaire to the "Operation Ranchhand" personnel who either sprayed or handled the great majority of herbicides used in Southeast Asia. Additionally, the Center for Disease Control in Atlanta will soon begin a study of veterans in the Atlanta area to determine whether Vietnam veterans are at an increased risk of siring children with birth defects. The Veterans' Administration should soon be able to begin their study of a segment of the Vietnam veterans population. Their request for proposal (RFP) to contract for the design of the protocol for their epidemiology study has

been embroiled in litigation and only recently was given the green light after a GAO investigation.

Also witnessed in 1980 was the formation of the interagency work group to study the possible long-term health effects of phenoxy herbicides and contaminants. The IWG's role was to oversee, coordinate, and set priorities among relevant Federal Government research activities, design a research agenda, organize the means by which the research agenda will be carried out and assure its accomplishment in a timely and competent manner. Some of the most distinguished and knowledgeable scientists in the Government on toxic chemicals and herbicides formed the scientific panel of the IWG which analyzed a number of research studies that were conducted or publicized in 1980. Before addressing these studies, however, I would like to briefly comment on a couple of statements made by the IWG last year. One is their assessment that it will be 20 to 30 months before the scientific knowledge about the long-term health effects of agent orange will increase dramatically. This brings home my belief that Vietnam veterans need to be helped immediately, and not made to wait an additional 2 to 3 years. Secondly, the IWG found a major stumbling block on this issue to be the inability of the Department of Defense to identify a population of ground troops, the nature extent of whose exposure to agent orange can be documented or reconstructed. I am concerned that the DOD has not put their best foot forward in this effort, especially since the GAO could identify several Marine units and document their proximity to herbicide missions in I Corps.

The IWG also analyzed pertinent scientific data that became available during the past year, including five epidemiology studies conducted in Europe that were released last spring by Congressman BONIOR and myself. The scientific panel of the IWG reviewed this evidence and stated:

> That despite the studies limitations, they do show a correlation between exposure to phenoxy acid herbicides and an increased risk of developing soft-tissue tumors or malignant lymphomas . . .

The National Cancer Institute and the National Toxicology program have also completed a cancer bioassay on dioxin, and concluded that:

> Dioxin was carcinogenic in rats and mice . . . and extends the observation that 2,3,7,8-TCDD is a carcinogen to a second animal species.

This study I might point out found thyroid tumors, fibro-sarcomas—cancer of the ligaments and muscles—and liver cancer.

Another study performed by the National Toxicology program and Research Triangle Institute on male mice "found no significant decrease in fertility among the exposed mice, nor any significant increase in birth defects among their offspring."

The mice were fed simulated exposures of agent orange. Hopefully, this data will hold up when the Center for Disease Control study is concluded. I would like to emphasize that this data is on top of voluminous data already published showing harmful effects from dioxin exposure.

In conclusion, I would like to reiterate the need for this legislation. A man from my district who has a cancerous growth on his chest contacted my office just the other day. He has received no explanation as to how or why this growth is occurring and does not really expect one. Mr. Speaker, I have heard this tale over and over before and the common denominator in all of these stories is service in Vietnam. The chair of the IWG recently stated that:

> It is becoming increasingly apparent that science is not likely to be able to answer all of our questions.

I certainly share this view of the inherent limitations of epidemiology which emphasizes the futility of waiting for definitive evidence which may never appear. Thus, I propose that policy decisions be made on the basis of existing evidence and that the VA, Air Force, and CDC studies be utilized to confirm or deny the link between dioxin to serious health problems and birth defects. Mr. Speaker, I know the 75 cosponsors with whom I introduce this bill today share my hope that these concerns turn out to be unfounded. But if we are right, and fail to pass this legislation, we will only be contributing to the national tragedy that has been Vietnam. Following is the text of the bill:

H.R. 2493

A bill to amend title 38, United States Code, to provide a presumption of service connection for the occurrence of certain diseases in veterans who were exposed to herbicides during service in southeast Asia during the Vietnam era

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Vietnam Veterans Agent Orange Act".

SEC. 2. Section 312 of title 38, United States Code, is amended by adding at the end thereof the following new subsection:

"(d)(1) For the purposes of section 310 of this title and subject to the provisions of section 313 of this title, in the case of any veteran who served in Southeast Asia during the Vietnam era and (A) who after such service suffer from a disease developed to a 10 per centum degree of disability or more than has been determined under paragraph (3)(A) of this subsection to be a disease that may be caused by exposure to herbicides, and (B) who during such service was exposed to herbicides, as determined in accordance with regulations prescribed by the Administrator under paragraph (3)(C) of this subsection, such disease shall be considered to have been incurred in or aggravated by such service, notwithstanding that there is no record of evidence of such disease during the period of service.

"(2) If the Administrator determines under paragraph (3)(B) of this subsection that exposure to herbicides may cause birth defects in the natural children of persons so exposed, then in the case of any person who—

"(A) is the natural son or daughter of a veteran who served in Southeast Asia during the Vietnam era and during such service was exposed to herbicides, as determined in accordance with regulations prescribed by the Administrator under paragraph (3)(C) of this subsection; and

"(B) is suffering from a birth defect that in an adult is disabling to a degree of 10 per centum or more and that has been determined by the Administrator under paragraph (3)(B) of this subsection to be a birth defect that may be caused by exposure of one of the parents of a child to herbicides;

such person shall be deemed for the purposes of this chapter to be a veteran of a period of war and such birth defect shall be deemed for the purposes of this chapter to be an aggravation of a preexisting injury suffered in line of duty in the active military, naval, or air service during a period of war.

"(3)(A) The Administrator shall determine, and shall promulgate by regulation, what diseases medical research has shown may be due to exposure to herbicides. The Administrator shall include in such regulations a specification of the standards used by the Administrator in making such determination.

"(B) The Administrator shall determine, and shall promulgate by regulation, what birth defects, if any, may result from exposure of the natural parent of a child to herbicides. The Administrator shall include in such regulations a specification of the standards used by the Administrator in making such determination.

"(C) The Administrator shall promulgate by regulation the conditions of service during the Vietnam era required to establish exposure of a veteran to herbicides for the purposes of paragraphs (1) and (2) of this subsection. Such regulations may not require that a veteran be required to provide any information to the Veterans' Administration for the purpose of determining such exposure beyond the information contained in the veteran's discharge papers and shall establish a presumption of exposure of a veteran to herbicides when Department of Defense records, information supplied by the veteran, and other information establish a possibility of such exposure. The Administrator shall include in such regulations a specification of the standards used by the Administrator in establishing what conditions of service are required to establish such exposure to herbicides.

"(4) Notwithstanding any other provision of law, section 553 of title 5, relating to agency rulemaking, shall apply to the promulgation of regulations under paragraph (3) of this subsection, and such regulations shall be made on the record after opportunity for an agency hearing in accordance with sections 556 and 557 of such title. Such regulations shall be subject to judicial review in accordance with chapter 7 of such title.

"(5) The Administrator shall complete final agency action on the regulations required to be promulgated by paragraph (3) of this subsection not later than the end of the one-year period beginning on the date of the enactment of the Vietnam Veterans

Agent Orange Act and shall publish such regulations at the same time as a single set of regulations.".●

A FEDERAL STANDARD FOR COMPUTER INTERFACES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. BROOKS) is recognized for 10 minutes.

● Mr. BROOKS. Mr. Speaker, amid much controversy last year, the National Bureau of Standards (NBS) adopted a Federal standard for computer interfaces which is expected to save the Government tens of millions of dollars annually by increasing competition among computer vendors who supply their products to the Government. Despite the tremendous benefits to be achieved, certain elements within the computer industry vigorously opposed the standard and were responsible for delaying its implementation for more than 10 years. They claimed that the standard was technically obsolete and would restrict innovation and cost millions of dollars to implement. They also claimed that the Government had no business setting standards even for the Federal sector.

These arguments are fallacious. The Government, as a major user of ADP resources, has a responsibility to the taxpayers to acquire and use these resources in an efficient and economical manner. With the enactment of Public Law 89-306, Congress recognized that these responsibilities could not be properly met without the establishment of Government-wide computer standards.

In the case of the computer interface standard, the computer industry failed to adopt a needed standard in a timely manner. NBS's decision to forego its reliance on the private sector and promulgate its own standard was, therefore, not only proper, but should be considered a clear signal to the industry that should it fail to develop other standards on a timely basis, the Government, in the interest of all taxpayers, will proceed to adopt its own.

Unfortunately, certain elements within the computer industry continue to vehemently oppose the computer interface standard. These manufacturers apparently do not like the idea of minimizing the cost of Government computer operations to the taxpayers. I am sure that OMB, which has policy responsibility in this area, will recognize these self-serving arguments for what they are and support the efforts of NBS. Recent newspaper articles have reported that the standard has resulted in increased competition within the computer industry and, subsequently, tremendous savings to the Federal Government. Even companies within the private sector are beginning to see the advantages of adopting the standard for their own use.

A most informative editorial on the subject was included in the March 9, 1981, edition of Computerworld and I include it in the RECORD:

EDITORIAL

For years—15, to be exact—there has been a great hubbub about a proposed standard for an interface between I/O equipment and computer systems. And now the standard is actually coming closer to reality—at least in a very limited way.

Unfortunately, with all the debate involving technologists, lawyers and marketing personnel ad infinitum, the underlying economic issue that should concern all users of computer equipment has often been obscured.

The standard that has been adopted is indeed very old, as the opponents claim. But the new IBM 3081 uses the standard—so much for the technological obsolescence argument.

The economics of the issue are clear, however. The standard would allow users to attach peripherals made by firms other than their mainframe manufacturer.

Today IBM users are generally the only ones who have this luxury. As a result, they have a wide range of vendors from which to choose in designing their optimum systems. Many of the independent vendors offer equipment that is cheaper, easier to operate or more available than IBM equipment.

This is the free enterprise system at work—manufacturers see an opportunity to make an equivalent or better product at a lower cost and consumers (users) therefore receive a break.

However, it is only the large base of IBM users that makes such a system practical—and profitable for independents.

The federal government came up with the idea for an interface standard so that it would have more choice of peripherals for its non-IBM systems.

Obviously since competition has worked so well in the IBM-compatible world, it would be a good idea to spread that competition to the entire computer world.

Well, the manufacturers of other computer equipment—Sperry Univac, Honeywell, Inc. and Burroughs Corp., for example—have fought off this competition, claiming technology as their reason.

Frankly, the real reason again probably has more to do with economics than technology. Many of the other mainframers offer disk and tape systems that are either more expensive or less advanced than the units available to the IBM world. They make lots of money on these units—and their users have no choice but to take what they are given.

A standard would clearly benefit users—they could get the most up-to-date equipment at the lowest possible prices through a very competitive industry.

Some manufacturers would be hurt because they would have to begin to face some real competition and offer either superior products or lower priced ones to hold their base. But that's free enterprise.

The artificial lock-in that these companies enjoy should not be tolerated by users, who should get on the standardization bandwagon and support the new efforts in this area.●

THE PRETRIAL SERVICES ACT OF 1981

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Jersey (Mr. HUGHES) is recognized for 5 minutes.

● Mr. HUGHES. Mr. Speaker, I am today introducing the Pretrial Services Act of 1981. The bill is identical to one which was reported by the Committee on the Judiciary, with strong bipartisan support, in the 96th Congress.

The bill authorizes an expansion of a demonstration program now operating in 10 U.S. district courts. The agencies gather and analyze information concerning Federal arrestees and advise the court on conditions of pretrial release. They also supervise persons awaiting trial.

Pretrial services agencies pay for themselves in several ways which can be monetarily quantified, and in several which cannot. They have reduced overall pretrial detention and the cost of such detention, which elsewhere continues to spiral upward. At the same time, the districts which have pretrial services agencies have not experienced an increase in crime by persons released awaiting trial—quite the contrary. Crime by persons on pretrial release and failure to appear for trial have both gone down where the program is in operation.

The bill is austere and cost-effective. It would permit the continuation of the existing agencies, and gradual expansion to additional district courts which determine that such services are needed. It limits the period of authorization to 2 years, and contains a cap of $6 million for fiscal year 1982 and $8 million for fiscal year 1983.

Magistrates who handle the bail hearings uniformly praised such services in hearings before the Subcommittee on Crime in the 96th Congress. The Judicial Conference of the United States, which opposed the program originally, now strongly supports its expansion. The American Bar Association has endorsed the program.

The Subcommittee on Crime will hold its first hearing in the 97th Congress on this proposal on March 31, beginning at 10 a.m. in room 2237, Rayburn House Office Building. A second hearing will be held in New York City on April 6, where we will be looking at 2 of the 10 pretrial services programs presently in operation. These programs are in Southern and Eastern Districts of New York. This hearing will be held in courtroom No. 3 of the Eastern District, located at 225 Cadmen Plaza, Brooklyn, N.Y., and will begin at 9 a.m.●

NOWAK CONCERNING ECONOMIC ALTERNATIVES FACING WESTERN NEW YORK

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. LAFALCE) is recognized for 15 minutes.

● Mr. LAFALCE. Mr. Speaker, every year, my alma mater, Canisius College, invites a prominent figure to deliver the annual Fitzpatrick Chair Lecture.

The speaker this year was my good friend and distinguished colleague from New York (Mr. NOWAK), and the title of his speech was "Economic Alternatives Facing Western New York." This address contains an insightful and discerning analysis of the Reagan administration's programs, policies, and spending shifts in general and their collective and individual impact on Western New York and the Northeast. One of his conclusions is particularly thought provoking:

Unless we can inject a degree of balance into the Reagan approach, the collective end product will be exacerbation of our economic woes in the Northeast and Midwest and the continuation of faster growth in employment, business investment and real income in the South and West.

I hope that all of my colleagues will carefully read this thoughtful address and will heed the warnings contained in it, because the stakes are to high for a reckless venture into the unknown.

The speech follows:

ECONOMIC ALTERNATIVES FACING WESTERN NEW YORK

It is always a pleasure to return to Canisius College, which provided me an invaluable education and countless fond memories.

It is a special privilege, however, to be invited to deliver this year's Fitzpatrick Chair lecture.

A prime focus of my work since I began serving in the Congress in 1975 has been helping expand and diversify our community's economic base and helping improve its total quality of life.

That continuing interest led naturally to my topic this evening: Economic Alternatives Facing Western New York. Tonight, I would like to examine the impact on Western New York and the Northeast of the Reagan Administration's program, policy and spending shifts.

Then, I would like to suggest some options and alternatives we in Western New York must explore if we are to cope in this new economic climate.

The President's Program for Economic Recovery is indeed "A New Beginning". . . A radical change in what the federal government will and will not do.

He proposes a major shift in limited federal resources from the social front to the defense front . . . and a major shift of social responsibility and cost to state and local governments.

The President is not going to obtain approval for each and every one of the $48-billion-plus in cuts he is advocating for Fiscal 1982, for example. But he will get the lion's share of them.

The fact that Republicans control the Senate—and the House has a more conservative membership—enhances that probability.

When these substantial budget cuts become reality, this country . . . and in particular the Northeast Region, our state and our end of the state . . . will confront a difficult period of economic adjustment, bearing an inequitable brunt of these changes.

The full impact won't be felt all at once but will be stretched over a number of years.

Unless we can inject a degree of balance into the Reagan approach, the collective end product will be exacerbation of our economic woes in the Northeast and Midwest . . . and the continuation of faster growth in employment, business investment and real income in the South and West.

The budget cuts will have a debilitating effect . . . A Domino-like effect . . . on our local economy. The City of Buffalo's situation is illuminating.

The city received $5.7 million in General Revenue Sharing funds for the operation and maintenance budget and is heavily subsidized by Federal aid in other city spending.

The latest Bureau of Census Report shows the city's budget was supplemented in 1979 by $85.9 million in Federal grants that went directly to the city government, for programs ranging from community development to CETA and sewage treatment projects. That does not inclue $27.9 million in federal education aid funnelled through the State . . . nor does it include millions in Federal aid directed to other local governments, the Niagara Frontier Transportation Authority or other private and non-profit organizations.

If you add to Buffalo's dependency . . . its inability to quickly replace federal aid on its own . . . you begin to see the Domino effect materializing. The city will not enjoy the flexibility it has had either in its operation and maintenance budget or capital budget or for that matter in its economic renewal efforts.

This may lead to further loss of population and erosion of the local tax base . . . as skilled workers, businesses, jobs and markets moved to the Sunbelt.

An inherent problem is that many of the programs the Administration has targeted for reduction or extinction are designed to help distressed areas like ours maintain economic equilibrium during periods of high unemployment and recession.

CETA is a classic example. The City of Buffalo has approximately 900 CETA workers serving in city government and about 600 more in community-based service organizations. Analyzing the Reagan proposals, the City's Department of Human Resources reported: "By June of 1982, there would not be a single CETA worker in city government or community agencies. The city would have lost $16 million in federal funds. The city work force would have been reduced by approximately 17 percent."

The county has recently commented: "In short, public service employment, a program which has been much maligned in the past, is a cost-effective, multi-purpose program. The battle to increase private sector jobs in this country is an important one, but when one compares the modest contribution to that goal from the elimination of job programs, with the real, tangible loss of jobs and services, the conclusion is obvious."

The loss would be compounded by the added burdens on our unemployment compensation rolls and eventually the welfare rolls, if people cannot quickly locate private jobs.

It is practically impossible for the City to make up that kind of massive loss of revenue. The City currently must raise its tax rate by approximately $1 per $1,000 of assessed valuation to raise $1 million in revenue. The tax rate right now is $85.16 per $1,000 of assessed valuation. If 60 percent of existing jobs were retained by the City, the City would be pushed close to its constitutional taxing limits.

Another element in the domino effect of reduced federal aid is that it will further delay sorely needed local infrastructure improvements, from modernizing our ancient water supply system to resurfacing our streets.

Reagan's program proposes:

Abolition of the Economic Development Administration which brought more than $7 million to the Erie County Industrial Development Agency during the last two years for special job-creating, job retaining aid.

Phasing out of mass transit operating subsidies which bring more than $7 million annually to the Niagara Frontier Transportation Authorty.

Diluting the Urban Development Action Grants program which brought more than $23 million to Buffalo in less than three years.

Cutting school aid by $7 million a year to the Buffalo Board of Education.

The list goes on, including proposals to reduce the guaranteed student loan and direct loan programs . . . plus eliminating Social Security payments to adult student.

Another problem area is the rising cost of energy. Those costs and the impact of the federal deregulation on those costs . . . compound our economic problems and business disincentives.

The adverse economic impact of these soaring energy costs was described in a 1976 report published by Cornell University. It suggested that a 10 percent rise in energy costs in one region . . . would result over the long run in a shift of 20 percent of its industrial activity to other regions.

With our long winters and cold temperatures, the Northeast-Midwest region is a high consumer of energy.

The impact of oil deregulation will result in more wealth being transferred from our region to the general revenue of energy-producing states. Eight energy producing states in the next decade, for example, are expected to reap more than $128 billion in added severance tax revenues because of the deregulation of domestic oil alone.

Their severance taxes will help these states keep their tax rates down, continue their attraction for investors and provide a cushion against Reagan's domestic budget cuts. Energy-producing states, however, get another bonus because many federal funds are distributed on the basis of state "tax effort." And these massive energy severance tax revenues are counted among tax effort.

The Reagan Administration's interest in accelerating the deregulation of natural gas could have a devastating effect on our economy, especially in Erie County where 95 percent of the homes and 75 percent of businesses are dependent on natural gas. According to various estimates, total decontrol could increase home heating costs anywhere between 50 and 200 percent. I don't know how Western New York could cope with an increase of that magnitude.

High energy costs pervade every aspect of our economy. These costs have been estimated to account for 25 to 30 percent of the inflation rate. Yet the President decided on

79-059 O - 1984 - 69 - (Vol. 127 Pt.4)

January 28th to deregulate domestic crude oil and gasoline more than half a year ahead of schedule. Within two weeks in our area, the cost of gasoline jumped a dime or more per gallon. That's fueling inflation as well as our cars.

Supporters call the President's program a bold approach to fighting inflation and spurring growth. Yet, there is a body of opinion that he is engaged in a high stakes gamble. There is concern as to whether the President's program will or could do as much or as fast as his supporters proclaim.

That concern was shared by several top economists in recent testimony.

Dr. Otto Eckstein, professor of economics at Harvard, said: "Have we the right to bet the future of the economy on such wishful thinking? I don't think so. It would be beautiful if it worked out, but the far more likely outcome is continued large budget deficits creating too much stimulus, too high interest rates and the missed opportunity to really turn the economy around. The President's program, as submitted, could easily make the inflation worse."

And Lawrence R. Klein of Wharton Econometric Forecasting Associates testified: "It does not appear that the Administration will meet its goals of raising economic growth, lowering inflation and balancing the budget."

There is a great deal of skepticism that the President has inflated the real growth and inflation-dampening impact of his total policies.

The uncertainties arise because the President's policies represent a compromise blend of two sometimes divergent economic theories. One is the supply side—advocates of a massive, across-the-board tax cut for individuals as the cure for inflation. On the other side are the monetarists, advocates of deep federal spending cuts and tight money supply.

Reagan's result is a mixture of apples and oranges, a kind of untested economic fruit salad.

Frankly, it raises concern that rather than economic improvements . . . we may end up with the worst of all possible worlds— more high unemployment, high inflation, high interest rates.

Noted economist Walter Heller also discounted the optimistic projections, noting: "As far as the Reagan program is concerned, what disturbs me is that he is promising us that we can have both a big expansion of the economy and a big contraction in inflation and the two things are simply not consistent . . . It's saying that we're going to have these huge supply side effects . . . meaning that you're going to stimulate an enormous amount of work effort and savings and investment—nothing in the historical record supports that, nothing. The new supply side economics is kind of the laetrile for the cancer of inflation."

The respected Bernstein-Macaulay financial newsletter also highlighted the uncertainty of the Reaganomics, writing in a recent issue: "There is no way to forecast the economic outcome of such a program . . . Never before has the American government employed a major tax cut, a wide variety of budget reductions . . . and the maintenance of tight money—all at the same time."

But if we err in applying these three policy ingredients, I hope we err on the side of too high tax cuts, rather than budget cuts that are too deep or a too tight money supply.

We must remember that inflation is a deep-seated and complex phenomenon. There is no quick fix.

I believe the federal government's spending habits contribute to inflation, However, excessive blame is cast on federal deficits as the culprit for inflation. The bottom line is that if we balanced the federal budget tomorrow, we would still have inflation. There are other pieces in the inflation puzzle.

For example, in 1980 testimony before the Senate Budget Committee, Walter Heller recalled: "Reaching back to 1919-20, we note that rapid inflation was associated with a large surplus. Then Milton Friedman also reminds us that 'one of the most extreme deflations we had in history—decline in prices—was in the 1931-33 period . . . In those years, the federal government was running a deficit'."

When the House was considering the Fiscal Year 1980 Budget Resolution, we went through heated debate over abrupt spending cuts to produce a balanced budget. At that time, the Congressional Budget Office projected the following would happen to the economy if a $25 billion deficit were eliminated via spending cuts: 1. Because of revenue losses due to decreased spending, the real cut would have to be $38 billion, rather than $25 billion. 2. And most interesting . . . that $38 billion dollar budget cut—that leap to the balanced budget—would cut inflation by only one-tenth of 1 percent.

The reason again is that Federal spending alone is not responsible for the inflation rate. There are many other factors involved.

The inflation psychology that exists in this country is one example. In a recent report, the Joint Economic Committee described it this way: "The current inflation is of long duration, and the vast majority of American businesses and consumers have come to expect it will continue. Each sector of the economy has developed structural mechanisms that have helped it adapt to a climate of rising prices, but these structures in turn contribute to the momentum of inflation.

Many labor contracts now include cost of living adjustment clauses that compensate for all or part of the inflation-induced loss of real income. To the extent that these increases are not offset by productivity improvements, they raise business costs and thus prices. When consumers purchase on credit in anticipation of even higher prices, the added pressures on interest rates raise business costs and prices."

The inflation psychology is rampant among consumers and businesses. Debt statistics in this case are most revealing. The federal government debt, our national debt, as of Fiscal 1980 stood at $911 billion dollars. State and local government debt was $311 billion. Household mortgage and outstanding consumer credit exceeded $1.3 trillion. Nonfinancial corporate debt also exceeded $1 trillion. The federal debt is the only form of debt to decrease as a percent of GNP since 1955.

While the Federal debt has tripled since 1955. . . up 325 percent: State/local government debt has risen 676 percent. Mortgage debt has risen 1085 percent. Consumer credit debt has risen 855 percent. Corporate debt has risen 99 percent. Understanding the total debt situation in our country can help in our public perception of the causes of inflation.

The concerns about the Reagan tax package—shared by Democrats and some Republicans—run the gamut from its potential inflationary impact to differences of opinion as to whom exactly tax cuts should be directed. One cannot predict with certainty whether tax savings will be used to stimulate investment or consumption.

For instance, the $6.4 billion individual tax cut benefit projected for the remainder of Fiscal 1981 will have little stimulative effect, beyond helping offset some Social Security payroll tax increases.

Many experts are predicting, in fact, that even after three 10 percent annual income tax rate cuts in a row, most Americans will be carrying about the same federal tax burden. That will occur, it is argued, because continuing inflation in the 8 to 12 percent range pushes the middle class into steadily higher tax brackets.

Despite higher growth rates in the South and West in the last decade, according to the Congressional Northeast-Midwest Coalition, our region still holds an edge in average per capita income. Thus, the larger the individual tax cut the more our region should benefit. That is why I feel that erring on the side of too high a tax cut won't be as negative a consequence on our economy.

I hope the final tax package enacted by this Congress will provide more relief to middle and low income persons who have been ravaged by inflation . . . and targeted relief to small and medium-sized businesses to help our region make the adjustments to federal spending trends.

So what do we have to look forward to?

With the decline in overall federal aid programs, we must look to the federal tax code as a device for providing business incentives in our older industrial areas.

We need carefully crafted tax incentives to help offset the federal deregulation of energy and the regional imbalance in defense spending.

We desperately need such a tradeoff to maintain our economic balance and our competitiveness with other areas of this nation.

Legislation I have introduced would target these tax incentives to economically distressed areas and also focus on the special needs of less capital intensive small businesses, which are the source of most new jobs in the Northeast. Ninety eight percent of all firms in New York are small businesses with fewer than 100 employees.

Current tax policies favoring new investment over reinvestment in existing structures act as another incentive for businesses to leave our older cities for the newly developing South and West.

The targeted tax incentives I am proposing include:

An easier to use accelerated depreciation system to help increase capital available for expansion/modernization.

An expanded jobs tax credit to stimulate hiring of chronically unemployed urban residents.

A 5 percent bonus investment tax credit for plant/equipment investments in target areas.

A refundable investment tax credit to provide smaller firms with needed capital.

We in Western New York and the Northeast must actively seek to diversify our economic base by using targeted tax relief as a stimulus to private job creation.

Such incentives would help us attract more of the high technology firms to the Elm/Oak area and help accelerate the economic development potential of the Kelly Island area and our waterfront.

Such incentives would help us sustain the momentum underlying downtown revitalization and the effort to expand the tourism and service components of our local economic base.

Such incentives could also prove useful as we continue efforts to attract foreign investment. Recently, the Buffalo Area Chamber of Commerce reported that in the past six years over 115 new Canadian companies have come into our area with an estimated local employment of 5,000. We must expand this effort.

Another legislative alternative our region must pursue is the refinement of formulas used for distributing federal aid programs, such as Community Development Block Grants.

President Reagan has declared that the genuinely needy will not be ignored by the federal government. That definition of needy must be applied to individuals and communities. We must work to tighten up these federal aid formulas so that the shrunken federal aid is directed to the neediest areas. It does not seem reasonable that thriving Houston should get $28.2 million a year in community development block grant funds, while the City of Buffalo got $4 million less. I am currently drafting legislation which would restrict the number of communities eligible for CDBG.

We also have to work to insure that a Congressionally mandated one-year test of defense procurement policies, targeted to high unemployment areas, will continue beyond this fiscal year. This provides firms in the target areas with a bidding preference on a variety of supplies and materials required by the Defense Department.

The changes in Washington suggest we are also going to have to help ourselves more, with local governments tightening belts and seeking more cost-effective ways to provide essential services.

We are going to need greater participation by the private sector—the business community—if we are going to be able to help pick up the slack of reduced federal involvement.

In this regard, we in the Buffalo area are in a good position to face the new round of economic challenges. Buffalo area banks, for instance, have demonstrated their commitment to downtown revitalization and the private sector's participation has been invaluable to the ECIDA success story.

Today, however, we desperately need broader-based private sector participation in the development of economic alternatives. We need more local firms participating in the planning and implementation of economic development and community revitalization. Perhaps firms could expand the loaned executive program, which has been such a boon to the United Way, for local government and neighborhood improvement projects.

In the Minneapolis area, for the last five years, "The Minnesota 5 percent Club"—a confederation of 45 local businesses—has pledged to contribute 5 percent of pre-tax profits (an allowable federal tax deduction) to local philanthropic and social programs. The funds are used for a variety of activities, ranging from a neighborhood rehabilitation project to an anti-juvenile delinquency program and job retraining.

Whether it is providing better job retraining for its employees, day care facilities, organizing van pools, assisting in defraying educational costs, or significantly increasing involvement in job training for the hard core unemployed, there are many corrective things the private sector can do. The manufacturing opportunities have declined and the growth of the jobs in the Engineering Sciences, Informational Processing and Service Sector Economy have exploded.

This is the reason for the diversification which I have been urging for several years.

A tremendous increase in planning, education and recycling of manpower must be undertaken to match this manpower to these new technologies and job opportunities. If we don't we will continue to lose the best and most skilled employees to the growth areas of our country.

In Western New York, we have a pool of talented leaders and skilled workers, our greatest resource. With all sectors of the community working together, we can tap these internal resources, apply our ingenuity and craft successful economic alternatives for the years ahead.●

EXPORT-IMPORT BANK FINANCING NOTIFICATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina (Mr. NEAL) is recognized for 5 minutes.

● Mr. NEAL. Mr. Speaker, I am notifying the House today of a proposal by the U.S. Export-Import Bank to provide financial guarantees of up to $104,210,000 to help the National Power Corporation of the Philippines cover additional costs of its Bataan Peninsula nuclear powerplant.

Earlier, the Eximbank provided a direct credit of $277.2 million and guaranteed private loans totaling $367.2 million to finance the sale of U.S. goods and services and to cover interest costs during construction for the 620-megawatt Bataan Peninsula plant. Since then the cost estimates have increased greatly because of construction delays and safety related changes in plant design.

The new loan guarantees will help the Philippines' Government-owned power company to meet the $769.4 million in additional costs required to complete the powerplant.

This Eximbank notification was referred to me as chairman of the Banking Committee's Subcommittee on International Trade, Investment and Monetary Policy. Section 2(b)(3)(iii) of the Export-Import Bank Act of 1945, as amended, requires that the Eximbank notify Congress of proposed loans or guarantees involving the export of nuclear technology or equipment. Unless the Congress determines otherwise, the Eximbank may give final approval to the transaction after 25 days of continuous session of the Congress after notification.

I am submitting for the RECORD the Eximbank's notification, which contains the terms and details of the proposed transaction. I would welcome any comments my colleagues might have about this proposal.

The Eximbank material follows:

EXPORT-IMPORT BANK
OF THE UNITED STATES,
Washington, D.C., March 20, 1981.

Hon. STEPHEN L. NEAL,
Chairman, Subcommittee on International Trade, Investment and Monetary Policy, Committee on Banking, Finance and Urban Affairs, U.S. House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: Eximbank has submitted a statement to the Speaker of the House of Representatives and the President of the Senate in accordance with the provisions of Section 2(b)(3)(iii) of the Export-Import Bank Act of 1945. I am taking the liberty of providing you with a copy of this statement.

Sincerely,

NANCY S. PIGMAN,
Congressional Relations Officer.

Enclosure.

EXPORT-IMPORT BANK OF THE
UNITED STATES,
Washington, D.C., March 20, 1981.

SPEAKER OF THE HOUSE OF REPRESENTATIVES,
U.S. Capitol, Washington, D.C.

DEAR MR. SPEAKER, pursuant to Section 2(b)(3)(iii) of the Export-Import Bank Act of 1945, as amended, Eximbank hereby submits a statement to the United States House of Representatives with respect to the following transaction involving U.S. exports to the Philippines:

A. DESCRIPTION OF THE TRANSACTION

1. Background and purpose

Eximbank proposes to offer its financal guarantee of up to $104,210,000 for commercial loans to National Power Corporation (NPC), a company wholly owned by the Government of the Republic of the Philippines, to assist NPC in financing additional costs of $122,600,000 for goods and services required for plant and site safety design modernization and improvement, construction schedule extension and related costs of NPC's 620 megawatt nuclear power plant on the Bataan Peninsula (Project). This financing support will supplement a direct credit of $277,200,000 and an Eximbank guarantee of private loans of like amount to assist in the export of U.S. goods and services for the Project and an Eximbank guarantee of $90,000,000 of private loans to cover interest during construction. This supplemental financing would be for costs which are a part of total costs of $769,400,000 incurred or to be incurred in addition to original cost estimates for the Project.

The increased costs have resulted from construction delays and the modernization and upgrading of plant design. The original cost of construction was estimated at $1,105.3 million with completion scheduled for June 1983. Present cost estimates are $1,874.7 million with completion scheduled for January 1985. Although construction at the end of 1978 was six months ahead of schedule, it has since fallen 18 months behind schedule due primarily to a sequence of events reflecting conerns voiced by various parties over plant design and site characteristics.

Because the Philippines is located in an area of general seismic and volcanic activity, extensive site and environmental studies were made before construction began by the Philippine Atomic Energy Commission (PAEC), the International Atomic Energy Agency (IAEA) and Ebasco Overseas Inc., as consultant to NRC. Nevertheless, because of the concerns expressed over site selection the PAEC in 1978 requested a further

review by IAEA of prior site evaluations. Pending this review the Department of State requested the Nuclear Regulatory Commission (NRC) to withhold action on the issuance of a nuclear reactor export license. Issuance of an export license for nonnuclear equipment was also deferred by the Department of Commerce. After additional studies recommended by the IAEA report to the PAEC, the latter on April 4, 1979, issued a formal construction permit.

When concerns in the Philippines over plant safety persisted, particularly after the Three Mile Island (TMI) accident, the President of the Philippines in June 1979 suspended construction and appointed a commission headed by the Philippine Minister of Justice to review safety aspects of the plant. The commission's report in November 1979 found the site to be well within reasonable margins of safety but recommended that NRC's contract with Westinghouse Electric Corporation, the U.S. supplier, be renegotiated to upgrade plant design to incorporate post 1973 NRC guidelines and TMI related safety changes. Subsequently, on May 6, 1980 the NRC issued the nuclear reactor export license, and on September 26, 1980, following negotiations with Westinghouse regarding plant design changes, the suspension of construction was lifted. In November 1980 following an appeal of the NRC decision by public interest groups the United States Court of Appeals for the District to Columbia denied a motion to stay export of the nuclear equipment. Consequently, exportation of the equipment has gone forward although a final decision of the Court of Appeals has not yet been given.

2. Executive branch approval

Export of the equipment and fuel for the Project is being made within the framework of a Bilateral Agreement for Cooperation between the United States and the Republic of the Philippines, implemented by a Trilateral Agreement among the United States, the Republic of the Philippines and the IAEA, and a safeguards agreement between the Philippines and the IAEA pursuant to the obligations of the Philippines under the Treaty on the Non-Proliferation of Nuclear Weapons.

On September 28, 1979, the Department of State submitted to the NRC the judgment of the Executive Branch that the requirements of the Atomic Energy Act and the Nuclear Non-Proliferation Act had been met, that the Philippines had adhered to the provisions of its agreement for cooperation with the United States and that the proposed export of the reactor would not be inimical to the common defense and security of the United States. The Executive Branch judgment was reviewed extensively by the Departments of State, Energy, Defense and Commerce, and the U.S. Arms Control and Disarmament Agency. Prior to submitting this Executive Branch judgment, the Department of State prepared a concise environmental review of the impacts of the Project on the Philippines and the global commons consistent with Executive Order 12114 of January 4, 1979, and the Department implementing procedures for nuclear actions (not then published). The concise environmental review and comments received from reviewing agencies were transmitted to the NRC along with the Executive Branch judgment.

The NRC directed that the license applications be issued after receiving the Executive Branch judgment, holding public proceedings and considering the potential health, safety and environmental impacts of the reactor export in the territory of the United States and in the global commons.

In accordance with established procedures Eximbank requested through the Department of State the views of the Executive Branch on the proposed transaction. State's Bureau of Oceans and International Environmental and Scientific Affairs advised that the Executive Branch had no objections to Eximbank's proceeding with this transaction.

3. Identity of the parties

Borrower

Established in 1936, NPC is wholly owned by the Government of the Republic of the Philippines. Under Presidential Decree No. 40, NPC is responsible for providing all future power generation expansion throughout the Philippines. At the end of 1980 total generating capacity of the NPC systems was 4,025 megawatts, consisting of 25% hydro power, 64% oil and 11% geothermal. NPC projects an installed generating capacity of 7,219 megawatts by 1985 when this Project is to be completed. The expected breakdown of that capacity is as follows: hydro 33%, geothermal 11%, oil 38%, coal 10%, and nuclear 8%.

Guarantor

The Republic of the Philippines has issued its unconditional guarantee of payment of the existing Eximbank direct credit and loans guaranteed by Eximbank for the Project and will issue its unconditional guarantee of payment of the loans to be guaranteed by Eximbank in this transaction.

B. EXPLANATION OF THE EXIMBANK FINANCING

1. Reasons

This Project has incurred considerable additional costs from those originally estimated due primarily to delays and upgrading occasioned by concerns that all reasonable safeguards be introduced into this nuclear project. Eximbank has identified costs of U.S. goods and services included in those needed to complete the Project which it deems particularly worthy of support. They include equipment and services primarily in the categories of plant and site safety design modifications and improvements and construction schedule extension. Mindful of other demands on its resources, Eximbank proposes to authorize a guarantee only of loans from private sources of up to 85% of U.S. costs, or $104,210,000, which will facilitate the export of $122,600,000 of U.S. goods and services to the Philippines.

Eximbank perceives no adverse impact on the United States economy from the export of these goods and services. This transaction will have favorable impact on employment for substantial numbers of United States workers, as well as on the United States balance of trade. None of the goods to be exported is in short supply in the United States.

Eximbank has been informed by Westinghouse that the equipment that it and several sub-suppliers will be supplying the Philippines will require 4,900 man-years of direct and indirect labor throughout the United States. Westinghouse facilities involved in this sale will be located in Pensacola, Florida; Chattanooga, Tennessee; Charlotte, North Carolina; Philadelphia, Pennsylvania and Paramus, New Jersey. In addition, many of the sub-suppliers involved in this transaction have excess capacity for the goods to be exported as a result of the slowdown and cancellation of nuclear power projects in the United States.

The Government of the Philippines believes that Eximbank support is essential to the completion of the Project, and that such support will induce U.S. or other financial institutions to provide the necessary additional funding for the Project in conjunction with funds provided by the Philippine Government. The Project remains technically feasible.

2. The financing plan

The total cost of the United States goods and services which are to be financed by Eximbank is $122,600,000 to be financed as follows:

	Amount	Percent of U.S. costs
Cash	$18,390,000	15
Eximbank financial guarantee	104,210,000	85
Total	122,600,000	100

(a) Eximbank charges

Eximbank will charge a guarantee commitment fee of ⅛ of 1% per annum on the undisbursed portion of the loan guaranteed by Eximbank, as well as a guarantee fee of ½ of 1% per annum on the balance of the loan guaranteed by Eximbank which is disbursed and outstanding.

(b) Repayment terms

The loan of $104,210,000 to be guaranteed by Eximbank will be repaid by the Borrower in ten approximately equal semiannual installments beginning June 30, 1987, and ending December 31, 1991, to coincide with the repayment schedule dates of existing loans for the Project which are guaranteed by Eximbank.

Attached is additional information on Eximbank activity in and economic data on the Philippines.

Sincerely,

JOHN L. MOORE,
President and Chairman.

LEGAL SERVICES CORPORATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. KASTENMEIER) is recognized for 5 minutes.

● Mr. KASTENMEIER. Mr. Speaker, today the Subcommittee on Courts, Civil Liberties, and the Administration of Justice will have concluded 4 days of hearings on H.R. 2506, a bill to extend the authorization for appropriations for the Legal Services Corporation. I will hold two more hearings next week—March 31 and April 1—after which I hope the subcommittee can proceed to markup. Originally I had intended to hold the final day of hearings on April 8, but have decided to advance the date to April 1.

I would welcome any comments which Members may wish to make, and would appreciate receiving them by noon on April 3. That will enable the Members to review comments before subcommittee markup, which I hope to schedule during the week of April 6.

If Members have any specific complaints which they believe should be investigated, please send a written statement of the complaint to my subcommittee office, 2137 Rayburn House Office Building, as soon as possible, and no later than April 3, if feasible. I will seek to review and investigate every complaint immediately.●

THE HUNGER AND GLOBAL SECURITY ACT

(Mr. GILMAN asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. GILMAN. Mr. Speaker, today, my distinguished colleague, the gentleman from New York (Mr. SOLARZ) and I are introducing the Hunger and Security Act, legislation emerging from our work during the last several months with Bread for the World, an organization which has worked long and hard on the issue of world hunger. We commend them for their many contributions in this area. We are all hopeful that passage of this measure will help to eliminate world hunger and malnutrition while fostering the security of our Nation and the international community.

My colleague, while serving as the chairman of the Subcommittee on Africa and currently as the chairman of the Subcommittee on Asian and Pacific Affairs has observed firsthand how peoples in the developing world are devastated by omnipresent hunger and chronic malnutrition, and he has demonstrated a sincere commitment to eradicating this plague which looms as a part of the daily existence of hundreds of millions of people throughout the world.

As a member of the Committee on Foreign Affairs, and recently as a member of the Presidential Commission on World Hunger, I have come to recognize that hunger is a problem of enormous dimensions with political, social, and economic implications measuring beyond the unconscionable suffering and debilitation visited upon huge numbers of innocent children and adults.

The causes of hunger remain deeply rooted. For this reason, it is our hope that our Nation and other nations can begin to accord to efforts to resolve this problem, the high priority they require. Accordingly, the Hunger and Global Security Act seeks to focus greater attention on and focus more resources toward the elimination of hunger and its causes.

This bill has several major provisions: First, helping to assure that our Public Law 480 food assistance program contributes to self-help assistance and receipt of this assistance by those most in need; second, urging multilateral development banks to adopt procedures whereby assistance is increasingly targeted to reach those persons whose incomes are inadequate to prevent malnutrition; third, encouraging other developed nations to con-

tribute to world food security by establishing food security reserves similar to one established by the United States last year; fourth, urging creation of a global food financing facility to assist developing nations experiencing balance-of-payment problems due to significant crop failures; fifth, helping to assure that food embargoes do not aggravate malnutrition; sixth, encouraging developing nations which receive trade benefits from the United States to assign a priority to alleviating malnutrition and to enabling the poor to participate actively in increasing economic productivity through such measures as small farm agriculture; and seventh, establishing within the Agency for International Development a public health fund to assist private and voluntary organizations in their efforts to reduce disease in developing nations.

Mr. Speaker, the gentleman from New York and I believe that passage of this measure would be a significant step in our Nation's efforts to help eliminate world hunger and malnutrition and promote global security.

Accordingly, we urge our colleagues to support expeditious consideration and passage of this legislation. I include the complete text of this bill and a sectional analysis of the measure's key provisions at this point in the RECORD:

H.R. 2793

A bill to help eliminate world hunger and malnutrition and promote global security.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the the "Hunger and Global Security Act".

FINDINGS REGARDING GLOBAL SECURITY

SEC. 2. (a) The Congress finds that the security of the United States and other countries is increasingly affected by a broad range of global problems including shortages or potential shortages of food, oil, water, wood, and other basic mineral and natural resources; desperate poverty; sickness; population pressures; environmental deterioration, including soil erosion and water pollution; and large-scale and destabilizing refugee problems.

(b) The Congress finds that hunger, disease, and extreme poverty are among the most critical of these global problems. As ever greater numbers of people perceive the disparity between their own continuing deprivation and the prosperity of others, and judge their predicament to be neither just nor inevitable, it becomes increasingly likely that there will be unrest and violence with consequent disruption of the flow of essential materials, adverse effects on the world economy, decreased likelihood of cooperative efforts toward meeting the other critical problems threatening national and global security, and increased likelihood of confrontation between nations which possess nuclear arms.

(c) Therefore, the Congress finds that the Nation's understanding of global and national security must be broad enough to include the problems cited in this section, and that adequate protection of the security of the United States requires effective action on these global problems, and in particular on the problems of hunger, disease, and extreme poverty.

FINDINGS AND DECLARATION OF POLICY REGARDING WORLD HUNGER

SEC. 3. The Congress, affirming the value of human life, finds and declares that the elimination of hunger and its causes is of fundamental moral significance and, further, that it is in the political, economic, and security interest of the United States. Therefore, the Congress declares that the elimination of hunger and its causes shall be a primary objective of United States relations with the developing countries.

TITLE I—PUBLIC LAW 480

SELF-HELP MEASURES TO INCREASE AGRICULTURAL PRODUCTION

SEC. 101. Section 109(a) of the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1709(a)) is amended—

(1) in paragraph (3) by inserting immediately before the semicolon ", and reducing illiteracy among farmers";

(2) by striking out the period at the end of paragraph (10) and inserting in lieu thereof "; and"; and

(3) by inserting the following new paragraph immediately after paragraph (10):

"(11) carrying out programs to improve the health of farmers and their families.".

VERIFICATION OF SELF-HELP PROVISIONS

SEC. 102. Section 109 of the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1709) is amended by adding at the end thereof the following new subsection:

"(d)(1) In each agreement entered into under this title and in each amendment to such an agreement, the economic development and self-help measures which the recipient country agrees to undertake shall be described (A) to the maximum feasible extent, in quantitative and measurable terms, and (B) in a manner which ensures that the primary beneficiaries of the measures pursuant to each agreement will be the needy people in the recipient country. For purposes of this paragraph, needy people are those individuals whose incomes are below the level required to prevent malnutrition.

"(2) The President shall take appropriate steps to satisfy himself that, in each agreement entered into under this title and in each amendment to such an agreement, the economic development and self-help measures which the recipient country agrees to undertake are additional to the measures which the recipient country had been planning to undertake irrespective of that agreement or amendment. This paragraph does not apply with respect to a recipient country which faces extraordinarily severe balance of payments problems.

"(3) The President shall take all appropriate steps to verify that the economic development and self-help provisions of each agreement entered into under this title, and of each amendment to such an agreement, are being fully carried out. In such verification, as well as in the negotiation of any such agreement or amendment, the President shall take special note of information available from United States private sector organizations wishing to provide relevant information, as well as of the assessments of United States missions in the recipient country and the official statements of the government of that country.

"(4) Upon request of the Committee on Agriculture, Nutrition, and Forestry of the Senate or the Committee on Foreign Affairs of the House of Representatives, the President shall provide to that committee a written account of steps taken pursuant to paragraphs (2) and (3) of this subsection.".

TITLE II—MULTILATERAL DEVELOPMENT BANKS

TARGETING ASSISTANCE TO THE NEEDY

SEC. 201. The Act of October 3, 1977 (Public Law 95-118; 91 Stat. 1067), is amended by adding at the end thereof the following new title:

"TITLE XI—TARGETING ASSISTANCE TO THE NEEDY

"SEC. 1101. The Congress notes with approval that the Inter-American Development Bank, under the terms of its Fifth Replenishment, has adopted the target that 50 per centum of its lending benefit the poorest groups and has developed a usable methodology for determining the proportion of its lending which benefits such groups.

"SEC. 1102. The United States Government shall make every reasonable effort to bring about the establishment of a requirement by the International Bank for Reconstruction and Development, the International Development Association, the African Development Fund, the Asian Development Bank, the Inter-American Development Bank, and any other multilateral development bank of which the United States becomes a member, that not less than some specified proportion of its lending must benefit needy people, such proportion to be at least 50 per centum. For purposes of this title, needy people are those persons whose incomes are inadequate to prevent malnutrition.

"SEC. 1103. The Secretaries of State and Treasury shall include in the annual report required under section 901(b) of this Act an account of the progress being made toward achieving the goals of section 1102, and shall also include, for each of the institutions referred to in section 1102, as accurate an estimate as is practicable of the proportion of the lending by that institution which benefits needy people. In formulating these estimates, the Secretaries of State and Treasury may utilize the methodology developed by the Inter-American Development Bank or such other methodology or methodologies as they may determine to be appropriate.".

TITLE III—WORLD FOOD SECURITY

FOOD SECURITY RESERVES

SEC. 301. (a) The Congress finds that—

(1) the Congress recently passed and the President signed into law an Act which provides for establishment of a United States food security reserve of up to four million metric tons of wheat to be used for emergency food assistance;

(2) the food import needs of developing countries will increase over the next ten years; and

(3) some other grain exporting countries could take additional steps to assure continuity of food assistance during food crisis years.

(b) The President shall encourage other grain exporting countries to establish their own food security reserves or take other measures that complement the United States food security reserve.

(c) The President shall report to the Speaker of the House of Representatives

and the Committee on Foreign Relations of the Senate within one year after the enactment of this Act on the actions he has taken to implement this section.

GLOBAL FOOD FINANCING FACILITY

SEC. 302. (a) The Congress finds that—

(1) a number of developing countries, including "food priority countries", are experiencing serious balance of payments problems;

(2) significant crop failures in any of these countries, and the consequent need to import food to make up the shortfall, could further exacerbate these balance of payments problems; and

(3) the establishment of an international food financing facility to provide balance of payment assistance to countries which would otherwise experience food shortages would help alleviate this problem.

(b) The President shall—

(1) take all appropriate steps to negotiate with other countries, and with international and regional organizations, the establishment of a global food financing facility; and

(2) take all necessary steps to ensure that the benefits of such a facility meet basic human needs.

(c) The President shall report to the Speaker of the House of Representatives and the Committee on Foreign Relations of the Senate within one year after the enactment of this Act on the actions he has taken to implement this section.

LIMITATION ON UNITED STATES FOOD EMBARGOES

SEC. 303. Section 6(f) of the Export Administration Act of 1979 (50 U.S.C. 2405(f)) is amended—

(1) in the subsection caption by inserting "AND FOR CERTAIN FOOD EXPORTS" immediately after "SUPPLIES";

(2) by inserting the following immediately after the first sentence: "Before export controls on food are imposed, expanded, or extended under this section, the Secretary shall notify the Secretary of State in the case of export controls applicable with respect to any developed country and shall notify the Director of the United States International Development Cooperation Agency in the case of export controls applicable with respect to any developing country. The Secretary of State with respect to developed countries, and the Director with respect to developing countries, shall determine whether the proposed export controls on food would cause measurable malnutrition and shall inform the Secretary of that determination. If the Secretary is informed that the proposed export controls on food would cause measurable malnutrition, then those controls may not be imposed, expanded, or extended, as the case may be, unless the President determines that those controls are necessary to protect the national security interests of the United States. Each such determination by the Secretary of State or the Director of the United States International Development Cooperation Agency, and any such determination by the President, shall be reported to the Congress, together with a statement of the reasons for that determination.";

(3) in the next to the last sentence by striking out "supplies," and inserting in lieu thereof "supplies or of food"; and

(4) in the last sentence by inserting immediately before the period "or to any export control on food which is in effect on the effective date of the Hunger and Global Security Act".

TITLE IV—GENERALIZED SYSTEM OF PREFERENCES

DESIGNATION OF BENEFICIARY DEVELOPING COUNTRIES

SEC. 401. (a) Section 502(b) of the Trade Act of 1974 (19 U.S.C. 2462(b)) is amended—

(1) by striking out "and" at the end of paragraph (6);

(2) by striking out the period at the end of paragraph (7) and inserting in lieu thereof "; and"; and

(3) by inserting the following new paragraph immediately after paragraph (7):

"(8) if such country fails to give priority to alleviating malnutrition and poor health and to enabling the poor to participate actively in increasing economic productivity through such means as small farm agriculture.".

(b) Such section is further amended by adding at the end thereof the following new sentence: "Paragraph (8) shall not prevent the designation of any country as a beneficiary developing country under this section if the President determines that such designation is required by the national security interests of the United States and reports such determination to the Congress with his reasons therefor.".

BENEFITS FOR THE POOREST BENEFICIARY DEVELOPING COUNTRIES

SEC. 402. The Congress finds that the poorest developing countries get very few benefits from the Generalized System of Preferences under title V of the Trade Act of 1974 because they are not in a position to produce the vast majority of the articles eligible for duty-free treatment under that title. Accordingly, the President shall review whether it is possible, consistent with other United States interests, to increase the benefits available to the poorest beneficiary developing countries under that title. Not later than one year after the date of enactment of this section, the President shall report the results of that review to the Congress, together with such recommendations for legislation as the President considers appropriate.

TITLE V—AMERICAN INTERNATIONAL PUBLIC HEALTH FUND

FINDINGS AND DECLARATIONS

SEC. 501. The Congress finds and declares that—

(1) private and voluntary organizations have made substantial contributions to international public health;

(2) private and voluntary organizations are a vital part of current international health efforts and should become an even more valuable component of our Nation's international health activities, without, however, compromising their private and independent nature; and

(3) in order to encourage and support the involvement of private and voluntary organizations in meeting international health goals, a special fund should be established to assist these organizations in implementing small scale and cost effective public health activities in developing countries.

DEFINITIONS

SEC. 502. For purposes of this title—

(1) "Administrator" means the Administrator of the Agency for International Development;

(2) "Agency for International Development" means the Agency for International Development or any successor agency primarily responsible for administering Part I of the Foreign Assistance Act of 1961;

(3) "Fund" means the American International Public Health Fund established pursuant to section 503 of this title; and

(4) "public health activity" means any activity carried out for the purpose of addressing major health problems in developing countries through—

(A) disease control, including projects to promote safe water supplies, sanitary waste disposal, and preventive medicine;

(B) projects and programs to promote general health, including health education; or

(C) health services delivery and management.

ESTABLISHMENT OF THE FUND

SEC. 503. (a) There shall be established in the Agency for International Development a fund to be known as the American International Public Health Fund. The Fund shall be headed by a Director appointed by the Administrator.

(b) The Fund shall commence the activities described in section 504 of this title not later than six months after the date of enactment of this title.

ACTIVITIES AND PURPOSES OF THE FUND

SEC. 504. (a) In order to facilitate improvements in international public health, the Fund is authorized to provide financial assistance to private and voluntary organizations to support specific public health activities sponsored by those organizations in developing countries.

(b) In determining the policies and programs of the Fund, every reasonable effort shall be made to ensure that the allocation of the resources of the Fund results in the greatest feasible reduction in the incidence of fatal or disabling diseases among needy persons in the developing countries.

(c) Financial assistance by the Fund to private and voluntary organizations for studies, conferences, and administrative activities in any fiscal year may not exceed 7.5 per centum of the moneys obligated by the Fund in that fiscal year. The Fund shall concentrate its support on activities which attempt directly to improve the health of the needy.

(d) In determining how the resources of the Fund are to be allocated, special attention shall be paid—

(1) to ensuring that the projects chosen to be supported by the Fund are so designed that they can be effectively implemented and in particular that the projects chosen are not so large as to hamper effective management and implementation;

(2) to activities which are undertaken to benefit the needy in connection with the International Drinking Water and Sanitation Decade; and

(3) to the need to include the full range of relevant viewpoints in designing and carrying out public health activities, and in particular the need to complement the perspective of medical science with the perspectives of experts in such fields as administration, logistics, and engineering, and in the political, cultural, social, and economic conditions in the area where the activities are to be carried out.

(e) If the President deems it appropriate, all programs carried out by the Agency for International Development for purposes of assisting private and voluntary organizations in the public health field may be carried out through the Fund. For such purpose, any funds available to that Agency for such assistance may be made available by the President for use by the Fund under

this title, except that the authority of this sentence may not be used to transfer funds appropriated before the enactment of this title.

(f) The Fund may provide financial assistance under this section in the form of loans or grants or a mixture of loans and grants. Loans may be made on such terms and conditions as the Director of the Fund may determine.

BOARD FOR INTERNATIONAL PUBLIC HEALTH

SEC. 505. (a) To assist in the administration of the programs authorized by this title, the Administrator shall establish a Board for International Public Health (hereafter in this title referred to as the "Board") consisting of five members, not less than three of whom shall be selected from private and voluntary organizations engaged in public health activities in developing countries.

(b) Terms of members of the Board shall be set by the Administrator at the time of appointment. Members of the Board shall serve without additional compensation but may be reimbursed for actual and necessary expenses not in excess of $75 per day, and for transportation expenses, while engaged in their duties under this section.

(c) In making appointments to the Board, the Administration shall consider the need to complement the perspective of medical science with other relevant viewpoints as described in section 504(d)(3) of this title.

(d) The duties of the Board shall include—

(1) participating in the formulation of basic policy, procedures, and criteria for project proposal review, selection, and monitoring;

(2) to the extent deemed appropriate by the Board, reviewing and evaluating memorandums of understanding or other documents that detail the terms and conditions under which the Fund provides financial assistance to private and voluntary organizations;

(3) reviewing, evaluating, and assessing the impact of activities supported by the Fund to ensure compliance with the purposes of this title and in particular with the criterion set out in section 504(b) of this title;

(4) recommending to the Director of the Fund the allocation of the funds available to carry out this title; and

(5) participating in the preparation of the annual report required under section 506 of this title.

ANNUAL REPORTS

SEC. 506. (a) At the end of the 15-month period beginning on the date on which the Fund commences its activities under this title, and annually thereafter, the Director of the Fund shall submit a report simultaneously to the President and to the Congress on the Fund's progress, operations, activities, financial condition, and accomplishments and failures. The primary purpose of the report shall be to show what steps have been taken to meet the criterion specified in section 504(b) of this title.

(b) The report shall, at the request of the Board, include the separate views of the Board with respect to any aspect of the programs conducted or proposed to be conducted under this title.

AUTHORIZATION OF APPROPRIATIONS

SEC. 507. (a) In addition to any funds otherwise available for such purpose, funds to carry out this title shall be authorized and appropriated on an annual basis. Funds appropriated to carry out this title are authorized to be made available until expended.

(b) It is the intent of the Congress that the establishment of the Fund will not entail additional foreign assistance expenditures, but rather will involve a shift of resources from other portions of the foreign assistance program.

SECTIONAL ANALYSIS—HUNGER AND GLOBAL SECURITY ACT

Summary: The Hunger and Global Security Act is an omnibus measure designed to improve the effectiveness of U.S. efforts against world hunger. It proposes reforms in current programs but does not call for increased spending.

Policy Language

Findings Regarding Global Security: There are major threats to the physical security of the United States and the world which cannot be dealt with by military means. These threats include the depletion of the earth's resources, desperate poverty, global deterioration of the environment, sickness, and large-scale, destabilizing refugee problems. Therefore adequately protecting the security of the United States requires more than military strength. It requires effective action on global problems, including hunger.

Findings and Declaration of Policy Regarding World Hunger: This section declares that the United States shall make the elimination of hunger and its causes a primary objective of its relations with developing countries.

TITLE I. PUBLIC LAW 480

Sec. 101. Self-Help Measures to Increase Agricultural Production. This section adds to the illustrative list of self-help measures which are to be considered in allocating aid under Title I of P.L. 480 the following measures: (a) efforts by the recipient countries to reduce illiteracy among farmers, (b) efforts by the recipient country to improve the health of farmers and their families.

Sec. 102. Verification of Self-Help Provisions. This section amends P.L. 480 to require that whenever food is sold under Title I, the self-help measures which the recipient country agrees to in the sales agreement

(a) shall be described, to the greatest extent feasible, in quantitative and measurable terms; and

(b) shall be described in such a manner as to ensure that the primary beneficiaries of the set of self-help measures are needy persons in the recipient country.

In addition, the bill strengthens the procedures for monitoring compliance and for ensuring that the self-help measures agreed to are additional to measures which the government would have undertaken with or without receiving assistance.

TITLE II. MULTILATERAL DEVELOPMENT BANKS

This title amends Public Law 95-118 by adding a new title:

Targeting Assistance to the Needy

This title states that:

(a) Congress notes with approval that the Inter-American Development Bank has adopted a target that 50 percent of its lending benefit the poorest groups and has developed a usable methodology for determining the proportion of its lending that is benefiting such groups.

(b) The Administration is directed to press all multilateral development banks in which the U.S. participates to adopt requirements specifying that not less than half of their lending shall benefit the needy.

(c) The Administration is to report to Congress on progress toward achieving this goal.

TITLE III. WORLD FOOD SECURITY

Sec. 301. Food Security Reserves. The recently established U.S. emergency grain reserve provides a 4 million ton backstop for U.S. food aid. This section directs the Administration to encourage other grain-exporting nations to establish their own food security reserves or to take other measures that complement the U.S. food security reserve.

Sec. 302. Global Food Financing Facility. This section directs the President to take all appropriate steps to negotiate with other countries the establishment of a food financing facility and to take all necessary steps to ensure that any such facility meet basic human needs. A food financing facility would provide balance of payments assistance to countries which would otherwise experience food shortages. Such a facility may soon be approved by the International Monetary Fund.

Sec. 303. Limitation on U.S. Food Embargoes. This section amends the Export Administration Act of 1969 to prohibit grain embargoes which would cause malnutrition except those embargoes necessary to protect U.S. national security. This section would not prohibit the embargo currently imposed against the U.S.S.R.

TITLE IV. GENERALIZED SYSTEM OF PREFERENCES

Sec. 401. Designation of Beneficiary Developing Countries. The Generalized System of Preferences (GSP) allows certain goods from developing countries to enter the United States duty-free. This section denies GSP benefits to developing countries which do not give priority to alleviating malnutrition and extreme poverty, unless the Administration determines that national security interests require GSP benefits to such a country.

Sec. 402. Benefits for the Poorest Beneficiary Developing Countries. Currently five relatively advanced nations account for 68 percent of U.S. imports under the GSP. This section directs the Administration to investigate options for increasing the benefits available to the poorest developing countries and to report to Congress on the results of this investigation.

TITLE V. AMERICAN INTERNATIONAL PUBLIC HEALTH FUND

In low-income countries the death rate of children between the ages of one and four is twenty times the rate for industrialized countries. These health conditions can be changed. Recent studies indicate that well-run projects can reduce infant and child mortality by one third to one half in one to five years at a relatively modest cost.

This title sets up a fund within the U.S. Agency for International Development to provide additional financing for private voluntary organizations engaged in health work in developing countries. This title stipulates that the establishment of the fund shall involve a shift in resources rather than additional foreign assistance spending.

The fund would receive advice and guidance from an independent advisory board whose members would serve without pay.

If the Administration deems it appropriate, all programs carried out by USAID for the purpose of assisting private voluntary organizations in health work would be carried out through the fund.●

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows to:

Mr. MARKS (at the request of Mr. MICHEL), for today and the balance of the week, because of illness in the family.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. FIELDS) to revise and extend their remarks and include extraneous material:)

Mr. TAUKE, for 5 minutes, today.
Mr. CORCORAN, for 5 minutes, today.
Mr. MCKINNEY, for 10 minutes, today.

(The following Members (at the request of Mr. DYSON) to revise and extend their remarks and include extraneous material:)

Mr. BINGHAM, for 20 minutes, today.
Mr. BARNES, for 5 minutes, today.
Mr. GONZALEZ, for 15 minutes, today.
Mr. ANNUNZIO, for 5 minutes, today.
Mr. DASCHLE, for 5 minutes, today.
Mr. BROOKS, for 10 minutes, today.
Mr. HUGHES, for 5 minutes, today.
Mr. LAFALCE, for 15 minutes, today.
Mr. NEAL, for 5 minutes, today.
Mr. KASTENMEIER, for 5 minutes, today.
Mr. MAVROULES, for 30 minutes, March 26.
Mr. DASCHLE, for 5 minutes, March 26.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. GILMAN, notwithstanding the fact that it exceeds two pages of the CONGRESSIONAL RECORD and is estimated by the Public Printer to cost $1,560.

(The following Members (at the request of Mr. FIELDS) and to include extraneous material:)

Mr. MARLENEE in two instances.
Mr. DREIER.
Mr. MICHEL in three instances.
Mr. EVANS of Iowa in two instances.
Mr. LENT.
Mr. LIVINGSTON.
Mr. MOORHEAD.
Mr. LOTT.
Mr. PARRIS.
Mr. CONABLE.

Mr. GEPHARDT in two instances.
Mr. BOLLING.
Mr. DELLUMS.
Mr. NEAL.
Mr. MINETA.
Mr. GARCIA.
Mr. ROE.

SENATE JOINT RESOLUTION REFERRED

A joint resolution of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S.J. Res. 55. Joint resolution to grant honorary citizenship posthumously to Douglas Clyde Macintosh; to the Committee on the Judiciary.

ADJOURNMENT

Mr. DYSON. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 15 minutes p.m.) the House adjourned until tomorrow, Thursday, March 26, 1981, at 11 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

900. A letter from the President and Chairman, Export-Import Bank of the United States, transmitting a report on loan, guarantee and insurance transactions supported by Eximbank during February 1981 to Communist countries, and a report that there was no such activity during January 1981; to the Committee on Banking, Finance and Urban Affairs.

901. A letter from the Acting Director, Federal Emergency Management Agency, transmitting a draft of proposed legislation to authorize appropriations for studies under the National Flood Insurance Act of 1968 for the fiscal years 1982 and 1983; to the Committee on Banking, Finance and Urban Affairs.

902. A letter from the Acting Chairman, Federal Trade Commission, transmitting the third annual report on administration and enforcement of the Fair Debt Collection Practices Act, pursuant to section 815(a) of the act; to the Committee on Banking, Finance and Urban Affairs.

903. A letter from the Acting Administrator, U.S. Environmental Protection Agency, transmitting the fourth annual report on administration of the Toxic Substances Control Act, covering fiscal year 1980, pursuant to section 30 of the act; to the Committee on Energy and Commerce.

904. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Army's intention to continue leasing certain defense property to Honduras (Transmittal No. 1-81), pursuant to section 109(a) of Public Law 96-533; to the Committee on Foreign Affairs.

905. A letter from the Executive Director, Board of International Broadcasting, transmitting a draft of proposed legislation to amend the Board for International Broadcasting Act of 1973, to authorize a supplemental appropriation for fiscal year 1981, and to authorize appropriations for fiscal years 1982 and 1983; to the Committee on Foreign Affairs.

906. A letter from the Chairwoman, Merit Systems Protection Board, transmitting a report on the Board's activities under the Freedom of Information Act during calendar year 1980, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

907. A letter from the Freedom of Information Officer, International Boundary and Water Commission, United States and Mexico, transmitting a report on the Commission's activities under the Freedom of Information Act during calendar year 1980, pursuant to 5 U.S.C 552(d); to the Committee on Government Operations.

908. A letter from the Deputy Assistant Secretary of Defense (Administration), transmitting notice of proposed changes in an existing Navy records system, pursuant to 5 U.S.C 552a(o); to the Committee on Government Operations.

909. A letter from the Deputy Assistant Secretary of Defense (Administration), transmitting notice of proposed changes in an existing Defense Nuclear Agency records system, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

910. A letter from the Acting Assistant Secretary of Commerce for Administration, transmitting notice of a proposed new records system for the Minority Business Development Agency, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

911. A letter from the Acting Assistant Secretary of Health and Human Services for Planning and Evaluation, transmitting

notice of a proposed new records system, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

912. A letter from the Chairman, Foreign Claims Settlement Commission of the United States, transmitting a report on the Commission's activities under the Government in the Sunshine Act during calendar year 1980, pursuant to 5 U.S.C. 552b(j); to the Committee on Government Operations.

913. A letter from the Secretary of the Interior, transmitting the fifth annual report on Tule elk herds in California, pursuant to sections 3 and 4 of Public Law 94-389; to the Committee on Merchant Marine and Fisheries.

914. A letter from the Acting Assistant Secretary of the Army (Civil Works), transmitting a draft of proposed legislation to require recovery of certain expenditures of the U.S. Army Corps of Engineers for operation, maintenance, and construction of deep draft channels and ocean and Great Lakes ports of the United States and to authorize such construction in specified circumstances; to the Committee on Public Works and Transportation.

915. A letter from the Acting Director, Federal Emergency Management Agency, transmitting a draft of proposed legislation to authorize appropriations for the Federal Fire Prevention and Control Act of 1974, and for other purposes; to the Committee on Science and Technology.

916. A letter from the Secretary of Transportation, transmitting a draft of proposed legislation to provide for the improvement of the Nation's airports and airway system, for the modification of airport and airway user taxes, and for other purposes; jointly, to the Committees on Public Works and Transportation, Science and Technology, and Ways and Means.

917. A letter from the Acting Assistant Secretary of the Army (Civil Works), transmitting a draft of proposed legislation to provide for the recovery of capital and operations and maintenance costs assignable to commercial waterway transportation for certain U.S. Army Corps of Engineers inland waterway projects; jointly, to the Committees on Public Works and Transportation and Ways and Means.

918. A letter from the Secretary of the Interior, transmitting a draft of proposed legislation to amend section 7 of the Earthquake Hazards Reduction Act of 1977 (42 U.S.C. 7706) to extend authorizations for appropriations, and for other purposes; jointly, to the Committees on Science and Technology and Interior and Insular Affairs.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ADDABBO:

H.R. 2810. A bill to amend section 3626 of title 39 United States Code, to make the rates for third-class mail matter mailed by nonprofit community or civic improvements organizations the same as the rates for third-class mail matter mailed by organizations considered qualified nonprofit organizations under former section 4452 of such title; to the Committee on Post Office and Civil Service.

By Mr. BROOKS (for himself and Mr. ENGLISH):

H.R. 2811. A bill to amend the Privacy Act of 1974 to increase the efficiency of Government-wide efforts to collect debts owed the United States, to require the reporting to Congress of information on debts owed the United States, and for other purposes; to the Committee on Government Operations.

By Mr. BUTLER, (for himself, Mr. BROOKS, Mr. MAZZOLI, Mr. EVANS of Georgia, Mr. IRELAND, Mr. RAILSBACK, Mr. FISH, Mr. MOORHEAD, Mr. JOHNSTON, and Mr. WHITLEY):

H.R. 2812. A bill to amend the Clayton Act to limit the circumstances under which foreign governments may sue for violations of the antitrust laws, and for other purposes; to the Committee on the Judiciary.

By Mr. CLAY:

H.R. 2813. A bill to amend title 39 of the United States Code to provide for postal services utilizing transmission through privately owned telecommunications, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. COLLINS of Texas:

H.R. 2814. A bill to amend the Public Health Service Act to provide that an employer who includes in an employee health benefits plan a health maintenance organization which meets the requirements of State law shall not be required to include in such plan a federally qualified health maintenance organization; to the Committee on Energy and Commerce.

By Mr. CONABLE:

H.R. 2815. A bill to amend the Internal Revenue Code of 1954 to allow certain employees covered by employer retirement plans a deduction for contributions to such plans or to individual retirement plans; to the Committee on Ways and Means.

By Mr. CONTE:

H.R. 2816. A bill to amend the Internal Revenue Code of 1954 to provide tax relief for that portion of the cost of electricity used for residential purposes which is attributable to costs incurred by the utility for residual fuel oil; to the Committee on Ways and Means.

By Mr. CORCORAN:

H.R. 2817. A bill to amend title 39 of the United States Code to terminate the Board of Governors of the United States Postal Service, to provide that the exercise of the power of the Postal Service shall be directed by the Postmaster General, to revise the authority of the Postal Rate Commission, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. DELLUMS (for himself and Mr. FAUNTROY):

H.R. 2818. A bill to amend the District of Columbia Self-Government and Governmental Reorganization Act to extend the authority of the Mayor to accept certain interim loans from the United States and to extend the authority of the Secretary of the Treasury to make such loans; to the Committee on the District of Columbia.

H.R. 2819. A bill to amend the District of Columbia Self-Government and Governmental Reorganization Act to increase the amount authorized to be appropriated as the annual Federal payment to the District of Columbia; to the Committee on the District of Columbia.

By Mr. DELLUMS (for himself, Mr. EDWARDS of California, Mr. FAZIO, Mr. STARK, and Mr. SHUMWAY):

H.R. 2820. A bill to provide that certain lands constituting part of the El Dorado National Forest be conveyed to certain persons who purchased and held such lands in good faith reliance on an inaccurate surveyor's map; to the Committee on Interior and Insular Affairs.

By Mr. DONNELLY:

H.R. 2821. A bill to amend the Capital Construction Fund; to the Committee on Merchant Marine and Fisheries.

H.R. 2822. A bill to amend the Internal Revenue Code of 1954 to provide that certain vessels constructed in the United States may be depreciated based on a useful life of 5 years; to the Committee on Ways and Means.

By Mr. DOWNEY:

H.R. 2823. A bill to amend the Internal Revenue Code of 1954 to remove certain limitations in the case of charitable contributions of literary, musical, or artistic compositions, or similar property; to the Committee on Ways and Means.

By Mr. DREIER:

H.R. 2824. A bill to amend the Internal Revenue Code of 1954 to increase to $750 the amount of dividends and interest each individual may exclude from gross income, and to make such exclusion permanent; to the Committee on Ways and Means.

By Mr. EDWARDS of Alabama:

H.R. 2825. A bill to make the use of a firearm to commit certain felonies a Federal crime where that use violates State law, and for other purposes; to the Committee on the Judiciary.

By Mr. EMERSON (for himself, Mr. GEPHARDT, Mr. BAILEY of Missouri, and Mr. TAYLOR):

H.R. 2826. A bill to amend the Mineral Lands Leasing Act of 1920 to provide for a review of the policy relating to mineral leases on public lands; to the Committee on Interior and Insular Affairs.

By Mr. ERDAHL:

H.R. 2827. A bill to authorize construction of a project for flood control and other purposes on the South Fork Zumbro River at Rochester, Minn.; to the Committee on Public Works and Transportation.

By Mr. LUNDINE (for himself, Mr. BARNARD, Mr. BEVILL, Mr. BINGHAM, Mr. COELHO, Mr. CONABLE, Mr. DERRICK, Mr. FAZIO, Mr. FLIPPO, Mr. GEPHARDT, Mr. GRAMM, Mr. HUCKABY, Mr. IRELAND, Mr. LOTT, Mr. MAVROULES, Mr. MINETA, Mr. MINISH, Mr. NOWAK, Mr. RATCHFORD, Mr. RICHMOND, Mr. ROUSSELOT, Mr. SHELBY, Mr. SYNAR, Mr. VOLKMER, and Mr. ZEFERETTI):

H.R. 2828. A bill to reduce financing cost to cities, counties and States by amending section 5136 of the Revised Statutes to permit national banks to underwrite and deal in revenue bonds issued by State and local governments, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

By Mr. ERDAHL:

H.R. 2829. A bill to modify the project for flood protection at Winona, Minn.; to the Committee on Public Works and Transportation.

By Mr. ERTEL:

H.R. 2830. A bill to impose restrictions on any extension of credit which is made by any person for the purpose of financing the purchase of an automobile which is principally assembled in Japan; jointly, to the Committees on Banking, Finance and Urban Affairs and Ways and Means.

By Mr. EVANS of Iowa:

H.R. 2831. A bill to amend title 23, United States Code, to exempt vehicles transporting livestock on the National System of Interstate and Defense Highways from certain

weight limitations; to the Committee on Public Works and Transportation.

H.R. 2832. A bill to amend title 38, United States Code, to provide a more equitable formula for payments by the Administrator of Veterans' Affairs to States for the cost of care provided in State nursing homes to veterans eligible for such care in Veterans' Administration facilities; to the Committee on Veterans' Affairs.

By Mrs. FENWICK (for herself, Mr. BEDELL, Mr. BONIOR of Michigan, Mrs. BOUQUARD, Mr. BUTLER, Mrs. CHISHOLM, Mr. CORCORAN, Mr. CORRADA, Mr. COURTER, Mr. CROCKETT, Mr. DONNELLY, Mr. DORNAN of California, Mr. DUNCAN, Mr. DWYER, Mr. ERDAHL, Mr. FISH, Mr. FORSYTHE, Mr. GREEN, Mr. HUGHES, Mr. JEFFORDS, Mr. KOGOVSEK, Mr. LAFALCE, Mr. MCCLOSKEY, Mr. MITCHELL of New York, Mr. MITCHELL of Maryland, Mr. MOTTL, Mr. OTTINGER, Mr. PETRI, Mr. PORTER, Mr. PRITCHARD, Mr. ROE, Mr. SABO, Mr. SAWYER, Mr. SCHEUER, Mr. SHUMWAY, Mr. SIMON, Mr. STOKES, Mr. TAUKE, Mr. WEISS, Mr. WHITEHURST, Mr. WIRTH, Mr. WON PAT, Mr. YOUNG of Alaska, Mr. ZABLOCKI, and Mr. HALL of Ohio):

H.R. 2833. A bill to provide alternatives to institutionalization; jointly, to the Committees on Energy and Commerce and Ways and Means.

By Mr. GEPHARDT:

H.R. 2834. A bill to amend the Internal Revenue Code of 1954 to treat as public charities certain organizations which operate libraries; to the Committee on Ways and Means.

By Mr. GREEN (for himself, Mr. RICHMOND, Mr. PRITCHARD, Mr. MCCLOSKEY, Mr. IRELAND, Mrs. FENWICK, Mr. PEPPER, Mr. JEFFORDS, Mr. HORTON, Mr. WYDEN, Mr. DWYER, Mr. OTTINGER, Mr. CLAY, Mr. MCCURDY, Mr. PEYSER, Mr. WEISS, Mr. WHITEHURST, Mr. ERLENBORN, Mr. MCCLORY, Mr. BURGENER, Mr. ADDABBO, Mr. COELHO, Mr. LAFALCE, Mr. LEHMAN, and Mr. AKAKA):

H.R. 2835. A bill to amend the Internal Revenue Code of 1954 to disregard, in the valuation for estate tax purposes of certain items created by the decedent during his life, any amount which would have been ordinary income if such item had been sold by the decedent at its fair market value, to allow a charitable deduction based on the fair market value of such items, and for other purposes; to the Committee on Ways and Means.

By Mr. RALPH M. HALL:

H.R. 2836. A bill to repeal the provisions of title 23, United States Code, relating to a national maximum speed limit of 55 miles per hour; to the Committee on Public Works and Transportation.

By Mr. HOLLAND:

H.R. 2837. A bill relating to the tax treatment of certain transactions involving automobiles and trucks entered into before January 1, 1981; to the Committee on Ways and Means.

By Mr. HOLLAND (for himself and Mr. MARTIN of North Carolina):

H.R. 2838. A bill to amend the Internal Revenue Code of 1954 to provide for increased investment by individuals through a tax-deferred rollover account; to the Committee on Ways and Means.

By Mrs. HOLT:

H.R. 2839. A bill to provide for the issuance of a postage stamp to commemorate the 200th anniversary of the election of John Hanson of Maryland as first President of the United States in Congress Assembled; to the Committee on Post Office and Civil Service.

By Mr. HUCKABY:

H.R. 2840. A bill to establish a program for Federal storage of spent fuel from civilian nuclear powerplants, to set forth a Federal policy and initiate a program for the disposal of nuclear waste from civilian activities, and for other purposes; jointly, to the Committees on Energy and Commerce, and Interior and Insular Affairs.

By Mr. HUGHES (for himself and Mr. RODINO):

H.R. 2841. A bill to amend chapter 207 of title 18, United States Code, relating to pretrial services; to the Committee on the Judiciary.

By Mr. LEE:

H.R. 2842. A bill to amend the Public Health Service Act to provide financial assistance for education in health services administration; to the Committee on Energy and Commerce.

H.R. 2843. A bill to amend title 38, United States Code, to provide that in the case of any veteran who served for 90 days or more during a period of war, the development of the disease transverse myelitis to a degree of 10 percent of disability or more within 7 years from the date of the veteran's separation from service shall be presumed to have been incurred in or aggravated by such service; to the Committee on Veterans' Affairs.

By Mr. MARRIOTT:

H.R. 2844. A bill to amend section 21 of the act of February 25, 1920, commonly known as the Mineral Leasing Act; to the Committee on Interior and Insular Affairs.

By Mr. MURTHA:

H.R. 2845. A bill to establish a procedure for the pro rata reduction in expenditures during periods when projected revenues are insufficient to fully fund such expenditures, and for other purposes; jointly, to the Committees on Government Operations and Rules.

By Mr. MONTGOMERY (by request):

H.R. 2846. A bill to limit payment of special pay authorized eligible Veterans' Administration physicians and dentists under section 4118, title 38, United States Code, and for other purposes; to the Committee on Veterans' Affairs.

H.R. 2847. A bill to amend title 38, United States Code, to revise and clarify eligibility for reimbursement of expenses of travel for Veterans' Administration health care, and for other purposes; to the Committee on Veterans' Affairs.

By Ms. OAKAR:

H.R. 2848. A bill to amend the Public Health Service Act to provide assistance for counseling of, and preparation and distribution of information for pregnant women; to the Committee on Energy and Commerce.

By Mr. O'BRIEN:

H.R. 2849. A bill to strengthen the penalty provisions of the Gun Control Act of 1968; to the Committee on the Judiciary.

By Mr. PATTERSON:

H.R. 2850. A bill to amend the Asian Development Bank Act with respect to the establishment of a special refugee settlement fund; to the Committee on Banking, Finance and Urban Affairs.

H.R. 2851. A bill to encourage exports by facilitating the formation and operation of export trading companies and export trade associations, and for other purposes; jointly, to the Committees on Foreign Affairs, Banking, Finance and Urban Affairs, and the Judiciary.

Mr. PRICE:

H.R. 2852. A bill to amend the Flood Control Act of June 22, 1936, to authorize local authorities to maintain and operate automated pumping stations for flood control purposes; to the Committee on Public Works and Transportation.

Mr. RANGEL:

H.R. 2853. A bill to amend the Internal Revenue Code of 1954 to increase the amount of the earned income credit; to the Committee on Ways and Means.

H.R. 2854. A bill to amend the Internal Revenue Code of 1954 to increase the amount of the zero-bracket amount; to the Committee on Ways and Means.

By Mr. RODINO:

H.R. 2855. A bill to help States assist the innocent victims of crime; to the Committee on the Judiciary.

By Mr. SANTINI:

H.R. 2856. A bill to designate the hospital known as the Veterans' Administration Medical Center, located in Reno, Nev., as the "Ioannis A. Lougaris Veterans' Administration Medical Center"; to the Committee on Veterans' Affairs.

By Mrs. SCHROEDER:

H.R. 2857. A bill to amend title 5, United States Code, to deny Federal retirement annuities to individuals convicted of any felony, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. STANGELAND:

H.R. 2858. A bill to exclude from gross income, for purposes of Federal income tax, interest paid to sellers of agricultural land purchased with loans made by such sellers to certain farmers and ranchers and insured under the Consolidated Farm and Rural Development Act; to the Committee on Ways and Means.

By Mr. STARK:

H.R. 2859. A bill to amend the Internal Revenue Code of 1954 to eliminate the age requirement for the one-time exclusion of gain from the sale or exchange of a principal residence; to the Committee on Ways and Means.

H.R. 2860. A bill to amend the Internal Revenue Code of 1954 with respect to the limitation on the acceleration of the accrual of taxes; to the Committee on Ways and Means.

By Mr. TAUKE:

H.R. 2861. A bill to amend the Internal Revenue Code of 1954 to phase in over a 3-year period a $300 increase in the amount of interest and dividends each individual may exclude from gross income, and to make such exclusion permanent; to the Committee on Ways and Means.

By Mr. WEISS (for himself and Mr. HORTON):

H.R. 2862. A bill to amend the Internal Revenue Code of 1954 to increase to $1,000 the amount of interest paid by financial institutions which may be excluded from gross income by individuals and to make such exclusion permanent; to the Committee on Ways and Means.

By Mr. CHAPPIE:

H.R. 2863. A bill to authorize the Secretary of Agriculture to sell the portion of the Tahoe National Forest known as Blythe Arena; to the Committee on Interior and Insular Affairs.

By Mr. DAVIS of Michigan:

H.R. 2864. A bill to eliminate the buffer zone established in connection with the Pictured Rocks National Lakeshore, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. GONZALEZ:

H.R. 2865. A bill to authorize adjustment of the retired pay of certain former members of the uniformed services; to the Committee on Armed Services.

By Mr. MINETA (for himself, Mr. HOWARD, and Mr. ANDERSON):

H.R. 2866. A bill to amend the Independent Safety Board Act of 1974 to provide authorizations for appropriations, and for other purposes; jointly, to the Committees on Energy and Commerce and Public Works and Transportation.

By Mr. MONTGOMERY (by request):

H.R. 2867. A bill to amend section 8332 of title 5, United States Code, to permit any disabled veteran who has completed a program of vocational rehabilitation under chapter 31 of title 38, United States Code, and who commences service as a Federal civilian employee within 3 years after completion of such program, to elect to deposit with interest an amount equal to retirement deductions for the period of participation in the program (based on the rate of basic pay payable to the veteran when such election is made) and to receive full retirement credit under chapter 83 of title 5, United States Code, for such period; to the Committee on Post Office and Civil Service.

By Mr. SIMON:

H.R. 2868. A bill to amend the Internal Revenue Code of 1954 to provide a credit for contributions to institutions of higher education for international business studies; to the Committee on Ways and Means.

By Mr. STARK:

H.R. 2869. A bill to restrict the Federal National Mortgage Association with respect to its authority to preclude the assumption of mortgages secured by single-family residences; to the Committee on Banking, Finance and Urban Affairs.

By Mr. DELLUMS (for himself, Mrs. COLLINS of Illinois, Mr. CONYERS, Mr. FAUNTROY, Mr. MITCHELL of Maryland, and Mr. KOGOVSEK):

H.J. Res. 215. Joint resolution for transfer of powers to Puerto Rico; to the Committee on Interior and Insular Affairs.

By Mr. GONZALEZ:

H.J. Res. 216. Joint resolution authorizing the President of the United States to proclaim May 10 through May 16, 1981, as Municipal Clerk's Week; to the Committee on Post Office and Civil Service.

By Mrs. HOLT:

H.J. Res. 217. Joint resolution authorizing and requesting the President to issue a proclamation designating the 7 calendar days commencing on May 1 of each year as "Elks National Youth Week"; to the Committee on Post Office and Civil Service.

By Mr. McCLORY:

H.J. Res. 218. Joint resolution establishing a Joint Committee on the Legislative Branch; to the Committee on Rules.

By Mr. ROYBAL:

H.J. Res. 219. Joint resolution to establish a National Commission on the Educational Problems of America's Linguistic Minority Children; to the Committee on Education and Labor.

By Mr. FRANK:

H. Con. Res. 100. Concurrent resolution expressing the sense of the Congress with respect to the situation of two Russian families who have sought refuge in the U.S. Embassy in Moscow because of the suppression of their Pentecostal faith by the Government of the Soviet Union; to the Committee on Foreign Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BROWN of California:

H.R. 2870. A bill for the relief of Earl Gilbert, Larry Collins, Vern C. Parton, Alexander L. Adams, and John Kimm; to the Committee on the Judiciary.

By Mr. BUTLER:

H.R. 2871. A bill for the relief of Michael M. Williamson; to the Committee on the Judiciary.

By Mr. CHENEY:

H.R. 2872. A bill to provide for the reinstatement and validation of U.S. oil and gas lease No. W-46102; to the Committee on Interior and Insular Affairs.

By Mr. FRANK:

H.R. 2873. A bill for the relief of Maria and Timofei Chmykhalov, and Lilia, Peter, Liubov, Lidia, and Augustina Vashchenko; to the Committee on the Judiciary.

By Mr. GORE:

H.R. 2874. A bill for the relief of Arturo N. Ruanto; to the Committee on the Judiciary.

By Mr. SHUMWAY:

H.R. 2875. A bill for the relief of Maurice J. Courtway and Elizabeth Courtway; to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follow:

H.R. 27: Mr. DORNAN of California, Mrs. HOLT, Mr. HUBBARD, Mr. LEBOUTILLIER, Ms. MARTIN of Illinois, Mr. PATTERSON, Mr. SOLOMON, and Mr. YATRON.

H.R. 39: Mr. WOLPE and Mr. MILLER of California.

H.R. 58: Mr. BENNETT, Mrs. BYRON, Mr. CORCORAN, Mr. DIXON, Mr. DONNELLY, Mr. FAZIO, Mrs. FENWICK, Mr. FORSYTHE, Mr. FUQUA, Mr. GORE, Mr. GRAMM, Mr. HIGHTOWER, Mr. HOLLAND, Mr. HUBBARD, Mr. HUTTO, Mr. JENKINS, Mr. KEMP, Mr. LAGOMARSINO, Mr. LENT, Mr. MAZZOLI, Mr. MITCHELL of New York, Mr. MOFFETT, Mr. NICHOLS, Mr. O'BRIEN, Mr. PURSELL, Mr. RATCHFORD, Mr. ROE, Mr. ROSE, Mrs. SCHROEDER, Mr. SYNAR, Mr. VOLKMER, and Mr. WIRTH.

H.R. 168: Mr. WOLPE, Mr. MILLER of California, and Mr. HOLLENBECK.

H.R. 170: Mr. MILLER of California.

H.R. 177: Mr. BEREUTER and Mr. MOLINARI.

H.R. 178: Mrs. BYRON, Mr. EMERSON, and Mr. MARTIN of New York.

H.R. 215: Mr. TRAXLER, Mr. SIMON, Mr. WILLIAMS of Montana, Mr. KINDNESS, Mr. WAMPLER, Mr. DAUB and Mr. BARNARD.

H.R. 217: Mrs. HECKLER, Ms. MIKULSKI, Mr. STOKES, Mr. FORD of Michigan, Mr. DOUGHERTY, Mr. SABO, and Mrs. CHISHOLM.

H.R. 269: Mr. BAFALIS.

H.R. 316: Mr. DANNEMEYER, Mr. SMITH of Alabama, Mr. CLINGER, Mr. BENJAMIN, Mr. SMITH of New Jersey, Mr. MCKINNEY, Mr. IRELAND, Mr. BENNETT, Mr. BADHAM, Mr. HUBBARD, Mr. COATS, Mr. BAFALIS, Mr. CORCORAN, and Mr. DREIER.

H.R. 501: Ms. FERRARO, Mr. WAXMAN, Mr. SHARP, Mr. JAMES K. COYNE, Mr. FISH, Mr. HAGEDORN, Mr. NELLIGAN, Mr. STANGELAND, and Mr. ZABLOCKI.

H.R. 517: Mr. WEAVER.

H.R. 556: Mr. HYDE, Mr. OTTINGER, Mr. DWYER, Mr. MOTTL, Mr. ROYBAL, Mr. DORNAN of California, Mr. ST GERMAIN, and Mr. LEBOUTILLIER.

H.R. 741: Mr. WINN.

H.R. 747: Mr. BAILEY of Pennsylvania, Mr. BARNES, Mr. BRINKLEY, Mr. PHILLIP BURTON, Mr. CONYERS, Mr. DIXON, Mr. DONNELLY, Mr. EMERY, Mr. FAUNTROY, Ms. FERRARO, Mr. HARKIN, Mr. LUNDINE, Mr. MILLER of California, Mr. MINETA, Mr. MURTHA, Mr. NEAL, Mr. PATTERSON, Mr. SEIBERLING, Mr. SIMON, Mr. WEAVER, and Mr. YOUNG of Alaska.

H.R. 835: Mr. GRAY, Mr. PRITCHARD, Mr. MORRISON, Ms. MIKULSKI, Mr. LAFALCE, Mr. STOKES, Mr. KINDNESS, Mr. FAZIO, and Mrs. CHISHOLM.

H.R. 878: Mr. PATTERSON.

H.R. 1007: Mr. MCHUGH, Mr. RINALDO, Ms. FERRARO, and Mr. WAXMAN.

H.R. 1200: Mr. MARRIOTT.

H.R. 1248: Mr. GARCIA.

H.R. 1293: Mr. PATTERSON and Mr. RITTER.

H.R. 1294: Mr. MICA and Mr. PATTERSON.

H.R. 1297: Mr. BLILEY, Mr. VOLKMER, and Mr. TAYLOR.

H.R. 1298: Mr. BLILEY.

H.R. 1300: Mr. EMERY, Mr. FINDLEY, Mr. LATTA, Mr. WAMPLER, Mr. BOWEN, Mr. CHAPPELL, Mr. MORRISON, Mr. YOUNG of Missouri, Mr. DONNELLY, Mr. BLANCHARD, Mr. OTTINGER, and Mr. DASCHLE.

H.R. 1339: Mr. PARRIS, Mr. COURTER, Mr. WILSON, Mr. HANSEN of Utah, Mr. LOWERY of California, Mr. DAUB, Mr. COATS, Mr. SIMON, Mr. BEREUTER, and Mr. BURGENER.

H.R. 1340: Mr. PARRIS, Mr. COURTER, Mr. SIMON, Mr. WILSON, Mr. LOWERY of California, Mr. DAUB, Mr. COATS, Mr. STANGELAND, Mr. MCEWEN, Ms. MARTIN of Illinois, and Mr. BURGENER.

PETITIONS, ETC.

Under clause 1 of rule XXII,

42. The SPEAKER presented a petition of the county commission, Cabell County, W. Va., relative to rail passenger service, which was referred to the Committee on Energy and Commerce.

EXTENSIONS OF REMARKS

THE VICTIMS OF CRIME ACT OF 1981

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. RODINO. Mr. Speaker, I am today introducing the Victims of Crime Act of 1981, a bill to assist States in helping the innocent victims of crime. I have for several years introduced similar legislation, and I am optimistic that this term we can see a bill enacted into law. I am optimistic because of the administration's well publicized concern for the welfare of crime victims. That concern will, I hope, be translated into support for legislation like my bill, which does something tangible for crime victims.

A number of States have established programs to reimburse crime victims for out-of-pocket expenses caused by their victimization—such as unreimbursed payments to doctors and hospitals for medical care and treatment necessitated by the victimization. States with such programs include: Alaska, California, Connecticut, Delaware, Florida, Hawaii, Illinois, Indiana, Kansas, Kentucky, Maryland, Massachusetts, Michigan, Minnesota, Montana, Nebraska, New Jersey, New York, North Dakota, Ohio, Oregon, Pennsylvania, Tennessee, Texas, Virginia, Washington, and Wisconsin.

My bill will assist those States in helping crime victims and will also encourage other States to establish programs to help crime victims. I am inserting at this point in the RECORD a section-by-section analysis of the bill:

SECTION-BY-SECTION ANALYSIS

SECTION 1

Section 1 provides that the short title of the legislation is the "Victims of Crime Act of 1981."

SECTION 2

Section 2 authorizes the Attorney General to make grants to States that have qualified crime victim compensation programs. The amount of a grant that a qualified State program may receive equals 50 percent of the cost of paying compensation to victims of State crimes and 100 percent of the cost of paying compensation to victims of analogous Federal crimes (described in section 7(8)(B) of the bill.)[1] Such grants are subject to the availability of amounts appropriated, and grants may be made in advance or by way of reimbursement.

Section 2 also authorizes the Attorney General to prescribe such rules as are necessary to administer the legislation. The Attorney General, however, is prohibited from modifying the disposition of any individual claim that a State program has processed.

SECTION 3

Section 3 establishes a 9 member Advisory Committee on Victims of Crime whose purpose is to advise the Attorney General with respect to the administration of the legislation and the compensation of crime victims. The members of the committee will serve one year terms and receive only travel and transportation expenses and a per diem allowance while away from their homes on committee business.

Seven of the members of the committee must be officials of States with qualified victim compensation programs. The purpose of this requirement is to ensure that those directly affected by the administration of the legislation will have a formal and direct method of making their views known to the Attorney General.

SECTION 4

Section 4 sets forth the criteria that a State program must meet in order to qualify for a grant under section 2.

First, the program must offer (a) compensation for personal injury to any person who suffers personal injury as the result of a qualifying crime, and (b) compensation for death to any surviving dependent of any person whose death is the result of a qualifying crime.

Second, the program must offer to aggrieved claimants the right to a hearing with administrative or judicial review.

Third, the program must require that claimants cooperate with appropriate law enforcement authorities with respect to the qualifying crime for which compensation is sought. This criterion like the others, may be met either by statutory language or by rule or regulation adopted by the appropriate State agency.

Fourth, the State must require that appropriate law enforcement agencies and officials take reasonable care to inform victims about the existence of the State's victim compensation program and the procedure for applying for compensation under that program.

Fifth, the State must be subrogated to any claim that the victim, or a dependent of the victim, has against the wrongdoer for damages resulting from the qualifying crime, to the extent of any money paid to the victim or dependent by the State's victim compensation program.

Sixth, the program must not require a claimant to seek or accept welfare benefits, unless the claimant was receiving such benefits prior to the qualifying crime that gave rise to the claim.

Seventh, the program must deny or reduce a claim if the claimant contributed to the infliction of the death or injury with respect to which the claim is made.

Eighth, the State must be able to require a criminal wrongdoer to make restitution to the victim, or the surviving dependents of the victim, of the crime.

Ninth, the program must not require that any person be apprehended, prosecuted or convicted of the qualifying crime that gave rise to the claim.

Tenth, State law must require that any person who contracts directly or indirectly with a person charged with or convicted of a crime for an interview, statement, or article relating to the crime, turn over to the State any money received from that contract. The State is to hold the money in escrow for a reasonable period and can use the money only to pay claims perfected by the victim, if the wrongdoer is convicted.

Subsection (b) of section 4 provides to States with crime victim compensation programs in existence at the time of the enactment of the legislation a grace period during which they can bring their programs into compliance with all of the criteria of section 4. The grace period lasts from the effective date of the legislation until the day after the close of the first regular session of the State legislature that begins after the effective date of the legislation. During the grace period, the existing State crime victim compensation programs are deemed to be qualified for grants under section 2.

SECTION 5

Section 5 provides that certain expenses will be excluded from the cost of a State program when determining the amount of the Federal grant. Thus, the State itself pays for all of these expenses. The expenses that are to be excluded are: (1) administrative expenses; (2) awards to victims for pain and suffering; (3) awards to victims for property loss; (4) awards to claimants who failed to file a claim within one year after the crime occurred, unless the appropriate State agency finds good cause for the failure to file within that time; (5) awards to claimants who failed to report the crime to police within 72 hours after it occurred, unless the appropriate State agency finds good cause for the failure to report it within that time; (6) amounts awarded to a victim that exceed $50,000; (7) amounts awarded to a victim covering a loss for which the victim was entitled to be compensated by a source other than the State victim compensation program and the perpetrator of the crime and (8) amounts awarded to a claimant for lost earnings or loss of support that exceed $200 per week.

SECTION 6

Section 6 requires the Attorney General to report annually to the House and Senate Judiciary Committee on the administration of the legislation. The report, which is due not later than 135 days after the end of the Federal fiscal year, must provide specified information about each qualifying State program and about the Attorney General's activities in administering the legislation.

SECTION 7

Section 7 defines certain terms used in the legislation.

The term "dependent," for purposes of the legislation, means personal injury as defined by the State for purposes of the State's victim compensation program.

[1] Because there are so few analogous Federal crimes, there will probably be relatively few instances where a State will make an award to a victim for which it will receive 100 percent reimbursement. See House Report No. 95-337, at 6 n. 8; House Report No. 94-1550, at 13.

The term "State" means a State of the United States, as well as the District of Columbia, the Commonwealth of Puerto Rico, the Trust Territory of the Pacific Islands, and any other territory or possession of the United States.

The term "compensation for personal injury" means, for purposes of the legislation, compensation for loss resulting from personal injury and includes: (a) reasonable expenses for hospital and medical services; (b) reasonable expenses for physical and occupational therapy and rehabilitation; and (c) loss of past and anticipated future earnings.

The term "compensation for death", for the purposes of this legislation, means compensation for loss resulting from death caused by a qualifying crime. Included within this term are reasonable funeral and burial expenses and loss of support to any dependent of the victim (to the extent not otherwise covered as compensation for personal injury).

The term "administrative expenses" means, for purposes of the legislation, any expenses other than awards of compensation for personal injury and compensation for death. The term also includes attorney's fees when such fees are paid in addition to, and not out of, the amount of compensation awarded to the claimant.

The term "qualifying crime," as used in the legislation, means: (a) any criminally punishable act or omission that the State designates as appropriate for compensation under its program, and (b) any act or omission that would be a qualifying crime under (a) except for the fact that the act or omission is subject to exclusive federal jurisdiction.

SECTION 8

Section 8 authorizes appropriations for 3 years. The amounts are $15 million, $25 million, and $35 million.

SECTION 9

Section 9 provides that the legislation shall take effect on October 1, 1981, and that grants may be made under the legislation with respect to the fiscal year ending September 30, 1982, and succeeding fiscal years.●

ABOLISH THE LEGAL SERVICES CORPORATION

HON. JIM JEFFRIES

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. JEFFRIES. Mr. Speaker, once again the future of the Legal Services Corporation is in question. The President has targeted it for abolishment and it deserves just that. This proposal does not disregard the legal needs of the poor. But it is now apparent that those needs could be better met by the State, localities, and private bar associations than they are being met by the present LSC.

When Congress first established the Legal Services Corporation, it was with the intention of providing the poor with legal counsel. It was to bring "equal justice under law" to all. As well intentioned as its authors may have been, the LSC soon became the bastion of ideological idealists who were more interested in promoting their own causes than in aiding their clients. It began as a small $500,000-a-year program and has now mushroomed by 23,000 percent into a costly quarter-of-a-billion-dollar boondoggle. The individual local agencies are no longer accountable to its parent program in Washington.

There are many proven examples of abuse in the LSC. It has become in recent years a tax-supported agency that has financed legislative lobbying and social and political advocacy. It is an expensive means for political and social crusaders to promote their own causes with taxpayer money. With guaranteed salaries, the lawyers are program-accountable rather than client-accountable.

Congress has passed legislation prohibiting the LSC from filing certain types of suits, yet the abuses continue. It is time to write the epitaph for this unrestrainable agency and I heartily support the President's attempts to do so.●

WHO REMEMBERS THE NATIONAL LIBERATION FRONT?

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. MICHEL. Mr. Speaker, I have often thought that a club should be formed called Loyal Friends of the National Front and Other Myths. You may recall that during the Vietnam war, the National Liberation Front (NLF) in Vietnam was said to be a truly democratic movement, free of Communist control and totally separate from North Vietnamese Communist control. We were also told that if and when the South Vietnamese Government was defeated, that part of Vietnam would be ruled—justly and without corruption—by the NLF.

We do not seem to hear much about the NLF these days and for one very good reason: it ceased to exist as soon as the North Vietnamese Communists, in a tank attack reminiscent of Hitler's invasion of Poland, enslaved South Vietnam. Those Americans, in and out of Congress, who for years preached to us that the NLF truly represented the views of the majority of Vietnamese have been curiously quiet about the fate of the NLF. Could it be that NLF's American supporters now realize they swallowed a Communist propaganda line in believing the front was truly autonomous and popular and not controlled by the north?

We are now being told that the coalition of Salvadoran leftists opposing the El Salvador Government is truly democratic, truly representative of the people, and deserving of our support. Does that argument sound vaguely familiar? Just as the Vietnamese Communist apparatus used to trot out some pathetic figurehead in Vietnam, while naive Americans cheered, Communists in El Salvador are now trotting out some Salvadoran leftists who swear the Communists would not rule the country if the guerrillas win. It is the old NLF argument in slightly different form. And, predictably enough, the same people who assured us for years that the NLF would democratically rule in Vietnam and who have obviously been struck dumb by what actually occurred there, are now finding their tongues and telling us that in El Salvador the fairy tale of coalition is true.

Mr. Speaker, how many countries have to fall victim to totalitarian communism, how many people have to be enslaved in reeducation camps, before these people wake up?

At this point I insert in the RECORD the latest in what will undoubtedly be a long series of favorable stories about the El Savadoran leftist coalition, "Coalition Wins Support for Salvadoran Leftists" from the Los Angeles Times, March 19, 1981:

COALITION WINS SUPPORT FOR SALVADORAN LEFTISTS

(By Juan M. Vasquez)

MEXICO CITY.—Led by a 49-year-old lawyer, a coalition of exiled Salvadoran leftists based here has won growing international support for the insurgent cause in the past few months.

"We have received the unconditional solidarity of many countries," Guillermo Ungo, head of the coalition—the Diplomatic Political Commission—said in an exclusive interview with The Times.

The commission has rallied support for its opposition to the Salvadoran junta in Latin America, Europe and the United States. To forward their cause, the commission members have relied on their varied political backgrounds, the exploitation of anti-gringo sentiments in Latin America and an insistence on the just nature of the struggle in El Salvador.

"We have won a political space that constitutes a tacit recognition of our state of insurrection," said Salvador Samayoa, one of the seven commission members.

The attainment of any measure of support represents a significant achievement, given El Salvador's small size and, until recently, its obscure and unimportant role on the international stage.

"We cannot blame the North American people for not knowing that what is taking place in El Salvador is the fruit of 50 years of repression by the military and the rich," said Ungo, who has become the political leader of the Salvadoran opposition. He heads the Democratic Revolutionary Front, an umbrella political group.

During the interview, these other points were made by Ungo, Samayoa and four other members of the commission.

—The first step in achieving a political solution must be withdrawal of all U.S. servicemen from El Salvador and a halt in U.S. military aid to the civilian-military junta led by President Jose Napoleon Duarte.

—The insurgents have the determination and the financial resources—gained in part through kidnap ransoms—to continue fighting for years.

—Despite the fact that the five guerrilla factions in El Salvador are under the Marxist-Leninist leadership of the Farabundo Marti National Liberation Front, the insurgent movement is politically pluralistic and will make room for non-Communist leaders like Ungo if it achieves power.

—That the opposition gets its weapons "any way we can." None of the commission members specifically denied that the guerrillas in El Salvador had received weapons from Communist nations.

—That moderate politicians in El Salvador have no choice but to join forces with the more revolutionary elements.

"In El Salvador you can't be a democrat without being a revolutionary, because the only way to achieve a democracy is to make a revolution," Samayoa said.

Ungo's political stature as a longtime moderate has given the commission a valuable measure of prestige.

In 1972 he was the leader of a small Social Democratic party within El Salvador. He ran for vice president on a ticket headed by Duarte, a Christian Democrat.

According to most reliable accounts, the Duarte-Ungo ticket would have won if the military had not intervened in the ballot.

Duarte was arrested and reportedly tortured before fleeing to exile in Venezuela. He did not return until after a coup led by young colonels toppled the government of Gen. Carlos Humberto Romero on Oct. 15, 1979.

Ungo became a member of the military-civilian junta that emerged after Romero's overthrow. But he quit in disgust the following January, along with all the non-military members of the coalition.

Duarte eventually joined a reconstituted junta and brought what was left of his Christian Democratic Party with him. In late 1980, he became president.

Ungo said that the question of whether he is being "used" by communists is the one he is asked most often, and one which, he said, is "unbecoming" for him to answer.

"It's like asking Duarte if he is a front for the military," Ungo argued. "Of course, he is going to say he isn't. What else could he say. But we know that he is."

At that point, Mario Aguinada, the representative of the Communist Party of El Salvador on the commission, broke in.

"The argument that Dr. Ungo is being used by the left and has no authority in the movement is a lie being used to weaken us," he declared.

"In order for the revolution to succeed, we need not only the military element but the political element and the international solidarity that he can offer.

"And we will need the same elements after we win."

Samayoa, who served as minister of education in the first junta, added:

"You can say Ungo's party has no mass popular support in El Salvador and no military power. But, it has the support of the Socialist International, and that is his strength."

The Socialist International represents the Social Democratic political parties throughout the world.

The struggle between Duarte and Ungo in El Salvador has been thrust upon a larger stage, with Christian Democratic parties generally supporting Duarte and the Social Democrats providing Ungo and his allies with much of their support.

In addition to Ungo, Aguinada and Samayoa, the members of the commission include Ana Guadalupe Martinez, a 28-year-old leader of the People's Revolutionary Army, and Ruben Zamora, minister of the presidency in the first post-Romero junta.

The other two share an academic background. They are Fabio Castillo, a former rector of the national university who was a member of a civilian-military junta in 1960-61; and Jose Napoleon Rodriguez, who was vice rector of the National University of El Salvador when it was closed by the government last summer and who became rector when his predecessor was assassinated later in the year.

The non-Communist political background of most of the members of the commission, together with the support of the Socialist International, has permitted them to receive a cordial reception in many international capitals.

Ungo said members of the commission had met with and received encouragement from government leaders in West Germany, Canada, Holland, most of the Scandanavian countries, and in most of the nations of Latin America that do not have a military government.

The Mexican government, clearly sympathetic, has permitted the Salvadoran opposition to establish a sort of unofficial base of operations here and gave its tacit approval to a demonstration of some 25,000 persons who paraded past the U.S. Embassy here last January to protest American involvement in El Salvador.

"We think the United States could learn a lot from Mexico," Ungo said. "The Mexicans understand that only a popular government with genuine popular support can achieve true peace and stability."

Rodriguez scoffed at accusations contained in a State Department "white paper" of involvement in El Salvador by Communist countries.

Specifically, he said, "white papers" and "CIA fabrications" alleging Communist involvement had been used to justify U.S. intervention in Guatemala in 1954, in the Dominican Republic in 1965 and in Chile in 1973.

"Where does the insurrection come from?" he asked. "Maybe it has something to do with our high infant mortality rate, with the short life expectancy of our peasants, and with the level of poverty, and not with any outside powers."

He added, "We are one of the most starved people in the world and we have a right to our revolution."

Although no one specifically denied that the junta opponents had been supplied with arms by the Soviet Union and its allies, several stressed that a large "black market" in arms exist in Central America.

"Another thing you have to keep in mind," said Martinez, the guerrilla leader, "is that we have been fighting for nearly 10 years, and one of our chief aims has been to get weapons any way we can."

In an interview with a West German magazine earlier this year, he said the insurgents could count on some $50 million in funds.●

CIA PLAYING WITH FIRE ON ANTI-CASTRO SUPPORT

HON. DANTE B. FASCELL

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. FASCELL. Mr. Speaker, recent news stories have indicated that the CIA is considering renewing ties and cooperation with anti-Castro Cuban exiles as part of a general expansion of the agency's covert operations.

I find the idea of such activity extremely disturbing. A recent editorial in the Miami Herald expresses my own concerns as well as I could say them myself and I call the editorial to our colleagues' attention with the hope that they will share my feelings and express their opposition to the administration.

The article follows:

[From the Miami Herald, Mar. 14, 1981]

CIA PLAYING WITH FIRE ON ANTI-CASTRO SUPPORT

No. Absolutely not. Under no circumstances should the United States Government, through the Central Intelligence Agency or any other organ, resume the practice of providing arms, military training, or support to anti-Castro Cuban guerrillas.

Principle is the main reason the Reagan Administration should reject out of hand a suggestion from CIA officials to get back into the semi-secret war business. The Administration has seized on international terrorism as a substitute for human rights as the pillar of its foreign policy. It simply cannot ask the cooperation of other governments in curbing terrorism while simultaneously arming guerrillas whose record of terrorist activity is clear in South Florida, Mexico, and other nations.

Most Americans wish the calendar could be turned back to the period when Fidel Castro was, perhaps vulnerable either to persuasion or to displacement by democratic rivals. It's possible that, if Washington had been more forceful or more clever then, Cuba would not now be a Communist stronghold in the Western Hemisphere.

Maybe. But nostalgia is not a firm enough material on which to base the foreign policy of the most powerful nation in the world. President Castro is, like it or not, in charge in Cuba. His government exists, it functions, albeit with problems, and is recognized as legitimate by most other governments, including those of Canada and Mexico. The United States must not make itself an outlaw by arming an external guerrilla movement whose most immediate targets are bound to be the representatives of those governments and private corporations that trade with Cuba.

Florida, Dade County, and Miami law-enforcement officials should object vociferously to the trial balloon from Washington on Cuban guerrillas. The history of such activity in this community is clear and devastating. Bombings, extortion, and murders have resulted in the past from the mixing of Cuban-exile patriotism with U.S. weapons and explosives. It must not be permitted to happen again.

Certainly the reinstatement of stable democracy in Cuba is a worthy goal. It should

be pursued by whatever lawful means are available. That pursuit, however, must not jeopardize the standing of the United States among the democracies of the world as a leader in the fight against international terrorism.●

UPGRADING OUR NATIONAL STRATEGIC DEFENSES

HON. ANDY IRELAND

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. IRELAND. Mr. Speaker, recently, our colleague, Hon. IKE SKELTON of Missouri, spoke to a graduation class at the Emergency Management Institute at Emmitsburg, Md. He stressed the need for upgrading our national strategic defenses. I attach hereto a copy of his address to the graduates of that institute. I would like to share his views with the House.

In order for a nation to survive, it must have a strong national security. History is littered with the remains of militarily weak countries whose weakness invited wars and defeats from stronger nations.

Thus, first and foremost, our nation should provide for the common defense.

Currently, most of the emphasis of the United States military is on weapons. Our whole strategy is based on the manufacture and deployment of weapons; and we may be strong because of our awesome weaponry, but in spite of this, our nation's defensive posture is feeble. Our forceful weapons are only one devise in our national protection blueprint. Of course, our minutemen missiles, our bomber force, and our aircraft carriers have served to deter aggression. But they are not enough. Just like a chain being no stronger than its weakest link, we have a vulnerable link in our Nation's defense. That weak link is strategic defense.

When I speak of strategic defense, I speak of defense against incoming intercontinental ballistic missiles, submarine launched ballistic missiles, and enemy bombers.

Since the first strategic arms limitation treaty virtually wiped out our defense against incoming ICMBs or SLBMs, doing away with anti-ballistic missiles, our defensive posture has been limited to mere warning systems against such enemy weapons. I will not discuss that subject today, except to note that our lack of a sufficient ABM force is a huge chink in our armor.

Just as those in the Pentagon speak of our retaliatory Triad—land based ICBMs, submarine launched ballistic missiles, and our bomber force, we should have and provide for a strategic defensive triad: (1) a defense for the people from nuclear weapons through civil defense, (2) defense for our command and control, that is, the President's ability to communicate with our strategic retaliatory forces during an attack against the United States, and (3) a defense against enemy bombers.

CIVIL DEFENSE

American civil defense can play a major role in our national defense strategy. The White House made this statement in Presidential Decision 41 in 1978. Congress passed a similar policy just last year in the form of an amendment to the 1981 defense bill which I authored and the President signed into law. The fact that we lack an effective civil defense and the Soviets provide a strong civil defense that protects its people, their leaders, and their industry creates a strategic advantage in favor of U.S.S.R. A strengthened American civil defense would improve and increase the number of strategic options available to our President during a nuclear confrontation.

DEFENSE OF OUR COMMAND AND CONTROL

The next leg of this defense Triad is command and control . . . or the ability of the President to talk with the crews of the land based missiles, the crews of the nuclear submarines and the crews of our air bomber forces during an attack against the United States. I have yet to talk with a thoughtful, knowledgeable member of the national defense community who is not concerned about this enormous problem.

It would take about 15 minutes for a Soviet nuclear submarine to fire three nuclear missiles at Washington, D.C. and knock out the White House and the Pentagon and literally cripple our military. In that 15 minute period the President wouldn't have time to become airborne, and the national military command center and its back-up facility could perish. Plans are being made to strengthen this potentially weak link of our nuclear forces . . . but here again . . . it will not happen overnight. We've allowed our strategic defense to take a back seat to offensive weapons and now we are paying for it.

DEFENSE AGAINST BOMBER ATTACK

The third leg of our defensive Triad is a defense against an enemy bomber attack. In recent years, we have been blinded by the illusion that all enemy destructive forces will be coming in by intercontinental ballistic missiles. This thinking brought about basic changes in our national policy in the mid 1960s. This illusion caused us to scale down our defense against possible enemy bomber attack. For example, the interceptor forces assigned to the Aerospace Defense Command decreased from 2,600 aircraft in the early 1960s to less than 275 today. Additionally, there are no warning systems operating that would insure proper responses by invading bombers. Actually, because of successive reductions in our Air Defense Surveillance Systems and our intercepter aircraft, there are critical deficiencies in our ability to detect enemy airplanes and to defend against them—even a small attack. Our ability to warn and assess potential air threats to North America is of particular concern since the consequences of a "no warning" raid on our strategic posture could be devastating. An effective air defense contributes to overall deterrence by eliminating the prospect that the Soviet Union, or any other potential adversary, could carry out a successful attack and neutralize our command structure and retaliatory forces.

Our interceptor forces assigned to defend continental America consist mostly of fighters more than 20 years old. They are marginally effective against the threat of the new Russian Backfire bomber. Our 275 fighters consist mostly of F-101, F-106 and F-4 squadrons. They represent the technology of the 1950s in radar, weaponry and performance. I have heard Air Force pilots state that the F-15 is the world's finest fighter aircraft, and yet we have only 1 squadron of them—18 airplanes—on line defending our Nation against the Backfire bomber threat.

The North American surveillance system consists of distant early warning radars, know as the DEW line, near the Arctic Circle and other radars in coastal areas throughout our Nation. This DEW line and other series of radars further south in Canada, known as the Pine Tree line, have gaps within them that would allow the Soviets to carry out a "no warning" air attack against key installations within our United States with its new Backfire bomber.

Thus, we see our Achilles heel in the defense of our United States is our lack of proper air defense. What must be done? Obviously, we must increase our F-15 procurement to provide a creditable defense against air attack. We must also provide for an upgrading of our DEW line system against the North American Continent and establish the new over-the-horizon Backscatter radar on both the east and west coasts. In short, a complete overhaul of our air defense is needed. An effective air defense system must have three elements: (1) sufficient warning to our national command authority and our retaliatory forces, enabling them to execute the appropriate responses to aggression; (2) our air defense forces—interceptors—must be able to engage enemy bombers and limit any damage from air attack; and (3) we must maintain vigil over all our approaches to our air space and take appropriate action in peacetime to deter any level of aggression or reconnaissance activity.

The current arms race is geared toward weaponry. I propose that the United States begin a national defense system aimed at protection. A proper strategic defense, which includes a survivable command and control system, a usable civil defense program and an effective defense against enemy bombers is what we need. Such an upgraded national strategic defense would make the protection of our nation more stable. It would make it too costly for another country to inflict substantial damage. Thus, a policy of strategic defense would reinforce our policy of deterrence.

Our current defense strategy is designed for a two-power world with the concentration on destruction. Such a strategy is useless in a world where more nations than the U.S. and the U.S.S.R. have nuclear weapons. In a world that acknowledges more than two nuclear powers, the new strategy must stress protection just as much as it stresses destruction.

As a member of the United States House of Representatives Armed Services Committee, I intend to promote a defense strategy for our Nation in addition to improving our weaponry strength. It will be impossible for our Nation to continue with only a weapons military strategy and not a defense strategy, and, at the same time provide for the common defense.●

INDEPENDENCE FOR BYELORUSSIA

HON. NORMAN F. LENT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. LENT. Mr. Speaker, I rise to call to the attention of my colleagues the 63d anniversary of the Declaration of Byelorussian Independence. On March 25, 1918, the Byelorussian Democratic Republic proclaimed its independence. It is essential that we give thought today to the brief period of genuine freedom and sovereignty

this brought to the Byelorussian people. Brief though it was, it demonstated to the entire world the great desire for freedom among the Byelorussian people; a desire which remains strong and alive today, despite the cruel, repressive efforts of the Soviet regime.

The Soviets have been conducting an intensive campaign against the Byelorussians, denying them the rights and liberties we, as free Americans, treasure. The sole purpose of the Russian tactics is the obliteration of the sense of separate nationality and culture the Byelorussians cherish. Such efforts have failed. The Byelorussians continue to nurture their ideals of freedom. Today's celebration of the anniversary of their independence day should serve as a recognition of the endurance of their magnificent struggle for freedom.

I would like to direct your attention to one outstanding example of this strong and unquenchable Byelorussian spirit of freedom. Our prisoner of conscience, Michal Kukabaka, has been unjustly imprisoned by the Soviets. And what is Michal guilty of? His crime was that he sought to enlighten his fellow countrymen as to their basic human rights designated in the Universal Declaration of Human Rights. For this, Michal was thrown into a psychiatric prison.

His case is one of many providing an abundance of evidence that the spirit and desire for a free Byelorussia is very much alive even under the repressive Soviet regime. Since 1911 the Russian Communist Party has controlled the affairs of Byelorussia. In spite of this oppression, the cultural heritage of Byelorussia continues to be one of the richest in Eastern Europe. Today the Byelorussians thirst for the independence they once knew—on this anniversary let us reaffirm our pledge to do all in our power to aid in restoring freedom to those who seek its bountiful rewards.●

THE 160TH ANNIVERSARY OF THE CELEBRATION OF GREEK INDEPENDENCE

HON. LAWRENCE J. DeNARDIS

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. DeNARDIS. Mr. Speaker, March 25 is a very special day for all Greek Americans. This day marks the 160th anniversary of the beginning of the war of Greek independence. On this day in 1821, Greece began a 9-year struggle to overthrow over four centuries of domination and repression by the Ottoman Empire. The struggle resulted in a victory for freedom, equality and democracy in Greece.

It is only fitting that we honor all Greek Americans on this special day, and recognize the contributions that Greece has made to Western civilization. We in the United States owe a special debt to Greece. Our very system of liberty, freedom, and justice is founded on the philosophies developed in Greece over 2,500 years ago. I wish to extend my personal congratulations and continuing support to all Greek Americans on this very memorable day.●

THE STATE AND LOCAL GOVERNMENT FINANCING REFORM ACT OF 1981

HON. STANLEY N. LUNDINE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. LUNDINE. Mr. Speaker, on behalf of Mr. Barnard and a number of my colleagues, I am today introducing the State and Local Government Financing Reform Act of 1981.

This legislation is essentially a deregulation measure, removing an artificial barrier to free competition within the market for revenue bonds. It is also a measure to reduce the debt service costs to State and local governments by expanding the market for their revenue bonds and improving the liquidity of their bond offerings. The legislation would achieve these important deregulation and cost-saving objectives at no additional cost to the Federal budget.

The legislation removes a 45-year-old restriction on commercial bank underwriting of State and local revenue bonds. Commercial banks are permitted under current law to underwrite and deal in general obligation bonds, which are backed by the general tax revenues of a State or locality. They are excluded, however, from dealing in more widely used revenue bonds, which differ only in the fact that they are backed by revenues from a specific enterprise—such as a toll bridge or sewer system—which is financed by the bond. This exclusion is more the product of historic circumstances than congressional intent.

When Congress adopted the Glass-Steagall Act in 1933, it sought to establish a clear separation between commercial banking—the taking of deposits and making of loans—and investment banking in new stock and bond issues. The closing of numerous commercial banks during the winter of 1932-33 convinced many Members of Congress that individual bank depositors could best be protected if commercial banks were prohibited from investing in any kind of securities.

Congress soon backed away from this distinction, however, as the growing number of cities facing bankruptcy necessitated commercial bank assistance to help finance municipal bond issues. In 1935, the Glass-Steagall Act was amended to specifically permit commercial banks to underwrite the "general obligations of any State or any political subdivision thereof." Since general obligation bonds constituted nearly 98 percent of the municipal bond market, Congress authorized commercial bank involvement in practically all the municipal bond market as it existed.

The current problem arises from the fact that the municipal bond market has changed significantly during the past 45 years. State and local governments have so altered their financing methods that the general authority granted to commercial banks in 1935 now appears anachronistic. The revenue bond, which was almost unheard of during the Depression, has replaced the general obligation bond as the principal type of municipal bond.

This increased use of revenue bonds has been particularly pronounced during the past decade. As inflation has played havoc with local budgets and as taxpayers have become restive about approving new general bond issues, local jurisdictions have turned increasingly to revenue bonds as a means of financing needed capital improvements. In 1970 these bonds represented only 33 percent of all municipal bonds. Today revenue bonds account for more than 72 percent of all bonds issued by State and local governments.

A strict interpretation of the general obligations provision of the Glass-Steagall Act has effectively kept commercial banks out of the growing revenue bond market. As a result, the market has been restricted to the Nation's investment banks and brokerage firms. While competition exists among these institutions, the underwriting of municipal revenue bonds has tended to become regionalized, with little or no competition among brokers from many bond offerings.

The incidence of competitive bidding for the underwriting of municipal bonds has declined considerably as revenue bonds have captured more of the municipal bond market. In 1966, for example, 85 percent of all municipal bonds were sold to underwriters through competitive bids. By 1978, the percentage had been reduced to 44 percent. Over 60 percent of the revenue bond issues sold in 1978 were handled through negotiation rather than competitive bidding.

The entry of commercial banks into the revenue bond market would increase significantly the percentage of revenue bond issues sold on a competitive basis. It would, in effect, make the market for revenue bonds similar to the current market for general obligation bonds, where commercial banks and investment and brokerage firms compete on an equal basis for bond

issues. The level of competition in this market is considerably higher than the restricted revenue bond market, with over 90 percent of general obligation bond issues sold on a competitive basis, as compared to less than 40 percent of recent revenue bond issues.

An increase in competition for revenue bonds will result, I believe, in reduced financing costs for State and local governments. Competitive bidding not only reduces the interest rate that a bond issuer must pay on its bonds, it also reduces the fees that underwriters charge to manage the issue. Moreover, commercial bank involvement would significantly broaden both the primary and secondary markets for revenue bonds, making revenue bonds more attractive and easier to resell after their initial purchase.

There has been considerable debate over the amount of savings State and local governments can expect from this proposal. A number of studies have estimated savings of as much as $340 million to $400 million for bond issues sold in 1977. Other studies contend that the savings would be far more modest. The important point, however, is that every study admitted that some savings would result. This view is shared by the Federal Reserve Board and the Treasury Departments of the last three administrations.

Because the proposal has the potential for significant savings for bond issuers, it has received the endorsement of all the major associations representing State and local issuers of revenue bonds. These groups include the National Governors Association, the National Association of Counties, the National League of Cities, the U.S. Conference of Mayors, and various associations representing State and local finance officers, comptrollers, treasurers, and power authorities.

Mr. Speaker, my purpose in offering this legislation is to focus attention on the critical financing needs of States and localities and to initiate a broad debate on various methods of meeting these needs. It is not my intention to criticize the investment banking industry or to debate whether the industry has adequately served the Nation's cities. The economic well-being of our communities is too important a question to be decided strictly on the merits of competing financial institutions. It is important that we seek the most efficient and least costly financing methods that public policy is able to provide.

I have discussed this legislation with a number of securities bankers and brokers and find that I share a number of their concerns regarding commercial bank entry into the revenue bond market. A number of safeguards have been put into the legislation to meet these concerns and to assure that banks use this underwriting authority in a responsible manner. Under the provisions of the act, commercial banks would be permitted to underwrite only investment-grade revenue bonds—those which the Comptroller has determined are safe enough for banks to buy and hold for investment purposes. They would be prohibited from underwriting any industrial development bonds. There would be strict limits on bank purchases of bonds they have underwritten for their own accounts and for trust accounts they manage. In addition, written disclosure of a bank's status as underwriter would be required before any bonds could be sold to depositors, borrowers, and correspondent banks.

If there are potential abuses that are not addressed by the legislation, and if these can be adequately documented in formal hearing proceedings, I would welcome proposals for additional safeguards. Additional limitations on bank activities could be provided in related legislation or as appropriate amendments to this proposal.

Let me also say that I sympathize with the concern expressed by many brokers that commercial banks, by their sheer size and financial resources, have the potential of driving many securities firms out of the revenue bond market. While I do not think this will occur, I do think it necessary to provide a means for Congress to periodically review market conditions to see if remedial action is warranted. Section 3 of the legislation provides for such review by requiring an annual report to Congress by the Secretary of the Treasury on revenue bond underwriting and the level of competition between commercial banks and other financing institutions.

We have all become painfully aware of the public outcry against the excessive cost of government. These costs have increased far more rapidly for States and localities than at the Federal level. As a former city official, I am very much aware of the limited means available to local officials to reduce government costs without sacrificing needed services. As a Member of Congress, I have also become aware that there are very few things Congress can do to help reduce costs to State and local governments.

In this instance, however, Federal action can make a significant contribution to reducing State and local costs. It can do so by removing barriers to free competition for municipal bonds and encouraging a more favorable market for local bond issues. This is something that can be done without additional regulation and without additional cost to the Federal budget.

This legislation is the logical extension of Congress and the Reagan administration's commitments to increased competition in the banking industry and reduced spending by all levels of government. I think this is a worthwhile proposal and urge my colleagues to support it.●

LERA LEGISLATION

HON. BARBER B. CONABLE, JR.

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. CONABLE. Mr. Speaker, I am today introducing legislation to allow participants in qualified retirement plans to establish individual retirements accounts. The bill is a continuation of my efforts in the 95th and 96th Congresses to extend IRA benefits to these participants.

Recently there has been a renewed interest in our Nation's retirement income and capital formation policies. Unfortunately, this interest has resulted from an awareness that both policies suffer from major deficiencies. The legislation I am today introducing would correct some of these deficiencies. Specifically, the bill would encourage capital formation by offering a tax incentive for savings and investment, while helping taxpayers provide for their retirement years.

Technically, the bill achieves its objectives by allowing retirement plan participants a tax deduction of 15 percent of compensation or $1,500 whichever is less. The amount may be contributed to an IRA, the retirement plan or both. To assure retirement plan participants an adequate incentive the bill grants them the same deduction as nonparticipants.

By granting participants and nonparticipants the same deduction it is the bill's intention to establish a precedent that whenever the IRA deduction allowed nonparticipants is increased, the tax deduction allowed retirement plan participants shall be increased at the same time and by the same amount.

In particular, the bill will benefit individuals whose retirement plans offer inadequate benefits or who do not, for whatever reason, accumulate any benefits.

Several other approaches have been suggested as a means of extending IRA benefits to retirement plan participants. I would hope these differences can be promptly worked out so IRA benefits can be extended to retirement plan participants at the earliest possible date.●

NORTHERN VIRGINIA COMMUNITY COLLEGE SPONSORS SEMINAR ON JUVENILE JUSTICE

HON. STAN PARRIS

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. PARRIS. Mr. Speaker, we are all aware of the ever increasing rates of crime which plague our society. Our urban centers are faced daily with some new major crime to the point that a simple robbery is looked upon as practically insignificant.

Added to this problem is the alarming increase in crimes committed by juveniles. The decline of the American family unit has led to this growth of youth crime.

I am pleased to announce that one of the institutions of higher learning in my district, Northern Virginia Community College, is beginning the process which will help us understand this situation and indicate a route we can take to eliminate this problem.

I would like to at this time insert a statement which explains the seminar on juvenile justice in greater detail.

The statement follows:

NORTHERN VIRGINIA COMMUNITY COLLEGE SPONSORS SEMINAR ON JUVENILE JUSTICE

The problem of delinquent and troubled children is occurring at a higher rate in our Nation as well in my Commonwealth of Virginia.

To help clarify this issue the staff and students of The Northern Virginia Community College's Annandale Campus, in cooperation with the Juvenile and Domestic Relations Courts, correctional professionals and citizens of Northern Virginia and surrounding communities, is sponsoring a Seminar on Juvenile Justice on March 26, 27, 28, and 30. (1981) The focus will be on how to prevent and control juvenile delinquency and related problems, said Anthony J. DelPopolo, Sr., Professor of Administration of Justice and coordinator of the program.

"This Seminar, according to Professor DelPopolo, "is an excellent example how a college, the local governments and the community's citizens can join together to make a better society.

Among the participating judges who will chair the panel discussions are: Judges Joanna L. Fitzpatrick, Thomas A. Fortkort, Michael J. Valentine, and Arnold B. Kasabian, of Fairfax County and Judge Joseph L. Peters of the City of Alexandria. Panel discussions will cover topics such as: (1) Child Support, Child Custody and Family Dysfunction. (2) Child Abuse and its Treatment; (3) The Delinquent Child; (4) The Mentally Ill Child; and (5) The Learning-Disabled Child.

Dr. Richard L. Ernst, President of Northern Virginia Community College will welcome the Seminar participants. Don Terrell Hutto, Director of Corrections of the Commonwealth of Virginia will be the keynote speaker.

Other participants on the program include: Vincent M. Picciano, Director of Fairfax County Court Services will speak on "The Juvenile and Domestic Relations Courts—Administrative Procedures;" Ralph Thomas, chief probation officer of the Falls Church Juvenile and Domestic Relations Court, on "The Juvenile Court in America—an Historical Background"; DelPopolo on "The Juvenile Court: A Philosophy for Today"; and "The Police and the Juvenile Offender," Captain Jack Goldman, Commander, Major Crimes Division, Criminal Investigation Bureau, Fairfax County Police Department.

Connie House, director of Creative Connections, Inc. of Arlington, will offer a dramatic presentation entitled "The Child, the Delinquent Family and the Delinquent Society," under the supervision of Bernard Williams.

Debbie Minor, a student in the Corrections curriculum, and a volunteer in the Fairfax County's Juvenile Court "Outreach" program, heads the student planning committee.

The Seminar open to all students regularly enrolled at the College, as well as staff members of juvenile and criminal courts, juvenile police officers, school administrators and teachers, corrections workers, legislators, parent-teachers associations, and community resource groups, youth workers, child caseworkers and other related organizations and persons with special interest in the personal, social and delinquent problems of children. All who complete the Seminar will receive three college quarter credits. The general public is also invited to enroll.

The program of panels, lectures, demonstrations and audio-visual presentations will be held from 8:30 a.m. to 4:30 p.m. on the four scheduled days in Room 125 of the Annandale Campus Nursing building.

Registration for the seminar is open now and includes a $5 application fee and a $28.50 tuition fee for Virginia residents. Out-of-state residents need pay $101.00, if not previously registered at the College. Registration will close when a maximum number of registrants is reached.

For information on how to register, call Professor DelPopolo at the Administration of Justice program office at 323-3256 or 323-3255, or evenings at 356-0618.●

COMMEMORATING BYELORUSSIAN INDEPENDENCE

HON. BERNARD J. DWYER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. DWYER. Mr. Speaker, today marks the 63d anniversary of Byelorussian independence and it is right that we take a moment to reflect again on the tragedy of that people's all too brief taste of genuine national freedom.

Like her Baltic neighbors, Byelorussia has been denied her right to sovereignty following the Red army's forceful takeover, and been further victimized by systematic atttempts at Russification by the oppressive Soviet regime.

This anniversary also gives Congress an opportunity to express support for the local Byelorussian-American community's efforts to include their language in "Voice of America" programing. This appeal by first, second, and third generation Byelorussian-Americans to help protect the interests of their relatives in the Soviet Union should not be ignored.

On Sunday, March 29, Byelorussian-Americans will be celebrating the spirit of freedom that has endured there despite attempts by the Soviets to squelch it. We in New Jersey's 15th District, where many Byelorussian-Americans make their homes, salute them and pray that Byelorussia and the other captive nations will soon be free once more.●

HOUSE REPUBLICAN TASK FORCE ON FOREIGN POLICY

HON. E. THOMAS COLEMAN

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. COLEMAN. Mr. Speaker, as chairman of the House Republican Research Committee's Task Force on Foreign Policy, I have the honor today of presenting the task force membership for the 97th Congress. Republican members with a strong interest in foreign policy have joined together on this task force to keep our colleagues abreast of international developments and concerns. Equally important will be the task force's work to help develop a consensus within the Republican Party on foreign policy positions.

With difficult foreign policy issues already confronting our Nation in areas such as El Salvador, Afghanistan, and Poland, decisions made over the next 2 years will be crucial in determining the course and direction of U.S. foreign policy. I believe the task force has an important role to play in this formative process. The task force will work closely with the Republican leadership in both Congress and the administration in building a broad base of support for Republican policy positions in the area of international affairs.

The task force will serve as a forum for the discussion of international concerns and the role of the Congress in formulating U.S. foreign policy. In this regard, the task force will actively solicit input and comments from individuals and organizations directly involved in international relations and U.S. foreign policy. The task force will be preparing substantive reports and keeping Republican Members informed of developments on issues such as international trade and export policies, foreign aid, international communications, and military credit sales, as well as policy concerns in Latin America, Africa, the Middle East, and United States-Soviet relations.

The task force, comprised of Republican Members of Congress having a particular interest in foreign affairs, includes three members of the House

Committee on Foreign Affairs, and other members whose major committee or subcommittee assignments lead them into the arena of international concerns. The members of the task force are: Representative E. THOMAS COLEMAN, Missouri, chairman; Representative WILLIAM S. BROOMFIELD, Michigan, ranking minority member of the Foreign Affairs Committee; Representative EDWARD J. DERWINSKI, Illinois; Representative JOEL PRITCHARD, Washington; Representative DON H. CLAUSEN, California; Representative C. W. "BILL" YOUNG, Florida; Representative ROBERT W. DAVIS, Michigan; Representative BOB LIVINGSTON, Louisiana; Representative DAVID EMERY, Maine; Representative THOMAS B. EVANS, JR., Delaware; Representative FRANK WOLF, Virginia; and Representative BILL HENDON, North Carolina.

The task force looks forward to working together with foreign policy experts, administration officials, and congressional leaders to strengthen Republican policy positions on international issues and assist in developing a consistent, coherent foreign policy for our Nation.●

POSTAL ELECTRONIC MAIL BILL

HON. WILLIAM (BILL) CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. CLAY. Mr. Speaker, today I introduced the Postal Electronic Mail Act of 1981. This bill establishes public policy through which the Postal Service may offer electronic mail service to our Nation.

This legislation is an outgrowth of extensive public hearings conducted by my subcommittee last year. Testimony was received from a wide range of witnesses—public officials, private citizens, and representatives of the telecommunications industry and postal employee organizations. My bill will not entirely satisfy these varied and competing interests. It does however take their views into consideration. The bill takes a single step toward defining the parameters within which the Postal Service may offer electronic mail services.

In brief, the Postal Electronic Mail Act of 1981: first, Requires that the Postal Service establish a separate organizational unit for the management of its electronic mail services; second, prohibits the use of any Government subsidy or revenue from other postal operations and services to cover the cost of electronic mail services; third, prevents the Postal Service from using private express statutes to its own advantage in offering electronic mail; fourth, prohibits the Postal Service from owning telecommunications equipment in order to provide electronic mail service; and fifth, prohibits the Postal Service from offering service from point of origin to point of destination—commonly known as generation III service.

The Postal Electronic Mail Act of 1981 does not constitute the definitive or final word on the role of the Postal Service in providing electronic mail. None of its provisions are carved in granite. In order to determine how the bill may be improved, I intend to promptly convene public hearings.

A sectional analysis of the Postal Electronic Mail Act of 1981 follows:

POSTAL ELECTRONIC MAIL ACT OF 1981

SECTIONAL ANALYSIS

Section 1: Entitles the Act as the "Postal Electronic Mail Act of 1981".

Section 2: Amends Chapter 36 of title 39, U.S. Code by adding a new section 3686, "Electronic Mail Service" which provides as follows:

Subsection (a)—the Postal Service may provide electronic mail service only in accordance with the provisions of this Act and, within 60 days after its enactment, the Postal Service shall establish a separate organizational unit for the management of its electronic mail service.

Subsection (b)—(1) the Postal Service shall establish rates and fees for electronic mail service which are adequate to cover its costs; (2) the Postal Service may use other revenue to provide electronic mail but that money shall not exceed income from electronic mail; the Postal Service may use monies from its revolving Postal Service Fund for its electronic mail unit however these monies must be recovered by the Fund within a reasonable time, and (3) electronic mail operations of the Postal Service shall not be subsidized by the Government.

Subsection (c)—the transmission of information by telecommunications by any person shall not be a violation of the Private Express Statutes.

Subsection (d)—the Postal Service shall not own cable, radio, or similar telecommunications equipment in order to provide electronic mail service but may contract for such equipment.

Subsection (e)—the Postal Service may not provide electronic mail service from point of origin to point of destination (commonly known as Generation III service).

Subsection (f)—defines "electronics mail service" and "telecommunications".●

MORE ON SAUDI ARABIA

HON. RAYMOND J. McGRATH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. McGRATH. Mr. Speaker, in the past, I have been a vocal opponent of the sale to Saudi Arabia of advanced equipment to upgrade the offensive capabilities of the F-15.

I recently noticed a short item in the New York Times which has served to reinforce my position. Responding to Israeli opposition leader Shimon Peres' statement that he would try to explore the possibility of peace with the Saudis if his party were successful in the June 30 election, the Saudi Information Minister stated that his nation "rejects allegations in the enemy's press to implicate the kingdom in positions contrary to its present and future policies."

The use of the word "enemy" is disturbing to me, as is the obvious disinterest in ever seeking an agreement with Israel to lessen tensions in the Middle East. If the Saudis will not negotiate with the current government or its possible replacement, who will they negotiate with?

When President Carter proposed the 1978 arms sale to Saudi Arabia he wrote that the sale of the planes to Saudi Arabia would "cement their ties to the United States and advance the cause of moderation in the area." The recent Saudi statement indicates to me that moderation is the farthest thing from the Saudis mind at this point, and makes the sale of equipment to allow the Saudis to strike anywhere in Israel an extremely risky proposition.

I include a copy of the Times article for the benefit of my colleagues.

SAUDIS SCORN PERES HINT AT PEACE BID

JIDDA, SAUDI ARABIA, March 23.—Saudi Arabia today rejected a suggestion by the Israeli opposition leader Shimon Peres that he would try to explore the possibility of peace with the Saudis if his Labor Party wins the Israeli general elections on June 30.

Mr. Peres said in Tel Aviv yesterday his party would make an effort to negotiate the future status of Jerusalem with Saudi Arabia and would look seriously at the possibility of peace with the Saudis.

Mr. Abdo Yamani said the remarks were meant for local consumption in Israel during the campaign. "The peace we want is not that which Peres and Begin want," he said, referring to Prime Minister Menachem Begin of Israel. "The peace we support is based on rights, justice, international law and the resolutions of the United Nations."●

LEGISLATION TO DENY FEDERAL RETIREMENT BENEFITS TO CONVICTED FELONS

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mrs. SCHROEDER. Mr. Speaker, following the conviction of some of our colleagues for taking bribes, constituents would frequently ask me why these felons were still allowed to draw large Government pensions. I answered that these former Members of Congress had paid in their annual 7 percent contribution and were, therefore, entitled to the benefits of the pension system. I knew, however, that this contribution accounted for less than one-third of the cost of their pensions and that it was the taxpayers who were picking up the rest of the cost.

Some constituents asked me to introduce legislation to cut off the pensions of those convicted in Abscam. I told them I could not do that because I remembered the infamous history of congressional attempts to do exactly the same thing to Alger Hiss. I remembered that the U.S. District Court for the District of Columbia in *Hiss* v. *Hampton*, 338 F. Supp. 1141 (1972) had ruled that a law denying pension payments to a former employee convicted of a crime was unconstitutional ex post facto law.

So, despite the fact that Federal pension payments to those convicted in Abscam bothers me, I do not think there is anything constitutional we can do about it.

Nevertheless, I do not want this situation to recur. I am, therefore, introducing legislation today which would deny Federal retirement benefits to any Federal official in the retirement system, including Members of Congress, who is convicted of a felony, which is punishable by more than 5 years in jail, which was committed while the individual was a Federal employee, which directly involved that Federal employment, and which was committed after the enactment date of the act.

Drafted in this way, the legislation would not confront any constitutional problems. While it would do nothing about those already convicted of crimes against the public trust, it would cut off from taxpayer support Federal officials who, in the future, engage in serious wrongdoing.

Passage of legislation of this sort would lift some of the strain off the Congress as a whole caused by the wicked deeds of a few.●

ELMER B. STAATS, EXEMPLARY PUBLIC SERVANT

HON. GILLIS W. LONG

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. LONG of Louisiana. Mr. Speaker, I take this opportunity to congratulate the recently retired Comptroller General of the United States, the Honorable Elmer B. Staats, on his long and distinguished career as a dedicated public servant.

We all know of his outstanding work as Comptroller General, always with the objective of having the Government do a better job for the people. Under his guidance the General Accounting Office has developed into a highly effective arm of the Congress.

General Staats brought objectivity to Government. Whenever General Accounting Office audits uncovered instances of programs that were not giving us our money's worth or were not achieving the ends we had intended, he never hesitated to tell us that things were going off course and in need of attention. Many of his recommendations to the Congress resulted in improving the efficiency and effectiveness of Government programs.

Recently General Staats worked with me in developing a process for meaningful congressional oversight of Federal programs as a part of the national effort to control spending. He and I share the belief that the Congress needs a more systematic way of overseeing and reconsidering Government policies and programs. I am deeply indebted to General Staats and his fine staff for much valuable assistance provided to me and to my subcommittee in developing the Sunset Review Act.

On March 6, 1981, Elmer Staats officially concluded his service as Comptroller General of the United States. His steady guidance of the General Accounting Office and his wise counsel to the Congress will be difficult to replace. However, I do not expect that the end of this assignment will mean the end of his contributions to us. I fully expect that he will continue to be of service to our country.

I commend General Staats on his outstanding service to the Congress and to the Nation, and I wish him well in all his future endeavours.●

ANGOLA AND THE CLARK AMENDMENT

HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. BONKER. Mr. Speaker, last Thursday the Reagan administration asked the Congress to repeal the 1976 Clark amendment which says no aid may be provided to any group, movement, or individual to conduct military or paramilitary operations in Angola without congressional approval.

In 1976 I led the fight to secure the passage of that amendment in the House. I intend to do all I can to oppose the administration's effort to repeal the Clark amendment.

Nothing has changed in Africa or in Angola to warrant what the administration is proposing. The United States cannot revert to a policy of providing covert American aid to antigovernment guerrillas within Angola without alienating the rest of black Africa. The timing of this action is especially bad since it could adversely affect the Western-sponsored negotiations over Namibia.

This shortsighted proposal may win the U.S. acclaim in South Africa but it will destroy our hard-won influence in the rest of the African continent.

The reaction of African leaders has been swift and harsh. They have warned that U.S. support of rebel forces in Angola would have powerful repercussions on United States-African relations. For example, the President of oil rich Nigeria, Shehu Shagari, said last week:

> If it is true that the United States is to support rebel organizations in a sovereign country like Angola, then it is very serious. I do not think it will, but if it did it would be in defiance not only of Angola but of all Africa.

In Tanzania the Government-owned newspaper the Daily News commented:

> Such American action would be worse than the Soviet invasion of Afghanistan.

The major concerns of leaders of black Africa are the administration's policy toward Namibia and the administration's policy concerning apartheid in South Africa. They see the administration's advocacy of the repeal of the Clark amendment as an effort which will turn Africa into an arena for ideological battles with communism. This they reject.

Furthermore, Angola has provided vital assistance to the five power Western attempt to negotiate a peaceful political settlement of the 14-year-old war between South Africa and the guerrillas (SWAPO) in Namibia. Efforts by African leaders to secure that political settlement and the subsequent withdrawal of Cuban troops from Angola would collapse if the Reagan administration went ahead with its plan to repeal the Clark amendment and to aid Angola's rebel factions.

The Secretary of State recently said the Clark amendment must be repealed because it is a blatant restriction on executive authority. When one considers the consequences, it is an awesome price to pay in order to satisfy the whims of executive authority.●

THE 63D ANNIVERSARY OF BYELORUSSIAN INDEPENDENCE

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. DERWINSKI. Mr. Speaker, today, the Byelorussian-American communities in the United States will commemorate the 63d anniversary of the proclamation of the Byelorussian Democratic Republic. This proclamation of independence by the Byelorussian people was held in Minsk, the capital of Byelorussia, on March 25, 1918. The break from Communist Russia resulted in retaliation by the Soviet Government just 10 months later, crushing that spark of freedom by creating a Byelorussian Soviet Socialist Republic within the ironfisted grasp of the U.S.S.R.

At the end of World War II, an all-Byelorussian Congress again convened to approve a second proclamation of independence, but without any chance of success.

However, an intense desire to be free remains in the hearts and minds of the people of Byelorussia. Despite the oppression imposed upon them by the Communist regime, the Byelorussians have at every opportunity sought to maintain their national identity.

Throughout their history, the Byelorussian people have transmitted from generation to generation their national spirit through their cultural achievements, language, and rich heritage. The knowledge of what it is to be free and the determination for their renewed freedom continues to inspire these valiant people in their dream of reestablishing their homeland as an independent nation.

It is, indeed, a real tragedy that the Byelorussian people, whose heritage is so rich in the tradition of democracy, live under the oppressive rule of the Soviet Government. It is also unfortunate that these people are not well served by the Voice of America. The Byelorussians are not allowed to learn of the nature of Soviet expansionism throughout the world and the vitality of their respective cultural heritages in the United States because for years the Byelorussians in the Soviet Union have been denied any VOA broadcasts in their own language.

In recent years, the RFE and RL have suffered substantial cutbacks in both staff and operations. These cuts have seriously impaired the effectiveness of their broadcasts in the Soviet Union. As our broadcasts to the Soviet bloc are the principa; communication link between the United States and the people within the area, these broadcasts serve as a valuable vehicle disseminating information to those captive peoples in Eastern Europe and the Soviet Union. These radios are our most important nonlethal weapons in our confrontation with the Soviet Government.

Therefore, I plan to again introduce a resolution calling for the extension and improvement of the quality and quantity of programs in foreign languages of the Voice of America, Radio Liberty, and Radio Free Europe, which will increase their impact and effectiveness. I believe that we must make full use of our technological capability to increase the power, number, and performance of transmitters of the VOA, RL, RFE, and to extend their range to overcome, as much as possible, the Soviet interference by jamming.

As we commemorate this anniversary of independence, we also commend and acknowledge the courage of the Byelorussian people. This anniversary serves as a reminder that the spirit of freedom continues to burn in the hearts of the Byelorussian people despite Communist oppression. We must reassure those brave people whose human rights and cultural heritage are held captive, that they will continue to receive our encouragement for their goal of self-determination.●

SALUTE TO HON. WILLIAM M. GREEN OF NEW JERSEY—DISTINGUISHED CITIZEN

HON. JAMES J. HOWARD

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. HOWARD. Mr. Speaker, in behalf of my colleague, Mr. ROE, and myself I wish to state that on Friday, March 27, a testimonial celebration will be held in New Jersey in tribute to a distinguished citizen, outstanding community leader, champion of veterans, highly talented musician, and good friend—the Honorable William M. Green—whose lifetime of dedication and devotion to the public good has truly enriched our community, State, and Nation. We know that you and our colleagues here in the Congress will want to join with us in extending our warmest greetings and felicitations to him and share the pride of his good wife, Marion Lois, their daughter Debbie and son Billy, Jr. on this milestone of achievement in their family endeavors.

Mr. Speaker, Bill Green is a real statesman of our people with the deepest of compassion, benevolence, unselfishness, and willingness to help others. He fought for our country in World War II and rose above the scars of war as a disabled veteran to attain success and esteem in a diversified career of his choosing. Along the pathway of life he has taken the time to help, to guide, and to achieve with a richness of wisdom that has endeared him to all of us who have the good fortune to know him.

There is so much that can be said about Bill's many achievements in his quest to accommodate the needs of our people and provide a better way of life for his fellow man. With your permission, Mr. Speaker, we would like to insert at this point in our historic journal of Congress a biographical sketch of William Green which has intertwined his talented artistry and artistic performance that has brought joy and happiness to our people with his family background, hard work, and personal commitment that has enabled him to earn the esteem of all as a highly respected businessman, exemplary soldier, and master of the science of politics and government, as follows:

WILLIAM M. GREEN

Born November 30, 1908 in New York City. His father manufactured baby carriages in New York and died when he was age ten. His mother sold the baby carriage factory and bought the famous 14th Street Theatre where people like Bert Lytell, Pauline Frederick, Sessue Hayakawa of Bridge of River Kwai fame performed. Sunday's Vaudeville and Dixieland bands performances at the theatre signalled the beginning of Bill Green's acclimation to jazz music. His uncle was Judge Otto Rosalsky, one of the original Grand Street Boys, whom Bill attributes as being responsible for his indoctrination into the Democratic party at the age of 21 years, working with some of the most famous Democrats of that era. Bill's first vote went to President Franklin Roosevelt in 1932. In late 1934, he moved from New York City to North Brunswick Township, New Jersey, and opened his first night club and restaurant on Route One.

Over the years to 1941, Bill had his famous Dixieland Band that played all of the prominent universities throughout the country. In early 1942 he enlisted in the U.S.N.R., the 42nd Navy Sea Bees, the first regiment of Sea Bees in the county, and served in the Aleutian Islands on seven islands. Bill was disabled and hospitalized and honorably discharged in 1945. He then organized the Clark Moetz Post V.F.W. in North Brunswick, New Jersey. Upon his homecoming he reopened his night club and restaurant and had the greatest names of jazz music play with his band—Louis Armstrong, Jack Teagarden, Sidney Becket, Pee Wee Russel, Miff Mole, Fyrie Glenn, Bobby Hacket, Wild Bill Davidson and numerous others. He also managed one of America's greatest jazz singers, Lee Wiley from Fort Gibson, Oklahoma.

In 1946 Bill Green started through the chairs in the New Jersey State V.F.W. organization and in his travels campaigned for the first term of the now Dean of the New Jersey Congressional Delegation, The Honorable Peter Rodino. In 1949 Bill became the first New Jersey World War II State Commander of the Veterans of Foreign Wars. He also took on the State Chairmanship for the election of Elmer Wene of Vineland for Governor along with Jim Bishop who handled the public relations and publicity for that campaign.

Bill often speaks of his first meeting back in 1946 with our former President John F. Kennedy in the City of Boston where President Kennedy was running for Congress the first time and where Bill became a friend and supporter of his throughout the following years. President Kennedy and Bill served on the Eastern States Conference of the V.F.W. together. Bill felt very deeply about President Kennedy's assassination. Through the Lions Club of Asbury Park, New Jersey—as Chairman—he raised the necessary funds to build a statue and have the park named in Jack Kennedy's memory.

In 1949 Bill met with President Truman in the Oval Office in regards to the forthcoming election of Elmer Wene, and there on the President's desk first saw the sign, "The Buck Stops Here."

In 1956 Bill Green sold his famous Rustic Lodge and settled in Asbury Park where he purchased a night club and restaurant on Summerfield and Cookman Avenues, and operated same until 1968. All time greats in the entertainment world—Duke Ellington, Count Basie, Louis Armstrong, Lionel Hampton and others too numerous to mention—visited and played in his most prestigious night club and restaurant. Bill was Chairman of the State Veterans Committee for the election of U.S. Senator Harrison

Williams and President Lyndon Johnson. He was elected National Council Member of the V.F.W. representing Delaware, Maryland and New Jersey in 1950–1951.

In 1952 he served on the National Security Committee of the V.F.W. and on July 26, 1960 was elected Chairman of the Big Ten Conference Committee of the V.F.W. He was appointed in 1954 as the National Vice Chairman of Community Services in the United States and also appointed to the National Civil Defense Committee of the V.F.W. in 1960. He was elected President of the Lions Club of Asbury Park in the 1960's. He has held membership in the Chamber of Commerce, the Navy League, the B.P.O.E., and Musician's Union. He is also a member of the American Legion, Disabled American Veterans, Jewish War Veterans, and holds Life Membership in the Veterans of Foreign Wars. He is also a Notary Public of New Jersey.

Bill Green was elected Municipal Chairman of the Democratic Party in Asbury Park in June of 1973, a post he continues to hold with distinction. He has served the City of Asbury Park, New Jersey as Convention Director, Building Inspector, Director of Inspections; also, Secretary to Freeholder Ray Kramer in charge of Buildings and Grounds in Monmouth County and Assistant Supervisor of the Monmouth County Highway Department.

Throughout the years he has served on many civic and charitable organizations including the Heart Fund, Cerebral Palsy, Cancer Fund, Infantile Paralysis, etc. He has served as Campaign Manager for three city elections, and Campaign Manager on two County Freeholder campaigns for Ray Kramer who is now Mayor of Asbury Park. Bill ran for City Council unsuccessfully in 1977 in a tight election.

Among his acquaintances over the years Bill Green is especially proud of his association with four Presidents, Secretary Marshall, generals, admirals, F. Cardinal Spellman, Bernard Baruch, Congressional Medal of Honor men, many State Senators, Assemblymen and Assemblywomen, municipal councilmen and councilwomen, and Mayors; also some of the greatest jazz musicians in the world either played with and for him or were close friends.

Mr. Speaker, the quality of Bill Green's leadership and sincerity of purpose in his political, civic, musical, and business pursuits are applauded by all of us. A gentleman of great stature and fortitude he has walked hand in hand with other giants of national and international renown in the political arena, the entertainment world, the business community, and the battlefield, second to none, in his chosen fields of endeavor and expertise.

We are pleased to seek this national recognition of Bill Green's lifetime of good works and extend our heartiest congratulations and best wishes to him and his family for continued success and happiness. We do indeed salute the Honorable William M. Green, a truly great American.●

HEALTH MANAGEMENT DEVELOPMENT ACT OF 1981

HON. GARY A. LEE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. LEE. Mr. Speaker, I am today introducing the Health Management Development Act of 1981. This bill is the first direct, balanced approach to solving the shortage of training capacity for qualified managers in all kinds of health service agencies. The bill modifies and extends existing efforts to help colleges and universities respond to this need. It introduces complementary efforts to assure more effective use of the past and present Federal investment in the field.

Federal support for health manpower education programs will be reduced by some 60 percent in 1982 under the administraton budget plans. Trained health managers, however, are still in short supply and will remain so for a number of years. This bill focuses our attention on this specific problem which has been frequently overlooked because the role of adminstrators is not as dramatic as that of some other health workers.

We can reduce Federal health expenses by reducing eligibility and by tighter management control in Government. But hundreds of millions of medicare, medicaid, and other Federal program dollars will continue to flow to health services providers which lack appropriate trained management. We should also deal with cost reduction at the community level, by assuring the availability of qualified management for the health services where the money is spent.

Competition can improve the effectiveness, cost and quality of health services. In most communities, trained health administrators are found only in large hospitals. A lack of strong management limits the ability of small hospitals, home health agencies, health centers, HMO's, and other services to compete with high-cost systems. Every successful business considers management development an essential investment. The Federal Government invests very little in developing management for its huge health business. With better management, we would have less fraud and abuse because there would be better control.

The bill provides three carefully targeted new authorities:

First, it will provide support to recycle faculty members from fields which are facing decreasing enrollments to meet the increasing need in health administration. This is a cost-effective way of meeting several problems.

Second, it will assure the availability of skill improvement courses in such topics as financial management and personnel management for people now in key management positions.

Third, the bill provides seed money to help universities redirect both short- and long-term training to areas of high national priority such as home health agency management and rural hospital management, and in such topics as productivity improvement.

There is a unique and appropriate Federal role in health management development. Health services expend large sums of public funds. There is an opportunity to use a very modest investment to improve the managerial control of those funds. Better personnel management will improve the utilization of manpower produced at high public expense, contributing to decreased demand and cost containment. It will also make rural and underserved health services more professionally attractive. There are concrete examples of this impact in many communities, but there are not enough.

Since Federal support for health administration education began, just 3 years ago, the effectiveness of this approach has been demonstrated. The training programs have expanded courses for people on the job. The number of graduates has increased and non-Federal support has increased. This bill will accelerate this process, almost doubling the assured non-Federal contribution.

The production of graduates has, only in the last 2 years, reached the point where the marketplace has directed almost half away from big general hospitals. But it has not begun to fill the jobs in rural health, home health agencies, HMO's, group practices, emergency systems, and others. Good management is needed in every one if the administration's objectives are to be met.

The text of the Health Management Development Act of 1981 follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Health Services Management Act of 1981".

SEC. 2. Effective with respect to appropriations under section 791 of the Public Health Service Act (42 U.S.C. 295h) for the fiscal year ending September 30, 1983, such section 791 is amended to read as follows:

"CAPACITY DEVELOPMENT GRANTS FOR GRADUATE PROGRAMS IN HEALTH ADMINISTRATION

"SEC. 791. (a) From funds appropriated under subsection (d), the Secretary shall make annual grants to public or nonprofit private educational entities (excluding accredited schools of public health) to support the graduate educational programs of such entities in health services administration.

"(b) The amount of the grant for any fiscal year under subsection (a) to an educational entity with an application approved under subsection (c) shall be equal to the amount appropriated under subsection (d) for such fiscal year divided by the number of educational entities which have applica-

tions for grants for such fiscal year approved under subsection (c).

"(c)(1) No grant may be made under subsection (a) unless an application therefor has been submitted to the Secretary before such time as he shall by regulation prescribe and has been approved by the Secretary. Such application shall be in such form, and submitted in such manner, as the Secretary shall by regulation prescribe.

"(2) The Secretary may not approve an application submitted under paragraph (1) unless—

"(A) such application—

"(i) contains assurances satisfactory to the Secretary that in the school year (as defined in regulations of the Secretary) beginning in the fiscal year for which the applicant receives a grant under subsection (a) that—

"(I) at least 25 individuals will complete the graduate educational program for which such application is submitted; and

"(II) such entity shall expend or obligate at least $150,000 in funds from non-Federal sources to conduct such programs;

"(ii) contains assurances satisfactory to the Secretary that the program for which such application was submitted shall provide, or plans to provide within 12 months, a concentration or special emphasis on one or more of the following:

"(I) health planning and policy;

"(II) ambulatory care services;

"(III) primary care services;

"(IV) long-term care;

"(V) home health services;

"(VI) multi-unit systems;

"(VII) health maintenance organizations and other prepaid services systems;

"(VIII) mental health services; and

"(IX) any other health service system determined by the Secretary to require special emphasis; and

"(iii) contains such other information as the Secretary may by regulation prescribe; and

"(B) the program for which such application was submitted has been accredited for the training of individuals for health services administration by a recognized body approved for such purpose by the Secretary of Education and meets such other quality standards as the Secretary shall by regulation prescribe.

"(3) The Secretary may not approve or disapprove an application submitted under paragraph (1) except after consultation with the National Advisory Council on Health Professions Education.

"(d) There are authorized to be appropriated for grants under this section $4,000,000 for the fiscal year ending September 30, 1983, and $5,250,000 for the fiscal year ending September 30, 1984.".

SEC. 3. (a) Effective with respect to appropriations under section 749 of the Public Health Service Act (42 U.S.C. 294s) for the fiscal year ending September 30, 1982, such section 749 is amended to read as follows:

"HEALTH SERVICES ADMINISTRATION STUDENT TRAINEESHIPS

"SEC. 749. (a) The Secretary shall make grants to public or nonprofit educational entities (excluding accredited schools of public health) for traineeships for students enrolled in a program to the entity in health services administration which is accredited by a body approved for such purpose by the Secretary of Education and which meets such other quality standards as the Secretary by regulation may prescribe. The amount of any grant under this subsection shall be determined by the Secretary.

"(b) Traineeships awarded under grants made under subsection (a)—

"(1) shall be awarded in accordance with such regulations as the Secretary shall prescribe,

"(2) may be awarded only to students who are citizens of the United States, lawfully admitted to the United States for permanent residence as defined in section 101(a)(20) of the Immigration and Nationality Act, or citizens of the Northern Mariana Islands, American Samoa, or the Trust Territory of the Pacific Islands, and

"(3) shall provide for tuition and fees and such stipends and allowances (including travel and subsistence expenses and dependency allowances) for the trainees as the Secretary may deem necessary.

"(c) No grant for traineeships may be made under subsection (a) unless an application therefor has been submitted to, and approved by, the Secretary. Such application shall be in such form, be submitted in such manner, and contain such information, as the Secretary by regulation may prescribe. Each applicant for a grant under subsection (a) shall provide assurances to the Secretary that the funds received under the grant shall be awarded for traineeships to individuals who have received a baccalaureate degree.

"(d) For payments under grants under subsection (a), there are authorized to be appropriated $2,500,000 for the fiscal year ending September 30, 1982, $2,500,000 for the fiscal year ending September 30, 1983, and $2,500,000 for the fiscal year ending September 30, 1984.".

SEC. 4. Subpart III of part C of title VII of the Public Health Service Act is amended by inserting after section 749 the following new sections:

"NATIONAL PRIORITY CURRICULUM IMPROVEMENT PROJECTS FOR GRADUATE PROGRAMS IN HEALTH SERVICES ADMINISTRATION

"SEC. 750. (a) The Secretary shall make grants to assist educational institutions with accredited graduate programs in health services administration to meet the costs of developing new, improved, and expanded curricula to improve short-term and long-term health management training. Such curricula may include—

"(1) health services finance;

"(2) health services marketing;

"(3) health services accounting;

"(4) health economics;

"(5) epidemiology and health planning;

"(6) health policy, law, and regulation;

"(7) quality assurance and assessment;

"(8) health information systems;

"(9) management of primary and ambulatory care; and

"(10) health services organization and management for students in other health disciplines;

"(b) For purposes of subsection (a), the term 'accredited program in health services administration' means a graduate program which is accredited for the purpose of training individuals in health services administration by a body approved for such purpose by the Secretary of Education.

"(c) For the purpose of grants under subsection (a), there are authorized to be appropriated $2,500,000 for the fiscal year ending September 30, 1982, $3,500,000 for the fiscal year ending September 30, 1983, and $4,250,000 for the fiscal year ending September 30, 1984.

"CRITICAL SHORTAGE FACULTY DEVELOPMENT PROJECTS

"SEC. 750A. (a) The Secretary shall make grants to assist educational institutions with accredited graduate programs in health services administration to meet the costs of establishing and operating programs to develop health administration faculty in fields of national shortage. Such faculty development programs shall train individuals in health and management disciplines that are, in the judgment of the Secretary, under-represented in programs in health services administration and which are necessary to meet national health services administration training requirements.

"(b) No grant may be made under subsection (a) unless an application therefor is submitted to and approved by the Secretary. Such an application shall be in such form, be submitted in such manner, and contain such information as the Secretary shall prescribe. The Secretary may not approve an application for a grant under subsection (a) unless such application contains assurances satisfactory to the Secretary that at least three individuals shall complete the program in each year for which an application is made.

"(c) Grant funds awarded under subsection (a) shall be used to provide 12 month fellowships to individuals who—

"(1) have received a doctoral degree or equivalent professional recognition in a discipline determined by the Secretary to be underrepresented in programs in health services administration and necessary to improve training in health care management; and

"(2) agree to serve as a faculty member for a period of not less than two years in a program in health services administration.

"(d) For purposes of subsection (a), the term 'accredited program in health services administration' means a graduate program which is accredited for the purpose of training individuals in health administration by a body approved by the Secretary of Education.

"(e) For the purpose of grants under subsection (a), there are authorized to be appropriated $1,500,000 for the fiscal year ending September 30, 1982, $2,000,000 for the fiscal year ending September 30, 1983, and $2,500,000 for the fiscal year ending September 30, 1984.

"MANAGEMENT TRAINING FOR HEALTH CARE PROFESSIONALS

"SEC. 750B. (a) The Secretary shall make grants and enter into contracts with public and nonprofit private education institutions and other nonprofit private entities for the establishment and operation of nondegree management training programs for physicians, nurses, other providers of health care, administrators in health care facilities and in State and local health agencies and health planning agencies, in—

"(1) health systems management;

"(2) health policy, planning, and regulation;

"(3) health financial management;

"(4) management of interagency and interfacility collaboration; and

"(5) the management of small rural and inner city health services.

"(b)(1) The amount of any grant or contract under subsection (a) shall be determined by the Secretary. No grant may be made or contract entered into unless an application therefor is submitted to and approved by the Secretary. Such an application shall be in such form, submitted in such manner, and contain such information, as the Secretary shall by regulation prescribe.

"(2) The Secretary shall, to the extent feasible, make grants and enter into contracts under subsection (a) for training programs in such a manner that there is an appropriate geographic distribution of the training programs.

"(c) For the purpose of making grants and contracts under subsection (a), there are authorized to be appropriated $1,000,000 for the fiscal year ending September 30, 1982, $1,500,000 for the fiscal year ending September 30, 1983, and $2,000,000 for the fiscal year ending September 30, 1984.".●

BYELORUSSIAN ANNIVERSARY

HON. MILLICENT FENWICK

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mrs. FENWICK. Mr. Speaker, I call the Members' attention to the fact that today is the 63d anniversary of the Proclamation of the Byelorussian Democratic Republic, which took place in Minsk on this day in 1918.

Unfortunately, shortly after this proclamation, Lenin's Moscow government arranged the proclamation of its own colonial state, the Byelorussian Soviet Socialist Republic.

Since then, perhaps as many as 6 million of the Byelorussian people have been murdered or deported to the concentration camps of Siberia. The Byelorussian language and culture have been suppressed, and Byelorussian prisoners of conscience have languished in Soviet jails.

I hope that this last great empire will soon begin to let the captive nations go free. Until then, we owe the captive people our efforts to speak—at least—on their behalf.●

THE 63D ANNIVERSARY OF THE BIELARUSIAN NATIONAL REPUBLIC INDEPENDENCE DAY

HON. FRANK ANNUNZIO

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. ANNUNZIO. Mr. Speaker, March 25 marks the 63d anniversary of the independence of the Bielarusian National Republic, and I am glad to have the opportunity to join my colleagues in the Congress in commemorating this important event in the history of free peoples.

The Bielarusian Coordinating Committee of Chicago, Ill., is sponsoring a commemorative banquet and program to mark this occasion on Sunday, March 29, at 1 p.m. at the Regency Inn, 5319 West Diversey Avenue in Chicago, and I send my greetings to all those participating in this important event.

The Bielarusian people have been known under most confusing and improper terminology in English as Byelorussians and White Russians. That terminology is incorrect and offensive to Bielarusian national pride, because it was taken from the Russian language and not the Bielarusian language. The Bielarusian Coordinating Committee of Chicago, Ill., has informed me that the people of their country prefer to be called Bielarusians and the country of their ancestry be called Bielarus.

Mr. Speaker, a statement on the occupation and oppression of Bielarus by Soviet Russia issued by the Bielarusian Coordinating Committee of Chicago, Ill., follows as well as a list of several resolutions passed last year by the Commemorative Assembly of the 62d Anniversary of the Declaration of Independence of Bielarus:

The date of March 25 is a symbol of national unity and solidarity of the Bielarusians in diaspora. It has been observed each year to give support and encouragement to Bielarusian people in their homeland controlled by Communist Moscow; to inform the Free World of the desires of the Bielarusian people in the Soviet Union to be free of Russian domination and control; and to seek sympathy, understanding and support for the Bielarusian freedom cause, and for the human, national, and social rights of the Bielarusian people among the friendly nations of the world.

Though one hears a lot about labor and social unrest and struggle for human and national rights in Poland, the people in Bielarus are not dormant in this respect either. One hardly hears about their activities because the country is hermetically isolated and the people have been living under more political restrictions and repressions. The most recent unrest, however, recorded in Bielarus was last June in Minsk when one hundred workers demonstrated their demands for improved working and living conditions and spoke in favor of organizing an independent workers union.

The Bielarusian Americans are well aware of the intolerable conditions in Soviet Bielarus today due to the Communist Russian control over the Bielarusian people.

RESOLUTIONS ADOPTED BY THE COMMEMORATIVE ASSEMBLY OF THE 62D ANNIVERSARY OF THE DECLARATION OF INDEPENDENCE OF BIELARUS

The Bielarusian Americans of Chicago, who have assembled this 30th day of March, A.D. 1980, at 2:00 p.m., at the Regency Inn, 5319 West Diversey Avenue in Chicago, to commemorate the 62d Anniversary of the Declaration of Independence of Bielarus (Byelorussia) have affirmed the following resolutions:

1. *Resolved,* That the Americans of Bielarusian descent and origin in Chicago support the President and the United States Government's policies pertaining to Afghanistan and the Summer Olympics in Moscow. Bielarus (Byelorussia) as one of the first preys of Communist Russian aggression and occupation in the 1920's is still occupied by Russia.

2. *Resolved,* That the Bielarusian Americans go on record of supporting our President and the United States Government in building a strong America morally, economically, physically, and militarily in order to achieve balance of power in the world.

3. *Resolved,* That this assembly petition our American Government to help a Bielarusian descendant Michal Kukabaka and others to obtain release from the Soviet prisons and to enable them to emigrate to any free country in the West.

4. *Resolved,* That we petition the Congress of the United States to provide funds for broadcasts in the Bielarusian langage over the Voice of America.

5. *Resolved,* That we petition the Congress of the United States to provide funds to expand broadcasts in the non-Russian languages over Radio Liberty, which is the only hope of truth to the Russian-enslaved non-Russian peoples in the Soviet Union.

6. *Resolved,* That we petition our Government to lend support to the cause of freedom and political independence for Bielarus in the same manner as it does to the cause of Poland, the Baltic States, Afghanistan and others.

Dated at Chicago, Illinois, this 30th day of March, A.D. 1980.

BIELARUSIAN COORDINATING COMMITTEE OF CHICAGO, ILLINOIS.

Mr. Speaker, I am honored to join Americans of Bielarusian heritage in Chicago and all over this Nation as they celebrate this 63d annivesary of Bielarusian independence and the nobel ideals of freedom. As Americans we must continue to work for the day when the courageous people of Bielarus can enjoy the the blessings of liberty and national self-determination.●

TOWARD A BETTER WORLD

HON. HAROLD C. HOLLENBECK

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. HOLLENBECK. Mr. Speaker, this year the American Jewish Committee celebrates its 75th anniversary. I would like to take this opportunity to acknowledge the accomplishments of this pioneer human relations organization.

The American Jewish Committee was founded in 1906 in response to a series of "pogroms" in Czarist Russia, in which thousands of Jews were left homeless. Recognizing that the anti-Semitism which promoted this persecution is intimately involved with the problems which affect all minority groups, the committee has since dedicated itself to the advancement of civil and human rights the world over. The AJC is representative of a people who have consistently struggled in order to maintain their religious and cultural identity. The periods of oppression which have clouded their history serve only to intensify the Jewish commitment to human freedom and dignity. In this tradition, the American Jewish Committee has become acutely aware of the need to develop mutual understanding among America's many different religious, racial, and ethnic groups.

For seven decades, the AJC has been a leader in the fight against bigotry

and discrimination in this country. As the committee works toward safeguarding the interests of the Jewish community, the scope of its activities and its goals reflects national concern. The AJC has worked to assure greater opportunities for jobs, housing, and schooling for all Americans. It has published a five-volume "Studies-In-Prejudice" series and has established a pioneering institute on pluralism and group identity aimed at depolarizing tensions between white ethnics and blacks. I applaud the humanitarian efforts of the American Jewish Committee in these directions.

The concerns of this unique human relations agency do not remain confined to our country's borders. The AJC helps mobilize world public opinion against manifestations of anti-Semitism in Arab lands, the Soviet Union, and other countries. It has supported the establishment of the democratic state of Israel and has consistently assisted Israel's efforts to safeguard her existence in the Middle East. In addition, the American Jewish Committee has supported the United Nations and other international efforts to advance human rights throughout the world.

I congratulate the AJC for its 75-year contribution to the field of human relations. Its work has been both a symbol of achievement and a symbol of hope. Much has already been done to advance the cause of human rights, yet the American Jewish Committee stands to remind us that if we continue to fight against social injustices, a better world awaits us. Needless to say, I intend to continue working with the committee to help make our mutual goals a reality.●

FACTS ON 10-5-3

HON. ANTHONY TOBY MOFFETT

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. MOFFETT. Mr. Speaker, most of us are familiar with the many arguments that can be made against the President's personal income tax cut proposal, otherwise known as the Kemp-Roth tax cut. But, so far, there has been a dangerous lack of discussion and debate over the President's proposal for a business tax cut, a slightly modified 10-5-3. Passing the President's 10-5-3 proposal without proper consideration of the consequences to both our tax code and our economic health would be extremely foolish. Consequently, I would like to take this opportunity to point out some interesting facts relating to the proposal.

First, although the 10-5-3 proposal is designed to increase investment in the United States as a way to improve our economic health, the latest Commerce Department statistics show that U.S. business investment in the last 5 years has already been at its highest level since World War II.

Second, a recent study by the International Monetary Fund shows that depreciation rates in the United States are already among the fastest in the world, and that passage of the 10-5-3 proposal would make U.S. writeoffs the fastest anywhere.

Third, while businesses continue to complain about excessive taxation, the effective corporate tax rate has steadily declined from 38 percent in 1954 to 29 percent in 1968 to 18.6 percent in 1978. And, the share of Federal revenues accounted for by corporate taxes has declined from 30 percent of Federal receipts in 1955 to 20 percent in 1969 and 13.9 percent in 1980.

Fourth, the 10-5-3 proposal would distort investment decisions by making the depreciation lifetimes of some items drastically shorter than their actual useful lives. In addition, since the 10-5-3 proposal would be phased in over 5 years, some business investment might actually be postponed in order to benefit from the increasing tax breaks.

Fifth, the 10-5-3 proposal offers a random, across-the-board approach to providing assistance to industries and businesses in the United States. It will not help the auto and steel industries which have no profits against which to take depreciation deductions, nor will it help many high-technology industries which already have as rapid, or more rapid, depreciation schedules. On the other hand, the 10-5-3 proposal will help some industries which do not need assistance, such as the communications industry.

Sixth, the 10-5-3 proposal is incredibly expensive. It will cut corporate taxes by $60 billion annually starting in 1986.

Seventh, under current rates of inflation, the 10-5-3 proposal, combined with the existing investment tax credit, would actually produce negative tax rates for many corporations. In effect, the Government would actually be paying the companies rather than taxing them.

I think that these facts speak for themselves. I hope that my colleagues on both sides of the aisle will look them over and give them some thought. There are alternatives to the 10-5-3 proposal, and the Congress would be negligent if it did not consider them, as well. I especially direct my colleagues attention to the first year capital recovery system proposed by Harvard professors, Dale Jorgensen and Alan Auerbach, which has been endorsed by, among others, the New York Times and Fortune magazine, and which Congressman HEFTEL has introduced as H.R. 2525. As its name implies, the Jorgensen-Auerbach proposal allows businesses to take their depreciation deduction for an investment all in its first year. The proposal also reduces the number of asset classes from the current 130 to approximately 30, and allows taxpayers to choose between the first year capital recovery system and the current system.

I believe that the first year capital recovery system proposal is superior to the 10-5-3 proposal for the following reasons:

First, the first year capital recovery system is completely neutral and consistent with the efficient allocation of capital. As mentioned before, 10-5-3 is not. The first year system provides depreciation deductions that match the actual decline in the real value of the assets invested in; and, since it provides the entire deduction in the first year, it is not affected by inflation. The 10-5-3 provides depreciation schedules which are far shorter than the actual useful lives of assets; and, depending on the inflation rate, distorts the tax rates accordingly.

Second, while the first year capital recovery system provides for the efficient allocation of capital, it still simplifies the current system of depreciation. According to the Congressional Research Service, the first year system would help make things easier primarily for smaller firms while the 10-5-3 proposal is more directed toward helping larger firms. Since smaller firms currently have the most difficulty dealing with the complexity of our existing depreciation law, the first year proposal seems like the better solution.

Third, since the first year capital recovery proposal allows businesses to take all of an asset's depreciation deduction in its first year, it gives a very strong, immediate incentive for increased business investment.

Fourth, as proposed in H.R. 2525, the first year capital recovery system would cost about the same as the 10-5-3 proposal during its first year, but cost far less in the long run. The first year system would allow us to balance the budget sooner than with 10-5-3, while still providing a strong incentive for new investment.

While I do not expect that my arguments here will persuade the House of Representatives to abandon the 10-5-3 proposal and quickly pass the Jorgensen-Auerbach first year capital recovery system alternative, I am hopeful that they will spark some new interest in more carefully analyzing the 10-5-3 proposal and taking a good look at some of the alternatives.●

ACCOMPLICE TO TERROR

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. OTTINGER. Mr. Speaker, I am including in today's RECORD an excellent article by Anthony Lewis concerning U.S. policy toward Argentina which appeared in the New York Times on March 22.

The Argentine Government has engaged in massive and brutal violations of human rights including kidnaping of thousands of citizens, many of them tortured and killed, many never heard from, many placed in Nazi-like prison camps. Yet the administration gave Argentina's President-designate, Gen. Roberto Viola, a warm welcome when he visited Washington last week, and indeed, issued statements praising Argentina for improving human rights. Despite the administration's praise, thousands of Argentines remain missing, imprisoned, and harassed. Our embrace of the Argentine Government sanctions its atrocious policies and makes us an accomplice to its terror.

Mr. Lewis makes an excellent point which I would like to stress to my colleagues: How can we condemn the Kremlin for repressing Soviet dissidents when at the same time we tolerate equal abuses from allies such as Argentina?

I commend Mr. Lewis' piece to the attention of my colleagues:

ACCOMPLICE TO TERROR

(By Anthony Lewis)

Boston, March 21—General Roberto Viola, Argentina's President-designate, has just visited Washington. By the warm welcome it gave him the Reagan Administration dramatically underlined its new human rights policy. That is to condemn "totalitarian" Communist regimes but avoid criticizing "authoritarian" governments of the right.

What does that political-science term "authoritarian" mean in practice? Argentina offers a case study of what it *can* mean. During the last five years thousands of Argentinians have been taken away by soldiers or police and disappeared forever. One who survived calls this up from his memory:

"When you're arrested and your initial interrogation is over, you are given the impression that you're being taken away to some lovely farm camp. Then the prisoners start to see, as I saw when I was arrested, policemen wearing Nazi emblems and walls with swastikas prominently displayed . . .

"There are a lot of things that are new and horrific in the Argentine terror, things that put it on a level with the Nazis in every way except sheer numbers. One is the disappearance of children and the horrible things they have done to children.

"Then there is this grotesque fact that the bodies do not appear. This is a very important thing in any civilization, part of human psychology. Depriving someone of a plot of earth they can go to is incredibly cruel and quite beyond me to understand."

Those statements were made in a quiet English voice. They came from Robert Cox, a British-born journalist who lived in Argentina for 20 years and became editor of The Buenos Aires Herald. He was arrested in 1977 and thinks he would have "disappeared" if the British Ambassador had not immediately protested. In 1979 unsigned notes threatened his family with death. Cox, his wife and five children left.

Robert Cox is now a Nieman Fellow at Harvard. He has not crusaded against the Argentine Government. He still loves Argentina and wants to go back. But he finally expressed his feelings on what has happened there in an interview with Stephen Kinzer of The Boston Globe. It is that interview that I quote.

"The way people respond to this situation is to deny it," Cox said. "The government simply dismisses the protests and hides behind cruel remarks about people who are 'absent forever.'

"I remember the absolute pain I felt when I realized what was happening and nobody would believe me or talk to me about it. They thought I was mad. It's like waking up in the morning and finding that one has been transformed into a beetle.

"To this day, very few people in Argentina know what has happened. Very few people care when their next-door neighbor is carried off. They make up some excuse, they pretend it's not happening."

Cox himself was reluctant to believe the truth about the disappearances. He knew the horrors of the urban guerrilla campaign that led to the right-wing reaction in Argentina and the military takeover in 1976. Then the disappearances began.

"I myself went on believing the Government explanations for a long time because I so much wanted to believe them . . . . I tried to tell myself that the whole problem was that the good guys in government who were appalled at what was happening were temporarily powerless to stop it. But the opportunities for moderates to clean this up have been so many that after a while an honest person has to stop making excuses for them."

There is still hope for Argentina, Cox said—if the truth is told. "The first thing is to face up to what has happened, and then to get rid of the criminal elements responsible." He expressed specific hopes for General Viola, who has said he will publish a list of persons the Government knows to have disappeared. "If he will only allow the story to be told," Cox said, "that will be a great step forward."

But it is quite a different thing, in Cox's view, for the United States to embrace the Argentine Government.

"The Government thinks it has brought the United States around to its point of view," Cox said. "Many of these generals in Argentina are laughing at the United States . . . . These are genuine neo-totalitarians who think the outcome of World War II was a great mistake. Hitler is not considered even morally reprehensible to the kind of people who control these operations."

Cox's deeply convincing words carry a lesson for U.S. human rights policy. The attempt to distinguish merely "authoritarian" regimes is pseudo-academic rubbish. There is a fair argument for coaxing harsh governments to improve instead of denouncing them. But there is no case for the United States to look as if it, too, is whitewashing the official terror that has existed in Argentina.

"What are you going to tell the Russians?" Cox asked. "The Soviet dissidents get much comfort from abroad, but they are not treated anywhere near as brutally as prisoners in Argentina. When you support this, you are an accomplice to terror."●

GREEK INDEPENDENCE DAY

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. BROOMFIELD. Mr. Speaker, March 25 marks the 152d anniversary of the signing of the Treaty of Adrianople which ended 400 years of Turkish domination over Greeks. I would like to extend to all Hellenes and Philhellenes my warmest wishes for your annual celebration of Greece's Independence Day.

The past year has been a significant one for United States-Greek relations. In April 1980, the United States and Greece signed the Agreement on Cooperation in the Fields of Science and Technology, Economics, and Education and Culture. This agreement promises to stimulate increased trade between our two countries, cultural exchanges, and enhanced cooperation in programs of mutual benefit such as renewable energy and earthquake hazards reduction.

In the fall of 1980, with the encouragement of General Rogers, Supreme Allied Commander, Europe, Greece reentered the integrated military command of NATO. Greece has thus once again assumed its rightful place in assuring critical Western interests in NATO's southern flank. The United States and Greece are now in the process of negotiating a defense cooperation agreement which will enhance the security of both nations. Many informed observers optimistically predict that this agreement will be concluded this spring, thereby further binding together the fate of the United States and Greece.

Thus, important strides have been made this past year in United States-Greek relations. Tragically, however, a solution to the Cyprus conflict has eluded us and that problem with its sad dimensions of human suffering continues. Therefore, a continuing significant U.S. aid program for Cyprus is important as a measure of our ongoing concern and our unwillingness to walk away from the Turkish problems that persist in that torn island. I feel that it is imperative for the Reagan administration to make a Cyprus settlement one of its highest priorities. I believe it will, unlike the Carter administration. A unified Cyprus without Turkish troops is a critical objective toward which we must work. Moreover, I am urging President Reagan to initiate policies that will maintain a military balance in the Eastern Mediterranean and preserve the security and integrity

of Greece. This balance should remain integral to our military aid program to the region.

Greek Independence Day is the occasion for great joy and celebration. This year, more than ever, we have cause for happiness in the steady improvement of United States-Greek relations and we can look forward to the resolution of outstanding differences. This, in turn, will enhance the security and freedom of both Greece and the United States in the future.●

SETTING THE RECORD STRAIGHT

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. SOLARZ. Mr. Speaker, one of our colleagues recently entered into the CONGRESSIONAL RECORD a copy of an Evans and Novak column that had appeared in the Washington Post attacking both the work of the Subcommittee on Africa and the behavior of Steve Weissman of the subcommittee staff. In order to set the record straight, I would like to call to my colleagues' attention a copy of Mr. Weissman's reply, which appeared in the following day's Post. I am confident that after reading Mr. Weissman's rebuttal, my colleagues will agree that Evans' and Novak's allegations are completely unfounded and, in fact, amount to little more than a pathetic parody of the vicious techniques associated with McCarthyism.

[From the Washington Post, Feb. 3, 1981]

"COMPLETELY OUT OF CONTEXT"

Perhaps, as Rowland Evans and Robert Novak maintain ["Still Going After the CIA," op-ed, Feb. 2], we are heading into a new era in foreign policy, but from the way they attack me in my role as staff associate with the House subcommittee on Africa, it looks as though they're trying to make their way back to the McCarthyist 1950s.

Disregarding information I provided them, Messrs. Evans and Novak fail to mention that my scholarly article on "The CIA and U.S. Policy in Zaire and Angola" was written specifically for Rene Lemarchand, editor of "American Policy Toward Southern Africa" and was subsequently published in the well-known academic journal Political Science Quarterly in Summer 1979. As for my giving permission to reprint this article to the editors of "Dirty Work 2," Messrs. Evans and Novak do not report that I immediately complained to the editors when I learned that an appendix purporting to identify CIA officials in Africa had been added to the book. Nor do they let their readers know that Mr. Evans specifically refused to call an editor I named to verify my story. Curiously, Messrs. Evans and Novak do not mention that others (including a prize-winning Africanist and Defense Department consultant and The New York Times) also gave reprint permissions to the editors of "Dirty Work 2"—perhaps under similar circumstances.

As for my alleged "informal" remarks critical of Zaire at the Africa Studies Association meeting in Philadelphia last November, Messrs. Evans and Novak failed to report that the meeting was a small academic panel in which I was a discussant concerning three scholarly papers on Zaire's economy, and they also misreport the audience as being "largely black" when it was overwhelmingly white. According to a tape recording of the meeting, their quotation of my comments is torn completely out of context and partially inaccurate. But Mr. Evans refused to try to verify my version by calling members of the panel whose names I gave him. He told me he simply "believed" his own source's notes and didn't need to check them out. Messrs. Evans and Novak also do not note that I prefaced all my comments with the caveat that my views were individual expressions, not those of the subcommittee on Africa or the House Foreign Affairs Committee. In any case, I said nothing inconsistent with the position of the subcommittee and full committee majorities, which have extensively and publicly debated the issue of Zaire before reducing military aid and maintaining economic assistance (with reform conditions) during the last session of Congress.

Finally, regarding the substance of Messrs. Evans and Novak's attack on the subcommittee on Africa, I cannot speak for the members of the subcommittee. But I would like to remind Messrs. Evans and Novak, that the subcommittee has been active in supporting Africa policies that are consistent with both our ideals and our national interests. The subcommittee led the way in upholding the Carter administration's successful policy of maintaining economic sanctions against Rhodesia until a peaceful transition to genuine majority rule was ensured. The subcommittee helped to increase economic aid to key countries in Africa at a moment when political stability risked being undercut by economic deterioration and a burgeoning refugee population. It also helped stimulate debate about how we can best protect our national interests in the escalating conflicts in the Horn and the western Sahara. In my view, it is these policies that represent a realistic and humane base for the development of U.S. Africa policy in the 1980s.

STEPHEN R. WEISSMAN.●

TOO FREE WITH OUR INFORMATION

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. DERWINSKI. Mr. Speaker, the Freedom of Information Act (FOIA) is nobly intended legislation designed to guarantee individuals access to records pertinent to the operations of the Federal Government. However, like many well intentioned legislative initiatives, the FOIA's implementation has resulted in problems unforeseen at the time of its adoption. I became acutely aware of one of these problems nearly 2 years ago. At that time, House Foreign Affairs Committee staff investigators, looking into the Jonestown tragedy, discovered that—

The legal recourse Jones and the People's Temple had under the Privacy Act and Freedom of Information Act to obtain Embassy cables had the chilling effect on Embassy personnel of making their communications to the State Department on People's Temple less candid than they might have otherwise been.

The alarming findings of this probe caused the State Department to conduct a global survey of its overseas missions to see whether these two acts were inhibiting candid reporting around the world.

The answer was that the Jonestown experience was not unique. In fact, the survey revealed that there was an "overwhelming consensus" among U.S. counselor officers that the Privacy Act has had a "chilling effect" on their ability to furnish Washington with insightful reporting on what was happening overseas.

The same survey also indicated that our diplomats overseas were seriously concerned about the failure of the FOIA to protect the identity of overseas contacts. As a result, many of our overseas intelligence sources are either clamming up or becoming extremely reluctant to continue their cooperation.

With that as backdrop, Mr. Speaker, I invite Members attention to the following article by Mr. Jack Valenti that appeared in the March 13 edition of the Washington Star:

TOO FREE WITH OUR INFORMATION

(By Jack Valenti)

I spent some time recently in Western Europe chatting with key European officials, including several in the intelligence services of Great Britain and France. They seem persistently nonplussed by peculiarities in the American spirit, centered mostly on our Freedom of Information (FOI) Act and the porous quality it confers on the FBI and the CIA.

As one foreign official put it to me, "I daresay none of my colleagues today would pass on the Americans sensitive data about the work of our operatives on the Continent—or even hint at anything which would identify agents we have in the field. It would be suicide for our people. It is already deadly to your own."

Another said, "How on earth can you possibly collect and hold intelligence which may slip into foul hands simply because someone you do not know writes in and asks for information? How you can have an intelligence organization that routinely gives away its files passes my understanding."

It isn't enough, they complain, that material extracted from the FBI and CIA with Freedom of Information requests is put through a sifter that supposedly culls out secret material. They point out that people are processing so many requests that human error makes it literally impossible to expunge all that is not designed to be made public. Slippage is inevitable—and when it happens, the irretrievable occurs.

The intent of the FOI Act is laudable. Light thrown on dark crannies of the government usually illuminates a good many practices that should be corrected. But a balance is required, say these Europeans.

CASUAL MADNESS

It is one thing, they point out, to probe the Department of Labor or Transportation for information, but to uncork the files of the FBI and the CIA is a kind of casual, and they hope momentary, madness.

The FBI received some 18,800 requests for information in 1979, and the CIA recorded some 14,000 requests since 1975. No one can be certain how many of the CIA requests come from foreign governments operating through cover names. And there is a difference between sending along a file of newspaper clippings, and parceling out documents with lines blacked out, with no one in the Agency quite certain that all that should be excised has been.

Most people would acknowledge that criminals, both organized and unorganized, are filing requests by the long ton to the FBI to learn what the feds may have on them that might be embarrassing or damaging—and to act on what they learn. Fragments of information are as valuable as the complete dossier.

Unhappily, some past events have convinced a good many people that the FBI and the CIA skulk about doing rude acts not counternanced by our own laws. Public suspicion about two enterprises, without whose vigilance we might be more anxious than we are now about our future security, stirs our unease.

In the war against terrorism in Europe, the intelligence services of the West Europeans find it necessary to foresee violent designs before they are hatched. The only known method to do that is to collect information so that if a design is forming it may be thwarted before it occurs—or at the very least to pick up the spoor of those sponsoring the skulduggery before they kill somebody.

AN INSTITUTIONALIZED LEAK

What the public doesn't know, and probably cannot know until it is too late, is how well our police and intelligence services are prepared to act before some violent deed is done. We have so institutionalized the "leak" in this country that nothing is truly safe from prying eyes. Granted that we may too often stamp Top Secret on a formula for dried milk; granted also that much of what is delivered to someone asking for information is valueless. But it is nonetheless true that in handling literally thousands of requests, brief lapses in scrutiny run throughout the whole costly process.

It is not the cost of handling these requests that should cause us concern. It is the disposition of crucial material, often collected at great risk from sources who believe it is sacrosanct, who suddenly discover to their horror and fear that it is not. All of which causes our colleagues in Europe to shake their heads.

This unease among our friends is not evidence of paranoia. As William Burroughs put it, "A paranoid is a man in possession of all the facts."

The work of the FBI and the CIA is by nature shadowy. But they labor to ensure the security of the nation. Most Americans assume that work is going forward with dispatch, skill and diligence. But many European friends of this country are queasy not so much about the quality of the labor, but of the impermanence of its safety.

One can only pray that the Congress and its oversight committees can figure out some common-sense balance which places off-limits sensitive information which is now leaked or routinely given away. There is legitimacy in the phrase "national security information."●

A TRIBUTE TO WILLIAM F. WILLIS

HON. ANTHONY TOBY MOFFETT

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. MOFFETT. Mr. Speaker, I want to take a brief moment today to pay special tribute to one of my State's dedicated public servants.

William F. Willis, who leaves my staff this month after 6 years of uninterrupted service, has served well the people of Connecticut's Sixth Congressional District.

Bill Willis is, to paraphrase the author Joseph Conrad, a great foe of favoritism in public or private life. As a consumer advocate, as a caseworker, as director of my congressional outreach program, and finally as my district coordinator, Bill never asked "What's in it for me?" Nor did he ask a person's personal or political convictions before offering his help.

Although this young man is not originally from the State of Connecticut, he has adopted it as his owe. And the people of Connecticut have responsed in kind.

I expect he will remain quite active in the public affairs of our State. He is a kind, caring, giving human being; he has a bright future.

Bill Willis has been both a reliable worker and, more importantly, a reliable friend. We all owe him a debt of gratitude.●

OIL SHALE LEASING

HON. DAN MARRIOTT

OF UTAH

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. MARRIOTT. Mr. Speaker, on January 28, 1981, I introduced H.R. 1409, a bill to amend the oil shale provisions, section 21, of the Mineral Leasing Act of 1920. That bill will authorize the Secretary of the Interior to issue additional leases to oil shale lessees where more land is needed for operations incident and crucial to the actual mining of oil shale, such as the disposal of spent shale and location of processing facilities. I introduced that bill early in this Congress, as I did early last year, because it will go a long way toward resolving an urgent problem which requires an immediate Federal legislative solution. The inability to acquire rights to additional Federal land has tied up the technologically significant, experimental efforts to develop oil shale as a viable oil producing resource being made by those holding Federal oil shale leases under the Federal prototype program in Colorado. Delay in addressing this problem is delaying the development of our oil production potential at a time when we clearly have a need to offset oil imports with domestic production.

Today I am introducing another oil shale bill which contains the same provision for offsite leasing as H.R. 1409 but which in addition addresses the long-term legal impediments to development of our full oil shale potential. It addresses five problems:

First, the acreage limitation on leases;

Second, the limitation on the number of leases a person is permitted to hold;

Third, leasing of fringe acreage to avoid bypass of oil shale deposits during mining;

Fourth, leasing of minerals other than oil shale within an oil shale lease tract; and

Fifth, leasing additional lands for operations connected with oil shale mining.

The bill I am introducing today will retain 5,120 acres as the standard size of a Federal oil shale lease but will permit the Secretary to increase the amount of acreage that can be included in an oil shale lease when he determines that a larger area is required to permit long-term commercial operations. This provision is necessary to permit the development of oil shale in Utah and Wyoming because the geologic occurrence of oil shale in these States is not capable of economic development under the current acreage limitation.

The actual tract size needed for long-term commercial operations is left to the Secretary's discretion as a determination which he alone is specially qualified to make through a reasonable leasing process. Discretion to make this determination is given the Secretary because oil shale mining and processing technology is in its infancy and any attempt to set maximum acreage limitations in legislation with our limited knowledge of the occurrence of the resource in any one tract and the economics of its development for any period of time second-guesses and may possibly predetermine its development. Such a limitation on acreage, if written as a flat number, may require additional amendment of the act in a few years; if written in terms of geologic occurrence and oil yield, the additional administrative burden of conducting exploratory operations on the prospective lease tract may fall on the Secretary.

Second, my bill will increase the number of oil shale leases which one person, corporation, or association may hold from the current one lease limitation to two leases per State and four nationwide. This provision will fa-

cilitate the growth of oil shale mining and processing technology by permitting mining companies to experiment with it under differing conditions and to benefit by the advances they make in this regard. The benefits derived from this expected growth in technology and increased recovery of oil from shale will be further used to advantage by permitting a lessee to acquire one additional lease in any State where it has achieved production in commercial quantities on its existing leases in the State and is within 10 years of exhausting the commercially recoverable reserves on one of the existing leases.

Third, this bill will authorize the Secretary to lease additional acreage to avoid the bypass of small acreages of Federal oil shale resources which could not otherwise be mined economically. This provision simply makes good sense as a sound conservation measure.

Fourth, the bill will authorize the Secretary to permit an oil shale lessee to mine other minerals within the oil shale lease tract, under conditions which he may prescribe, notwithstanding any other provision of the Mineral Leasing Act of 1920. Other minerals, such as dawsonite and nahcolite, are frequently found in conjunction with oil shale and this provision would merely facilitate the Secretary's exercise of his existing authority to issue leases for multimineral development.

Finally, as I have indicated, this bill contains provisions identical to those in H.R. 1409 to accommodate the additional land requirements pertaining to the extraction and processing of oil shale from the lease tract which is to be mined. It contains a 6,400-acre limitation and other provisions designed to insure the tract is genuinely needed and will be used in accordance with the purposes for which it is issued in an environmentally proper manner. With an eye to the future, it does not limit the issuance of leases for additional acreage in support of leases issued prior to any specified time, thereby refraining from limiting the provision's application to any particular leasing program.

In addition, the bill will amend section 29(e) of the Mineral Leasing Act to bring the aggregate lease acreage limitation language in line with the aggregate lease holding limitation set for oil shale.

The bill I am introducing today is written in clear language and is designed to remove legislative impediments to oil shale development while preventing the creation of new administrative hurdles. The bill will clear the way for the Secretary to proceed with a prototype program or to introduce a permanent program according to his assessment of the potential for oil shale production in light of technological and economic factors as well as natural conditions. In short, this bill points the way toward the future when once again our Nation will be able to rely on domestic sources of supply to meet our energy needs.●

SAVINGS AND INVESTMENT

HON. RICHARD C. SHELBY

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. SHELBY. Mr. Speaker, during my tenure in Congress, I have become increasingly distressed by our Nation's dismal rate of savings and investment. We save only 5 percent of our disposable income compared with 11 percent for Canadians, 16 percent for West Germans and over 20 percent for Japanese. A partial explanation for this is that the United States is the only major industrial nation that penalizes saving. Only by making the fruits of savings and investment more attractive can our Nation hope to encourage additional investments which will create the tools necessary to increase production, lower interest rates, stimulate the real estate market, and decrease the ranks of the unemployed who now depend on government assistance.

In order to encourage additional savings and investment, I have introduced a measure to increase the exclusion for dividends and interest to a meaningful amount from its present $200 per person limit. Specifically, my bill amends the Internal Revenue Code to provide for an exclusion from gross income for dividends and interest of up to $1,000—$2,000 when filing a joint return—and to make such exclusion permanent. Also, my bill provides for an additional exclusion of 50 percent of dividends and interest in excess of $1,000 and up to $5,000—$10,000 when filing a joint return.

An infusion of additional savings and investment could very well be the antidote to high inflation, perpetual trade deficits, and low productivity. If we do not pay more attention to savings and investment and provide the proper incentives, we will be unable to make available the much needed new sources of capital. We will then continue to be inclined toward immediate gratification and overconsumption, and inflation will continue to erode the value of our savings so rapidly that we are discouraged from saving. Consequently, we will continue to slowly erode the foundation on which our economy rests●

TAX INCENTIVES FOR SAVING

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. WEISS. Mr. Speaker, the U.S. personal savings rate has been declining steadily since 1973 and is now the lowest of any major industrialized country. Perhaps the primary reason for the low saving rate is high inflation. But this problem is aggravated by our tax system which especially penalizes lower income taxpayers from being thrifty. It is these persons who are most severely strapped as inflation drives up the cost of the necessities of life such as housing and food. Then, by taxing the interest that these persons earn on their small amount of savings, the Government only adds to their economic burden and, in fact, discourages them from saving at all.

In recent years the rate of inflation has often exceeded the interest rate on savings accounts. As a result, savings not only do not produce real income for the savers, but the value of the principle is reduced as well. This is a cruel result for people whose low income makes it especially difficult to save in the first place.

Recognizing this inequity in our tax system, we attached a provision to Public Law 96-223, the windfall profit tax legislation, to provide a temporary $200 to $400 interest and dividend tax exclusion. This measure must be made permanent if we are to have any real impact on shoring up savings institutions. I am, therefore, today introducing legislation similar to legislation I introduced in the 96th Congress, which would permanently exempt from income taxes part of the savings interest earned by lower incomed persons. The bill would exempt from taxes up to $1,000 in the case of a single individual—whose adjusted gross income does not exceed $10,000—up to $1,500 in the case of a married person filing jointly—whose income does not exceed $15,000—and up to $750 in the case of a married person filing separately—whose income does not exceed $7,500.

By this exemption, savings that lower income persons painstakingly accumulate can be protected. When they set aside money for a rainy day, to provide for their retirement, or to educate their children, they can do so with some confidence that the value of their savings will not be lost to inflation and taxes.

A successful savings incentive program could increase the amount of capital available for investment and thus make possible higher levels of spending for plant and equipment, housing construction, research and development, and other capital needs. It

could contribute to higher productivity gains, relieve pressures on existing capital markets, and help solve our housing shortages in the years ahead.

The cost of this bill would not be great. It would exempt only a small portion of the total taxable income, and the exemption would be effectively targeted to the lower income persons who require this relief most. These persons generally cannot benefit from more lucrative types of investments available to more affluent people, or from other provisions of the tax code that shelter income.

A copy of the bill follows:

H.R. —

A bill to amend the Internal Revenue Code of 1954 to increase to $1,000 the amount of interest paid by financial institutions which may be excluded from gross income by individuals and to make such exclusion permanent

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) paragraph (1) of section 116(b) of the Internal Revenue Code of 1954 (relating to maximum dollar amount of dividends and interest excludable from gross income) is amended to read as follows:

"(1) MAXIMUM DOLLAR AMOUNT.—

"(A) INTEREST PAID BY FINANCIAL INSTITUTIONS.—

"(i) IN GENERAL.—The aggregate amount of interest described in subparagraph (A) or (B) of subsection (c)(1) which may be excluded under subsection (a) for any taxable year shall not exceed—

"(I) $1,000 in the case of a single individual,

"(II) $1,500 in the case of a joint return under section 6013, and

"(III) $750 in the case of a married individual filing a separate return.

"(ii) ADJUSTED GROSS INCOME LIMITATION.—If the adjusted gross income of the taxpayer for the taxable year exceeds—

"(I) $10,000 in the case of a single individual,

"(II) $15,000 in the case of a joint return under section 6013, and

"(III) $7,500 in the case of a married individual filing a separate return,

the applicable limitation under clause (i) shall be reduced by $1 for each $1 of the excess of the adjusted gross income of the taxpayer over $10,000, $15,000, or $7,500, as the case may be.

"(B) INTEREST NOT PAID BY FINANCIAL INSTITUTIONS AND DIVIDENDS.—The aggregate amount of—

"(i) dividends, and

"(ii) interest to which subparagraph (A) does not apply,

excluded under subsection (a) for any taxable year shall not exceed $200 ($400 in the case of a joint return under section 6013)."

(b) Subsection (c) of section 404 of the Crude Oil Windfall Profit Tax Act of 1980 (relating to effective date for exemption of certain interest income from tax) is amended by striking out ", and before January 1, 1983".

(c) The amendment made by subsection (a) shall apply to interest received in taxable years ending after the date of the enactment of this Act.●

INCREASE AMOUNT AUTHORIZED TO BE APPROPRIATED AS THE ANNUAL FEDERAL PAYMENT TO THE DISTRICT OF COLUMBIA

HON. RONALD V. DELLUMS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. DELLUMS. Mr. Speaker, I am pleased today to introduce legislation which would amend section 502 of the District of Columbia Self-Government and Governmental Reorganization Act of 1973 (Public Law 93-198, Dec. 24, 1973) to increase the amount authorized to be appropriated as the annual Federal payment to the District of Columbia from $300 million to $336.6 million for the fiscal year ending September 30, 1982, and each fiscal year thereafter.

Under current law, the annual authorized Federal payment ceiling is $300 million and has been this amount for the past 4 years, during which period the consumer price index has risen 45 percent.

The purpose of the Federal payment is to compensate the District of Columbia for services provided to the Federal Government and revenues denied the District of Columbia by Federal law as a means of preserving certain Federal interests in the Nation's Capital.

The Federal payment comprises approximately 20 percent of the District's operating budget. The balance is raised through local taxes and fees.

President Carter proposed an authorization of $317 million in his fiscal year 1981 budget. That amount was reported by this committee. This bill would authorize, for fiscal year 1982, the $336.6 amount recommended in both the Carter and Reagan budgets.●

NATIONAL WILDLIFE WEEK FOCUSES ON OUR OCEANS

HON. EDWIN B. FORSYTHE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 18, 1981

● Mr. FORSYTHE. Mr. Speaker, the National Wildlife Federation this year chose as its theme for National Wildlife Week "We Care About Oceans."

The oceans cover two-thirds of our world and are home to about 90 percent of the life on Earth. The oceans may well be our most important natural resource. We already depend on the oceans to provide tons of our food supply each year, as well as the majority of our water supply and about half of our oxygen supply. We know very little about the oceans, despite our dependence on them and the fact that our dependence is growing. We are now looking to the oceans to provide us with additional food supplies and mineral and organic compounds. And, within the next 20 years, it is projected that 75 percent of the residents of the United States will live within 50 miles of one or another of our sea coasts.

As a result, we will find our oceans more endangered than they have been in the past. We already for years have been using our oceans as dumping grounds for sewage, sludge, oil, pesticides, toxic metals and radioactive compounds. We have been careless of our oceans and we can no longer afford to be so. Happily, in recent years we have made some progress toward reversing these practices, but we must diligently continue our efforts.

My work on the House Merchant Marine and Fisheries Committee and the Select Committee on the Outer Continental Shelf, as well as the fact that a part of my congressional district borders on the Atlantic Ocean, has clearly shown me how important and fragile are our oceans. We will be making some difficult choices in the years ahead about how this resource should be used and how it will be protected. As the 1980 receipient of the National Wildlife Federation's Congressman of the Year Award, I want to thank the National Wildlife Federation for helping to focus public attention on the oceans. We will all benefit from the resulting public discussion.●

ALEXANDER M. PYRRHUS

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday. March 25, 1981

● Mr. STARK. Mr. Speaker, I would like to bring to the attention of my colleagues the following article on El Salvador from the New York Times.

Last year, the violence in El Salvador resulted in the senseless killing of more than 10,000 people. In the new year the death toll is still climbing.

The violence in El Salvador is a reaction to a legacy of historical oppression. The problems are deep rooted and will not be eliminated by strong arm tactics. If we are to avoid repeating past mistakes it is crucial to develop a policy toward El Salvador that does not rely on military solutions, but instead encourages more democratic alternatives such as the land reform programs.

I strongly urge my colleagues to read this article and carefully consider the repercussions of future policy decisions for El Salvador.

ALEXANDER M. PYRRHUS

(By Anthony Lewis)

WASHINGTON.—With an insistence bordering on obsession, Secretary of State Haig has focused his weeks in office on the Communist menace in El Salvador. One would think that El Salvador presented the gravest current threat to American security, that Communists were the main reason for its misery and that U.S. arms were a likely cure. But those propositions are all false.

El Salvador is a tiny country distinguished by a particularly brutal history of economic repression. An oligarchy has owned the land for a century and used the armed forces to keep the peasants in subjection. What is going on now is the result of that system and the inevitable desire to change it.

In October 1979 a mixed civilian-military junta began reforms. But right-wing military elements gradually reasserted their influence, and there were growing numbers of political murders. Most of the civilian politicians went into opposition. Last year the six leading opposition figures were murdered, as was a principal Catholic critic of the regime, Archbishop Romero.

Those are the circumstances—undisputed among U.S. analysts—that gave rise to the guerrilla movement in El Salvador. Politicians of the democratic left and the Christian Democratic center are in the movement along with Marxists. It is not an external Communist invention. And the guerrillas do not do most of the killing.

"The chief killer of Salvadorans is the Government security forces." Robert White, the former U.S. Ambassador, said that in Congressional testimony; and here again American experts generally agree. Last year the Government forces killed at least 6,000 people, a large proportion of them innocent civilians.

A gruesome example of the slaughter was described in The [London] Sunday Times of Feb. 22: a massacre of nearly 300 peasant refugees last May 14 in a primitive settlement near the Honduran border. Soldiers shot women and slashed children with machetes. The story was told by a Capuchin priest, Father Earl Gallagher of Brooklyn.

Secretary Haig's solution for all this is to demand that Cuba and Nicaragua stop sending weapons to the guerrillas, and to help El Salvador's forces with U.S. weapons and advisers—just training officers, he says. Haig has decided, as Senator Charles Percy approvingly put it, that El Salvador "is the place to draw the line."

What Haig and the Reagan Administration obviously want is a victory over "Communism." It is hard to advance the security of the West in places that really matter, such as the Persian Gulf. So El Salvador is it.

That kind of "victory" may well be attainable. The Soviets have shown no desire for a military competition in the United States' back yard. An advertised El Salvador guerrilla offensive recently failed. The Nicaraguan Government will probably not want to endanger its economic relations with Washington—or, worse yet, risk a destabilization campaign against itself.

But what a victory it will be. The people of El Salvador will not win. The U.S. effort will strengthen their principal terrorizers, the security forces. The real political problems of the country, the sources of instability, will remain unsolved.

And it is likely to be a political disaster for the United States as well. This country will have identified itself with the gangster elements in El Salvador. Our new military equipment will inevitably be used, Ambassador White told Congress, to "assassinate and kill in a totally uncontrolled way. Do you want to associate yourself with this kind of killing?"

The policy is also likely to offend our allies. West Germany last week broke with the U.S. line by endorsing efforts at political mediation between the El Salvador Government and the opposition. The French Foreign Minister, Jean Francois-Poncet, visiting Washington, combined a condemnation of Cuban arms with the comment that the problem would not be solved by "purely military means. I think everyone recognizes that reforms have to be introduced."

Worse yet is the effect on relations with Mexico. A sensible policy would have encouraged Mexico to assume a regional responsibility on El Salvador. What has been done left President López Portillo no political choice but to criticize. "We are sure," he said, "that a military solution is not viable and that only a political solution will restore peace to the region."

There is a particular irony in the Haig policy. Reagan ideologues such as Jeane Kirkpatrick criticize past U.S. efforts to reform other governments; we are not wise enough to do that, they argue. But it is just as much American intervention to say that the status quo is best for another country and must be maintained, however bloody the cost to that country. Moreover, right-wing Salvadoran exiles in Miami are supporting the death squads; what is the United States doing about that intervention?

A Reagan Administration spokesman said the other day that the opposition in El Salvador should have used political means rather than resorting to violence. That is the advice to people whose leaders were murdered. It is right to try to stop the violence, but the way to do that is not to give unlimited support to those who are doing most of the killing.●

ON DEFINING NATIONAL SECURITY

HON. JONATHAN B. BINGHAM

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. BINGHAM. Mr. Speaker, in the Los Angeles Times of March 20, Gerald Warburg writes that the "pursuit of a narrowly defined vision of national security is likely to produce a security foundation that is shaky and untenable over the long run." Specifically, Mr. Warburg argues that the United States must not abandon its nuclear nonproliferation, human rights, and foreign assistance policies as do-gooder policies but should rather recognize them as key elements in our national security.

Gerald Warburg is a foreign policy analyst in the U.S. Senate. Formerly he served as my legislative assistant and performed remarkable service in the drafting of the Nuclear Nonproliferation Act of 1978.

The article follows:

NATIONAL SECURITY IS GREAT, BUT WHAT DOES IT MEAN?

(By Gerald Warburg)

"National security" is one of those dangerous political buzzwords. Everyone seems to be for it. Yet many approach its achievement with such divergent definitions that consensus breaks down and policies advanced in its name become counter-productive.

Those who interpret "national security" with narrowed vision—for example, by measuring strength primarily in term of nuclear megatonnage in the belief that more firepower equals more security—produce especially counterproductive policies.

This limited perspective on how best to improve national security is much in vogue today in Washington as the Reagan Administration takes shape. But there are serious dangers inherent in this approach. The pursuit of a narrowly defined vision of national security is likely to produce a security foundation that is shaky and untenable over the long run.

Take foreign aid, for example. Among its chief critics are outspoken advocates of massive increases in the Pentagon's budget, which they would finance in part through deep cuts in the foreign-aid budget. But such cuts could cripple the ability of the United States to use aid as an effective tool of diplomacy, to compete for influence against nations hostile to our interests, and to maintain controlling positions in key international development institutions.

Proponents of massive cuts in foreign aid also ignore the extent to which issues that are basic to the global human condition—hunger, overpopulation, depletion of natural resources and degradation of the environment—affect our security as a nation.

Another example of the way a narrow approach to the enhancement of national security harms our long-term interest can be found in the application of our human-rights policies.

Many members of the Reagan team cite the revolutions in Nicaragua and Iran as evidence of an American failure to place "realistic" security interests ahead of "sentimental" human-right concerns in our bilateral relations. Such critics allege that U.S. agitation for social reform in these countries undermined proven allies and was responsible for the decline of American influence.

But, in fact, the rise to power in Nicaragua and Iran of regimes hostile to U.S. interests is more accurately attributable to the failure of Anastasio Somoza and Mohammad Reza Pahlavi to promote meaningful political, social and economic reforms. The narrow approach of the U.S. government over many years led us to fully back these right-wing dictators until crisis was at hand; then it was too late, and our influence was too little. Radicals like the Ayatollah Ruhollah Khomeini and the Sandinistas became the only popular alternatives to continued right-wing repression.

Thus, the ultimate result of decades of supposedly "realistic" U.S. policies toward Iran and Nicaragua was the rise to power of even more repressive regimes, bitterly hostile to the United States. We have seen Iran, once our key ally in the crucial Persian Gulf region, sponsoring terrorism against our diplomats, and our one-time friend Nicaragua aiding and abetting terrorism in El Salvador.

Enduring U.S. identification with the abuses of the previous regimes and our failure to consistently press for social reform in

these countries have compromised our long-term security interests.

Challenges analogous to those that we faced in Iran and Nicaragua lie immediately ahead in nations such as the Phillippines and South Korea, where loyal democratic opposition forces are being radicalized by continued repression. Our long-term national-security interests argue for encouragement of meaningful reform and moderation in these vital countries, and argue against unqualified support of the status quo.

Unfortunately, the Reagan Administration has clearly stated its intention to reduce our commitment to human rights, preferring to focus on "international terrorism."

Indeed, terrorism presents a serious threat to our security. But here again a broad definition of our national-security interests is essential if we are to address the problem with any success.

The most critical danger that terrorism currently poses to the U.S. derives not so much from radical subnational groups that threaten our allies, such as the Palestine Liberation Organization or the Red Brigades in Italy. Much more ominous is the spread of "state terrorism"—the use of terrorist tactics by outlaw nations as a means of advancing their extremist goals.

There is grave danger that unstable nations such as Libya, Iraq and Pakistan will succeed in obtaining nuclear weapons. And, if they do succeed, it may well be because of the failure of key European friends of the United States (including France, Italy and Switzerland) to respect basic nuclear-nonproliferation principles and to restrict sensitive nuclear sales to these countries.

It is thus essential for the new Administration to approach anti-terrorism with a broad perspective. Nuclear nonproliferation efforts, like human rights and foreign assistance, must not be abandoned by those who view these as "do-gooder" policies but who fail to recognize their national-security implications. Realism and sensitivity to our selfish security interests require that such efforts be continued and expanded.

Finally, it should be noted that these causes should also be advanced for reasons of basic morality and national responsibility. What higher goals can there be for our government than to protect the rights and security of individuals, to combat torture and nuclear terrorism, and to help feed the starving?

This nation recently experienced an extraordinary celebration of freedom as we welcomed the 52 Americans home from Iran. Surely this was, in part, a national reassertion of our will to defend the values for which we as a people stand—including the human right of freedom. As we strive in the months ahead to achieve consensus on policies that will make us a more secure nation. We would do well to remember this, and to acknowledge that there is more to national security than soldiers and weapons.

THE 63D ANNIVERSARY OF BYELORUSSIAN INDEPENDENCE

HON. HAROLD C. HOLLENBECK

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. HOLLENBECK. Mr. Speaker, on March 25, 63 years ago, the people of Byelorussia proclaimed their independence from czarist Russia and declared the Byelorussian Democratic Republic as a sovereign state. I would like to take this opportunity to join with my distinguished colleagues in recognizing this special anniversary which symbolizes the attempts of a proud and courageous people to shape their own destiny.

This period of independence and freedom was short-lived for the Byelorussian people. Shortly afterwards, their beloved country fell victim to Soviet expansionism and a reinstitution of Soviet authority. The Byelorussian people must now struggle to maintain the most basic of human rights under the hardships repeatedly imposed by the Soviet regime. Yet a determination to once again secure their ultimate goal of independence has kept the Byelorussian people persistent in their struggle to break the heavy bond of Soviet domination. The United States is solemnly committed to supporting the efforts of the Byelorussian people toward this end.

I only hope for that day in the near future when we will be celebrating the rebirth of an independent nation—the Byelorussian Democratic Republic—and the termination of an era of subjugation.●

ADDITIONAL OBSERVATIONS ON PRESIDENT REAGAN'S ECONOMIC PROGRAM

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington Report for Wednesday, March 25, 1981, into the CONGRESSIONAL RECORD:

Now that President Reagan's budgetary revisions have been formally presented to Congress, a few additional observations on his economic program are in order.

1. The President's budgetary figures only emphasize how hard it is to bring federal spending under control. Even if Mr. Reagan's proposals were approved without change, spending would increase from $695 billion in 1982 to $912 billion in 1986, a rise of 31.2%. His cuts would slow, but not stop, the hemorrhaging of the budget. In my view, there will be continued potential for explosive growth in federal expenditures unless the indexation of benefits is attacked directly.

2. The President will have popular support for "workfare," his plan to make work a condition of eligibility for welfare. If Congress approved, recipients of welfare would have to work at least 20 hours per week in order to receive benefits. The elderly, the incapacitated, those who receive benefits because their wages are so low, and those with teenagers in high school or young children in the home would be exempt from the requirement of work.

3. The President's five-year budgetary projections leave no room for several appealing tax reforms. Among the reforms left out are an easing of the tax penalty paid by married people, a tax credit for tuition, the indexation of taxes to inflation, an easing of taxes on the inheritance of family-owned farms and businesses, and a tax exemption for the interest earned on savings accounts. Many taxpayers prefer these reforms to Mr. Reagan's tax recommendations (a cut of 10% across the board for individuals and a more liberal schedule of depreciation for business).

4. The President hopes to redistribute income through tax breaks favoring the well-to-do. His proposals would provide great relief for upper-income taxpayers but much less for middle- and lower-income taxpayers. For example, a family with an income of $200,000 per year would keep nearly $11,000 that it now pays in taxes. In contrast, a family with an income of $20,000 per year would keep less than $600. Despite the fact that their income is only 10 times larger, those who make $100,000 per year would get a tax cut 63 times larger than those who make $10,000 per year. Because of inflation, the typical American family would end up shouldering about the same tax burden it carries today.

5. The President proposes to cut spending for federal programs designed to help the poorest people. Middle-class Americans would fare pretty well. The so-called "safety net" of programs (social security, basic unemployment compensation, veterans' initiatives, and so on), only 6% of whose benefits are distributed on account of the recipient's poverty, would remain essentially intact. The poorest Americans, however, would not fare so well. Mr. Reagan wants to trim by billions of dollars the amount the federal government spends for them on health care, jobs, income maintenance, food, and legal services.

6. Congress is not certain how or when the President would implement his proposals to cut federal spending. A key element in his strategy is the consolidation of many smaller "categorical" grants now controlled by the federal government into a few larger "block" grants to be controlled by the states. The block grants would receive about three-quarters the funding of the categorical grants they replaced. Mr. Reagan has not sent the legislation needed for such changes to Capitol Hill, so his intentions are quite unclear to legislators.

7. The President's outlook for the economy is much more optimistic than that of the major private forecasters. His key assumption is that he can roll back inflation while the economy is expanding rapidly. For example, he projects economic growth at 5.2% and inflation at 8.3% in 1982. The most optimistic figures of private forecasters are quite different: 3.6% and 9.7%, respectively. Mr. Reagan also believes that he will have a budgetary surplus of $500 million in 1984. To create such a surplus, he must have both accurate economic assumptions and "unspecified savings" of $30 billion in 1983 and $45 billion in 1984. If the assumptions are inaccurate or the savings are not achieved, he will run a large deficit.

8. The President stresses military needs over domestic ones. In fact, the sharp increases in the military budget, combined with big cuts in domestic spending, signal a reversal of national priorities. Mr. Reagan believes that the United States must strengthen its defenses in the face of new threats to peace and global stability. His complaint is not that previous budgets omitted crucial defense programs, but rather that full funding was not provided for them. I agree that the United States must boost

military spending, but an increase as large and scheduled to proceed as fast as the President's should be examined carefully in Congress.

9. The President also stresses the doctrine of states' rights as the guiding principle of intergovernmental relations. This, too, signals a shift in national priorities. Mr. Reagan is showing his allegiance to that principle by recommending smaller federal social programs, block grants in place of categorical grants, and a smaller federal work force. He is studying new ways to curb federal influence over state and local governments.●

POST OFFICE DEPARTMENT

HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. HUBBARD. Mr. Speaker, with the recent increase in first-class postage, I believe it is time to heed the sentiments of people whose lives are affected by the Postal Service's decisions. I wish to share with my colleagues a letter from Mr. Charlie Beach, Jr., president, Peoples Exchange Bank, Beattyville, Ky. Mr. Speaker, I submit the following:

Being the largest first class mailer in Lee County, I wish to register a very strong protest for the first class mail increase to 18¢.

I continue to be appalled at the volume of junk mail which clutters up our normal course of business and consumes our time as we attempt to sort and dispose of it.

I do not perceive the postal department to be a sacred cow, and United Parcel Service has shown that a private industry can handle parcel post. I am fully aware that the postal department is the greatest supporter of junk mail, for it creates a volume and creates "make work."

I strongly solicit your support for equalizing the cost rather than having first class mail subsidize all other types of mail.

Your consideration is greatly appreciated.●

FIRST CONGRESS OF THE INTERNATIONAL PHYSICIANS FOR THE PREVENTION OF NUCLEAR WAR

HON. HAMILTON FISH, JR.

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. FISH. Mr. Speaker, on March 20–24, 1981, an extraordinary event took place near Washington. Over 70 physicians representing 11 countries, including the United States, the Soviet Union, Great Britain, France, Japan, the Netherlands, and Israel, spent 4 days discussing the medical and environmental consequences of nuclear war, and what they, as physicians and respected members of their communities, could do to prevent a nuclear conflict.

Eleven representatives of this meeting were kind enough to meet with several Members of Congress and Senators yesterday to summarize the results of their deliberations. I was most impressed by the showing of unanimity by the physicians in setting forth their views on the predictable and unpredictable effects of nuclear war, the role of physicians in the postattack period, the social, economic, and psychological costs of the nuclear arms race as related to health needs, and what physicians can do to prevent nuclear war. Over the next several days I will be reprinting for my colleagues the statements of the International Physicians Congress on these vital issues.

Perhaps the most important achievement of the meeting are the following letters to President Reagan and Chairman Brezhnev, a letter to the heads of all governments and an appeal to the United Nations, and an appeal to the physicians of the world that elimination of nuclear weapons be given the highest priority in order to remove what the physicians view as the true great threat to world health. I strongly urge my colleagues to consider the views of the International Physicians carefully, as the consensus of this First Congress is an unprecedented event.

The material follows:

AIRLIE, VA. *March 23, 1981.*

AN APPEAL TO THE PRESIDENT OF THE UNITED STATES OF AMERICA, RONALD REAGAN, AND TO THE CHAIRMAN OF THE PRESIDIUM OF THE U.S.S.R. SUPREME SOVIET, LEONID BREZHNEV

We, physicians from eleven nations, guided by our concern for human life and health, are well aware of the great responsibility you carry and of the enormous contribution you can make to the prevention of nuclear war.

As physicians and scientists, we have for the past several days reviewed the data on the nature and magnitude of the effects that the use of nuclear weapons would bring. We have considered independently prepared medical and scientific analyses from many sources. Our unanimous conclusions are:

(1) Nuclear war would be a catastrophe with medical consequences of enormous magnitude and duration for both involved and uninvolved nations.

(2) The holocaust would in its very beginning kill tens to hundreds of millions of people. Most of the immediate survivors, suffering from wounds and burns, affected by nuclear radiation, deprived of effective medical care or even water and food, would face the prospect of a slow and excruciating death.

(3) The consequences of nuclear war would continue to affect succeeding generations and their environment for an indefinite period of time.

Science and technology have placed the most deadly weapons of mass destruction in the hands of the two nations you lead. This huge accumulation imperils us all. The interests of the present and all future generations require that nuclear war be avoided.

The medical consequences persuade us that the use of nuclear weapons in any form or on any scale must be prevented. To achieve this, we offer you our sincere support.

As physicians, we remember that the eradication of smallpox required intense international communication, cooperation, and dedication. Nuclear war is a far greater threat to mankind. It will require even more intense collaboration among the nuclear powers to achieve an early cessation of the race to produce these instruments of mass destruction.

Respectfully yours,

PARTICIPANTS IN THE FIRST CONGRESS OF INTERNATIONAL PHYSICIANS FOR THE PREVENTION OF NUCLEAR WAR.

AIRLIE, VA., *March 23, 1981.*

AN APPEAL TO THE HEADS OF ALL GOVERNMENTS AND TO THE UNITED NATIONS

Advances in technology in the 20th century have benefited humankind but have also created deadly instruments of mass destruction. The enormous accumulation of these nuclear weapons has made the world less secure. A nuclear conflict would ravage life on earth.

We speak as physicians in the interests of the people whose health we have vowed to protect. The scientific data concerning the medical consequences of the use of such instruments of mass destruction convince us that effective medical care of casualties would be impossible. We therefore urge that elimination of this threat be given the highest priority. No objective is more vital than to preserve the conditions that make possible the continuation of civilized life on earth.

As physicians, we know that the eradication of smallpox, coordinated by the World Health Organization, required intense international communication, cooperation, and dedication. Nuclear war is a far greater threat to humanity. Continuing discussion among the nuclear powers and other countries will be needed to achieve an early cessation of the race to produce these instruments of mass destruction, to prevent their spread, and ultimately to eliminate them.

Respectfully yours,

PARTICIPANTS IN THE FIRST CONGRESS OF INTERNATIONAL PHYSICIANS FOR THE PREVENTION OF NUCLEAR WAR.

AIRLIE VA., *March 23, 1981.*

AN APPEAL TO THE PHYSICIANS OF THE WORLD

DEAR COLLEAGUES: We address this message to you who share our commitment to the preservation of health. Our professional responsibility has brought us together to consider the consequences of the use of nuclear weapons.

We have participated in full and open discussion of the available data concerning the medical effects of nuclear war and its effects on our planet. Our conclusion was inescapable—a nuclear exchange would have intolerable consequences.

Enormous numbers would perish in the first hours and days of a nuclear war. The wounded survivors, burned and affected by nuclear radiation, would face unbearably difficult conditions, without effective medical aid, water or food. The consequences of a nuclear war would also be disastrous to succeeding generations. A major nuclear exchange would inevitably bring extensive long-term consequences even to countries not directly involved.

No one should be indifferent to the nuclear threat. It hangs over hundreds of millions of people. As physicians who realize what is at stake, we must practice the ultimate in preventive medicine—avoidance of

the greatest hazard the world will ever know. Your help is needed in this great endeavor. We urge you.

(1) to inform yourselves, your colleagues, and the general public about the medical effects of nuclear war;

(2) to discuss the medical consequences of nuclear war at meetings of members of medical societies, special symposia, and conferences;

(3) to prepare and publish in the medical press and specialized journals articles about medical consequences of the use of nuclear weapons;

(4) to speak about medical consequences of nuclear war to medical students and to your community;

(5) to use your influence and knowledge to help strengthen the movement of physicians for the prevention of nuclear war.

Respectfully yours,

PARTICIPANTS OF THE FIRST CONGRESS OF INTERNATIONAL PHYSICIANS FOR THE PREVENTION OF NUCLEAR WAR.●

EXTEND THE AUTHORITY OF THE MAYOR AND THE SECRETARY OF THE TREASURY

HON. RONALD V. DELLUMS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. DELLUMS. Mr. Speaker, I am pleased today to introduce legislation which would amend section 723(a) of the District of Columbia Self-Government and Governmental Reorganization Act of 1973 (Public Law 93-198, Dec. 24, 1973) to extend the District of Columbia's interim authority to borrow funds from the Treasury of the United States to finance capital improvement projects.

Under current law, the U.S. Treasury is authorized to lend to the District such sums as are "required to complete capital projects for which construction and construction services funds have been authorized or appropriated, as the case may be, by Congress prior to October 1, 1980, or upon enactment of the fiscal year 1981 appropriation act for the District of Columbia government, whichever is later."

This bill would extend, for approximately 2 years, the District's interim authority to borrow funds from the U.S. Treasury to cover capital projects for which funding is appropriated in the fiscal year 1982 or until the date of the enactment of the appropriation act for the fiscal year ending September 30, 1983 for the government of the District of Columbia, whichever is later.

When Congress passed the District of Columbia's Self-Government Act, it authorized the District to finance its capital projects by borrowing funds on the open market through the issuance of tax-exempt general obligation bonds rather than continue, indefinitely, its borrowing authority from the Treasury. The Act terminated, effective January 2, 1975, the permanent authority of the District to borrow funds from the U.S. Treasury to finance capital improvement projects. It also provided a 2-year interim loan authority which allowed the District to continue borrowing from the Treasury to finance capital projects for which funds had been authorized or appropriated prior to January 2, 1975. Congress provided the interim borrowing authority to prevent undue disruption in the District's capital programs during the transition from Treasury borrowing to entry into the municipal bond market.

As a result of unanticipated delays in the development and implementation of the District's bonding program, a 2-year extension of the interim borrowing authority was approved by Congress in 1977 (Public Law 95-131, Oct. 13, 1977). The Congress provided an additional 2-year extension of the interim borrowing authority in 1979, which authorized the Treasury to lend funds to finance capital projects approved in the 1980 and 1981 appropriation acts (Public Law 96-160, Dec. 28, 1979). This extension was necessary because the District's capital improvements program could not be halted without causing undue harm.

During congressional hearings on the 1979 extension of the borrowing authority, the District's representative testified that in fiscal year 1982, the District hoped to finance new capital improvement projects through the municipal bond market. The Congress was also advised that it may be necessary to request another extension of the interim authority.

In recent hearings before the Senate, the District's representative testified that since the 1979 congressional hearings, circumstances have arisen which will delay, beyond fiscal year 1981, the District's entry into the municipal bond market to obtain financing for its capital improvement projects. He stated that the fiscal year 1979 comprehensive financial report, issued by the District on May 1, 1980, revealed the existence of the large operating deficit, which was corroborated by an outside audit of the District's fiscal year 1980 general purpose financial statements issued on February 2, 1981. The District has moved to correct the problem by proposing a financial plan which includes a bond issuance of $184 million to retire a portion of the $388 million general fund operating deficit accumulated in fiscal year 1980 and prior years, and the balancing of revenues and expenditures for fiscal year 1981 and subsequent years.

This plan is now under review by the Congress and it is anticipated that these actions will permit the District to commence financing its capital improvement projects with bond issues no later than fiscal year 1984.

The District's representative also testified that an extension of the interim borrowing authority will neither cause nor encourage the District to delay any phase of its bond program that it can legally, technically, and fiscally implement. It was his view that it is clearly in the best interest of the District to raise capital improvement funds in the municipal bond market as soon as possible, since the District should realize substantial interest savings. The District does not intend to use the interim borrowing authority any longer than is necessary.

Without an extension of the expiration date of the District's interim borrowing authority, vital capital improvement projects will be halted and necessary new capital projects, including planned Metro construction and major water system improvements, included in the fiscal year 1982 budget request, will be delayed. The resulting delays will cause the District to be burdened with even higher costs.

In recommending this legislation, I would also like to note that according to the Treasury Department, the District's record of repayment has been and continues to be excellent and in accordance with the procedures established between the U.S. Treasury and the District of Columbia government.●

JAMES J. KILPATRICK ON "THE COMING CATASTROPHE"

HON. JONATHAN B. BINGHAM

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. BINGHAM. Mr. Speaker, in Nation's Business of February 1981, none other than Mr. James J. Kilpatrick warns that we will face catastrophic food shortages early in the next century unless we take sensible actions now. Mr. Kilpatrick cites "Global 2000," a report prepared by the Council on Environmental Quality and the Department of State last year, and calls it an immensely important study, staggering in its implications. The report shows that the impending catastrophe can only be averted if we are able to greatly increase our production of food and, at the same time, move rapidly to limiting world population growth by means of birth control.

I welcome Mr. Kilpatrick to the age of limits and commend his column to my colleagues and other readers of the RECORD:

[From the Nation's Business, February 1981]

THE COMING CATASTROPHE

(By James J. Kilpatrick)

Five years ago, Scribner's published an English translation of Jean Raspail's The Camp of the Saints. The novel had been well received abroad, but here in the States the liberal reviewers killed it with ridicule or with silence. The plot was intolerable to them. Raspail was predicting that some-

where around 1995 or 2000 a horde of wretched, starving have-nots would swarm like locusts upon Southern France and ravage the food, the property and the lives of the haves. This was a nightmare novel, chillingly told.

Raspail's prophetic work came to mind the other day, when I finally got around to reading Global 2000. This was a report submitted to President Carter last summer by the Council on Environmental Quality and the Department of State. It is an immensely important study, staggering in its implications, and if you wonder why it has received so little attention, I can only surmise that in Washington we are inundated by reports, and at the time of publication this must have looked like merely one more report.

It is much more than that. The authors have pulled together the best projections of experts in a dozen fields—population, food production, natural resources and the like—and have compressed them into a single word: catastrophe. If we fail to heed the clear warnings of this study—if we fail to take sensible actions now—we will invite terrible consequences just two decades hence.

The population projections alone are enough to cause serious concern. By 2000, the world's population will have increased to about 6.35 billion, a gain of 55 percent over 1975. The more developed countries will increase slowly. The United States may have 248 million inhabitants, up 16 percent; Western Europe can anticipate a population of 378 million, up 10 percent. But the less developed countries will soar. By 2000, Mexico can expect a population of 131 million, up 119 percent, Mexico City will be the largest city in the world, with a population of perhaps 31.6 million—three times as large as New York is today. Africa's population will double; China will go to 1.3 billion and India to 1 billion.

How are these billions of human beings to be fed? In most of Asia, and in poor areas of North Africa and the Middle East, a calamitous drop in food per capita is projected. In these areas, "the quantity of food available to the poorest groups of people will simply be insufficient to permit children to reach normal body weight and intelligence and to permit normal activity and good health in adults." The number of seriously malnourished people will roughly double, from about 600 million today to 1.3 billion two decades hence.

What these projections suggest is that the great grain and rice producing nations must redouble their efforts. An answer cannot be found in putting more land in production, because most good land already is under cultivation. Increased reliance upon fisheries could help, but "unfortunately, the world harvest of fish is expected to rise little, if at all, by the year 2000."

Other concerns cry out for thoughtful attention. The world's forest resources are in deep trouble. By 2000, growing stock per capita is expected to decline 47 percent worldwide and 63 percent in less developed countries. Water supplies, already short in many areas, will get worse.

One thing leads to another. As urban sprawl continues, valuable cropland goes out of cultivation. As forested hills are denuded, erosion takes over. For want of fuel wood, millions will be forced to burn animal dung, thus robbing the soil of organic nutrients.

The authors emphasize that their projections are conservative. They do not allow for drought, or wars or agricultural pestilence. On the other hand, they do project technological developments that will enhance productivity. They do not assume breakthroughs in fusion energy or solar energy. They acknowledge the increased risk that goes with increased production of electrical energy in atomic plants, and grimly but matter-of-factly they point to the mounting problem of disposing of atomic wastes.

Yes, this is a gloom and doom report, made all the more disturbing by the constrained and dispassionate style in which the authors lay out the evidence. But it is not a report without hope. Their message, finally, is that the impending catastrophe can indeed be averted—or at least minimized—if sensible public policies are put in motion now. New methods of safe and reliable birth control must be developed. The world will need new varieties of fast-growing trees. New techniques of aquaculture and desalinization will have to be found.

Above all, a sense of urgency has to be aroused. Otherwise, our children and grandchildren may soon discover that Jean Raspail wrote not fiction, but fact.●

SECRETARY JOHN O. MARSH, JR., ADDRESSES THE ASSOCIATION OF MILITARY COLLEGES & SCHOOLS AT ITS ANNUAL DINNER

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. SKELTON. Mr. Speaker, the Honorable John O. Marsh, Jr., the Secretary of the Army, addressed the annual dinner of the Association of Military Colleges & Schools on the evening of March 16, here—the Washington area. His talk was most thought provoking, and I include it herewith:

SPEECH OF HON. JOHN O. MARSH, JR.

About 3:00 a.m., on the morning of October 22, 1781, as the watchman in Philadelphia walked his post, he was surprised to hear a horse thundering down the street coming into the city. The rider was one of Washington's aides. Exhausted, barely able to stay in the saddle, he had ridden from Yorktown three days before as a courier with a message from the Commander-in-Chief to the President of the Continental Congress, Thomas McKean.

He sighted the watchman and reined to a halt, seeking directions to McKean's home. Before departing he disclosed the message he brought to Philadelphia. Cornwallis had surrendered. The British Army in Virginia had been captured. The watchman hurried down the streets excitedly calling in a singsong voice, "Past 3:00 o'clock, and Cornwallis is taken." Suddenly, the city of Philadelphia was awakened to the news that the American Revolution appeared to be over. The Colonies were independent.

Cornwallis' fate was sealed on that peninsula in Virginia several days before the surrender with the storming of Redoubt 10—a key position in his perimeter defenses. Redoubt 10 fell in a night bayonet assault by a selected group of Continental soldiers who with unloaded muskets, in savage hand-to-hand combat, stormed and took Redoubt 10. They were led by a young Lieutenant Colonel on Washington's staff. In fact, this aide-de-camp posterity knows better as Alexander Hamilton.

The surrender of Yorktown was a victory for the Continental Line—the regular army of the United States that had been created six years before by the Continental Congress.

Yorktown was a bridge between the Declaration of Independence and the Constitution. It was here that the pledge made by the signers of the Declaration was redeemed. As it had been redeemed at Valley Forge, Saratoga, Brandywine, Kings Mountain and Cowpens. This suffering incurred by the Continental Line and the victory at Yorktown would make the Declaration of Independence a meaningful manifesto of American political independence.

It is my hope that when you return to your own Institutions you will take the lead in developing plans to observe the Bicentennial of the Battle of Yorktown.

Why do we need the ROTC program today?

We need the ROTC program because we live in a world of crisis and violence. We live in a troubled world. We live in a world of precarious peace, a peace which is maintained only by U.S. strength, and to the extent that the U.S. appears to be weakened, peace is weakened. It is only the U.S. leadership of the Free World and U.S. power that safeguards an uneasy truce.

The headlines of the morning paper or the evening television news bring home the perilous times in which we live.

Even a hasty global overview points to the difficulties of our times. In Europe, the forces of NATO are poised against the military might of the Warsaw Pact, dominated by Russian power. Russian ground forces are organized into 173 Divisions with roughly 35% on the NATO front, 8% on its Southern Flank, 30% on the Chinese border, and the remainder as reserve in the Russian heartland.

The Middle East that was a cradle of Western civilization today is a land of turmoil and terror—violence and bloodshed. The instability of that area is reflected by recent events in Iran and the Iranian/Iraqi war which always raises the danger of escalation to a far broader scale. The vital energy lifelines of Europe and the United States depend upon this volatile area.

Africa, from the Southern shores of the Mediterranean to the Cape of Good Hope, is a story of changing governments, shifting alliances, power struggles and purges. Yet, from this continent come many of the essential raw materials critical to U.S. and Western industry.

In our own hemisphere, Cuba is a place to launch aggression in the form of guerrilla warfare and propaganda aimed at our neighbors to the South. Nicaragua and El Salvador are recent evidence of how tenuously power is held in that area of the world.

The picture is hardly brighter in the Indian Ocean. A Soviet backed coup toppled the Government of Afghanistan, and where the Soviets could not control their own puppets, they launched an invasion and are brutally crushing resistance in this key nation in Southwest Asia. While in Southeast Asia the boat people are a tragic commentary to the oppression that exists in Vietnam. Terror stalks in Cambodia. An American presence has guaranteed the integrity of South Korea from aggression from the North. Along thousands of miles of mutual border, the Russian Bear faces off against the Dragon of Red China.

Globally, this drama of tension is played out under an umbrella of nuclear forces

with an arsenal of missiles that can reach from continent to continent. However, the cutting edge of aggression is likely to be the guerrilla or infantry soldier employing conventional weapons and the tactics of ancient land warfare.

To protect the United States and its vital interest, we rely on a defense doctrine called the "Total Force Policy," which I will mention later.

It is apparent in the founding of the Republic there was a recognition between learning and the profession of arms.

The Constitution vests in the Congress the power to raise and maintain armies and provide for the militia.

It is interesting to observe that one of the first of the Federal institutions founded was the establishment of the United States Military Academy at West Point in 1802. It is clear that leaders such as Washington and others perceived the need for an officer corps who not only knew the skills of their profession, but who drew strength from formal education. This emphasis on learning would create a continuing relationship in our country between the campus and the military.

This is summarized in the comment of Governor Dreyfuss of Wisconsin who was Chancellor at the University of Wisconsin at Stevens Point who said:

"ROTC is not the presence of the military in the university, it is the presence of the university in the military * * *."

This great principle would be behind the founding of Norwich University in 1819—the first private military college, and then later the Virginia Military Institute—1839—the first state military college, followed by the Citadel. However, even in the last century, they were not exclusive because military training was present on the campuses of many other schools of that day.

The Morrill Act, establishing the land grant colleges in 1862, was a giant step forward. The Congressional mandate required the teaching of agricultural, mechanical, arts and other scientific and military tactics. Just before the turn of the century there were 105 colleges and universities who had military departments.

The National Defense Act of 1916 formally established the Reserve Officers Training Program and its effect can be measured when you consider in World War I there were 90,000 officers who joined the Reserve officers pool. 100,000 answered the call in World War II before the program was terminated in favor of Officer Candidate School.

The contribution to the Korean conflict was more than 51,000 and over 100,000 officers were produced through ROTC during the Vietnam years.

It is noteworthy that 37% of the generals in the Army today have an ROTC background.

In recent developments we have seen the Revitalization Act of 1964, the hallmark of which was the ROTC Scholarship Program, which has been a stunning success and is continuing to grow.

1972 would open the ranks of the ROTC to women and 1979 would see the creation of the Simultaneous Membership Program which permits the ROTC cadet to belong to the National Guard or Reserve.

During the past school year, there were 670 Junior ROTC (JROTC) units at secondary school level with either three or four year programs. There are currently 42 schools on the waiting list to establish JROTC units. Actions are ongoing to obtain funding authority to establish these units and others.

The program is significant because it establishes a knowledge and an affiliation of the military which is very likely to cause many of these young people to associate with the ROTC program or some other military program after they complete college.

THE DECADE AHEAD—TOTAL FORCE CONCEPT

Today, as a matter of national policy, we have a Total Force Concept. This Total Force Concept places an unprecedented responsibility on the Guard and the Reserve.

In the Army it is defined as a one Army concept and the importance takes on additional significance when you examine a few statistics such as:

58 percent of Army deployable forces,
42 percent of Army aviation forces,
52 percent of Army special forces groups,
51 percent of infantry and armor battalions,
58 percent of field artillery battalions,
65 percent of combat engineer battalions,
65 percent of tactical support.

I mention the Total Force Concept because it impacts in a most significant way on the ROTC program and the manner in which we must look at the ROTC trained officer for leadership positions, not only in active duty forces, but in components of the Reserve. Therefore:

ROTC must be prepared to produce the officers required to meet Total Army requirements;

By FY 1985 the production goal is 10,500 officers annually; (Army only)

We must recognize that the future leadership of this country is on the college campus and it is imperative that we get our share of that leadership.

By FY 1982 the Expand the Base Program will extend ROTC to 97 additional campuses.

We are currently on 279 campuses with fulltime programs, called host institutions, and will add eight more in the next year.

Additionally, we are affiliated with 500 other campuses which utilize the assets of the host institutions to conduct programs.

And, we are expanding our "extension Centers," which are small subunits of established host institutions, located on nearby campuses that do not have an ROTC unit.

In FY 1981 an additional 48 extension centers and eight host institutions will be added.

In September 1980, Congress increased our Scholarship Program from 6,500 to 12,000. That reflects a Congressional recognition of the importance of ROTC as well as a lot of hard work on the part of Major General Dan French and his staff. As you are probably aware, only 2,000 of the 5,500 increase in these newly authorized scholarships have been funded.

Finally, and most importantly, enrollment in ROTC has continued to climb. Currently, it is at 71,500 which in itself is an increase of 2,500 ROTC cadets since the school year began last September.

I am deeply grateful to those in the Department of the Army, such as General French and his staff, for this progress. I would also like to thank those of you in the audience for your contributions and for the continued efforts to stress the relationship between education, leadership and national defense.

There are 167 streamers on the Army flag acquired in the campaigns for more than two centuries representing battlefields in far away places, and in the four corners of the globe. Where those streamers were earned, they were earned by our fellow countrymen who came from more than 100 different campuses of America. They brought to the military service an intellectual heritage that was a mosaic of our academic life. They brought a sense of values, a sense of scholarship, and a sense of tradition which not only enriched their own lives, but enriched the Army in which they served.

Many of them are remembered at their alma maters in statutory and by plaque for the gift of their last full measure of devotion.

The Association of Military Colleges and Schools has a special mission in providing for the common defense.

It is a mission of leadership.

It requires the pursuit of excellence in both the programs of military instruction and academic subjects.

There is a growing trend in this country for providing in the curriculum of college subjects that relate to national security or defense studies. These studies should help in providing that essential bridge that is vital between the ROTC programs and academia.

Together we must find ways to make the ROTC program responsive to changing times and needs.

The Reserve Officers Training Corps is an experiment that is uniquely American. It adds a dimension to the Citizen-Soldier concept which is the dimension of the Soldier-Student. A college student who is also trained as a military leader. One who becomes aware of our defense needs and the dangers to U.S. security.

Washington said: "Every citizen who enjoys the protection of a free government, owes not only the proportion of his property, but even of his personal services to the defense of it."

Their future role in service to the Nation may go well beyond that of active military duty where they have made a distinguished contribution. It goes to a civilian role in the decades ahead where in their profession, trade or industry, they become opinion-makers assisting in molding public opinion to direct the country in making proper choices on Defense matters thus ensuring this will always be the land of the free and the home of the brave.●

RURAL RENEWAL FOR A BARGAIN

HON. RON MARLENEE

OF MONTANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. MARLENEE. Mr. Speaker, last month House Members had the pleasure of sampling baked goods made from the protein-rich byproducts of alcohol production. When grains are used in the making of alcohol, in addition to the alcohol a mash is retained which contains all the protein of the grain initially used in the fermentation process. The group WIFE (Women Involved in Farm Economics) has been a leader in the production of alcohol from grains and they are the ones who conducted the demonstration for Members of Congress. I may add that the presentation and baked

goods by the WIFE representatives was excellent and attracted the attention of and a visit by Deputy Secretary of Agriculture Richard Lyng and several media representatives. I am proud that the Montana chapter of WIFE took the lead in presenting their case to Congress. I would like to bring to the attention of my colleagues an article which appeared in the Washington Star on March 18, 1981, concerning the demonstration.

The article follows:

RURAL RENEWAL FOR A BARGAIN

(By Anne Crutcher)

Everybody agrees that it would be great if this country could lessen its dependence on foreign oil. Everybody knows gasohol is one of the substitute fuels that can make it possible. But many people draw back from the idea of using food grains for anything but food.

It's a legitimate concern. However, some people are convinced it's not necessary to choose between food and fuel, at least where gasohol is concerned.

Among them are some enterprising Montana farm women who recently came to Washington to show Congress what they have been doing to make the wheat from their family farms serve both food and fuel purposes. I talked to two of them—Pat Torgerson of Lambert and Shirley Ball who comes from Nashua—and tasted the breads and cookies they've been making from what they call "renewed wheat."

As good as any I ever had. Their story is equally appealing. Even in these days of agribusiness, a family farm is still an undertaking in which the whole family participates. These women have worked with their husbands, with county agents and with each other to develop a cottage industry producing alcohol and a high-protein wheat flour from the wheat they grow.

They grind the wheat in a kitchen blender, mix it with liquid to form a mash and let it ferment. Then they separate the liquid from the solids in the mash and put the liquid through a stove-top still to make the alcohol that will combine with gasoline to run their farm machines with less use of petroleum than they would otherwise require.

The next step is to dry the wheat solids in the oven. Then they are ground again—a finer grind this time—to form flour. Shirley Ball and her husband have experimented with various methods and they found that an old dry cleaning machine worked particularly well as a centrifuge separator of the two main elements in their operation.

When they took their flour to the local grain elevator for testing, it turned out to be 28 percent protein the first time around and 40 percent when they refined their procedures. The wheat they used for animal feed registered only 15.9 percent protein.

In other words, this looks like one of those rare have-your-cake-and-eat-it-too situations. Shirley Ball and Pat Torgerson have been traveling the county fair circuit in their part of the world, demonstrating their methods and passing around samples of the baked goods they can turn out along with their gasohol.

It's caught on in many parts of Montana. They hope their appearance before the House Agriculture Committee will stimulate interest among commercial processors.

The bargain seems irresistible. From 60 pounds of wheat, they get 2.5 gallons of alcohol and 20 pounds of high-protein food.

As Pat Torgerson put it, "Protein for a protein-poor world. This mash is also high in fiber and has wheat germ intact, all things needed in today's diet. . . . I envision renewed grain mash being shipped to markets overseas in compact boxes of dried protein instead of bulky bushels of grain. We can ship three times as much dry protein as we do whole grain. . . . Renewed Grain Mash can feed the world two ways. First as a human food and second as a livestock feed. Either way, human life is the beneficiary and famine the loser."●

ISSUES IN EL SALVADOR

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. HAMILTON. Mr. Speaker, recent discussion of the crisis in El Salvador prompted me to write to Secretary of State Haig regarding both our policy toward that nation and the implications of the crisis there for our relations with Mexico, other Central American States, and the countries with which we consult on developments in the region.

The situation in El Salvador has been volatile for a long time. There is evidence that the Soviet Union and its proxies have played a more recent role in fomenting the conflict. The violence which has taken the lives of so many Salvadorans has also claimed the lives of four American churchwomen and two American agricultural advisers. Because those Americans were in El Salvador to improve the lot of the poor, their sacrifice is a cause of deepest sorrow.

Since October 1979, a number of ruling coalitions have followed one another in El Salvador. Like its predecessors, the current civilian-military junta is having trouble controlling the conduct of the armed forces, containing the depredations of the left and right, and carrying out the long-overdue reforms supported by the United States. Our programs of military and economic assistance are intended to foster stability and fundamental social change in a difficult environment, but to date they appear to have met with little success.

Against such a backdrop, it is unclear what a larger American presence in El Salvador may accomplish. Somewhat clearer are the personal risks to our military personnel and the potentially adverse consequences, both in El Salvador itself and in the region at large, of the policy we are pursuing today. Clearer still is the need for Congress to air the issue of our involvement in El Salvador fully and dispassionately.

Congress will be faced with the issue this year as it makes its decisions on foreign assistance. Members of Congress will be obliged to ask themselves whether our assistance to El Salvador has a positive influence and thus should be continued at high levels with appropriate guidelines for use, whether it makes little difference and thus, given the risks and potentially adverse consequences, should be allowed to end when all funds are expended, or whether it is an immediate cause of violence and thus should be terminated forthwith. In the debate, Members of Congress must be especially attentive to what we are doing now and how we propose to bring enduring peace to El Salvador.

My letter of February 10, 1981, sought clarification of the issues in El Salvador. It is obvious from the response of March 11, 1981, that many aspects of our policy are still being formulated. Congress will want to watch the development of the policy with extreme care.

The correspondence follows:

HOUSE OF REPRESENTATIVES,
COMMITTEE ON FOREIGN AFFAIRS,
Washington, D.C., February 10, 1981.

Hon. ALEXANDER HAIG, Jr.,
Secretary of State,
Department of State, Washington, D.C.

DEAR MR. SECRETARY: The crisis in El Salvador is very much on my mind. Consequently, your detailed answers to the following questions would be appreciated:

1. What are the guiding principles of our policy toward Central America?

2. What are the guiding principles of our policy toward El Salvador? Will we continue economic and military aid to the governing junta? If so, at what levels? What American military personnel will be stationed in El Salvador? How many will there be and what kind of work will they do?

3. Will we consult with other nations concerning our policy toward El Salvador? If so, on which nations will we concentrate our attention?

4. What effect will disagreement on El Salvador have on future relations between us and Mexico?

5. What does Mexico's new program of military modernization imply about Mexican policy toward Central America?

6. What are the guiding principles of our policy toward Nicaragua? Are there grounds on which our special economic aid to that nation may be discontinued? What evidence do we have that Nicaragua is supplying arms to insurgents in El Salvador?

I look forward to hearing from you in the near future.

With best wishes, I am

Sincerely yours,

LEE H. HAMILTON,
Chairman, Subcommittee on Europe and the Middle East.

DEPARTMENT OF STATE,
Washington, D.C., March 11, 1981.

Hon. LEE H. HAMILTON,
Chairman, Subcommittee on Europe and the Middle East, Committee on Foreign Affairs, House of Representatives.

DEAR MR. CHAIRMAN: I am responding to your letter of February 10 to the Secretary concerning Central America and El Salvador.

As you may know, we are currently conducting an intensive policy review toward El Salvador. Until that review is completed, we cannot respond in detail to your questions.

However, we continue to be concerned about the violence resulting from the political crisis which is being perpetrated by the extreme right and left, and by the security forces of the government itself. We are concerned that a well orchestrated international communist campaign is transforming the Salvadoran crisis from an internal conflict to an increasingly internationalized confrontation. With Cuban coordination, several Soviet bloc countries, Vietnam, Ethiopia, and radical Arabs have furnished at least several hundred tons of military equipment to the Salvadoran leftist insurgents. Most of the equipment has entered via Nicaragua.

We are informing our friends in Europe and Latin America on the issue of communist intervention and intend to continue consulting in the future. We have consulted with members of both Houses of Congress and are making our case to the American public.

As part of our on-going review of the situation in El Salvador, we have decided to provide an additional $25 million of security assistance for fiscal 1981. This assistance will permit the Government of El Salvador to acquire additional helicopters, vehicles, radar and surveillance equipment and small arms. In addition, our present training and assistance teams with the addition of four five-man training teams. These four teams will train Salvadoran personnel in communications, intelligence, logistics, and in other professional skills designed to improve their capabilities to interdict infiltration and to respond to terrorists' attacks. U.S. personnel will not accompany Salvadoran units outside their garrisoned areas, nor will U.S. personnel participate in any combat operations. We are continuing disbursement of the $63.5 million in FY 1981 economic aid already programmed for El Salvador. However, we anticipate the need to provide substantial amounts of additional economic aid and are reviewing this matter at the present time.

While our relations are cordial, Mexico and the U.S. have different perceptions as to cause and effect relationships of the internal and external problems facing El Salvador. Both the U.S. and Mexico look for the strengthening of democratic institutions in El Salvador, and endorse the principle that the Salvadorans should be able to choose their own form of government without outside interference. Both the U.S. and Mexico advocate stability and progress in the area. The Mexican and U.S. assessments of the threat posed by a possible victory of the insurgents are different, however.

The U.S. has supported the moderate forces represented in the Salvadoran Junta. Mexico has been cool towards the Junta, although it maintains diplomatic relations with San Salvador. At the same time, Mexico has made clear that El Salvador is fully entitled to benefit from the Mexican-Venezuelan oil facility (whereby countries of Central America and the Caribbean are granted concessional terms on oil purchases).

Were serious disagreements over El Salvador to develop between the U.S. and Mexico, this could have a negative impact on our bilateral relations. To lessen this possibility, we and the Mexican Government are keeping in close touch on developments in El Salvador as they affect our two countries and relations with others in the region.

With regard to military modernization, Mexico has expressed some interest in upgrading its Air Force and has been in touch with a number of possible sellers, including the U.S. We also understand that it may want to improve its land and naval forces. Generally speaking, the U.S. views positively increased Mexican interest in regional developments and recognizes that Mexico can play an important role in shared responsibility for the defense of the area.

In Nicaragua, we have continued our efforts to build up the moderate forces and restrain Cuban influence. As you know, our generous assistance program has been a central element of this policy. Unfortunately, the possibility of Nicaraguan Government involvement in massive arms shipments through Nicaraguan territory to El Salvador has requried us to review whether our assistance can be sustained, consistent with U.S. law.

U.S. legislation requires the President to suspend economic support funds to Nicaragua if he determines that the Government of Nicaragua is involved in terrorist activities. He is also required to call outstanding loans made from economic support funds to the Government of Nicaragua in the event of such a determination. You inquire about our evidence that Nicaragua is supplying arms to El Salvador. I am enclosing a copy of our Special Report on "Communist Interference in El Salvador" which provides some details on this question. While we do not wish to divulge classified information in this letter, we will be pleased to provide you with a classified briefing about the supply of arms to El Salvador at your convenience.

The Secretary has given this matter his priority attention during the past several weeks. Under his direction, we have been actively dealing with the numerous complex factors involved, including those related to the security of our personnel. We will continue to keep the Congress informed as we near a decision on this matter, and we look forward to further discusing your questions privately.

Sincerely,

RICHARD FAIRBANKS,
Assistant Secretary for Congressional Relations.●

FLEXIBLE WEIGHT LIMITS FOR LIVESTOCK TRANSPORTATION

HON. COOPER EVANS

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. EVANS of Iowa. Mr. Speaker, today I am introducing the Livestock Transportation Act of 1981, a bill to allow States flexibility in dealing with weight limitations for vehicles carrying livestock on interstate highways.

The unique nature of livestock cargoes demands that our laws recognize that weight limitations need to be applied with a certain degree of flexibility when live animals are being transported.

My bill is permissive in nature. It would allow a vehicle hauling livestock to exceed weight limitations on one axle or group of axles, provided that the total weight of the vehicle does not exceed the legal maximum gross weight allowed under the law. This bill would not increase maximum weight limits in any way. It simply allows for a weight shift caused by movement of the livestock while in transit. This bill permits voluntary action by States.●

TAX POLICIES WHICH DISCOURAGE DOMESTIC RESEARCH AND DEVELOPMENT

HON. JAMES M. SHANNON

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. SHANNON. Mr. Speaker, recently I introduced with my colleagues Mr. HEFTEL, Mr. MATSUI, and Mr. JENKINS a bill (H.R. 2473) which would remove an artificial disincentive in the Federal tax regulations which encourage U.S. corporations to transfer a portion of their research and development effort out of the United States to foreign countries.

In 1977 the Treasury issued final regulation 1.861-8 which requires, among other things, that research and development expenses be allocated between domestic source income and foreign source income regardless of where the actual expenditure is made. This regulation has a serious adverse tax effect on domestic research and development when its effects on the foreign tax credit are considered.

Foreign taxes are paid in accordance with the laws of the country where an operation is located and, therefore, do not include any deduction for R. & D. expenditures incurred in the United States. In addition, U.S. law does not permit credit for foreign taxes paid in excess of the applicable U.S. tax rate on foreign income. The result is that the foreign source income, on which the creditable foreign tax is calculated, is reduced by the amount of R. & D. allocated to it. Once the ceiling of creditable foreign taxes is reached, every dollar expended on R. & D. in the United States that is allocated to foreign sources carries the tax penalty of reducing the foreign tax credit.

Under these conditions there is a very real tax advantage of transferring or establishing R. & D. operations abroad. This advantage is heightened by the very liberal tax incentives which many foreign countries grant to U.S. corporations in order to attract more R. & D. operations.

The bill which my colleagues and I have introduced today simply excludes domestically performed R. & D. from the application of section 861. Under our bill all domestic R. & D. which is conducted in the United States is deducted solely from U.S. source income. No R. & D. expenses incurred in this country will be deducted from foreign source income and the incentive to move abroad R. & D. currently conducted in this country will be removed.

I am enclosing for my colleagues a narrative example of the actual operation of the allocation required under

section 861. The example clearly demonstrates the advantages of transferring R. & D. operations abroad in order to minimize total worldwide taxes. Under section 861 the Acme Corp. will pay a total of $1,950 in taxes, an effective tax rate of 48.75 percent or $110 more than under the U.S. statutory rate of 46 percent:

INTERACTION OF SECTION 861 AND THE FOREIGN TAX CREDIT LIMITATION

U.S. corporations with operations overseas are required by law to report all worldwide income in the corporate income tax return. Usually, income earned abroad is subject to taxation in the foreign country, and, in order to avoid double taxation, U.S. corporations may take a credit equal to the foreign taxes paid against the U.S. tax liability as calculated on worldwide income. However, the credit allowed is limited to the U.S. tax liability on the foreign source income. This credit limitation can be calculated by the following formula:

U.S. tax before credits times foreign source taxable income divided by worldwide taxable income equals foreign tax credit limitation.

In essence, this formula says that a corporation cannot get credit for any foreign tax paid in excess of what would have been owed had the income been earned and taxed in the United States. The problem with R. & D. costs comes in the calculation of the foreign source taxable income.

Section 861 requires that research and development expenditures, among other fungible items, be allocated to both U.S. source and foreign source income even if the R. & D. was conducted solely in the U.S. Allocation can be determined by the proportion of gross sales in the U.S. to gross sales in foreign countries or by the ratios of gross income. Under either allocation method, the taxpayer is permitted to take 30 percent of the R. & D. expenditures off the top and need only divide the remaining 70 percent. (This exclusion has been stepped down from 50 percent in 1977 when the regulations were finalized to 40 percent in 1978 and 30 percent in 1979 and thereafter).

The following example illustrates how this allocation process reduces the foreign tax credit. The Acme Corporation has U.S. income of $5,000 and foreign income of $2,000. All expenses are incurred in the United States, but some, including R. & D., must be allocated to the foreign income. In this example, the foreign country imposes tax rate of 40 percent.

ACME CORP. OPERATIONS IN THE UNITED STATES AND ABROAD

	Worldwide	United States	Foreign
Gross profit from U.S. sales	$5,000	$5,000	.....
Royalties from foreign sales	2,000	.....	$2,000
Worldwide gross income	7,000	5,000	2,000
Expenses—all incurred in United States but some allocated abroad	3,000	2,500	500
Taxable income, by source	4,000	2,500	[1] 1,500
Tax liability calculations U.S. tax on worldwide income before credit—46 percent	1,840	.....	.....
Actual tax paid to foreign country, 40 percent rate	.....	.....	[1] [2] 800
Creditable tax limited to $1,840 times $1,500 divided by $4,000 equals	690	.....	.....
U.S. tax liability	[2] 1,150	.....	.....

[1] Implied foreign tax rate: $800 divided by $1,500 equals 53 percent.
[2] Effective worldwide tax rate: $1,950 divided by $4,000 equals 48.75 percent.

The net result of the allocation of R&D expenses forced by Section 861 is that the implied foreign tax rate and the effective worldwide tax rate are raised above 46 percent. If the foreign source income could be reduced to $1,739, the full $800 in taxes paid would be creditable ($800/$1,739 equals .46). Moving sufficient R&D operations overseas to alter the allocation by $239 would reduce the worldwide tax liability by $110 and yield a worldwide effective tax rate of 46 percent.●

COMMUNISTS AND DISINFORMATION

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. MICHEL. Mr. Speaker, syndicated columnist Stanley Karnow has recently stated that during the Vietnam war, a correspondent for Time magazine was a Communist agent. This agent is now a senior official in the Vietnamese Government. If Karnow's statement is true, it opens up the question of precisely what kind of information the American people were getting through our media concerning the war. Were there other such Communist agents sending out disinformation under the guise of objective reporting?

I would very much like to see this question answered by the media. Karnow's charge is a serious one and it is not the kind of thing that can simply be ignored as not relevant to today's important questions. For my own part I believe that the overwhelming majority of the reports we receive from overseas are the view of the reporters themselves. I may not agree with those views and may often wish that those views did not get mixed into newsstories, but at least we can say that such views are the result of the reporters' own conception of his or her professional responsibilities. But when we have a charge that a Communist agent served as a full-time reporter for the single most influential news magazine in the United States, that is something altogether different, especially since the charge comes from a columnist not particularly known for his conservative sympathies.

At this point I insert into the RECORD, "The Case of Colonel Thao," by Stanley Karnow, from the Baltimore Sun, March 23, 1981:

THE CASE OF COLONEL THAO

HO CHI MINH CITY.—As a reporter here during the Vietnam War, I suspected that the Communists had infiltrated the South Vietnamese regime as well as the U.S. mission. Now back in Saigon, as this city was formerly called, I have been able to confirm those suspicions.

More dramatically, I have learned that these Communist agents included close Vietnamese acquaintances who not only were trusted by me but also gained the trust of American officials who relied heavily on their cooperation without knowing their true identity.

This duplicity is not surprising. In a civil war without front lines, friend and foe are difficult to distinguish. Looking back, however, the discovery reinforces my conviction that the United States never could have won a conflict in this alien land, where the enemy was tenacious, dedicated and everywhere.

Consider, for example, the case of Colonel Pham Ngoc Thao, who until his death was one of the most dynamic and brilliant figures in the Saigon regime.

In reality, Colonel Thao was a key Communist agent all along. His remains were recently transferred to the Patriots' Cemetery here, but his past role has not been made public, presumably because the present Vietnamese authorities fear reprisals against his widow, who lives in Texas.

Born into a wealthy Catholic family, Colonel Thao attended French schools in Saigon. But like many Vietnamese intellectuals humiliated under French colonialism, he joined the Communist-led Vietminh struggling for independence against France.

When the Geneva accords partitioned Vietnam in 1954, he "rallied" to the Saigon government then being formed by Ngo Dinh Diem. As a Communist "defector," he persuaded Mr. Diem that he knew how to fight Communists, and his influence grew.

In the late 1950s, he urged Mr. Diem to construct "agrovilles," enclosures into which peasants were forcibly corralled in order to cut them off from the Vietcong. He later designed the "strategic hamlet" program, which had a similar aim.

Both schemes, enthusiastically financed by the United States, were actually devious devices. Or as one of Colonel Thao's old comrades told me: "His purpose was to antagonize peasants and alienate them from the Diem regime, and it worked."

When I first met Colonel Thao in 1961, he was chief of Bentra province, a Communist bastion south of Saigon. He seemed to have gained control over the area. I wrote an article praising his skill at counter-insurgency. Others, among them columnist Joseph Alsop, turned him into a celebrity.

In fact, as a former Vietcong leader here disclosed to me, Colonel Thao and the Communists in Bentra had reached a covert understanding to make "pacification" look good. "In that way," the Vietcong leader explained, "we could build up our strength without being molested."

One of Colonel Thao's most important dupes during the early 1960s was Dr. Tran Kin Tuyen, the boss of Mr. Diem's secret police, whose organization had been created by the U.S. Central Intelligence Agency. In more than one instance, Colonel Thao got Dr. Tuyen to release Vietcong suspects.

In 1963, as internal opposition to Mr. Diem mounted, Colonel Thao and Dr. Tuyen conspired to overturn the regime. Their objectives differed, however.

Dr. Tuyen, a fierce anti-Communist now living in England, wanted a government that would wage the war more effectively. Mr. Thao, in contrast, was maneuvering to install a junta of colonels that would negotiate a deal with the Communists.

A group of generals ultimately staged the coup in which Mr. Diem was assassinated. The morning after, I recall, Colonel Thao warned me to expect another coup by colonels under his direction. His plan, a Communist source here says, was to make South Vietnam neutral in preparation for its eventual reunification with the North.

Colonel Thao's counter-coup failed, but his clandestine Communist connections never surfaced. On the contrary, his credentials were still so clean that he was assigned to the South Vietnamese Embassy in Washington, where he could conveniently monitor U.S. activities.

Returning to Saigon in 1965, he resumed his plotting, now against the regime headed by Nguyen Van Thieu and Nguyen Cao Ky. This time, though, his luck ran out.

Tracked down by General Thieu, he was betrayed by a Catholic priest and captured. General Thieu, ironically convinced that he was working for the CIA, had him tortured horribly. Colonel Thao died without divulging his real identity. His torturer, General Thieu's special police chief, is alive and well in the United States.

I could mention other cases, like that of my friend Pham Xuan An, who worked as a full-fledged correspondent for *Time* magazine in Saigon, an unusual position for a Vietnamese journalist.

He also furnished the U.S. Embassy with inside information—or perhaps it was "disinformation." For he was really a Communist agent, and he is now a senior official in the administration here. My attempts to see him have been fruitless.

In short, the Vietnam conflict was waged in an environment too complex and mysterious for Americans to comprehend—which is why, with all their money, materiel and manpower, the war was essentially unwinnable.●

FUEL ADJUSTMENT CHARGE—INTRODUCTION OF LEGISLATION

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. CONTE. Mr. Speaker, the homeowners in this Nation who must withstand the cold, harsh winters of the northern tier States, as well as those residents who must contend with the blistering heat of the summers in the South, have been hit hard by dramatically escalating electric bills.

I am therefore, introducing today legislation which is designed to assist the beleaguered homeowner who has watched, with horror, the fuel adjustment charge on his electric bill rise as quickly as the temperatures can fall in New England. The fuel adjustment charge has become a major component of our constituent's electric bills.

The electric utilities have been allowed by many State legislatures to pass through to the consumer the entire additional costs due to decontrol of domestic crude oil and OPEC price hikes of fuel oil used to generate electricity. This process of full pass-through does not offer any incentive to the utility to become more energy conscious.

My legislation will offer to the low-income user a rebate, and the middle-income taxpayer a tax credit. The bill provides for a credit or rebate of 33⅓ percent of their annual fuel adjustment charge. The maximum credit of $400 would be reduced by 1 percent of the consumers' income over $20,000.

With the cost of living rising so dramatically, the urgency for this legislation is apparent. We must act now to aid our consumers who are being buffeted at every turn during these difficult times. I urge your support and cosponsorship of this necessary legislation.●

WHICH COSTS MORE: AID OR NO AID?

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. BARNES. Mr. Speaker, in a recent article in Agenda, a publication of the Agency for International Development, John Sewell, President of the Overseas Development Council, poses the question, "Which costs more: Aid or no aid?" The article presents some interesting concepts of how foreign aid serves our own interests. The article refers to findings by the Presidential Commission on World Hunger, the Brandt Commission, and the Global 2000 Report to the President. The author reminds us that if we look around us we realize that even domestic troubles—such as energy, inflation, unemployment, slow growth, and immigration—cannot be resolved without attention to the developing countries.

I quote from the article: "The achievement of economic growth in one country depends increasingly on the performance of others. The South cannot grow adequately without the North. The North cannot prosper or improve its situation unless there is greater progress in the South." These words cannot be more timely. We have been hearing about a new beginning and new directions. But, sadly, we seem to be drifting farther apart from these countries that need us most.

We should look more closely at some of the tasks Sewell outlines for long-terms U.S. strategy. The United States should expand the concept of national security to include the nonmilitary aspects of our own security. We should try to indentify our needs, set long-term goals, and weave our various policies into a coordinated and comprehensive strategy. In order to do all this, the United States should exercise a new kind of leadership based on an imaginative, forward-looking approach. The tools mentioned in the article also merit our attention, including: Improving the world's monetary system; sustaining world trade, and preventing the spread of worldwide protectionism; improving world food security; increasing energy security; meeting existing commitments for foreign aid; and pledging increased future support.

In order that my colleagues have the opportunity to analyze this article, I would like to include it for the RECORD:

[From Agenda, March 1981]

WHICH COSTS MORE: AID OR NO AID

(By John W. Sewell)

In the last 12 months, a number of detailed analyses have warned that continued indifference to the needs and wants of poor people and poor countries could have disastrous consequences. These studies also advised, however, that a U.S. response would improve the prospects not only of the poor countries but of the United States as well. At the start of a new decade and a new Administration, it is important to examine what the U.S. interest and the U.S. role in Third World development are.

In early 1980, the report of the Presidential Commission on World Hunger, a commission composed largely of private U.S. citizens, concluded: "There are compelling moral, economic and national security reasons for the United States government to make the elimination of hunger the central focus of its relations with the developing world. . . . "Purposeful use of U.S. power would . . . focus and shape the idealism and generosity that is so indigenous to the American spirit."

Around the same time, the Brandt Commission (formally called the Independent Commission on International Development Issues)—a prestigious group of business representatives, former government officials, and intellectuals from five continents—released its report after two years of arguing, negotiating, and learning from one another. The commission wrote: ". . . The achievement of economic growth in one country depends increasingly on the performance of others. The South cannot grow adequately without the North. The North cannot prosper or improve its situation unless there is greater progress in the South." The report spelled out more than 90 specific actions the international community could take that would alleviate the financial, environmental, and human crises that appear to be coming. Of the report, Peter Peterson, chairman of Lehman Brothers Kuhn Loeb and one of the members of the commission, has said that the alternatives to working on negotiations to bring about change are "huge and continued economic shock; a billion people literally starving; an international financial system that could be in a state of economic crisis. . . . We have to try, if only because the stakes are too high not to try."

In the summer of 1980, yet another major statement was made about the long-term prospects facing this ever-smaller planet. "The Global 2000 Report to the President," an interagency U.S. government study, warned: "If present trends continue, the world in 2000 will be more crowded, more polluted, less stable ecologically and more vulnerable to disruption than the world we live in now. . . . Life for most people on earth will be more precarious in 2000 than it is now—unless the nations of the world act decisively to alter current trends."

These are not partisan statements. Nor are they condemnations of the actions of any group, party, or set of officials. Rather they highlight problems that cannot be solved in the span of a single congressional term or even a two-term administration.

Unless the world begins to address them, the lives of not only the world's poor but also its rich are not likely to get better and will probably get worse.

The U.S. role in solving the global problems described in detail by the Global 2000 study, the Brandt Commission, and the Presidential Commission on Hunger has been the particular focus of the Overseas Development Council (ODC). In the process, it has become clearer and clearer that not only does this country have a moral obligation and a security interest in addressing these global concerns, but even the "domestic" troubles with which we currently are preoccupied—energy, inflation, unemployment, slow growth, immigration—cannot be resolved without attention to the developing countries. These countries as a group (and some of them individually) are now significant actors in the world's economic system. Their control over oil, their ability to provide low-cost consumer goods, their growing markets for industrial-country exports, their position as major suppliers of key raw materials, and their growing involvement in the world financial system all affect the U.S. economy directly. It is therefore imperative that the United States recognize these relationships and begin to take both immediate and longer-term steps to bring its policy into accord with changing realities.

In ODC's "Agenda 1980," two major long-term development tasks for the decade were set forth: (1) to resume economic growth, provide employment, and reduce inflation, and (2) to take major steps to eliminate hunger and other aspects of absolute poverty by the end of the century. These are not tasks for the United States to undertake alone. They will require the commitment and cooperation of all countries. Yet the United States, in particular, must recognize that its official actions and those of its private sectors—profit and non-profit—affect the lives of billions of people and that its contribution to a program of global cooperation therefore is vital.

In order to make that contribution, however, the United States must first redefine and expand the concept of its own "national security," decide what it needs and wants from changes in the internatinal economic order, and develop a leadership style to deal with the domestic limitations on a development cooperation policy. Let us look briefly at each of these three tasks.

EXPANDING THE CONCEPT OF NATIONAL SECURITY

U.S. policy to date has viewed developing countries primarily from the standpoint of how they figure in the strategic relationship between the United States and the Soviet Union. Defining U.S. security solely in military terms, however, obscures our equally important economic and political foreign policy objectives in the Third World. Military force has little impact on population growth, deforestation, or migration.

IDENTIFYING U.S. NEEDS

So far, the United States has put more emphasis on attacking developing-country demands for a "new international economic order" than on putting forth imaginative proposals of its own. The United States urgently needs to set its long-term goals and to weave its various policies into a coordinated and comprehensive strategy.

EXERCISING A NEW KIND OF LEADERSHIP

The changing nature and relationship of domestic and international problems requires a new kind of leadership. An imaginative, forward-looking approach is needed (1) to cope with global problems even in the face of competing national interests, (2) to organize the U.S. government to deal more creatively and efficiently with developing countries, (3) to deal with domestic economic dislocation resulting from changing international conditions and (4) to share international decisionmaking with other countries.

These long-term tasks at best can only be started during the first part of 1981. There is, however, a whole set of actions that the United States could take soon to advance development goals and to set the stage for longer-term changes. U.S. action on the program outlined below would have a minimum impact on the federal budget. Even in a period of budgetary constriction, U.S. leadership on such a program would greatly help to prevent further deterioration in the global economy and could go a long way toward meeting this country's long-term interests. In other words, the real costs of acting on these proposals will be far less than the costs of not acting.

The short-term program of action proposed in the Overseas Development Council's "Agenda 1980" includes:

IMPROVING THE WORLD'S MONETARY SYSTEM

The United States should support measures to augment the revenue of the International Monetary Fund (IMF), increase the Special Drawing Rights (SDRs) available in developing countries, make conditions attached to IMF loans less stringent, increase private lending and double the amount of money the World Bank may lend (which can prudently be done even without expanding its capital base).

SUSTAINING WORLD TRADE

The United States and other countries should actively resist pressures toward further protectionism, implement the codes agreed upon in the recent multilateral trade negotiations, increase the amount of trade credit available to developing countries, and resume negotiations to stabilize the prices of many primary commodities exported by developing countries.

IMPROVING WORLD FOOD SECURITY

The United States should press to reopen negotiations on an international wheat reserve, increase support for expanding agricultural production in food-deficit developing countries, and increase the amount of emergency food aid available to countries or regions hard hit by short-term food shortages (e.g., the countries of sub-Saharan Africa, troubled by a second year of drought and large numbers of refugees).

INCREASING ENERGY SECURITY

The United States should work with others to explore the possibility of an international agreement on oil and to increase international cooperation in finding and producing more oil and gas and in developing new energy sources, particularly in the developing countries.

MEETING EXISTING COMMITMENTS

The United States should at a minimum resist pressures to further cut development assistance, continue its critical role in emergency relief programs and meet its pledges to multilateral institutions.

PLEDGING INCREASED FUTURE SUPPORT

The United States should commit itself to increasing its development assistance. It should create (along with other countries) a special program to help low-income countries, make repayments on past development loans available for current needs, and explore various forms of "automatic" transfers.

Neither the short-term nor the long-term actions outlined here will solve the world's human or economic problems—but they could go a long way toward bringing about improvement for rich countries as well as poor countries. The United States is still a major economic power, and its official actions as well as the decisions and actions of its private banks and private voluntary organizations affect people in other countries as well.

For all its current difficulties, the United States could do much to resolve the deadlock that has dominated so many international discussions.●

COAL AND THE NATION'S PORTS

HON. BOB LIVINGSTON

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. LIVINGSTON. Mr. Speaker, I believe the Members of this body will benefit from a speech given recently by Mr. Carl E. Bagge, who is president of the National Coal Association, to the American Association of Port Authorities.

Mr. Bagge's address entitled, "Coal and the Nation's Ports" gives an excellent introduction and overview of the environmental and export issues of coal. I commend the address to my colleagues:

COAL AND THE NATION'S PORTS

(By Carl E. Bagge)

INTRODUCTION

Governor James and directors of our nation's ports:

All of us are familiar with the continuing deficit in the balance of trade and the urgent need for the United States to become more productive and competitive in world markets. But, because there has been so much discussion about our trade deficit, not much recognition is given to the turnaround in our share of total world exports. After a quarter-century of steady decline, our share began to rise in 1977. That is a heartening trend and one in which coal is—and will continue to be—one of the star performers for the U.S.

We heard this morning about the prospects for substantial growth in world coal trade. Now I would like to shift the focus of this conference to first identifying and then dealing with the problems which today impede the United States from capturing an even larger share of that exploding world coal trade.

My brief, obviously, is on behalf of the coal producers. But whatever is done to achieve a more modern, efficient port system for the handling of coal will accrue to the benefit of the entire industry and other users of the nation's ports. So we're really concerned about not just what is good for coal, but what is in the nation's interest.

Today, I will talk about matters which are essential in assessing U.S. coal's emerging role in the world energy market.

First, I will review the current coal export situation.

Second, I will discuss two significant matters affecting our ability to increase U.S. coal exports: the dredging of ports and harbor facilities, and granting fast-tracking

permitting treatment for port and harbor projects.

Let's look first at the current coal export situation.

I. THE CURRENT SITUATION

The current boom in the coal export market has been marked by unparalleled optimism. On the other hand, realistically we see a crisis situation in which increased foreign coal demand has overwhelmed the capabilities of our ports. As a result, U.S. coal has become less competitive and overseas customers have become leery of entering into longer term agreements when our ability to deliver is in question and demurrage charges have greatly exceeded expectations.

Of course, neither the producers, the railroads nor the ports have been sitting on our hands. In the short year since the explosion of the export steam coal market, there has been a very heartening response and even some accomplishments.

A. Private sector response

1. Record-setting coal exports achieved in 1980

First, despite the problems created by increased demand, a record amount of U.S. coal was exported in 1980. No one has ever accused me of doubting the ability of the private sector to fulfill the needs of the market. Yet, we seriously underestimated the capabilities of the nation's transportation and transshipping system to handle significantly greater amounts of coal for export.

Throughout the year we were surprised by having to revise upward our annual forecast of coal exports, simply because of the continuing large volumes of coal moved over piers. Our first forecast, released early in 1980, pegged overseas exports at 50 million tons, a respectable increase over 1979's 45 million. By May, newer data caused us to increase the forecast of overseas shipments to 55 million tons. Then in August it was increased to 65 million tons. But as the year moved along, we could see that even that figure was too low.

In January of this year, the government released its statistics, showing an incredible 72.8 million tons of U.S. coal had gone to overseas buyers during 1980. I like that kind of pleasant surprise. In fact, I welcome it. It bodes well for both our industries and means that your problems at the ports are finally going to get the attention they deserve because of coal.

I should point out that it wasn't without a great deal of cooperation from port authorities and a measure of old-fashioned ingenuity that this record was achieved. At Baltimore, for example, coal is being loaded onto barges . . . moved by barge to an unutilized pier . . . and then reloaded by portable crane from the barge to oceangoing vessels.

Still, record loadings notwithstanding, long lines of ships have become a permanent feature along the East Coast. At one point as many as 150 colliers were lying at anchor waiting. And those lines are going to be around for a while. But how long—depends on us.

One of the effects of the congestion at the ports was that coal sales were lost. You can appreciate how coal producers—who have at least 100 million tons of idle capacity, and 20,000 miners waiting to be put back to work—felt about that. Despite the extraordinary effort put forth in pushing existing facilities to the limit, between 10 and 15 million tons of demand could not be met.

The coal that did leave our shores added over 4.5 billion dollars to the balance of payments, but the lost tonnage cost the country another half-billion dollars. This leads to the second point I want to make about our response to the challenge.

2. Expansion of existing port facilities

During the past year a significant expansion of coal export facilities has been initiated. I won't enumerate every project underway or planned, but it is worthwhile to note several of the major projects:

In Baltimore, Island Creek Coal is building a ground storage facility and terminal which will add 15 million tons capacity at the port.

Also in Baltimore, Consolidation Coal is renovating the Canton coal pier, boosting capacity by 10 million tons.

In the Norfolk area, Massey Coal is constructing a 15 million ton-a-year terminal.

Projects in Morehead City and in Savannah will add 12.5 million tons.

The McDuffy Terminal here in Mobile will double in size.

And capacity is being added in New Orleans and on the West Coast.

All together, current activity and that which is planned will add between 100 to 150 million tons capacity to our port system in the next few years. The benefits of these initiatives are apparent, and we should begin seeing them in 1982 and early 1983.

I believe we can expect U.S. coal exporters to recapture opportunities lost to waiting ships in 1980. A significant number of potential customers never attempted to enter our market. They were discouraged by the long lines and demurrage which raised the price of U.S. coal delivered to Europe by up to $12 a ton, or 15 to 17 percent of the delivered price.

As we heard this morning, there is a growing market for U.S. coal. In a few years we no longer will suffer from having our share of this market constrained by our inability to participate in a larger way.

I was pleased to see the draft report of the President's Interagency Task Force on Coal Exports pay tribute to the efforts by private and local parties last year to stretch existing capacity to the limit and to initiate new capacity. This is a very unusual government document because it makes sense. Unusual, also, for its recognition of the private sector effort and its conclusion that no federal government involvement was needed or desirable. And secondly for its lucid exposition of the importance of dredging to U.S. participation in the expanding coal market.

II. PROBLEMS FACING US

Although all of us can take a great deal of satisfaction from the accomplishments of the past year, the challenges ahead will require even more effort. Effort in two areas:

The dredging of ports and harbors, and

Fast-track permitting treatment for port and harbor improvement projects and onshore facilities.

These will be infinitely more difficult than problems we've dealt with recently. This is because we have to deal with the federal government to solve them and that's no easy task. Both problems require Acts of Congress to solve them.

A. Dredging of ports and harbors

1. The need for dredging

The case for dredging was made very well by the Interagency Task Force on Coal Exports. That report reiterated what all of us know—that world coal trade is going to expand rapidly over the next decade and beyond. It also made the point, one perhaps not so well appreciated, that the U.S. share in this growing market is still to be determined.

Certainly, we will be a participant, if only because of the magnitude of our coal reserves, our proximity to the European market, and the desire of many of our customers—including those in the Pacific rim—to diversify supply for security reasons. But the big question is to what extent the U.S. will participate in this expanding world coal market.

The potential for major U.S. involvement exists. The Interagency Task Force report suggests that steam coal imports by European and Pacific rim countries will increase from 77 million tons in 1979 to 166 million tons in 1985. They will rise to 280 million tons by 1990, and increase to 565 million tons by 2000. Our most probable share of this market is estimated to be 28 million tons in 1985 (18 percent), rising to 64 million tons in 1990 (25 percent) and 197 million tons by the year 2000 (38 percent).

Factors influencing our position in this market are many and complex, and not all under our control, but one stands out above all others—the cost of U.S. coal delivered to Europe and to Japan and other Pacific rim countries.

Dredging channels to greater depths in those ports and harbors where coal is being loaded for overseas shipment will permit the larger 100,000 to 150,000 deadweight ton supercolliers to call at U.S. ports. It is disconcerting that we are the only coal exporting country that cannot handle 150,000-ton vessels and that we have only one harbor—Hampton Roads—that can handle 100,000-ton ships.

By capturing the economies of scale in transportation, we can reduce the delivered price of U.S. coal in Europe by $6 per ton—10 percent of the current price. That 10 percent cost savings is very important. It will augment the attraction that U.S. coal already enjoys because of the security of supply and the diversity of supply we can offer, and the close proximity to European markets. Also important, it will compensate for the higher costs of production and inland transportation of U.S. coal compared with the lower costs of our competitors in Poland, South Africa and Australia.

The cost of transporting coal to Europe, Japan and other markets will be a critically important determinant of the U.S. share of world coal trade. So dredging is crucial to capturing the volumes of coal exports to ensure full utilization of the 150 million tons of export capacity now on the drawing boards and under construction. Without the cost savings afforded by dredging, the chances of full utilization of the on-shore facilities now underway will be reduced. In other words, dredging will be as significant an influence as any on our ability to keep U.S. coal costs down and improve our competitive position in the world marketplace. This leads to another concern I have about the urgent need for dredging, and that's the issue of financing the work.

2. Financing the dredging of harbor projects

Traditionally, this has been a public responsibility carried out by the Corps of Engineers. The rationale for the Corps' role has always been that the state of harbors and ports is critical to national security and defense. Our role in international commerce was a secondary consideration.

All of us have some idea of the scope and magnitude of reductions in the national budget that the new administration is considering, and we'll know more tomorrow

when the president presents his budget to Congress.

Under the circumstances, it will not be easy to develop support within the administration for appropriation of the several billion dollars from public funds that would be required to dredge even the most essential ports and harbors. Even if money is appropriated by Congress, it undoubtedly will not be enough to cover all the projects that deserve priority consideration. Because of this, there is likely to ensue vigorous competition among various port constituencies for priority ranking on the action list. This itself could cause as much delay as in obtaining the funds in the first place.

When you take into account the present reality of the country's fiscal health and the Reagan administration's intent to cut federal expenditures, there seems to be a clear message for all of us. It is that no time should be lost in considering what financing alternatives exist—and which of them may be most desirable—for reducing the demand on the federal treasury, and thereby reduce the potential for delay in attempting to make a political decision on which ports to dredge first.

When I speak of alternative methods of financing, I have in mind proposals such as those already beginning to make their way into discussion in Washington and starting to be introduced for congressional consideration. There are legislative proposals to provide for cost-sharing with localities or private investors who would be reimbursed for their outlays—through some sort of user fee.

There hasn't been time for us to thoroughly evaluate these proposals, and we have not taken a position on them. But I am suggesting that they now ought to be given serious consideration. They do propose a novel way for financing the dredging of ports, but it could be that this is the faster way to get this urgent task accomplished. And for all of us, our interests lie in getting the job done as quickly as possible.

B. Fast-Tracking Treatment for Port and Harbor Projects

Let's move from the question of financing for dredging to the related issue of permitting. It's a problem we all must face in the coming year, because legislation is involved if we're going to achieve "fast-track" environmental review and permitting for dredging and construction of on-shore facilities.

The example at Baltimore Harbor, where dredging authorized by Congress was blocked for 11 years because of challenges brought under environmental legislation, cannot be repeated if we are to obtain a larger share of world coal trade, and expand the volume of exports of all commodities and goods. You don't need much imagination to figure out what situation we would be in if every port development project in this country required a decade of delaying litigation and a decision by the Supreme Court to get underway.

The lost advantage of lower transportation costs for all goods—not just coal—diminishes the competitive position of U.S. goods in relation to those from other countries. This causes a reduction in exports whose revenues are needed to offset the costs of imported oil, autos and other goods. And it inhibits efforts to strengthen the balance of trade and the dollar, and to increase productivity and employment in the United States. Clearly, the circumstances which have led to the federal permit process taking 21 years have to be changed if our role in world commerce is to grow, as it should and must.

Although over-regulation and environmental excesses have had their greatest effect in delaying dredging projects—for which the federal government has complete responsibility—the same conditions apply to on-shore facilities which are being built and expanded with private money. The time required to obtain permits and to conduct required environmental review may not be 20 years in these cases, but it is still too long. The potential for obstruction by those who are interested only in impeding growth and progress is too great.

It is essential to the well-being of the nation that we expedite consideration of projects and assure quick and definitive judicial review of any challenges to permits and environmental reviews that may occur.

III. CONCLUSION

Today, a confluence of factors gives rise to optimism that we can break the energy armlock applied by the OPEC powers. Once again we are challenged to give this country and our allies in Western Europe and the Pacific a greater degree of assurance of energy supply at reasonable cost. The course that we must follow will realistically recognize the needs of our society as well as our aspirations. But it will avoid the excesses inherent in the pursuit of perfection in an imperfectible world.

In developing and implementing national economic, energy and environmental policies, we must be aware of the need for reasoned balance among objectives and the necessity of avoiding rigid, absolutist approaches to the solution of problems. If that can be accomplished, there is real hope that coal will play a significant role, for any rational energy policy has to take into account and promote effective and efficient utilization of the country's most abundant and most economical energy resource.

At the outset I noted that the decline in the U.S. share of total world exports has been halted and that there is potential for increasing sharply our share of that market. The coal industry is going to be a part of that, and your ports are going to be a part of that. We can't achieve the growth that is desirable without a stronger, better port system. You've proved yourselves in the past year. You've shown what the ports can do and you've accomplished much.

I suggest that now is the time for us to take full account of our commonality of interests and to forge a new political coalition to promote rapid development and expansion of our ports and greater use of coal. Let us bring together many and diverse groups—labor, commerce, industry, our public officials—to push for what has to be done in the national interest.

In Washington, they say it's time for "A New Beginning." We can't wait. You can't wait. The nation can't wait.

I think we owe it to ourselves, and to the nation, to get moving on it . . . to capitalize on our new opportunities . . . to meet our challenges successfully. Together, we can do it, so let's go get it done!●

STATE VETERANS HOME FUNDING BILL

HON. COOPER EVANS

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981

● Mr. EVANS of Iowa. Mr. Speaker, today I have introduced the State Veterans Home Act of 1981, a bill to provide more orderly and equitable funding for veterans receiving care in State-owned veterans homes.

State veterans homes are currently receiving Federal operating funds at a fixed rate determined by statute. This rate does not take into account significant annual increases in costs due to inflation and has required frequent requests for legislative action to insure an equitable share of Federal support for State veterans homes.

This bill will provide for an annual adjustment of Federal payments based on 30 percent of the cost of providing similar care in Veterans' Administration facilities during the previous fiscal year. Federal payments will also be limited to no more than 50 percent of the average cost of providing each category of care to veterans in State veterans homes.

State veterans homes provide a valuable source of care and assistance for our veterans, frequently at a much lower cost than that of similar care provided by Veterans' Administration facilities. If State veterans homes are to continue to provide high quality care to our veterans, we must provide for funding in a manner that recognizes the impact of inflation and provides for reliable and predictable aid in order that these homes may plan for and meet the needs of veterans in the future. This legislation seeks to accomplish that.●

BILL GREEN INTRODUCES ARTS TAX REFORM BILL

HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 25, 1981
